

is requesting OMB approval for this revision.

The Broadband Data Improvement Act of 2008, Public Law 110–385, Stat 4096, 103(c)(1) directs the Commission to collect information on the type of technology used to provide broadband to consumers, the price of such services, actual transmission speeds, and the reasons for non-adoption of broadband service.

This collection of information is necessary to complete research done for the Broadband Plan on key consumer issues including transparency and actual speeds and performance of broadband service and broadband usage and performance in schools and libraries.

The Commission's Office of Engineering and Technology (OET), Office of Strategic Planning and Policy Analysis (OSPPA) and Consumer and Governmental Affairs Bureau (CGB) and other Commission entities use the information collected under this study to assess what actual broadband speeds and performance consumers are currently receiving from providers. Our purpose is to measure the speed of broadband services provided by ISPs across service packages and geographies, rather than to assess the differences in broadband performance received by demographics. This assessment will help the Commission create standards for broadband measurements, assess the validity of ISP performance claims, and inform future steps to increasing transparency and consumer awareness of broadband service.

Federal Communications Commission.

## FEDERAL COMMUNICATIONS COMMISSION

### Information Collection Being Reviewed by the Federal Communications Commission

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice and request for comments.

**SUMMARY:** As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communications Commission (FCC or the Commission) invites the general public and other

Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

**DATES:** Written PRA comments should be submitted on or before April 1, 2014. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

**ADDRESSES:** Direct all PRA comments to Cathy Williams, FCC, via email [PRA@fcc.gov](mailto:PRA@fcc.gov) and to [Cathy.Williams@fcc.gov](mailto:Cathy.Williams@fcc.gov).

**FOR FURTHER INFORMATION CONTACT:** For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

**SUPPLEMENTARY INFORMATION:**

*OMB Control Number:* 3060–0863.

*Title:* Satellite Delivery of Network Signals to Unserved Households for Purposes of the Satellite Home Viewer Act.

*Form Number:* Not applicable.

*Type of Review:* Extension of a currently approved collection.

*Respondents:* Business or other for-profit entities.

*Number of Respondents and Responses:* 848 respondents; 250,000 responses.

*Estimated Time per Response:* 0.50 hours.

*Frequency of Response:* Recordkeeping requirement, On occasion reporting requirement.

*Obligation to Respond:* Required to obtain or retain benefits. Statutory

authority for this information collection action is contained in the Satellite Home Viewer Act, 17 U.S.C. 119. The Satellite Home Viewer Act is an amendment of the Copyright Act; and Satellite Television Extension and Localism Act of 2010, Title V of the “American Workers, State, and Business Relief Act of 2010,” Public Law 111–175, 124 Stat. 1218 (2010) (STELA), see footnote 3.

*Total Annual Burden to Respondents:* 125,000 hours.

*Total Annual Costs:* None.

*Privacy Impact Assessment(s):* No impact(s).

*Nature and Extent of Confidentiality:* There is no need for confidentiality with this collection of information.

*Needs and Uses:* 47 CFR 73.686 describes a method for measuring signal strength at a household so that the satellite and broadcast industries would have a uniform method for making an actual determination of the signal strength that a household received. The information gathered as part of the Grade B contour signal strength tests will be used to indicate whether a household is “unserved” by over-the-air network signals.

Satellite and broadcast industries making field strength measurements for formal submission to the Commission in rulemaking proceedings, or making such measurements upon the request of the Commission, shall follow the procedure for making and reporting such measurements which shall be included in a report to the Commission and submitted in affidavit form, in triplicate. The report shall contain the following information:

(a) Tables of field strength measurements, which for each measuring location; (b) U.S. Geological Survey topographic maps; (c) All information necessary to determine the pertinent characteristics of the transmitting installation; (d) A list of calibrated equipment used in the field strength survey; (e) A detailed description of the calibration of the measuring equipment, and (f) Terrain profiles in each direction in which measurements were made.

47 CFR 73.686 also requires satellite and broadcast companies to maintain a written record describing, for each location, factors which may affect the recorded field (i.e., the approximate time or measurement, weather, topography, overhead wiring, heights and types of vegetation, buildings and other structures, the orientation of the measuring location, objects of such shape and size that cause shadows or reflections, signals received that arrived from a direction other than that of the

transmitter, survey, list of the measured value field strength, time and date of the measurements and signature of the person making the measurements).

47 CFR 73.686(e) describes the procedures for measuring the field strength of digital television signals. These procedures will be used to determine whether a household is eligible to receive a distant digital network signal from a satellite television provider, largely rely on existing, proven methods the Commission has already established for measuring analog television signal strength at any individual location, as set forth in Section 73.686(d) of the existing rules, but include modifications as necessary to accommodate the inherent differences between analog and digital TV signals. The new digital signal measurement procedures include provisions for the location of the measurement antenna, antenna height, signal measurement method, antenna orientation and polarization, and data recording.

Therefore, satellite and broadcast industries making field strength measurements shall maintain written records and include the following information: (a) A list of calibrated equipment used in the field strength survey, which for each instrument specifies the manufacturer, type, serial number and rated accuracy, and the date of the most recent calibration by the manufacturer or by a laboratory. Include complete details of any instrument not of standard manufacture; (b) A detailed description of the calibration of the measuring equipment, including field strength meters, measuring antenna, and connecting cable; (c) For each spot at the measuring site, all factors which may affect the recorded field, such as topography, height and types of vegetation, buildings, obstacles, weather, and other local features; (d) A description of where the cluster measurements were made; (e) Time and date of the measurements and signature of the person making the measurements; (f) For each channel being measured, a list of the measured value of field strength (in units of dBμ after adjustment for line loss and antenna factor) of the five readings made during the cluster measurement process, with the median value highlighted.

Federal Communications Commission.

## FEDERAL COMMUNICATIONS COMMISSION

### Notice of Public Information Collection(s) being Reviewed by the Federal Communications Commission, Comments Requested

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice; request for comments.

**SUMMARY:** As part of its continuing effort to reduce paperwork burden and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501—3520), the Federal Communications Commission (FCC) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s). Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and further ways to reduce the information burden for small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB Control Number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid Control Number.

**DATES:** Written Paperwork Reduction Act (PRA) comments should be submitted on or before April 1, 2014. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

**ADDRESSES:** Submit your PRA comments to Leslie F. Smith, Federal Communications Commission (FCC), via the Internet at [Leslie.Smith@fcc.gov](mailto:Leslie.Smith@fcc.gov). To submit your PRA comments by email, send them to [PRA@fcc.gov](mailto:PRA@fcc.gov).

**FOR FURTHER INFORMATION CONTACT:** For additional information, contact Leslie F. Smith at (202) 418-0217, or via the Internet at [PRA@fcc.gov](mailto:PRA@fcc.gov).

**SUPPLEMENTARY INFORMATION:**

*OMB Control Number:* 3060-0816.  
*Title:* Local Telephone Competition and Broadband Reporting, FCC Form 477.

*Form Number:* FCC Form 477.

*Type of Review:* Revision of a currently approved collection.

*Respondents:* Business or other for-profit entities; not-for-profit institutions; and state, local or tribal governments.

*Number of Respondents and Responses:* 2,002 respondents; 4,004 responses.

*Estimated Time per Response:* 327 hours.

*Frequency of Response:* Semi-annual reporting requirement.

*Obligation to Respond:* Mandatory. Statutory authority for this information collection is contained in 47 U.S.C. 4(i), 201, 218-220, 251-252, 271, 303(r), 332, and 403 of the Communications Act of 1934, as amended and section 706 of the Telecommunications Act of 1996, as amended, codified in section 1302 of the Broadband Data Improvement Act, 47 U.S.C. 1302.

*Total Annual Burden:* 1,549,548 hours.

*Total Annual Cost:* \$68,335,067.

*Privacy Impact Assessment (PIA):* No impact(s).

*Nature and Extent of Confidentiality:* The Commission will continue to allow respondents to certify on the submission interface that some subscribership data contained in that submission are privileged or confidential commercial or financial information and that disclosure of such information would likely cause substantial harm to the competitive position of the entity making the submission. If the Commission receives a request for, or proposes to disclose such information, the respondent would be required to show, pursuant to Commission rules for withholding from public inspection information submitted to the Commission, that the information in question is entitled to confidential treatment. We will retain our current policies and procedures regarding the protection of submitted FCC Form 477 data subject to confidential treatment, including the use of only non-company specific aggregates of subscribership data in our published reports. Most of the broadband deployment data to be collected on Form 477 as a result of modifications will be made publicly available. NTIA currently publishes similar data on the National Broadband Map Web site at [www.broadbandmap.gov](http://www.broadbandmap.gov).

The Commission will coordinate with NTIA to continue the publication of the National Broadband Map using the data to be collected through modifications to
