[Project No. 14341-000]

#### Longview Energy Exchange, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On January 3, 2012, Longview Energy Exchange, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Longview Pumped Storage Project (project) to be located Ash Fork City, Yavapai County, Arizona. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) Two upper reservoirs constructed of rock fill each with a dam drainage system; (2) a single lower reservoir dam constructed of earth fill materials with an internal dam drainage system; (3) concrete inlet-outlet structures at both upper reservoirs equipped with trash racks; (4) water conductors constructed of concrete-lined pressure tunnels; (5) three 12.5-foot-diameter penstocks serving the pump-turbine units associated with both upper reservoirs; (6) surge control facilities; (7) a 500-foot-long by 100-foot-wide and 150-foot-high reinforced concrete powerhouse containing 6 units; (8) a switchyard to be located near the powerhouse; (9) a 38-mile-long, 500-kilovolt (kV) transmission line

extending from the project to an interconnection with the existing Arizona Public Service owned and operated Eldorado-Moenkopi 500-kV line; (10) a 27-mile-long, 500-kilovolt (kV) transmission line extending from the project to an interconnection with an existing Western Area Power Administration owned and operated 230-kV (to be upgraded to 500-kV); and (11) appurtenant facilities. The estimated annual generation of the Longview Pumped Storage Project would be 35,040 gigawatt-hours.
