BILLING CODE P

NUCLEAR REGULATORY COMMISSION

[NRC-2013-0151; Docket Nos. 50-269, 50-270, and 50-287; License Nos. DPR-38, DPR-47, and DPR-55; EA-13-010]

In the Matter of Duke Energy Carolinas, LLC; (Oconee Nuclear Station, Units 1, 2, and 3); Confirmatory Order Modifying License

I

Duke Energy Carolinas, LLC (Duke, Licensee) is the holder of Renewed Facility Operating License Nos. DPR-38, DPR-47, and DPR-55 issued by the U.S. Nuclear Regulatory Commission (NRC) pursuant to Part 50 of Title 10 of the *Code of Federal Regulations* (10 CFR), "Domestic Licensing of Production and Utilization Facilities," on May 23, 2000. The licenses authorize the operation of Oconee Nuclear Station, Units 1, 2, and 3, in accordance with the conditions specified therein. The facilities are located on the Licensee's site in Seneca, South Carolina.

II

On December 29, 2010, the NRC issued Amendment Nos. 371, 373, and 372 to Renewed Facility Operating Licenses DPR-38, DPR-47, and DPR-55, for the Oconee Nuclear Station, Units 1, 2, and 3, respectively (Agencywide Documents Access and Management System (ADAMS) Accession No. ML103630612). The amendments consisted of changes to the licenses and Technical Specifications to allow Duke to maintain a fire protection program (FPP) in accordance with 10 CFR 50.48(c). Condition 3.D, Fire Protection, Transition License Condition 1 required Duke to complete the items described in Section 2.9, Table 2.9-1, "Implementation Items," in the NRC safety evaluation dated December 29, 2010, prior to January 1, 2013. Table 2.9-1, item 23 required completion of the analysis of non-power operation (NPO) fire impacts for fire zones following installation of the NFPA-805 committed modifications, including the Protected Service Water (PSW) modifications. Item 32 required incorporation of the PSW modification into the FPP site documents after the modification was implemented. Item 43 required confirmation that the risk decrease from the as-built PSW system continued to bound the cumulative variances from deterministic requirements (VFDR) transition risk once the PSW modifications were installed. Transition License Condition 2 required Duke to complete the items described in Section 2.8, Table 2.8.1-1,

"Committed Plant Modifications," in the NRC safety evaluation dated December 29, 2010. Item 1 of the table included implementation of the PSW modifications.

On July 31, 2012, Duke submitted a license amendment request (LAR) to extend full PSW implementation by two years, but stated that the modification to supply power from the PSW building to the Standby Shutdown Facility (SSF) would be operational by December 31, 2012. In a clarification call on November 27, 2012, Duke discussed draft milestones which would extend some items, such as installation of the PSW pumps, by at least 3 years. As of January 1, 2013, the full PSW modification had not been completed, which put Duke in violation of License Condition 3.D in all three licenses. After considering the information provided by Duke, the NRC staff denied the July 31, 2012, LAR application in a letter dated January 15, 2013. Subsequently, the NRC staff described an apparent violation to Duke by letter dated January 31, 2013. This apparent violation has been considered for escalated enforcement action in accordance with the NRC Enforcement Policy.

III

On March 5, 2013, a predecisional enforcement conference (ADAMS Accession No. ML13072A426) was conducted at the NRC headquarters in Rockville, Maryland with members of Duke's staff to discuss the apparent violation, its significance, root causes, and Duke's corrective actions. By letter dated March 11, 2013 (ADAMS Accession No. ML13079A321), and in a public meeting on April 10, 2013, Duke provided additional information on milestones Duke plans to meet while completing the installation of the PSW system. The NRC staff is issuing this Confirmatory Order to provide regulatory oversight of these milestones. The requirements needed to effectuate the foregoing are set forth in Section IV below. On June 18, 2013, the Licensee consented to the license modifications set forth in Section IV below. The Licensee further agreed that it has waived its right to a hearing on this order, and, therefore, that the terms of the Order are effective upon issuance.

I find that the license modifications set forth in Section IV are acceptable and necessary because they reduce the risk of significant damage from fire, as determined by the NRC staff in the safety evaluation for Amendment Nos. 371, 373, and 372 to Renewed Facility Operating Licenses DPR-38, DPR-47, and DPR-55. Thus, I find this order acceptable in order to ensure public
