### Bureau of Ocean Energy Management

#### Gulf of Mexico (GOM), Outer Continental Shelf (OCS), Central Planning Area (CPA), Oil and Gas Lease Sale for the 2007-2012 5-Year OCS Program

**AGENCY:** Bureau of Ocean Energy  
 Management (BOEM), Interior.

**ACTION:** Notice of Availability (NOA) of  
 a Final Supplemental Environmental  
 Impact Statement (EIS).

*Authority:* This NOA is published  
 pursuant to the regulations (40 CFR part  
 1503) implementing the provisions of  
 the National Environmental Policy Act  
 (NEPA) of 1969, as amended (42 U.S.C.  
 4321 *et seq.* (1988)).

**SUMMARY:** BOEM has prepared a Final  
 Supplemental EIS for CPA Consolidated  
 Lease Sale 216/222, an oil and gas lease  
 sale that is tentatively scheduled for  
 June 2012, which will be the final lease  
 sale in the 2007-2012 5-Year OCS Oil  
 and Gas Leasing Program. The proposed  
 sale is in the GOM's CPA off the States  
 of Louisiana, Mississippi, and Alabama.  
 This Final Supplemental EIS updates,  
 for CPA Lease Sale 216/222,  
 environmental and socioeconomic  
 analyses that were originally conducted  
 in an EIS that was completed in April  
 2007 and entitled, Gulf of Mexico OCS  
 Oil and Gas Lease Sales: 2007-2012;  
 Western Planning Area (WPA) Sales  
 204, 207, 210, 215, and 218; Central  
 Planning Area (CPA) Sales 205, 206,  
 208, 213, 216, and 222, Final EIS (OCS  
 EIS/EA MMS 2007-018) (Multisale EIS).  
 This Final Supplemental EIS also  
 updates, for CPA Lease Sale 216/222,  
 environmental and socioeconomic

analyses originally conducted in an EIS  
 that was completed in September 2008  
 and entitled: GOM OCS Oil and Gas  
 Lease Sales: 2009-2012; CPA Sales 208,  
 213, 216, and 222; WPA Sales 210, 215,  
 and 218; Final Supplemental EIS (OCS  
 EIS/EA MMS 2008-041) (2009-2012  
 Supplemental EIS).

**SUPPLEMENTARY INFORMATION:** BOEM  
 developed the Final Supplemental EIS  
 for CPA Lease Sale 216/222 in order to  
 consider new circumstances and  
 information arising from, among other  
 things, the *Deepwater Horizon* event.  
 This Final Supplemental EIS provides  
 updates on the baseline conditions and  
 potential environmental effects of oil  
 and natural gas leasing, exploration,  
 development, and production in the  
 CPA. BOEM conducted an extensive  
 search for new information made  
 available since completion of the  
 Multisale EIS and the 2009-2012  
 Supplemental EIS and in consideration  
 of the *Deepwater Horizon* event,  
 including scientific journals; interviews  
 with personnel from academic  
 institutions and Federal, State, and local  
 government agencies; and available  
 scientific data and information from  
 academic institutions and Federal,  
 State, and local government agencies.  
 BOEM has reexamined the potential  
 impacts associated with the proposed  
 CPA lease sale and the proposed lease  
 sale's incremental contribution to the  
 cumulative impacts on environmental  
 resources and socioeconomic factors.  
 This analysis considers both routine  
 activities and accidental events, and  
 potentially large-scale, events. Like the  
 Multisale EIS and the 2009-2012  
 Supplemental EIS, the oil and gas  
 resource estimates and scenario  
 information for this Final Supplemental  
 EIS are presented as ranges that would  
 likely be involved as a result of this  
 proposed lease sale.

*Final Supplemental EIS Availability:*  
 To obtain a single printed or CD-ROM  
 copy of the Final Supplemental EIS for  
 CPA Lease Sale 216/222, you may

#### **SUPPLEMENTARY INFORMATION:**

##### **Introduction**

With this notice, we announce the completion of the CCP process for Columbia NWR. We started this process through a notice in the **Federal Register** (74 FR 25576; May 28, 2009). We released the draft CCP/EA to the public, announcing and requesting comments in a notice of availability in the **Federal Register** (76 FR 45600; July 29, 2011).

We announce our CCP decision and the availability of a FONSI for Columbia NWR in accordance with the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd-668ee) (Refuge Administration Act) and National Environmental Policy Act (NEPA) (40 CFR 1506.6(b)) requirements. We prepared an analysis of environmental impacts, which we included in the EA that accompanied the draft CCP.

The CCP will guide us in managing and administering Columbia NWR for the next 15 years. The selected alternative, as described in the final CCP, is a combination of actions from alternatives 2 and 3 in the draft CCP and is the basis for management direction.

##### **Background**

The Refuge Administration Act, as amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify compatible wildlife-dependent recreational opportunities available to the public,

including opportunities for compatible hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Refuge Administration Act.

#### **Comments**

We solicited comments on the draft CCP/EA for the refuge from July 29, 2011, to August 29, 2011 (76 FR 45600). All letters and comments received were thoroughly evaluated and considered in the selection of a final alternative. The only change to the alternatives in the draft CCP was modifying the overnight closure of Morgan Lake Road to allow for access starting 1½ hours before legal hunting time and ending 1½ hours after legal hunting time during State hunting seasons.

#### **Selected Alternative**

All actions in the selected alternative are subject to available funding and any other compliance requirements. Under the selected alternative, refuge management will continue much as is, consistent with available funding and staffing, except that 175 acres of emergent marsh wetlands in Marsh Unit III will be converted to riparian habitat, with other wetlands to potentially follow based on the success of the first conversion. The Crab Creek channel will be restored, and stream restoration will be a priority to provide for steelhead and redband trout and improve riparian areas for migrating neotropical birds. Specialized habitats (e.g., rock outcroppings) will receive more planned attention. Grasslands will be maintained to provide for species like the long-billed curlew, and cooperative farming agreements will continue to provide green forage and grains for geese, waterfowl, and Sandhill cranes, while emphasizing low-impact techniques. Habitats will be maintained and protected for loggerhead shrikes, sagebrush lizards, and a variety of raptors. Management of State and Federal species of concern will be emphasized. Refuge lands will continue to be managed using a mix of natural processes and substantial management intervention. For example, many wetland areas are allowed to follow natural succession—although noxious weed control, prescribed fire, and other maintenance actions are undertaken—but several moist soil management areas require water level manipulation, dike maintenance, extensive soil preparation, planting, and other treatments. Land transfers will be pursued to provide continuous blocks of habitats and simplify management.
