expenses in a model pagophilic species, the Weddell seal, as a function of size and body condition on a small temporal scale for specific environments, activities and swim speeds.

The applicant requests a modification to her permit to allow:

(1) Increase the number of seals from 40–55 (pup through adult) over the life of the permit. The addition of the 15 additional seals takes into account the loss of tags and incomplete datasets from irretrievable equipment. The additional seals will allow a minimum of 10 complete datasets from each age class (pup, juvenile, and adult).

(2) Authorization to conduct a full necropsy with collection of blood and tissue samples for import into the U.S. for post-mortem analysis.

Location: ASPA 121–Cape Royds, and McMurdo Sound.

Dates: October 2, 2012 to February 28, 2013.
