

alternative, as described below: Alternative A would leave in place the current tide control structure at Chequessett Neck Road and continue management of the estuary without restoration.

Alternative B would employ an adaptive management strategy to restore tides in the lower reach of the Herring River up to a maximum high tide of approximately six feet. At this tide level flood mitigation of sensitive properties can be achieved without a secondary dike at Mill Creek.

Alternative C would employ an adaptive management strategy to restore tides up to the maximum Chequessett Neck Road dike capacity (10 foot vertical tide gate opening) with a new dike at Mill Creek that blocks all tidal influence. This alternative would maximize restoration in all sub-basins except Mill Creek. Mill Creek would remain unrestored, but no new flood proofing measures would be needed in Mill Creek.

Alternative D would employ an adaptive management strategy to restore tides up to the maximum Chequessett Neck Road dike capacity (10 foot vertical tide gate opening) with a new dike at Mill Creek. Mill Creek tides would be controlled by this secondary structure to the same level as that of Alternative B, the maximum level that can be achieved after flood proofing several low-lying properties. Tidal restoration would be maximized in all other sub-basins.

For Alternatives B and D, two options are considered for mitigating project impacts to the Chequessett Yacht & Country Club (CYCC) golf course, a private golf course in Mill Creek: (1) Raise low-lying fairways a minimum of two feet above proposed inundation levels, or (2) relocate low-lying fairways to an undeveloped upland area owned by CYCC.

Alternative D, with the option to raise existing low-lying fairways a minimum of two feet above proposed inundation levels, has been identified as the NPS Preferred Alternative. This alternative best fulfills the restoration objectives of the project while mitigating adverse impacts to developed properties.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on May 4, 2011, based on a complaint filed on behalf of Kaneka Corporation of Osaka, Japan (“Kaneka”). 76 FR 25373 (May 4, 2011). The complaint alleges

violations of Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, in the sale for importation, importation, or sale after importation of certain polyimide films, products containing same, and related methods by reason of infringement of one or more of claims 1-3 and 9-10 of U.S. Patent No. 6,264,866 (“the ‘866 patent’”); claims 1-6 of U.S. Patent No. 6,746,639 (“the ‘639 patent’”); claims 1-5 of U.S. Patent No. 7,018,704 (“the ‘704 patent’”); and claims 1-20 of U.S. Patent No. 7,691,961 (“the ‘961 patent’”). Specifically, the ALJ found that there was no violation with respect to the ‘866 patent, the ‘639 patent, the ‘704 patent, or the ‘961 patent by SKC. The ALJ also issued a recommended determination on remedy and bonding.

On May 22, 2012, Kaneka filed a petition for review of the final ID and on May 23, 2012, SKC filed a contingent petition for review. On May 30, 2012, SKC filed a response to Kaneka’s petition, and on May 31, 2012, Kaneka filed a response to SKC’s contingent petition.
