

U.S. Department of Transportation, 1200 New Jersey Avenue SE., Washington, DC 20590.

NOTIFICATION PROCEDURE:

Individuals wishing to know if their records appear in this system may make a request in writing to the System Manager. The request must include the requester's name, mailing address, telephone number, and/or email address; a description and the location of the records requested; and verification of identity (such as a statement, under penalty of perjury), that the requester is the individual who he or she claims to be. Requests must conform to the Privacy Act regulations set forth in 49 CFR part 10. You must verify your identity by providing either a notarized statement or a statement signed under penalty of perjury stating that you are the person that you say you are. You may fulfill this requirement by: (1) Having your signature on your request letter witnessed by a notary; or (2) including the following statement immediately above the signature on your request letter: "I declare under penalty of perjury that the foregoing is true and correct. Executed on [date]." If you request information about yourself and do not follow one of these procedures, your request cannot be processed. Requests not following these procedures will not be processed.

RECORD ACCESS PROCEDURES:

Same as indicated under "Notification Procedure".

PROCEDURE TO CONTEST RECORDS:

Same as indicated under "Notification Procedure".

RECORD SOURCE CATEGORIES:

ME information is obtained from application submissions provided by the medical examiner. CMV driver information is provided by the driver at the time of medical examination to the ME for submission to FMCSA.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

Dated: April 17, 2012.

Claire W. Barrett,

*Departmental Chief Privacy Officer,
Department of Transportation.*

BILLING CODE 4910-62-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Consensus Standards, Light-Sport Aircraft

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of availability; request for comments.

SUMMARY: This notice announces the availability of three new and three revised consensus standards relating to the provisions of the Sport Pilot and Light-Sport Aircraft rule issued July 16, 2004, and effective September 1, 2004. ASTM International Committee F37 on Light Sport Aircraft developed the new and revised standards with Federal Aviation Administration (FAA) participation. By this notice, the FAA finds the new and revised standards acceptable for certification of the specified aircraft under the provisions of the Sport Pilot and Light-Sport Aircraft rule.

DATES: Comments must be received on or before June 22, 2012.

ADDRESSES: Comments may be mailed to: Federal Aviation Administration, Small Airplane Directorate, Programs and Procedures Branch, ACE-114, Attention: Terry Chasteen, Room 301, 901 Locust, Kansas City, Missouri 64106. Comments may also be emailed to: 9-ACE-AVR-LSA-Comments@faa.gov. All comments must be marked: Consensus Standards Comments, and must specify the standard being addressed by ASTM designation and title.

FOR FURTHER INFORMATION CONTACT:

Terry Chasteen, Light-Sport Aircraft Program Manager, Programs and Procedures Branch (ACE-114), Small Airplane Directorate, Aircraft Certification Service, Federal Aviation Administration, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone (816) 329-4147; email: terry.chasteen@faa.gov.

SUPPLEMENTARY INFORMATION: This notice announces the availability of three new and three revised consensus standards relating to the provisions of the Sport Pilot and Light-Sport Aircraft rule. ASTM International Committee F37 on Light Sport Aircraft developed the new and revised standards. The FAA expects a suitable consensus standard to be reviewed at least every two years. The two-year review cycle will result in a standard revision or reapproval. A standard is issued under a fixed designation (i.e., F2244); the number immediately following the

designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A reapproval indicates a two-year review cycle completed with no technical changes. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval. A notice of availability (NOA) will only be issued for new or revised standards. Reapproved standards issued with no technical changes or standards issued with editorial changes only (i.e., superscript epsilon (ε)) are considered accepted by the FAA without need for a NOA.

Comments Invited: Interested persons are invited to submit such written data, views, or arguments, as they may desire. Communications should identify the consensus standard number and be submitted to the address specified above. All communications received on or before the closing date for comments will be forwarded to ASTM International Committee F37 for consideration. The standard may be changed in light of the comments received. The FAA will address all comments received during the recurring review of the consensus standard and will participate in the consensus standard revision process.

Background: Under the provisions of the Sport Pilot and Light-Sport Aircraft rule, and revised Office of Management and Budget (OMB) Circular A-119, "Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities", dated February 10, 1998, industry and the FAA have been working with ASTM International to develop consensus standards for light-sport aircraft. These consensus standards satisfy the FAA's goal for airworthiness certification and a verifiable minimum safety level for light-sport aircraft. Instead of developing airworthiness standards through the rulemaking process, the FAA participates as a member of Committee F37 in developing these standards. The use of the consensus standard process assures government and industry discussion and agreement on appropriate standards for the required level of safety.

Comments on Previous Notices of Availability

In the Notice of Availability (NOA) issued on July 20, 2011, and published in the **Federal Register** on July 29, 2011 the FAA asked for public comments on the new and revised consensus standards accepted by that NOA. The comment period closed on September

27, 2011. No public comments were received regarding the standards accepted by this NOA.

Consensus Standards in This Notice of Availability

The FAA has reviewed the standards presented in this NOA for compliance with the regulatory requirements of the rule. Any light-sport aircraft issued a special light-sport airworthiness certificate, which has been designed, manufactured, operated and maintained, in accordance with this and previously accepted ASTM consensus standards provides the public with the appropriate level of safety established under the regulations. Manufacturers who choose to produce these aircraft and certificate these aircraft under 14 CFR part 21, §§ 21.190 or 21.191 are subject to the applicable consensus standard requirements. The FAA maintains a listing of all accepted standards on the FAA Web site.

The Revised Consensus Standard and Effective Period of Use

The following previously accepted consensus standards have been revised, and this NOA is accepting the later revision. Either the previous revision or the later revision may be used for the initial certification of special light-sport aircraft until October 22, 2012. This overlapping period of time will allow aircraft that have started the initial certification process using the previous revision level to complete that process. After October 22, 2012, manufacturers must use the later revision and must identify the later revision in the Statement of Compliance for initial certification of special light-sport aircraft unless the FAA publishes a specific notification otherwise. The following Consensus Standards may not be used after October 22, 2012:

ASTM Designation F2245–10c, titled: Standard Specification for Design and Performance of a Light Sport Airplane.

ASTM Designation F2352–09, titled: Standard Specification for Design and Performance of Light Sport Gyroplane Aircraft.

ASTM Designation F2564–09, titled: Standard Specification for Design and Performance of a Light Sport Glider

The Consensus Standards

The FAA finds the following new and revised consensus standards acceptable for certification of the specified aircraft under the provisions of the Sport Pilot and Light-Sport Aircraft rule. The following consensus standards become effective April 23, 2012 and may be used unless the FAA publishes a specific notification otherwise:

ASTM Designation F2245–11, titled: Standard Specification for Design and Performance of a Light Sport Airplane.

ASTM Designation F2352–11, titled: Standard Specification for Design and Performance of Light Sport Gyroplane Aircraft.

ASTM Designation F2564–11, titled: Standard Specification for Design and Performance of a Light Sport Glider

ASTM Designation F2745–11, titled: Standard Specification for Required Product Information to be Provided with an Airplane.

ASTM Designation F2839–11, titled: Standard Practice for Compliance Audits to ASTM Standards on Light Sport Aircraft.

ASTM Designation F2840–11, titled: Standard Practice for Design and Manufacture of Electric Propulsion Units for Light Sport Aircraft.

Availability

These consensus standards are copyrighted by ASTM International, 100 Barr Harbor Drive, PO Box C700, West Conshohocken, PA 19428–2959. Individual reprints of a standard (single or multiple copies, or special compilations and other related technical information) may be obtained by contacting ASTM at this address, or at (610) 832–9585 (phone), (610) 832–9555 (fax), through service@astm.org (email), or through the ASTM Web site at www.astm.org. To inquire about standard content and/or membership or about ASTM International Offices abroad, contact Christine DeJong, Staff Manager for Committee F37 on Light Sport Aircraft: (610) 832–9736, cdejong@astm.org.

Issued in Kansas City, Missouri, on February 22, 2012.

John R. Colomy,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Release From Federal Grant Assurance Obligations for Sacramento International Airport (SMF), Sacramento, CA

AGENCY: Federal Aviation Administration, US DOT.

ACTION: Notice of Request to Release Airport Land.

SUMMARY: The Federal Aviation Administration (FAA) proposes to rule and invites public comment on the

application for a release of two parcels of land comprising approximately 6.50 acres of airport property at the Sacramento International Airport, California. The County of Sacramento proposes to release the 6.50 acres for sale to the California's Reclamation District 1000 at fair market value. The two parcels of land are occupied in their entirety by a storm water drainage canal and pumping plant owned and operated by Reclamation District 1000 and do not serve any aviation purposes. The property serves as a regional drainage canal and pumping plant to support facilities for transporting storm water away from developed and undeveloped property, including part of the Sacramento International Airport in the southwest section of the Natomas Basin.

DATES: Comments must be received on or before May 23, 2012.

FOR FURTHER INFORMATION CONTACT:

Comments on the request may be mailed or delivered to the FAA at the following address: Robert Y. Lee, Airports Compliance Specialist, Federal Aviation Administration, Airports Division, **Federal Register** Comment, 1000 Marina Boulevard, Suite 220, Brisbane, CA 94005. In addition, one copy of the comment submitted to the FAA must be mailed or delivered to Mr. Greg Rowe, Senior Environmental Analyst, County of Sacramento, 6900 Airport Boulevard, Sacramento, California 95837.

SUPPLEMENTARY INFORMATION: In accordance with the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century (AIR 21), Public Law 106–181 (Apr. 5, 2000; 114 Stat. 61), this notice must be published in the **Federal Register** 30 days before the Secretary may waive any condition imposed on a federally obligated airport by surplus property conveyance deeds or grant agreements.

The following is a brief overview of the request:

The County of Sacramento, California requested a release from grant assurance obligations for approximately 6.50 acres of land that is not contiguous to the airport and located southwest of the airport between the Sacramento River and Interstate Highway 5. The property was originally acquired as two separate parcels, one measuring 6.27 acres and the other 0.18 acres. The Federal Aviation Administration's Federal Aid to Airports Program, FAAP 9–04–130–6401, provided partial grant funding to acquire the property.

Due to the parcels' location and use, the property has no alternative airport use. The property was improved for flood control purpose and continues to serve that purpose. The larger parcel
