Discussion

The Agência Nacional De Aviação Civil (ANAC), which is the aviation authority for Brazil, has issued Brazilian Airworthiness Directive 2013-12-02, effective December 27, 2013 (referred to after this as the Mandatory Continuing Airworthiness Information, or "the MCAI"), to correct an unsafe condition for all Empresa Brasileira de Aeronautica S.A. (Embraer) Model EMB-135BJ airplanes. The MCAI states:

This [Brazilian] AD was prompted by a new revision to the Airworthiness Limitations Requirements of the Maintenance Planning Guide (MPG-1483). We are issuing this [Brazilian] AD to allow timely detection and correction of fatigue cracking of various structural elements, and to allow the necessary preclusion of ignition sources in the fuel system.

Required actions include revising the maintenance or inspection program, as applicable, to incorporate new compliance times and fuel limitations. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2014-0586.
