

applicable here—protect current or future applicants.

Applicants and potential applicants are not, with certain exceptions, protected by the backfitting provisions in 10 CFR 72.62 or 10 CFR 50.109, or any issue finality provisions under part 52. This is because neither the backfitting provisions nor the issue finality provisions under part 52—with certain exclusions discussed below—were intended to apply to every NRC action which substantially changes the expectations of current and future applicants. The exceptions to the general principle are applicable whenever an applicant references a part 52 license (e.g., an early site permit) and/or NRC regulatory approval (e.g., a design certification rule) with specified issue finality provisions. However, the matters covered in this ISG are not subject matters or issues for which issue finality protection is provided.

3. The NRC has no intention to impose the ISG on existing ISFSI or nuclear power plant licenses either now or in the future (absent a voluntary request for change from the licensee).

The NRC staff does not intend to impose or apply the positions described in the ISG to existing (already issued) licenses (e.g., ISFSI licenses, operating licenses and combined licenses) absent a voluntary request for a change from the licensee. Hence, the ISG need not be evaluated as if it were a backfit.

Dated at Rockville, Maryland, this 14th day of October, 2015.

For the Nuclear Regulatory Commission.

Mark Lombard,

*Director, Division of Spent Fuel Management,
Office of Nuclear Material Safety and
Safeguards.*

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2012-0271]

Geologic Trench Excavation for Paleoliquefaction Study at Garner and Stiles Sites

AGENCY: Nuclear Regulatory
Commission.

ACTION: Environmental assessment and
finding of no significant impact;
issuance.

SUMMARY: The U.S. Nuclear Regulatory
Commission (NRC) has prepared an
Environmental Assessment (EA) to
evaluate the potential environmental
impacts that may arise as a result of
excavating trenches to observe geologic

features for a paleoliquefaction research
project at two sites located in
northeastern Arkansas. The NRC has
concluded that a Finding of No
Significant Impact (FONSI) is
appropriate.

DATES: October 21, 2015.

ADDRESSES: Please refer to Docket ID
NRC-2012-0271 when contacting the
NRC about the availability of
information regarding this document.
You may obtain publicly-available
information related to this document
using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2012-0271. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "*Begin Web-based ADAMS Search.*" For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it available in ADAMS) is provided the first time that a document is referenced. The EA and the associated FONSI are publicly available in ADAMS under Accession No. ML15287A224.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT:
Thomas Weaver, Office of Nuclear
Regulatory Research, U.S. Nuclear
Regulatory Commission, Washington,
DC 20555-0001; telephone: 301-415-
2383; email: Thomas.Weaver@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is performing a
paleoliquefaction research project to
characterize past earthquakes in the
Central and Eastern United States.
Geologic observations of
paleoliquefaction, defined as historic or
pre-historic liquefaction, in excavated
trenches are planned at two sites in
northeastern Arkansas. Liquefaction

features are geologic features such as
sand blows and sand dikes formed
during earthquakes as a result of ground
shaking and water pressure developed
in the ground during shaking. The
results from this research will be used
to update models implemented in
probabilistic seismic hazard analyses to
characterize ground motion at new
nuclear power plant sites in accordance
with the NRC's regulation in section
100.23(d)(1) of title 10 of the *Code of
Federal Regulations* (10 CFR). The
results of this research may also
implemented to re-evaluate seismic
hazards at existing nuclear power plant
sites.

The NRC has prepared an EA to
evaluate the potential environmental
impacts that may arise as a result of this
research project in accordance with the
requirements of 10 CFR part 51, the
NRC's regulations that implement
Section 102(2) of the National
Environmental Policy Act of 1969, as
amended. Based on the EA, and in
accordance with 10 CFR 51.31(a), the
NRC has concluded that a FONSI is
appropriate. The excavation of the
trenches at the two sites in northeastern
Arkansas will commence following
publication of this Notice.

II. EA Summary

The NRC has prepared the EA to
evaluate the potential environmental
impacts of the excavation of the
trenches at two sites in northeastern
Arkansas, described in the EA as the
Garner and Stiles sites. In accordance
with Section 7 of the Endangered
Species Act of 1973, as amended (16
U.S.C. 1531 *et seq.*), the NRC staff
requested informal consultation with
the United States Fish and Wildlife
Service. No concerns were identified for
Federally-listed species or designated
critical habitat. This project is
temporary, minimally invasive, and will
occur outside the critical nesting times
for migratory birds.

The NRC determined that the
proposed excavation of the trenches will
result in no adverse effects to any
historic or cultural resources that may
be located at the Garner or Stiles sites.
The NRC's evaluation of archeologic
artifacts discovered at the Garner site
concludes that the site is ineligible for
the National Register of Historic Places
(NHRP). The Arkansas State Historic
Preservation Officer stated in a
September 3, 2014, letter to the NRC
that NHRP eligibility for the Garner site
is undetermined and noted that the
proposed excavation of the trenches is
similar to NRHP significance testing. If
significant archeological material data is
uncovered at the Garner site, the NRC

will complete the appropriate NRHP-eligibility testing. Portions of the NRC contractor prepared site evaluation report, referenced in the EA, have been redacted and are being withheld from public review for the purpose of protecting potential archaeological and cultural resources in accordance with Section 304 of the National Historic Preservation Act of 1966, as amended (54 U.S.C. 307103).

In its September 3, 2014 letter, the Arkansas State Historic Preservation Officer (SHPO) was supportive of the proposed excavation of the trenches at both sites. The Arkansas SHPO concurred with the NRC regarding no adverse effects at the Stiles site. The Quapaw Tribe has concurred with the Arkansas SHPO findings.

The NRC has determined that there will be no significant impacts to any other resource areas (e.g., surface water, groundwater, air quality) as a result of the proposed excavation of the trenches.

III. Finding of No Significant Impact

On the basis of the EA and as further described in the FONSI, the NRC has concluded that there are no significant environmental impacts from the proposed excavation of the trenches and has determined not to prepare an environmental impact statement.

Dated at Rockville, Maryland this 14th day of October, 2015.

For the Nuclear Regulatory Commission.

John P. Burke,

Chief, Structural, Geotechnical, and Seismic Engineering Branch, Division of Engineering, Office of Nuclear Regulatory Research.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards (ACRS); Meeting of the ACRS Subcommittee on Digital I&C; Notice of Meeting

The ACRS Subcommittee on Digital I&C will hold a briefing on November 19, 2015, Room T-2B1, 11545 Rockville Pike, Rockville, Maryland.

The meeting will be open to public attendance with the exception of portions that may be closed to protect information that is proprietary pursuant to 5 U.S.C. 552b(c)(4). The agenda for the subject meeting shall be as follows:

Thursday, November 19, 2015—1:00 p.m. Until 5:00 p.m.

The Subcommittee will review the Cyber Security SECY paper on Control of Access. The Subcommittee will hear

presentations by and hold discussions with the NRC staff, and other interested persons regarding this matter. The Subcommittee will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the Full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official (DFO), Christina Antonescu (Telephone 301-415-6792 or Email: Christina.Antonescu@nrc.gov) five days prior to the meeting, if possible, so that appropriate arrangements can be made. Thirty-five hard copies of each presentation or handout should be provided to the DFO thirty minutes before the meeting. In addition, one electronic copy of each presentation should be emailed to the DFO one day before the meeting. If an electronic copy cannot be provided within this timeframe, presenters should provide the DFO with a CD containing each presentation at least thirty minutes before the meeting. Electronic recordings will be permitted only during those portions of the meeting that are open to the public. Detailed procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 1, 2014 (79 FR 59307).

Detailed meeting agendas and meeting transcripts are available on the NRC Web site at <http://www.nrc.gov/reading-rm/doc-collections/acrs>. Information regarding topics to be discussed, changes to the agenda, whether the meeting has been canceled or rescheduled, and the time allotted to present oral statements can be obtained from the Web site cited above or by contacting the identified DFO. Moreover, in view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with these references if such rescheduling would result in a major inconvenience.

If attending this meeting, please enter through the One White Flint North building, 11555 Rockville Pike, Rockville, MD. After registering with security, please contact Mr. Theron Brown (Telephone 240-888-9835) to be escorted to the meeting room.

Dated: October 15, 2015.

Peter Wen,

Acting Chief, Technical Support Branch, Advisory Committee on Reactor Safeguards.

[FR Doc. 2015-26736 Filed 10-20-15; 8:45 am]

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards

Procedures for Meetings

Background

This notice describes procedures to be followed with respect to meetings conducted by the U.S. Nuclear Regulatory Commission's (NRC's) Advisory Committee on Reactor Safeguards (ACRS) pursuant to the Federal Advisory Committee Act (FACA). These procedures are set forth so that they may be incorporated by reference in future notices for individual meetings.

The ACRS is a statutory advisory Committee established by Congress to review and report on nuclear safety matters and applications for the licensing of nuclear facilities. The Committee's reports become a part of the public record.

The ACRS meetings are conducted in accordance with FACA; they are normally open to the public and provide opportunities for oral or written statements from members of the public to be considered as part of the Committee's information gathering process. ACRS reviews do not normally encompass matters pertaining to environmental impacts other than those related to radiological safety.

The ACRS meetings are not adjudicatory hearings such as those conducted by the NRC's Atomic Safety and Licensing Board Panel as part of the Commission's licensing process.

General Rules Regarding ACRS Full Committee Meetings

An agenda will be published in the **Federal Register** for each full Committee meeting. There may be a need to make changes to the agenda to facilitate the conduct of the meeting. The Chairman of the Committee is empowered to conduct the meeting in a manner that, in his/her judgment will facilitate the orderly conduct of business, including making provisions to continue the discussion of matters not completed on the scheduled day on another day of the same meeting. Persons planning to attend the meeting may contact the Designated Federal Officer (DFO) specified in the **Federal Register** Notice prior to the meeting to be advised of any changes to the agenda that may have occurred.

The following requirements shall apply to public participation in ACRS Full Committee meetings:
