

framework for management, use, and development of the National Historic Site for the next 15 to 20 years. It presents and analyzes three alternatives:

- Alternative A (no action) provides a baseline for evaluating changes and impacts of the two action alternatives.
- Alternative B would greatly expand the scope of the National Historic Site's partnerships through greater partner involvement in interpretation of the Roanoke Voyages. The NPS staff would interpret other National Historic Site stories. This alternative encourages more on-site experiences through partnerships and through additional interpretive efforts, marketing, and facilities.

- Alternative C, the NPS preferred alternative, would increase our research on the site's history, archeology, inhabitants and events with emphasis on interpretive themes and preservation. As a result of our expanded research and coordination with other research organizations and agencies, visitors would benefit by gaining increased knowledge of the National Historic Site and its multiple cultural and natural themes. This alternative would respond to the mandates of Public Law 101-603, which broadened the interpretive and resource preservation purpose of the National Historic Site.

The three alternatives are described in detail in chapter 2 of the Draft EIS/GMP. Chapter 4 details the key impacts of implementing the three alternatives.
