## II. Background

In the **Federal Register** of July 13, 2012 (77 FR 41346) (FRL-9353-9), EPA issued a proposed rule pursuant to FFDCA section 408(e), 21 U.S.C. 346a (d)(3). The Agency-initiated rule proposed that 40 CFR 180.662 be amended by establishing tolerances for trinexapac-ethyl in or on barley, bran at 2.5 ppm; sugarcane, molasses at 2.5 ppm; and wheat, bran at 6.0 ppm. The rule also proposed amending the existing trinexapac-ethyl tolerances for wheat, forage from 1.5 to 1.0 ppm and wheat, middlings from 6.5 to 10.5 ppm, as well as changing the existing commodity definition for “hog, kidney” to “hog, meat by-products” in order to correct inadvertent errors in the final rule tolerance table for trinexapac-ethyl that was published in the **Federal Register** on March 2, 2012 (77 FR 12740) (FRL-9337-9). The proposed rule included a summary of the exposure assessment prepared by the Agency and explained the basis for EPA’s conclusion that there is a reasonable certainty that no harm will result to the general population or to infants and children, as a result of aggregate exposure to trinexapac-ethyl residues. A comment was received in response to the proposed rule. EPA’s response to that comment is discussed below in Unit III.

## III. Response to Comment

An anonymous citizen objected to the presence of any pesticide residues on food. The Agency understands the commenter’s concerns and recognizes that some individuals believe that pesticides should be banned completely. However, the existing legal framework provided by section 408 of the Federal Food, Drug and Cosmetic

Act (FFDCA) contemplates that tolerances greater than zero may be set when persons seeking such tolerances or exemptions have demonstrated that the pesticide meets the safety standard imposed by that statute. This citizen’s comment appears to be directed at the underlying statute and not EPA’s implementation of it; the citizen has made no contention that EPA has acted in violation of the statutory framework.

## IV. Conclusion

Given that EPA received no meaningful comment on its proposal and based on the information, analysis, and conclusions in the July 13, 2012 proposal (77 FR 41346) (FRL-9353-9), tolerances are established, as proposed, for residues of trinexapac-ethyl, in or on barley, bran at 2.5 ppm; sugarcane, molasses at 2.5 ppm; and wheat, bran at 6.0 ppm. In addition, as proposed, the tolerance level for wheat, forage is revised from 1.5 to 1.0 ppm, the tolerance level for wheat, middlings is revised from 6.5 to 10.5 ppm and the commodity definition, “hog, kidney” is revised to “hog, meat by-products.”

## V. Statutory and Executive Order Reviews

This final rule establishes tolerances under FFDCA section 408(d) on EPA’s own initiative. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled “Regulatory Planning and Review” (58 FR 51735, October 4, 1993). Because this final rule has been exempted from review under Executive Order 12866, this final rule is not subject to Executive Order 13211, entitled “Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use” (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled “Protection of Children from Environmental Health Risks and Safety Risks” (62 FR 19885, April 23, 1997). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled “Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations” (59 FR 7629, February 16, 1994).

Pursuant to the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agency hereby certifies that these proposed tolerances will not have significant negative economic impact on a substantial number of small entities.

Establishing a pesticide tolerance or an exemption from the requirement of a pesticide tolerance is, in effect, the removal of a regulatory restriction on pesticide residues in food, and thus such an action will not have any negative economic impact on any entities, including small entities.

This final rule directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled “Federalism” (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled “Consultation and Coordination with Indian Tribal Governments” (65 FR 67249, November 9, 2000) do not apply to this final rule. In addition, this final rule does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA) (15 U.S.C. 272 note).

## VI. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

**Tennessee: Final Authorization of  
State Hazardous Waste Management  
Program Revisions**

**AGENCY:** Environmental Protection  
Agency (EPA).

**ACTION:** Immediate final rule.

**SUMMARY:** Tennessee has applied to EPA  
for final authorization of the changes to  
its hazardous waste program under the  
Resource Conservation and Recovery

Act (RCRA). EPA has determined that  
these changes satisfy all requirements  
needed to qualify for final authorization,  
and is authorizing the State’s changes  
through this immediate final action.

EPA is publishing this rule to authorize  
the changes without a prior proposal  
because we believe this action is not  
controversial and do not expect  
comments that oppose it. Unless we  
receive written comments that oppose  
this authorization during the comment  
period, the decision to authorize  
Tennessee’s changes to its hazardous  
waste program will take effect. If we  
receive comments that oppose this  
action, we will publish a document in  
the **Federal Register** withdrawing this  
rule before it takes effect and a separate  
document in the proposed rules section  
of this **Federal Register** will serve as a  
proposal to authorize the changes.

**DATES:** This final authorization will  
become effective on December 4, 2012  
unless EPA receives adverse written  
comment by November 5, 2012. If EPA  
receives such comment, it will publish  
a timely withdrawal of this immediate  
final rule in the **Federal Register** and  
inform the public that this authorization  
will not take effect.

**ADDRESSES:** Submit your comments,  
identified by Docket ID No. EPA-R04-  
RCRA-2012-0124 by one of the  
following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>: Follow the on-line instructions for submitting comments.

**SUPPLEMENTARY INFORMATION:**

**A. Why are revisions to State programs  
necessary?**

States which have received final  
authorization from EPA under RCRA  
section 3006(b), 42 U.S.C. 6926(b), must  
maintain a hazardous waste program  
that is equivalent to, consistent with,  
and no less stringent than the Federal  
program. As the Federal program  
changes, States must change their  
programs and ask EPA to authorize the  
changes. Changes to State programs may  
be necessary when Federal or State  
statutory or regulatory authority is  
modified or when certain other changes  
occur. Most commonly, States must
