

with a federated infrastructure. The required solution to satisfy the scope of HAIMS will consist of industry standard COTS, as well as government off the shelf (GOTS). The expected business outcomes have been defined and constraints/dependencies have been identified in satisfying the functional, technical and system requirements to develop, field and support HAIMS throughout the life cycle.

HAIMS interfaces with external repositories to register and access patient A&I. Patient demographic information from the Clinical Data Repository (CDR) is used to associate A&I with the patient. Another method of collecting data is through bulk scanning of patient artifacts into HAIMS. The user will first select the patient for which the artifact is associated with, and then enters in relevant metadata of the artifacts.

The information in HAIMS is sensitive; therefore, it contains built-in safeguards to limit access and visibility of this information. HAIMS uses role-based security so a user sees only the information for which permission has been granted. It uses encryption security for transactions. It is DIACAP certified having been subjected to and passed thorough security testing and evaluation by independent parties. It meets safeguards specified by the Privacy Act of 1974 in that it maintains a published Department of Defense (DoD) Privacy Impact Assessment and System of Record covering Active Duty Military, Reserve, National Guard, and government civilian employees, to include non-appropriated fund employees and foreign nationals, DoD contractors, and volunteers. HAIMS servers are hosted at Military Treatment Facilities (MTFs) and physically secured by the Services and within the MHS enclave, Enterprise Infrastructure maintains information security.

POLICY JUSTIFICATION

Pakistan—C-130 Fleet Upgrade Program

The Government of Pakistan has requested a possible sale of C-130B/E avionics upgrades, engine management and mechanical upgrades, cargo delivery system installation, and replacement of outer wing sets on six aircraft. Also included are spare and repair parts, support equipment, publications and technical documentation, personnel training and training equipment, U.S. Government and contractor technical and logistics support services, and other related elements of logistics support. The estimated cost is \$100 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a Major Non-NATO ally which has been, and continues to be, an important force for regional stability and U.S. national security goals in the region.

The proposed sale will facilitate the continued operation of the Pakistan's Air Force C-130 fleet (five C-130B and eleven C-130E models) for counter-insurgency/counter-terrorism flights; regional humanitarian operations; troop transport; and Intelligence, Surveillance, and Reconnaissance (ISR) missions within Pakistan and in the region. The fleet is facing airworthiness and obsolescence issues, and will require upgrades and repairs for continued operation and effectiveness. The proposed modernization of the C-130 fleet should ensure continued viability for an additional 10–15 years.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor is unknown at this time and will be determined through a competitive bid process. There are no known offset agreements in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Pakistan.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Purpose of the Meeting

At this meeting, the Panel will address the Ike Skelton National Defense Authorization Act (NDAA) for Fiscal Year 2011 (Pub. L. 111-383), Section 2852(b) requirement to provide the Secretary of Defense independent advice and recommendations regarding a construction standard for military medical centers to provide a single standard of care, as set forth in this notice:

a. Reviewing the unified military medical construction standards to determine the standards consistency with industry practices and benchmarks for world class medical construction;

b. Reviewing ongoing construction programs within the DoD to ensure medical construction standards are uniformly applied across applicable military centers;

c. Assessing the DoD approach to planning and programming facility improvements with specific emphasis on facility selection criteria and proportional assessment system; and facility programming responsibilities between the Assistant Secretary of Defense for Health Affairs and the Secretaries of the Military Departments;

d. Assessing whether the Comprehensive Master Plan for the National Capital Region Medical (“the Master Plan”), dated April 2010, is adequate to fulfill statutory requirements, as required by section 2714 of the Military Construction Authorization Act for Fiscal Year 2010 (division B of Pub. L. 111-84; 123 Stat. 2656), to ensure that the facilities and organizational structure described in the Master Plan result in world class military medical centers in the National Capital Region; and

e. Making recommendations regarding any adjustments of the Master Plan that are needed to ensure the provision of world class military medical centers and delivery system in the National Capital Region.
