Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

The Petition

The NRC has received a PRM (ADAMS Accession No. ML13113A443) requesting the NRC to revise its regulations at §§ 50.1, 50.9, 52.0, and 52.6 of Title 10 of the *Code of Federal Regulations* to expand its “regulatory framework to make it a legal obligation for those non-licensees who seek NRC

regulatory approvals be held to the same legal standards for the submittal of complete and accurate information as would a licensee or an applicant for a license.”

The Petitioner

James Lieberman is a regulatory and nuclear safety consultant. The petition states that Mr. Lieberman is submitting the petition “based on [his] own experiences as a former NRC employee and a consultant in the nuclear industry.” The petition further states that James Lieberman was involved in the development of both the NRC rule on completeness and accuracy of information and the NRC rule on deliberate misconduct. The petition notes that Mr. Lieberman’s interest is that “the NRC should have a regulatory framework that requires persons who seek NRC approval on regulatory matters to have a legal obligation to provide materially complete and accurate information and be subject to sanction for failure to meet those requirements.”

Request for Comment

The NRC has determined that the petition meets the threshold sufficiency requirements for a petition for rulemaking under § 2.802, “Petition for rulemaking,” and the petition has been docketed as PRM–50–107. The full text of the incoming petition is available at www.regulations.gov by searching on Docket ID NRC–2013–0077 and in ADAMS under Accession No. ML13113A443. The NRC is requesting public comments on the petition for rulemaking.

For the Nuclear Regulatory Commission.
