

associated structures, and other environmental information) has been utilized as the basis for the evaluation contained in the Draft ULP PEIS.

For the Draft ULP PEIS, DOE is complying with Executive Order (E.O.) 13175 and with Section 7 of the Endangered Species Act by engaging in consultation on a government-to-government basis with Native American tribes and with the U. S. Fish and Wildlife Service, respectively.

### Alternatives

Five alternatives are analyzed in the Draft ULP PEIS as follows: (1) *Alternative 1*: DOE would terminate all leases, and all operations would be reclaimed by lessees. DOE would continue to manage the withdrawn lands, without leasing, in accordance with applicable requirements; (2) *Alternative 2*: Same as Alternative 1, except once reclamation was completed by lessees, DOE would relinquish the lands in accordance with 43 CFR part 2370. If DOI/BLM determines, in accordance with that same part of the CFR, the lands were suitable to be managed as public domain lands, they would be managed by BLM under its multiple use policies. DOE's uranium leasing program would end; (3) *Alternative 3*: DOE would continue the ULP as it existed before July 2007 with the 13 then-active leases, for the next 10-year period or for another reasonable period, and DOE would terminate the remaining leases; (4) *Alternative 4*: DOE would continue the ULP with the 31 lease tracts for the next 10-year period or for another reasonable period; and (5) *Alternative 5*: This is the No Action Alternative, under which DOE would continue the ULP with the 31 lease tracts for the remainder of the 10-year period, as the leases were when they were issued in 2008.

DOE's preferred alternative is Alternative 4. That is, DOE would continue the ULP with the 31 lease tracts for the next 10-year period or for another reasonable period.

**SUPPLEMENTARY INFORMATION:**

*Title:* FERC-607: Report on Decision or Action on Request for Federal Authorization.

*OMB Control No.:* 1902-0240.

*Type of Request:* Three-year extension of the FERC-607 information collection requirements with no changes to the reporting requirements.

*Abstract:* The FERC-607 information collection requires agencies (Federal agency or officer, or State agency or officer acting pursuant to delegated Federal authority, responsible for a Federal authorization) to submit to the Commission a copy of a decision or action on a request for Federal authorization and an accompanying index to the documents and materials relied on in reaching a conclusion. The Commission authorizes the construction and operation of proposed natural gas projects under Natural Gas Act Sections 3 and 7; however, the Commission does not have jurisdiction over every aspect

of each natural gas project. Hence, for a natural gas project to go forward, in addition to Commission approval, several different agencies must typically reach favorable findings regarding other aspects of the project. The Energy Policy Act of 2005 (EPAAct 2005) modified FERC's role in order to better coordinate the activities of the separate agencies with varying responsibilities over proposed natural gas projects. Section 313 of EPAAct 2005<sup>1</sup> directs FERC to compile a record of each agency's decision along with the record of the Commission's decision. The Commission compiles this record in order to serve as a consolidated record for the purpose of appeal or review (including judicial review).

*Type of Respondents:* Government agencies responsible for issuing authorizations for proposed natural gas projects.

*Estimate of Annual Burden*<sup>2</sup>: The Commission estimates the total Public Reporting Burden for this information collection as:

**FERC-607—REPORT ON DECISION OR ACTION ON REQUEST FOR FEDERAL AUTHORIZATION**

Number of respondents	Number of responses per respondent	Total number of responses	Average burden hours per response	Estimated total annual burden
(A)	(B)	(A) × (B) = (C)	(D)	(C) × (D)
1	1	1	6	6

The total estimated annual cost burden to respondents is \$414 [6 hours ÷ 2080 hours/year<sup>3</sup> \* \$143,540/year<sup>4</sup> = \$414]

*Comments:* Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: March 11, 2013.
