SUPPLEMENTARY INFORMATION:

I. Abstract

NASA's founding legislation, the Space Act of 1958, as amended, directs the Agency to expand human knowledge of Earth and space phenomena and to preserve the role of the United States as a leader in aeronautics, space science, and technology. The NASA Office of Education has three primary goals: (1) Strengthen NASA and the Nation's future workforce, (2) attract and retain students in science, technology, engineering and mathematics, or STEM, disciplines, and (3) engage Americans in NASA's mission.

This notice informs the public of NASA's intent to revise a currently approved information collection for a project formerly known as the NASA Summer of Innovation Project. The request for renewal pertains to the administration of surveys to youth in support of the agency's STEM challenge activities for middle school youth. The information collection was revised to collect the minimum amount of data required to (1) evaluate the activity for improvement opportunities, and (2) collect outcome data to assess the activity model's effectiveness in meeting its intended objectives. Youth surveys have been retained in this information collection, but the parent survey and teacher focus groups have been eliminated to reduce burden. The number of youth participating in this information collection has been reduced to reflect the estimated number of participants who will be engaged in this activity in the future. The cost of the information collection, to participating members of the public, has also been reduced as a result of these and other changes to the information collection.

SUPPLEMENTARY INFORMATION:

Abstract: The proposed information collection activity provides a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

The solicitation of feedback will target areas such as: Timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable.

The Agency will only submit a collection for approval under this
