This Final DARP/EA presents NOAA's assessment of the injuries to natural resources and services and NOAA's final plan to compensate the public for those losses. The full text of the public comments received is provided in Appendix C to the Final DARP/EA, and the response to the comments prepared by NOAA, which includes a summary of changes made to the Draft DARP/EA in response to the comments, is provided in Appendix B of the Final DARP/EA. The purpose of this notice, which is issued under the authority of the Oil Pollution Act (OPA) and the National Environmental Policy Act, is to inform the public of the availability of the Final DARP/EA and of the selected restoration alternative.

SUPPLEMENTARY INFORMATION:

Incident and Response

On November 11, 2005, while en route from Houston, Texas, to Tampa, Florida, the integrated tug-barge unit comprised of the tugboat "Rebel" and the double-hull Tank Barge (T/B) DBL 152 struck the submerged remains of a pipeline service platform in the Gulf of Mexico that collapsed during Hurricane Rita. An estimated 45,846 barrels of oil (1,925,532 gallons) were discharged into federal waters of the Gulf of Mexico as a result of this incident, most of which sank to the ocean floor. Of this volume, an estimated 2,355 barrels (98,910 gallons) were recovered by divers. In total, an estimated 43,491 barrels (1,826,622 gallons) of oil remained unrecovered at the time submerged oil cleanup operations were discontinued in January 2006.

Government agencies responded to the incident to supervise and assist in clean-up and begin assessing the impact of the spill on natural resources. Under the federal Oil Pollution Act (OPA), 33 U.S.C. 2701-2761, the National Oceanic and Atmospheric Administration (NOAA), of the Department of Commerce, is responsible for restoring
