

In accordance with National Environmental Policy Act (NEPA) (40 CFR 1506.6(b)) requirements, this notice announces the availability of the ROD for the final CCP and final EIS for San Luis Valley NWR Complex. We completed a thorough analysis of the environmental, social, and economic considerations associated with our actions. The ROD documents our selection of alternative B, the preferred alternative.

The CCP will guide us in managing and administering the Refuge Complex for the next 15 years. Alternative B, as we described in the final EIS/ROD, is the foundation for the CCP.

Background

The CCP Process

The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd–668ee) (Administration Act), as amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. We will review and update the CCP at least

every 15 years in accordance with the Administration Act.

CCP Alternatives and Selected Alternative

Our final CCP and final EIS (80 FR 48328; August 12, 2015) addressed several issues. To address these, we developed and evaluated the following alternatives: Alternative A—No Action; Alternative B—Wildlife Populations, Strategic Habitat Restoration, and Enhanced Public Uses; Alternative C—Habitat Restoration and Ecological Processes; and Alternative D—Maximize Public Use Opportunities.

After consideration of the more than 1,000 comments that we received on the draft CCP and draft EIS, we have selected alternative B—Wildlife Populations, Strategic Habitat Restoration, and Enhanced Public Uses. It is the alternative that best meets the purposes of the refuges, the mission of the National Wildlife Refuge System, and the vision and management goals set for the Refuge Complex; and it adheres to Service policies and guidelines. It considers the interests and perspectives of many agencies, organization, tribes, and the public. Additionally, it is the environmentally preferred alternative.

Under alternative B and in cooperation with our partners, we will maintain or restore the composition,

structure, and function of the natural and modified habitats within the Refuge Complex. We will consider the ecological site characteristics and wildlife species needs on our Refuge Complex lands by developing sound and sustainable management strategies that preserve and restore ecological (biological) integrity, productivity, and biological diversity. We will apply strategic habitat conservation principles (a structured, science-driven, and adaptive approach) in determining how to best manage our lands for native fish, wildlife, and plant species, with a particular emphasis on migratory birds, waterfowl, and declining species listed under the Endangered Species Act (listed species). Compatible wildlife-dependent public uses will be enhanced and expanded to include all three refuges. We will facilitate the protection, restoration, and conservation of important water resources through partnerships, public education, and stewardship.
