

operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart WWWW, as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for the EPA regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 16 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of reinforced plastic composites production facilities.

Estimated Number of Respondents: 552.

Frequency of Response: Initially, and semiannually.

Estimated Total Annual Hour Burden: 19,312.

Estimated Total Annual Cost: \$1,874,090, which includes \$1,850,478 in labor costs, no capital/startup costs, and \$23,612 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an increase in burden hours to the both the respondents and the Agency as compared to the most recently approved ICR. The increase is due to industry growth in the past three years, resulting in additional number of respondents that are subject to this standard. The growth in respondent universe also results in an increase in the total O&M costs.

In addition, there is an increase in burden costs to both the respondent and the Agency due to an adjustment in labor rates. This ICR uses the most recent labor rates from the Bureau of Labor Statistics in calculating the labor costs.

Abstract: The NESHAP for Paper and Other Web Coating is subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes or additions to the Provisions are specified at 40 CFR part 63, subpart JJJJ.

Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Reports, at a minimum, are required semiannually.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 22 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of paper and other coating facilities.

Estimated Number of Respondents: 233.

Changes in the Estimates: There is an increase in labor hours and costs for both the respondents and the Agency from the most recently approved ICR. The increase in burden cost is due to

adjustments in labor rates. This ICR uses updated labor rates from the U.S. Bureau of Labor Statistics to calculate burden costs. The increase in labor hours is due to an increase in the number of respondents subject to the standard from the previous ICR. The growth in the respondent universe also results in an increase of the total O&M costs to the respondents.
