

analysts will study response rates across these varying strategies with the goal of identifying the best options for use with a Push Internet methodology, which will undergo additional validation in future mid-decade census tests. Census Bureau planners have not yet finalized the contact strategy approaches for this test. The proposed plan, however, is to contact sampled households using one of six contact strategies. In addition to a control panel that uses the standard full implementation contact strategy, the experimental treatments currently under consideration are, in brief:

- Eliminating the advance letter mailing
- Adding another reminder before mailing a paper questionnaire
- Mailing the questionnaire on an accelerated schedule
- A reminder to be sent after the questionnaire mailing
- Modified wording for all mailing pieces

The Census Bureau plans to conduct the 2012 National Census Test data collection in late summer or early fall 2012. The specific data collection start and end dates along with the duration of the data collection period are still under consideration. The Census Bureau, however, expects that the duration of the data collection period will be between one and two months. This includes both the collection of self-response interviews via the Internet and paper questionnaires (returned by mail) and the real-time telephone reinterview following the Internet data collection.

In accordance with Section 303.3(a) of the regulations (15 CFR 303.3(a)), the total quantity of duty-free insular watches and watch movements for calendar year 2012 is 1,866,000 units for the USVI. This amount was established

The criteria for the calculation of the calendar year 2012 duty-exemption allocations among program producers within a particular territory are set forth in Section 303.14 of the regulations (15 CFR 303.14). The Departments have verified and, where appropriate, adjusted the data submitted in application form ITA-334P by USVI program producers and have inspected these producers' operations in accordance with Section 303.5 of the regulations (15 CFR 303.5).

In calendar year 2011, USVI program producers shipped 53,744 watches and watch movements into the customs territory of the United States under the Act. The dollar amount of corporate income taxes paid by USVI program producers during calendar year 2011, and the creditable wages and benefits paid by these producers during calendar year 2011 to residents of the territory was a combined total of \$1,036,055.

The calendar year 2012 USVI annual duty exemption allocations, based on the data verified by the Departments, are as follows:
