SUPPLEMENTARY INFORMATION:

I. Abstract

Researchers from Cuyahoga Valley National Park (CUVA) and Kent State University would like to understand how visitors would use and interact with a mobile application (app) created specifically for science learning in the parks. We will use a pre and post knowledge survey to evaluate a developmental mobile app designed for visitor use while on-site in the park. The

surveys will help us to understand the quality of science learning acquired by visitors using mobile applications. We will also administer a post trip survey to measure visitor satisfaction concerning the overall usability of the mobile app. The results from this collection will be used to provide feedback and updates regarding the further development of an app created specifically for science learning in the national parks.
