NUCLEAR REGULATORY COMMISSION

DEPARTMENT OF HOMELAND SECURITY

[NRC-2012-0015]

Memorandum of Understanding Between the U.S. Nuclear Regulatory Commission and the Department of Homeland Security Regarding Consultation Concerning Potential Vulnerabilities of the Location of Proposed New Utilization Facilities; Revision 1

I. Purpose

This Memorandum of Understanding (MOU) establishes a process to implement the provisions of Section 657 of the Energy Policy Act of 2005 (EPA), Pub. L. 109-58, 119 Stat. 594, 814 (2005). Section 657 states:

SEC. 657. DEPARTMENT OF HOMELAND SECURITY CONSULTATION.

Before issuing a license for a utilization facility, the Nuclear Regulatory Commission shall consult with the Department of Homeland Security concerning the potential vulnerabilities of the location of the proposed facility to terrorist attack.

II. Background

Nuclear Regulatory Commission

Pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2133, the U.S. Nuclear Regulatory Commission (NRC) is responsible for licensing and regulating the construction and operation of commercial nuclear power plants (known as "utilization facilities") in the United States to protect the health and safety of the public and to promote the common defense and security. In conducting its review of applications for such facilities pursuant to the Commission's implementing regulations in Title 10 of the Code of Federal Regulations (10 CFR) Parts 50 and 52, the NRC must, among other matters, determine the suitability of the site for the proposed facility.

Among the provisions pertaining to the determination of site suitability, issues associated with the common defense and security are, as a general matter, addressed through the requirements of 10 CFR 100.21(f). This provision requires applicants to demonstrate that the site characteristics of the proposed location are such "that adequate security plans and measures can be developed." In conducting its technical review of this portion of the application, the NRC addresses potential vulnerabilities of the location of the proposed facility to terrorist attack; this evaluation focuses on assessing the impact of the following factors: (1) pedestrian and vehicular land approaches, (2) railroad approaches, (3) waterborne approaches, (4) potential "high-ground" adversary advantage areas, (5) nearby road and/or transportation routes, and (6) nearby hazardous materials facilities, airports, dams, military and chemical facilities, and pipelines.

Department of Homeland Security

The Department of Homeland Security (DHS), pursuant to the Homeland Security Act (HSA) of 2002, Public Law 107-296, 116 Stat. 2135; Homeland Security Presidential Directive 7 (HSPD-7); and the National Infrastructure Protection Plan of 2006, has the authority and responsibility to lead the unified national effort to secure America by preventing, deterring, and responding to terrorist attacks and other
