

part of the process to test messages and, ultimately, develop effective campaign materials and efficient implementation plans.

SAMHSA will screen parents (because focus group participants are under the age of consent) and youth, conduct focus groups with youth with substance use and/or mental health conditions, and interview health care professionals who treat youth with these conditions. The screen will be administered by telephone to parents first and, as eligible, to youth and will take 10 minutes to complete for parents and for youth. Questions will include a mix of open-ended and closed-ended responses and are intended to gather information on previous diagnosis and

symptomology of mental health conditions and availability to participate in the focus group. The focus groups with youth will be conducted in person and will take up to 90 minutes. Questions are primarily open-ended and intended to gather information on the reasons youth with substance use and/or mental health conditions use tobacco, the barriers and facilitators to tobacco use prevention and cessation, the appeal of various tobacco use prevention and cessation messages, and the best dissemination strategies and communication channels for a future campaign aimed at this specialized group. The interviews with health care professionals who treat youth with mental health and/or substance use

conditions will be conducted in person, as feasible, or by telephone and will take up to 45 minutes. Questions are primarily open-ended and intended to gather information to better understand how various health care professionals screen for and address tobacco use in youth receiving care in their practice, identify messages and materials aimed at health care professionals to address tobacco use prevention and cessation in youth with substance use and/or mental health conditions, determine the most efficient communication strategies and channels to disseminate this information. All data collections are voluntary.

Below is the table of the estimated total burden hours:

Respondent	Number of respondents	Responses per respondent	Average burden hour	Total hour burden
Screener (Parent)	576	1	.15	86.4
Screener (Youth)	144	1	.15	21.6
Youth Focus Group	* 108	1	1.50	162
Provider Interview	42	1	.75	31.5
Total	762			301.5

*The 108 respondents identified for the youth focus groups are included in the 144 respondents for the youth screener.
