

applications receiving first consideration for funding.

(3) *Evaluation criteria.* Agency personnel will score each application based on the evaluation criteria specified in 7 CFR 4280.117(c), 7 CFR 4280.129(c), 7 CFR 4280.178, or 7 CFR 4280.192, as applicable.

For hybrid applications, each technical report will be evaluated and scored based on its own merit. The scores for the technologies will be consolidated using a weighted average approach based on the percentage of the cost for each system to the total eligible project cost.

*Example:* A hybrid project contains a wind and solar photovoltaic components. The wind system will cost \$30,000 (75 percent of total eligible project cost) and the solar will cost \$10,000 (25 percent of total eligible project cost). The wind technical report was evaluated and assigned a total score of 22 points, while the solar report was evaluated and assigned a total score of 31 points. In this scenario, the final technical score would be assigned as follows:  $(22 \times 75 \text{ percent}) + (31 \times 25 \text{ percent}) = 24.25$ .

(4) *Applications that receive the same score.* If applications score the same and if remaining funds are insufficient to fund each such application, the Agency may distribute the remaining funds to a lower scoring application. Before this occurs, the Agency will provide the applicant of the higher scoring application the opportunity to reduce the amount of the applicant's grant request to the amount of funds available. If the applicant agrees to lower its grant request, the applicant must certify that the purposes of the project will be met and provide the remaining total funds needed to complete the project. At its discretion, the Agency may also elect to allow the remaining funds to be carried over to the next fiscal year rather than selecting a lower scoring application or distributing funds on a pro-rata basis.

## VI. Administration Information

### A. Notifications

(1) *Applicants.* The notification provisions of 7 CFR 4280.111 apply to this Notice.

**SUPPLEMENTARY INFORMATION:** The energy programs implemented under the 2008 Farm Bill continue to be a priority of the Secretary of Agriculture, the Undersecretary of Rural Development, and the Administrator of Rural Business-Cooperative Service. Over the past three plus years, we have developed reliable, successful energy programs and are looking to continue our success as we move forward. Our energy programs are making significant beneficial impacts on both rural communities and the business owners and agricultural producers that receive assistance under these programs. Benefits of our energy programs include decreasing the energy footprint of rural communities, businesses, and farms; converting renewable resources into clean energy; and creating and saving jobs.

In recognition of current budget conditions and as we approach the time for developing the next Farm Bill, we are calling together stakeholders in order for Rural Development to provide updates on the Rural Energy for America Program; to discuss ways we can leverage Agency resources, including working with private and public partners and emphasizing guaranteed loans; and to re-iterate our commitment to helping meet the President's energy independence goals. We encourage state energy partners; businesses that have used or may be looking to use our energy programs; lenders; local, state, and federal elected officials and government offices; and grant writers to participate.

Please note that, due to space limitations, participation in each stakeholder meeting will be limited and will be based on a "first-come, first-served" basis. Therefore, we encourage

you to contact, as soon as possible, the Rural Development Energy Coordinator for your state, as identified in the ADDRESSES section of this Notice, to obtain information on participating in the meeting for your state.

Lastly, please be advised that, if you participate in one of these meetings, you are responsible for your own transportation and any other costs (e.g., food) incurred in participating in the meeting.

Dated: January 12, 2012.

**DEPARTMENT OF COMMERCE**

**Submission for OMB Review;  
Comment Request**

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*Agency:* National Oceanic and Atmospheric Administration (NOAA).

*Title:* Northwest Region Gear Identification Requirements.

*OMB Control Number:* 0648–0352.

*Form Number(s):* NA.

*Type of Request:* Regular submission (revision and extension of a current information collection).

*Number of Respondents:* 946.

*Average Hours per Response:* 15 minutes.

*Burden Hours:* 3,798.

*Needs and Uses:* This request is for revision and extension of a current information collection.

The success of fisheries management programs depends significantly on regulatory compliance. The requirements that fishing gear be marked are essential to facilitate enforcement. The ability to link fishing gear to the vessel owner or operator is crucial to the enforcement of regulations issued under the authority of the Magnuson Stevens Fishery Conservation and Management Act (MSA). The marking of fishing gear is also valuable in actions concerning damage, loss, and civil proceedings. Regulations at 50 CFR 660.219 and 660.319 specify fishing gear must be marked with the vessel's official number, federal permit or tag number, or some other specified form of identification. The regulations further specify how the gear is to be marked
