Previous Version of MSPB Appeal Form 185

A revised version of Form 185 was included in the **Federal Register** notice published on October 29, 2012. (See 77 FR 65586.) That ICR request was approved by OMB on November 5, 2012. The MSPB now requests emergency reinstatement of the same ICR but with the previous version of Form 185.

We are concerned that the abrupt implementation of the revised version of the form will be confusing to the parties appearing before MSPB. Indeed, if we implement the revised version only to modify it further following the requisite notice-and-comment periods under the Paperwork Reduction Act, we believe that it will add to any confusion and result in inefficiencies in processing appeals. Most significantly, it will take longer than anticipated to implement a revised form in our e-Appeal Online filing system. This delay will create further confusion for e-filers. Upon approval of this ICR by OMB, we will publish a 60-day notice in the **Federal Register** seeking public comment on the revised version of Form 185 and begin the process of incorporating and testing the revisions in a non-production environment with e-Appeal Online.

Estimated Reporting Burden

In accordance with the requirements of the Paperwork Reduction Act of 1995, MSPB is soliciting comments on the public reporting burden for this information collection. The public reporting burden for this collection of information is estimated to vary from 20 minutes to 4 hours, with an average of 60 minutes per response, including time for reviewing the form and instructions, searching existing data sources, gathering the data necessary, and completing and reviewing the collection of information.

Specifically, MSPB invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of MSPB's functions, including whether the information will have practical utility;

I. Abstract

In accordance with Executive Order 13506 establishing the White House Council on Women and Girls, the Women@NASA Program was created to provide mentoring opportunities in science, technology, engineering, and math (STEM) disciplines for female

students. To support the White House *Educate To Innovate* campaign, the Women@NASA Program was expanded to offer an equivalent program for young males called NASA Building Outstanding Young Scientists (BOYS). Both programs are designed to engage underrepresented rising 5th-8th grade students in a one-on-one virtual mentoring experience, under parental/adult supervision, one hour per week for a five-week period. Participants will be selected from a diverse set of geographical locations across the USA.

This clearance request pertains to the collection of information associated with the administration of electronic application forms, parental consent forms, and pre and post parent/student surveys. Surveys are designed to gauge participant interest in STEM subjects before and after the virtual mentoring experience, measure the program impact, assess the effectiveness of the virtual mentoring approach and identify opportunities for improvement.
