## NUCLEAR REGULATORY COMMISSION

**[NRC-2008-0476; Docket No. 52-008 Early Site Permit No. ESP-003]**

### In the Matter of Virginia Electric and Power Company, and Old Dominion Electric Cooperative; ESP for North Anna ESP Site; Order Approving Direct Transfer of Early Site Permit and Approving Conforming Amendment

#### I

Virginia Electric and Power Company, doing business as Dominion Virginia Power (DVP), and Old Dominion Electric Cooperative (ODEC), hold Early Site Permit 003 (ESP-003) for North Anna Site issued on November 27, 2007, pursuant to section 52.24 of Title 10 of the *Code of Federal Regulations* (10 CFR) "Issuance of Early Site Permit." The permit expires on November 27, 2027.

#### II

By application dated March 1, 2012, DVP requested, on its own behalf and behalf of ODEC, pursuant to 10 CFR 50.80, that the U.S. Nuclear Regulatory Commission (NRC) consent to the transfer of ODEC's undivided ownership interest in ESP-003 from ODEC to DVP, with DVP becoming the sole permit holder. As a result of this transfer, DVP will assume all of ODEC's rights and obligations, including all rights and obligations under the ESP.

A notice entitled, Approval of Transfer of Early Site Permit (ESP) and Conforming Amendment, Virginia Electric and Power Company, North Anna ESP Site, was published in the **Federal Register** on September 10, 2012 (77 FR 55507). No comments or hearing requests were received.

Under 10 CFR 50.80, no ESP, or any right thereunder, shall be transferred, directly or indirectly, through transfer of control of the ESP, unless the Commission shall give its consent in writing. Upon review of the information in the application, and other information before the Commission, the NRC staff has determined that DVP is qualified to hold the ESP-003 to the extent proposed to permit the transfer of ODEC's interest in ESP-003, and that the transfer of the ESP-003 is otherwise consistent with the applicable provisions of law, regulations, and orders issued by the NRC, pursuant thereto. The NRC staff has further found that the application for the proposed conforming amendment to the ESP-003 complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations set forth in 10 CFR Chapter I; activities at the site will be in conformity with the application, the provisions of the Act and the rules and regulations of the Commission; there is reasonable assurance that the activities authorized by the proposed conforming amendment can be conducted without endangering the health and safety of the public and that such activities will be conducted in compliance with the Commission's regulations; the issuance of the proposed conforming amendment will not be inimical to the common defense and security or to the health and safety of the public; and the issuance of the proposed conforming amendment will be in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied. The findings set forth above are supported by a safety evaluation dated January 30, 2013.

#### III

Accordingly, pursuant to Sections 161b, 161i, 161o, and 184 of the Atomic Energy Act of 1954, as amended (the Act), 42 U.S.C. 2201(b), 2201(i), 2201(o), and 2234; and 10 CFR 50.80, *it is hereby ordered* that the application regarding the proposed direct ESP transfer is approved:

*It is further ordered* that consistent with 10 CFR 2.1315(b), the conforming amendment that makes a change, as indicated in Enclosure 2 to the cover letter forwarding this Order, to reflect the subject direct transfer, is approved. The amendment shall be issued and made effective immediately.

All actions necessary for the proposed direct transfer action have been completed, and this Order is effective upon issuance.

For further details with respect to this Order, see the initial application dated March 1, 2012, (Agencywide Documents Access and Management System (ADAMS) Accession No. ML12072A091), and the Safety Evaluation dated January 30, 2013, which are available for public inspection at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area, Room O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland 20852. Publicly available documents created or received at the NRC are accessible electronically through ADAMS in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. Dated at Rockville, Maryland this 30th day of January 2013.

For the Nuclear Regulatory Commission.

#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

By letter dated January 16, 2012, the U.S. Nuclear Regulatory Commission (NRC) received a license amendment application from Westinghouse Electric Company LLC (WEC or the licensee), pertaining to its planned disposal of NRC-licensed source, byproduct, and special nuclear materials. Regarding this material, WEC seeks approval, pursuant to section 20.2002 of Title 10 of the *Code of Federal Regulations* (10 CFR), of proposed disposal procedures which are not otherwise authorized by NRC regulations. WEC holds NRC License No. SNM-33, which authorizes the licensee to conduct decommissioning activities at its former fuel cycle facility located in Festus, Missouri. Since the fuel cycle facility operations have ceased, the Hematite site is undergoing decommissioning. The facility is now referred to as the Hematite Decommissioning Project (HDP). The amendment request seeks authorization allowing WEC to transfer decommissioning waste to U.S. Ecology Idaho, Inc. (USEI), a Resource Conservation and Recovery Act Subtitle C disposal facility located near Grand View, Idaho. This facility is regulated by the Idaho Department of Environmental Quality, and is not an NRC-licensed facility. Pursuant to 10 CFR 30.11 and 10 CFR 70.17, WEC's application also requested exemptions from the licensing

requirements of 10 CFR 30.3 and 10 CFR 70.3 for the byproduct and special nuclear material it seeks to transfer. These exemptions are necessary because the disposal of byproduct and special nuclear material must occur at a facility licensed to possess such material, and the USEI facility has no NRC license.

On October 4, 2012, USEI requested that they be considered a party to WEC's January 16, 2012, alternate disposal request and also requested exemptions from the requirements of 10 CFR 30.3 and 10 CFR 70.3.

On March 19, 2012 (77 FR 16077), the NRC published in the **Federal Register** a Notice of Opportunity for Hearing on the January 16, 2012, WEC license amendment request ADAMS Accession Nos. ML12017A188, ML12017A189 and ML12017A190. The NRC relied upon the information provided in the January 16, 2012, license amendment request and supporting documentation and other sources as noted in the Environmental Assessment's (EA) references section, in preparing the EA.

## II. Environmental Assessment Summary

Under 10 CFR 20.2002, WEC proposes to dispose of about 23,000 m<sup>3</sup> (30,000 yd<sup>3</sup>) of low-level waste (LLW) from the HDP that contains source, byproduct and special nuclear material at the USEI hazardous waste disposal facility near Grand View, Idaho. The LLW will be generated from building slabs, asphalt, soils, buried piping and miscellaneous equipment associated with HDP.

In 2002, WEC and the Missouri Department of Natural Resources (MDNR) entered into a Letter Agreement, which, among other things, provided for MDNR oversight of certain studies and response actions in accordance with the National Oil and Hazardous Substances Pollution Contingency Plan under the requirements of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. 9601 et seq. (Westinghouse MDNR Review Draft Remedial Design Work Plan, 2002 (ADAMS Accession No. ML020880266)).

Subsequently, Missouri and WEC entered into a Consent Decree, and the Letter Agreement was terminated. The Consent Decree provides for MDNR oversight of those portions of the investigation and selection of the remedy for Operable Units at the site that are not preempted by the Atomic Energy Act of 1954, as amended. The Selected Remedy for Operable Unit 1 at the HDP is Alternative 4: Removal, Treatment of Volatile Organic
