

FEDERAL REGISTER

Vol. 82

Friday,

No. 9

January 13, 2017

Pages 4149–4768

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.ofr.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.fdsys.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 82 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 82, No. 9

Friday, January 13, 2017

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2016-8557; Airspace Docket No. 16-AGL-17]

Amendment of Class E Airspace for the Following Wisconsin Towns; Antigo, WI; Ashland, WI; Black River Falls, WI; Cable Union, WI; Cumberland, WI; Eagle River, WI; Hayward, WI; and Wausau, WI; and Revocation of Class E Airspace; Wausau, WI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies Class E airspace extending upward from 700 feet above the surface at Langlade County Airport, Antigo, WI; John F. Kennedy Memorial Airport, Ashland, WI; Black River Falls Area Airport, Black River Falls, WI; Cable Union Airport, Cable Union, WI; Cumberland Municipal Airport, Cumberland, WI; Eagle River Union Airport, Eagle River, WI; Sawyer County Airport, Hayward, WI; and Wausau Downtown Airport, Wausau, WI. Decommissioning of non-directional radio beacon (NDB), cancellation of NDB approaches, and implementation of area navigation (RNAV) procedures have made this action necessary for the safety and management of Instrument Flight Rules (IFR) operations at the above airports. This action also removes Class E surface area airspace at Wausau Municipal Airport (Wausau Downtown Airport), Wausau, WI, as a review has determined that the airport no longer meets the requirements for this airspace. Additionally, the geographic coordinates at Langlade County Airport, John F. Kennedy Memorial Airport, Cumberland Municipal Airport, Eagle

River Union Airport, and Wausau Downtown Airport (formerly Wausau Municipal Airport) are adjusted to coincide with the FAA's aeronautical database.

DATES: Effective 0901 UTC, April 27, 2017. The Director of the Federal Register approves this incorporation by reference action under Title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.11 and publication of conforming amendments.

ADDRESSES: FAA Order 7400.11A, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at http://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: 202-267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11A at NARA, call 202-741-6030, or go to http://www.archives.gov/federal-register/code-of-federal-regulations/ibr_locations.html.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends Class E airspace extending upward from

700 feet above the surface at Langlade County Airport, Antigo, WI; John F. Kennedy Memorial Airport, Ashland, WI; Black River Falls Area Airport, Black River Falls, WI; Cable Union Airport, Cable Union, WI; Cumberland Municipal Airport, Cumberland, WI; Eagle River Union Airport, Eagle River, WI; Sawyer County Airport, Hayward, WI; and Wausau Downtown Airport, Wausau, WI; and removes Class E surface area airspace at Wausau Downtown Airport (formerly Wausau Municipal Airport), Wausau, WI.

History

On August 11, 2016, the FAA published in the **Federal Register** a notice of proposed rulemaking (NPRM), (81 FR 53093) Docket No. FAA-2016-8557, to modify Class E airspace extending upward from 700 feet above the surface at Langlade County Airport, Antigo, WI; John F. Kennedy Memorial Airport, Ashland, WI; Black River Falls Area Airport, Black River Falls, WI; Cable Union Airport, Cable Union, WI; Cumberland Municipal Airport, Cumberland, WI; Eagle River Union Airport, Eagle River, WI; Sawyer County Airport, Hayward, WI; and Wausau Downtown Airport, Wausau, WI, and to remove Class E surface area airspace at Wausau Municipal Airport (Wausau Downtown Airport), Wausau, WI. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Class E airspace designations are published in paragraph 6002 and 6005, respectively, of FAA Order 7400.11A, dated August 3, 2016, and effective September 15, 2016, which is incorporated by reference in 14 CFR part 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016. FAA Order 7400.11A is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11A lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 modifies Class E airspace extending upward from 700 feet above the surface at the following airports:

Within a 6.5-mile radius (increasing from the previous 6.4-mile radius) of Langlade County Airport, Antigo, WI, removing the extension to the north of the airport, and updating the geographic coordinates of the airport to coincide with the FAA's aeronautical database;

Within a 7.0-mile radius (increasing from the previous 6.5-mile radius) of John F. Kennedy Memorial Airport, Ashland, WI, with an extension southwest of the airport from the 7.0-mile radius to 8.2 miles, removing extensions to the southwest and southeast of the airport, and updating the geographic coordinates of the airport to coincide with the FAA's aeronautical database;

Within a 7.1-mile radius (increasing from the previous 6.4-mile radius) of Black River Falls Area Airport, Black River Falls, WI, with an extension southwest of the airport from the 7.1-mile radius to 11.7 miles, with an extension northeast of the airport from the 7.1-mile radius to 11.4 miles;

Within a 6.9-mile radius (increasing from the previous 6.4-mile radius) of Cable Union Airport, Cable Union, WI, and removing the extension to the southwest of the airport;

Within a 6.4-mile radius of Cumberland Municipal Airport, Cumberland, WI, with extensions from the 6.4-mile radius to 10.2 miles west and east; and updating the geographic coordinates of the airport to coincide with the FAA's aeronautical database;

Within a 6.5-mile radius (reducing from the previous 6.6-mile radius) of Eagle River Union Airport, Eagle River, WI, with an extension southwest of the airport from the 6.5-mile radius to 9.2 miles, and updating the geographic coordinates of the airport to coincide with the FAA's aeronautical database;

Within a 6.6-mile radius (increasing from the previous 6.5-mile radius) of Sawyer County Airport, Hayward, WI, with an extension northeast of the airport from the 6.6-mile radius to 8.5 miles;

And within a 6.8-mile radius (increasing from the previous 6.5-mile radius) of Wausau Downtown Airport, Wausau, WI, and updating the name and geographic coordinates of the airport to coincide with the FAA's aeronautical database.

The Class E airspace designated as a surface area at Wausau Municipal Airport, Wausau, WI, is removed as the

airport no longer meets the requirements for this airspace.

These airspace reconfigurations are necessary due to the decommissioning of NDBs, cancellation of NDB approaches, or implementation of RNAV standard instrument procedures at these airports. Controlled airspace is necessary for the safety and management of standard instrument approach procedures for IFR operations at these airports.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," paragraph 5–6.5.a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016, is amended as follows:

Paragraph 6002 Class E Airspace Designated as Surface Areas.

* * * * *

AGL WI E2 Wausau, WI [Removed]

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AGL WI E5 Antigo, WI [Amended]

Langlade County Airport, WI
(Lat. 45°09'14" N., long. 89°06'38" W.)

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Langlade County Airport.

AGL WI E5 Ashland, WI [Amended]

John F. Kennedy Memorial Airport, WI
(Lat. 46°32'55" N., long. 90°55'08" W.)

That airspace extending upward from 700 feet above the surface within a 7.0-mile radius of John F. Kennedy Memorial Airport, and within 2.9 miles each side of the 201° bearing from the airport extending from the 7.0-mile radius to 8.2 miles southwest of the airport.

* * * * *

AGL WI E5 Black River Falls, WI [Amended]

Black River Falls Area Airport, WI
(Lat. 44°15'03" N., long. 90°51'19" W.)

That airspace extending upward from 700 feet above the surface within a 7.1-mile radius of Black River Falls Area Airport, and within 2 miles each side of the 081° bearing from the airport extending from the 7.1-mile radius to 11.4 miles east of the airport, and within 2 miles each side of the 260° bearing from the airport extending from the 7.1-mile radius to 11.7 miles west of the airport.

* * * * *

AGL WI E5 Cable Union, WI [Amended]

Cable Union Airport, WI
(Lat. 46°11'42" N., long. 91°14'54" W.)

That airspace extending upward from 700 feet above the surface within a 6.9-mile radius of Cable Union Airport.

* * * * *

AGL WI E5 Cumberland, WI [Amended]

Cumberland Municipal Airport, WI
(Lat. 45°30'22" N., long. 91°58'51" W.)

That airspace extending upward from 700 feet above the surface within a 6.4-mile radius of Cumberland Municipal Airport, and within 2 miles each side of the 091° bearing from the airport extending from the 6.4-mile radius to 10.2 miles east of the airport, and

within 2 miles each side of the 270° bearing from the airport extending from the 6.4-mile radius to 10.2 miles west of the airport.

* * * * *

AGL WI E5 Eagle River, WI [Amended]

Eagle River Union Airport, WI
(Lat. 45°55'56" N., long. 89°16'06" W.)

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Eagle River Union Airport, and within 2 miles each side of the 225° bearing from the airport extending from the 6.5-mile radius to 9.2 miles southwest of the airport.

* * * * *

AGL WI E5 Hayward, WI [Amended]

Sawyer County Airport, WI
(Lat. 46°01'31" N., long. 91°26'39" W.)

That airspace extending upward from 700 feet above the surface within a 6.6-mile radius of Sawyer County Airport, and within 2 miles each side of the 025° bearing from the airport extending from the 6.6-mile radius to 8.5 miles northeast of the airport.

* * * * *

AGL WI E5 Wausau, WI [Amended]

Wausau Downtown Airport, WI
(Lat. 44°55'35" N., long. 89°37'37" W.)

That airspace extending upward from 700 feet above the surface within a 6.8-mile radius of Wausau Downtown Airport.

Issued in Fort Worth, Texas, on December 28, 2016.

RIN 2501-AD77

Requirements for Notification, Evaluation and Reduction of Lead-Based Paint Hazards in Federally Owned Residential Property and Housing Receiving Federal Assistance; Response to Elevated Blood Lead Levels

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: This final rule amends HUD's lead-based paint regulations to reduce blood lead levels in children under age six (6) who reside in federally-owned or -assisted pre-1978 housing, formally adopting a revised definition of "elevated blood lead level" (EBLL) in children under the age of six (6), in accordance with Centers for Disease Control and Prevention (CDC) guidance. It also establishes more comprehensive testing and evaluation procedures for the housing where such children reside. This final rule also addresses certain additional elements of the CDC guidance pertaining to assisted housing and makes technical corrections and clarifications. This final rule, which follows HUD's September 1, 2016, proposed rule, takes into consideration public comments submitted in response to the proposed rule.

DATES: *Effective Date:* February 13, 2017.

Compliance Date: July 13, 2017.

I. Background

A. HUD's Long-Term and Ongoing Efforts To Reduce Lead Poisoning in Children

Childhood lead poisoning has long been documented as causing reduced intelligence, low attention span, and reading and learning disabilities; it has additionally been linked to juvenile delinquency, behavioral problems, and many other adverse health effects.¹ Despite public health efforts successfully reducing toxic lead exposure in children nationwide, blood lead monitoring continues to reveal children with elevated blood lead levels due to exposure in their specific housing environments. The Centers for Disease Control and Prevention (CDC) has consistently affirmed its position that lead-based paint and lead-contaminated dust are the most hazardous sources of lead for U.S. children.² Over the past decade, HUD has dramatically reduced housing-based lead exposure among children through lead paint abatement and interim controls.³ Nevertheless, a considerable number of children under age six (6) currently reside in HUD-assisted housing units that contain lead-based paint.

¹ See HUD's proposed rule and the accompanying regulatory impact assessment, available at www.regulations.gov/document?D=HUD-2016-0096.

² See CDC, *Lead: Prevention Tips*, <http://www.cdc.gov/nceh/lead/tips.htm>.

³ See, e.g., HUD's lead hazard control grant programs and the lead hazard control work required of landlords under settlements HUD has reached in enforcing the Lead Disclosure Statute and related regulations at 42 U.S.C. 4852d and 24 CFR part 35, subpart A.

To address this issue, HUD issued a proposed rule on September 1, 2016, at 81 FR 60304, to revise HUD's Lead Safe Housing Rule (LSHR) by adopting the CDC's guidance on when an environmental intervention should be conducted in response to a child's blood lead level, thereby establishing HUD's definition of elevated blood lead level (EBLL) as the level for which environmental intervention is required in certain federally-owned and federally-assisted housing, among other changes. This final rule considers public comments submitted on the September 1, 2016, proposed rule and defines "elevated blood lead level" (EBLL) as the level at which the CDC recommends environmental intervention.

B. Authority for HUD's Lead-Based Paint Regulation

HUD's LSHR is codified in Title 24 of the Code of Federal Regulations (CFR) part 35, subparts B through R. The LSHR implements sections 1012 and 1013 of the Residential Lead-Based Paint Hazard Reduction Act of 1992, which is Title X of the Housing and Community Development Act of 1992 (Pub. L. 102-550, approved October 28, 1992); sections 1012 and 1013 are codified at 42 U.S.C. 4822.

Under Title X, HUD has specific authority to control lead-based paint and lead-based paint hazards in HUD-assisted housing that may have lead-based paint, called "target housing."⁴ The LSHR aims in part to ensure that

⁴ HUD's regulation at 24 CFR 35.110, based on the Title X definition at 42 U.S.C. 4851b(27), defines "target housing" as any housing constructed prior to 1978, but not including housing for the elderly or persons with disabilities where no child less than 6 years of age resides or is expected to reside, or any zero-bedroom dwelling.

federally-owned or federally-assisted target housing is free of lead-based paint hazards. Lead-based paint hazards are lead-based paint and all residential lead-containing dusts and soils, regardless of the source of the lead, which, due to their condition and location, would result in adverse human health effects.

HUD recognizes that there is no safe level of lead exposure. Consistent with Title X and the LSHR, HUD's primary focus is on minimizing childhood lead exposures, rather than on waiting until children have elevated blood lead levels to undertake actions to eliminate lead-based paint hazards. HUD's Office of Lead Hazard Control and Healthy Homes (OLHCHH) has spearheaded major efforts to that end by taking actions feasible and authorized by law to reduce lead exposure in children.⁵

II. Regulatory Approach

A. Overview

This final rule revises HUD's criteria under the LSHR for responding to the identification of children under age six (6) with high blood lead levels residing in covered federally-assisted and federally-owned target housing. The final rule also addresses lead hazard evaluation and control for additional

⁵ These actions include administering a successful Lead Hazard Control program of grants, enforcement, research, and outreach, and providing conditions of funding through the office's notices of funding availability, updating guidelines and best practices, and working collaboratively with other Federal agencies such as the U.S. Department of Health and Human Services (HHS), particularly its CDC, and the U.S. Environmental Protection Agency (EPA). See *Advancing Healthy Housing, a Strategy for Action*, http://portal.hud.gov/hudportal/documents/huddoc?id=stratplan_final_11_13.pdf.

assisted housing units in the same properties as those in which children under age six (6) with high blood lead levels have been discovered. The final rule adopts an approach based on the previously codified LSHR, the CDC's reference range value for blood lead levels in children under age six (6),⁶ the HUD *Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing* (HUD Guidelines), HUD's experience implementing the LSHR since its 1999 promulgation, and public comments received on the September 1, 2016, proposed rule.

Specifically, under this final rule, when a child under age six (6) with an EBLL is identified, the "designated party" and/or the housing owner shall undertake certain actions.⁷ This protocol is the same for each of the four applicable HUD subparts (H, I, L, M), and slightly narrower for the subpart covering other agencies (D), under which those agencies must decide how to treat housing units in multi-unit properties other than the unit in which the child with an EBLL resides. Figure 1 provides an overview of the protocol for addressing EBLL cases in housing covered by the LSHR.

⁶ CDC's "reference range value" method for defining EBLLs is based on the blood lead level equaled or exceeded by 2.5 percent of U.S. children aged 1-5 years as determined by CDC's most recent National Health and Nutritional Examination Survey. Currently, CDC's reference range value is 5 µg/dL (5 micrograms of lead per deciliter of blood).

⁷ The designated party is the owner or other entity (e.g., federal agency, state, local government, public housing agency, tribally designated housing entity, sponsor, etc.) designated under the LSHR as responsible for complying with applicable requirements of the LSHR for the residential property or dwelling unit, as applicable. See 24 CFR 35.110.

Fig. 1. Flowchart overview of the elevated blood lead level protocol.⁸

B. Changes Made at the Final Rule Stage

This final rule follows publication of, and takes into consideration, public comments received on the September 1, 2016, proposed rule. Based on that review, HUD makes the following changes to the proposed rule at the final rule stage. For some of those changes, the wording changes in multiple instances.

1. In §§ 35.325(b)(2)(i), 35.730(f)(4)(i), 35.830(f)(3)(i), 35.1130(f)(4)(i), and

⁸ “Index Unit” refers to the housing unit in which the child who has an EBLL resides, with the terminology adapted from the traditional epidemiology term, “index case, the case that is first reported to public health authorities.” CDC, Guidelines for the Control of Pertussis Outbreaks. Centers for Disease Control and Prevention: Atlanta, GA, 2000. Chapter 11, Definitions. www.cdc.gov/pertussis/outbreaks/guide/downloads/chapter-11.pdf.

35.1225(f)(3)(i), HUD changes the requirements for other assisted dwelling units covered by §§ 35.325(b)(1), 35.730(f)(1), 35.830(f)(1), 35.1130(f)(1), and 35.1225(f)(1), respectively, by clarifying that they do not apply if the owner both conducted a risk assessment of those units and the common areas servicing them and conducted interim controls of identified lead-based paint hazards after the date the child’s blood was last sampled.

2. In § 35.730(f)(1), regarding assisted units, other than the index unit, with a child or children under age six (6), in a project-based assisted property with a child or children under age six (6) with an EBLL in a household for which the project-based rental assistance is up to \$5,000 per year, and in § 35.1225(f), regarding units, other than the index

unit, with a child or children under age six (6), occupied by households receiving tenant-based rental assistance, in a property with a child or children under age six (6) with an EBLL in a household receiving tenant-based rental assistance, HUD revises the proposed rule to require the designated party, *i.e.*, the owner or, as discussed in section III.B.10.h of this preamble, the public housing agency, HOME grantee or subrecipient, or HOPWA grantee or sponsor, as applicable, to conduct a risk assessment,⁹ in accordance with

⁹ Throughout this Final Rule, “risk assessment” has the meaning of the term as used in the LSHR (at 24 CFR 35.110, Definitions), which is derived from the Title X definition (42 U.S.C. 4851b(25) (for HUD rules) and 15 U.S.C. 2681(16) (for EPA rules); it does not have the meaning of the same term under Superfund (the Comprehensive

methods and standards established either by a state or tribal program authorized by the EPA, or by the EPA at 40 CFR 745.227(d) with procedures defined by the EPA—rather than a visual assessment—of the other units for which the household receives tenant-based rental assistance in the property, and interim controls of the lead-based paint hazards identified by the risk assessment, using the proposed rule's schedule for completion of lead-based paint hazard reduction activities.

3. In § 35.730(f)(2), HUD replaces the provision regarding paint stabilization following a visual assessment with a provision regarding interim controls following a risk assessment.

4. HUD is not including in this final rule proposed §§ 35.730(g), 35.1130(g) and 35.1225(g), which contained language encouraging owners to evaluate and control for sources of lead exposure other than those covered by this subpart.

5. In § 35.1225(f)(1), HUD changes the reference to a “visual assessment” to “risk assessment” and changes the cross-reference to the section that describes procedures for such an assessment.

6. In § 35.1225(f)(2), HUD clarifies that the discussion concerns “lead-based paint hazards” rather than “deteriorated paint” to emphasize reduction of lead-based paint hazards rather than paint stabilization.

7. In § 35.1225(f)(3), HUD removes reference to visual assessment and amends and adds language to clarify that the discussion is of “interim controls” of “lead-based paint” rather than “deteriorated paint” and to emphasize reduction of lead-based paint hazards rather than paint stabilization.

Additionally, HUD takes this opportunity to make the following technical corrections and conforming changes.

1. In § 35.105, HUD removes past effective dates and reserves the section.

2. In § 35.110, HUD makes a technical correction to indicate the correct section number for the Definitions section, and revises the definition of “Certified”.

3. In § 35.155(a), on minimum requirements for lead-based paint hazard evaluation or reduction, HUD makes a technical correction by changing both instances of “designated party or occupant” to “designated party or owner,” in order to identify correctly who may be required to conduct additional lead-based paint hazard

evaluation or reduction, beyond the minimum under the LSHR.

4. In §§ 35.325(b)(1), 35.830(f)(3)(i), 35.1225(f)(1), and 35.1225(f)(3)(i), HUD makes a technical correction to grammar by replacing the verb “serving” with the verb “servicing” in the first sentence.

5. In § 35.325(b)(1), HUD replaces the auxiliary verb “would” with the auxiliary verb “shall,” in the second sentence.

6. In § 35.325(b)(1), HUD adds language to clarify that the hazards referenced in the third sentence are those identified in accordance with § 35.1325 or § 35.1330. In § 35.325(d), HUD clarifies that the timetable referenced therein shall include provision of documentation on the lead hazard evaluation and control activities to the agency.

7. In §§ 35.730(a), 35.830(a), 35.1130(a), and 35.1225(a), the rule discusses the requirements that apply if a public health department has already conducted an evaluation of the dwelling unit. HUD revises the proposed rule to state explicitly that in order to exempt the designated party from conducting an environmental investigation, the public health department's evaluation must have been conducted in response to the current case.

8. In §§ 35.730(f)(2), 35.830(f)(2), 35.1130(f)(2), and 35.1225(f)(2), HUD clarifies when lead-based paint hazard reduction is considered complete.

9. In § 35.730(f)(4), HUD clarifies when the requirements of paragraph (f) do not apply.

10. In § 35.830(h), HUD clarifies that “clearance” is among the deadline-driven activities covered by this section.

11. In § 35.1330(a)(4)(iii) on training requirements for interim control workers and supervisors, which are applicable to some of the work conducted under this rule, HUD makes a technical correction by replacing all references to the defunct HUD course approval process, with references to the current EPA and EPA-authorized state renovator course accreditation process.

C. Applicability of Civil Rights Laws

HUD notes that housing-based lead exposure has a disproportionate impact on children of some racial and ethnic groups and those living in older housing.¹⁰ Lead hazard evaluation and control activities in federally-assisted and federally-owned target housing are

subject to the requirements of the applicable civil rights laws, including the Fair Housing Act, as amended (and its prohibition of discrimination on several bases, including, but not limited to, race, disability, and familial status, including the presence of a child under age of 18, or of a pregnant woman), Title VI of the Civil Rights Act of 1964 (prohibiting discrimination on the basis of race, color, and national origin), Title IX of the Education Amendments of 1972 (prohibiting discrimination on the basis of sex), and section 504 of the Rehabilitation Act of 1973 (prohibiting discrimination on the basis of disability). Under this final rule, these and other applicable Federal laws, and their associated HUD regulations and guidance, which were incorporated into the current LSHR, continue to apply to these activities without change.

III. Public Comments Submitted on Proposed Rule and HUD's Responses

A. Overview of Public Comments

The public comment period for the September 1, 2016, proposed rule closed on October 31, 2016. As of the close of the comment period, HUD received 62 public comments, including one mass mailing. Comments and HUD's responses are summarized below. All comments can be accessed at <http://www.regulations.gov>.

The overwhelming majority of comments were supportive of the rule. Some commenters, while supporting the rule, suggested ways that it could be improved. In the comments received, the Department identified 378 distinct recommendations. The Department thanks the commenters for their thoughtful insights, and their efforts to improve the current LSHR. The commenters' recommendations fell into 11 broad categories, discussed below. Many comments addressed the four specific questions for comments HUD requested. Most commenters (53) also had concerns about one or more technical issues in applying and administering the LSHR.

Although they presented a range of foci and approaches, commenters were nearly unanimous in expressing their support for increasing the protection of America's children from lead hazards, and the importance of aligning HUD's regulations with the current science from the CDC. These sentiments are best summed up by a comment submitted on behalf of the 13,765 individuals who signed a letter circulated by the commenter that stated that they, “fully support [HUD's] proposal to update the Lead Safe Housing Rule by lowering the threshold of lead exposure to align with

Environmental Response, Compensation, and Liability Act of 1980 (CERCLA)), or other statutes, regulations or policies. See, e.g., <https://www.epa.gov/risk/risk-assessment-guidelines>.

¹⁰ See CDC, *Lead: Prevention Tips*, <http://www.cdc.gov/nceh/lead/tips.htm>; CDC, *Recommendations for Blood Lead Screening of Medicaid-Eligible Children Aged 1–5 Years: an Updated Approach to Targeting a Group at High Risk* (Aug. 2009), available at <http://www.cdc.gov/mmwr/preview/mmwrhtml/rr5809a1.htm>.

the Centers for Disease Control and Prevention's recommendations and allow for HUD to move more quickly to protect children's health. Given the risks, anything your agency can do to reduce lead exposure is appreciated."

B. Significant Public Comments and HUD's Responses

1. Primary Prevention

Comment: Almost half of the commenters (32) identified the importance of primary prevention. Many recommended conducting a risk assessment in a unit before a family with a child occupied the unit. Other commenters noted that recent CDC-HUD research shows children in HUD-assisted housing already have lower blood lead levels than children in comparable low-income housing.¹¹ However, as the article notes, while the result provides a favorable assessment of the benefits of HUD's assistance requirements and assistance monitoring programs, the size of the study's filtered sample was not sufficiently large to identify patterns within particular types of housing assistance.

HUD Response: HUD has adopted the position of CDC and other federal agencies that no amount of lead in a child's blood can be considered safe,¹² and that primary prevention is critical to protecting America's children. However, it must be noted that the primary purposes of this rulemaking are adopting the revised definition of "elevated blood lead level" (EBLL) in children under the age of six (6), and strengthening designated parties' or owners' responses in cases where children with high blood lead levels reside in federally-assisted and federally-owned target housing. Therefore, the currently codified LSHR's primary prevention requirements associated with pre-occupancy activities and ongoing lead-based maintenance programs not associated with EBLL cases in federally-assisted and federally-owned target housing are outside the scope of this rulemaking. The Department will consider addressing

pre-occupancy activities and ongoing lead-based maintenance programs in future rulemaking.

2. Resources Available

Comment: Almost half of the commenters (30) expressed a need for appropriate resources for grantees to implement this rule correctly. Resources mentioned included additional funding for environmental investigation and appropriate training and technical assistance. Some commenters stated that, without these additional resources, the rule could not be properly implemented, and encouraged HUD to wait until such resources were available before implementing the rule.

HUD Response: HUD is sensitive to the cost of implementation, especially in an era of tightened budgets among grantees, state, local, and tribal governments, and other federal assistance recipients—and in the face of competing priorities, including those related to health of vulnerable populations, such as young children. However, a delay in implementation to wait for potential additionally appropriated resources could result in avoidable long-term harm to children in federally-assisted and federally-owned target housing. Furthermore, as calculated in the Regulatory Impact Assessment accompanying this rule, the benefits of the rule outweigh the costs. One commenter said, regarding, "the Regulatory Impact Assessment [that they] believe that it is a reasonable estimate. If anything, we believe (as discussed in the RIA) that the benefits of the proposed regulation are underestimated, because some benefits cannot be quantified or monetized, such as avoided stress on parents and children. We also believe that some costs are likely to be lower than those estimated by HUD," because, for example, HUD assumes the presence of only one child with EBLL in each unit, when some units may have more.

HUD will work with grantees and owners to identify ways in which this rule can be implemented with as little burden as feasible, and how existing resources can be directed to implementation, particularly in rural and underserved areas. HUD will also provide training opportunities to assist in implementing the rule.

Comment: Two commenters requested that public housing agencies be allowed to compete for lead hazard control grants from HUD's Office of Healthy Homes and Lead Hazard Control.

HUD Response: Eligibility for that grant program is outside the scope of this rulemaking. However, HUD wishes to advise that public housing agencies,

per Title X, are eligible for those grants only if they are an agency of a unit of state or local government. Similarly, housing units are eligible for enrollment under a grant (and, thus for lead-based paint inspection and risk assessment, and, if lead-based paint hazards are found, lead hazard control) only if they are target housing and meet certain other qualifications, e.g., the housing does not receive any federal housing assistance, or the family is receiving tenant-based rental assistance, such as a housing choice voucher. The housing is ineligible for enrollment in a lead hazard control grant if it is "federally assisted housing, federally owned housing, or public housing."¹³ The first of these includes housing receiving project-based rental assistance, the second, housing for which the mortgagee has defaulted on a federally-insured mortgage, and the third, housing owned by a public housing agency.

HUD has been reaching out to public housing agencies to encourage owners of housing units in which the families receive a Housing Choice Voucher to enroll those units in the lead hazard control grant (funded by the OLCCHH), whose target area includes the location of the units. Because most families eligible for this type of voucher have incomes which make them eligible for enrolling in a lead hazard control grant, HUD has expedited the process for the grantees to enroll them. HUD will continue to promote lead hazard control grantee-public housing agency partnerships.

3. Tenant Protections

a. Anti-Retaliation Protections

Comment: Many commenters (36) remarked on the need for protections for tenants. Generally, these commenters were worried about possible "retaliation" or "reprisal" against tenants and "blame shifting." Retaliation or reprisal meant, as described by one commenter, the "loss of benefits, lease violations, termination of assistance, or reporting to a child-welfare agency." Several of these commenters suggested specifying in the rule that this type of retaliation would be prohibited. They also suggested that HUD revise the rule to include an anti-retaliation clause that would prohibit penalties if a child with an EBLL is identified who is not included on the occupant list of the rental or assistance agreement or contract. In addition, commenters proposed several family

¹¹ See Ahrens KA, Haley BA, Rossen LM, Lloyd PC, Aoki Y, *Housing Assistance and Blood Lead Levels: Children in the United States, 2005–2012*, American Journal of Public Health: November 2016, Vol. 106, No. 11: 2049–2056, abstract available at <https://www.regulations.gov/document?D=HUD-2016-0096-0027> (as part of comment docket for this final rule); full text available with subscription at <http://ajph.aphapublications.org/doi/abs/10.2105/AJPH.2016.303432>.

¹² See President's Task Force on Environmental Health Risks and Safety Risks to Children, *Key Federal Programs to Reduce Childhood Lead Exposures and Eliminate Associated Health Impacts*, 2 (Nov. 30, 2016), <https://ptfceph.niehs.nih.gov/>.

¹³ 42 U.S.C. 4852(a), regarding housing unit eligibility, and (b), regarding grant applicant eligibility.

interview methods to provide further protection to households.

HUD Response: HUD already has regulations and policies in place that protect families against retaliation by landlords and has determined that these policies should be sufficient to protect tenants from discrimination and retaliation. Under existing fair housing regulations, interviewers will be required to abide by policies about limited English proficiency, which require HUD, its grantees, and sub-grantees to make reasonable efforts to provide language assistance to ensure meaningful access for persons with limited English proficiency to the recipient's programs and activities.

However, HUD cannot establish a policy that would negate regulations requiring that every individual living in the household be listed on the lease. These regulations are in place to prevent overcrowding, which is associated with its own negative effects on children's well-being, including their health.¹⁴ They are also in place to ensure proper subsidy calculations and enforce lease provisions. Ensuring these regulations and policies are appropriately integrated with the implementation of the LSHR amendments will be addressed through program management. Thus, in this rulemaking, HUD declines to adopt a provision specifically prohibiting penalties if a child with an EBLL is identified who is not included on the occupant list of the rental or assistance agreement or contract.

b. Relocation Protections

Comment: Many commenters (18) offered recommendations about tenant relocation, either permanently or while work was being done in their unit.

HUD Response: HUD understands that relocation may be necessary in some circumstances but it can also be very expensive for the designated party or owner. Existing HUD regulations, policies and guidance on when relocation is appropriate, including those in the currently codified LSHR, have already considered these issues, and HUD was not presented with any evidence that requires reopening those discussions. Thus, in this rulemaking, HUD declines to adopt a provision specifically pertaining to tenant relocation.

4. Coordination Between the Involved Parties

a. Coordination Between HUD and Grantees

Comment: Many commenters (36) addressed the proposed rule's reporting requirements for property owners—specifically their requirements for reporting EBLL discovery and responsive activities to their HUD field office and the OLHCHH—from a variety of viewpoints. Some expressed concerns that reporting would impose difficult burdens on public housing agencies and assisted private owners. Many of these commenters provided helpful suggestions on methods to reduce that burden. Some asked for increases in reporting. Others provided helpful suggestions on mandates, penalties for noncompliance, and the importance of public data profiles. One commenter asked HUD to clarify why public housing authorities must contact both the field office and OLHCHH, instead of having the field office contact OLHCHH.

HUD Response: HUD is mindful of the need to minimize burdens on owners and public housing authorities, the necessity of having appropriate information received timely in order to ensure efficient and effective program administration and monitoring, and the public's interest in open and transparent government information and operation. HUD is also mindful that public health authorities, HUD Field Offices, and the OLHCHH each have distinct roles in addressing an EBLL case, and that time is often of the essence in fulfilling those roles.

The concurrent notification is necessary to ensure that the OLHCHH is aware of the EBLL case timely and knows, upon receiving the notification, the same information that has been provided to the Field Office without having to conduct a verification, which would delay its ability to respond effectively to requests for assistance from the Field Office and monitor the case. HUD also notes that the concurrent notification was proposed for all LSHR subparts in the proposed rule, a scope retained in this final rule, so that public housing authorities are not being subjected to a different requirement than are owners who have this case notification responsibility under certain LSHR subparts.

Considering the necessary balancing of interests, potential future changes in federal and local laws, and the rapid pace of technological advances in sharing and reporting on data, HUD does not believe it is appropriate to be prescriptive in codifying a particular notification process in regulation.

Instead, HUD retains the requirement as drafted in the proposed rule. Specific processes for reporting EBLLs and actions taken will be developed, including an electronic submission pathway. In developing pathways for reporting, HUD will continue to carefully balance these interests.

b. Coordination With Parents, Guardians, and Other Non-Medical Professional Sources

Comment: Several commenters (5) recommended that designated parties and owners accept notification of EBLLs from parents, guardians, and other non-professional sources when notification is accompanied by sufficient documentation such as a doctor's letter.

HUD Response: A letter or report from a medical health care provider, such as a physician or nurse, or the public health department, has always been acceptable notification under the LSHR (because HUD has never required or expected that the provider would come to the office of the designated party personally to deliver the notification). This will continue to be the case under this final rule. Similarly, in the absence of a medically reliable notification that a child under age six (6) has an EBLL, it would be imprudent for HUD to require the designated party and/or the owner to undertake an environmental intervention. When presented with notification of an EBLL from a non-medical-professional source, the designated party is required to contact the local health department or another medical health care provider to verify the notification. This rule details the procedure (including contacting HUD) to be used when a public health department or provider declines to verify a report from a non-medical professional source.

c. Coordination With HIPAA and Local Data Privacy Laws

Comment: Several commenters (8) requested clarification of the protocols for reporting, including the interaction with other federal laws such as the Health Insurance Portability and Accountability Act of 1996 (HIPAA) (Pub. L. 104–191), and state and local privacy laws.

HUD Response: For the purpose of preventing or controlling childhood lead poisoning, in regard to lead hazard evaluation and control activities, the OLHCHH and its lead hazard control grantees acting on its behalf, are considered public health authorities under HIPAA; thus, they may receive related private health information that is minimally necessary to accomplish the intended purpose of the disclosure,

¹⁴ See Solari CD, Mare RD, *Housing Crowding Effects on Children's Wellbeing*, Social Science Research (Mar. 2012), 41(2): 464–476, available at www.sciencedirect.com/science/article/pii/S0049089X11001694.

including the addresses of housing units and vital information about the children and their families, and must protect that information.

5. Technical Concerns

a. Environmental Investigations of Lead Hazards That Are Not Lead-Based Paint Hazards

Comment: Many comments (18) expressed concerns about whether federally-assisted housing providers should look for sources of lead exposure that are not lead-based paint hazards, or would be responsible for such sources of lead exposure if they were identified in the environmental investigation. Some commenters raised concerns about the responsibility for controlling lead exposure if the source of lead was a non-lead-based paint hazard or at another property outside of the control of the designated party or owner, as applicable. Additionally, some commenters requested that HUD add safeguards to ensure that owners are not penalized for missing other sources of exposure if a public health department decides not to, or is unable to work with a designated party or owner on the child's case.

HUD Response: This final rule requires that the owner or designated party, as applicable, ensure that an environmental investigation of the child's lead exposure is completed, which includes investigating sources that are or are not lead-based paint hazards. Environmental investigations must be performed by EPA, state, or tribally certified risk assessors, and the contents of their report must meet EPA, state or tribal requirements, as applicable. The rule also provides that, if a public health department has already conducted an evaluation of the dwelling unit in response to the case, the owner or designated party does not need to conduct another one. HUD has clarified applicable sections of the proposed rule¹⁵ to provide that the evaluation be in response to the current case. This clarification eliminates the potential confusion that a previous case in the same housing unit, whether for an EBLL or other reason, that had prompted a public health department evaluation, however long before the current EBLL case, might allow an environmental investigation or public health department evaluation not to be conducted for the current case. HUD is

¹⁵ 24 CFR 35.730(a), 35.830(a), 35.1130(a), and 35.1225(a) have been revised to read: "If a public health department has already conducted an evaluation of the dwelling unit *in regard to the child's elevated blood lead level case*, the requirements of this paragraph shall not apply" (emphasis added).

not aware of this having occurred, but the technical clarification provides transparency on this issue.

Because children can be exposed to lead by toys, dishes, homeopathic remedies, certain cultural practices, and other non-paint-related sources, the family interview portion of the environmental investigation will include questions on these sources. The designated party or owner is responsible for ensuring that an environmental investigation in accordance with federal, state, and local requirements is conducted timely, regardless of whether it is done by staff or through contract, or that the public health department has conducted an evaluation in response to the case.

In some areas of the country, the public health department will perform the environmental investigation or a comparable evaluation, as may be required by a public health department initiative or state, tribal, or local law, the latter of which may also specify how the environmental investigation is performed and what follow-up actions must be taken by the designated party. In these cases, the most stringent of the federal, State, tribal, or local requirements must be followed.

Regardless of who performs the environmental investigation, HUD is not establishing a requirement that the designated party or owner address sources of exposure that are not lead-based paint hazards, or sources from housing not controlled by the designated party or owner, such as a relative's home, because HUD does not have authority to require that those sources be addressed. As discussed elsewhere in this preamble, risk assessments of certain other housing units in the property may be conducted; as with the environmental investigation of the index unit,¹⁶ these risk assessments may identify non-paint-related sources of lead exposure. Indeed, the HUD Guidelines encourage risk assessors to note other obvious sources of lead exposure, and many risk assessors routinely test items other than paint for lead. The Guidelines also explicitly include such testing as a part of environmental investigations. Nevertheless, HUD does not believe that such activities would subject property owners to expanded legal vulnerability

¹⁶ Here, this refers to the housing unit in which the child who has an EBLL resides, with the terminology adapted from the traditional epidemiology term, "index case, the case that is first reported to public health authorities." CDC, Guidelines for the Control of Pertussis Outbreaks. Centers for Disease Control and Prevention: Atlanta, GA, 2000. Chapter 11, Definitions. www.cdc.gov/pertussis/outbreaks/guide/downloads/chapter-11.pdf.

under this rule. In both the index unit and other units, the designated party or owner is not responsible for controlling these sources. In the 22 years since the Guidelines were first published, this has not created a legal liability problem for risk assessors or building owners and managers.

HUD, such as through its OLHCHH, will continue to encourage designated parties and owners to address such lead hazards as part of its broader effort to ensure the safety and health of residents of its assisted housing, but, for regulatory clarity, not do so through this rulemaking.

Additionally, the EPA regulations at 40 CFR 745.235, 745.237, and 745.327 (or the equivalent regulations of an EPA authorized state or tribal lead-based paint program as applicable) prescribe the training and certification requirements for risk assessors as well as the work practice standards for conduct of a risk assessment and the reporting of the assessment results. This rule does not hold the designated party or owner responsible for a certified risk assessor performing the environmental investigation missing a source of exposure (except, of course, in the case of collusion).

b. Lead in Water

Comment: Several comments (7) specifically addressed the issue of lead-contaminated water, the desirability of testing and controlling lead levels in water, and the responsibilities of owners if high lead levels are found in the water supply.

HUD Response: Controlling exposures to lead from water is outside of HUD's authority for this rulemaking, because Title X, which the LSHR implements, does not authorize HUD to regulate lead in water. The HUD Guidelines' chapter 16 on environmental investigations, discussed in the preamble to the proposed rule, indicates when water testing as part of the investigation is appropriate and provides guidance on how to conduct such testing. Further information on lead in water testing is available from EPA.¹⁷ Requiring control of drinking water lead levels is outside the scope of this rule. Thus, HUD declines to specifically address the issue of lead-contaminated water in this rulemaking.

¹⁷ See, e.g., EPA, *Protect Your Family from Exposures to Lead (Drinking Water)*, www.epa.gov/lead/protect-your-family-exposures-lead#testdw; EPA, *Basic Information about Lead in Drinking Water*, <https://www.epa.gov/ground-water-and-drinking-water/basic-information-about-lead-drinking-water>.

c. Visual Assessment of Housing Units in the Tenant-Based Rental Assistance Program

Comment: Many commenters (28) claimed that the visual assessment protocol in the Housing Choice Voucher (HCV) Program, which provides tenant-based rental assistance, was insufficient to protect children from lead, and that a more rigorous assessment protocol was needed when children under age six (6) will be moving into a unit of target housing with the family receiving assistance through an HCV. Several commenters also recommended that evaluations should be conducted on every unit in a building, regardless of subsidy.

HUD Response: As noted in this preamble, the primary purpose of this rule is adopting the revised definition of “elevated blood lead level” in children under the age of six (6), and the response in cases of children with such a level who reside in federally-assisted target housing. Therefore, pre-occupancy activities are outside the scope of this rule, as are activities in non-federally-assisted units.

Comment: Many commenters (20) addressed the need for assessment of other assisted units in the same property as that of a child under age six (6) with an EBLL in which a child under age six (6) resides or is expected to reside (“other units”), which is within the scope of this rule, as part of the response to the child with an EBLL. Most commenters (18) recommended that HUD strengthen the assessment in the units of other households receiving tenant-based rental assistance to a risk assessment, or, in the alternative, a lead hazard screen.¹⁸ Commenters noted both that the CDC strongly recommends a more stringent risk assessment, and that lead hazards do not discriminate among victims by the type of subsidy they receive.

HUD Response: Under this final rule, risk assessments will be required in other HUD-assisted units in which a child under age six (6) resides or is expected to reside, and the common areas servicing those units. HUD has always distinguished between pre-occupancy and post-occupancy activities in assisted housing. Prior to this final rule, the LSHR distinguished between general, pre-occupancy activities in tenant-based rental assistance housing units and specific

responses to the identification of a child under age six (6) with an environmental intervention blood lead level (EBLL)¹⁹ who had a housing-related lead exposure. It did so by going beyond the visual assessment and paint stabilization requirement of pre-occupancy activities to requiring risk assessments and interim controls for EBLL cases.²⁰ These measures are being extended by this final rule to the other housing choice voucher units in properties where children under age six (6) reside or are expected to reside.

HUD is basing this approach on the CDC guidance that other housing units should receive the same evaluation and controls as the index unit, while narrowing the application of that guidance by not requiring action where statutory authority clearly does not support HUD require action (e.g., in unassisted units), and reducing the overall costs and increasing the effectiveness of the controls by requiring a risk assessment to identify with specificity the lead-based paint hazards in the other units before the controls are undertaken.

The increased burden on a landlord of a family receiving tenant-based rental assistance is expected to be modest, because a certified risk assessor will already be at the property to conduct the environmental investigation in the index unit, and the cost of the risk assessment will be borne by the designated party, i.e., the public housing agency, or the HOME or HOPWA grantee, as applicable. Giving that risk assessor an expanded scope of work to conduct a risk assessment in other units will be an additional cost to the designated party, as will the cost to the owner for control of any lead-based paint hazards that would not have been detected by visual assessments conducted as part of the initial and periodic inspections of the units, but were detected by the risk assessment. These other units of an owner who has been properly implementing the required ongoing lead-based paint maintenance program are more likely not to have hazards and, if they are present, for them to be fewer in number and less extensive. This risk assessment, and the interim control of any lead-based paint hazards found will provide substantial additional protection to the other children under age six (6) residing or expected to reside in the property, and increased liability protection for the

owner as a result of the more comprehensive evaluation of the housing and resulting lead hazard control, in comparison to the otherwise routine use of the visual assessment and paint stabilization process.

Similarly to how HUD considered commenters’ arguments related to other tenant-based rental assisted units and is responding by requiring risk assessments and interim controls for such units in this final rule—instead of visual assessment and paint stabilization, as proposed—HUD is applying the commenters’ logic to housing receiving project-based assistance of up to \$5,000 per unit per year by requiring risk assessments and interim controls in this final rule, instead of visual assessment and paint stabilization, as proposed.

The Regulatory Impact Assessment has been revised accordingly and continues to show that the benefits of this regulation substantially outweigh the costs.

d. Sampling of Other Units in Large Properties

Comment: Two commenters inquired if the sampling protocols for larger properties (with over 20 housing units in properties built before 1960, or over 10 units in properties built between 1960–1977) in the existing HUD Guidelines’ Chapter 7 would apply to buildings where a child under age six (6) has developed an EBLL, and the child’s unit was found to have lead-based paint hazards, so that examinations of other housing units in the property were required.

HUD Response: As noted in the preamble to the proposed rule, the existing housing unit random sampling protocols for multi-family housing would apply, because, procedurally, they are not being amended by this rule, and substantively, because the statistical foundation for the protocols applies to the EBLL situation just as it does to lead-based paint inspections and risk assessments in general.

e. Interim Controls

Comment: Four commenters recommended that, for at least the types of housing affected under this rule, if not all housing under the LSHR, HUD require abatement, as opposed to mere interim controls, in a unit in which lead-based paint hazards (or, for a visual assessment, deteriorated painted surfaces) were found.

HUD Response: HUD is aware from its experience with its lead hazard control grant program that there can be a substantial cost difference between interim controls of lead-based paint

¹⁸ The EPA’s work practice standards for conducting lead hazard screens and lead risk assessments are provided at 40 CFR 745.227(c) and (d), respectively; both may be conducted only by a person certified by EPA or an EPA-authorized state or tribal lead-based activities program as a risk assessor.

¹⁹ A confirmed concentration of lead in whole blood equal to or greater than 20 µg/dL (micrograms of lead per deciliter) for a single test or 15–19 µg/dL in two tests taken at least 3 months apart, per 24 CFR 35.110.

²⁰ See 24 CFR 35.730(a).

hazards and abatement of them. As noted in the RIA for the proposed rule, the interim controls used under HUD's lead hazard control grant programs were found to be effective for at least 6 years following the intervention, with window replacement and lead hazard control effective after 12 years. Thus, even if an owner did not implement an ongoing lead-based paint management program after the interim control work (such a program is not required under the grants), the duration of the protection of the children's environment regarding lead in the housing would extend beyond the child's sixth birthday. If the owner did implement the management program, as the LSHR requires, the duration of the protection would be at least as long as the period found for protection resulting from work under the grants, and, HUD believes, longer.

HUD also notes that, as described above, the evaluation activity in the other assisted units with a child under age six (6) is being changed from a visual assessment, as proposed, to a risk assessment.

Therefore, HUD declines to modify the proposed rule. However, the designated party or owner may choose to require abatement in circumstances when they do not believe interim controls will sufficiently protect their resident children under age six (6).

f. Update the Standards for Lead Based Paint, Lead Based Paint Hazards and Various Lead Hazard Control Protocols

Comment: Eight commenters requested that HUD, either alone or in partnership with EPA, update various other lead regulations, standards and protocols.

HUD Response: Such changes are beyond the scope of this rulemaking. HUD will collaborate with EPA, as it considers any updates to revise those standards. In the interim, HUD will continue to use existing protocols, including paint-testing requirements,²¹ and lead-safe work practices requirements that were of specific interest to some commenters.

HUD declines a commenter's request to further define the responsibilities of particular owners of a building with multiple owners as related to notices of lead-based paint hazard evaluation and reduction, because its interest is in having the designated party provide

notices to occupants as required, not in establishing criteria for which of the ownership partners within the designated party, which is as a whole, responsible for complying with applicable requirements (see § 35.110), should carry out that responsibility. That is an internal matter for the partners to decide.

g. Pregnant Women Under the LSHR

Comment: Two commenters requested that HUD extend the protections of the LSHR in child-occupied units to units where a pregnant woman resides.

HUD Response: The LSHR has always defined units occupied by pregnant women as units where a child is expected to reside. The Title X and LSHR definitions of "target housing" encompass units where a child under age six (6) "resides or is expected to reside," and, in the LSHR, HUD further clarified the phrase "expected to reside" to mean that "there is actual knowledge that a child will reside in a dwelling unit If a resident is known to be pregnant, there is actual knowledge that a child will reside in the dwelling unit." (See, § 35.110) That definition remains unchanged by the current rule.

h. Landlord Exemptions

Comment: Multiple commenters (16) made recommendations about the provisions that would exempt landlords in certain cases from performing additional risk assessments in their building once a child with an EBLL had been identified. Some of these commenters (5) felt the exemptions were too broad and would not sufficiently protect the other residents of a building that had exposed at least one child to a lead hazard. Most of these commenters (11) felt that the exemptions should be expanded, either for work done in the last 24 months, for work done while the same family occupied the unit, or until such time as the CDC updated its EBLL guidance, or if a unit is scheduled to undergo redevelopment.

HUD Response: HUD's rule provides that a lead risk assessment remains applicable for 12 months. HUD will continue to use this period (vs. the longer 24 months, or the indefinite period of a family's continued occupancy in a unit, for which there is no reason to believe that hazards would not form) in the exemption criteria for when the owner has documentation, "throughout the 12 months preceding the date the owner received the environmental investigation report, of compliance with evaluation, notification, lead disclosure, ongoing lead-based paint maintenance, and lead-

based paint management requirements." Given that the LSHR requires retention of documentation of the owner's compliance with these operational LSHR requirements for the period when ongoing lead-based paint maintenance is required, and for at least 3 years beyond that period, the absence of such documentation for just the past 12 months allows for a reasonable inference that the owner has not complied with the operational requirements of the LSHR, so that a risk assessment is required in the other units. Thus, HUD declines to change this implementation period.

HUD also declines to exempt units that are scheduled for redevelopment. Redevelopment timelines are often uncertain by many months, and it would violate the intent of the LSHR to leave a child exposed to potential lead hazards for such an uncertain length of time. If preliminary work on the redevelopment is sufficiently far advanced that building occupant vacating and/or relocating is under way with completion of vacating and/or relocating and the start of construction both scheduled to be within 45 days (*i.e.*, the sum of the 15-day period for conducting the environmental investigation of the index child's unit and common areas servicing that unit and the 30-day period for conducting lead hazard control there) after the designated party was notified of a child under age six (6) with EBLL, the lead activities need not be conducted in one or more of the other assisted units with a child under age six (6) by that due date if the family in each of those unassessed or uncontrolled units is relocated within 15 days after the designated party received the environmental investigation report, with the lead safety of the family's destination housing meeting the criteria of the preface to § 35.1345(a)(2), and with the family continuing to receive housing assistance without interruption and having their relocation costs covered. Making the original housing lead safe is required by the LSHR (subparts H, J, and/or L, as applicable) to be part of the redevelopment.

At the same time, HUD understands that evaluating additional units poses a burden for owners, and there are some circumstances where documented past performance makes the possibility of future lead hazards substantially less likely. Therefore, HUD also declines to make the exemptions more stringent.

6. Time Available To Complete Work

Comment: Multiple commenters (15) made recommendations about timelines for investigating lead hazards,

²¹ *E.g.*, by requiring the paint testing before interim controls involving RRP work in assisted target housing covered by the LSHR be conducted by a certified lead-based paint inspector or risk assessor (24 CFR 35.110), versus a renovation contractor's using a spot-test kit (40 CFR 745.82(a)(2)).

completing hazard control work, and relocating families if necessary. Most of these commenters (11) felt that the timelines were aggressive and may be unrealistic for owners, particularly owners who operate under complex procurement rules, or owners in communities without adequate numbers of certified risk assessors, lead hazard control workers, and firms who employ them. Other commenters (4) felt that the timelines were too lax, and left families exposed to lead hazards in their home longer than necessary.

HUD Response: None of the commenters provided data on lead hazard control activity durations, temporary relocation costs, or the health effects of lead exposure for the number of days they recommended versus the number of days proposed to support their recommendations. Accordingly, HUD determined that it would retain the timelines in the currently codified LSHR, as proposed. If a designated party or owner believes they will be unable to meet the timelines in a specific circumstance, they should discuss their concerns with HUD when they report the EBLL.

HUD also declines to apply a business day schedule instead of a calendar day schedule to these evaluation and hazard control timelines. The primary victims of lead poisoning are children, who are most likely to be exposed to hazards in their home on non-business days, and many risk assessors and lead hazard control contractors are available to work on weekends for high priority projects, such as responding to the case of a child under age six (6) with an EBLL. With respect to providing notifications to HUD, for which the rule uses business day schedules, HUD will adopt the practice already used by HUD for hearings before hearing officers, that when the due date is a Saturday, Sunday, national holiday, or other day on which the relevant HUD office is closed, the due date is extended until the end of the next following business day. (See, 24 CFR 26.11(a).)

7. Penalties for Noncompliance

Comment: Several commenters (11) recommended that this rule include enforcement remedies and civil money penalties for non-compliance.

HUD Response: The Lead Disclosure Rule, also issued under Title X, allows for violators to be subject to civil money penalties. (See, 24 CFR 35.96, implementing 42 U.S.C. 4852d(b)(1).) In contrast, as the preamble to the original LSHR states (at 64 FR 50168), “The Lead-Based Paint Poisoning Prevention Act does not provide any independent enforcement provisions. Remedies will

vary based on which [assistance] program’s requirements have been violated.” For example, a designated party or owner not in compliance with the LSHR, including this rule, may be considered in default of its regulatory agreement or annual contributions contract, as applicable, with the Department. Noncompliance may also result in the designated party or owner being debarred from receiving assistance from the Department or denied future participation in HUD or federal programs. A designated party or owner in noncompliance may be forced to surrender grant funds, or may be otherwise subject to civil money penalties or other sanctions. HUD plans to enhance its monitoring for LSHR compliance, but does not have the authority to create penalties under this rule or the currently codified LSHR.

8. Future Changes in CDC Recommendations

Comment: Multiple commenters (20) recommended keeping the LSHR synchronized with expected future CDC guidance that may further change the blood lead level that triggers an investigation. A majority (10) of these commenters recommended that future updates to CDC guidance automatically cause HUD’s guidance to change. The remainder recommended variations on using CDC’s current definition, including allowing the level to decrease, but not increase; creating local levels based on the data from a given geography; changing the terminology from CDC’s current usage; or simply waiting for the CDC to update their guidance again before amending the LSHR.

HUD Response: The purpose of this rulemaking is to bring HUD’s requirements into alignment with CDC guidance in regard to environmental investigations for cases of elevated blood lead levels in children under age six (6), while placing the minimum necessary burden on assisted property owners and other designated parties. To do so, while also maximizing the effectiveness of environmental investigations and remedial actions taken as a result of those investigations, HUD proposed that the EBLL under this rule would be a confirmed blood lead level at least that for which U.S. Department of Health and Human Services recommends that an environmental intervention be conducted. This level may be the CDC’s reference range value, as it is at the publication of this rule, or it could be higher, if CDC found recommending environmental interventions to be appropriate only at a higher level than

the reference range value. Accordingly, HUD declines to apply any of the recommended variations.

To respect the potential burden placed on assisted property owners before adjusting its EBLL standard in the LSHR, and to provide transparency in its decision-making, HUD will provide for public notice and comment as described in the proposed rule so that potentially affected parties, including designated parties, their property management firms, risk assessment firms, renovation firms, and tenants, and advocates for all of these parties will have the opportunity to provide comments on proposed EBLL changes. Therefore, HUD declines to modify the proposed process for revising the blood lead level in children under age six (6).

9. Timing of Implementation

Comment: Half of the commenters (29) addressed the issue of the rule’s effective date or implementation date. Of these, some recommended a longer implementation time to adequately prepare, and some recommended a shorter implementation time to begin increasing the protection of children’s health more rapidly. A few commenters felt that the initially proposed 6 months was appropriate.

HUD Response: HUD is mindful of the need to update policies and procedures for planning purposes, and that, as one commenter noted, “it is doubly important that the rule is implemented in such a way that Housing Authorities will be able to comply.” That commenter, and others, noted that CDC has not yet revised its 2012 reference range value, and recommended waiting until some period after CDC’s update. HUD believes it likely that CDC will issue its update in 2017, but it does not want to delay for an indeterminate period the additional protections for children with blood lead levels in the range between the currently codified LSHR’s EBLL threshold and this rule’s proposed EBLL threshold. Therefore, HUD cannot agree with either the majority or minority of commenters and declines to implement the rule faster than 6 months, nor after a longer period. Instead, the compliance date of the rule will be 6 months from publication, as proposed.

10. Other Issues

a. Low Income Communities, Communities of Color, and Affirmatively Furthering Fair Housing

Comment: Five commenters requested that HUD consider that lead poisoning occurs more frequently in low-income communities and communities of color,

and that, furthermore, this may have implications under its fair housing rules.

HUD Response: HUD agrees that research clearly shows higher incidence of EBLLs in low-income communities and in communities of color.²² However, the fair housing implications of this information are governed by fair housing statutes and regulations, and are therefore beyond the scope of this rulemaking; this rule needs to be issued with nationwide applicability. Nevertheless, such comments will be considered as HUD develops future outreach and enforcement strategies for implementing this rule.

b. EPA's Renovation, Repair, and Painting Rule

Comment: Five commenters recommended clarifying and making more explicit the relationship between the LSHR and the EPA's Renovation, Repair and Painting Rule (RRP Rule, 40 CFR part 745, especially subparts E and Q; implementing 15 U.S.C. 2682(c), Renovation and remodeling).

HUD Response: The original LSHR predated the RRP Rule, and therefore could not reference it explicitly. The RRP Rule defines "renovation" broadly in the context of lead-based paint, saying in essence that the term "means the modification of any existing structure, or portion thereof, that results in the disturbance of painted surfaces, unless that activity is performed as part of an abatement . . . [but not] minor repair and maintenance activities," (40 CFR 745.83) where "abatement" and "minor repair and maintenance activities" are defined for purposes of that rule at 40 CFR 745.223 and 745.83, respectively. Accordingly, most of the lead-based paint hazard reduction activities to be conducted as a result of the environmental investigation of the index unit and the risk assessment in other units, will be renovations covered by the RRP Rule, and must be conducted by contractors and individual renovators who are certified renovation firms or certified renovators. The relationship between this rule and the RRP Rule needs to be made explicit for the sake of transparency; doing so will have the additional benefit of making the other portions of the LSHR that require the use of certified renovation firms and certified renovators more transparent. Because

this requirement has been operationally in effect for the LSHR since the RRP Rule went into full effect, clarifying this creates no change in the burden or benefits of implementing the LSHR.

Accordingly, the relationship between the RRP rule and the LSHR is being made explicit through this rulemaking.

First, for the sake of transparency, HUD is adding "renovation" to the list of "activities" within the scope of the definition of "certified" in 24 CFR 35.110, along with the current listing of "risk assessment, lead-based paint inspection, or abatement supervision." HUD notes that the scope of activities in its definition of "certified" is broader than EPA's scope of "Lead-based paint activities," which they define at 40 CFR 745.223, because HUD's definition uses the unmodified term "activities" and includes, in the definition, the phrase "such as" the listed activities of "risk assessment, lead-based paint inspection, or abatement supervision," while the EPA definition is limited to the specific listed activities of "inspection, risk assessment, and abatement." Because HUD's definition is broader, this clarification in the definition will have no effect on the operations of HUD, owners, contractors or employees.

Second, the current LSHR language on interim controls training requirements in § 35.1330(a)(4)(iii), which allowed for approval of certain lead-safe work practices courses by HUD after consultation with the EPA, will be replaced with wording that recognizes renovator courses accredited under the EPA's or by an EPA-authorized state or tribe's renovation program.

HUD also notes that "abatement" of lead-based paint or lead-based paint hazards as defined by EPA at 40 CFR 745.223, and by HUD in the LSHR at 24 CFR 35.110, may be conducted under the LSHR when interim controls are required, because the LSHR already allows conducting additional lead-based paint hazard evaluation or reduction beyond the minimum under the rule. Abatement must be conducted, in accordance with the work practice standards developed by EPA at 40 CFR 745.227(e) or by an EPA authorized state or tribal lead-based paint activities program by certified abatement supervisors and certified abatement workers. HUD encourages the use of abatement as a permanent (at least 20-year-long, or eternally, in the case of paint removal abatement) method of addressing exposures from lead-based paint, dust, and soil in a home, particularly where it may be cost-effective, such as during a major rehabilitation (e.g., a "gut rehab").

c. Other Partnerships

Comment: Five commenters suggested partnerships, or approaches to partnerships that would aid in the implementation of the LSHR.

HUD Response: HUD welcomes these suggestions and fully expects to engage in numerous partnerships to fully implement the LSHR and protect America's children from lead poisoning. However, codifying these partnerships in regulation is unnecessary, so HUD declines to do so.

d. Other Sections of the LSHR Not Amended

Comment: Two commenters recommended that HUD amend the LSHR's subparts C (Disposition of Residential Property Owned by a Federal Agency Other Than HUD), E (which had been proposed in the original LSHR to cover Single Family Insured Property,²³ but was reserved in the final LSHR rulemaking, with 24 CFR part 200, subpart O, being revised at that time) and F (HUD-Owned Single Family Property).

HUD Response: HUD appreciates these suggestions and, while noting that they are outside of the scope of the current rulemaking, will consider future rulemaking to amend these subparts.

e. Accessibility of Inspection Reports

Comment: One commenter recommended protecting a renter's ability to access inspection reports.

HUD Response: This issue is governed by the Lead Disclosure Rule (24 CFR part 35, subpart A) and is therefore outside the scope of this rule.

f. Uniform Physical Condition Standards for the Voucher Program (UPCS-V) Demonstration

Comment: One commenter requested clarifying language on the relationship between the LSHR and the UPCS-V pilot program.

HUD Response: As noted on HUD's Web site (http://portal.hud.gov/hudportal/HUD?src=/program_offices/public_indian_housing/react/oed/upcs-v), to help improve tenant safety and HUD's oversight of the HCV program, HUD is introducing the UPCS-V inspection protocol with new measures to enhance the consistency and objectivity of the inspection process, and provide more information about the condition of individual housing units. The UPCS-V Demonstration is HUD's formal mechanism to test the protocol with up to 250 public housing agencies

²² See, e.g., CDC, *Lead: Prevention Tips*, <http://www.cdc.gov/nceh/lead/tips.htm>; CDC, *Recommendations for Blood Lead Screening of Medicaid-Eligible Children Aged 1-5 Years: an Updated Approach to Targeting a Group at High Risk* (Aug. 2009), available at <http://www.cdc.gov/mmwr/preview/mmwrhtml/rr5809a1.htm>.

²³ Proposed 24 CFR part 36, subpart E; 61 FR 29170-29232, at 29210 (see also 29180), June 7, 1996.

(www.regulations.gov/document?D=HUD-2016-0044-0001).

Participation in the UPCS-V pilot program does not affect whether or how a housing unit or property is covered under the LSHR or this rule amending the LSHR, nor an owner's or designated party's responsibilities under the LSHR. Questions on specific interactions between the LSHR and the UPCS-V pilot, such as one commenter's question, "If a PHA does not complete the hazard reduction on a voucher unit, would that dwelling be in violation of UPCS-V?", are outside the scope of this rulemaking, and should be directed to HUD's Office of Public and Indian Housing.

g. Liability Safeguards

Comment: One commenter expressed concern that because of the lapse in time between CDC issuing guidance and HUD issuing a proposed rule on EBLLs, tenants of HUD-assisted housing may decide to take legal action against PHAs once they learn that the PHA was not in compliance with CDC guidelines. The commenter requested that the LSHR include, "Safeguards that protect PHAs from any litigious behavior that may result from HUD's delayed rulemaking process."

HUD Response: HUD cannot speculate on the merits or costs of any potential litigation, nor to address PHAs' compliance with other federal agencies' guidance, as both are outside the scope of this rulemaking.

h. Determining the Responsible Party

Comment: One commenter requested that, "HUD clarify that there is a single responsible party in areas of the proposed rule where there is an option for one of two entities to assume responsibility. As currently written, sections of the rule would assign responsibility to either the PHA (the designated party) or the property owner."

HUD Response: As defined by the LSHR, a designated party is an entity responsible for complying with applicable requirements of the rule.

This commenter does not identify which LSHR subparts are of concern to it, but an examination of subpart H, L, and M, with which public housing agencies may be involved, shows that subparts H and L each specify only one such entity; so the concern must be for subpart M (Tenant-Based Rental Assistance). Within that subpart, §§ 35.1200(b)(2) through (6) identify the designated party for the assistance programs covered by each of those regulatory paragraphs. In the example of the HCV program, paragraph (2) has

identified the public housing agency as the designated party, with responsibilities under certain provisions of that subpart (e.g., engaging an inspector on its behalf to conduct the pre-occupancy visual assessment (see, § 35.1215(a)(1))) and the owner has had certain responsibilities under other provisions of that subpart (e.g., stabilizing the deteriorated paint surfaces identified by the visual assessment (see, § 35.1215(b))). Regarding EBLL cases under the HCV program, this rule as proposed and made final here uses the same approach: The designated party, i.e., the PHA, is responsible for the environmental investigation and, if needed, verification of the case (see, §§ 35.1225(a) and (b)), while the owner is, for the lead-based paint hazard reduction (see, § 35.1225(c)).

Similarly, in the example of tenant-based rental assistance under the HOME Investment Partnerships Program (HOME) (see, § 92.209), under which HUD's Office of Community Planning and Development (CPD) awards grants to state and local governments ("participating jurisdictions") that provide rental assistance to households and contract with owners of the units they rent, the designated party for the unit occupied by a household receiving tenant-based rental assistance is the participating jurisdiction, or if the tenant-based rental assistance program is administered by a subrecipient, that entity.

Also, the Housing Opportunities for Persons with AIDS (HOPWA) Program provides tenant-based rental assistance to households as an eligible activity (see, § 574.300(b)(5)). HUD's CPD office awards HOPWA entitlement formula grant funds to state and local government grantees ("eligible states and qualifying cities") and HOPWA competitive grant funds to state, local government and non-profit grantees. In this example, if a grantee provides rental assistance to households and contracts directly with owners of the units they rent, the designated party for a unit in which the assisted household occupies is the grantee. In another example, if the tenant-based rental assistance program is administered by a project sponsor, the designated party for a unit in which the assisted household occupies is the project sponsor.

i. Ongoing Lead-Based Paint Maintenance Program

Comment: One commenter recommended that the written notice provided to each dwelling unit asking occupants to report deteriorated paint and, if applicable, failure of

encapsulation or enclosure, along with contact information, be provided to each individual tenant (see, § 35.1355(a)(7)). The same commenter recommended adding "and reporting deteriorated paint" to the heading of § 35.130, Lead hazard information pamphlet, because the reporting notification required by § 35.1355(a)(7) as discussed above, goes to the recipients of the lead hazard information pamphlet provided under § 35.130. The same commenter suggested adding a paragraph (8) to § 35.1355(a), to require that each property covered by the ongoing lead-based paint maintenance requirement must have a written maintenance plan on how to address lead-based activities and who will be able to conduct the activities.

HUD Response: As to the first suggestion, typical notification practice is to provide one notification on a housing operations topic to the dwelling unit, rather than multiple copies for each adult in the unit. HUD will consider the effectiveness and burden of a change for this notification as it develops future rulemaking. As to the second suggestion, while § 35.130 pertains to providing a pamphlet rather than property-specific information, this comment raises the idea of having the Lead Disclosure Rule disclosure form, for at least housing covered by the LSHR, include a confirmation that the reporting notification was provided. HUD will consider the feasibility of such an addition in its implementation of the LSHR.

As to the third suggestion, this would implement the HUD Guidelines Chapter 6, Ongoing Lead-Based Paint Maintenance, Step-by-Step Summary, item 1, that "owners should develop a written program [regarding] lead-safe maintenance that apply to each pre-1978 property and should assign responsibilities," and similarly at unit III.B, Assignment of Responsibilities, of that chapter. HUD will consider this suggestion in further rulemaking.

j. Technical Corrections

Comment: One commenter noted that the grammar of subpart D might be incorrect.

HUD Response: The commenter's insight was accurate, and a technical correction is necessary. The second sentence of proposed § 35.325, Child with an elevated blood lead level, paragraph (b), begins by stating that, "The risk assessments would be conducted within" a certain period, while the other requirements of the paragraph are specified by using "shall" instead of the conditional "would;" in addition, "shall" is used in the

corresponding provisions of other sections. HUD is replacing “would” in this instance with “shall.”

Comment: One commenter noted that § 35.155 implies that occupants would conduct lead-based paint hazard evaluation or reduction, a requirement which would not be supported by Title X.

HUD Response: HUD is also making a technical correction to § 35.155 by changing both instances of “designated party or occupant” to “designated party or owner,” to correct the language regarding who may be required to conduct additional lead-based paint hazard evaluation or reduction beyond the minimum under the LSHR. While occupants are mentioned in the LSHR many times, the LSHR does not establish any requirements for them to conduct lead-based paint hazard evaluations or reductions. (An assisted-property owner who resides in one of the units of a property covered by the LSHR is subject to that rule’s requirements as the owner, not as an occupant.) This correction is particularly timely because of the requirements being amended by this rule for owners who are not designated parties.

C. Public Comments in Response to HUD’s Questions

HUD is particularly grateful for the comments responding to specific questions:

1. *To facilitate effective HUD monitoring of responses to a case of an elevated blood lead level, the proposed rule would have designated parties provide documentation to HUD that the response actions have been conducted in the child’s unit and in all other assisted units with a child under age six (6), or if there are such other units, that the designated party has been complying with the LSHR for the past 12 months, and need not evaluate those other units.*

a. *Is this approach sufficient for HUD to effectively monitor response actions in these cases, and why? Are there areas in which reporting and oversight could be strengthened?*

b. *Can the approach to monitoring response actions in these cases be streamlined while maintaining its effectiveness, and if so, how?*

Comment: Many commenters provided input regarding the information that needed to be shared to effectively monitor the responses to a case of an elevated blood lead level.

HUD Response: Commenters took a wide variety of positions, which are primarily summarized under comments section III.B.4 of this preamble entitled,

Coordination Between the Involved Parties. The sub-issue of when a designated party need not evaluate other units was discussed in comments and responses in section III.B.6 of this preamble entitled, Landlord Exemptions.

2. *Regarding the definition of elevated blood lead level in the proposed rule, is the definition appropriately protective of the health of children in assisted housing covered by the rule? Too protective? Not protective enough? Why?*

Comment: Commenters were nearly unanimous in expressing their support for aligning HUD’s regulations with the current definition of elevated blood lead level from the CDC. Commenters did have concerns that the LSHR as proposed was not protective enough, as discussed in comments and responses provided in section III.B.1, Primary Prevention, and section III.B.5, Technical Concerns. No commenters felt that the rule was too protective of America’s children, however, some commenters worried that they would not have sufficient resources available to meet their obligations under the rule.

HUD Response: HUD responds to these concerns in section III.B.2, Resources Available.

3. *Regarding the set of types of housing assistance covered by the proposed rule (i.e., in the covered subparts D, H, I, L, and M), is this set appropriately protective of the health of children in assisted housing?*

a. *If it is too protective, why, and which types of housing assistance should be removed from the proposed rule?*

b. *If it is not protective enough, why, which additional type or types of housing assistance should be included, and how would sufficient resources be provided to ensure implementation and monitoring of the rule in that additional assisted housing?*

Comment: No commenters felt that certain types of housing assistance should be removed from the proposed rule, although several commenters recommended that Public Housing’s history of superior performance entitled it to a lower standard of monitoring. (As discussed in commenting subsection 1, Primary Prevention, the study did not have the capacity to address the performance of particular housing assistance programs.) A few commenters felt that additional HUD programs should be included in the rule.

HUD Response: HUD response to these comments are provided in section III.B.11.d of this preamble entitled, Other Sections of the LSHR Not Amended.

Comment: Two commenters also suggested the LSHR should be extended to the Low-Income Housing Credit program administered by the United States Treasury.

HUD Response: According to the Low Income Housing Credit regulations, 26 CFR 1.42–5(d), the state allocating agency may opt to use HUD’s Uniform Physical Condition Standards as the compliance standard, in which case the LSHR applies.

4. *If interim controls or abatement in a housing unit takes longer than 5 calendar days, or if other occupant protection requirements of 24 CFR 35.1345(a)(2) are not met, the occupants of the unit shall be temporarily relocated before and during lead-based paint hazard reduction activities.*

a. *HUD is seeking data on the fraction of lead hazard control activities that take longer than 5 calendar days, including the type of activity (e.g., interim control or abatement; the hazard control method used (e.g., if abatement, component removal, paint stripping, enclosure, encapsulation, etc.), the extent of the work, the reason that the activities cannot be completed within 5 calendar days, whether the housing is a single family, duplex, triplex, quad, or multifamily housing, whether it is located in an urban, suburban, or rural area, whether the EPA has authorized the state to administer the applicable lead certification program (i.e., renovation or abatement), and other factors that are causing temporary relocation to be required under the rule.*

b. *HUD is seeking information on the costs of temporary relocation, on a per day basis (average amount or day-specific amounts, as is available), including breakouts of expenses for such categories as lodging, transportation, meals, and incidental expense amounts, if the information is available that way, or as lump sum per day or per relocation period amounts.*

Comment: HUD did not receive any data (let alone data supported by robust quality assurance) on either the time work took, or the costs of relocation. A few anecdotal comments were provided, e.g., that it can be hard to find good lead professionals and contractors in rural portions of the country, and that the costs of temporary stays in Manhattan can be quite high.

HUD Response: In the absence of actionable data, HUD left the current standards unchanged. As HUD stated in responding to comments in subsection 2, Resources Available, of this preamble, HUD is encouraging designated parties and owners in remote rural areas to contact HUD if they encounter difficulty

in finding lead professionals and contractors, to see if the Department can help find them, and will keep these comments in mind as it implements this rule.

III. Findings and Certifications

A. Regulatory Review—Executive Orders 12866 and 13563

Under Executive Order 12866 (Regulatory Planning and Review), a determination must be made whether a regulatory action is significant and, therefore, subject to review by the Office of Management and Budget (OMB) in accordance with the requirements of the order. Executive Order 13563 (Improving Regulations and Regulatory Review) directs executive agencies to analyze regulations that are “outmoded, ineffective, insufficient, or excessively burdensome, and to modify, streamline, expand, or repeal them in accordance with what has been learned. Executive Order 13563 also directs that, where relevant, feasible, and consistent with regulatory objectives, and to the extent permitted by law, agencies are to identify and consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public. OMB reviewed this final rule under Executive Order 12866 (entitled “Regulatory Planning and Review”). This rule was determined to be a “significant regulatory action,” (but not economically significant) as defined in 3(f) of the order. The docket file is available for public inspection electronically at Federal eRulemaking Portal at <http://www.regulations.gov> under the title and docket number of this rule, HUD–2016–0096.

B. Regulatory Impact Assessment

HUD is publishing, concurrently with this final rule, its final Regulatory Impact Analysis (RIA) that examines the costs and benefits of the final regulatory action in conjunction with this final rule, organized into three sections: Cost-Benefit Analysis; Sensitivity Analysis; and Economic Impacts. The RIA is available on-line at: <http://www.regulations.gov>. The major findings in the RIA are presented in this summary.

The analysis of net benefits reflects costs and benefits associated with the first year of hazard evaluation and reduction activities under the final rule. These costs and benefits, however, include the present value of future costs and benefits associated with first year lead-based paint hazard reduction activities. Similarly, the benefits of first year activities include the present value of lifetime earnings benefits for children

living in the affected unit during that first year, and for children living in that unit during the second and subsequent years after lead-based paint hazard reduction activities.

In regard to the discount rate used for this regulatory analysis, HUD is using both the 3 percent, and the 7 percent discount rates in accordance with OMB guidance in OMB Circulars A–4, Regulatory Analysis (https://www.whitehouse.gov/omb/circulars_a004_a-4/), and A–94, Guidelines and Discount Rates for Benefit-Cost Analysis of Federal Programs (https://www.whitehouse.gov/omb/circulars_a094). By presenting results using both 3 and 7 percent discount rates, HUD is providing a broad view of costs and benefits.

Employing a 3 percent discount rate of the lifetime earnings estimates, the RIA concludes that monetized benefits of activities have a present value of \$98.96 million; while first-year costs are \$29.04 million. Thus the estimated net benefit is \$69.92 million using a 3 percent discount rate. If a 7 percent discount rate is used for lifetime earnings benefits, the monetized present value of the benefits of the final rule are estimated to be \$32.15 million, with estimated first year costs remaining at \$29.04 million. The final rule would therefore be seen as having a net benefit of \$3.11 million using the 7 percent discount rate.

Further, the monetized benefit estimates represent a lower bound on benefits, as they only account for lifetime earnings resulting from cognitive impacts on children under age six. Reductions in lead exposure would be expected to result in additional health benefits for these children, as well as older children and adults living in or visiting the housing units addressed by the rule. Such additional benefits include avoidance of harmful symptoms of lead poisoning such as: Decreased attention, increased impulsivity, hyperactivity, impaired hearing, slowed growth, and delayed menarche.²⁴

Costs are overestimated, such as by assuming that only one environmental investigation is conducted in a property

²⁴ See, e.g., CDC, *Educational Interventions for Children Affected by Lead* (Apr. 2015), available at https://www.cdc.gov/nceh/lead/publications/educational_interventions_children_affected_by_lead.pdf; Selevan SG, Rice DC, Hogan KA, Euling SY, Pfahles-Hutchens A, Bethel J, *Blood lead concentration and delayed puberty in girls*, *N Engl J Med*. 17;348(16):1527–36, (Apr. 17, 2003), available at www.nejm.org/doi/full/10.1056/NEJMoa020880; Mayo Clinic, *Lead Poisoning: Symptoms and Causes*, <http://www.mayoclinic.org/diseases-conditions/lead-poisoning/symptoms-causes/dxc-20275054>.

at a time, that that each housing unit has at most one child with an EBLL. The analysis also assumes that no designated parties are eligible for (nor take, if they are eligible) the exemptions from conducting a risk assessment of other housing units covered by this rule, and that each index unit has lead-based paint hazards, whether or not the environmental investigation identifies non-lead-based paint lead hazards. These assumptions would tend to overestimate both the costs and benefits of the regulation.

That the benefit-cost calculation giving lower weight to future generations shows a smaller net benefit is not surprising, given that the monetized benefits of the rule pertain to the future earnings of children under age six (6), while the costs pertain to the designated parties of the housing in which the young children currently reside. As noted above, the calculation included monetized benefits but not non-monetized quality of life factors associated with children’s lower intelligence, fewer skills, and reduced education and job potential, and adults’ cognitive function decrements, psychopathological effects (self-reported symptoms of depression and anxiety), hypertension, coronary heart disease, blood system effects (decreased red blood cell survival and function, and altered heme synthesis), male reproductive function decrements, among other effects.²⁵

C. Paperwork Reduction Act Statement

The information collection requirements contained in this rule have been approved by or are pending with the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) and assigned OMB control number 2539–0009. In accordance with the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless the collection displays a currently valid OMB control number.

D. Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), HUD has reviewed this final rule before publication and by approving it for publication, certifies that the regulatory

²⁵ See, e.g., CDC, *Educational Interventions for Children Affected by Lead* (Apr. 2015), available at https://www.cdc.gov/nceh/lead/publications/educational_interventions_children_affected_by_lead.pdf; Mayo Clinic, *Lead Poisoning: Symptoms and Causes*, <http://www.mayoclinic.org/diseases-conditions/lead-poisoning/symptoms-causes/dxc-20275054>.

requirements would not have a significant economic impact on a substantial number of small entities, other than those impacts specifically required to be applied universally by the statute. As discussed below, the requirements of the final rule are applicable only to a limited and specifically defined portion of the nation's housing stock. To the extent that the requirements affect small entities, the impact is generally discussed in the economic analysis that accompanies this final rule. Specifically, the economic analysis estimated the number of small entities and voucher owners that would be impacted by the rule, as well as the number of index units and other assisted units to be evaluated and, possibly, based on the evaluation, having lead hazard control work done. HUD has estimated that this final rule affects two types of small entities, Public Housing Agencies (PHAs) and private lessors and owners. There are 2,334 small PHAs, defined as PHAs with fewer than 250 units, which make up for 75 percent of the public housing

stock across the country. HUD has estimated that there are approximately 42,618 private landlords/lessors of residential real estate, or approximately 99 percent of the 42,911 lessors of residential real estate counted in the 2012 Economic Census, where SBA defines a "small" business as one that earns annual revenues (sales receipts) of less than \$27.5 million. Finally, HUD has estimated the number of owners who participate in the housing choice voucher program. It is noted that based on HUD data, the overwhelming proportion of owners rent to very few voucher tenants. Approximately two-thirds of owners who rent to voucher tenants rent to only one voucher tenant household. Many of these are likely owners of single-family homes for whom the rental income is not the primary source of income. Approximately 90 percent rent to no more than 4 voucher tenant households, which could be housed in a large two-story building. Very few owners rent to enough voucher tenants to occupy multiple buildings. Fewer than 0.6 percent of voucher tenant owners will

be affected by this rule (out of the 647,956 owners with voucher tenant households, at most, an estimated 3,383 such owners, assuming that each EBLL case occurs in a housing unit owned by an owner none of whose other properties with voucher tenant households have children with an EBLL. HUD has determined, for each type of assistance and for all types of assistance together, the economic analysis also estimated:

- The cost per unit of the evaluation (environmental investigation for index units, and risk assessments for other units that are assisted and have a child under age six (6) residing, as per the current LSHR);
- The total cost of the evaluation and hazard control (for index units, other units, and both); and
- The percentage of units evaluated and possibly, based on the evaluation results, hazard controlled (again, for index units, other units, and both).

The annual estimates are summarized in the table below.

TABLE 1—REGULATORY FLEXIBILITY ANALYSIS

Unit cost activity	Public housing	HUD project-based assistance	Tenant-based assistance	USDA project-based assistance	Total
Unit cost of evaluation, and weighted hazard control and temporary relocation for index units	\$2,890.33	\$2,890.33	\$2,890.33	\$2,890.33
Est. no. buildings/complexes with child having EBLL	1,899	1,494	3,383	112	6,887
Presume LBP hazard prevalence in index units	100%	100%	100%	100%
Cost of evaluation, hazard control and temporary relocation in index units	\$5,488,724	\$4,318,158	\$9,776,541	\$323,720	\$19,907,143
Unit cost of evaluation, and weighted hazard control and temporary relocation for other units	\$611.37	\$611.37	\$611.37	\$611.37
Est. no. other units with assisted rental units having child under age 6	8,014	3,783	2,855	284	14,936
Total number of units evaluated	9,913	5,277	6,238	396	21,823
Estimated LBP hazard prevalence in other units, per the American Healthy Homes Survey	12.30%	12.30%	12.30%	12.30%
Estimated no. other units with LBP hazards identified and controlled	986	465	351	35	1,837
Cost for other assisted rental units having child under age 6	\$4,899,521	\$2,312,806	\$1,745,456	\$173,629	\$9,131,412
Total cost	\$10,388,245	\$6,630,964	\$11,521,998	\$497,349	\$29,038,556
Total number of units evaluated and having hazards controlled	2,885	1,959	3,734	147	8,725
Program assistance per unit	\$5,849.09	\$9,013.33	\$9,329.09	\$4,911.00
Total number of assisted units	1,100,000	1,200,000	2,200,000	286,108	\$4,786,108
Percent of assisted units evaluated	0.90%	0.44%	0.28%	0.14%	0.46%
Percent of assisted units evaluated and having hazards controlled	0.26%	0.16%	0.17%	0.05%	0.18%
# assisted units that would be forgone if funding were from funding agency with no appropriation increase	1,776	736	1,235	101	3,848
% assisted units that would be forgone if funding were from funding agency with no appropriation increase	0.161%	0.061%	0.056%	0.035%	0.080%

Among the key results are that, in each year:

- About 6,887 housing units are estimated to have a child under age six

(6) with a blood lead level that is elevated but not an environmental intervention blood lead level; these units would be required to have an

environmental investigation and have any lead-based paint hazards controlled. An additional 152 housing units would have a child under age six (6) with a

blood lead level that is an environmental intervention blood lead level; these units would be required to have an environmental investigation, rather than a risk assessment, as under the current rule, and have any lead-based paint hazards controlled.

- About 14,936 other housing units would have a risk assessment, of which about 1,837 are estimated to have lead-based paint hazards, and to have these hazards controlled by certified firms and workers using lead-safe work practices and clearance (*i.e.*, conservatively, all of the lead-based paint hazards are assumed to be significant, that is, above the de minimis levels of § 35.1350(d)).

- About 0.46 percent of the assisted housing stock covered by this rulemaking would be evaluated (*i.e.*, have an environmental investigation or a risk assessment), specifically, 0.90 percent of the public housing stock, 0.44 percent of the HUD project-based rental assisted housing stock, 0.28 percent of the tenant-based rental assisted housing stock, and 0.14 percent of the U.S. Department of Agriculture (USDA) project-based rental assisted housing stock.

- About 0.18 percent of the assisted housing stock covered by this rulemaking would have lead-based paint hazards controlled, specifically, 0.26 percent of the public housing stock, 0.16 percent of the HUD project-based rental assisted housing stock, 0.17 percent of the tenant-based rental assisted housing stock, and 0.05 percent of the USDA project-based rental assisted housing stock.

- The total cost of evaluation and control (and the small amount of temporary relocation of occupants) would be \$29.04 million, including \$10.39 million for public housing, \$6.63 million for HUD project-based rental assisted housing, \$11.52 million for tenant-based rental assisted housing, and \$497 thousand for USDA project-based rental assisted housing.

- Using the 3 percent discount rate, benefits are estimated at \$98.96 million, with net benefits (*i.e.*, benefits less the \$29.04 million in costs) estimated at \$69.92 million. Using the OMB's 7 percent discount rate, benefits are estimated at \$32.15 million, with costs remaining at \$29.04 million, so the net benefits would be \$3.11 million.

- Regarding index units, for FY 2017, an estimated 1,899 units of public housing, 1,494 units of HUD project-based rental assisted housing, 3,383 units of tenant-based rental assisted housing, and 112 units of USDA project-based rental assisted housing have children under age 6 with EBLs that

are not EIBLLs, that is, children for whom an environmental investigation and possible (*i.e.*, if hazards are found) interim control of their housing unit and common area servicing it would be newly required under the final rule.

- Regarding other units in the same property to have risk assessments conducted because they have children under age six (6) residing, there would be an estimated 8,014 units of public housing, 3,783 units of HUD project-based rental assisted housing, 2,855 units of tenant-based rental assisted housing, and 284 units of USDA project-based rental assisted housing.

- Regarding these other units having interim controls conducted based on the risk assessments finding lead-based paint hazards, there would be an estimated 986 units of public housing, 465 units of HUD project-based rental assisted housing, 351 units of tenant-based rental assisted housing, and 35 units of USDA project-based rental assisted housing that would have such controls.

- The conservative (*i.e.*, intentionally high, in this instance) assumption about the properties in which these children reside is that each of them is a different property (vs. there being more than one such child in a property); a similarly conservative assumption about the private entities (*i.e.*, the ones that lease units receiving project-based rental assistance to the families of these children, or that lease units occupied by households receiving tenant-based rental assistance to their families) is that all of them are small entities and all have just one such child (vs. an entity having more than one property with such a child), and that all index units in such properties have lead-based paint hazards. The economic analysis used the FY 2017 Congressional Justifications of the estimated number of housing units assisted by the several programs, recognizing that the actual numbers assisted vary over time: 1,100,000 public housing units, 1,200,000 HUD project-based rental assistance units, 2,200,000 tenant-based rental assistance units, and 286,108 USDA project-based rental assistance units.

E. Environmental Impact

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implements section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(C)). The Finding of No Significant Impact is available for public inspection electronically at Federal eRulemaking Portal at <http://www.regulations.gov>

under the title and docket number of this rule.

F. Executive Order 13132, Federalism

Executive Order 13132 (entitled "Federalism") prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial direct compliance costs on State and local governments or is not required by statute, or the rule preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. This rule will not have federalism implications and would not impose substantial direct compliance costs on State and local governments or preempt State law within the meaning of the Executive Order.

G. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) (UMRA) establishes requirements for federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments, and on the private sector. This rule does not impose any federal mandates on any State, local, or tribal governments, or on the private sector, within the meaning of UMRA.

List of Subjects in 24 CFR Part 35

Grant programs—housing and community development, Lead poisoning, Mortgage insurance, Rent subsidies, Reporting and recordkeeping requirements.

Accordingly, for the reasons stated in the preamble, HUD amends 24 CFR part 35 to read as follows:

PART 35—LEAD-BASED PAINT POISONING PREVENTION IN CERTAIN RESIDENTIAL STRUCTURES

■ 1. The authority citation for 24 CFR part 35 continues to read as follows:

Authority: 42 U.S.C. 3535(d), 4821, and 4851.

§ 35.105 [Removed and Reserved]

■ 2. Remove and reserve § 35.105.

■ 3. In § 35.110, add, in alphabetical order the definitions of "Elevated blood lead level" and "Environmental investigation", revise the definitions of "Certified", "Evaluation" and "Expected to reside" and remove the definition of "Environmental intervention blood lead level", to read as follows:

§ 35.110 Definitions.

* * * * *

Certified means certified to perform such activities as risk assessment, lead-

based paint inspection, abatement supervision, or renovation, either by a State or Indian tribe with a lead-based paint certification program authorized by the Environmental Protection Agency (EPA), in accordance with 40 CFR part 745, subpart Q, or by the EPA, in accordance with 40 CFR part 745, subparts E or L.

* * * * *

Elevated blood lead level means a confirmed concentration of lead in whole blood of a child under age 6 equal to or greater than the concentration in the most recent guidance published by the U.S. Department of Health and Human Services (HHS) on recommending that an environmental intervention be conducted. (When HHS changes the value, HUD will publish a notice in the **Federal Register**, with the opportunity for public comment, on its intent to apply the changed value to this part, and, after considering comments, publish a notice on its applying the changed value to this part.)

* * * * *

Environmental investigation means the process of determining the source of lead exposure for a child under age 6 with an elevated blood lead level, consisting of administration of a questionnaire, comprehensive environmental sampling, case management, and other measures, in accordance with chapter 16 of the HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing ("Guidelines").

Evaluation means a risk assessment, a lead hazard screen, a lead-based paint inspection, paint testing, or a combination of these to determine the presence of lead-based paint hazards or lead-based paint, or an environmental investigation.

Expected to reside means there is actual knowledge that a child will reside in a dwelling unit reserved or designated exclusively for the elderly or reserved or designated exclusively for persons with disabilities. If a resident woman is known to be pregnant, there is actual knowledge that a child will reside in the dwelling unit.

* * * * *

■ 4. Amend § 35.125 by adding paragraph (c)(4)(iii) to read as follows:

§ 35.125 Notice of evaluation and hazard reduction activities.

* * * * *

(c) * * *

(4) * * *

(iii) However, for the protection of the privacy of the child and the child's family or guardians, no notice of

environmental investigation shall be posted to any centrally located common area.

§ 35.155 [Amended]

■ 5. Amend § 35.155(a) by removing the phrase "designated party or occupant" wherever it appears and adding in its place the phrase "designated party or owner".

§ 35.165 [Amended]

■ 6. Amend § 35.165(b)(4) by removing the term "environmental intervention blood lead level" wherever it appears and adding in its place the term "elevated blood lead level".

■ 7. Revise § 35.325 to read as follows:

§ 35.325 Child with an elevated blood lead level.

(a) If a child less than 6 years of age living in a federally assisted dwelling unit has an elevated blood lead level, the owner shall immediately conduct an environmental investigation. Interim controls of identified lead-based paint hazards shall be conducted in accordance with § 35.1330.

(b) *Other assisted dwelling units in the property.* (1) If the environmental investigation conducted under paragraph (a) of this section identifies lead-based paint hazards, the owner shall conduct a risk assessment for other assisted dwelling units covered by this subpart in which a child under age 6 resides or is expected to reside on the date interim controls are complete, and for the common areas servicing those units. The risk assessments shall be conducted within 30 calendar days after receipt of the environmental investigation report on the index unit if there are 20 or fewer such units, or 60 calendar days for risk assessments if there are more than 20 such units. If the risk assessment identifies lead-based paint hazards, the owner shall control identified hazards in accordance with § 35.1325 or § 35.1330 in those units and common areas within 30 calendar days, or within 90 calendar days if more than 20 units have lead-based paint hazards such that the control work would disturb painted surfaces that total more than the de minimis threshold of § 35.1350(d).

(2) The requirements for other assisted dwelling units covered by paragraph (b)(1) of this section do not apply if:

(i) The owner both conducted a risk assessment of the other assisted dwelling units covered by paragraph (b)(1), and the common areas servicing those units, and conducted reduction of identified lead-based paint hazards in accordance with § 35.1325 or § 35.1330

between the date the child's blood was last sampled and the date the owner received the notification of the elevated blood lead level; or

(ii) The owner provides the Federal agency documentation of compliance with evaluation, notification, lead disclosure, ongoing lead-based paint maintenance, and lead-based paint management requirements under this part throughout the 12 months preceding the date the owner received the environmental investigation report.

(c) Interim controls are complete when clearance is achieved in accordance with § 35.1340.

(d) The Federal agency shall establish a timetable for completing, and providing documentation to the agency on the environmental investigation, risk assessments, and lead-based paint hazard reduction when a child is identified as having an elevated blood lead level.

§ 35.715 [Amended]

■ 8. Amend § 35.715 by:

■ a. Redesignating paragraph (d)(4) as paragraph (e); and

■ b. In newly redesignated paragraph (e), remove the term "environmental intervention blood lead level" wherever it appears and adding in its place "elevated blood lead level".

§ 35.720 [Amended]

■ 9. Amend § 35.720(c) by removing the term "environmental intervention blood lead level" wherever it appears and adding in its place "elevated blood lead level".

■ 10. Revise § 35.730 to read as follows:

§ 35.730 Child with an elevated blood lead level.

(a) *Environmental investigation.* Within 15 calendar days after being notified by a public health department or other medical health care provider that a child of less than 6 years of age living in a dwelling unit to which this subpart applies has been identified as having an elevated blood lead level, the owner shall complete an environmental investigation of the dwelling unit in which the child lived at the time the blood was last sampled and of common areas servicing the dwelling unit. The requirements of this paragraph apply regardless of whether the child is or is not still living in the unit when the owner receives the notification of the elevated blood lead level. The requirements of this paragraph shall not apply if the owner conducted an environmental investigation of the unit and common areas servicing the unit between the date the child's blood was last sampled and the date when the

owner received the notification of the elevated blood lead level. If the owner conducted a risk assessment of the unit and common areas servicing the unit during that period, the owner need not conduct another risk assessment there but shall conduct the elements of an environmental investigation not already conducted during the risk assessment. If a public health department has already conducted an evaluation of the dwelling unit in regard to the child's elevated blood lead level case, the requirements of this paragraph shall not apply.

(b) *Verification.* After receiving information from a person who is not a medical health care provider that a child of less than 6 years of age living in a dwelling unit covered by this subpart may have an elevated blood lead level, the owner shall immediately verify the information with the public health department or other medical health care provider. If the public health department or provider denies the request, such as because it does not have the capacity to verify that information, the owner shall send documentation of the denial to the HUD rental assistance program manager, who shall make an effort to verify the information. If the public health department or provider verifies that the child has an elevated blood lead level, such verification shall constitute notification, and the owner shall take the action required in paragraphs (a) and (c) of this section.

(c) *Lead-based paint hazard reduction.* Within 30 calendar days after receiving the report of the environmental investigation conducted pursuant to paragraph (a) of this section or the evaluation from the public health department, the owner shall complete the reduction of identified lead-based paint hazards in accordance with § 35.1325 or § 35.1330. Lead-based paint hazard reduction is considered complete when clearance is achieved in accordance with § 35.1340 and the clearance report states that all lead-based paint hazards identified in the environmental investigation have been treated with interim controls or abatement or the public health department certifies that the lead-based paint hazard reduction is complete. The requirements of this paragraph do not apply if the owner, between the date the child's blood was last sampled and the date the owner received the notification of the elevated blood lead level, already conducted an environmental investigation of the unit and common areas servicing the unit and completed reduction of identified lead-based paint hazards. If the owner conducted a risk assessment of the unit and common

areas servicing the unit during that period, the owner is not required to conduct another risk assessment there but shall conduct the elements of an environmental investigation not already conducted during the risk assessment.

(d) If an environmental investigation or lead-based paint hazard evaluation or reduction is undertaken, each owner shall provide notice to occupants in accordance with § 35.125.

(e) *Reporting requirement.* (1) The owner shall report the name and address of a child identified as having an elevated blood lead level to the public health department within 5 business days of being so notified by any other medical health care professional.

(2) The owner shall also report each confirmed case of a child with an elevated blood lead level to the HUD field office and HUD Office of Lead Hazard Control and Healthy Homes within 5 business days of being so notified.

(3) The owner shall provide to the HUD field office documentation that the designated party has conducted the activities of paragraphs (a) through (d) of this section, within 10 business days of the deadline for each activity.

(f) *Other assisted dwelling units in the property.* (1) If the environmental investigation conducted pursuant to paragraph (a) of this section identifies lead-based paint hazards, the owner shall, for other assisted dwelling units covered by this part in which a child under age 6 resides or is expected to reside on the date lead-based paint hazard reduction under paragraph (c) of this section is complete, and for the common areas servicing those units, conduct a risk assessment within 30 calendar days after receipt of the environmental investigation report if there are 20 or fewer such other units, or 60 calendar days if there are more than 20 such other units.

(2) *Control measures.* If the risk assessment conducted under paragraph (f)(1) of this section identifies lead-based paint hazards, the owner shall complete the reduction of identified lead-based paint hazards in accordance with § 35.1325 or § 35.1330 in those units and common areas within 30 calendar days, or within 90 calendar days if more than 20 units have lead-based paint hazards such that the control work would disturb painted surfaces that total more than the de minimis threshold of § 35.1350(d). Lead-based paint hazard reduction is considered complete when clearance is achieved in accordance with § 35.1340 and the clearance report states that all lead-based paint hazards identified in

the risk assessment have been treated with interim controls or abatement.

(3) The owner shall provide to the HUD field office documentation that the designated party has conducted the activities of paragraph (f)(1) and (f)(2) of this section, within 10 business days of the deadline for each activity.

(4) The requirements of this paragraph (f) do not apply if:

(i) The owner both conducted a risk assessment of the other assisted dwelling units covered by paragraph (f)(1) of this section and the common areas servicing those units, and conducted reduction of identified lead-based paint hazards in accordance with § 35.1325 or § 35.1330 between the date the child's blood was last sampled and the date the owner received the notification of the elevated blood lead level; or

(ii) The owner has documentation of compliance with evaluation, notification, lead disclosure, ongoing lead-based paint maintenance, and lead-based paint management requirements under this part throughout the 12 months preceding the date the owner received the environmental investigation report pursuant to paragraph (a) of this section; and

(iii) In either case, the owner provides to the HUD field office documentation that it has conducted the activities of paragraphs (f)(4)(i) and (ii) of this section, within 10 business days of the deadline for each activity.

■ 11. Revise § 35.830 to read as follows:

§ 35.830 Child with an elevated blood lead level.

(a) *Environmental investigation.* Within 15 calendar days after being notified by a public health department or other medical health care provider that a child of less than 6 years of age living in a dwelling unit owned by HUD (or where HUD is mortgagee-in-possession) has been identified as having an elevated blood lead level, HUD shall complete an environmental investigation of the dwelling unit in which the child lived at the time the blood was last sampled and of common areas servicing the dwelling unit. The requirements of this paragraph apply regardless of whether the child is or is not still living in the unit when HUD receives the notification of the elevated blood lead level. The requirements of this paragraph shall not apply if HUD conducted an environmental investigation of the unit and common areas servicing the unit between the date the child's blood was last sampled and the date when HUD received the notification of the elevated blood lead level. If HUD conducted a risk

assessment of the unit and common areas servicing the unit during that period, HUD is not required to conduct another risk assessment there but it shall conduct the elements of an environmental investigation not already conducted during the risk assessment. If a public health department has already conducted an evaluation of the dwelling unit in regard to the child's elevated blood lead level case, the requirements of this paragraph shall not apply.

(b) *Verification.* After receiving information from a person who is not a medical health care provider that a child of less than 6 years of age living in a dwelling unit covered by this subpart may have an elevated blood lead level, HUD shall immediately verify the information with the public health department or other medical health care provider. If the public health department or provider denies the request, such as because it does not have the capacity to verify that information, the HUD Realty Specialist assigned to that property shall send documentation of the denial to the HUD Office of Lead Hazard Control and Healthy Homes, which shall make an effort to verify the information. If the public health department or provider verifies that the child has an elevated blood lead level, such verification shall constitute notification, and HUD shall take the action required in paragraphs (a) and (c) of this section.

(c) *Lead-based paint hazard reduction.* Within 30 calendar days after receiving the report of the environmental investigation conducted pursuant to paragraph (a) of this section or the evaluation from the public health department, HUD shall complete the reduction of identified lead-based paint hazards in accordance with § 35.1325 or § 35.1330. Lead-based paint hazard reduction is considered complete when clearance is achieved in accordance with § 35.1340 and the clearance report states that all lead-based paint hazards identified in the environmental investigation have been treated with interim controls or abatement or the public health department certifies that the lead-based paint hazard reduction is complete. The requirements of this paragraph do not apply if HUD, between the date the child's blood was last sampled and the date HUD received the notification of the elevated blood lead level, already conducted an environmental investigation of the unit and common areas servicing the unit and completed reduction of identified lead-based paint hazards. If HUD conducted a risk assessment of the unit and common areas servicing the unit during that period, it is not required to

conduct another risk assessment there but it shall conduct the elements of an environmental investigation not already conducted during the risk assessment.

(d) *Notice.* If lead-based paint hazard evaluation or reduction is undertaken, each owner shall provide a notice to occupants in accordance with § 35.125.

(e) *Reporting requirement.* (1) HUD shall report the name and address of a child identified as having an elevated blood lead level to the public health department within 5 business days of being so notified by any other medical health care professional.

(2) HUD shall also report each confirmed case of a child with an elevated blood lead level to the HUD Office of Lead Hazard Control and Healthy Homes within 5 business days of being so notified.

(3) HUD shall provide to the HUD Office of Lead Hazard Control and Healthy Homes documentation that it has conducted the activities of paragraphs (a) through (d) of this section, within 10 business days of the deadline for each activity.

(f) *Other assisted dwelling units in the property.* (1) If the environmental investigation conducted pursuant to paragraph (a) of this section identifies lead-based paint hazards, HUD shall, for other assisted dwelling units covered by this part in which a child under age 6 resides or is expected to reside on the date lead-based paint hazard reduction under paragraph (c) of this section, and the common areas servicing those units, is complete, conduct a risk assessment in accordance with § 35.815 within 30 calendar days after receipt of the environmental investigation report if there are 20 or fewer such other units, or 60 calendar days if there are more than 20 such other units.

(2) If the risk assessment conducted under paragraph (f)(1) of this section identifies lead-based paint hazards, HUD shall complete the reduction of identified lead-based paint hazards in accordance with § 35.1325 or § 35.1330 in those units and common areas within 30 calendar days, or within 90 calendar days if more than 20 units have lead-based paint hazards such that the control work would disturb painted surfaces that total more than the de minimis threshold of § 35.1350(d). Lead-based paint hazard reduction is considered complete when clearance is achieved in accordance with § 35.1340 and the clearance report states that all lead-based paint hazards identified in the risk assessment have been treated with interim controls or abatement.

(3) The requirements of this paragraph (f) do not apply if:

(i) HUD, between the date the child's blood was last sampled and the date HUD received the notification of the elevated blood lead level, both conducted a risk assessment in the other assisted dwelling units covered by paragraph (f)(1) of this section and the common areas servicing those units, and conducted interim controls of identified lead-based paint hazards in accordance with § 35.820; or

(ii) HUD has documentation of compliance with evaluation, notification, lead disclosure, ongoing lead-based paint maintenance, and lead-based paint management requirements under this part throughout the 12 months preceding the date HUD received the environmental investigation report pursuant to paragraph (a) of this section.

(4) HUD shall provide to the HUD Office of Lead Hazard Control and Healthy Homes documentation that it has conducted the activities of paragraph (f)(1) through (2) of this section, or that it has complied with the requirements in paragraph (f)(3) of this section, within 10 business days of the deadline for each activity.

(g) *Closing.* If the closing of a sale is scheduled during the period when HUD is responding to a case of a child with an elevated blood lead level, HUD may arrange for the completion of the procedures required by paragraphs (a) through (d) of this section by the purchaser within a reasonable period of time.

(h) *Extensions.* The Assistant Secretary for Housing-Federal Housing Commissioner or designee may consider and approve a request for an extension of deadlines established by this section for lead-based paint inspection, risk assessment, environmental investigation, lead-based paint hazard reduction, clearance, and reporting. Such a request may be considered, however, only during the first six months during which HUD is owner or mortgagee-in-possession of a multifamily property.

■ 12. Revise § 35.1130 to read as follows:

§ 35.1130 Child with an elevated blood lead level.

(a) *Environmental investigation.* Within 15 calendar days after being notified by a public health department or other medical health care provider that a child of less than 6 years of age living in a dwelling unit to which this subpart applies has been identified as having an elevated blood lead level, the PHA shall complete an environmental investigation of the dwelling unit in which the child lived at the time the

blood was last sampled and of common areas servicing the dwelling unit. The environmental investigation is considered complete when the PHA receives the environmental investigation report. The requirements of this paragraph apply regardless of whether the child is or is not still living in the unit when the PHA receives the notification of the elevated blood lead level. The requirements of this paragraph shall not apply if the PHA conducted an environmental investigation of the unit and common areas servicing the unit between the date the child's blood was last sampled and the date when the PHA received the notification of the elevated blood lead level. If the PHA conducted a risk assessment of the unit and common areas servicing the unit during that period, the PHA need not conduct another risk assessment there but shall conduct the elements of an environmental investigation not already conducted during the risk assessment. If a public health department has already conducted an evaluation of the dwelling unit in regard to the child's elevated blood lead level case, the requirements of this paragraph shall not apply.

(b) *Verification.* After receiving information from a person who is not a medical health care provider that a child of less than 6 years of age living in a dwelling unit covered by this subpart may have an elevated blood lead level, the PHA shall immediately verify the information with the public health department or other medical health care provider. If that department or provider denies the request, such as because it does not have the capacity to verify that information, the PHA shall send documentation of the denial to its HUD field office, who shall make an effort to verify the information. If that department or provider verifies that the child has an elevated blood lead level, such verification shall constitute notification, and the housing agency shall take the action required in paragraphs (a) and (c) of this section.

(c) *Lead-based paint hazard reduction.* Within 30 calendar days after receiving the report of the environmental investigation conducted pursuant to paragraph (a) of this section or the evaluation from the public health department, the PHA shall complete the reduction of identified lead-based paint hazards in accordance with § 35.1325 or § 35.1330. Lead-based paint hazard reduction is considered complete when clearance is achieved in accordance with § 35.1340 and the clearance report states that all lead-based paint hazards identified in the environmental investigation have been treated with

interim controls or abatement or the local or State health department certifies that the lead-based paint hazard reduction is complete. The requirements of this paragraph do not apply if the PHA, between the date the child's blood was last sampled and the date the PHA received the notification of the elevated blood lead level, already conducted an environmental investigation of the unit and common areas servicing the unit and completed reduction of identified lead-based paint hazards. If the PHA conducted a risk assessment of the unit and common areas servicing the unit during that period, it is not required to conduct another risk assessment there but it shall conduct the elements of an environmental investigation not already conducted during the risk assessment. If the PHA does not complete the lead-based paint hazard reduction required by this section, the dwelling unit is in violation of the standards of 24 CFR 965.601, which incorporates the uniform physical condition standards of § 5.703(f), including that it be free of lead-based paint hazards.

(d) *Notice of lead-based paint hazard evaluation and reduction.* The PHA shall notify building residents of any lead-based paint hazard evaluation or reduction activities in accordance with § 35.125.

(e) *Reporting requirement.* (1) The PHA shall report the name and address of a child identified as having an elevated blood lead level to the public health department within 5 business days of being so notified by any other medical health care professional.

(2) The PHA shall report each confirmed case of a child with an elevated blood lead level to the HUD field office and the HUD Office of Lead Hazard Control and Healthy Homes within 5 business days of being so notified.

(3) The PHA shall provide to the HUD field office documentation that it has conducted the activities of paragraphs (a) through (d) of this section, within 10 business days of the deadline for each activity.

(f) *Other units in the property.* (1) If the environmental investigation conducted pursuant to paragraph (a) of this section identifies lead-based paint hazards, the PHA shall conduct a risk assessment of other units of the building in which a child under age 6 resides or is expected to reside on the date lead-based paint hazard reduction under paragraph (c) of this section is complete, and the common areas servicing those units within 30 calendar days after receipt of the environmental investigation report if there are 20 or

fewer such other units, or 60 calendar days if there are more such units.

(2) If the risk assessment conducted under paragraph (f)(1) of this section identifies lead-based paint hazards, the PHA shall control the hazards, in accordance with Sec. 35.1325 or § 35.1330, in those units and common areas within 30 calendar days, or within 90 calendar days if more than 20 units have lead-based paint hazards such that the control work would disturb painted surfaces that total more than the de minimis threshold of § 35.1350(d). Lead-based paint hazard reduction is considered complete when clearance is achieved in accordance with § 35.1340 and the clearance report states that all lead-based paint hazards identified in the risk assessment have been treated with interim controls or abatement.

(3) The PHA shall provide to the HUD field office documentation that it has conducted the activities of paragraphs (f)(1) and (2) of this section, within 10 business days of the deadline for each activity.

(4) The requirements of this paragraph (f) of this section do not apply if:

(i) The PHA, between the date the child's blood was last sampled and the date the PHA received the notification of the elevated blood lead level, both conducted a risk assessment of the other assisted dwelling units covered by paragraph (f)(1) of this section and the common areas servicing those units, and conducted interim controls of identified hazards in accordance with § 35.1120(b); or

(ii) If the PHA has documentation of compliance with evaluation, notification, lead disclosure, ongoing lead-based paint maintenance, and lead-based paint management requirements under this part throughout the 12 months preceding the date the PHA received the environmental investigation report pursuant to paragraph (a) of this section; and,

(iii) In either case, the PHA provided the HUD field office, within 10 business days after receiving the notification of the elevated blood lead level, documentation that it has conducted the activities described in this paragraph (f)(4) of this section.

§ 35.1135 [Amended]

■ 13. Amend § 35.1135(d) by removing the term "*Environmental intervention blood lead level*" and adding in its place the term "*Elevated blood lead level*".

■ 14. In § 35.1215, amend paragraph (b) by adding a sentence to the end of the paragraph to read as follows:

§ 35.1215 Activities at initial and periodic inspection.

* * * * *

(b) * * * For the unit subsequently to come under a HAP contract with the housing agency for occupancy by a family with a child under age 6, paint stabilization must be completed, including clearance being achieved in accordance with § 35.1340.

* * * * *

■ 15. Revise § 35.1225 to read as follows:

§ 35.1225 Child with an elevated blood lead level.

(a) Within 15 calendar days after being notified by a public health department or other medical health care provider that a child of less than 6 years of age living in a dwelling unit to which this subpart applies has been identified as having an elevated blood lead level, the designated party shall complete an environmental investigation of the dwelling unit in which the child lived at the time the blood was last sampled and of common areas servicing the dwelling unit. When the environmental investigation is complete, the designated party shall immediately provide the report of the environmental investigation to the owner of the dwelling unit. If the child identified as having an elevated blood lead level is no longer living in the unit when the designated party receives notification from the public health department or other medical health care provider, but another household receiving tenant-based rental assistance is living in the unit or is planning to live there, the requirements of this section apply just as they do if the child still lives in the unit. If a public health department has already conducted an evaluation of the dwelling unit in regard to the child's elevated blood lead level case, or the designated party conducted an environmental investigation of the unit and common areas servicing the unit between the date the child's blood was last sampled and the date when the designated party received the notification of the elevated blood lead level, the requirements of this paragraph shall not apply. If the designated party or the owner conducted a risk assessment of the unit and common areas servicing the unit during that period, the designated party need not conduct another risk assessment there but shall conduct the elements of an environmental investigation not already conducted during the risk assessment.

(b) *Verification.* After receiving information from a person who is not a medical health care provider that a child of less than 6 years of age living

in a dwelling unit covered by this subpart may have an elevated blood lead level, the designated party shall immediately verify the information with the public health department or other medical health care provider. If the public health department or provider denies the request, such as because it does not have the capacity to verify that information, the designated party shall send documentation of the denial to the HUD rental assistance program manager, who shall make an effort to verify the information. If that department or provider verifies that the child has an elevated blood lead level, such verification shall constitute notification, and the designated party shall take the action required in paragraphs (a) and (c) of this section.

(c) *Lead-based paint hazard reduction.* Within 30 calendar days after receiving the report of the environmental investigation from the designated party or the evaluation from the public health department, the owner shall complete the reduction of identified lead-based paint hazards in accordance with § 35.1325 or § 35.1330. Lead-based paint hazard reduction is considered complete when clearance is achieved in accordance with § 35.1340 and the clearance report states that all lead-based paint hazards identified in the environmental investigation have been treated with interim controls or abatement or the public health department certifies that the lead-based paint hazard reduction is complete. The requirements of this paragraph do not apply if the designated party or the owner, between the date the child's blood was last sampled and the date the designated party received the notification of the elevated blood lead level, already conducted an environmental investigation of the unit and common areas servicing the unit and the owner completed reduction of identified lead-based paint hazards. If the owner does not complete the lead-based paint hazard reduction required by this section, the dwelling unit is in violation of the standards of 24 CFR 982.401.

(d) *Notice of lead-based paint hazard evaluation and reduction.* The owner shall notify building residents of any lead-based paint hazard evaluation or reduction activities in accordance with § 35.125.

(e) *Reporting requirement.* (1) The owner shall report the name and address of a child identified as having an elevated blood lead level to the public health department within 5 business days of being so notified by any other medical health care professional.

(2) The owner shall also report each confirmed case of a child with an elevated blood lead level to the HUD field office and the HUD Office of Lead Hazard Control and Healthy Homes within 5 business days of being so notified.

(3) The owner shall provide to the HUD field office documentation that it has conducted the activities of paragraphs (a) through (d) of this section, within 10 business days of the deadline for each activity.

(f) *Other assisted dwelling units in the property.* (1) If the environmental investigation conducted pursuant to paragraph (a) of this section identifies lead-based paint hazards, the designated party or the owner shall, for other assisted dwelling units covered by this part in which a child under age 6 resides or is expected to reside on the date lead-based paint hazard reduction under paragraph (c) of this section is complete, and the common areas servicing those units, conduct a risk assessment in accordance with § 35.1320(b) within 30 calendar days after receipt of the environmental investigation report if there are 20 or fewer such units, or 60 calendar days if there are more such units.

(2) If the risk assessment conducted under paragraph (f)(1) of this section identifies lead-based paint hazards, the owner shall complete the reduction of the lead-based paint hazards in accordance with § 35.1325 or § 35.1330 within 30 calendar days, or within 90 calendar days if more than 20 units have lead-based paint hazards such that the control work would disturb painted surfaces that total more than the de minimis threshold of § 35.1350(d). Lead-based paint hazard reduction is considered complete when clearance is achieved in accordance with § 35.1340 and the clearance report states that all lead-based paint hazards identified in the risk assessment have been treated with interim controls or abatement.

(3) The requirements of this paragraph (f) of this section do not apply if:

(i) The designated party or the owner, between the date the child's blood was last sampled and the date the owner received the notification of the elevated blood lead level, both conducted a risk assessment of the other assisted dwelling units covered by paragraph (f)(1) of this section and the common areas servicing those units, and the owner conducted interim controls of identified lead-based paint hazards in accordance with § 35.1225(c); or

(ii) The owner has documentation of compliance with evaluation, notification, lead disclosure, ongoing lead-based paint maintenance, and lead-

based paint management requirements under this part throughout the 12 months preceding the date the owner received the environmental investigation report pursuant to paragraph (a) of this section; and,

(iii) In either case, the owner provided the HUD field office, within 10 business days after receiving the notification of the elevated blood lead level, documentation that it has conducted the activities described in this paragraph (f)(3).

(g) *Data collection and record keeping responsibilities.* At least quarterly, the designated party shall attempt to obtain from the public health department(s) with area(s) of jurisdiction similar to that of the designated party the names and/or addresses of children of less than 6 years of age with an identified elevated blood lead level. At least quarterly, the designated party shall also report an updated list of the addresses of units receiving assistance under a tenant-based rental assistance program to the same public health department(s), except that the report(s) to the public health department(s) is not required if the health department states that it does not wish to receive such report. If it obtains names and addresses of elevated blood lead level children from the public health department(s), the designated party shall match information on cases of elevated blood lead levels with the names and addresses of families receiving tenant-based rental assistance, unless the public health department performs such a matching procedure.

If a match occurs, the designated party shall carry out the requirements of this section.

■ 16. Revise § 35.1330(a)(4)(iii) to read as follows:

§ 35.1330 Interim controls.

- (a) * * *
- (4) * * *

(iii) A renovator course accredited in accordance with 40 CFR 745.225.

* * * * *

Dated: December 14, 2016.

Nani Coloretti,
Deputy Secretary.

BILLING CODE 4210-67-P

DEPARTMENT OF TRANSPORTATION

Saint Lawrence Seaway Development Corporation

33 CFR Part 401

RIN 2135-AA40

Civil Penalties

AGENCY: Saint Lawrence Seaway Development Corporation (SLSDC), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This final rule updates the maximum civil penalty amounts for violations of statutes and regulations administered by SLSDC pursuant to the Federal Civil Penalties Inflation Adjustment Improvement Act of 2015. This final rule amends our regulations to reflect the new civil penalty amounts for violations of the Seaway Regulations and Rules under the authority of the Ports and Waterways Safety Act of 1972, as amended (PWSA).

DATES: This rule is effective on January 15, 2017.

FOR FURTHER INFORMATION CONTACT: Carrie Lavigne, Chief Counsel, SLSDC, telephone (315) 764-3231, 180 Andrews Street, Massena, NY 13362.

SUPPLEMENTARY INFORMATION:

Background

On November 2, 2015, the Federal Civil Penalties Inflation Adjustment Improvement Act (the 2015 Act), Public Law 114-74, was signed into law. The purpose of the 2015 Act is to improve the effectiveness of civil monetary penalties (CMPs) and to maintain their deterrent effect. The 2015 Act required agencies to make an initial catch up adjustment to the CMPs they administer through an interim final rule and then to make subsequent annual adjustments for inflation that shall take effect not later than January 15. The initial catch up adjustments for inflation to the SLSDC's CMP was published in the **Federal Register** on June 28, 2016 and as required, did not exceed 150 percent of the amount of the CMP on the date of enactment of the Federal Civil Penalties Inflation Adjustment Act of 2015. The revised methodology for agencies for 2017 and each year thereafter provides for the improvement of the effectiveness of CMPs and to maintain their deterrent effect. Effective 2017, agencies annual adjustments for in inflation to CMPs apply only to CMPs with a dollar amount.

The SLSDC's 2017 adjustments for inflation to the CMP set forth in this regulation were determined pursuant to

the revised methodology prescribed by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, which requires the maximum CMP to be increased by the cost-of-living adjustment. The term "cost-of-living adjustment" is defined by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015. For the 2017 adjustments for inflation to CMPs, the percentage for each CMP by which the Consumer Price Index for the month of October 2016 exceeds the Consumer Price Index for the month of October 2015.

Classification

Pursuant to 5 U.S.C. 553(b)B, there is good cause to issue this rule without prior public notice or opportunity for public comment because it would be impracticable and unnecessary. The Federal Civil Penalties Inflation Adjustment Act of 2015 (Section 701(b)) requires agencies effective 2017, to make annual adjustments for inflation to CMPs notwithstanding section 553 of Title 5 United States Code. Additionally, the methodology used, effective 2017, for adjusting CMPs for inflation is given by statute, with no discretion provided to agencies regarding the substance of the adjustments for inflation to CMPs. The SLSDC is charged only with performing ministerial computations to determine the dollar amount of adjustments for inflation to CMPs. Accordingly, prior public notice and opportunity for public comment are not required for this rule.

Regulatory Analysis

E.O. 12866, Regulatory Review

SLSDC has considered the impact of this rulemaking action under Executive Order 12866, Executive Order 13563, and the Department of Transportation's regulatory policies and procedures. This rulemaking document was not reviewed under Executive Order 12866 or Executive Order 13563. This action is limited to the adoption of adjustments of civil penalties under statutes that the agency enforces, and has been determined to be not "significant" under the Department of Transportation's regulatory policies and procedures and the policies of the Office of Management and Budget. Because this rulemaking does not change the number of entities that are subject to civil penalties, the impacts are limited.

We also do not expect the increase in the civil penalty amount in 33 CFR 401.102 to be economically significant. Since January 1, 2010 to the present, the SLSDC assessed a total of approximately \$27,000 in civil fines and penalties.

Thus, increasing the current civil penalty amount would not result in an annual effect on the economy of \$100 million or more.

Regulatory Flexibility Act

We have also considered the impacts of this notice under the Regulatory Flexibility Act. I certify that this rule will not have a significant economic impact on a substantial number of small entities. The following provides the factual basis for this certification under 5 U.S.C. 605(b). The St. Lawrence Seaway Regulations and Rules primarily relate to the activities of commercial users of the Seaway, the vast majority of whom are foreign vessel operators. Therefore, any resulting costs will be borne mostly by foreign vessels.

Executive Order 13132 (Federalism)

Executive Order 13132 requires SLSDC to develop an accountable process to ensure “meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.” “Policies that have federalism implications” is defined in the Executive Order to include regulations that have “substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.” Under Executive Order 13132, the agency may not issue a regulation with Federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, the agency consults with State and local governments, or the agency consults with State and local officials early in the process of developing the proposed regulation.

This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132.

The reason is that this rule will generally apply to commercial users of the Seaway, the vast majority of whom are foreign vessel operators. Therefore, any resulting costs will be borne mostly by foreign vessels. Thus, the requirements of Section 6 of the Executive Order do not apply.

Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995, Public Law 104–4, requires agencies to prepare a written assessment of the cost, benefits and other effects of proposed or final rules that include a Federal mandate likely to result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of more than \$100 million annually. Because this rule will not have a \$100 million effect, no Unfunded Mandates assessment will be prepared.

Executive Order 12778 (Civil Justice Reform)

This rule does not have a retroactive or preemptive effect. Judicial review of a rule based on this proposal may be obtained pursuant to 5 U.S.C. 702. That section does not require that a petition for reconsideration be filed prior to seeking judicial review.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980, we state that there are no requirements for information collection associated with this rulemaking action.

Privacy Act

Please note that anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT’s complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477–78), or you may visit <http://dms.dot.gov>.

List of Subjects in 33 CFR Part 401

Hazardous materials transportation, Navigation (water), Penalties, Radio, Reporting and recordkeeping requirements, Vessels, Waterways.

Accordingly, the Saint Lawrence Seaway Development Corporation is amending 33 CFR part 401 as follows:

PART 401—SEAWAY REGULATIONS AND RULES

Subpart A—Regulations

■ 1. The authority citation for subpart A of part 401 is amended to read as follows:

Authority: 33 U.S.C. 981–990, 1231 and 1232, 49 CFR 1.52, unless otherwise noted.

■ 2. In § 401.102, paragraph (a) is revised to read as follows:

§ 401.101 Criminal penalty.

(a) A person, as described in § 401.101(b) who violates a regulation is liable to a civil penalty of not more than \$90,063.

* * * * *

Issued on December 30, 2016.

BILLING CODE 4910–61–P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900–AP66

Diseases Associated With Exposure to Contaminants in the Water Supply at Camp Lejeune

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) amends its adjudication regulations regarding presumptive service connection, adding certain diseases associated with contaminants present in the base water supply at U.S. Marine Corps Base Camp Lejeune (Camp Lejeune), North Carolina, from August 1, 1953, to December 31, 1987. This final rule establishes that veterans, former reservists, and former National Guard members, who served at Camp Lejeune for no less than 30 days (consecutive or nonconsecutive) during this period, and who have been diagnosed with any of eight associated diseases, are presumed to have incurred or aggravated the disease in service for purposes of entitlement to VA benefits. In addition, this final rule establishes a presumption that these individuals were disabled during the relevant period of service for purposes of establishing active military service for benefits purposes. Under this presumption, affected former reservists and National Guard members have veteran status for purposes of entitlement to some VA benefits. This amendment implements a decision by the Secretary of Veterans Affairs that service connection on a presumptive basis is warranted for claimants who served at Camp Lejeune during the relevant period and for the requisite amount of time and later develop certain diseases.

DATES: *Effective Date:* This final rule is effective March 14, 2017.

FOR FURTHER INFORMATION CONTACT: Eric Mandle, Policy Analyst, Regulations Staff (211D), Compensation Service,

Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 461-9700. (This is not a toll-free telephone number.)

SUPPLEMENTARY INFORMATION:

I. Purpose of the Final Rule

VA amends its adjudication regulations to add certain diseases associated with contaminants present in the base water supply at U.S. Marine Corps Base Camp Lejeune, North Carolina, from August 1, 1953, to December 31, 1987. This final rule establishes that veterans, former reservists, and former National Guard members, who served at Camp Lejeune for no less than 30 days (consecutive or nonconsecutive) during this period and who have been diagnosed with any of eight associated diseases, are presumed to have incurred or aggravated the disease in service for purposes of entitlement to VA benefits. In addition, this final rule establishes a presumption that these individuals were disabled during the relevant period of service for purposes of establishing active military service for benefits purposes. Under this presumption, affected former reservists and National Guard members have veteran status for purposes of entitlement to some VA benefits.

Section 501(a)(1) of title 38, United States Code, provides that “[t]he Secretary has authority to prescribe all rules and regulations which are necessary or appropriate to carry out the laws administered by [VA] and are consistent with those laws, including . . . regulations with respect to the nature and extent of proof and evidence and the method of taking and furnishing them in order to establish the right to benefits under such laws.” This broad authority encompasses the establishment of an evidentiary presumption of service connection and exposure under specified circumstances, provided there is a rational basis for the presumptions. In this case, the Secretary has determined that proof of qualifying service at Camp Lejeune, consistent with Public Law 112-154, the Honoring America’s Veterans and Caring for Camp Lejeune Families Act of 2012 (Camp Lejeune Act), and the subsequent development of one of the eight listed diseases is sufficient to support the presumption that the resulting disease was incurred in the line of duty during active military, naval, or air service, to include qualifying reserve or National Guard service, to establish entitlement to service connection. See 38 U.S.C. 1110 and 1131.

II. Summary of Major Provisions

The major provisions of this final rule include the following: VA will amend 38 CFR 3.307 to establish presumptions of service connection associated with exposure to contaminants in the water supply at Camp Lejeune. This amendment presumes exposure to contaminants in the water supply at Camp Lejeune for all active duty, reserve, and National Guard personnel who served for no less than 30 days (consecutive or nonconsecutive) at Camp Lejeune during the period beginning August 1, 1953, and ending on December 31, 1987. This presumption specifically allows former reservists and National Guard members to establish veteran status by presuming that a covered disease was incurred in the line of duty and was disabling during a period of qualifying service.

VA will also amend 38 CFR 3.309 to prescribe the eight conditions that are subject to presumptive service connection in relation to exposure to contaminants in the water supply at Camp Lejeune.

III. Technical Correction

In the proposed rule, VA proposed amending the heading of 38 CFR 3.307 to read “Presumptive service connection for chronic, tropical or prisoner-of-war related disease, disease associated with exposure to certain herbicide agents, or disease associated with the contaminants in the water supply at Camp Lejeune; wartime and service on or after January 1, 1947.” Additionally, VA proposed amending paragraph (a) of § 3.307 to mirror the title. In reviewing this amendment for the final rule, however, VA realized that the current and proposed text of paragraph (a) contain errors. Namely, they refer to a “chronic, tropical, prisoner of war related disease” rather than a “chronic, tropical or prisoner of war related disease,” as referenced in the heading of § 3.307. Additionally, the heading and proposed text omitted the words “exposure to” before “contaminants in the water supply.” This document corrects these errors by inserting “or” in place of the comma between “tropical” and “prisoner of war” in paragraph (a) to clarify that the terms “chronic,” “tropical,” and “prisoner of war related” refer to three separate categories of disease rather than characteristics of a single disease; and inserting “exposure to” in the heading and paragraph (a) in the phrase pertaining to contaminants in the water supply at Camp Lejeune.

IV. Public Comments

On September 9, 2016, VA published in the **Federal Register** (81 FR 62419) a notice of a proposed rulemaking to amend 38 CFR 3.307 and 3.309 to establish presumptive service connection for certain diseases associated with contaminants present in the base water supply at U.S. Marine Corps Base Camp Lejeune, North Carolina, from August 1, 1953 to December 31, 1987. VA provided a 30-day public comment period, which ended on October 11, 2016, and received 290 comments on the proposed rule, one of which was received after the comment period. Although VA is not legally required to consider late-filed comments, it has reviewed, considered, and addressed all comments received in the interest of maximizing public dialogue to further serve veterans, claimants, and authorized representatives. VA received comments from various organizations and individuals, including Disabled American Veterans (DAV), Veterans of Foreign Wars (VFW), Vietnam Veterans of America (VVA), National Organization of Veterans’ Advocates (NOVA), C-123 Veterans Association, Fort McClellan Veterans Stakeholders Group, Reserve Officers Association, Marine Corps Reserve Association, United Parkinson’s Advocacy Council, Legal Counsel for the Elderly, Project on Government Oversight, a member of Congress, and other interested persons. VA responds to all commenters as follows.

All of the issues raised by the commenters that concerned at least one portion of the rule can be grouped together by similar topic, and VA has organized the discussion of the comments accordingly. VA also received 85 comments from veterans and surviving spouses regarding individual claims for veterans’ benefits. VA does not respond to these comments in this document as they are beyond the scope of this rulemaking.

For the reasons set forth in the proposed rule and below, VA adopts the proposed rule as final, with changes, as explained below.

A. 30-Day Exposure Requirement

VA received 18 comments, including organizational comments from DAV, VVA, NOVA, Project on Government Oversight, and Legal Counsel for the Elderly, regarding its proposal that a veteran, or former reservist or National Guard member must serve no less than 30 days (consecutive or nonconsecutive) at Camp Lejeune during the period beginning August 1, 1953, and ending

on December 31, 1987, to receive a presumption of service connection for the eight listed diseases based on exposure to contaminants in the water supply. Two commenters suggested changing the exposure requirement to one week and two weeks, respectively; neither commenter offered a rationale for these time limits. Several commenters suggested eliminating the exposure requirement completely, noting that the 30-day requirement was inconsistent with other toxic exposure presumptions and that it was not supported with scientific evidence. One commenter stated that the 30-day requirement would essentially exclude National Guard members from eligibility. One commenter stated that a 30-day exposure requirement would exclude veterans serving in the Naval Amphibious Force who docked at Camp Lejeune.

1. Comparison to Prior Exposure Regulations

VA received several comments, including from DAV, NOVA, VVA, Legal Counsel for the Elderly, and Project on Government Oversight, stating that a 30-day exposure period is inconsistent with VA's requirements for presumptive service connection based on toxic and other exposures. For example, VA has previously established regulations governing presumptive service connection for diseases associated with exposure to certain herbicide agents and certain disabilities occurring in Persian Gulf veterans. See 38 CFR 3.307, 3.309, and 3.317. These regulations do not include a minimum exposure requirement; a veteran must show that he or she served in an identified location or under enumerated circumstances to receive a presumption of service connection.

While the commenters are correct in that VA does not require a minimum level or duration of exposure for some previously-established presumptions, VA notes that these regulations serve to provide presumptive service connection based on the specified and particular exposures, conditions, and nature of military service in accordance with the scientific and other evidence supporting them. They do not set a binding precedent for future rulemakings that address unrelated circumstances. For example, while presumptive service connection for certain disabilities occurring in Persian Gulf veterans does not require a minimum exposure during military service, 38 CFR 3.317 requires that the qualifying chronic disability must manifest to a degree of 10 percent or more no later than December 31, 2021. This regulation, though, does not

require conditions associated with exposure to contaminants in the water supply at Camp Lejeune to manifest by a certain date. Similarly, 38 CFR 3.311 specifies that disabilities presumed to be associated with exposure to ionizing radiation must manifest within certain time periods after exposure to radiation (the time period varies depending on the condition in question). Nothing in this regulation requires a condition associated with exposure to contaminants in the water supply at Camp Lejeune to manifest within a certain period of time following service.

In addition to being based on different scientific, medical, and military evidence, the prior toxic exposure regulations often stem from a specific, separate statutory authority or requirement. These statutes prescribe the method by which the Secretary may create a regulatory presumption, to include the evidentiary basis for establishing a presumption, periods in which a disability must manifest, covered disabilities, how the Secretary shall determine that a condition is associated with a given toxic exposure, and other requirements specific to the toxic exposure under review. For example, the statutory authority to award presumptive service connection for certain disabilities associated with herbicide exposure in the Republic of Vietnam prescribes the dates during which the veteran must have served within the Republic of Vietnam. See 38 U.S.C. 1116. Similarly, 38 U.S.C. 1117 prescribes the requirements for eligibility for benefits associated with service in the Persian Gulf War. Notably, this statute also grants the Secretary the authority to determine the period of time following service during which a qualifying disability must manifest. See 38 U.S.C. 1117(b).

In the case of this regulation, Congress did not enact a specific statute authorizing the Secretary to establish compensation for disabilities presumptively related to exposure to contaminants in the water supply at Camp Lejeune. While creating this presumption via regulation fits within the authority conferred by section 501, the Secretary's rulemaking actions must have a rational basis. The Secretary has determined that, in the absence of evidence establishing an appropriate period of time for an exposure requirement, the soundest course is to maintain consistency with the Camp Lejeune Act, which establishes eligibility for VA health care for Camp Lejeune veterans who meet applicable criteria, including a 30-day service requirement. See 38 U.S.C. 1710(e)(1)(F), 38 CFR 17.400. This will

help to avoid public confusion and inconsistent results, for example where some Camp Lejeune veterans would be eligible for a presumption for purposes of disability compensation, but not the statutory presumption for health care benefits.

2. Modality of Exposure to Contaminants

Comments from DAV and Legal Counsel for the Elderly stated that failure to consider periods of service shorter than 30 days ignores the likelihood of regular and repeated exposure to contaminants through multiple modalities. The commenters noted that the National Research Council (NRC) explored three major routes of exposure to contaminants: Inhalation, skin contact, and ingestion. The NRC's 2009 study noted that doses of contaminants from showering could provide inhalation and dermal exposures that are equivalent to ingesting two liters of water, as water temperature impacted the volatility of the contaminants. Accordingly, commenters argued that when taking into account multiple modalities of exposure, the exposure to contaminants could be much greater in a shorter time period than compared to 30 days of drinking the water. This comment was echoed by several individual commenters.

As noted in the proposed rule, the Technical Working Group's (TWG) assessment relied on a hazard evaluation model, focusing on the strength of the evidence that a chemical is capable of causing a given health condition. The TWG did not take into account estimated levels of contamination in the water during the period of contamination at Camp Lejeune or the estimated length or intensity of exposure. This is in part because contamination levels and exposures were not well documented. For example, the 2009 NRC committee was "not aware of any historical information that documents individual water-use patterns and behaviors of residents of base housing." Committee on Contaminated Drinking Water at Camp Lejeune; National Research Council, *Contaminated Water Supplies at Camp Lejeune, Assessing Potential Health Effects* 61 (National Academies Press, 2009). Accordingly, the TWG did not characterize the risk associated with potential alternative levels of exposure (to include various modalities of exposure) of those who served or resided at Camp Lejeune during the period of contamination.

It is also relevant to note that the scientific evidence was not analyzed by

VA for sufficiency to support an expert opinion in a legal proceeding regarding causation in any individual case. Therefore, VA intimates no conclusion regarding any individual veteran's development of a disease and its relationship to exposure to contaminated water at Camp Lejeune for any purpose beyond entitlement to disability benefits administered by VA.

In the notice of proposed rulemaking, VA acknowledged that the available scientific evidence does not provide data on levels of exposure associated with each condition and proposed to rely upon the 30-day service requirement contained in the provisions of the Camp Lejeune Act. In the absence of scientific evidence which supports establishment of an alternative service or exposure requirement, VA's determination favors consistency and parity with its own health care regulation and the statute stands. Congress understood the Camp Lejeune Act to mean that "veterans deserve the presumptions of the service connection in the bill to ensure that they receive the benefits to which they are due," and did not specify that a different service requirement should exist for purposes of disability compensation. 158 Cong. Rec. H5430 (July 31, 2012) (statement by Rep. Dingell). Creation of a separate standard for the purposes of disability compensation would create inconsistency in the administration of benefits for Camp Lejeune veterans where the statute includes a clear service requirement for health care eligibility; inclusion of the 30-day requirement ensures consistency and parity in this regard with both the Camp Lejeune Act and VA's own regulations implementing the health care provisions of the act. For example, including a service requirement less than that in the Camp Lejeune Act could lead to the situation wherein a veteran is determined to be ineligible for VA health care on the grounds that he or she did not have the necessary 30 days of service at Camp Lejeune, but is then granted service connection on a presumptive basis based on the same service at Camp Lejeune upon filing a claim for compensation. A veteran in this situation could, via operation of this presumption, become eligible for VA health care based on their service connection rating, even though he or she would not have been eligible under the 30-day service requirement of the Camp Lejeune Act. This confusing result could raise a question as to whether VA had indirectly contravened a portion of the Camp Lejeune Act by virtue of a liberalizing evidentiary

presumption meant for compensation claims.

One commenter expressed concern with the 30-day requirement because the individual had documentation stating that his or her length of stay at Camp Lejeune was four weeks (which would be 28 days if read strictly). The individual noted that Department of Defense documentation sometimes references weeks of training, rather than days of training and expressed concern with personal and administrative burden associated with documenting presence on base for a day or two before and/or after training. As stated above, VA is adopting a 30-day requirement to ensure consistency with the Camp Lejeune Act. In adjudicating individual claims, VA is required to assist claimants in obtaining evidence and to resolve reasonable doubt in claimants' favor.

Thus, while VA acknowledges and thanks the commenters for their input, VA is unable to make any changes based upon these comments at this time. However, VA will continue to review relevant information as it becomes available and will consider future amendments to the 30-day requirement as appropriate.

3. Decide Claims Through Tort Law

Another commenter felt that the statutory 30-day requirement lacked a medical basis and felt that veterans' claims should be handled through tort law rather than the disability claim process. VA notes that the 30-day requirement for health care benefits was established by Congress. Furthermore, the presumptions set forth in this rulemaking are for the purposes of administering VA disability compensation benefits only; VA expresses no view regarding the potential correlation between any given level or duration of exposure and the increased risk of disease and/or disability for any purpose beyond this rulemaking. Accordingly, VA takes no action based on this comment.

4. Eliminate 30-Day Requirement for Health Care

Another commenter stated that VA should not require 30 days of service at Camp Lejeune to establish entitlement to health care benefits. The service requirement to establish entitlement to health care is mandated by the Camp Lejeune Act. The Camp Lejeune Act is a statute, the provisions of which were enacted by Congress. VA lacks the legal authority to alter, amend, or otherwise change the provisions of a statute and therefore takes no action based on this comment. We discuss the difference in

scope between the Camp Lejeune Act and this final rule in greater detail in section D.1, below.

5. Conduct Additional Studies on Exposure Requirements

A comment from VFW stated that VA should conduct additional studies to cover the impact of exposure on individuals who served less than 30 days, with the ultimate goal of reducing the 30-day exposure requirement. VA thanks VFW for its suggestion regarding conducting additional studies. However, this rulemaking pertains solely to establishing presumptions of service connection associated with exposure to contaminants in the water supply at Camp Lejeune; conducting scientific and/or medical studies is beyond the scope of this rulemaking. As such, VA makes no change to the final rule based on this comment.

6. Miscellaneous Alternative Exposure Requirement Comments

VA received several comments offering additional alternative minimum exposure requirements, with suggestions including a single day at Camp Lejeune and an increase to 90 days. While these comments offered alternative exposure criteria, they did not provide a rationale for the suggested alternative that was rooted in scientific, medical, or other rational basis.

As discussed above, the notice of proposed rulemaking acknowledged that the current science does not support a specific minimum exposure level for any of the conditions, as the available scientific and medical evidence focused on hazard models when studying the long-term health effects of the contaminants. Lacking such a scientific basis, VA relied upon the only source available in deciding to establish a 30-day exposure requirement: The Camp Lejeune Act. As VA acknowledged in the notice of proposed rulemaking, the Camp Lejeune Act does not provide a legal requirement for prescribing a 30-day service requirement for the purposes of disability compensation. However, the Camp Lejeune Act and VA's prior implementation of its provisions require 30 days of service at Camp Lejeune for a veteran to establish entitlement to health care. See 38 CFR 17.400. In light of the Camp Lejeune Act, VA's implementation of its provisions through 38 CFR 17.400, and the lack of an alternative exposure requirement supported by scientific, medical, or other rational evidence, VA determined that inclusion of the 30-day requirement in this rulemaking ensures consistency

and parity with both its health care regulations and the statute.

Without a rational basis to explain and support an alternative exposure requirement, VA's rulemaking would not comply with the statutory requirements of 38 U.S.C. 501 and therefore takes no action based on these comments. VA will continue to review relevant information as it becomes available and will consider future changes to the regulation as appropriate.

VA notes that nothing in the provisions of this rule prevents veterans without the requisite 30 days (consecutive or nonconsecutive) of service at Camp Lejeune from establishing service connection for any disease or disability on a direct basis. Direct service connection for any disease alleged to have been caused by the contaminants in the water supply at Camp Lejeune requires evidence of a current disease or disability, evidence of exposure to contaminated water at Camp Lejeune, and a medical nexus between the two, supported by a sufficient medical explanation.

B. Definition of Service at Camp Lejeune

VA received seven comments concerning the definition of *service at Camp Lejeune* for the purposes of establishing entitlement to disability benefits on a presumptive basis, as contained in proposed § 3.307(f)(7)(iii). These comments suggested that the rule make reference to specific locations within the borders of Camp Lejeune, some of which may be considered satellite camps/locations. One commenter noted that veterans may have lived in one of the specified satellite camps/locations while assigned to Camp Lejeune, or vice versa. Another commenter stated that listing specific satellite locations included within the definition of Camp Lejeune would avoid confusion for eligible veterans and minimize the risk of improper denials by claims processors who may not be aware of the satellite camps/locations. One commenter stated that the proposed rule did not include Marine Corps Air Station New River. Legal Counsel for the Elderly stated the presumption should extend to those who served in circumstances "likely" to have resulted in exposure to contaminants in the water supply at Camp Lejeune. This comment gave examples of those who served in training exercises or ships outside of Camp Lejeune but "likely" used water drawn from Camp Lejeune. An additional comment referenced Navy Amphibious Forces that docked at Camp Lejeune and most likely took on board fresh water from the Camp.

VA makes no change based on these comments. As stated in the proposed rule, VA broadly defined *service at Camp Lejeune* as any service within the borders of the entirety of the United States Marine Corps Base Camp Lejeune and Marine Corps Air Station New River, North Carolina, during the period beginning on August 1, 1953, and ending on December 31, 1987, as established by military orders or other official service department records. This definition is consistent with the Camp Lejeune Act and VA's prior implementation of the act, promulgated at 38 CFR 17.400. To ensure accurate and consistent application of the definition of *service at Camp Lejeune*, VA will administratively provide claims processors with all necessary factual and background information to process claims in accordance with this regulation.

Marine Corps Air Station (MCAS) New River, while located within the borders of the entirety of Camp Lejeune, falls under a separate command from Camp Lejeune itself. VA identified MCAS New River as a separate location as military orders or other official service department records may specifically denote service at or assignment to MCAS New River; failure to specify this location may result in improper denials of claims or create confusion for otherwise eligible veterans. VA notes that service at MCAS Cherry Point, which is geographically separate from Camp Lejeune (approximately 55 miles away), has a separate water source, and is under a separate command structure, does not meet the definition of *service at Camp Lejeune* for purposes of this rulemaking.

VA notes that the definition of *service at Camp Lejeune* relies on military orders or other official service department records to establish that an individual *had service at Camp Lejeune* for the purposes of entitlement to presumptive service connection based on exposure to contaminants in the water supply. As discussed in the proposed rule, the 2007 United States General Accounting Office (GAO) study found that the contaminated water supply systems served housing, administrative, and recreational facilities, as well as the base hospital at Camp Lejeune. See U.S. General Accounting Office, *Defense Health Care: Activities Related to Past Drinking Water Contamination at Marine Corps Base Camp Lejeune* (2007). Neither the GAO nor any other available study indicated that individuals who served aboard amphibious vessels were exposed to contaminants found in the water supply at Camp Lejeune. Without

evidence in official service department records documenting official orders or assignment to serve, either in an individual capacity or as part of a larger unit, at Camp Lejeune, a claimant does not meet the evidentiary standard for presumptive service connection. As such, without military orders or other official service department records reflecting service at Camp Lejeune, veterans, former reservists or National Guard members who served aboard vessels that docked at Camp Lejeune during the period of contamination are not eligible for presumptive service connection under the provisions of this rule.

As stated in the proposed rule, veterans without the requisite 30 days (consecutive or nonconsecutive) of service at Camp Lejeune, including those who allege exposure aboard amphibious vessels without military orders or other official service department records reflecting assignment to serve at Camp Lejeune, may still establish service connection for any disease or disability on a direct basis. Direct service connection for any disease alleged to have been caused by the contaminants in the water supply at Camp Lejeune requires evidence of a current disease or disability, evidence of exposure to contaminated water at Camp Lejeune, and a medical nexus between the two, supported by a sufficient medical explanation.

C. Benefits for Former Reservists and National Guard Members

VA received five comments regarding benefits for former reservists and National Guard members. One commenter stated that VA should define what benefits are available to reservists under the rule, noting that the rule states reservists would be entitled to "some" benefits under the rulemaking. Similarly, another commenter stated that VA does not consider reservists and former National Guard members "veterans" unless they have a service-connected disability. Another commenter noted that reserve and National Guard status does not meet the requirements of 38 CFR 3.6, and urged VA to amend other regulations to eliminate any conflict for applying presumptions of disability to reserve and National Guard members. Finally, one commenter stated that the rule does not include reservists and asked for VA to amend the rulemaking to include reservists.

As stated in the proposed rule, basic eligibility for VA benefits requires that an individual be a "veteran" as that term is defined in 38 U.S.C. 101(2). Reserve duty during a period of active

duty for training or inactive duty for training generally does not qualify an individual as a “veteran,” because it does not constitute “active military, naval, or air service,” unless the person is disabled or dies during that period of service as prescribed by 38 U.S.C. 101(24)(B) and (C). However, under this rule, former reservists and National Guard members meeting the service criteria for presumptive service connection based on exposure to contaminants at Camp Lejeune have veteran status for the purpose of entitlement to service connection for the enumerated disabilities; there is no limitation of benefits to former reservists and National Guard members under this rule. VA makes no change based upon these comments.

Another commenter stated that VA’s inclusion of former reservists and National Guard members in the rulemaking stretches Congressional intent with regards to the definition of “veteran.” The commenter also suggested that Congress should provide guidance on the definition of a veteran, and that VA is underestimating the financial impact of this rule. As explained in the proposed rule, although 38 U.S.C. 101(24) requires a period of active duty for training or inactive duty training “during which the individual was disabled or died” for this period to constitute active military, naval, or air service, this statute was enacted at a time when the latent effects of exposures to certain harmful chemicals were unrecognized. Further, the legislative history behind this statute does not specifically explain Congress’ intent in requiring that the individual “was disabled or died” during the period of service in question. As section 101(24) serves a generally beneficial purpose to recognize certain reserve and National Guard service which results in disability or death as affording veteran status for the purposes of VA disability benefits, and in light of increased medical understanding of the possible latent effects of toxic exposure, VA feels it is reasonable to include former reservists and National Guard members with qualifying service under this rule. Accordingly, VA makes no change based upon this comment.

D. Comments Pertaining to Presumptive Disabilities

VA received several comments regarding the disabilities included in the proposed rulemaking. These comments fell into two basic categories: One group related to the general differences between the disabilities in the proposed rule and the health care provisions in the Camp Lejeune Act,

while the other comments focused on individual disabilities.

1. Presumptive Disabilities Differ From the Camp Lejeune Act

VA received 42 comments, including from VVA, NOVA, and Legal Counsel for the Elderly, regarding the disabilities in our proposed rulemaking and the disabilities listed in the Camp Lejeune Act. The commenters noted that VA’s proposed rulemaking contained fewer and different conditions than the Camp Lejeune Act, with several commenters urging VA to adopt the list of disabilities in the Camp Lejeune Act in its entirety, without change. One commenter stated that veterans who develop a condition listed in the health care provisions of the Camp Lejeune Act but not listed as a presumptive disability would be denied compensation benefits for conditions for which health care is being provided. For the reasons enumerated below, VA makes no change based on these comments.

As explained in the proposed rule, the Camp Lejeune Act provides medical care, but not compensation benefits, to veterans who served on active duty at Camp Lejeune for the 15 identified conditions “notwithstanding that there is insufficient medical evidence to conclude that such illnesses or conditions are attributable to such service.” VA’s more recent review of scientific evidence was undertaken to determine the appropriateness of establishing presumptions of service connection for claimants who served at Camp Lejeune. As noted in the proposed rulemaking, this review included the analysis of several hazard evaluations on the chemicals of interest conducted by multiple bodies of scientific experts and was not an evaluation of the specific risks of exposure to contaminated water at Camp Lejeune. VA’s review resulted in the recognition that liver cancer and Parkinson’s disease, two diseases that were not included in the Camp Lejeune Act, are conditions for which there is strong evidence of a causal relationship and evidence that the condition may be caused by exposure to the contaminants. However, at this time, VA concludes that there is insufficient evidence to establish presumptions of service connection for the following diagnosed chronic disabilities in the Camp Lejeune Act: Esophageal cancer, lung cancer, breast cancer, neurobehavioral effects, and scleroderma. As noted in the notice of proposed rulemaking, none of the evidence reviewed concluded that there is a positive association between these conditions and the volatile organic

compounds of interest. The exclusion of scleroderma is addressed separately in the next section.

Additionally, the health care provisions of the Camp Lejeune Act provide medical coverage for health effects that are not themselves diagnosed diseases or clearly associated with a specific diagnosed disease. To establish that disability arising years after service is associated with harmful exposure in service, the evidence generally must show that the disability results from a disease associated with the in-service exposure. Accordingly, in § 3.307, VA has established presumptions of service connection for specific diseases, as distinguished from general health effects that may result from specific diseases but are not themselves diseases. The available scientific evidence did not identify a specific or general diagnosis of disease associated with renal toxicity or hepatic steatosis, conditions which are included in the provisions of the Camp Lejeune Act.

Finally, the Camp Lejeune Act included health care for female infertility and miscarriage. However, as noted in the proposed rule, the NRC’s 2009 report indicated that the occurrence of female infertility and miscarriage were limited to exposure concurrent with those health effects. As such, the inclusion of these conditions in the Camp Lejeune Act does not provide a basis at this time for presuming current health effects of this type to be associated with past exposure. Additionally, as stated in the proposed rule, these two conditions are not in and of themselves disabilities for which VA can provide disability compensation.

Accordingly, as noted by one commenter, an outcome of VA’s review of the available scientific evidence, to include additional evidence that did not exist at the time the Camp Lejeune Act was passed, may result in situations where an individual receives VHA health care for a covered condition without an associated copayment under the Camp Lejeune Act, but is not eligible for presumptive service connection for disability compensation for that condition under this rulemaking. While these individuals may not be eligible for presumptive service connection under this rulemaking, they may be eligible for direct service connection for any disease alleged to have been caused by the contaminants in the water supply at Camp Lejeune, including a disease or disability covered under the Camp Lejeune Act. As noted earlier in section B, direct service connection requires

evidence of a current disease or disability, evidence of exposure to contaminated water at Camp Lejeune, and a medical nexus between the two, supported by a sufficient medical explanation. Conversely, it is similarly possible that a condition not exempted from copayment under the Camp Lejeune Act, such as liver cancer or Parkinson's disease, could be granted presumptive service connection pursuant to this final rule. We note that a grant of service connection for such a condition would exempt treatment associated with that condition from copayment requirements, as VA copayments do not apply to treatment of service connected disabilities. A grant of presumptive service connection could also create an alternative basis for enrollment in the VA health care system. See 38 CFR 17.36.

VA will continue to review relevant information as it becomes available and will consider future additions to the list of covered conditions as appropriate.

In addition to suggesting that VA should provide disability compensation for the conditions in the Camp Lejeune Act, one commenter suggested that, alternatively, VA should change the provisions of the Camp Lejeune Act to match the eight disabilities covered in the proposed rule. The Camp Lejeune Act is a statute, the provisions of which were enacted by Congress. VA lacks the legal authority to alter, amend, or otherwise change the provisions of a statute and therefore takes no action based on this comment.

2. Exclusion of Scleroderma as a Presumptive Disability

Eight commenters, including the Project on Government Oversight, Legal Counsel for the Elderly, and a member of Congress, specifically questioned VA's exclusion of scleroderma as a presumptive disability. These commenters noted that scleroderma was included in the health care provisions of the Camp Lejeune Act and suggested that VA specifically include this condition as a presumptive disability. Additionally, the comment from a member of Congress stated that there was modest causal evidence from the Agency for Toxic Substances and Disease Registry (ATSDR) and the economic impact of including scleroderma would be minimal, as the number of Camp Lejeune veterans suffering from this condition is small.

As explained in the proposed rule, due to the lack of new scientific/medical evidence (outside of the available evidence considered by the TWG) linking any of the contaminants found in the water supply with the

development of scleroderma specifically, VA cannot create a presumption of service connection for Camp Lejeune veterans at this time. Though the available evidence has established a role for trichloroethylene (TCE) in the development of autoimmune diseases, the studies that specifically report on scleroderma include factors that introduce significant uncertainty into their results, to include small sample sizes and an unexplained gender effect. Although the science does not at this time support the addition of scleroderma to the list of covered diseases, VA will continue to monitor and review future studies as they become available and will consider future additions to the list of covered diseases as appropriate.

3. Inclusion of Neurobehavioral Effects and Parkinsonism

VA received eight comments regarding the issue of neurobehavioral effects and parkinsonism, including an organizational comment from the United Parkinson's Advocacy Council. Three commenters stated the presumptive disabilities should include neurobehavioral effects, with one commenter specifying inclusion of specific types of neurobehavioral effects. Another commenter suggested that VA include "Parkinson-like" symptoms as a presumptive disability under the general diagnosis of neurobehavioral effects. The third commenter asked if parkinsonism was included under the definition of Parkinson's disease. Another commenter stated that there is no way to definitively diagnose Parkinson's disease. The United Parkinson's Advocacy Council stated VA should include "atypical parkinsonism" in the rulemaking.

Parkinson's disease was included in the list of presumptive disabilities due to a recommendation made by the Institute of Medicine (IOM) in their 2015 report "Review of VA Clinical Guidance for the Health Conditions Identified by the Camp Lejeune Legislation." The IOM noted that Parkinson's disease is a specific neurobehavioral effect that may be experienced by individuals exposed to the contaminants in the water supply at Camp Lejeune.

Parkinson's disease is medically distinguishable and separately diagnosable from a variety of parkinsonian syndromes, including drug-induced parkinsonism and neurodegenerative diseases, such as multiple systems atrophy, which have parkinsonian features combined with other abnormalities. Most notably, the

pathologic findings in cases of parkinsonism show different patterns of brain injury than those noted in patients with Parkinson's disease. See Institute of Medicine of the National Academies, *Veterans and Agent Orange: Update 2012*, The National Academies Press (Washington, DC, 2014). The studies that have established a relationship between the contaminants in the water supply at Camp Lejeune and Parkinson's disease reported specifically on Parkinson's disease, not parkinsonism or other parkinsonian syndromes. At this time, the available evidence does not establish that parkinsonism and other manifestations of small fiber nerve damage are associated with exposure to the contaminants in the water supply at Camp Lejeune. Therefore, VA makes no change based on these comments.

4. Adult Leukemia

VA received 12 comments, including from the Project on Government Oversight and VFW, and one from a member of Congress, addressing the condition of adult leukemia. The commenters stated that VA should clarify the disabilities included in adult leukemia by changing the term to "leukemia," "adult leukemias," or by listing all sub-types of leukemia included in the definition of adult leukemia. A comment from a member of Congress specifically cited an ATSDR report, which noted all leukemia subtypes are associated with exposure to contaminants in the water supply at Camp Lejeune. The same member of Congress also stated the use of "adult leukemia" was unnecessary because all who qualify for this benefit are adults, as the rulemaking does not apply to dependents. Another commenter stated that VA should replace the term "adult leukemia" with "chronic or acute forms of lymphocytic and myeloid leukemia" to clarify what conditions are covered. VA disagrees and makes no change based on these comments.

The term "adult leukemia" clarifies that the types of leukemia covered under this rulemaking must have their onset in adulthood. This distinction between adult and non-adult leukemias is necessary, as the disability compensation provided by this rulemaking applies only to disabilities arising in veterans, reservists, or National Guard members as a result of their exposure to contaminants in the water supply at Camp Lejeune while serving under official military orders or other official assignment. As such, the presumptions of this rulemaking do not apply to veterans, reservists or National Guard members who develop leukemia

prior to qualifying service at Camp Lejeune.

The use of the term “adult leukemia” was not intended to restrict the types of leukemia covered by this rulemaking. No sub-type of leukemia was identified in the rulemaking in order to be inclusive to all types of leukemia, including the sub-types identified by commenters. VA notes that inclusion of specific sub-types included within this definition will lead to an incomplete list, potentially confusing veterans, reservists and National Guard members who have a qualifying disability, as well as claims processors.

5. Miscellaneous Disabilities

VA received 53 comments, including organizational comments from the Fort McClellan Veterans Stakeholders Group, which requested inclusion of miscellaneous conditions and disabilities, both specified and unspecified, that were not the subject of the proposed rulemaking, nor were they included in the provisions of the Camp Lejeune Act. These conditions include: Hodgkin’s disease, diabetes mellitus, depression, sleep apnea, throat cancer, fibroid sarcoma, prostate cancer, colon cancer, brain cancer, mesothelioma, soft tissue sarcoma, gynecomastia, prolactemia, Crohn’s disease, amyloidosis, hidradenitis suppurativa, immune system toxicity, gastrointestinal cancers, other unspecified immune system effects, unspecified neurologic disorders, unspecified skin conditions, unspecified endocrine disorders, unspecified cellular mutation, cancerous and non-cancerous urinary tract conditions, unspecified kidney effects, unspecified liver effects, unspecified endocrine effects, unspecified cardiovascular disorders, and unspecified cancers. Additionally some commenters stated that VA should include additional disabilities without specifying those additions. Two commenters stated that VA should consider all diseases and disabilities as associated with exposure to contaminants in the water supply at Camp Lejeune, noting that VA should bear the burden of proof as to why any disability is unrelated to exposure to contaminants at Camp Lejeune. Another commenter suggested inclusion of conditions not identified by scientific evidence. Finally, one commenter cited a decision by the Board of Veterans’ Appeals (BVA) as sufficient evidence to support adding prostate cancer to the list of presumptive disabilities. The same commenter also stated VA should consider adding hepatitis C, noting a correlation between it and prostate cancer.

As stated in the proposed rule, VA undertook a deliberative scientific process to determine whether available scientific evidence was sufficient to support a presumption of service connection for any health condition as a result of exposure to the chemicals found in the drinking water at Camp Lejeune. This process involved an evaluation of comprehensive hazard studies conducted by several internationally respected expert bodies. VA also notes that BVA decisions are made on the facts, circumstances, and evidence of individual claims on a case-by-case basis; these cases do not set precedent. At this time, there is insufficient medical and scientific evidence to establish a presumption of service connection for any disability beyond the eight conditions included in the rulemaking; therefore, VA makes no change in response to these comments at this time.

VA relies heavily on studies of exposed populations in order to establish such an association, and will continue to monitor future studies, especially those conducted on the Camp Lejeune population, as they become available. VA will consider additions to the list of presumptive disabilities as appropriate, should future studies provide sufficient evidence for such a change.

As previously discussed, it is also relevant to note that the scientific evidence was not analyzed by VA for sufficiency to support an expert opinion in a legal proceeding regarding causation in any individual case. Therefore, VA intimates no conclusion regarding any individual veteran’s development of a disease and its relationship to exposure to contaminated water at Camp Lejeune.

6. Kidney Cancer

One commenter asked why VA is not recognizing kidney cancer as a presumptive disability. As noted in the proposed rule under amended § 3.309(f), kidney cancer is one of the listed conditions VA recognizes as presumptively associated with exposure to contaminants in the water at Camp Lejeune. VA makes no change based upon this comment.

E. Effective Date

VA received 27 comments, including from the C-123 Veterans Association, VFW, and NOVA, concerning the effective date of the regulation. Comments included suggestions that this rule should be effective the date a claim was initially filed, even if prior to the effective date of the final rule, or on the date of onset or diagnosis of a

covered illness. Other commenters stated the rule should be effective retroactively to the date an eligible veteran first served at Camp Lejeune. Some commenters stated that the rule excludes previously denied claims, and therefore VA should apply the provisions of the *Nehmer v. U.S. Department of Veterans Affairs (Nehmer)* court order to determine a retroactive effective date for awards. See *Nehmer v. U.S. Department of Veterans Affairs*, No. CV-86-6161 TEH (N.D. Cal.). One commenter suggested that the rule should be effective the date the proposed rule was published, as it should have been published as an interim final rule. Finally, one commenter asked if a “pending” claim includes the one-year period following notice of a denial as well as appeals before the BVA.

As stated in the proposed rule, this rule will apply to claims received by VA on or after the effective date of the final rule and to claims pending before VA on that date. Under 38 CFR 3.160(c), a claim that has not been finally adjudicated (which includes claims where a final and binding decision has been issued but the appeal period has not expired) is still considered a pending claim. The rule does not apply retroactively to claims that are finally adjudicated. VA must adhere to the provisions of its change of law regulation, 38 CFR 3.114, which states that where pension, compensation, dependency and indemnity compensation is awarded or increased pursuant to a liberalizing law, or a liberalizing VA issue approved by the Secretary or by the Secretary’s direction, the effective date of such award or increase shall be fixed in accordance with the facts found, but shall not be earlier than the effective date of the act or administrative issue. See also 38 U.S.C. 5110(g).

This final regulation is based on the Secretary’s broad authority under 38 U.S.C. 501(a) to “prescribe all rules and regulations which are necessary or appropriate to carry out the laws administered by the Department and are consistent with those laws, including— . . . regulations with respect to the nature and extent of proof and evidence . . . in order to establish the right to benefits under such laws.” This rulemaking authority does not explicitly afford the Secretary authority to assign retroactive effect to the regulations created thereunder, and retroactivity is heavily disfavored in the law. As explained in the proposed rule, a claimant whose claim was previously and finally denied may file a new claim to obtain a new determination of

entitlement under the final regulation. Finally, VA notes that the effective date provisions of the *Nehmer* court order apply only to claims based on exposure to herbicides in the Republic of Vietnam during the Vietnam era and are therefore inapplicable to this final rule.

The Administrative Procedures Act (APA) provides guidance as to when a rulemaking may be published as an interim final rule. Under the APA, a rulemaking may be published as an interim final rule if it is determined that notice and public comment “are impracticable, unnecessary, or contrary to the public interest.” 5 U.S.C. 553(b)(3)(B). As this rulemaking involves significant economic costs, the opportunity for prior review and comment was necessary and in accordance with the public interest. VA has acted expeditiously to consider these public comments and prepare a final rulemaking. Therefore, VA makes no changes based on these comments.

F. Date Range for Contamination

One commenter stated the date range for exposure should be extended without specifying exact dates. The commenter stated that contamination likely still existed even after the water supply met unspecified Environmental Protection Agency (EPA) standards. Similarly, VVA stated the contamination period should be extended until December 31, 2000, the last day of the year that the Navy removed contaminated soil and other items from the sites surrounding Camp Lejeune. Another commenter stated the background information in the proposed rule regarding contamination was incorrect; this commenter stated that contamination ended in 1987 and the initial contamination warnings were in 1980. Another commenter stated VA should expand the date range to include those who served from January 1, 1947, through July 31, 1953, without further elaboration.

As stated in the proposed rule, the Camp Lejeune Act specified a period of contamination from August 1, 1953, through December 31, 1987. This date range is likely based on some of the earliest assessments of the Camp Lejeune water supply noted in the NRC report. This period also represents the ATSDR’s best estimate of the period of contamination at Camp Lejeune. In the absence of additional scientific evidence to support an expansion of the contamination period, VA makes no change based upon these comments at this time.

G. Additional Contaminants

VA received two comments regarding consideration of additional contaminants. One commenter stated that VA should include information about unspecified lead contamination during the 1990s. The commenter also requested inclusion of information contained in an unspecified 1997 study. Another commenter stated that VA’s assessment of contaminants is incomplete, as it does not consider toxic compounds outside those noted in the rulemaking.

As stated in the proposed rule, VA is only addressing the contamination of the water supplies by the four chemicals of interest (*i.e.*, TCE, perchloroethylene (PCE), benzene, and vinyl chloride) that occurred between August 1, 1953, and December 31, 1987, as a result of on-base industrial activities and an off-base dry cleaning facility. Exposure events unrelated to the specified date range and sources of contamination are unrelated to the subject and scope of this rulemaking; therefore VA makes no change in response to this comment.

H. Additional Scientific or Medical Evidence

Two commenters stated that VA should reference additional, uncited studies, stating the rulemaking should consider the effects of exposure to solvent mixtures. One commenter stated VA should reference an unspecified study of the individuals who were actually exposed to contaminants in the water supply at Camp Lejeune. Another commenter, the Fort McClellan Veterans Stakeholders Group, without further elaboration, stated that VA uses the wrong method to evaluate toxic exposures. VA also received a comment stating that unspecified evidence exists to possibly support the addition of more disabilities. One commenter stated that the NRC did not perform a study, it merely reviewed available literature, and the 2009 NRC is flawed and outdated. This same commenter also stated that the description of the collaboration between ATSDR, VA’s Camp Lejeune Science Liaison Team, and VA’s Technical Workgroup (TWG) was incorrect. The commenter stated that the community was not directly involved in this collaboration. Another commenter stated it was unclear which ATSDR studies were considered in the rulemaking. Other commenters stated generally that inclusion or performance of additional studies could result in a larger list of presumptive disabilities. Finally, one commenter stated that a source with the Center for Disease Control stated it is impossible to

determine the minimum level of exposure to a contaminant needed to result in negative health effects.

VA currently has no information as to its disposal to define the specific hazardous exposure levels or combinations of exposure that any one individual received, which would determine exactly who in the veteran population might be at an increased risk of experiencing adverse health effects related to their service at Camp Lejeune. As explained in the proposed rule, the VA review consisted of a hazard evaluation for the four chemicals of interest: TCE, PCE, benzene and vinyl chloride, and focused on the effects of these individual contaminants without regard to specific exposure levels. Additionally, as explained in the rulemaking, VA reviewed evidence from several internationally recognized scientific authorities, including groups other than the NRC. Regarding the description of the process employed by ATSDR, VA notes that ATSDR is an external entity and, as such, is not subject to VA’s control. VA also notes that the notice of proposed rulemaking contains a full list of scientific studies and reviews cited in the rulemaking in section E, “Weight-of-Evidence Analyses Considered by the TWG.”

VA’s rule is as inclusive as possible in covering the illnesses of veterans, former reservists and National Guard members exposed to contaminants in the water supply at Camp Lejeune based on the available scientific evidence, in the absence of specific exposure information. VA makes no change based on these comments.

I. Expedite Rulemaking

VA received 17 comments, including an organizational comment from VFW, urging VA to expedite the rulemaking, to include publication of a final rule under which benefits may be granted. VA must adhere to the requirements of the APA, which includes a period for public comment and review of the rulemaking. VA appreciates these comments and has taken the necessary steps to ensure this rule is finalized while conforming to the legal requirements of notice and comment rulemaking.

J. Benefits for Veterans Born at Camp Lejeune Without Service at Camp Lejeune

One commenter asked if the rule provides compensation for veterans who were born at Camp Lejeune but do not have qualifying active duty, reserve, or National Guard service at Camp Lejeune. VA is only authorized to pay disability compensation for disability

resulting from injury suffered or disease contracted in line of duty “in the active military, naval, or air service”. 38 U.S.C. 1110, 1131. Thus, VA has no authority to pay compensation for disability arising from events prior to service entry. VA makes no change based upon this comment.

K. Standard of Evidence for Claims

One commenter stated that the proposed rulemaking would still require eligible veterans, former reservists and National Guard members to present a medical opinion in support of their claim for a presumptive disability. As stated in the proposed rulemaking, if a veteran, former reservist or National Guard member meets the stated requirements for service at Camp Lejeune, then the subsequent development of any of the eight listed disabilities is presumed to be related to the exposure to contaminants, in the absence of clear and convincing evidence to the contrary. These presumptions do not require any further evidence to support a claim, including a medical opinion. Therefore, VA makes no change based on this comment.

Another commenter stated that the proposed rule makes no reference for individual genetic predisposition to increased vulnerability to a specific toxin. The commenter stated this places an unrealistic burden of proof on an individual to prove that he or she suffers a disability due to exposure to toxins. VA has no information at its disposal to define the specific hazardous exposure any individual received, which could assist in determining who in the veteran population was or would be at an increased risk of suffering adverse health effects related to their service at Camp Lejeune. Furthermore, once the basic eligibility requirements of this rule are met (qualifying service and diagnosis of a listed disability), no further information, to include evidence of a genetic vulnerability to a specific toxin, is necessary. Therefore, VA makes no change based on this comment.

Two commenters asked if a medical opinion that served as the basis of a previous denial could serve as affirmative evidence to rebut the presumption created by this rule. The circumstances of individual claims are beyond the scope of this rulemaking and VA makes no change based upon this comment. However, VA notes that 38 CFR 3.307(d), which pertains to rebuttal of presumptive service connection, specifically requires consideration of all evidence of record when determining the issue of presumptive service connection. As noted above, a claimant

whose claim was previously and finally denied may file a new claim to obtain a new determination of entitlement under the final regulation. All claims are adjudicated individually based upon the entire evidentiary record and in accordance with all applicable regulations.

Legal Counsel for the Elderly stated that VA should allow for a veteran’s lay testimony to establish the occurrence of exposure to contaminants in the water supply at Camp Lejeune. VA will consider all evidence of record when deciding claims, including lay testimony. However, VA notes that current regulations provide very specific circumstances as to when a veteran’s lay testimony is sufficient to establish an occurrence for the purposes of entitlement to disability benefits. For example, a veteran’s lay testimony may be sufficient to establish the occurrence of an injury or event that occurred during combat, if that testimony is consistent with the circumstances, conditions, or hardships of that veteran’s service, even where no official record of such incurrence exists. The purpose of this lay statement exception is to acknowledge certain circumstances where official records likely will not exist to establish a fact; in this example, it is highly unlikely that medical records will exist to document the occurrence of an injury at the time it occurred during combat. In the present rulemaking, establishing service at Camp Lejeune requires documentation of 30 days of service at Camp Lejeune by military orders or other official service department records. These documents are regularly and routinely issued by the military as a part of its normal duties in documenting personnel assignments and location and are a part of every servicemember’s personnel file. As the evidence required to establish service at Camp Lejeune, and therefore satisfy the condition necessary to presume exposure to contaminants in the water supply, is readily available, VA makes no change based upon this comment.

Similarly, one commenter stated VA should provide a “benefit of the doubt” to anyone who served at Camp Lejeune in the 1980s. As stated in the rule, this presumption of service connection applies to any veteran, to include former reserve and National Guard members, who served at Camp Lejeune during the relevant time period. This presumption reduces the evidentiary burden required to establish entitlement to disability compensation for certain claims, as further explained in the notice of proposed rulemaking. VA makes no change based upon this comment.

L. Benefits for Family Members or Civilians

VA received 11 comments, including an organizational comment from the United Parkinson’s Advocacy Council, stating that family members or civilians who were exposed to contaminants in the water supply at Camp Lejeune should receive disability compensation. VA notes that this rulemaking provides disability compensation for qualifying veterans, former reservists or National Guard members; benefits for family members or civilians are beyond the scope of the rulemaking and therefore VA will not respond to this comment. Additionally, VA notes that there is currently no statutory authority to provide benefits to the classes of people identified by the commenters.

M. General Support for the Rulemaking

VA received 56 comments, including from the C-123 Veterans Association, DAV, VFW, VVA, Project on Government Oversight, Reserve Officers Association, Marine Corps Reserve Association, United Parkinson’s Advocacy Council, and Legal Counsel for the Elderly, expressing support for the rulemaking in general. Many of these comments, which were received from individuals as well as organizations in the veteran community, stated appreciation for VA’s actions in establishing a presumption of exposure and service connection for veterans, reservists, and National Guard members exposed to contaminants in the water supply at Camp Lejeune. VA appreciates the time and effort expended by these commenters in reviewing the proposed rule and in submitting comments, as well as their support for this rulemaking.

N. Negative Comments

VA received five comments indicating opposition to the rulemaking. These comments expressed disagreement with the rulemaking process in general, and presumptive service connection in particular. VA’s decision to create a presumption of exposure to contaminants in the water supply at Camp Lejeune and presumptive service connection for the listed disabilities was issued after the Secretary considered the available scientific evidence and recommendations, as explained in the notice of proposed rulemaking. This evidence demonstrated at least an association between the contaminants in the water supply at Camp Lejeune and the eight listed disabilities. This evidence is supported by published reports from multiple internationally-recognized authorities, and the

Secretary has determined this evidence provides a rational basis to issue regulations for presumptions of exposure and service connection. Accordingly, VA makes no change based on these comments.

O. Character of Discharge and Eligibility for Benefits

One commenter stated that individuals with an other than honorable discharge are excluded from eligibility under this rulemaking. This rulemaking amends 38 CFR 3.307 and 3.309; it does not affect the provisions of 38 CFR 3.12, which pertains to the character of discharge requirements for benefits eligibility. Therefore, this comment is outside the scope of the rulemaking and VA makes no change based on it.

P. Statements About Personal Claims

As stated previously, many commenters made general statements about their own experiences with one or more of the presumptive disabilities, non-presumptive disabilities, their personal disability claims, or their personal health care claims. Comments regarding situations involving the possible outcome of individual claims, or the medical or claims history presented by individual veterans are beyond the scope of this rulemaking. Claimants should contact their VA regional office for assistance with their individual claims.

Q. Other Comments Unrelated to or Outside the Scope of This Rulemaking

VA received 30 comments dealing with issues not directly related to the new presumption of exposure or the new presumptively service-connected diseases. Such comments covered a wide range of topics; examples of such comments appear below.

One commenter stated that VA needs to update the VA Schedule for Rating Disabilities, noting that the criteria used to evaluate the diseases covered under this rulemaking are subjective. Another commenter stated that VA should evaluate individuals who were previously denied as 100 percent disabled. One commenter stated that VA should provide a zero-percent evaluation for any veteran, reservist, or former National Guard member who served at Camp Lejeune during the qualifying period. Two commenters stated that VA should provide health care in addition to disability compensation for veterans, reservists, and former National Guard members contemplated under this rulemaking. Two commenters stated that the rule does not include a mechanism for

notifying eligible veterans who may be unaware of their exposure to contaminants in the water supply at Camp Lejeune. Similarly, VFW stated VA should provide notification to claimants who were previously denied benefits. VFW also stated that VA should update the Catalog of Federal Domestic Assistance titles in the rulemaking to indicate the eligibility to additional benefits available to reservists and National Guard members as a result of the rulemaking. Another commenter urged VA to change the health care priority group level for reservists and National Guard members. Another comment stated that the same standards of evidence used to prosecute a corporation that harms an individual with toxic chemicals should be re-introduced in this rulemaking. Two commenters, including the Fort McClellan Veterans Stakeholders Group and the Project on Government Oversight, stated VA should pay benefits to veterans who served at Fort McClellan. Another commenter asked what effect this rulemaking has on the Camp Lejeune Act or House Resolution 3954—The Camp Lejeune Reservist Parity Act of 2015. One commenter stated the government uses members of the armed forces as guinea pigs for vaccines that have not been approved by the Food and Drug Administration. VA received one comment that stated this policy change does not protect the rights of veterans. Another commenter stated that the contamination is a violation of the 5th Amendment rights of those who were exposed and stated the base should be evacuated. Six commenters, including the Reserve Officers Association, requested that VA create or add their information to unspecified lists/registries. Another commenter stated that Parkinson's disease should have been specifically listed as a neurobehavioral effect. One commenter stated that VA should use available scientific evidence to “dismantle” the provisions of other exposure presumptions, such as benefits related to radiation exposure. The same commenter stated that the presumption of soundness does not apply to National Guard or reserve members who did not undergo physical examination during active duty. Finally, this commenter stated that VA should consider National Guard and reserve members as exposed to herbicides while serving in Canada. Another commenter asked if VA would provide compensation to private insurers for treatment of a covered disability. Without elaborating further, one commenter stated the proposal is too limited in scope and took too long

to enact; a similar comment was received stating that the rule does not provide “sufficient redress.” Another commenter stated VA should cover the cost of in-vitro fertilization or adoption for veterans experiencing female infertility. One commenter, the Reserve Officers Association, urged Congress to enact additional legislation. A comment from VFW suggested VA study the combined effects of exposure to herbicides and contaminants in the water supply at Camp Lejeune. Another commenter stated that there is nothing in writing that pertains to the individuals who were stationed at Camp Lejeune. VA received a comment stating that VA should provide former Marines with the Purple Heart. One individual stated that qualifying individuals should receive a blanket settlement from the government.

VA does not respond to these comments because they are either unrelated to this rulemaking or beyond its scope.

Executive Orders 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, and other advantages; distributive impacts; and equity). Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 12866 (Regulatory Planning and Review) defines a “significant regulatory action,” requiring review by the Office of Management and Budget (OMB), unless OMB waives such review, as “any regulatory action that is likely to result in a rule that may: (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.”

The economic, interagency, budgetary, legal, and policy implications of this regulatory action have been examined, and it has been determined to be a significant regulatory action under Executive Order 12866 because it is likely to result in a rule that may have an annual effect on the economy of \$100 million or more and may raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order. VA's impact analysis can be found as a supporting document at <http://www.regulations.gov>, usually within 48 hours after the rulemaking document is published. Additionally, a copy of this rulemaking and its impact analysis are available on VA's Web site at <http://www.va.gov/orpm/>, by following the link for "VA Regulations Published from FY 2004 Through Fiscal Year to Date."

Regulatory Flexibility Act

The Secretary hereby certifies that these regulatory amendments will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (5 U.S.C. 601–612). These amendments will directly affect only individuals and will not directly affect small entities. Therefore, pursuant to 5 U.S.C. 605(b), these amendments are exempt from the regulatory flexibility analysis requirements of sections 603 and 604.

Unfunded Mandates

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year. This final rule will have no such effect on State, local, and tribal governments, or on the private sector.

Paperwork Reduction Act

This final rule contains no provisions constituting a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521).

Congressional Review Act

Generally, under the Administrative Procedure Act, the required publication of a substantive rule shall be made not less than 30 days before its effective date. 5 U.S.C. 553(d). However, this regulatory action is a major rule under the Congressional Review Act, 5 U.S.C. 801–808, because it may result in an

annual effect on the economy of \$100 million or more. Therefore, in accordance with 5 U.S.C. 801(a)(1), VA will submit to the Comptroller General and to Congress a copy of this regulatory action and VA's Regulatory Impact Analysis. Provided Congress does not adopt a joint resolution of disapproval, this rule will become effective the later of the date occurring 60 days after the date on which Congress receives the report, or the date the rule is published in the **Federal Register**. 5 U.S.C. 801(a)(3)(A).

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance numbers and titles for the programs affected by this document are 64.109, Veterans Compensation for Service-Connected Disability; 64.110, Veterans Dependency and Indemnity Compensation for Service-Connected Death.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Gina S. Farrissee, Deputy Chief of Staff, Department of Veterans Affairs, approved this document on November 16, 2016, for publication.

Dated: January 9, 2017.

Michael Shores,

Acting Director, Regulation Policy & Management, Office of the Secretary, Department of Veterans Affairs.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Disability benefits, Veterans.

For the reasons stated in the preamble, the Department of Veterans Affairs amends 38 CFR part 3 as follows:

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

- 1. The authority citation for part 3, subpart A, continues to read as follows:

Authority: 38 U.S.C. 501(a), unless otherwise noted.

- 2. Amend § 3.307 by revising the section heading and paragraphs (a) introductory text and (a)(1), and adding paragraph (a)(7) to read as follows:

§ 3.307 Presumptive service connection for chronic, tropical, or prisoner-of-war related disease, disease associated with exposure to certain herbicide agents, or disease associated with exposure to contaminants in the water supply at Camp Lejeune; wartime and service on or after January 1, 1947.

(a) *General.* A chronic, tropical, or prisoner of war related disease, a disease associated with exposure to certain herbicide agents, or a disease associated with exposure to contaminants in the water supply at Camp Lejeune listed in § 3.309 will be considered to have been incurred in or aggravated by service under the circumstances outlined in this section even though there is no evidence of such disease during the period of service. No condition other than one listed in § 3.309(a) will be considered chronic.

(1) *Service.* The veteran must have served 90 days or more during a war period or after December 31, 1946. The requirement of 90 days' service means active, continuous service within or extending into or beyond a war period, or which began before and extended beyond December 31, 1946, or began after that date. Any period of service is sufficient for the purpose of establishing the presumptive service connection of a specified disease under the conditions listed in § 3.309(c) and (e). Any period of service is sufficient for the purpose of establishing the presumptive service connection of a specified disease under the conditions listed in § 3.309(f), as long as the period of service also satisfies the requirements to establish a presumption of exposure to contaminants in the water supply at Camp Lejeune under paragraph (a)(7)(iii) of this section.

* * * * *

(7) *Diseases associated with exposure to contaminants in the water supply at Camp Lejeune.* (i) For the purposes of this section, *contaminants in the water supply* means the volatile organic compounds trichloroethylene (TCE), perchloroethylene (PCE), benzene and vinyl chloride, that were in the on-base water-supply systems located at United States Marine Corps Base Camp Lejeune, during the period beginning on August 1, 1953, and ending on December 31, 1987.

(ii) The diseases listed in § 3.309(f) shall have become manifest to a degree of 10 percent or more at any time after service.

(iii) A veteran, or former reservist or member of the National Guard, who had no less than 30 days (consecutive or nonconsecutive) of service at Camp Lejeune during the period beginning on

August 1, 1953, and ending on December 31, 1987, shall be presumed to have been exposed during such service to the contaminants in the water supply, unless there is affirmative evidence to establish that the individual was not exposed to contaminants in the water supply during that service. The last date on which such a veteran, or former reservist or member of the National Guard, shall be presumed to have been exposed to contaminants in the water supply shall be the last date on which he or she served at Camp Lejeune during the period beginning on August 1, 1953, and ending on December 31, 1987. For purposes of this section, *service at Camp Lejeune* means any service within the borders of the entirety of the United States Marine Corps Base Camp Lejeune and Marine Corps Air Station New River, North Carolina, during the period beginning on August 1, 1953, and ending on December 31, 1987, as established by military orders or other official service department records.

(iv) Exposure described in paragraph (a)(7)(iii) of this section is an injury under 38 U.S.C. 101(24)(B) and (C). If an individual described in paragraph (a)(7)(iii) of this section develops a disease listed in § 3.309(f), VA will presume that the individual concerned became disabled during that service for purposes of establishing that the individual served in the active military, naval, or air service.

* * * * *

■ 3. Add § 3.309(f) to read as follows:

§ 3.309 Disease subject to presumptive service connection.

* * * * *

(f) *Disease associated with exposure to contaminants in the water supply at Camp Lejeune.* If a veteran, or former reservist or member of the National Guard, was exposed to contaminants in the water supply at Camp Lejeune during military service and the exposure meets the requirements of § 3.307(a)(7), the following diseases shall be service-connected even though there is no record of such disease during service, subject to the rebuttable presumption provisions of § 3.307(d).

- (1) Kidney cancer.
- (2) Liver cancer.
- (3) Non-Hodgkin's lymphoma.
- (4) Adult leukemia.
- (5) Multiple myeloma.
- (6) Parkinson's disease.
- (7) Aplastic anemia and other myelodysplastic syndromes.
- (8) Bladder cancer.

[FR Doc. 2017-00499 Filed 1-12-17; 8:45 am]

BILLING CODE 8320-01-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 0 and 1

[FCC 16-171]

Freedom of Information Act Improvement Act Implementation Order

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission amends its rules to update various sections implementing the Freedom of Information Act (FOIA) to reflect changes in the law made by the FOIA Improvement Act of 2016, to making conforming edits to reflect existing Commission FOIA practice, to streamline the Commission's FOIA procedures, and to provide for clerical corrections.

DATES: Effective February 13, 2017.

FOR FURTHER INFORMATION CONTACT: Ryan Yates, 202-418-0886 or TTY: 202-418-0484; Ryan.Yates@fcc.gov.

SUPPLEMENTARY INFORMATION:

1. This is a synopsis of the Federal Communication Commission's Order, FCC 16-171, released on December 15, 2016, amending Parts 0 and 1 of the Commission's rules to update sections implementing the FOIA. The complete text of the document is available on the Commission's Web site at <http://www.fcc.gov> or at https://apps.fcc.gov/edocs_public/attachmatch/FCC-16-171A1.pdf. It is also available for inspection and copying during normal business hours in the FCC Reference Information Center, Portals II, 445 12th Street SW., Room CY-A257, Washington, DC 20554.

2. By this Order, we amend Part 0 of the Commission's rules to update various sections implementing the Freedom of Information Act (FOIA). On June 30, 2016, the President signed into law the FOIA Improvement Act of 2016 (FOIA Improvement Act). The law went into effect July 1, 2016, and requires, inter alia, that agencies review their FOIA regulations and promulgate new rules in accordance with the substantive provisions of the law. These provisions included providing 90 days for requesters to file appeals of FOIA requests, ensuring that requesters are informed of avenues for FOIA dispute resolution, and providing for public posting of materials that are requested multiple times. The Commission has completed review of its FOIA regulations and in this Order adopts

amendments to the rules, thus fulfilling the requirements of section 3(a) of the FOIA Improvement Act.

3. The amendments made by this Order can generally be grouped into two categories. First are rule amendments that are required by or flow directly from changes made by the FOIA Improvement Act. These include regulatory changes specifically mandated by the FOIA Improvement Act, as well as changes that are informed by the FOIA Improvement Act. Second are rule amendments designed to conform the rules to existing Commission FOIA practice, streamline FOIA procedures, and provide for clerical corrections. A number of years have passed since the Commission's FOIA regulations were last updated, and new technology, practices, and procedures have arisen since that time. We update the regulations to reflect the current state of the Commission's FOIA process.

4. The Commission's FOIA implementing rules are presently found at 47 CFR 0.441-0.470. The amended rules are set forth in the Appendix to this Order and are described in more detail below.

5. The following rule changes are either required by the text of the FOIA Improvement Act or are made in response to issues raised in the FOIA Improvement Act.

6. *Section 0.251—Authority Delegated.* Section 0.251 describes the authorities delegated to the General Counsel by the Commission. We add to the rule by delegating to the General Counsel the authority to act as the Chief FOIA Officer. The position of Chief FOIA Officer was created by the Open Government Act of 2007 and expanded upon by the FOIA Improvement Act.

7. *Section 0.441—General.* Section 0.441 sets forth general information related to the Commission's FOIA practice. We make two changes to this section that are required by the FOIA Improvement Act. First, we include a notice that FOIA requesters may seek the assistance of the FOIA Public Liaison or the Office of Government Information Services to assist in resolving disputes, along with the procedure for engaging such assistance. These changes are specifically required by the FOIA Improvement Act. Second, in light of the FOIA Improvement Act's emphasis on the duties of the Chief FOIA Officer, including new responsibilities to offer training to agency staff and to serve as the liaison with the National Archives and Records Administration's Office of Government Information Services and the Department of Justice's Office of

Information Policy, we clarify that the General Counsel serves as the Commission's Chief FOIA Officer and may exercise the responsibilities assigned to that position in the FOIA statute.

8. *Section 0.445—Publication, availability, and use of opinions, orders, policy statements, interpretations, administrative manuals, staff instructions, and frequently requested records.* Section 0.445 instructs the public how to access certain publicly available documents. This rule implements various statutory requirements concerning the public availability of these documents. We amend the rule to make electronically available records that have been or are likely to be the subject of multiple FOIA requests, pursuant to the FOIA Improvement Act.

9. *Section 0.457—Records not routinely available for public inspection.* Section 0.457 addresses some of the types of records that are routinely withheld from public inspection. We change the introductory paragraph to the section to articulate the reasonably foreseeable harm standard codified in the FOIA Improvement Act. We also amend section 0.457(e) to reflect changes brought about by the FOIA Improvement Act eliminating the deliberative process privilege of FOIA Exemption 5 for records more than 25 years old.

10. *Section 0.461—Requests for inspection of materials not routinely available for public inspection.* Section 0.461 sets forth the rules for filing requests to view records that are not routinely available to the public. These rules govern the majority of requests under the FOIA. We extend the amount of time for requesters to file FOIA appeals (called applications for review under Commission practice) from 30 days to 90 days, consistent with the requirements of the FOIA Improvement Act. We will also make a conforming edit to section 1.115(d) of our rules.

11. *Section 0.470—Assessment of fees.* Section 0.470 sets out the three fee categories of FOIA requests and the rules regarding fee waivers. Consistent with the FOIA Improvement Act, we make modifications to make clear that the agency may not charge otherwise applicable search and duplication fees when it fails to meet the notice requirements and time limits under the FOIA, unless more than 5,000 pages are necessary to respond to a single request or exceptional circumstances apply.

12. The following rule changes are not specifically required by the FOIA Improvement Act. Instead, we adopt these rule changes to conform the rules

to existing Commission FOIA practice, streamline FOIA procedures, and provide for clerical corrections.

13. *Section 0.251—Authority Delegated.* Section 0.251 describes the authorities delegated to the General Counsel by the Commission. We grant to the General Counsel the authority to dismiss FOIA applications for review that are untimely, repetitious, or fail to articulate specific grounds for review. By giving the General Counsel this authority, procedurally defective requests can be dealt with efficiently and expeditiously without compromising substantive appeal rights, consistent with other regulations.

14. *Section 0.441—General.* Section 0.441 sets forth general information related to the Commission's FOIA practice. We make two clerical changes to this rule. First, we amend this section to remove facsimile as a method of contacting the Commission regarding FOIA requests. Second, we remove a reference to the Commission's copy contractor, as the Commission no longer employs a copy contractor.

15. *Section 0.442—Disclosure to other Federal government agencies of information submitted to the Commission in confidence.* Section 0.442 applies to the sharing of confidential third-party information with other Federal agencies. We make no changes to this section.

16. *Section 0.445—Publication, availability, and use of opinions, orders, policy statements, interpretations, administrative manuals, staff instructions, and frequently requested records.* Section 0.445 instructs the public how to access certain publicly available documents. This rule implements various statutory requirements concerning the public availability of these documents. To reflect current Commission practice, we eliminate a reference to records being held by the Office of Media Relations. We also include a reference to the availability of records on the Electronic Document Management System (EDOCS) and through the Commission's Web site. Lastly, we remove a reference to the Commission's copy contractor, as the Commission no longer employs a copy contractor.

17. *Section 0.451—Inspection of records: Generally.* Section 0.451 provides an introduction to the broad category of records that are or are not available to the public, along with specifying where in the rules the procedures for requesting those records can be found. We modify section 0.451(b)(4) (previously numbered section 0.451(b)(5)) to reflect current Commission practice, which permits the

release of certain non-internal documents without requiring the filing of a FOIA request. This will facilitate the bureaus' and offices' sharing of non-internal documents without the need for a formal FOIA request. We also amend the rules to simplify the language used and consolidate related subsections.

18. *Section 0.453—Public reference rooms.* Section 0.453 currently provides a listing of records routinely available in the Commission's public reference room. It derives from a time that various bureaus and offices of the Commission had individual reference rooms containing paper records for public access. These locations no longer exist, having been supplanted by one central Reference Information Center and the Commission's Web site. We amend the rule to add references to the resources available on the Commission's Web site. It is often simpler and more efficient for members of the public to access this information on the Commission's Web site rather than traveling to the Commission to inspect the records in person. Also, we delete the list of types of documents available in the reference room, and instead provide that a regularly updated list of records will be posted to the Commission's electronic reading room. Using an online list, as opposed to a list set forth in the Code of Federal Regulations, will give staff more flexibility to add to the list of routinely available records, consistent with the FOIA Improvement Act's emphasis on proactive release of records. It will also ensure that the posted list accurately reflects the current routinely available records. Lastly, we include additional information about the types of records available through the Commission's Electronic Comment Filing System (ECFS).

19. *Section 0.455—Other locations at which records may be inspected.* Section 0.455 listed the various bureaus and offices of the Commission at which certain other types of records could be inspected. We delete this section in its entirety. As with section 0.453, we conclude it is more efficient to specify these records on a regularly updated online list rather than on a list in the Code of Federal Regulations.

20. *Section 0.457—Records not routinely available for public inspection.* Section 0.457 articulates some of the types of records that are routinely withheld from public inspection. We update section 0.457(b)(2) in conformance with the Supreme Court's holding in *Milner v. Department of the Navy*, reading the plain language of FOIA Exemption 2. Consistent with existing Commission

practice, we remove several outdated or inapplicable references to types of records that are generally withheld. We add a reference to withholding of some copyrighted materials, in accordance with Department of Justice guidance. Also, we make several minor clerical changes to the rules.

21. *Section 0.458—Nonpublic information.* Section 0.458 contains the rules for persons who come into possession of nonpublic information as the result of an inadvertent or unauthorized release. We make no changes to this section.

22. *Section 0.459—Requests that materials or information submitted to the Commission be withheld from public inspection.* Section 0.459 applies to third-party requests for confidential treatment of information given to the Commission. We make no changes to this section.

23. *Section 0.460—Requests for inspection of records which are routinely available to the public.* Section 0.460 provides the rules for access to records which are routinely already available to the public. We streamline the process for requesting such records by removing the requirement that initial requests be specifically labeled and include the requester's mailing address, phone number, and email address in order to be considered valid. Instead, we provide that Commission staff may contact the requester if this information becomes necessary. We replace references to the copy contractor and instead direct parties to the Commission's Reference Information Center. We delete section 0.460(i), which provided that records inspected in person be available for seven days. Given the limited number of persons who seek to inspect records in person, this limitation is unnecessary. We also make several minor clerical changes to improve accuracy and readability.

24. *Section 0.461—Requests for inspection of materials not routinely available for public inspection.* Section 0.461 sets forth the rules for filing requests to view records that are not routinely available to the public. These rules govern the majority of requests under the FOIA. Consistent with section 0.460, we remove the requirement that requests be specifically labeled and include the requester's mailing address, phone number, and email address in order to be considered valid.

25. We also amend subsection (d)(1) to remove the use of facsimile or email to file FOIA requests; instead, requesters are directed to submit their requests either via the postal mail or through the Commission's FOIAonline portal. In section 0.461(d)(2), we clarify that the

responsibility to sign FOIA response letters may be delegated to staff of the bureau or office that is the custodian of the records. We amend the provisions of section 0.461(e)(1) concerning date stamping of incoming initial requests to reflect the current procedure as implemented through FOIAonline. In section 0.461(e)(2)(i)(B)(1), we modify the situations in which the processing time may be tolled pending the outcome of a fee matter, explicitly providing that the time for processing a FOIA request will be tolled in cases where the amount of fees authorized is less than the estimated cost for completing the production. This is consistent with existing practice. We update section 0.461(e)(3) to reflect the new methods for FOIA requesters to check on the status of their requests. We also provide for consultation with other agencies regarding records in which other agencies have equities in the Commission's decision concerning the disposition of a FOIA request for those records.

26. In section 0.461(f)(4)–(5), we update the language regarding the use of discretionary authority and segregation of records, to conform it to existing Commission practice. We modify section 0.461(g)(2) to clarify how records will be provided if a requester is unwilling to provide for an extension of time necessary to complete the production. Similar to our rules for FOIA fee waivers and confidentiality requests, in section 0.461(h)(2), we note that merely claiming that a request should be expedited is insufficient to warrant consideration. We also delete section 0.461(n), which provided that records inspected in person be available for only seven days. Given the limited number of persons who seek to inspect records in person, this limitation is unnecessary.

27. We also make modifications to our FOIA appeals rules in section 0.461(i)–(j). Consistent with section 1.7 of the Commission's rules, appeals are considered filed upon receipt. We also note the availability of the *FOIA-Appeal@fcc.gov* email inbox. Lastly, we take additional steps to limit repetitious or deficient FOIA appeals. Petitions for reconsideration will not be entertained after full Commission decisions on FOIA Applications for Review. Such an approach is more consistent with review process in the FOIA, beginning with an initial agency decision, followed by review of that decision by the head of the agency, and finally appeal to the district court.

28. *Section 0.463—Disclosure of Commission records and information in legal proceedings in which the*

Commission is a non-party. Section 0.463 covers the Commission's procedures for responding to *Touhy* requests. We make no changes to this section.

29. *Section 0.465—Request for copies of materials which are available, or made available, for public inspection.* Section 0.465 specifies the rules for obtaining physical copies of documents. As the Commission does not currently employ a copy contractor, we replace references to the copy contractor and instead direct requesters to the Reference Information Center. We update the types of other media referred to in section 0.465(c)(2) to reflect current technology. We also make other minor adjustments to the language of the section to improve accuracy and readability.

30. *Section 0.466—Definitions.* We make no changes to section 0.466, which sets forth definitions applicable to sections 0.467–0.468.

31. *Section 0.467—Search and review fees.* Section 0.467 explains what types of fees a requester might be charged in responding to a FOIA request. We delete section 0.467(h), which provided that records inspected in person be available for seven days, and additional fees may be charged if the records are requested again after that seven day period. Given the limited number of persons who seek to inspect records in person, this rule is unnecessary.

32. *Section 0.468—Interest.* Section 0.468 specifies how interest will be calculated for unpaid FOIA fees. We make no changes to this section.

33. *Section 0.469—Advance payments.* Section 0.469 states the circumstances where the Commission may require advance payment of estimated fees. We make no changes to this section.

34. *Section 0.470—Assessment of fees.* Section 0.470 sets out the three fee categories of FOIA requests and the rules regarding fee waivers. We make minor clerical changes to sections 0.470(a)–(b), ensuring consistent use of the term “duplication” or “duplicating,” the terms used in the FOIA. In section 0.470(c), we remove a requirement that FOIA requesters include an explanation and certification when requesting a fee status other than commercial. As a matter of practice, the Commission does not require this. If not evident from the face of the request, staff may require the requester to provide additional information regarding his or her fee status. We delete the last sentence from section 0.470(d), as it only pertains to in person inspection of records, which, as noted above, is uncommon. Lastly, to improve

consistency with the FOIA and in line with current Commission practice, we modify section 0.470(f) to provide that fees will not be charged if the cost of collecting and processing the fees are greater than the actual amount of fees to be recovered.

35. We have determined that the changes we adopt here are general statements of policy, interpretive rules, or rules of agency organization, procedure, or practice, and are therefore exempt from the notice and comment requirements of the Administrative Procedure Act.

36. Section 603 of the Regulatory Flexibility Act, as amended, requires a regulatory flexibility analysis in notice and comment rulemaking proceedings. As we are adopting these rules without notice and comment, no regulatory flexibility analysis is required. This document does not contain any new proposed information collection(s) subject to the Paperwork Reduction Act of 1995. In addition, therefore, it does not contain any new or modified "information collection burden for small business concerns with fewer than 25 employees," pursuant to the Small Business Paperwork Relief Act of 2002. The Commission will not send a copy of this Order pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A), because the adopted rules are rules of agency organization, procedure, or practice that do not "substantially affect the rights or obligations of non-agency parties."

List of Subjects

47 CFR Part 0

Classified information, Freedom of information, Government publications, Organization and functions (Government agencies), Privacy, Reporting and recordkeeping requirements.

47 CFR Part 1

Administrative practice and procedure, Government employees, Lawyers.

Federal Communications Commission.

Katura Howard,

Federal Register Liaison Officer, Office of the Secretary.

Final Rules

For the reasons discussed in the preamble, the Federal Communications amends 47 CFR parts 0 and 1 as follows:

PART 0—COMMISSION ORGANIZATION

■ 1. The authority citation for part 0 continues to read as follows:

Authority: Sec. 5, 48 Stat. 1068, as amended; 47 U.S.C. 155, 225, unless otherwise noted.

■ 2. Amend § 0.251 by adding paragraph (j) to read as follows:

§ 0.251 Authority delegated.

* * * * *

(j) The General Counsel is delegated authority to act as the Commission's Chief FOIA Officer, as specified in 5 U.S.C. 552(j). In this role, the General Counsel is delegated authority to dismiss FOIA applications for review that are untimely, repetitious, or fail to articulate specific grounds for review.

* * * * *

■ 3. Revise § 0.441 to read as follows:

§ 0.441 General.

(a) Any person desiring to obtain information from the Commission may do so by contacting the Consumer and Governmental Affairs Bureau (CGB). Requests for information and general inquiries may be submitted by:

(1) Internet at <http://www.fcc.gov/consumer-governmental-affairs> or <http://www.fcc.gov/foia>.

(2) Telephone at 1-888-CALL-FCC (1-888-225-5322).

(3) TDD/TDY at 1-888-TELL-FCC (1-888-835-5322).

(4) Correspondence to: Consumer and Governmental Affairs Bureau, 445 12th Street SW., Washington, DC 20554.

(5) Visiting the Reference Information Center of the Consumer and Governmental Affairs Bureau at Room CY-A257 of the Commission's main office at 445 12th Street SW., Washington, DC 20554.

(b) The Commission's FOIA Public Liaison is available to assist any person requesting information from the Commission in resolving any concerns related to a Freedom of Information Act request. Requesters may contact the FOIA Public Liaison to seek assistance on resolving disputes related to FOIA requests. See <http://www.fcc.gov/foia/>.

(c) The Office of Government Information Services is available to provide mediation services to help resolve disputes between FOIA requesters and Federal agencies. FOIA requesters may contact the Office of Government Information Services directly to seek its assistance. See <http://ogis.archives.gov/>.

(d) The General Counsel shall, subject to the authority of the Chairman, exercise the responsibilities of the Chief FOIA Officer specified in 5 U.S.C. 552(j).

■ 4. Revise § 0.445 to read as follows:

§ 0.445 Publication, availability, and use of opinions, orders, policy statements, interpretations, administrative manuals, staff instructions, and frequently requested records.

(a) Adjudicatory opinions and orders of the Commission, or its staff acting on delegated authority, are mailed or delivered by electronic means to the parties, and as part of the record, are available for inspection in accordance with § 0.453.

(b) Documents adopted by the Commission or a member of its staff on delegated authority and released through the Office of Media Relations are published in the FCC Record. Older materials of this nature are available in the FCC Reports. In the event that such older materials are not published in the FCC Reports, reference should be made to the **Federal Register** or Pike and Fischer Communications Regulation.

(c) All rulemaking documents or summaries thereof are published in the **Federal Register** and are available on the Commission's Web site. The complete text of the Commission decision also is released by the Commission and is available for inspection and copying during normal business hours in the Reference Information Center, via the Electronic Document Management System (EDOCS), or as otherwise specified in the rulemaking document published in the **Federal Register**.

(d) Formal policy statements and interpretations designed to have general applicability are published on the Commission's Web site and in the **Federal Register**, the FCC Record, FCC Reports, or Pike and Fischer Communications Regulation. Commission decisions and other Commission documents not entitled formal policy statements or interpretations may contain substantive interpretations and statements regarding policy, and these are published as part of the document in the FCC Record, FCC Reports or Pike and Fischer Communications Regulation. General statements regarding policy and interpretations furnished to individuals, in correspondence or otherwise, are not ordinarily published.

(e) Copies of all records that have been released to any person under § 0.461 and that because of the nature of their subject matter, the Commission determines have become or are likely to become the subject of subsequent requests for substantially the same records, or that have been requested three or more times, are made available in electronic format.

(f) If the documents described in paragraphs (a) through (d) of this section are published in the **Federal Register**, the FCC Record, FCC Reports, or Pike and Fischer Communications Regulation, they are indexed, and they may be relied upon, used or cited as precedent by the Commission or private parties in any manner. If they are not so published, they may not be relied upon, used or cited as precedent, except against persons who have actual notice of the document in question or by such persons against the Commission. No person is expected to comply with any requirement or policy of the Commission unless he or she has actual notice of that requirement or policy or a document stating it has been published as provided in this paragraph. Nothing in this paragraph, however, shall be construed as precluding a reference to a recent document that is pending publication.

(g) Subparts A and B of this part describe the functions of the staff and list the matters on which authority has been delegated to the staff. All general instructions to the staff and limitations upon its authority are set forth in those subparts or in decisions of the Commission published in the **Federal Register**. Instructions to the staff in particular matters or cases are privileged and/or protected and are not published or made available for public inspection.

(h) To the extent required to prevent a clearly unwarranted invasion of personal privacy, or to prevent disclosure of information required or authorized to be withheld by another statute, the Commission may delete identifying details or confidential information when it makes available or publishes any document described in this section. The justification for any such deletion will be fully explained in a preamble to the document.

■ 5. Revise § 0.451 to read as follows:

§ 0.451 Inspection of records: Generally.

(a) *Records which are routinely available for public inspection.* Section 0.453 specifies those Commission records which are routinely available for public inspection and where those records may be inspected. Procedures governing requests for inspection of such records are set out in § 0.460.

(b) *Records which are not routinely available for public inspection.* Records which are not specified in § 0.453 are not routinely available for public inspection. Such records fall into three categories.

(1) The first category consists of categories of records listed in § 0.457, and of particular records withheld from public inspection under § 0.459. The

Commission has determined that there is a statutory basis for withholding these records from public inspection. In some cases, the Commission is prohibited from permitting the inspection of records. This category also includes records that are the property of another agency that the Commission has no authority to release for inspection. In still other cases, the Commission is authorized, for reason of policy, to withhold records from inspection, but is not required to do so. As applicable, procedures governing demands by competent authority for inspection of these records are set forth in § 0.463.

(2) The second category consists of records that are not specified in § 0.453 or § 0.457 and have not been withheld from inspection under § 0.459. In some cases, these records have not been identified for listing. In other cases an individualized determination is required. Procedures governing requests for inspection of these records are set forth in § 0.461. Procedures governing demands by competent authority for inspection of these records are set forth in § 0.463.

(3) The third category consists of material previously released consistent with the agency's rules that the agency determines is not likely to become the subject of a subsequent FOIA request or otherwise likely to be of broader public interest.

(4) Except as provided in § 0.461 and § 0.463, or pursuant to § 19.735–203 of this chapter, no officer or employee of the Commission shall permit the inspection of records which are not routinely available for public inspection under § 0.453, or disclose information contained therein. This provision does not restrict the inspection or disclosure of records described in § 0.453(b)(3).

(c) *Copies.* Section 0.465 applies to requests for copies of Commission records which are routinely available for public inspection under § 0.453 and those which are made available for inspection under § 0.461. Sections 0.467 and 0.465(c)(3) apply to requests for certified copies of Commission records.

(d) *Search and copying fees.* Section 0.465(c)(2) prescribes the per page fee for copying records made available for inspection under § 0.460 or § 0.461. Section 0.466 prescribes fees to cover the expense of searching for and reviewing records made available for inspection under § 0.460 or § 0.461. Review of initial fee determinations under § 0.467 through § 0.470 and initial fee reduction or waiver determinations under § 0.470(e) may be sought under § 0.461(j).

■ 6. Revise § 0.453 to read as follows:

§ 0.453 Public reference rooms.

The Commission's main Web site at <http://www.fcc.gov> and its electronic reading room at <http://www.fcc.gov/general/freedom-information-act-electronic-reading-room> host the Commission's online public reference room. The Commission also maintains the FCC Reference Information Center as its public reference room at its offices in Washington, DC.

(a) The Reference Information Center maintains files containing the record of all docketed cases, petitions for rule making and related papers. A file is maintained for each docketed hearing case and for each docketed rule making proceeding. Cards summarizing the history of such cases for the years before 1984 are available for inspection. Information summarizing the history of such cases for the years from 1984 through present is available online on the Electronic Comment Filing System (ECFS). ECFS serves as the repository for official filings in the FCC's docketed proceedings from 1992 to the present. The public can use ECFS to retrieve any document in the system, including selected pre-1992 documents.

(b) The Commission will maintain a regularly updated listing of other routinely available records in its electronic reading room at <http://www.fcc.gov/general/freedom-information-act-electronic-reading-room>.

§ 0.455 [Removed]

■ 7. Remove § 0.455.

■ 8. Revise § 0.457 to read as follows:

§ 0.457 Records not routinely available for public inspection.

The records listed in this section are not routinely available for public inspection pursuant to 5 U.S.C. 552(b). The records are listed in this section by category, according to the statutory basis for withholding those records from inspection; under each category, if appropriate, the underlying policy considerations affecting the withholding and disclosure of records in that category are briefly outlined. The Commission will entertain requests from members of the public under § 0.461 for permission to inspect particular records withheld from inspection under the provisions of this section, and will weigh the policy considerations favoring non-disclosure against the reasons cited for permitting inspection in the light of the facts of the particular case. In making such requests, there may be more than one basis for withholding particular records from inspection. The Commission will permit inspection of records unless

Commission staff reasonably foresees that disclosure would harm an interest protected by the exemptions described in 5 U.S.C. 552(b) or where disclosure is prohibited by law. The listing of records by category is not intended to imply the contrary but is solely for the information and assistance of persons making such requests. Requests to inspect or copy the transcripts, recordings or minutes of closed agency meetings will be considered under § 0.607 rather than under the provisions of this section.

(a) Materials that are specifically authorized under criteria established by Executive Order (E.O.) to be kept secret in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive Order, 5 U.S.C. 552(b)(1).

(1) Classified materials and information will not be made available for public inspection, including materials classified under E.O. 10450, "Security Requirements for Government Employees"; E.O. 10501, as amended, "Safeguarding Official Information in the Interests of the Defense of the United States"; and E.O. 13526, "Classified National Security Information," or any other executive order concerning the classification of records. *See also* 47 U.S.C. 154(j).

(2) Materials referred to another Federal agency for classification will not be disclosed while such a determination is pending.

(b) Materials that are related solely to the internal personnel rules and practices of the Commission, 5 U.S.C. 552(b)(2).

(c) Materials that are specifically exempted from disclosure by statute (other than the Government in the Sunshine Act, 5 U.S.C. 552b, provided that such statute either requires that the materials be withheld from the public in such a manner as to leave no discretion on the issue, or establishes particular criteria for withholding or refers to particular types of materials to be withheld), 5 U.S.C. 552(b)(3). The Commission is authorized under the following statutory provisions to withhold materials from public inspection.

(1) Section 4(j) of the Communications Act, 47 U.S.C. 154(j), provides, in part, that, "The Commission is authorized to withhold publication of records or proceedings containing secret information affecting the national defense." Pursuant to that provision, it has been determined that the following materials should be withheld from public inspection (*see also* paragraph (a) of this section):

(i) Maps showing the exact location of submarine cables.

(ii) Minutes of Commission actions on classified matters.

(iii) Maps of nation-wide point-to-point microwave networks.

(2) Under section 213 of the Communications Act, 47 U.S.C. 213(f), the Commission is authorized to order, with the reasons therefor, that records and data pertaining to the valuation of the property of common carriers and furnished to the Commission by the carriers pursuant to the provisions of that section, shall not be available for public inspection. If such an order has been issued, the data and records will be withheld from public inspection, except under the provisions of § 0.461. Normally, however, such data and information is available for inspection.

(3) Under section 412 of the Communications Act, 47 U.S.C. 412, the Commission may withhold from public inspection certain contracts, agreements and arrangements between common carriers relating to foreign wire or radio communication. Any person may file a petition requesting that such materials be withheld from public inspection. To support such action, the petition must show that the contract, agreement or arrangement relates to foreign wire or radio communications; that its publication would place American communication companies at a disadvantage in meeting the competition of foreign communication companies; and that the public interest would be served by keeping its terms confidential. If the Commission orders that such materials be kept confidential, they will be made available for inspection only under the provisions of § 0.461.

(4) Section 605 of the Communications Act, 47 U.S.C. 605(a), provides, in part, that, "no person not being authorized by the sender shall intercept any communication [by wire or radio] and divulge or publish the existence, contents, substance, purport, effect, or meaning of such intercepted communications to any person." In executing its responsibilities, the Commission regularly monitors radio transmissions. Except as required for the enforcement of the communications laws, treaties and the provisions of this chapter, or as authorized in sec. 605, the Commission is prohibited from divulging information obtained in the course of these monitoring activities; and such information, and materials relating thereto, will not be made available for public inspection.

(5) The Trade Secrets Act, 18 U.S.C. 1905, prohibits the unauthorized disclosure of certain confidential

information. *See* paragraph (d) of this section and § 19.735–203 of this chapter.

(d) *Trade secrets and commercial or financial information obtained from any person and privileged or confidential—categories of materials not routinely available for public inspection*, 5 U.S.C. 552(b)(4) and 18 U.S.C. 1905. (1) The materials listed in this paragraph have been accepted, or are being accepted, by the Commission on a confidential basis pursuant to 5 U.S.C. 552(b)(4). To the extent indicated in each case, the materials are not routinely available for public inspection. If the protection afforded is sufficient, it is unnecessary for persons submitting such materials to submit therewith a request for non-disclosure pursuant to § 0.459. A persuasive showing as to the reasons for inspection will be required in requests submitted under § 0.461 for inspection of such materials.

(i) Financial reports submitted by radio or television licensees.

(ii) Applications for equipment authorizations (type acceptance, type approval, certification, or advance approval of subscription television systems), and materials relating to such applications, are not routinely available for public inspection prior to the effective date of the authorization. The effective date of the authorization will, upon request, be deferred to a date no earlier than that specified by the applicant. Following the effective date of the authorization, the application and related materials (including technical specifications and test measurements) will be made available for inspection upon request (*see* § 0.460). Portions of applications for equipment certification of scanning receivers and related materials will not be made available for inspection.

(iii) Information submitted in connection with audits, investigations and examination of records pursuant to 47 U.S.C. 220.

(iv) Programming contracts between programmers and multichannel video programming distributors.

(v) The rates, terms and conditions in any agreement between a U.S. carrier and a foreign carrier that govern the settlement of U.S.-international traffic, including the method for allocating return traffic, except as otherwise specified by the Commission by order or by the International Bureau under delegated authority. *See, e.g., International Settlements Policy Reform*, IB Docket Nos. 11–80, 05–254, 09–10, RM–11322, Report and Order, FCC 12–145 (rel. Nov. 29, 2012).

(vi) Outage reports filed under part 4 of this chapter.

(vii) The following records, relating to coordination of satellite systems pursuant to procedures codified in the International Telecommunication Union (ITU) Radio Regulations:

(A) Records of communications between the Commission and the ITU related to the international coordination process, and

(B) Documents prepared in connection with coordination, notification, and recording of frequency assignments and Plan modifications, including but not limited to minutes of meetings, supporting exhibits, supporting correspondence, and documents and correspondence prepared in connection with operator-to-operator arrangements.

(viii) Information submitted with a 911 reliability certification pursuant to 47 CFR 12.4 that consists of descriptions and documentation of alternative measures to mitigate the risks of nonconformance with certification elements, information detailing specific corrective actions taken with respect to certification elements, or supplemental information requested by the Commission with respect to such certification.

(ix) Confidential Broadcaster Information, as defined in § 1.2206(d) of this chapter, submitted by a broadcast television licensee in a broadcast television spectrum reverse auction conducted under section 6403 of the Middle Class Tax Relief and Job Creation Act of 2012 (Pub. L. 112–96) (the “Spectrum Act”), or in the application to participate in such a reverse auction, is not routinely available for public inspection until the reassignments and reallocations under section 6403(b)(1)(B) of the Spectrum Act become effective or until two years after public notice that the reverse auction is complete and that no such reassignments and reallocations shall become effective. In the event that reassignments and reallocations under section 6403(b)(1)(B) of the Spectrum Act become effective, Confidential Broadcaster Information pertaining to any unsuccessful reverse auction bid or pertaining to any unsuccessful application to participate in such a reverse auction will not be routinely available for public inspection until two years after the effective date.

(x) Copyrighted materials the release of which would have a substantial adverse effect on the copyright holder’s potential market, except to the extent such a release can be considered fair use.

Note to paragraph (d)(1): The content of the communications described in paragraph

(d)(1)(vii)(A) of this section is in some circumstances separately available through the ITU’s publication process, or through records available in connection with the Commission’s licensing procedures.

(2) Unless the materials to be submitted are listed in paragraph (d)(1) of this section and the protection thereby afforded is adequate, any person who submits materials which he or she wishes withheld from public inspection under 5 U.S.C. 552(b)(4) must submit a request for non-disclosure pursuant to § 0.459. If it is shown in the request that the materials contain trade secrets or privileged or confidential commercial, financial or technical data, the materials will not be made routinely available for inspection; and a persuasive showing as to the reasons for inspection will be required in requests for inspection submitted under § 0.461. In the absence of a request for non-disclosure, the Commission may, in the unusual instance, determine on its own motion that the materials should not be routinely available for public inspection.

(e) *Interagency and intra-agency memoranda or letters, 5 U.S.C. 552(b)(5).* Interagency and intra-agency memoranda or letters and the work papers of members of the Commission or its staff will not be made available for public inspection, except in accordance with the procedures set forth in § 0.461. Normally such papers are privileged and not available to private parties through the discovery process, because their disclosure would tend to restrain the commitment of ideas to writing, would tend to inhibit communication among Government personnel, and would, in some cases, involve premature disclosure of their contents. The Commission will not use this deliberative process exemption to withhold records created 25 years or more before the date on which the request was received.

(f) *Personnel, medical and other files whose disclosure would constitute a clearly unwarranted invasion of personal privacy, 5 U.S.C. 552(b)(6).* Under E.O. 12107, the Commission maintains an Official Personnel Folder for each of its employees. Such folders are under the jurisdiction and control, and are a part of the records, of the U.S. Office of Personnel Management. Except as provided in the rules of the Office of Personnel Management (5 CFR 293.311), such folders will not be made available for public inspection by the Commission. In addition, other records of the Commission containing private, personal or financial information will be withheld from public inspection.

(g) *Under 5 U.S.C. 552(b)(7), records compiled for law enforcement purposes, to the extent that production of such records:*

(1) Could reasonably be expected to interfere with enforcement proceedings;

(2) Would deprive a person of a right to fair trial or an impartial adjudication;

(3) Could reasonably be expected to constitute an unwarranted invasion of personal privacy;

(4) Could reasonably be expected to disclose the identity of a confidential source;

(5) Would disclose investigative techniques or procedures or would disclose investigative guidelines if such disclosure could reasonably be expected to risk circumvention of the law; or

(6) Could reasonably be expected to endanger the life or physical safety of any individual.

■ 9. Revise § 0.460 to read as follows:

§ 0.460 Requests for inspection of records which are routinely available for public inspection.

(a) Section 0.453 specifies those Commission records which are routinely available for public inspection and the places at which those records may be inspected. Subject to the limitations set out in this section, a person who wants to inspect such records need only appear at the Reference Information Center and ask to see the records. Many records also are available on the Commission’s Web site, <http://www.fcc.gov> and the Commission’s electronic reading room, <http://www.fcc.gov/general/freedom-information-act-electronic-reading-room>. Commission documents are generally published in the FCC Record, and many of these documents or summaries thereof are also published in the **Federal Register**.

(b) A person who wishes to inspect the records must appear at the specified location during the office hours of the Commission and must inspect the records at that location. (Procedures governing requests for copies are set out in § 0.465.) However, arrangements may be made in advance, by telephone or by correspondence, to make the records available for inspection on a particular date, and there are many circumstances in which such advance arrangements will save inconvenience. If the request is for a large number of documents, for example, a delay in collecting them is predictable. Current records may be in use by the staff when the request is made. Older records may have been forwarded to another location for storage.

(c) The records in question must be reasonably described by the person

requesting them to permit their location by staff personnel. The information needed to locate the records will vary, depending on the records requested. Advice concerning the kind of information needed to locate particular records will be furnished in advance upon request. Members of the public will not be given access to the area in which records are kept and will not be permitted to search the files.

(d) If it appears that there will be an appreciable delay in locating or producing the records (as where a large number of documents is the subject of a single request or where an extended search for a document appears to be necessary), the requester may be directed to submit or confirm the request in writing in appropriate circumstances.

(e)(1) Written requests for records routinely available for public inspection under § 0.453 shall be directed to the Commission's Reference Information Center pursuant to the procedures set forth in § 0.465. Requests shall set out all information known to the person making the request which would be helpful in identifying and locating the document, including the date range of the records sought, if applicable. Upon request by Commission staff, the requester shall provide his or her street address, phone number (if any), and email address (if any). Written requests shall, in addition, specify the maximum search fee the person making the request is prepared to pay (*see* § 0.467).

(2) Written requests shall be delivered or mailed directly to the Commission's Reference Information Center (*see* § 0.465(a)).

(f) When a written request is received by the Reference Information Center, it will be date-stamped.

(g) All requests limited to records listed in § 0.453 will be granted, subject to paragraph (j) of this section.

(h) The records will be produced for inspection at the earliest possible time.

(i) Records shall be inspected within 7 days after notice is given that they have been located and are available for inspection. After that period, they will be returned to storage and additional charges may be imposed for again producing them.

(j) In addition to the other requirements of this section, the following provisions apply to the reports filed with the Commission pursuant to 5 CFR parts 2634 and 3902.

(1) Such reports shall not be obtained or used:

- (i) For any unlawful purpose;
- (ii) For any commercial purpose, other than by news and

communications media for dissemination to the general public;

(iii) For determining or establishing the credit rating of any individual; or

(iv) For use, directly or indirectly, in the solicitation of money for any political, charitable, or other purpose.

(2) Such reports may not be made available to any person nor may any copy thereof be provided to any person except upon a written application by such person stating:

(i) That person's name, occupation and address;

(ii) The name and address of any other person or organization on whose behalf the inspection or copying is requested; and

(iii) That such person is aware of the prohibitions on the obtaining or use of the report. Further, any such application for inspection shall be made available to the public throughout the period during which the report itself is made available to the public.

■ 10. Revise § 0.461 to read as follows:

§ 0.461 Requests for inspection of materials not routinely available for public inspection.

Any person desiring to inspect Commission records that are not specified in § 0.453 shall file a request for inspection meeting the requirements of this section. The FOIA Public Liaison is available to assist persons seeking records under this section. *See* § 0.441(a).

(a)(1) Records include:

(i) Any information that would be an agency record subject to the requirements of the Freedom of Information Act when maintained by the Commission in any format, including an electronic format; and

(ii) Any information maintained for the Commission by an entity under Government contract.

(2) The records in question must be reasonably described by the person requesting them to permit personnel to locate them with a reasonable amount of effort. Whenever possible, a request should include specific information about each record sought, such as the title or name, author, recipient, and subject matter of the record. Requests must also specify the date or time period for the records sought. The custodian of records sought may contact the requester to obtain further information about the records sought to assist in locating them.

(3) The person requesting records under this section may specify the form or format of the records to be produced provided that the records may be made readily reproducible in the requested form or format.

(b)(1) Requests shall reasonably describe, for each document requested (*see* § 0.461(a)(1)), all information known to the person making the request that would be helpful in identifying and locating the document, including the date range of the records sought, if applicable, and the persons/offices to be searched, if known. Upon request by Commission staff, the requester shall provide his or her street address, phone number (if any), and email address (if any).

(2) The request shall, in addition, specify the maximum search fee the person making the request is prepared to pay or a request for waiver or reduction of fees if the requester is eligible (*see* § 0.470(e)). By filing a FOIA request, the requester agrees to pay all applicable fees charged under § 0.467, unless the person making the request seeks a waiver of fees (*see* § 0.470(e)), in which case the Commission will rule on the waiver request before proceeding with the search.

(c) If the records are of the kinds listed in § 0.457 or if they have been withheld from inspection under § 0.459, the request shall, in addition, contain a statement of the reasons for inspection and the facts in support thereof. In the case of other materials, no such statement need accompany the request, but the custodian of the records may require the submission of such a statement if he or she determines that the materials in question may lawfully be withheld from inspection.

(d)(1) Requests shall be

(i) Filed electronically through the Internet at <http://foiaonline.regulations.gov/>; or

(ii) Delivered or mailed to the Managing Director, Attn: FOIA Request, FCC, 445 12th Street SW., Room 1–A836, Washington, DC 20554.

(2) For purposes of this section, the custodian of the records is the Chief of the Bureau or Office where the records are located. The Chief of the Bureau or Office may designate an appropriate person to act on a FOIA request. The Chief of the Bureau or Office may also designate an appropriate person to sign the response to any FOIA request. *See* § 0.461(m).

(3) If the request is for materials submitted to the Commission by third parties and not open to routine public inspection under § 0.457(d), § 0.459, or another Commission rule or order, or if a request for confidentiality is pending pursuant to § 0.459, or if the custodian of records has reason to believe that the information may contain confidential commercial information, one copy of the request will be provided by the custodian of the records (*see* paragraph

(e) of this section) to the person who originally submitted the materials to the Commission. If there are many persons who originally submitted the records and are entitled to notice under this paragraph, the custodian of records may use a public notice to notify the submitters of the request for inspection. The submitter or submitters will be given ten calendar days to respond to the FOIA request. See § 0.459(d)(1). If a submitter has any objection to disclosure, he or she is required to submit a detailed written statement specifying all grounds for withholding any portion of the information (see § 0.459). This response shall be served on the party seeking to inspect the records. The requester may submit a reply within ten calendar days unless a different period is specified by the custodian of records. The reply shall be served on all parties that filed a response. In the event that a submitter fails to respond within the time specified, the submitter will be considered to have no objection to disclosure of the information.

Note to paragraph (d)(3): Under the *ex parte* rules, § 1.1206(a)(7) of this chapter, a proceeding involving a FOIA request is a permit-but-disclose proceeding, but is subject to the special service rules in this paragraph. We also note that while the FOIA request itself is a permit-but-disclose proceeding, a pleading in a FOIA proceeding may also constitute a presentation in another proceeding if it addresses the merits of that proceeding.

(e)(1) When the request is received by the Managing Director, it will be assigned to the Freedom of Information Act (FOIA) Control Office, where it will be entered into the FOIAonline system. The request will be reviewed and, if it is determined that the request meets all the requirements of a proper FOIA request, will be designated as perfected. A FOIA request is then considered properly received. This will occur no later than ten calendar days after the request is first received by the agency.

(2)(i) Except for the purpose of making a determination regarding expedited processing under paragraph (h) of this section, the time for processing a request for inspection of records will be tolled

(A) While the custodian of records seeks reasonable clarification of the request;

(B) Until clarification with the requester of issues regarding fee assessment occurs, including:

(1) Where the amount of fees authorized is less than the estimated cost for completing the production;

(2) Following the denial of a fee waiver, unless the requester had

provided a written statement agreeing to pay the fees if the fee waiver was denied;

(3) Where advance payment is required pursuant to § 0.469 and has not been made.

(ii) Only one Commission request for information shall be deemed to toll the time for processing a request for inspection of records under paragraph (e)(2)(i)(A) of this section. Such request must be made no later than ten calendar days after a request is properly received by the custodian of records under paragraph (e)(1) of this section.

(3) The FOIA Control Office will send an acknowledgement to the requester notifying the requester of the control number assigned to the request, the due date of the response, and the telephone contact number (202-418-0440) to be used by the requester to obtain the status of the request. Requesters may also obtain the status of an FOIA request via email at foia-public-liaison@fcc.gov or by viewing their request at <http://foiaonline.regulations.gov/>.

(4) Multiple FOIA requests by the same or different FOIA requesters may be consolidated for disposition. See also § 0.470(b)(2).

(f) Requests for inspection of records will be acted on as follows by the custodian of the records.

(1) If the Commission is prohibited from disclosing the records in question, the request for inspection will be denied with a statement setting forth the specific grounds for denial.

(2)(i) If records in the possession of the Commission are the property of another agency, the request will be referred to that agency and the person who submitted the request will be so advised, with the reasons for referral.

(ii) If it is determined that the FOIA request seeks only records of another agency or department, the FOIA requester will be so informed by the FOIA Control Officer and will be directed to the correct agency or department.

(iii) If the records in the possession of the Commission involve the equities of another agency, the Commission will consult with that agency prior to releasing the records.

(3) If it is determined that the Commission does not have authority to withhold the records from public inspection, the request will be granted.

(4) If it is determined that the Commission has authority to withhold the records from public inspection, the considerations favoring disclosure and non-disclosure will be weighed in light of the facts presented, and the Commission may, at its discretion, grant

the request in full or in part, or deny the request.

(5) If there is a statutory basis for withholding part of a document from inspection, to the extent that portion is reasonably segregable, that part will be deleted and the remainder will be made available for inspection. Unless doing so would harm an interest protected by an applicable exemption, records disclosed in part shall be marked or annotated, if technically feasible, to show the amount of information deleted, the location of the information deleted, and the exemption under which the deletion is made.

(6) In locating and recovering records responsive to an FOIA request, only those records within the Commission's possession and control as of the date a request is perfected shall be considered.

(g)(1) The custodian of the records will make every effort to act on the request within twenty business days after it is received and perfected by the FOIA Control Office. However, if a request for clarification has been made under paragraph (e)(2)(i)(A) of this section or an issue is outstanding regarding the payment of fees for processing the FOIA request is pending under paragraph (e)(2)(i)(B) of this section, the counting of time will start upon resolution of these requests. If it is not possible to locate the records and to determine whether they should be made available for inspection within twenty business days, the custodian may, upon timely notice to the requester, extend the time for action by up to ten business days, in any of the following circumstances:

(i) It is necessary to search for and collect the requested records from field facilities or other establishments that are separate from the office processing the request.

(ii) It is necessary to search for, collect and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(iii) It is necessary to consult with another agency having a substantial interest in the determination of the request, or among two or more components of the Commission having substantial subject matter interest therein.

(2) The custodian of the records will notify the requester in writing of any extension of time exercised pursuant to paragraph (g) of this section. The custodian of the records may also call the requester to extend the time provided a subsequent written confirmation is provided. If it is not possible to locate the records and make the determination within the extended

period, the person or persons who made the request will be provided an opportunity to limit the scope of the request so that it may be processed within the extended time limit, or an opportunity to arrange an alternative time frame for processing the request or a modified request, and asked to consent to an extension or further extension. If the requester agrees to an extension, the custodian of the records will confirm the agreement in a letter or email specifying the length of the agreed-upon extension. If he or she does not agree to an extension, the request will be denied, on the grounds that the custodian has not been able to locate the records and/or to make the determination within the period for a ruling mandated by the Freedom of Information Act, 5 U.S.C. 552. In that event, the custodian will provide the requester with the records, if any, that could be located and produced within the allotted time. The requester may file an application for review by the Commission.

(3) If the custodian of the records grants a request for inspection of records submitted to the Commission in confidence under § 0.457(d), § 0.459, or some other Commission rule or order, the custodian of the records will give the submitter written notice of the decision and of the submitter's right to seek review pursuant to paragraph (i) of this section.

(h)(1) Requesters who seek expedited processing of FOIA requests shall submit such requests, along with their FOIA requests, to the Managing Director, as described in paragraph (d) of this section.

(2) Expedited processing shall be granted to a requester demonstrating a compelling need that is certified by the requester to be true and correct to the best of his or her knowledge and belief. Simply stating that the request should be expedited is not a sufficient basis to obtain expedited processing.

(3) For purposes of this section, *compelling need* means—

(i) That failure to obtain requested records on an expedited basis could reasonably be expected to pose an imminent threat to the life or physical safety of an individual; or

(ii) With respect to a request made by a person primarily engaged in disseminating information, there is an urgency to inform the public concerning actual or alleged Federal Government activity.

(4)(i) Notice of the determination whether to grant expedited processing shall be provided to the requester by the custodian of records within ten calendar days after receipt of the request by the

FOIA Control Office. Once the determination has been made to grant expedited processing, the custodian shall process the FOIA request as soon as practicable.

(ii) If a request for expedited processing is denied, the person seeking expedited processing may file an application for review within five business days after the date of the written denial. The application for review shall be delivered or mailed to the General Counsel. (For general procedures relating to applications for review, see § 1.115 of this chapter.) The Commission shall act expeditiously on the application for review, and shall notify the custodian of records and the requester of the disposition of such an application for review.

(i)(1) If a request for inspection of records submitted to the Commission in confidence under § 0.457(d), § 0.459, or another Commission rule or order is granted in whole or in part, an application for review may be filed by the person who submitted the records to the Commission, by a third party owner of the records or by a person with a personal privacy interest in the records, or by the person who filed the request for inspection of records within the ten business days after the date of the written ruling. The application for review shall be filed within ten business days after the date of the written ruling, shall be delivered or mailed to the General Counsel, or sent via email to FOIA-Appeal@fcc.gov, and shall be served on the person who filed the request for inspection of records and any other parties to the proceeding. The person who filed the request for inspection of records may respond to the application for review within ten business days after it is filed.

(2) The first day to be counted in computing the time period for filing the application for review is the day after the date of the written ruling. An application for review is considered filed when it is received by the Commission. If an application for review is not filed within this period, the records will be produced for inspection.

(3) If an application for review is denied, the person filing the application for review will be notified in writing and advised of his or her rights. A denial of an application for review is not subject to a petition for reconsideration under § 1.106 of this chapter.

(4) If an application for review filed by the person who submitted, owns, or has a personal privacy interest in the records to the Commission is denied, or if the records are made available on

review which were not initially made available, the person will be afforded ten business days from the date of the written ruling in which to move for a judicial stay of the Commission's action. The first day to be counted in computing the time period for seeking a judicial stay is the day after the date of the written ruling. If a motion for stay is not made within this period, the records will be produced for inspection.

(j) Except as provided in paragraph (i) of this section, an application for review of an initial action on a request for inspection of records, a fee determination (see § 0.467 through § 0.470), or a fee reduction or waiver decision (see § 0.470(e)) may be filed only by the person who made the request. The application shall be filed within 90 calendar days after the date of the written ruling by the custodian of records. An application for review is considered filed when it is received by the Commission. The application shall be delivered or mailed to the General Counsel, or sent via email to FOIA-Appeal@fcc.gov. If the proceeding involves records subject to confidential treatment under § 0.457 or § 0.459, or involves a person with an interest as described in § 0.461(i), the application for review shall be served on such persons. That person may file a response within 14 calendar days after the application for review is filed. If the records are made available for review, the person who submitted them to the Commission will be afforded 14 calendar days after the date of the written ruling to seek a judicial stay. See paragraph (i) of this section. The first day to be counted in computing the time period for filing the application for review or seeking a judicial stay is the day after the date of the written ruling.

Note to paragraphs (i) and (j): The General Counsel may review applications for review with the custodian of records and attempt to informally resolve outstanding issues with the consent of the requester. For general procedures relating to applications for review, see § 1.115 of this chapter.

(k)(1)(i) The Commission will make every effort to act on an application for review of an action on a request for inspection of records within twenty business days after it is filed. In the following circumstances and to the extent time has not been extended under paragraphs (g)(1)(i), (ii), or (iii) of this section, the Commission may extend the time for acting on the application for review up to ten business days. (The total period of extensions taken under this paragraph and under paragraph (g) of this section without the consent of the person who

submitted the request shall not exceed ten business days.):

(A) It is necessary to search for and collect the requested records from field facilities or other establishments that are separate from the office processing the request;

(B) It is necessary to search for, collect and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(C) It is necessary to consult with another agency having a substantial interest in the determination of the request or among two or more components of the Commission having substantial subject matter interest therein.

(ii) If these circumstances are not present, the person who made the request may be asked to consent to an extension or further extension. If the requester or person who made the request agrees to an extension, the General Counsel will confirm the agreement in a letter specifying the length of the agreed-upon extension. If the requestor or person who made the request does not agree to an extension, the Commission will continue to search for and/or assess the records and will advise the person who made the request of further developments; but that person may file a complaint in an appropriate United States district court.

(2) The Commission may at its discretion or upon request consolidate for consideration related applications for review filed under paragraph (i) or (j) of this section.

(1)(1) Subject to the application for review and judicial stay provisions of paragraphs (i) and (j) of this section, if the request is granted, the records will be produced for inspection at the earliest possible time.

(2) If a request for inspection of records becomes the subject of an action for judicial review before the custodian of records has acted on the request, or before the Commission has acted on an application for review, the Commission may continue to consider the request for production of records.

(m) Staff orders and letters ruling on requests for inspection are signed by the official (or officials) who give final approval of their contents. Decisions of the Commission ruling on applications for review will set forth the names of the Commissioners participating in the decision.

■ 11. Revise § 0.465 to read as follows:

§ 0.465 Request for copies of materials which are available, or made available, for public inspection.

(a) The Commission may award a contract to a commercial duplication firm to make copies of Commission records and offer them for sale to the public. In addition to the charge for copying, the contractor may charge a search fee for locating and retrieving the requested documents from the Commission's files.

Note to paragraph (a): The name, address, telephone number, and schedule of fees for the current copy contractor, if any, are published at the time of contract award of renewal in a public notice and periodically thereafter. Current information is available at <http://www.fcc.gov/foia> and <http://www.fcc.gov/consumer-governmental-affairs>. Questions regarding this information should be directed to the Reference Information Center of the Consumer and Governmental Affairs Bureau at 202-418-0270.

(b)(1) Records routinely available for public inspection under § 0.453 are available to the public through the Commission's Reference Information Center. Section 0.461 does not apply to such records.

(2) Audio or video recordings or transcripts of Commission proceedings are available to the public through the Commission's Reference Information Center. In some cases, only some of these formats may be available.

(c)(1) Contractual arrangements which have been entered into with commercial firms, as described in this section, do not in any way limit the right of the public to inspect Commission records or to retrieve whatever information may be desired. Coin-operated and debit card copy machines are available for use by the public.

(2) The Commission has reserved the right to make copies of its records for its own use or for the use of other agencies of the U.S. Government. When it serves the regulatory or financial interests of the U.S. Government, the Commission will make and furnish copies of its records free of charge. In other circumstances, however, if it should be necessary for the Commission to make and furnish copies of its records for the use of others, the fee for this service shall be ten cents (\$0.10) per page or \$5 per computer disk in addition to charges for staff time as provided in § 0.467. For copies prepared with other media, such as thumb drives or other portable electronic storage, the charge will be the actual direct cost including operator time. Requests for copying should be accompanied by a statement specifying the maximum copying fee the person making the request is prepared to pay. If the Commission estimates that

copying charges are likely to exceed the greater of \$25 or the amount which the requester has indicated that he/she is prepared to pay, then it shall notify the requester of the estimated amount of fees. Such a notice shall offer the requester the opportunity to confer with Commission personnel with the object of revising or clarifying the request.

Note to paragraph (c)(2): The criterion considered in acting on a waiver request is whether "waiver or reduction of the fee is in the public interest because furnishing the information can be considered as primarily benefiting the general public." 5 U.S.C. 552(a)(4)(A). A request for a waiver or reduction of fees will be decided by the General Counsel as set forth in § 0.470(e).

(3) *Certified documents.* Copies of documents which are available or made available, for inspection under §§ 0.451 through 0.465, will be prepared and certified, under seal, by the Secretary or his or her designee. Requests shall be in writing, specifying the exact documents, the number of copies desired, and the date on which they will be required. The request shall allow a reasonable time for the preparation and certification of copies. The fee for preparing copies shall be the same as that charged by the Commission as described in paragraph (c)(2) of this section. The fee for certification shall be \$10 for each document.

(d)(1) Computer maintained databases produced by the Commission and routinely available to the public (*see* § 0.453) may be obtained from the FCC's Web site at <http://www.fcc.gov> or if unavailable on the Commission's Web site, from the Reference Information Center.

(2) Copies of computer generated data stored as paper printouts or electronic media and available to the public may also be obtained from the Commission's Reference Information Center (*see* paragraph (a) of this section).

(3) Copies of computer source programs and associated documentation produced by the Commission and available to the public may be obtained from the Office of the Managing Director.

(e) This section does not apply to records available on the Commission's Web site, <http://www.fcc.gov>, or printed publications which may be purchased from the Superintendent of Documents or private firms (*see* §§ 0.411 through 0.420), nor does it apply to application forms or information bulletins, which are prepared for the use and information of the public and are available upon request (*see* §§ 0.421 and 0.423) or on the Commission's Web site, <http://www.fcc.gov/formpage.html>.

■ 12. Revise § 0.467 to read as follows:

§ 0.467 Search and review fees.

(a)(1) Subject to the provisions of this section, an hourly fee shall be charged for recovery of the full, allowable direct costs of searching for and reviewing records requested under § 0.460 or § 0.461, unless such fees are reduced or waived pursuant to § 0.470. The fee is based on the pay grade level of the FCC's employee(s) who conduct(s) the search or review, or the actual hourly rate of FCC contractors or other non-FCC personnel who conduct a search.

Note to paragraph (a)(1): The fees for FCC employees will be modified periodically to correspond with modifications in the rate of pay approved by Congress and any such modifications will be announced by public notice and will be posted on the Commission's Web site, <http://www.fcc.gov/foia/#feeschedule>.

(2) The fees specified in paragraph (a)(1) of this section are computed at Step 5 of each grade level based on the General Schedule or the hourly rate of non-FCC personnel, including in addition twenty percent for personnel benefits. Search and review fees will be assessed in ¼ hour increments.

(b) Search fees may be assessed for time spent searching, even if the Commission fails to locate responsive records or if any records located are determined to be exempt from disclosure.

(c) The Commission shall charge only for the initial review, *i.e.*, the review undertaken initially when the Commission analyzes the applicability of a specific exemption to a particular record. The Commission shall not charge for review at the appeal level of an exemption already applied. However, records or portions of records withheld in full under an exemption that is subsequently determined not to apply may be reviewed again to determine the applicability of other exemptions not previously considered. The costs of such a subsequent review, under these circumstances, are properly assessable.

(d) The fee charged will not exceed an amount based on the time typically required to locate records of the kind requested.

(e)(1) If the Commission estimates that search charges are likely to exceed the greater of \$25 or the amount which the requester indicated he/she is prepared to pay, then it shall notify the requester of the estimated amount of fees. Such a notice shall offer the requester the opportunity to confer with Commission personnel with the object of revising or clarifying the request. *See* § 0.465(c)(2) and § 0.470(d).

(2) The time for processing a request for inspection shall be tolled while conferring with the requester about his

or her willingness to pay the fees required to process the request. *See* § 0.461(e).

(f) When the search has been completed, the custodian of the records will give notice of the charges incurred to the person who made the request.

(g) The fee shall be paid to the Financial Management Division, Office of Managing Director, or as otherwise directed by the Commission.

■ 13. Revise § 0.470 to read as follows:

§ 0.470 Assessment of fees.

(a)(1) *Commercial use requesters.* (i) When the Commission receives a request for documents for commercial use, it will assess charges that recover the full direct cost of searching for, reviewing and duplicating the records sought pursuant to § 0.466 and § 0.467.

(ii) Commercial use requesters shall not be assessed search fees if the Commission fails to comply with the time limits under § 0.461(g), except as provided in paragraph (a)(1)(iii) of this section.

(iii) Commercial requesters may still be assessed search fees when the Commission fails to comply with the time limits under § 0.461(g) if the Commission determines that unusual circumstances apply and more than 5,000 pages are necessary to respond to the request, so long as the Commission has provided a timely written notice to the requester and has discussed with the requester (or made not less than three good-faith attempts to do so) how the requester could effectively limit the scope of the request. Additionally, if a court has determined that exceptional circumstances exist, a failure to comply with a time limit under § 0.461(g) will be excused for the length of time provided by the court order.

(2) *Educational and non-commercial scientific institution requesters and requesters who are representatives of the news media.* (i) The Commission shall provide documents to requesters in these categories for the cost of duplication only, pursuant to § 0.465 above, excluding duplication charges for the first 100 pages, provided however, that requesters who are representatives of the news media shall be entitled to a reduced assessment of charges only when the request is for the purpose of distributing information.

(ii) Educational requesters or requesters who are representatives of the news media shall not be assessed fees for the cost of duplication if the Commission fails to comply with the time limits under § 0.461(g), except as provided in paragraph (a)(2)(iii) of this section.

(iii) Educational requesters or requesters who are representatives of the news media may still be assessed duplication fees when the Commission fails to comply with the time limits under § 0.461(g) if the Commission determines that unusual circumstances apply and more than 5,000 pages are necessary to respond to the request, so long as the Commission has provided a timely written notice to the requester and has discussed with the requester (or made not less than three good-faith attempts to do so) how the requester could effectively limit the scope of the request. Additionally, if a court has determined that exceptional circumstances exist, a failure to comply with a time limit under § 0.461(g) will be excused for the length of time provided by the court order.

(3) *All other requesters.* (i) The Commission shall charge requesters who do not fit into any of the categories above fees which cover the full, reasonable direct cost of searching for and duplicating records that are responsive to the request, pursuant to § 0.465 and § 0.467, except that the first 100 pages of duplication and the first two hours of search time shall be furnished without charge.

(ii) All other requesters shall not be assessed search fees if the Commission fails to comply with the time limits under § 0.461(g), except as provided in paragraph (a)(3)(iii) of this section.

(iii) All other requesters may still be assessed search fees when the Commission fails to comply with the time limits under § 0.461(g) if the Commission determines that unusual circumstances apply and more than 5,000 pages are necessary to respond to the request, so long as the Commission has provided a timely written notice to the requester and has discussed with the requester (or made not less than three good-faith attempts to do so) how the requester could effectively limit the scope of the request. Additionally, if a court has determined that exceptional circumstances exist, a failure to comply with a time limit under § 0.461(g) will be excused for the length of time provided by the court order.

(b)(1) The 100 page restriction on assessment of duplication fees in paragraphs (a)(2) and (3) of this section refers to 100 paper copies of a standard size, which will normally be 8½" x 11" or 11" x 14".

(2) When the agency reasonably believes that a requester or group of requesters is attempting to segregate a request into a series of separate individual requests for the purpose of evading the assessment of fees, the

agency will aggregate any such requests and assess charges accordingly.

(c) When a requester believes he or she is entitled to a waiver pursuant to paragraph (e) of this section, the requester must include, in his or her original FOIA request, a statement explaining with specificity, the reasons demonstrating that he or she qualifies for a fee waiver. Included in this statement should be a certification that the information will not be used to further the commercial interests of the requester.

(d) If the Commission reasonably believes that a commercial interest exists, based on the information provided pursuant to paragraph (c) of this section, the requester shall be so notified and given an additional ten business days to provide further information to justify receiving a reduced fee. *See* § 0.467(e)(2).

(e)(1) Copying, search and review charges shall be waived or reduced by the General Counsel when “disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester.” 5 U.S.C. 552(a)(4)(A)(iii). Simply repeating the fee waiver language of section 552(a)(4)(A)(iii) is not a sufficient basis to obtain a fee waiver.

(2) The criteria used to determine whether disclosure is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government include:

(i) Whether the subject of the requested records concerns the operations or activities of the government;

(ii) Whether the disclosure is likely to contribute to an understanding of government operations or activities; and

(iii) Whether disclosure of the requested information will contribute to public understanding as opposed to the individual understanding of the requester or a narrow segment of interested persons.

(3) The criteria used to determine whether disclosure is primarily in the commercial interest of the requester include:

(i) Whether the requester has a commercial interest that would be furthered by the requested disclosure; and, if so

(ii) Whether the magnitude of the identified commercial interest of the requester is sufficiently large, in comparison with the public interest in disclosure, that disclosure is primarily in the commercial interest of the requester.

(4) This request for fee reduction or waiver must accompany the initial request for records and will be decided under the same procedures used for record requests.

(5) If no fees or de minimis fees would result from processing a FOIA request and a fee waiver or reduction has been sought, the General Counsel will not reach a determination on the waiver or reduction request.

(f) Whenever Commission staff determines that the total fee calculated under this section likely is less than the

cost to collect and process the fee, no fee will be charged.

(g) Review of initial fee determinations under § 0.467 through § 0.470 and initial fee reduction or waiver determinations under paragraph (e) of this section may be sought under § 0.461(j).

PART 1—PRACTICE AND PROCEDURE

■ 14. The authority citation for part 1 continues to read as follows:

Authority: 15 U.S.C. 79 *et seq.*; 47 U.S.C. 151, 154(i), 154(j), 155, 157, 160, 201, 225, 227, 303, 309, 310, 332, 1403, 1404, 1451, 1452, and 1455.

■ 15. Amend § 1.115 by revising paragraph (d) to read as follows:

§ 1.115 Application for review of action taken pursuant to delegated authority.

* * * * *

(d) Except as provided in paragraph (e) of this section and in § 0.461(j) of this chapter, the application for review and any supplemental thereto shall be filed within 30 days of public notice of such action, as that date is defined in § 1.4(b). Opposition to the application shall be filed within 15 days after the application for review is filed. Except as provided in paragraph (e)(3) of this section, replies to oppositions shall be filed within 10 days after the opposition is filed and shall be limited to matters raised in the opposition.

BILLING CODE 6712–01–P

Proposed Rules

Federal Register

Vol. 82, No. 9

Friday, January 13, 2017

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 65

[Doc. No. AMS-LPS-16-0014]

Addition of Mandatory Country of Origin Labeling Requirements for Venison

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Agricultural Marketing Service (AMS) proposes to amend the country of origin labeling (COOL) regulation to add muscle cuts of venison and ground venison to mandatory COOL requirements. AMS is issuing this proposed rule to conform to amendments to the Agricultural Marketing Act of 1946 (Act) as mandated by the Agricultural Act of 2014 (2014 Farm Bill), that added muscle cuts of venison and ground venison to the list of covered commodities subject to mandatory COOL.

DATES: Submit comments on or before March 14, 2017. Pursuant to the Paperwork Reduction Act, comments on the recordkeeping burden that would result from this proposal must be received by March 14, 2017.

ADDRESSES: All comments should reference the docket number AMS-LPS-16-0014; the date of submission; and the page number of this issue of the **Federal Register**. Comments may also be submitted to: Julie Henderson, Director, COOL Division; Livestock, Poultry, and Seed Program, Agricultural Marketing Service, U.S. Department of Agriculture (USDA); Room 2614-S, STOP 0216; 1400 Independence Avenue SW., Washington, DC 20250-0216. AMS will make the comments available for public inspection at the above address during regular business hours or via the Internet at www.regulations.gov.

Pursuant to the Paperwork Reduction Act (PRA), send comments regarding the

accuracy of the burden estimate, ways to minimize burden, including the use of automated collection techniques or other forms of information technology, or any other aspect of this collection of information to the above address.

Comments concerning the information collection under PRA also should be sent to the Desk Office for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

Please be advised that all comments submitted in response to this proposed rule will be included in the record without change and will be made available to the public on the Internet at www.regulations.gov. The identity, including any personal information provided, of the individuals or entities submitting the comments will be made public.

FOR FURTHER INFORMATION CONTACT: Julie Henderson, Director, COOL Division; Livestock, Poultry, and Seed Program, Agricultural Marketing Service, USDA; Room 2614-S, STOP 0216; 1400 Independence Avenue SW., Washington, DC 20250-0216; telephone (202) 720-4486; or email COOL@ams.usda.gov.

SUPPLEMENTARY INFORMATION:

Executive Orders 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. This proposed rule has been determined to be not significant for purposes of Executive Order 12866 or Executive Order 13563. Accordingly, the Office of Management and Budget (OMB) has waived the review process.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. This proposed rule is not intended to have a retroactive effect. The Act prohibits states or political subdivisions of a state to impose any

requirement that is in addition to, or inconsistent with, any requirement of the Act. There are no civil justice implications associated with this proposed rule.

Executive Order 13132

This proposed rule has been reviewed under Executive Order 13132, Federalism. This Order directs agencies to construe, in regulations and otherwise, a Federal statute to preempt state law only where the statute contains an express preemption provision. No federalism implications are associated with this proposed rule.

With regard to consultation with states, as directed by Executive Order 13132, AMS previously consulted with the states that have country of origin labeling programs. Currently, AMS has cooperative agreements with 47 states to assist in the enforcement of the COOL program and has communications with all 50 states on a regular basis.

Background and Proposed Revisions

AMS is proposing to add venison and ground venison to the list of covered commodities subject to mandatory COOL regulation in conformance to section 12104(b) of the Agricultural Act of 2014 (2014 Farm Bill) (Pub. L. 113-79). Retailers and suppliers would subsequently be required to keep records and provide their customers notification of the country of origin of muscle cuts and ground venison that they sell. Individuals that supply venison, whether directly to retailers or indirectly through other participants in the marketing chain, would be required to establish and maintain country of origin information for venison and supply this information to retailers. As a result, producers, handlers, manufacturers, wholesalers, importers, and retailers of venison would be affected.

This proposed rule would amend the country of origin labeling regulations (7 CFR part 65). AMS proposes to add definitions for *cervidae* (§ 65.117), *ground venison* (§ 65.178), and *venison* (§ 65.270). The proposed rule would amend definitions for *covered commodity* (§ 65.135(a)(1) and (2)), *production step* (§ 65.230), *raised* (§ 65.235), *slaughter* (§ 65.250), and *United States country of origin* (§ 65.260(a)) by adding references to venison. AMS proposes to amend *country of origin notification*

(§ 65.300(h)) to add references to ground venison, and *responsibilities of suppliers* (§ 65.500(b)(1)) to include references to venison and cervidae.

Additional administrative changes are necessary to reflect the withdrawal of beef and pork commodities from the COOL regulations as published in the **Federal Register** on March 2, 2016 (81 FR 10761). Therefore, AMS is proposing to amend *production step* (§ 65.230), *raised* (§ 65.235), and *United States country of origin* (§ 65.260) by removing references to *beef* and *pork* from these definitions.

AMS is seeking comments on the aforementioned definitions and requirements. AMS also invites comments concerning potential economic and other effects of this proposed rule.

Initial Regulatory Flexibility Analysis

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), the Administrator of AMS has considered the economic effect of this action on small entities and has determined that this proposed rule will not have a significant economic impact on a substantial number of small entities. The purpose of RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly burdened.

Venison Industry

In general, the supply chain for venison and ground venison consists of: Producers (ranchers); slaughterhouses, processors, importers, wholesalers, and distributors (intermediary firms); and retailers. Under this proposed rule, all entities in the supply chain would be affected. Because the venison industry is very small at all levels of the supply chain, the overall impact of this proposed rule would be insignificant. According to the 2014 North American Deer Farmers Association's Venison Council, most venison is sold to restaurants, which are not subject to COOL requirements.

The proposed rule would impose recordkeeping requirements on venison producers and intermediary firms selling venison destined for retail channels. Individual retailers selling venison would also be subject to point of sale labeling and recordkeeping requirements. Each participant in the venison supply chain would bear recordkeeping costs as well as costs associated with modifications to their business practices.

Producers

USDA's National Agricultural Statistics Service (NASS) estimated that, in 2012, there were 4,042 deer farms and 1,199 elk farms, totaling 5,241 venison farms, in the U.S. This is a decrease from 7,571 in 2007. Of the venison producers identified in a Texas A&M University 2007 study,¹ 32 percent of survey respondents were breeding and hunting operations and 7 percent were hunting-only operations. Moreover, the trophy-hunting segment of the venison industry represents the primary end market for the breeding stock industry. Breeding and hunting and hunting-only operations are not considered to be producers of venison for consumption that are subject to COOL. Relying on the NASS and Texas A&M data, AMS assumes that 60 percent of the ranches, or 3,144 producers, raise animals for meat consumption. Virtually all venison-producing operations that would be subject to the amended COOL regulations are small businesses under the criteria established by the Small Business Administration (SBA) [13 CFR 121.201]. SBA defines small agricultural producers as those having annual receipts of less than \$750,000.

While AMS believes that venison producers already maintain birth and raising records on each animal (which may include ear tagging, radio frequency identification devices, and other related means of identification on either an animal or a lot basis) as a normal part of business operations and animal husbandry practices, venison producers may use an affidavit to proclaim where the animals they produce are born and raised, not by individual but for the whole herd. Two factors drive the cost to venison producers to comply with this proposed rule: The time to create the initial affidavit and the time to administer and maintain the affidavit annually. AMS estimates it will take each venison producer 15 minutes (0.25 hours) to create and sign the initial affidavit used to substantiate country of origin claims and carry out the purposes of this regulation. If producers sign an affidavit of country of origin on all animals in the herd, the affidavit will suffice to achieve the purposes of this regulation even if some of the venison produced ultimately is not sold to retail establishments covered by the regulation.

¹ Anderson, D.P., Frosch, B.J., and Outlaw, J.L. Economic Impact of the United States Cervid Farming Industry. APFC Research Report 07–4, August 2007. Agricultural & Food Policy Center. Texas A&M University: College Station, TX.

For venison producers, it is assumed that the added work needed to generate an affidavit from an existing recordkeeping system for country of origin is primarily a bookkeeping task. This task may be performed by an independent bookkeeper, or in the case of operations that perform their own bookkeeping, an individual with equivalent skills. The Bureau of Labor Statistics (BLS) publishes wage rates for bookkeepers, accounting, and auditing clerks. In estimating recordkeeping costs, May 2015 wage rates and benefits published by BLS from the National Compensation Survey are used. It is assumed that this wage rate represents the cost for venison producers to hire an independent bookkeeper. In the case of venison producers who currently perform their own bookkeeping, it is assumed that this wage rate represents the opportunity cost of the producers' time for performing these tasks. The May 2015 wage rate is estimated at \$23.23 per hour. For this analysis, an additional 33 percent is added to the wage rate to account for total benefits, which include Social Security, unemployment insurance, workers compensation, etc. resulting in \$30.90 per hour. Recordkeeping time for venison producers to generate and sign a producer affidavit is estimated at 15 minutes (0.25 hours) per operation. This 0.25 hours multiplied by 3,144 producers at a cost of \$30.90 per hour results in approximately \$24,287 to generate affidavits to substantiate country of origin claims. Annual maintenance is estimated to take 5 minutes (0.083 hours) for each of the 3,144 operations at a cost of \$30.90 per hour for total annual costs of \$8,063. Therefore, the total cost estimates for producers are \$32,351, or approximately \$10.29 per firm.

Intermediary Firms

Any establishment that supplies retailers with venison or ground venison would be required to provide country of origin information to retailers. This includes importers, slaughterhouses, processors, wholesalers, and distributors.

From 2011 to 2015, USDA's Foreign Agricultural Service (FAS) reported venison imports of 21.78 million pounds valued at \$79.3 million. For those years, the average annual venison imports were 4.356 million pounds valued at \$15.86 million, or \$3.64 per pound. During this period, the United States saw a dramatic increase in venison imports, with virtually all of it originating from New Zealand. For an imported venison covered commodity, the importer of record must ensure that

records provide clear product tracking from the port of entry into the U.S. to the immediate subsequent recipient. In addition, the records must accurately reflect the country of origin in relevant U.S. Customs and Border Protection entry documents and information systems. Regulated firms must maintain records to verify the accuracy of COOL declarations for a period of one year from the date of the transaction (purchase or sale of animals for slaughter, or venison meat at each point in the supply chain). AMS expects that importers already maintain records mandated by other Federal Statutes (e.g., Bioterrorism Act of 2002; Tariff Act of 1930) that would be sufficient to verify compliance with COOL.

Of intermediaries potentially affected by the proposed rule, SBA classifies as small those manufacturing firms with less than 500 employees and wholesalers with less than 100 employees. Therefore, approximately 93 percent of the general-line grocery wholesalers are small businesses. According to NASS' 2012 Economic Census, there were a total of 2,162 meat and meat products specialty wholesaler firms. Of these, 2,043 firms had less than 100 employees, meaning approximately 95 percent of meat wholesalers are small firms. That same Census reported that 2,354 out of 2,629 (90 percent) livestock processing and slaughtering firms were in operation and classified as small businesses. USDA's Food Safety Inspection Service (FSIS) reported that 577 FSIS-inspected establishments (22 percent) in the U.S. process (i.e., slaughter and process or process-only) non-amenable species, which include venison.

Intermediaries are generally assumed to have prior experience with COOL compliance and are expected to have lower costs needed to meet the requirements of this proposed rule than they did when COOL was first implemented. Wholesalers would incur recordkeeping costs, costs associated with supplying country of origin information to retailers, costs associated with segmenting products by country of origin, and additional handling costs. Given that venison is such a small percentage of proteins on the market, it is estimated that few intermediaries handle venison meat for sale to retail.

Since virtually all intermediary firms are assumed to already have a recordkeeping system in place for other COOL covered commodities, it is estimated that one (1) hour will be required to add venison to the design at a cost of \$45 per firm. The initial recordkeeping costs are estimated by using the Label Cost Model developed

for the Food and Drug Administration (FDA) by RTI International for including additional country of origin information to a livestock processor's records (\$33.75 per hour with an additional 33 percent added to cover benefit costs for a total of \$45.00 per hour). While the cost will be higher for some firms and lower for others, it is believed that \$45 per hour represents a reasonable estimate of average cost for all firms. Based on this calculation, it is estimated that the initial recordkeeping costs for the 577 firms specializing in livestock processing and slaughtering of non-amenable species will be approximately \$25,965. Intermediaries such as handlers, processors, importers and wholesalers (except livestock processing and slaughtering) are considered to already have sufficient recordkeeping and documentation systems in place to convey COOL information for venison products. Thus, no recordkeeping, set-up, and maintenance burden is estimated for these entities.

Maintenance activities will include inputting, tracking, and storing country of origin for venison. Since this is mostly an administrative task, the cost is estimated by using the May 2015 BLS wage rate from the National Compensation Survey for administrative support occupations (\$17.40 per hour with an additional 33 percent added to cover benefit costs for a total of \$23.14 per hour). This occupation category includes stock and inventory clerks and record clerks. Annual maintenance for venison processing and slaughter facilities is estimated to take 5 minutes (0.083 hours) at a cost of \$23.14 per hour, for a total annual cost of \$1,108. Total initial and maintenance costs for 577 livestock processing firms are estimated to be \$27,073, or \$46.92 per firm.

Retailers

According to the definition of *retailer* under the Perishable Agricultural Commodities Act of 1930, the number of retailers that would be affected by this proposed rule is considerably smaller than the total number of retailers nationwide. There are 4,504 retail firms subject to mandatory COOL regulations. An estimated 88 percent (3,964 out of 4,504) of retail firms are considered small businesses.

Only a small percentage of the producers identified by the previously mentioned Texas A&M University 2007 study actually sell venison and an even smaller percentage sell venison products to retail stores subject to COOL. Venison meat is available through some specialty grocers and national chains that focus on 'natural'

meats. USDA's Economic Research Service supermarket sales data for venison and elk meat show that a total of 350,404 pounds were sold in supermarkets (the regulated retail firms subject to COOL) during the 5-year period from 2008 through 2012, or an average of 70,081 pounds per year. Average annual retail sales of venison are less than 2 percent of annual venison imports (70,000 divided by 4.4M pounds) without even accounting for domestic production. Most venison meat is consumed in restaurants, which are not subject to COOL requirements.

The number of retailers selling venison is a small subset of the COOL-regulated retailer population. Retailers choosing to carry venison products would accrue additional recordkeeping costs associated with supplying country of origin information to consumers as well as additional handling costs. USDA estimates that 3 percent of retailers (135 firms out of 4,504 retailers in the U.S.) will carry venison. AMS estimates that 88 percent of these retailers will be small businesses, consistent with the overall retailer population.

It is estimated that each of the 135 retail firms will require one (1) hour to add venison to existing data management systems. The initial recordkeeping costs for retailers are estimated by using the same Label Cost Model developed for FDA by RTI International for including additional country of origin information to a retailer's records. It is assumed that limited information, such as one-color redesign of a paper document, will be sufficient to comply with the rule's recordkeeping requirements (total salary and benefit costs of \$45.00 per hour). Based on one hour per firm at \$45 per hour and 135 firms, initial recordkeeping costs at retail are estimated to be approximately \$6,075. The yearly storing and maintenance cost for retailers is estimated by using the May 2015 BLS wage rate from the National Compensation Survey for administrative support occupations (\$23.14 for wages plus benefits per hour). Annual maintenance for retail firms is estimated to take 30 minutes (0.5 hours) on average for 135 retail firms, because only a small subset, about 3 percent, of the 4,504 retailers will sell venison, at a cost of \$23.14 per hour for total annual maintenance costs of \$1,562. Total initial and maintenance costs for 135 retailers are estimated to be \$7,637.

Accordingly, the Administrator of AMS has conducted this Initial Regulatory Flexibility Analysis and has determined that this proposed rule will not have a significant economic impact

on a substantial number of small entities. However, AMS invites comments concerning potential effects of this proposed rule.

AMS has considered any significant alternatives to this proposal that accomplish the statutory objectives and minimize the significant economic impact of the proposal on small entities. AMS does not believe there are other Federal rules that may duplicate, overlap, or conflict with the proposed rule. The effect of this proposed rule would be limited to a small number of firms that produce, process, and market venison. The only effective means of achieving the results mandated by the 2014 Farm Bill is through this proposed regulatory action.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) (PRA), AMS is requesting OMB approval for a new information collection to add venison as a COOL covered commodity. The overall total burden for initial set-up, annual storage, and maintenance to comply with reporting and recordkeeping requirements for 3,856 recordkeepers is estimated to be 1,873 hours. OMB previously approved information collection requirements associated with all other COOL covered commodities and regulated firms and assigned OMB control number 0581–0250. This proposed rule would increase the overall reporting and recordkeeping burden due to the anticipated increase in number of respondents from the venison industry. Therefore, a NEW information collection is required to carry out the requirements of this proposed rule. AMS intends to merge

this new information collection, upon OMB approval, into the approved 0581–0250 collection.

Below, AMS has described and estimated the annual burden, *i.e.*, the amount of time and cost of labor, for entities to prepare and maintain information to participate in this proposed mandatory labeling program. AMS is committed to complying with the E-Government Act, to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to government information and services, and for other purposes. As with all mandatory regulatory programs, recordkeeping burdens are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies. The Act, as amended, provides authority for this action.

Title: Mandatory Country of Origin Labeling Requirements for Venison Meat.

OMB Number: 0581–NEW.

Type of Request: This is a NEW collection.

Abstract: The information collection requirements are essential to carry out this rule.

COOL provisions of the Act require retailers and suppliers of COOL covered commodities to verify the accuracy of COOL claims. Only records maintained in the course of the normal conduct of the business are required to serve as verification. This proposed rule would add this recordkeeping requirement for producers, intermediaries, and retailers of venison meat. This public reporting burden is necessary to ensure conveyance and accuracy of country of origin and method of production

declarations relied upon at the point of sale at retail. The public reporting burden also assures that all parties involved in supplying venison and ground venison meat to retail stores maintain and convey accurate information as required.

AMS believes that typical venison ranching operations have already developed much of the necessary recordkeeping (for example, birth, health, feeding records, and other documentation used to manage and identify the flock or herd) through normal animal husbandry and business practices. Furthermore, producer affidavits shall also be considered acceptable records that suppliers may utilize to initiate origin claims. Therefore, the estimated incremental costs for venison producers to supplement existing records with country of origin information will be relatively small per firm. Examples of initial or start-up costs would be any additional recordkeeping burden to record the required country of origin information and transfer this information to handlers, processors, wholesalers, or retailers via records used in the normal course of business.

Table 1 displays the estimated annual costs associated for venison producers, intermediaries, and retailers. This public reporting burden is necessary to ensure conveyance and accuracy of country of origin and method of production declarations relied upon at the point of sale at retail. The public reporting burden also assures that all parties involved in supplying covered commodities to retail stores maintain and convey accurate information as required.

TABLE 1—ESTIMATED INITIAL SET-UP AND ESTIMATED ANNUAL STORAGE MAINTENANCE COSTS ASSOCIATED WITH PAPERWORK BURDEN

Initial & set-up costs (incurred one time only)	Firms	Initial costs
Venison Producers	3,144	\$24,287
Handlers, Processors, Importers & Wholesalers (except livestock processing & slaughtering)	0	0
Livestock Processing & Slaughtering (non-amenable species)	577	25,965
Retailers	135	6,075
Total Initial & Set-Up Costs	3,856	56,327
Annual Storing & Maintenance Costs (yearly maintenance cost burden)	Firms	Maintenance costs
Venison Producers	3,144	8,063
Handlers, Processors, Importers & Wholesalers (except livestock processing & slaughtering)	0	0
Livestock Processing & Slaughtering (non-amenable species)	577	1,108
Retailers	135	1,562
Total Annual Storing & Maintenance Costs	3,856	10,694
Total Estimated Set-Up and Annual Maintenance Costs	67,061

The request for approval of the new information collection is as follows:

Estimate of Burden: Public reporting burden for initial set-up, recordkeeping, storage, and maintenance is estimated to average 14 minutes (0.24 hours) per response from all respondents (venison producers, livestock processors and slaughterers, and retailers).

Initial Set-Up Burden

Respondents: Producers, processors, slaughterhouses, handlers, wholesalers, importers, and retailers of venison and ground venison meat.

Estimated Number of Respondents: 3,856.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Responses: 3,856.

Estimated Total Annual Burden on Respondents: 1,498 hours.

Annual Storage Maintenance Burden

Respondents: Producers, processors, slaughterhouses, handlers, wholesalers, importers, and retailers of venison and ground venison meat.

Estimated Number of Respondents: 3,856.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Responses: 3,856.

Estimated Total Annual Burden on Respondents: 376 hours.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of AMS, including whether the information will have practical utility; (2) the accuracy of AMS' estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. A 60-day period is provided to comment on the information collection burden.

Comments should reference OMB No. 0581-NEW and be sent to Julie Henderson, Director, COOL Division; Livestock, Poultry, and Seed Program, Agricultural Marketing Service, USDA; Room 2614-S, STOP 0216; 1400 Independence Avenue SW.,

Washington, DC 20250-0216; telephone (202) 720-4486; or email COOL@ams.usda.gov. All comments received will be available for public inspection. All responses to this proposed rule will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Comments concerning the information collection under PRA should also be sent to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

List of Subjects in 7 CFR Part 65

Agricultural commodities, Food labeling, Meat and meat products, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, AMS proposes to amend 7 CFR part 65 as follows:

PART 65—COUNTRY OF ORIGIN LABELING OF LAMB, CHICKEN, GOAT, AND VENISON MEAT, PERISHABLE AGRICULTURAL COMMODITIES, MACADAMIA NUTS, PECANS, PEANUTS, AND GINSENG

■ 1. The authority citation for 7 CFR part 65 continues to read as follows:

Authority: 7 U.S.C. 1621 *et seq.*

■ 2. Revise the part heading of 7 CFR part 65 as set forth above.

■ 3. Add § 65.117 to read as follows:

§ 65.117 Cervidae.

Cervidae means any one of the various species that are raised for the production of venison meat, such as whitetail deer, elk, fallow deer, axis deer, sika, red deer (maral), musk deer, rusa deer, antelope, nilgai, pronghorn, reindeer, and caribou.

■ 4. Amend § 65.135 by revising paragraphs (a)(1) and (2) to read as follows:

§ 65.135 Covered commodity.

(a) * * *

(1) Muscle cuts of lamb, chicken, goat, and venison;

(2) Ground lamb, ground chicken, ground goat, and ground venison;

* * * * *

■ 5. Add § 65.178 to read as follows:

§ 65.178 Ground Venison.

Ground venison means comminuted venison of skeletal origin that is produced in conformance with all applicable Food Safety and Inspection Service labeling guidelines.

■ 6. Revise § 65.230 to read as follows:

§ 65.230 Production step.

Production step means, in the case of lamb, chicken, goat, and venison, born, raised, or slaughtered.

■ 7. Revise § 65.235 to read as follows:

§ 65.235 Raised.

Raised means, in the case of lamb, chicken, goat, and venison, the period of time from birth until slaughter or in the case of animals imported for immediate slaughter as defined in § 65.180, the period of time from birth until date of entry into the United States.

■ 8. Revise § 65.250 to read as follows:

§ 65.250 Slaughter.

Slaughter means the point in which a livestock animal (including chicken and cervidae) is prepared into meat products (covered commodities) for human consumption. For purposes of labeling under this part, the word *harvested* may be used in lieu of *slaughtered*.

■ 9. Amend § 65.260 by revising paragraph (a) to read as follows:

§ 65.260 United States country of origin.

* * * * *

(a) Lamb, chicken, goat, and venison:

* * * * *

■ 10. Add § 65.270 to read as follows:

§ 65.270 Venison.

Venison means meat produced from animals in the cervidae family.

■ 11. Amend § 65.300 by revising paragraph (h) to read as follows:

§ 65.300 Country of origin notification.

* * * * *

(h) *Labeling Ground Lamb, Ground Goat, Ground Chicken, and Ground Venison.* The declaration for ground lamb, ground goat, ground chicken, and ground venison covered commodities shall list all countries of origin contained therein or that may be reasonably contained therein. In determining what is considered reasonable, when a raw material from a specific origin is not in a processor's inventory for more than 60 days, that country shall no longer be included as a possible country of origin.

* * * * *

■ 12. Amend § 65.500 by revising paragraph (b)(1) to read as follows:

§ 65.500 Recordkeeping requirements.

* * * * *

(b) * * * (1) Any person engaged in the business of supplying a covered commodity to a retailer, whether directly or indirectly, must make available information to the buyer about the country(ies) of origin of the covered commodity. This information may be provided either on the product itself, on

the master shipping container, or in a document that accompanies the product through retail sale. In addition, the supplier of a covered commodity that is responsible for initiating a country(ies) of origin claim, which in the case of lamb, chicken, goat, and venison is the slaughter facility, must possess records that are necessary to substantiate that claim for a period of 1 year from the date of the transaction. For that purpose, packers that slaughter animals that are tagged with an 840 Animal Identification Number device without the presence of any additional accompanying marking (*i.e.*, “CAN” or “M”) may use that information as a basis for a U.S. origin claim. Packers that slaughter animals that are part of another country’s recognized official system (*e.g.* Canadian official system, Mexico official system) may also rely on the presence of an official ear tag or other approved device on which to base their origin claims. In the case of cervidae, producer affidavits shall also be considered acceptable records that suppliers may utilize to initiate origin claims, provided it is made by someone having first-hand knowledge of the origin of the covered commodity and identifies the covered commodity unique to the transaction.

* * * * *

Dated: January 9, 2017.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1260

[No. AMS–LPS–16–0071]

Beef Promotion and Research; Reapportionment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would adjust representation on the Cattlemen’s Beef Promotion and Research Board (Board), established under the Beef Promotion and Research Act of 1985 (Act), to reflect changes in domestic cattle inventories since January 1, 2013, as well as changes in levels of imported cattle, beef, and beef products that have occurred since December 31, 2012, which were the cut-off dates for data used by the Agricultural Marketing

Service (AMS) when the Board was last reapportioned in July 2014. These adjustments are required by the Beef Promotion and Research Order (Order) and, if adopted, would result in a decrease in Board membership from 100 to 99, effective with the U.S. Department of Agriculture’s (USDA) appointments for terms beginning early in the year 2018.

DATES: Submit comments on or before March 14, 2017.

ADDRESSES: Comments should be posted online at www.regulations.gov. Comments received will be posted without change, including any personal information provided. All comments should reference the docket number AMS–LPS–16–0071, the date of submission, and the page number of this issue of the **Federal Register**. Comments may also be sent to Mike Dinkel, Agricultural Marketing Specialist; Research and Promotion Division; Livestock, Poultry, and Seed Program, AMS, USDA; Room 2610–S, STOP 0249, 1400 Independence Avenue SW., Washington, DC 20250–0249; or via fax to (202) 720–1125. Comments will be made available for public inspection at the above address during regular business hours or via the Internet at www.regulations.gov.

FOR FURTHER INFORMATION CONTACT:

Mike Dinkel, Research and Promotion Division, at (301) 352–7497; fax (202) 720–1125; or by email at Michael.Dinkel@ams.usda.gov.

SUPPLEMENTARY INFORMATION:

Executive Orders 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. This rule has been determined not to be significant for purposes of Executive Order 12866 or Executive Order 13563. Accordingly, the Office of Management and Budget (OMB) has waived the review process.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. The Act prohibits states or political subdivisions of a state to impose any requirement

that is in addition to, or inconsistent with, any requirement of the Act. There are no civil justice implications associated with this proposed rule.

Regulatory Flexibility Act and Paperwork Reduction Act

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA) [5 U.S.C. 601–612], the Administrator of AMS has considered the economic effect of this action on small entities and has determined that this proposed rule would not have a significant economic impact on a substantial number of small entities. The purpose of RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly burdened.

In the February 2013 publication of “Farms, Land in Farms, and Livestock Operations,” USDA’s National Agricultural Statistics Service (NASS) estimated that the number of operations in the United States with cattle in 2012 totaled approximately 915,000, down from 950,000 in 2009. There are approximately 270 importers who import beef or edible beef products into the United States and 198 importers who import live cattle into the United States. It is estimated that the majority of those operations subject to the Order are considered small businesses under the criteria established by the Small Business Administration (SBA) [13 CFR 121.201]. SBA generally defines small agricultural service firms as those having annual receipts of \$7.5 million or less, and small agricultural producers are generally defined as those having annual receipts of less than \$750,000.

The proposed rule imposes no new burden on the industry. It only adjusts representation on the Board to reflect changes in domestic cattle inventory, as well as in cattle and beef imports. The adjustments are required by the Order and would result in a decrease in Board membership from 100 to 99.

AMS is committed to complying with the E-Government Act of 2002 to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to government information and services, and for other purposes.

USDA has not identified any relevant federal rules that duplicate, overlap, or conflict with this rule.

Background and Proposed Action

The Board was initially appointed on August 4, 1986, pursuant to the provisions of the Act [7 U.S.C. 2901–2911] and the Order issued thereunder. Domestic representation on the Board is

based on cattle inventory numbers, while importer representation is based on the conversion of the volume of imported cattle, beef, and beef products into live animal equivalencies.

Reapportionment

Section 1260.141(b) of the Order provides that the Board shall be composed of cattle producers and importers appointed by the Secretary of Agriculture from nominations submitted by certified producer and importer organizations. A producer may only be nominated to represent the State or unit in which that producer is a resident.

Section 1260.141(c) of the Order provides that at least every 3 years, but not more than every 2 years, the Board shall review the geographic distribution of cattle inventories throughout the United States and the volume of imported cattle, beef, and beef products and, if warranted, shall reapportion units and/or modify the number of Board members from units in order to reflect the geographic distribution of cattle production volume in the United States and the volume of cattle, beef, or beef products imported into the United States.

Section 1260.141(d) of the Order authorizes the Board to recommend to the Secretary modifications to the number of cattle per unit necessary for representation on the Board.

Section 1260.141(e)(1) provides that each geographic unit or State that includes a total cattle inventory equal to or greater than 500,000 head of cattle shall be entitled to one representative on the Board. Section 1260.141(e)(2) provides that States that do not have total cattle inventories equal to or greater than 500,000 head shall be grouped, to the extent practicable, into geographically-contiguous units, each of which have a combined total inventory of not less than 500,000 head. Such grouped units are entitled to at least one representative on the Board. Each unit is entitled to an additional Board member for each additional 1 million head of cattle within the unit, as provided in § 1260.141(e)(4). Further, as provided in § 1260.141(e)(3), importers are represented by a single unit, with their number of Board members based on a conversion of the total volume of imported cattle, beef, or beef products into live animal equivalencies.

The initial Board appointed in 1986 was composed of 113 members. Reapportionment, based on a 3-year average of cattle inventory numbers and import data, reduced the Board to 111

members in 1990 and to 107 members in 1993 before the Board was increased back to 111 members in 1996. The Board decreased to 110 members in 1999, 108 members in 2001, and 104 members in 2005; increased to 106 members in 2009; decreased to 103 members in 2011; and decreased to 100 members in 2013. This proposal would amend § 1260.141(a) by increasing the importers from 6 to 7 members, decreasing the State of Virginia from 2 members to 1 member and decreasing the State of Texas from 13 to 12 members. Overall, if adopted, it would decrease the number of Board members from 100 to 99, with appointments for terms effective early in 2018.

The currently proposed, updated Board representation by States or geographic units is based on an average of the January 1, 2011, 2012, and 2013 inventory of cattle in the various States as reported by NASS. The proposed importer representation would be based on a combined total average of the 2011, 2012, and 2013 live cattle imports as published by USDA's Foreign Agricultural Service and the average of the 2011, 2012, and 2013 live animal equivalents for imported beef and beef products.

In considering reapportionment, the Board reviewed cattle inventories on the date January 1 in 2014, 2015, and 2016, as well as cattle, beef, and beef product import data for the period of January 1, 2013, to December 31, 2015. The Board recommended that a 3-year average of cattle inventories and import numbers should be continued. The Board determined that an average of the January 1, 2014, 2015, and 2016 cattle inventory numbers would best reflect the number of cattle in each state or unit since publication of the last reapportionment rule published in 2014 [79 FR 46961]. The Board reviewed data published by the USDA's Economic Research Service to determine proper importer representation. The Board recommended the use of the average of a combined total of the 2013, 2014, and 2015 cattle import data and the average of the 2013, 2014, and 2015 live animal equivalents for imported beef products. The method used to calculate the total number of live animal equivalents was the same as that used in the previous reapportionment of the Board. The live animal equivalent weight was changed in 2006 from 509 pounds to 592 pounds [71 FR 47074].

The Board's recommended reapportionment plan, if adopted, would decrease the number of

representatives on the Board from 100 to 99. From the Board's analysis of USDA cattle inventories and import equivalencies, Virginia would lose one Board seat and Texas would lose one Board seat. The importers would gain one Board seat.

The States and units affected by the reapportionment plan and the current and proposed member representation per unit are as follows:

State/unit	Current representation	Revised representation
Virginia	2	1
Texas	13	12
Importers	6	7

The Board reapportionment as proposed by this rulemaking would take effect, if adopted, with appointments to fill positions early in the year 2018.

A 60-day comment period is provided to allow interested persons to respond to this proposal. Thirty days is deemed appropriate to facilitate the adjustment of the representation on the Board, which is required by the Order at least every 3 years but not more than every 2 years, and to allow for the annual nomination and appointment process for Board appointments that will be effective early in 2018.

List of Subjects in 7 CFR Part 1260

Administrative practice and procedure, Advertising, Agricultural research, Imports, Meat and meat products, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, AMS proposes to amend 7 CFR part 1260 as follows:

PART 1260—BEEF PROMOTION AND RESEARCH

■ 1. The authority citation for 7 CFR part 1260 continues to read as follows:

Authority: 7 U.S.C. 2901–2911 and 7 U.S.C. 7401.

■ 2. Revise § 1260.141 paragraph (a) and the table immediately following to read as follows:

§ 1260.141 Membership of Board.

(a) Beginning with the 2017 Board nominations and the associated appointments effective early in the year 2018, the United States shall be divided into 37 geographical units and 1 unit representing importers, for a total of 38 units. The number of Board members from each unit shall be as follows:

CATTLE AND CALVES¹

State/unit	(1,000 head)	Directors
1. Arizona	900	1
2. Arkansas	1,660	2

BILLING CODE 3410-02-P

DEPARTMENT OF AGRICULTURE**Office of Procurement and Property Management****7 CFR Part 3201**

RIN 0599-AA24

Designation of Product Categories for Federal Procurement**AGENCY:** Office of Procurement and Property Management, USDA.**ACTION:** Notice of proposed rulemaking.

SUMMARY: The U.S. Department of Agriculture (USDA) is proposing to amend the Guidelines for Designating Biobased Products for Federal Procurement (Guidelines) to add 12 sections that will designate 12 product categories composed of intermediate ingredient and feedstock materials within which biobased products would be afforded procurement preference by Federal agencies and their contractors. USDA is also proposing minimum biobased contents for each of these product categories.

DATES: USDA will accept public comments on this proposed rule until March 14, 2017.

ADDRESSES: You may submit comments by any of the following methods. All submissions received must include the agency name and Regulatory Information Number (RIN). The RIN for this rulemaking is 0599-AA24. Also, please identify submittals as pertaining to the "Proposed Designation of Product Categories."

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Email:* biopreferred_support@amecfw.com. Include RIN number 0599-AA24 and "Proposed Designation of Product Categories" on the subject line. Please include your name and address in your message.

- *Mail/commercial/hand delivery:* Mail or deliver your comments to: Marie Wheat, USDA, Office of Procurement and Property Management, Room 361, Reporters Building, 300 7th St. SW., Washington, DC 20024.

- Persons with disabilities who require alternative means for communication for regulatory

information (Braille, large print, audiotape, etc.) should contact the USDA TARGET Center at (202) 720-2600 (voice) and (202) 690-0942 (TTY).

FOR FURTHER INFORMATION CONTACT:

Marie Wheat, USDA, Office of Procurement and Property Management, Room 361, Reporters Building, 300 7th St. SW., Washington, DC 20024; email: biopreferred_support@amecfw.com; phone (202) 239-4502. Information regarding the Federal preferred procurement program (one initiative of the BioPreferred Program) is available on the Internet at <http://www.biopreferred.gov>.

SUPPLEMENTARY INFORMATION: The information presented in this preamble is organized as follows:

- I. Authority
- II. Background
- III. Summary of Today's Proposed Rule
- IV. Designation of Product Categories, Minimum Biobased Contents, and Time Frame
 - A. Background
 - B. Product Categories and Minimum Biobased Contents Proposed for Designation
 - C. Compliance Date for Procurement Preference and Incorporation Into Specifications
- V. Where can agencies get more information on these USDA-designated product categories?
- VI. Regulatory Information
 - A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review
 - B. Regulatory Flexibility Act (RFA)
 - C. Executive Order 12630: Governmental Actions and Interference With Constitutionally Protected Property Rights
 - D. Executive Order 12988: Civil Justice Reform
 - E. Executive Order 13132: Federalism
 - F. Unfunded Mandates Reform Act of 1995
 - G. Executive Order 12372: Intergovernmental Review of Federal Programs
 - H. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments
 - I. Paperwork Reduction Act
 - J. E-Government Act

I. Authority

The designation of these product categories is proposed under the authority of section 9002 of the Farm Security and Rural Investment Act of 2002 (the 2002 Farm Bill), as amended by the Food, Conservation, and Energy Act of 2008 (the 2008 Farm Bill), and further amended by the Agricultural Act of 2014 (the 2014 Farm Bill), 7 U.S.C. 8102. (Section 9002 of the 2002 Farm Bill, as amended by the 2008 and the 2014 Farm Bills, is referred to in this document as "section 9002".)

II. Background

Section 9002 provides for the preferred procurement of biobased products by Federal procuring agencies and is referred to hereafter in this **Federal Register** notice as the "Federal preferred procurement program." Under the provisions specified in the "Guidelines for Designating Biobased Products for Federal Procurement" (7 CFR part 3201) (Guidelines), the USDA BioPreferred Program "designates" product categories to which the preferred procurement requirements apply by listing them in subpart B of 7 CFR part 3201.

The term "product category" is used as a generic term in the designation process to mean a grouping of specific products that perform a similar function. As originally finalized, the Guidelines included provisions for the designation of product categories that were composed of finished, consumer products such as mobile equipment hydraulic fluids, penetrating lubricants, or hand cleaners and sanitizers.

The 2008 and 2014 Farm Bills directed USDA to expand the scope of the Guidelines to include the designation of product categories composed of intermediate ingredients and feedstock materials. Specifically, the 2008 Farm Bill stated that USDA shall "designate those intermediate ingredients and feedstocks that are or can be used to produce items that will be subject" to the Federal preferred procurement program. The term "intermediate ingredient and feedstock" is defined in the Farm Bill as "a material or compound made in whole or in significant part from biological products, including renewable agricultural materials (including plant, animal, and marine materials) or forestry materials, that are subsequently used to make a more complex compound or product." The term "intermediates" is used in the titles of the product categories being proposed for designation today to distinguish these proposed categories from the finished, consumer products previously designated by USDA. Additionally, in section 9001 of the 2014 Farm Bill, the term "renewable chemical" is defined as "a monomer, polymer, plastic, formulated product, or chemical substance produced from renewable biomass." Thus, most products that are described as "renewable chemicals" will be eligible for the Federal preferred procurement program because they meet the definition of one or more of the intermediate product categories included in today's proposed rule.

For example, the chemical substance known as citric acid, if biobased, may be considered as a renewable chemical and an intermediate ingredient for finished products in the cleaning, personal care, or textiles industries. Thus, biobased citric acid could be categorized in one or all of the following intermediate product categories that are proposed for designation today: Intermediates—Chemicals, Intermediates—Textile Processing Materials, Intermediates—Cleaner Components, or Intermediates—Personal Care Product Components. Additionally, the chemical substance known as oleic acid may be considered as a renewable chemical and an intermediate ingredient for finished products in the cleaning, personal care, or lubricant industries. Therefore, oleic acid could be categorized in one or all of the following intermediate product categories that are proposed for designation today: Intermediates—Chemicals, Intermediates—Lubricant Components, Intermediates—Cleaner Components, or Intermediates—Personal Care Product Components. These examples show that the intermediate product categories being proposed today may accommodate a variety of renewable chemical substances.

Although the Federal government does not typically purchase large quantities of intermediate ingredients and feedstock materials, designating such materials represents a means to identify and include finished products made from such designated materials in the Federal preferred procurement program. In the August 1, 2014 **Federal Register** (79 FR 44641), USDA finalized amendments to the Guidelines establishing procedures for designating intermediate ingredient or feedstock categories. Today's proposed rule follows the established procedures for designating intermediate ingredient product categories. Soon, USDA will propose designating product categories comprised of finished products made from intermediate ingredients that may be categorized within the product categories proposed for designation in today's rule. Therefore, USDA requests manufacturers and members of the public to submit technical information related to the designation of such finished product categories to biopreferred_support@amecfw.com. Specific technical information to submit includes the following: A finished product category name, descriptions of finished products that belong in this product category, how these finished products are used, any special features of these finished products, estimated or

tested biobased contents for each finished product, applicable performance standards that the finished products meet, and which intermediate ingredient and feedstock categories are used to make these finished products. Such information will be valuable in supporting the selection of product categories for designation but will be evaluated independently from today's proposed rule. Please refer to Section IV.B. of today's proposed rule for further details on the information required to designate product categories for Federal procurement preference.

Once USDA designates a product category, procuring agencies are required, with some exceptions, to purchase biobased products within these designated product categories where the purchase price of the procurement product exceeds \$10,000 or where the quantity of such products or the functionally equivalent products purchased over the preceding fiscal year equaled \$10,000 or more. Procuring agencies must procure biobased products within each product category unless they determine that products within a product category are not reasonably available within a reasonable period of time, fail to meet the reasonable performance standards of the procuring agencies, or are available only at an unreasonable price. As stated in the Guidelines, biobased products that are merely incidental to Federal funding are excluded from the Federal preferred procurement program; that is, the requirements to purchase biobased products do not apply to such purchases if they are unrelated to or incidental to the purpose of the Federal contract. For example, if a janitorial service company purchases cleaning supplies to be used in the performance of a Federal contract, the cleaning supplies would be subject to the authority of the Federal preferred procurement program. However, cleaning supplies purchased to maintain the offices from which the janitorial service company manages the Federal contract would be incidental to the performance of the contract and, as such, would not be subject to the authority of the Federal preferred procurement program. In implementing the Federal preferred procurement program for biobased products, procuring agencies should follow their procurement rules and Office of Federal Procurement Policy guidance on buying non-biobased products when biobased products exist and should document exceptions taken for price, performance, and availability. The definition of "procuring agency" in section 9002 includes both Federal agencies and "a

person that is a party to a contract with any Federal agency, with respect to work performed under such a contract." Thus, Federal contractors, as well as Federal agencies, are expressly subject to the procurement preference provisions of section 9002.

USDA recognizes that the performance needs for a given application are important criteria in making procurement decisions. USDA is not requiring procuring agencies to limit their choices to biobased products that are categorized within the product categories proposed for designation in this proposed rule. Rather, the effect of the designation of the product categories is to require procuring agencies to determine their performance needs, determine whether there are qualified biobased products that are categorized within the designated product categories that meet the reasonable performance standards for those needs, and purchase such qualified biobased products to the maximum extent practicable as required by section 9002.

Section 9002(a)(3)(B) requires USDA to provide information to procuring agencies on the availability, relative price, and performance of such products and to recommend, where appropriate, the minimum level of biobased content to be contained in the procured products.

Subcategorization. Most of the product categories USDA has designated for Federal preferred procurement cover a wide range of products. For some product categories, there are subgroups of products that meet different requirements, uses and/or different performance specifications. For example, within the product category "hand cleaners and sanitizers," products that are used in medical offices may be required to meet performance specifications for sanitizing, while other products that are intended for general purpose hand washing may not need to meet these specifications. Where such subgroups exist, USDA intends to create subcategories. Thus, for example, for the product category "hand cleaners and sanitizers," USDA determined that it was reasonable to create a "hand cleaner" subcategory and a "hand sanitizer" subcategory. Sanitizing specifications are applicable to the latter subcategory, but not the former. In sum, USDA looks at the products within each product category to evaluate whether there are groups of products within the category that have unique characteristics or that meet different performance specifications and, if USDA finds these types of differences within a given product category, it intends to create subcategories with the

minimum biobased content based on the tested products within the subcategory.

For some product categories, however, USDA may not have sufficient information at the time of proposal to create subcategories. For example, USDA may know that there are different performance specifications that metal cleaners and corrosion remover products are required to meet, but it may have information on only one type of metal cleaner and corrosion remover product. In such instances, USDA may either designate the product category without creating subcategories (*i.e.*, defer the creation of subcategories) or designate one subcategory and defer designation of other subcategories within the product category until additional information is obtained. Once USDA has received sufficient additional information to justify the designation of a subcategory, the subcategory will be designated through the proposed and final rulemaking process.

USDA has not created subcategories for any of the product categories being proposed for designation in today's rule. USDA requests public comment, along with supporting data, on the need to create subcategories within any of the proposed product categories. If public comments are received that support the creation of subcategories, USDA will consider the supporting data and may create subcategories in the final rule.

Minimum Biobased Contents. The minimum biobased contents being proposed in this rule are based on products for which USDA has biobased content test data. USDA obtains biobased content data in conjunction with product manufacturer's applications for certification to use the USDA Certified Biobased Product label. Products that are certified to display the label must undergo biobased content testing by an independent, third party testing lab using ASTM D6866, "Standard Test Methods for Determining the Biobased Content of Solid, Liquid, and Gaseous Samples Using Radiocarbon Analysis". These test data become part of the BioPreferred Program database and their use in setting the minimum biobased content for designated product categories results in a more efficient process for both the Program and manufacturers of products within the product categories.

As a result of public comments received on the first designated product categories rulemaking proposal, USDA decided to account for the slight imprecision in the analytical method used to determine biobased content of products when establishing the minimum biobased content. Thus,

rather than establishing the minimum biobased content for a product category at the tested biobased content of the product selected as the basis for the minimum value, USDA is establishing the minimum biobased content for each product category at a level three (3) percentage points lower than the tested value. USDA believes that this adjustment is appropriate to account for the expected variations in analytical results. USDA encourages procuring agencies to seek products with the highest biobased content that is practicable in all of the proposed designated product categories.

In addition to considering the biobased content test data for each product category, USDA also considers other factors including product performance information. USDA evaluates this information to determine whether some products that may have a lower biobased content also have unique performance or applicability attributes that would justify setting the minimum biobased content at a level that would include these products. For example, a lubricant product that has a lower biobased content than others within a product category but is formulated to perform over a wider temperature range than the other products may be more desirable to Federal agencies. Thus, it would be beneficial to set the minimum biobased content for the product category at a level that would include the product with superior performance features.

USDA also considers the overall range of the tested biobased contents within a product category, groupings of similar values, and breaks (significant gaps between two groups of values) in the biobased content test data array. For example, in a previously proposed product category, the biobased contents of 7 tested products ranged from 17 to 100 percent, as follows: 17, 41, 78, 79, 94, 98, and 100 percent. Because this is a very wide range, and because there is a significant gap in the data between the 41 percent biobased product and the 78 percent biobased product, USDA reviewed the product literature to determine whether subcategories could be created within this product category. USDA found that the available product information did not justify creating a subcategory based on the 17 percent product or the 41 percent biobased content product. Further, USDA did not find any performance claims that would justify setting the minimum biobased content based on either the 17 percent or the 41 percent biobased content products. Thus, USDA set the minimum biobased content for this product category at 75 percent, based on the

product with a tested biobased content of 78 percent. USDA believes that this evaluation process allows it to establish minimum biobased contents based on a broad set of factors to assist the Federal procurement community in its decisions to purchase biobased products.

USDA makes every effort to obtain biobased content test data on multiple products within each product category. For most designated product categories, USDA has biobased content test data on more than one product within the category. However, in some cases, USDA has been able to obtain biobased content data for only a single product within a designated product category. As USDA obtains additional data on the biobased contents of products within these designated product categories or their subcategories, USDA will evaluate whether the minimum biobased content for a designated product category or subcategory will be revised.

Overlap with EPA's Comprehensive Procurement Guideline program for recovered content products under the Resource Conservation and Recovery Act (RCRA) Section 6002. Some of the products that are within biobased product categories designated for Federal preferred procurement under this program may also be within categories the Environmental Protection Agency (EPA) has designated under the EPA's Comprehensive Procurement Guideline (CPG) for products containing recovered (or recycled) materials. Because today's proposed rule would designate intermediate ingredient product categories rather than categories of finished, consumer-use products, USDA does not believe that there is a direct overlap between these categories and CPG categories. However, if such an overlap situation is discovered, USDA is asking manufacturers of qualifying biobased products to make additional product and performance information available to Federal agencies conducting market research to assist them in determining whether the biobased products in question are, or are not, the same products for the same uses as the recovered content products. Manufacturers are asked to provide information highlighting the sustainable features of their biobased products and to indicate the various suggested uses of their product and the performance standards against which a particular product has been tested. In addition, depending on the type of biobased product, manufacturers are being asked to provide other types of information, such as whether the product contains fossil energy-based components (including petroleum, coal, and natural gas) and whether the product contains

recovered materials. Federal agencies also may review available information on a product's biobased content. Federal agencies may then use this information to make purchasing decisions based on the sustainability features of the products.

Where a biobased product is used for the same purposes and to meet the same Federal agency performance requirements as an EPA-designated recovered content product, the Federal agency must purchase the recovered content product. For example, if a biobased hydraulic fluid is to be used as a fluid in hydraulic systems and because "lubricating oils containing re-refined oil" has already been designated by EPA for that purpose, then the Federal agency must purchase the EPA-designated recovered content product, "lubricating oils containing re-refined oil." If, on the other hand, the biobased hydraulic fluid is to be used to address a Federal agency's certain environmental or health performance requirements that the EPA-designated recovered content product would not meet, then the biobased product should be given preference, subject to reasonable price, availability, and performance considerations.

Federal Government Purchase of Sustainable Products. The Federal government's sustainable purchasing program includes the following three mandatory preference programs for designated products: The BioPreferred Program, the EPA's Comprehensive Procurement Guideline for products containing recovered materials, and the Environmentally Preferable Purchasing program. The Office of the Chief Sustainability Officer (OCSO) and the Office of Management and Budget (OMB) encourage agencies to implement these components comprehensively when purchasing products and services.

Procuring agencies should note that not all biobased products are "environmentally preferable." For example, unless cleaning products contain no or reduced levels of metals and toxic or hazardous constituents, they can be harmful to aquatic life, the environment, and/or workers. Household cleaning products that are formulated to be disinfectants are required, under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), to be registered with EPA (unless they are formulated with exempt ingredients) and must meet specific labeling requirements warning of the potential risks associated with misuse of such products. When purchasing environmentally preferable cleaning products, many Federal agencies specify that products must meet Green Seal

standards for institutional cleaning products or that the products have been reformulated in accordance with recommendations from the EPA's Safer Choice Program (previously known as the "Design for the Environment" (DfE) program). Both the Green Seal standards and the Safer Choice program identify chemicals of concern in cleaning products. These include zinc and other metals, formaldehyde, ammonia, alkyl phenol ethoxylates, ethylene glycol, and volatile organic compounds. In addition, both require that cleaning products have neutral pH.

In contrast, some biobased products may be environmentally preferable to some products that meet Green Seal standards for institutional cleaning products or that have been reformulated in accordance with EPA's Safer Choice program. To fully compare products, one must look at the "cradle-to-grave" impacts of the manufacture, use, and disposal of products. USDA has been unable to perform the analyses necessary to determine the "cradle-to-grave" impacts of products within the product categories being proposed for designation because of resource constraints.

One consideration of a product's impact on the environment is whether (and to what degree) it introduces new, fossil carbon into the atmosphere. Fossil carbon is derived from non-renewable sources (typically fossil fuels such as coal and oil), whereas renewable biomass carbon is derived from renewable sources (biomass). Qualifying biobased products offer the user the opportunity to manage his or her impact on the carbon cycle and reduce the introduction of new fossil carbon into the atmosphere.

Other Federal Preferred Procurement Programs. Federal procurement officials should also note that many biobased products may be available for purchase by Federal agencies through the AbilityOne Program (formerly known as the Javits-Wagner-O'Day (JWOD) program). Under this program, members of organizations including the National Industries for the Blind (NIB) and SourceAmerica (formerly known as the National Industries for the Severely Handicapped) offer products and services for preferred procurement by Federal agencies. A search of the AbilityOne Program's online catalog (www.abilityone.gov) indicated that the types of intermediate ingredient product categories being proposed for designation in today's proposed rule are not available through the AbilityOne Program. USDA notes, however, that if such materials are offered at some point in the future, their procurement through

the AbilityOne Program would further the objectives of both the AbilityOne Program and the Federal preferred procurement program.

Outreach. To augment its own research, USDA consults with industry and Federal stakeholders to the Federal preferred procurement program during the development of the rulemaking packages for the designation of product categories. USDA consults with stakeholders to gather information used in determining the order of product category designation and in identifying Manufacturers producing and marketing products that are categorized within a product category proposed for designation; performance standards used by Federal agencies evaluating products to be procured; and warranty information used by manufacturers of end user equipment and other products with regard to biobased products.

III. Summary of Today's Proposed Rule

USDA is proposing to designate the following product categories for Federal preferred procurement: Intermediates—Plastic Resins; Intermediates—Chemicals; Intermediates—Paint and Coating Components; Intermediates—Textile Processing Materials; Intermediates—Foams; Intermediates—Fibers and Fabrics; Intermediates—Lubricant Components; Intermediates—Binders; Intermediates—Cleaner Components; Intermediates—Personal Care Product Components; Intermediates—Oils, Fats, and Waxes; and Intermediates—Rubber Materials. In addition, USDA is proposing a minimum biobased content for each of these product categories and subcategories. Lastly, USDA is proposing a date by which Federal agencies must incorporate these designated product categories into their procurement specifications (see Section IV.E).

USDA is working with manufacturers and vendors to make all relevant product and manufacturer contact information available on the BioPreferred Program's Web site. Steps USDA has implemented, or will implement, include: Making direct contact with submitting companies through email and phone conversations to encourage completion of product listing; coordinating outreach efforts with intermediate material producers to encourage participation of their customer base; conducting targeted outreach with industry and commodity groups to educate stakeholders on the importance of providing complete product information; participating in industry conferences and meetings to educate companies on program benefits

and requirements; and communicating the potential for expanded markets beyond the Federal government, to include State and local governments, as well as the general public markets. Section V provides instructions to agencies on how to obtain this information on products within these product categories through the BioPreferred Program's Web site: <http://www.biopreferred.gov>.

Comments. USDA invites public comment on the proposed designation of these intermediate ingredient product categories, including the definition, proposed minimum biobased content, and any of the relevant analyses performed during their selection. In addition, USDA invites comments and information in the following areas:

1. We have attempted to identify relevant and appropriate performance standards and other relevant measures of performance for each of the proposed product categories. If you know of other such standards or relevant measures of performance for any of the proposed product categories, USDA requests that you submit information identifying such standards and measures, including their name (and other identifying information as necessary), identifying who is using the standard/measure, and describing the circumstances under which the product is being used.

2. Many biobased products within the product categories being proposed for designation will have positive environmental and human health attributes. USDA is seeking comments on such attributes in order to provide additional information on the BioPreferred Program's Web site. This information will then be available to Federal procuring agencies and will assist them in making informed sustainable procurement decisions. When possible, please provide appropriate documentation to support the environmental and human health attributes you describe.

3. Some product categories being proposed for designation today have wide ranges of tested biobased contents. For the reasons discussed later in this preamble, USDA is proposing a minimum biobased content for these product categories that would allow most of the tested products to be eligible for Federal preferred procurement. USDA welcomes comments on the appropriateness of the proposed minimum biobased contents for these product categories and whether there are potential subcategories within the product categories that should be considered.

4. Today's proposed rule is expected to have both positive and negative

impacts on individual businesses, including small businesses. USDA anticipates that the biobased Federal preferred procurement program will provide additional opportunities for businesses and manufacturers to begin supplying products under the proposed designated biobased product categories to Federal agencies and their contractors. However, other businesses and manufacturers that supply only non-qualifying products and do not offer biobased alternatives may experience a decrease in demand from Federal agencies and their contractors. Because USDA has been unable to determine the number of businesses, including small businesses, which may be adversely affected by today's proposed rule USDA requests comment on how many small entities may be affected by this rule and on the nature and extent of that effect.

All comments should be submitted as directed in the **ADDRESSES** section above.

5. As stated in Section II of today's proposed rule, USDA will soon propose designating product categories comprised of finished products made from intermediate ingredients that may be categorized within the product categories proposed for designation in today's rule. Therefore, USDA requests manufacturers and members of the public to submit technical information related to the designation of such finished product categories to biopreferred_support@amecfw.com. Specific technical information to submit includes the following: A finished product category name, descriptions of finished products that belong in this product category, how these finished products are used, any special features of these finished products, estimated or tested biobased contents for each finished product, applicable performance standards that the finished products meet, and which intermediate ingredient and feedstock categories are used to make these finished products. Such information will be valuable in supporting the selection of product categories for designation but will be evaluated independently from today's proposed rule. Please refer to Section IV.B. of today's proposed rule for further details on the information required to designate product categories for Federal procurement preference.

IV. Designation of Product Categories, Minimum Biobased Contents, and Time Frame

A. Background

When designating product categories for Federal preferred procurement,

section 9002 requires USDA to consider: (1) The availability of biobased products within the product categories and (2) the economic and technological feasibility of using those products.

In considering a product's availability, USDA uses several sources of information. The primary source of information for the product categories being proposed for designation is USDA's database of manufacturers and products that have been certified to display the USDA Certified Biobased Product label. In addition, USDA performs Internet searches, contacts trade associations and commodity groups, and contacts manufacturers and vendors to identify those with biobased products within product categories being considered for designation. USDA uses the results of these same searches to determine if a product category is generally available.

In considering a product category's economic and technological feasibility, USDA examines evidence pointing to the general commercial use of a product and its life-cycle cost and performance characteristics. This information is obtained from the sources used to assess a product's availability. Commercial use, in turn, is evidenced by any manufacturer and vendor information on the availability, relative prices, and performance of their products as well as by evidence of a product being purchased by a procuring agency or other entity, where available. In sum, USDA considers a product category economically and technologically feasible for purposes of designation if products within that product category are being offered and used in the marketplace.

As discussed earlier, USDA has implemented, or will implement, several steps intended to educate the manufacturers and other stakeholders on the benefits of this program and the need to make relevant information, including manufacturer contact information, available to procurement officials via the BioPreferred Program Web site. Additional information on specific products within the product categories proposed for designation may also be obtained directly from the manufacturers of the products. USDA has also provided information on the BioPreferred Program Web site for manufacturers and vendors who wish to position their businesses as biobased product vendors to the Federal Government. This information can be accessed by clicking on the "Selling Biobased" tab on the left side of the home page of the BioPreferred Program's Web site.

USDA recognizes that information related to the functional performance of biobased products is a primary factor in making the decision to purchase these products. USDA is gathering information on industry standard test methods and performance standards that manufacturers are using to evaluate the functional performance of their products. (Test methods are procedures used to provide information on a certain attribute of a product. For example, a test method might determine how many bacteria are killed. Performance standards identify the level at which a product must perform in order for it to be “acceptable” to the entity that set the performance standard. For example, a performance standard might require that a certain percentage (e.g., 95 percent) of bacteria must be killed through the use of the product.) The primary sources of information on these test methods and performance standards are manufacturers of biobased products within these product categories. Additional test methods and performance standards are also identified during meetings of the interagency council and during the review process for each proposed rule. We have listed, under the detailed discussion of each product category proposed for designation (presented in Section IV.B), the functional performance test methods, performance standards, product certifications, and other measures of performance associated with the functional aspects of products identified during the development of this **Federal Register** notice for these product categories.

While this process identifies many of the relevant test methods and standards, USDA recognizes that those identified herein do not represent all of the methods and standards that may be applicable for a product category or for any individual product within the category. As noted earlier in this preamble, USDA is requesting identification of other relevant performance standards and measures of performance. As the program becomes fully implemented, these and other additional relevant performance standards will be available on the BioPreferred Program’s Web site.

To propose a product category for designation, USDA must have sufficient information on a sufficient number of products within the category to be able to assess its availability and its economic and technological feasibility. For some product categories, there may be numerous products available. For others, there may be very few products currently available. Given the infancy of the market for some product categories,

it is expected that categories with only a single product will be identified.

Further, given that the intent of section 9002 is largely to stimulate the production of new biobased products and to energize emerging markets for those products, USDA has determined it is appropriate to designate a product category or subcategory for Federal preferred procurement even when there is only a single product with a single supplier. Similarly, the documented availability and benefits of even a very small percentage of all products that may exist within a product category are also considered sufficient to support designation.

Exemptions. Products that are exempt from the biobased procurement preference are military equipment, defined as any product or system designed or procured for combat or combat-related missions, and spacecraft systems and launch support equipment. However, USDA points out that it is not the intent of these exemptions to imply that biobased products are inferior to non-biobased products and agencies are encouraged to purchase biobased products wherever performance, availability and reasonable price indicates that such purchases are justified.

Although each product category in today’s proposed rule would be exempt from the procurement preference requirement when used in spacecraft systems or launch support application or in military equipment used in combat and combat-related applications, this exemption does not extend to contractors performing work other than direct maintenance and support of the spacecraft or launch support equipment or combat or combat-related missions. For example, if a contractor is applying a paint remover product as a step in refurbishing office furniture on a military base, the paint remover the contractor purchases should be a qualifying biobased paint remover. The exemption does apply, however, if the product being purchased by the contractor is for use in combat or combat-related missions or for use in space or launch applications. After reviewing the regulatory requirement and the relevant contract, where contractors have any questions on the exemption, they should contact the cognizant contracting officer.

B. Product Categories and Minimum Biobased Contents Proposed for Designation

In today’s proposed rule, USDA is proposing to designate the following product categories for the Federal preferred procurement program:

Intermediates—Plastic Resins; Intermediates—Chemicals; Intermediates—Paint and Coating Components; Intermediates—Textile Processing Materials; Intermediates—Foams; Intermediates—Fibers and Fabrics; Intermediates—Lubricant Components; Intermediates—Binders; Intermediates—Cleaner Components; Intermediates—Personal Care Product Components; Intermediates—Oils, Fats, and Waxes; and Intermediates—Rubber Materials.

USDA has determined that each of these product categories meets the necessary statutory requirements—namely, that they are being produced with biobased materials and that their procurement by procuring agencies will carry out the following objectives of section 9002:

- To increase demand for biobased products, which would in turn increase demand for agricultural commodities that can serve as feedstocks for the production of biobased products;
- To spur development of the industrial base through value-added agricultural processing and manufacturing in rural communities; and
- To enhance the Nation’s energy security by substituting biobased products for products derived from imported oil and natural gas.

Further, USDA anticipates that the designation of these intermediate ingredient product categories will facilitate the designation of the many categories of finished consumer products that are made from these biobased intermediate ingredients. This designation of finished products made from designated ingredients was one key addition to Section 9002 made by the 2008 Farm Bill.

In addition, because of the participation by the manufacturers of these products in the voluntary labeling initiative, USDA has sufficient information on these product categories to determine their availability and to conduct the requisite analyses to determine their biobased content and their economic and technological feasibility.

The proposed designated product categories are discussed in the following sections.

1. Intermediates—Plastic Resins (Minimum Biobased Content 22 Percent)

Intermediates—Plastic Resins are materials that are typically viscous liquids with the ability to harden permanently and may exist in liquid or solid (powder or pellets) states. Intermediates—Plastic Resins may be

used in a variety of finished products neat, consisting of a single resin, or as a homogeneous blend of two or more neat resins, or composite, containing two or more distinct materials such as fiber-reinforced resins. Additionally, Intermediates—Plastic Resins may be used in finished products as additives such as plasticizers, pigments, thermal stability agents, or impact modifiers.

USDA identified 62 manufacturers and suppliers of 150 biobased Intermediates—Plastic Resins. These manufacturers and suppliers do not include all manufacturers and suppliers of biobased Intermediates—Plastic Resins, merely those identified through the USDA Certified Biobased Products in the BioPreferred Program's database. These 150 biobased Intermediates—Plastic Resins range in biobased content from 25 percent to 100 percent, as measured by ASTM D6866. In establishing the minimum biobased content requirement for this product category, USDA did not find a reason to exclude any of the products categorized as Intermediates—Plastic Resins. Thus, the proposed minimum biobased content for this product category is 22 percent, based on the products with a tested biobased content of 25 percent.

Information supplied by these manufacturers and suppliers indicates that these products are being used commercially. In addition, some of these manufacturers and suppliers identified nine test methods (as shown below) used in evaluating products within the product category. While there may be additional test methods, as well as performance standards, product certifications, and other measures of performance, applicable to products within this product category, the test methods identified by the manufacturers and suppliers include:

- ASTM D256; Standard Test Methods for Determining the Izod Pendulum Impact Resistance of Plastics,
- ASTM D638; Standard Test Method for Tensile Properties of Plastics,
- ASTM D790; Standard Test Methods for Flexural Properties of Unreinforced and Reinforced Plastics and Electrical Insulating Materials,
- ASTM D882; Standard Test Method for Tensile Properties of Thin Plastic Sheeting,
- ASTM D6400; Standard Specification for Labeling of Plastics Designed to be Aerobically Composted in Municipal or Industrial Facilities,
- ASTM D6868; Standard Specification for Labeling of End Items that Incorporate Plastics and Polymers as Coatings or Additives with Paper and Other Substrates Designed to be

Aerobically Composted in Municipal or Industrial Facilities,

- BPI Certification; Compostable in Municipal and Industrial Composting Facilities

- ISO 9001; Quality Management Systems—Requirements, and
- Vinçotte; OK COMPOST.

USDA has been unable to obtain data on the amount of Intermediates—Plastic Resins purchased by Federal procuring agencies. As discussed earlier, the primary benefit of designating intermediate ingredient product categories is not to promote their direct purchase by Federal agencies but, rather, to establish the framework for designation of the extensive number of finished products that are made from these intermediate ingredients.

Specific product information, including company contact, intended use, biobased content, and performance characteristics has been collected on 150 Intermediates—Plastic Resins and may be found on the BioPreferred Program's Web site.

2. Intermediates—Chemicals (Minimum Biobased Content: 22 Percent)

Intermediates—Chemicals are those used as reactants for organic synthesis reactions rather than for their functional properties in a chemical mixture; those used as building block chemicals and secondary chemicals such as glycerol, succinic acid, propanediol, and monomers such as lactic acid and propylene; those used for specific functional properties during manufacturing of other products such as pH regulators, flocculants, precipitants, neutralizing agents, emulsifiers, detergents, wetting agents, foaming agents, or dispersants; those that are added to end-use products for their specific functional properties including solvents for thinning and drying applications but excluding solvents used for cleaning; and those used for dyes, pigments, and scents including flavorings for non-food products such as lip balm.

USDA identified 27 manufacturers and suppliers of 70 biobased Intermediates—Chemicals. These 27 manufacturers and suppliers do not necessarily include all manufacturers and suppliers of Intermediates—Chemicals, merely those identified through the USDA Certified Biobased Products in the BioPreferred Program's database. These 70 biobased Intermediates—Chemicals range in biobased content from 25 percent to 100 percent, as measured by ASTM D6866. In establishing the minimum biobased content requirement for this product category, USDA did not find a reason to

exclude any of the products categorized as Intermediates—Chemicals. Thus, the proposed minimum biobased content for this product category is 22 percent, based on the products with a tested biobased content of 25 percent.

Relevant product information supplied by these manufacturers and suppliers indicates that these products are being used commercially. However, these 27 manufacturers and suppliers did not identify any applicable performance standards, test methods, or other industry measures of performance against which these products have been tested. USDA points out that the lack of identified performance standards is not relevant to the designation of a product category for Federal preferred procurement because it is not one of the criteria section 9002 requires USDA to consider in order to designate a product category for Federal preferred procurement. If and when performance standards, test methods, and other relevant measures of performance are identified for this product category, USDA will provide such information on the BioPreferred Program's Web site.

USDA has been unable to obtain data on the amount of Intermediates—Chemicals purchased by Federal procuring agencies. As discussed earlier, the primary benefit of designating intermediate ingredient product categories is not to promote their direct purchase by Federal agencies but, rather, to establish the framework for designation of the extensive number of finished products that are made from these intermediate ingredients.

Specific product information, including company contact, intended use, biobased content, and performance characteristics, has been collected on these 70 Intermediate—Chemicals products and is available on the BioPreferred Program's Web site.

3. Intermediates—Paint and Coating Components (Minimum Biobased Content 22 Percent)

Intermediates—Paint and Coating Components are ingredients used to formulate finished waterborne or solvent borne paint and coating products. Examples of Intermediates—Paint and Coating Components include binders, pigments thickeners, curing agents, modifiers, alkyd latex resins, polyols, reactive oligomers, or reactive diluents.

USDA identified 13 manufacturers and suppliers of 51 biobased Intermediates—Paint and Coating Components. These manufacturers and suppliers do not include all manufacturers and suppliers of biobased

Intermediates—Paint and Coating Components, merely those identified through the USDA Certified Biobased Products in the BioPreferred Program's database. These 51 biobased Intermediates—Paint and Coating Components range in biobased content from 25 percent to 100 percent, as measured by ASTM D6866. In establishing the minimum biobased content requirement for this product category, USDA did not find a reason to exclude any of the products categorized as Intermediates—Paint and Coating Components. Thus, the proposed minimum biobased content for this product category is 22 percent, based on the products with a tested biobased content of 25 percent.

Information supplied by these manufacturers and suppliers indicates that these products are being used commercially. However, these manufacturers and suppliers did not identify any applicable performance standards, test methods, or other industry measures of performance against which these products have been tested. USDA points out that the lack of identified performance standards is not relevant to the designation of a product category for Federal preferred procurement because it is not one of the criteria section 9002 requires USDA to consider in order to designate a product category for Federal preferred procurement. If and when performance standards, test methods, and other relevant measures of performance are identified for this product category, USDA will provide such information on the BioPreferred Program's Web site.

USDA has been unable to obtain data on the amount of Intermediates—Paint and Coating Components purchased by Federal procuring agencies. As discussed earlier, the primary benefit of designating intermediate ingredient product categories is not to promote their direct purchase by Federal agencies but, rather, to establish the framework for designation of the extensive number of finished products that are made from these intermediate ingredients.

Specific product information, including company contact, intended use, biobased content, and performance characteristics has been collected on these 51 Intermediates—Paint and Coating Components and may be found on the BioPreferred Program's Web site.

4. Intermediates—Textile Processing Materials (Minimum Biobased Content 22 Percent)

Intermediates—Textile Processing Materials are used to treat or finish textiles for the purposes of altering

textile characteristics such as color, fading, wrinkle resistance, texture, or moisture management.

USDA identified four manufacturers and suppliers of 24 biobased Intermediates—Textile Processing Materials. These manufacturers and suppliers do not include all manufacturers and suppliers of biobased Intermediates—Textile Processing Materials, merely those identified through the USDA Certified Biobased Products in the BioPreferred Program's database. These 24 biobased Intermediates—Textile Processing Materials range in biobased content from 25 percent to 98 percent, as measured by ASTM D6866. In establishing the minimum biobased content requirement for this product category, USDA did not find a reason to exclude any of the products categorized as Intermediates—Textile Processing Materials. Thus, the proposed minimum biobased content for this product category is 22 percent, based on the products with a tested biobased content of 25 percent.

Information supplied by these manufacturers and suppliers indicates that these products are being used commercially. However, these manufacturers and suppliers did not identify any applicable performance standards, test methods, or other industry measures of performance against which these products have been tested. USDA points out that the lack of identified performance standards is not relevant to the designation of a product category for Federal preferred procurement because it is not one of the criteria section 9002 requires USDA to consider in order to designate a product category for Federal preferred procurement. If and when performance standards, test methods, and other relevant measures of performance are identified for this product category, USDA will provide such information on the BioPreferred Program's Web site.

USDA has been unable to obtain data on the amount of Intermediates—Textile Processing Materials purchased by Federal procuring agencies. As discussed earlier, the primary benefit of designating intermediate ingredient product categories is not to promote their direct purchase by Federal agencies but, rather, to establish the framework for designation of the extensive number of finished products that are made from these intermediate ingredients.

Specific product information, including company contact, intended use, biobased content, and performance characteristics, has been collected on these 24 Intermediates—Textile

Processing Materials and may be found on the BioPreferred Program's Web site.

5. Intermediates—Foams (Minimum Biobased Content 22 Percent)

Intermediates—Foams are dry polymer foams used for non-construction purposes, such as cushions for furniture.

USDA identified seven manufacturers and suppliers of eight biobased Intermediates—Foams. These manufacturers and suppliers do not include all manufacturers and suppliers of biobased Intermediates—Foams, merely those identified through the USDA Certified Biobased Products in the BioPreferred Program's database. These eight biobased Intermediates—Foams were each measured by ASTM D6866 to have 25, 30, 30, 33, 33, 40, 53, and 53 percent biobased contents. In establishing the minimum biobased content requirement for this product category, USDA did not find a reason to exclude any of the products categorized as Intermediates—Foams. Thus, the proposed minimum biobased content for this product category is 22 percent, based on the product with a tested biobased content of 25 percent.

Information supplied by these manufacturers and suppliers indicates that these products are being used commercially. In addition, some of these manufacturers and suppliers identified three test methods (as shown below) used in evaluating products within the product category. While there may be additional test methods, as well as performance standards, product certifications, and other measures of performance, applicable to products within this product category, the test methods identified by the manufacturers and suppliers include:

- ASTM D97; Standard Test Method for Pour Point of Petroleum Products,
- ASTM D6868; Standard Specification for Labeling of End Items that Incorporate Plastics and Polymers as Coatings or Additives with Paper and Other Substrates Designed to be Aerobically Composted in Municipal or Industrial Facilities, and
- California Technical Bulletin 117; Requirements, Test Procedure and Apparatus for Testing the Flame Retardance of Resilient Filling Materials Used In Upholstered Furniture.

USDA has been unable to obtain data on the amount of Intermediates—Foams purchased by Federal procuring agencies. As discussed earlier, the primary benefit of designating intermediate ingredient product categories is not to promote their direct purchase by Federal agencies but, rather, to establish the framework for

designation of the extensive number of finished products that are made from these intermediate ingredients.

Specific product information, including company contact, intended use, biobased content, and performance characteristics, has been collected on these eight Intermediates—Foams and may be found on the BioPreferred Program's Web site.

6. Intermediates—Fibers and Fabrics (Minimum Biobased Content 25 Percent)

Intermediates—Fibers and Fabrics encompasses plant and animal fibers, fibers made from plant-derived polymers that are not yet formed into more complex products such as carpet or fabrics, fabrics made from natural fibers, fabrics made from synthetic fibers, or fabrics made from a blend of the two. These materials are used to manufacture finished products such as clothing, upholstery, or drapes.

USDA identified 16 manufacturers and suppliers of 48 biobased Intermediates—Fibers and Fabrics. These manufacturers and suppliers do not include all manufacturers and suppliers of biobased Intermediates—Fibers and Fabrics, merely those identified through the USDA Certified Biobased Products in the BioPreferred Program's database. These 48 biobased Intermediates—Fibers and Fabrics range in biobased content from 28 percent to 100 percent, as measured by ASTM D6866. In establishing the minimum biobased content requirement for this product category, USDA did not find a reason to exclude any of the products categorized as Intermediates—Fibers and Fabrics. Thus, the proposed minimum biobased content for this product category is 25 percent, based on the product with a tested biobased content of 28 percent.

Information supplied by these manufacturers and suppliers indicates that these products are being used commercially. In addition, some of these manufacturers and suppliers identified seven test methods (as shown below) used in evaluating products within the product category. While there may be additional test methods, as well as performance standards, product certifications, and other measures of performance, applicable to products within this product category, the test methods identified by the manufacturers and suppliers include:

- AATCC 79; Absorbency of Textiles,
- AATCC 197; Vertical Wicking of Textiles,
- AATCC 198; Horizontal Wicking of Textiles,

- ACT Physical Properties Performance Guidelines,
- ASTM D737; Standard Test Method for Air Permeability of Textile Fabrics,
- ASTM D6868; Standard Specification for Labeling of End Items that Incorporate Plastics and Polymers as Coatings or Additives with Paper and Other Substrates Designed to be Aerobically Composted in Municipal or Industrial Facilities, and
- Oeko-Tex Standard 100; Tests for Harmful Substances in Textiles.

USDA has been unable to obtain data on the amount of Intermediates—Fibers and Fabrics purchased by Federal procuring agencies. As discussed earlier, the primary benefit of designating intermediate ingredient product categories is not to promote their direct purchase by Federal agencies but, rather, to establish the framework for designation of the extensive number of finished products that are made from these intermediate ingredients.

Specific product information, including company contact, intended use, biobased content, and performance characteristics, has been collected on 48 Intermediates—Fibers and Fabrics and may be found on the BioPreferred Program's Web site.

7. Intermediates—Lubricant Components (Minimum Biobased Content 44 Percent)

Intermediates—Lubricant Components are ingredients that used specifically to formulate finished lubricant products. Examples of Intermediates—Lubricant Components include base oils, base fluids, additives, or friction modifiers.

USDA identified nine manufacturers and suppliers of 35 biobased Intermediates—Lubricant Components. These manufacturers and suppliers do not include all manufacturers and suppliers of biobased Intermediates—Lubricant Components, merely those identified through the USDA Certified Biobased Products in the BioPreferred Program's database. These 35 biobased Intermediates—Lubricant Components range in biobased content from 47 percent to 100 percent, as measured by ASTM D6866. In establishing the minimum biobased content requirement for this product category, USDA did not find a reason to exclude any of the products categorized as Intermediates—Lubricants. Thus, the proposed minimum biobased content for this product category is 44 percent, based on the products with a tested biobased content of 47 percent.

Information supplied by these manufacturers and suppliers indicates

that these products are being used commercially. In addition, one of these manufacturers and suppliers identified one test method used in evaluating products within the product category. While there may be additional test methods, as well as performance standards, product certifications, and other measures of performance, applicable to products within this product category, the test method identified by the manufacturer and supplier is NSF H1 Nonfood Compound Product Registration Program.

USDA has been unable to obtain data on the amount of Intermediates—Lubricant Components purchased by Federal procuring agencies. As discussed earlier, the primary benefit of designating intermediate ingredient product categories is not to promote their direct purchase by Federal agencies but, rather, to establish the framework for designation of the extensive number of finished products that are made from these intermediate ingredients.

Specific product information, including company contact, intended use, biobased content, and performance characteristics, has been collected on these 35 Intermediates—Lubricant Components and may be found on the BioPreferred Program's Web site.

8. Intermediates—Binders (Minimum Biobased Content 47 Percent)

Intermediates—Binders are materials used to provide cohesiveness throughout an entire finished product. The product category does not include adhesives and glues that are finished products used to attach the surfaces of two or more distinct and separate components to one another.

USDA identified one manufacturer and supplier of one biobased Intermediates—Binders. This manufacturer and supplier is not expected to be the only manufacturer and supplier of biobased Intermediates—Binders, merely the only one that was identified through the USDA Certified Biobased Products in the BioPreferred Program's database. The biobased content of this Intermediates—Binders product is 50 percent, as measured by ASTM D6866. As discussed earlier, the tested value was reduced by 3 percentage points to account for the inherent variability in the test method. Thus, the proposed minimum biobased content for this product category is 47 percent.

Information supplied by this manufacturer indicates that this product is being used commercially. However, this manufacturer and supplier did not identify any applicable performance

standards, test methods, or other industry measures of performance against which this product has been tested. USDA points out that the lack of identified performance standards is not relevant to the designation of a product category for Federal preferred procurement because it is not one of the criteria section 9002 requires USDA to consider in order to designate a product category for Federal preferred procurement. If and when performance standards, test methods, and other relevant measures of performance are identified for this product category, USDA will provide such information on the BioPreferred Program's Web site.

USDA has been unable to obtain data on the amount of Intermediates—Binders purchased by Federal procuring agencies. As discussed earlier, the primary benefit of designating intermediate ingredient product categories is not to promote their direct purchase by Federal agencies but, rather, to establish the framework for designation of the extensive number of finished products that are made from these intermediate ingredients.

Specific product information, including company contact, intended use, biobased content, and performance characteristics, has been collected on this one Intermediates—Binders product and may be found on the BioPreferred Program's Web site.

9. Intermediates—Cleaner Components (Minimum Biobased Content 55 Percent)

Intermediates—Cleaner Components are intermediate ingredients used specifically for formulating finished cleaning products. Examples of Intermediates—Cleaner Components include chelating agents, surfactants, hydrotropes, fatty acids, or solvents.

USDA identified eight manufacturers and suppliers of 19 different biobased Intermediates—Cleaner Components. These eight manufacturers and suppliers do not necessarily include all manufacturers and suppliers of biobased Intermediates—Cleaner Components, merely those identified through the USDA Certified Biobased Products in the BioPreferred Program's database. These 19 biobased Intermediates—Cleaner Components range in biobased content from 58 percent to 99 percent, as measured by ASTM D6866. In establishing the minimum biobased content requirement for this product category, USDA did not find a reason to exclude any of the products categorized as Intermediates—Cleaner Components. Thus, the proposed minimum biobased content for this product category is 55

percent, based on the products with a tested biobased content of 58 percent.

Information supplied by these manufacturers and suppliers indicates that these products are being used commercially. In addition, one of the manufacturers and suppliers identified five test methods (as shown below) used in evaluating its product within the product category. While there may be additional test methods, as well as performance standards, product certifications, and other measures of performance, applicable to products within this product category, the test methods identified by the manufacturer and supplier include:

- ASTM D93; Standard Test Methods for Flash Point by Pensky-Martens Closed Cup Tester,
- ASTM D1133; Standard Test Method for Kauri-Butanol Value of Hydrocarbon Solvents,
- ASTM D2887; Standard Test Method for Boiling Range Distribution of Petroleum Fractions by Gas Chromatography, and
- EPA Method 24; Determination of Volatile Matter Content, Water Content, Density, Volume Solids, and Weight Solids of Surface Coatings.

USDA has been unable to obtain data on the amount of Intermediates—Cleaner Components purchased by Federal procuring agencies. As discussed earlier, the primary benefit of designating intermediate ingredient product categories is not to promote their direct purchase by Federal agencies but, rather, to establish the framework for designation of the extensive number of finished products that are made from these intermediate ingredients.

Specific product information, including company contact, intended use, biobased content, and performance characteristics, has been collected on these 19 Intermediates—Cleaner Components and may be found on the BioPreferred Program's Web site.

10. Intermediates—Personal Care Product Components (Minimum Biobased Content 62 Percent)

Intermediates—Personal Care Product Components are ingredients used to formulate finished personal care products. Examples of Intermediates—Personal Care Product Components include surfactants, oils, humectants, emollients, or emulsifiers.

USDA identified nine manufacturers and suppliers of 37 biobased Intermediates—Personal Care Product Components. These manufacturers and suppliers do not include all manufacturers and suppliers of biobased Intermediates—Personal Care Product

Components, merely those identified through the USDA Certified Biobased Products in the BioPreferred Program's database. These 37 biobased Intermediates—Personal Care Product Components range in biobased content from 65 percent to 100 percent, as measured by ASTM D6866. In establishing the minimum biobased content requirement for this product category, USDA did not find a reason to exclude any of the products categorized as Intermediates—Personal Care Product Components. Thus, the proposed minimum biobased content for this product category is 62 percent, based on the products with a tested biobased content of 65 percent.

Information supplied by these manufacturers and suppliers indicates that these products are being used commercially. In addition, some of these manufacturers and suppliers identified 3 test methods (as shown below) used in evaluating products within the product category. While there may be additional test methods, as well as performance standards, product certifications, and other measures of performance, applicable to products within this product category, the test methods identified by the manufacturers and suppliers include:

- ASTM D6868; Standard Specification for Labeling of End Items that Incorporate Plastics and Polymers as Coatings or Additives with Paper and Other Substrates Designed to be Aerobically Composted in Municipal or Industrial Facilities, and
- EPA Method 24; Determination of Volatile Matter Content, Water Content, Density, Volume Solids, and Weight Solids of Surface Coatings.

USDA has been unable to obtain data on the amount of Intermediates—Personal Care Product Components purchased by Federal procuring agencies. As discussed earlier, the primary benefit of designating intermediate ingredient product categories is not to promote their direct purchase by Federal agencies but, rather, to establish the framework for designation of the extensive number of finished products that are made from these intermediate ingredients.

Specific product information, including company contact, intended use, biobased content, and performance characteristics, has been collected on 37 Intermediates—Personal Care Product Components and may be found on the BioPreferred Program's Web site.

11. Intermediates—Oils, Fats, and Waxes (Minimum Biobased Content 65 Percent)

Intermediates—Oils, Fats, and Waxes include raw or modified fats and oils derived from plants or animals.

USDA identified five manufacturers and suppliers of 24 biobased Intermediates—Oils, Fats, and Waxes. These manufacturers and suppliers do not include all manufacturers and suppliers of biobased Intermediates—Oils, Fats, and Waxes, merely those identified through the USDA Certified Biobased Products in the BioPreferred Program's database. These 24 biobased Intermediates—Oils, Fats, and Waxes range in biobased content from 68 percent to 100 percent, as measured by ASTM D6866. In establishing the minimum biobased content requirement for this product category, USDA did not find a reason to exclude any of the products categorized as Intermediates—Oils, Fats, and Waxes. Thus, the proposed minimum biobased content for this product category is 65 percent, based on the products with a tested biobased content of 68 percent.

Information supplied by these manufacturers and suppliers indicates that these products are being used commercially. In addition, one of these manufacturers and suppliers identified one test method used in evaluating a product within the product category. While there may be additional test methods, as well as performance standards, product certifications, and other measures of performance, applicable to products within this product category, the test method identified by the manufacturer and supplier is California Technical Bulletin 117.

USDA has been unable to obtain data on the amount of Intermediates—Oils, Fats, and Waxes purchased by Federal procuring agencies. As discussed earlier, the primary benefit of designating intermediate ingredient product categories is not to promote their direct purchase by Federal agencies but, rather, to establish the framework for designation of the extensive number of finished products that are made from these intermediate ingredients.

Specific product information, including company contact, intended use, biobased content, and performance characteristics, has been collected on these 24 Intermediates—Oils, Fats, and Waxes and may be found on the BioPreferred Program's Web site.

12. Intermediates—Rubber Materials (Minimum Biobased Content 96 Percent)

Intermediates—Rubber Materials are used in finished products such as rubber gloves, vehicle tires, footwear, sports apparel and equipment, bedding and pillow foams, tubing, catheters, gasketing, or cosmetic adhesives and bases.

USDA identified one manufacturer and supplier of two biobased Intermediates—Rubber Materials. This manufacturer and supplier is not expected to be the only manufacturer and supplier of biobased Intermediates—Rubber Materials, merely the only one identified through the USDA Certified Biobased Products in the BioPreferred Program's database. These two biobased Intermediates—Rubber Materials have biobased contents of 99 percent and 100 percent, as measured by ASTM D6866. In establishing the minimum biobased content requirement for this product category, USDA did not find a reason to exclude any of the products categorized as Intermediates—Rubber Materials. Thus, the proposed minimum biobased content for this product category is 96 percent, based on the products with a tested biobased content of 99 percent.

The Information supplied by this manufacturer and supplier indicates that these products are being used commercially. However, this manufacturer and supplier did not identify any applicable performance standards, test methods, or other industry measures of performance against which these products have been tested. USDA points out that the lack of identified performance standards is not relevant to the designation of a product category for Federal preferred procurement because it is not one of the criteria section 9002 requires USDA to consider in order to designate a product category for Federal preferred procurement. If and when performance standards, test methods, and other relevant measures of performance are identified for this product category, USDA will provide such information on the BioPreferred Program's Web site.

USDA has been unable to obtain data on the amount of Intermediates—Rubber Materials purchased by Federal procuring agencies. As discussed earlier, the primary benefit of designating intermediate ingredient product categories is not to promote their direct purchase by Federal agencies but, rather, to establish the framework for designation of the extensive number of finished products

that are made from these intermediate ingredients.

Specific product information, including company contact, intended use, biobased content, and performance characteristics, has been collected on these two Intermediates—Rubber Materials and may be found on the BioPreferred Program's Web site.

C. Compliance Date for Procurement Preference and Incorporation Into Specifications

USDA intends for the final rule to take effect thirty (30) days after publication of the final rule. USDA proposes that starting from the date of publication of the final rule, procuring agencies have a one-year transition period before the procurement preference for biobased products within a designated product category takes effect. This proposed timeframe is based on section 9002(a)(3)(B)(viii) of the 2014 Farm Bill, which clearly provides a compliance date for amendments to the Guidelines of up to one year after publication of a final rule.

Therefore, USDA is proposing a one-year period before the procurement preferences would take effect because, as indicated in 7 CFR 3201.4(c), it recognizes that Federal agencies will need sufficient time to incorporate the preferences into procurement documents and to revise existing standardized specifications. Additionally, procuring agencies will need time to evaluate the economic and technological feasibility of the available biobased products for their agency-specific uses and for compliance with agency-specific requirements.

By the time these product categories are promulgated for designation, Federal agencies will have had a minimum of 18 months (from the date of this **Federal Register** notice), and much longer considering when the Guidelines were first proposed and these requirements were first laid out, to implement these requirements.

Therefore, USDA proposes that the mandatory preference for biobased products under the designated product categories take effect one year after promulgation of the final rule, which will provide these agencies with ample time to evaluate the economic and technological feasibility of biobased products for a specific use and to revise the specifications accordingly. Some agencies may be able to complete these processes more expeditiously and not all uses will require extensive analysis or revision of existing specifications. Although it is allowing up to one year, USDA encourages procuring agencies to implement the procurement preferences

as early as practicable for procurement actions involving any of the designated product categories.

V. Where can agencies get more information on these USDA-designated product categories?

The information used to develop this proposed rule was voluntarily submitted by the manufacturers of products that are categorized within the product categories being proposed. These manufacturers sought to participate in the BioPreferred Program's USDA Certified Biobased Product labeling initiative and submitted product information necessary for certification. Information on each of these products can be found on the BioPreferred Program's Web site (<http://www.biopreferred.gov>).

Further, once the product category designations in today's proposal become final, manufacturers and vendors voluntarily may make available additional information on specific products for posting by the Agency on the BioPreferred Program's Web site. USDA has begun performing periodic audits of the information displayed on the BioPreferred Program's Web site and, where questions arise, is contacting the manufacturer or vendor to verify, correct, or remove incorrect or out-of-date information. Procuring agencies should contact the manufacturers and vendors directly to discuss specific needs and to obtain detailed information on the availability and prices of biobased products meeting those needs.

By accessing the BioPreferred Program's Web site, agencies may also be able to obtain any voluntarily-posted information on each product concerning: Relative price; life-cycle costs; hot links directly to a manufacturer's or vendor's Web site (if available); performance standards (industry, government, military, ASTM/ISO) that the product has been tested against; and environmental and public health information.

VI. Regulatory Information

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

Executive Order 12866, as supplemented by Executive Order 13563, requires agencies to determine whether a regulatory action is "significant." The Order defines a "significant regulatory action" as one that is likely to result in a rule that may: "(1) Have an annual effect on the economy of \$100 million or more or

adversely affect, in a material way, the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order."

Today's proposed rule has been determined by the Office of Management and Budget to be not significant for purposes of Executive Order 12866. We are not able to quantify the annual economic effect associated with today's proposed rule. USDA attempted to obtain information on the Federal agencies' usage within the 12 designated product categories. These efforts were largely unsuccessful. Therefore, attempts to determine the economic impacts of today's proposed rule would require estimation of the anticipated market penetration of biobased products based upon many assumptions. In addition, because agencies have the option of not purchasing products within designated product categories if price is "unreasonable," the product is not readily available, or the product does not demonstrate necessary performance characteristics, certain assumptions may not be valid. While facing these quantitative challenges, USDA relied upon a qualitative assessment to determine the impacts of today's proposed rule. Consideration was also given to the fact that agencies may choose not to procure products within designated product categories due to unreasonable price.

1. Summary of Impacts

Today's proposed rule is expected to have both positive and negative impacts to individual businesses, including small businesses. These positive and negative impacts are expected to be minimized because Federal agencies do not typically purchase significant quantities of the types of intermediate ingredient products that are the subject of today's proposed rule. However, USDA anticipates that the Federal preferred procurement program will ultimately provide additional opportunities for businesses and manufacturers to begin supplying products under the proposed designated biobased product categories to Federal agencies and their contractors. However,

other businesses and manufacturers that supply only non-qualifying products and do not offer biobased alternatives may experience a decrease in demand from Federal agencies and their contractors. USDA is unable to determine the number of businesses, including small businesses, which may be adversely affected by today's proposed rule. The proposed rule, however, will not affect existing purchase orders, nor will it preclude businesses from modifying their product lines to meet new requirements for designated biobased products. Because the extent to which procuring agencies will find the performance, availability and/or price of biobased products acceptable is unknown, it is impossible to quantify the actual economic effect of the rule.

2. Benefits of the Proposed Rule

The designation of these product categories provides the benefits outlined in the objectives of section 9002; to increase domestic demand for many agricultural commodities that can serve as feedstocks for production of biobased products, and to spur development of the industrial base through value-added agricultural processing and manufacturing in rural communities. On a national and regional level, today's proposed rule can result in expanding and strengthening markets for biobased materials used in these product categories.

3. Costs of the Proposed Rule

Like the benefits, the costs of today's proposed rule have not been quantified. Two types of costs are involved: Costs to producers of products that will compete with the preferred products and costs to Federal agencies to provide procurement preference for the preferred products. Producers of competing products may face a decrease in demand for their products to the extent Federal agencies refrain from purchasing their products. However, it is not known to what extent this may occur. Pre-award procurement costs for Federal agencies may rise minimally as the contracting officials conduct market research to evaluate the performance, availability, and price reasonableness of preferred products before making a purchase.

B. Regulatory Flexibility Act (RFA)

The RFA, 5 U.S.C. 601–602, generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies

that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

USDA evaluated the potential impacts of its proposed designation of these product categories to determine whether its actions would have a significant impact on a substantial number of small entities. Because the Federal preferred procurement program established under section 9002 applies only to Federal agencies and their contractors, small governmental (city, county, etc.) agencies are not affected. Thus, the proposal, if promulgated, will not have a significant economic impact on small governmental jurisdictions.

USDA anticipates that this program will affect entities, both large and small, that manufacture or sell biobased products. For example, the designation of product categories for Federal preferred procurement will provide additional opportunities for businesses to manufacture and sell biobased products to Federal agencies and their contractors. Similar opportunities will be provided for entities that supply biobased materials to manufacturers.

The intent of section 9002 is largely to stimulate the production of new biobased products and to energize emerging markets for those products. Because the biobased product industry as a whole is still a developing market, it is unknown how many businesses will ultimately be affected by today's proposed rule. While USDA has no data on the number of small businesses that may choose to develop and market biobased products within the product categories designated by this rulemaking, the number is expected to be small because this industry is still materializing. As such, USDA anticipates that only a small percentage of all manufacturers, large or small, are expected to develop and market biobased products. Thus, the number of small businesses manufacturing biobased products affected by this rulemaking is not expected to be substantial.

The Federal preferred procurement program may decrease opportunities for businesses that manufacture or sell non-biobased products or provide components for the manufacturing of such products. Most manufacturers of non-biobased products within the product categories being proposed for designation for Federal preferred procurement in this rule are expected to be included under the following NAICS codes: 324191 (petroleum lubricating oil and grease manufacturing), 325320

(pesticide and other agricultural chemicals manufacturing), 325411 (medicinal and botanical manufacturing), 325412 (pharmaceutical preparation manufacturing), 325510 (paint and coating manufacturing), 325612 (polish and other sanitation goods manufacturing), and 325620 (toilet preparation manufacturing). USDA obtained information on these seven NAICS categories from the U.S. Census Bureau's Economic Census database. USDA found that the Economic Census reports about 4,756 companies within these 7 NAICS categories and that these companies own a total of about 5,374 establishments. Thus, the average number of establishments per company is about 1.13. The Census data also reported that of the 5,374 individual establishments, about 5,228 (97.3 percent) have fewer than 500 employees. USDA also found that the overall average number of employees per company among these industries is about 92 and that the pharmaceutical preparation manufacturing segment (with an average of about 250) is the only segment reporting an average of more than 100 employees per company. Thus, nearly all of the businesses meet the Small Business Administration's definition of a small business (less than 500 employees, in most NAICS categories).

USDA does not have data on the potential adverse impacts on manufacturers of non-biobased products within the product categories being designated, but believes that the impact will not be significant. Most of the product categories being proposed for designation in this rulemaking are used to produce typical consumer products widely used by the general public and by industrial/commercial establishments that are not subject to this rulemaking. Thus, USDA believes that the number of small businesses manufacturing non-biobased products within the product categories being designated and selling significant quantities of those products to government agencies affected by this rulemaking to be relatively low. Also, this proposed rule will not affect existing purchase orders and it will not preclude procuring agencies from continuing to purchase non-biobased products when biobased products do not meet the availability, performance, or reasonable price criteria. This proposed rule will also not preclude businesses from modifying their product lines to meet new specifications or solicitation requirements for these products containing biobased materials.

After considering the economic impacts of this proposed rule on small entities, USDA certifies that this action will not have a significant economic impact on a substantial number of small entities.

While not a factor relevant to determining whether the proposed rule will have a significant impact for RFA purposes, USDA has concluded that the effect of the rule will be to provide positive opportunities to businesses engaged in the manufacture of these biobased products. Purchase and use of these biobased products by procuring agencies increase demand for these products and result in private sector development of new technologies, creating business and employment opportunities that enhance local, regional, and national economies.

C. Executive Order 12630: Governmental Actions and Interference With Constitutionally Protected Property Rights

This proposed rule has been reviewed in accordance with Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights, and does not contain policies that would have implications for these rights.

D. Executive Order 12988: Civil Justice Reform

This proposed rule has been reviewed in accordance with Executive Order 12988, Civil Justice Reform. This proposed rule does not preempt State or local laws, is not intended to have retroactive effect, and does not involve administrative appeals.

E. Executive Order 13132: Federalism

This proposed rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. Provisions of this proposed rule will not have a substantial direct effect on States or their political subdivisions or on the distribution of power and responsibilities among the various government levels.

F. Unfunded Mandates Reform Act of 1995

This proposed rule contains no Federal mandates under the regulatory provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1531–1538, for State, local, and tribal governments, or the private sector. Therefore, a statement under section 202 of UMRA is not required.

G. Executive Order 12372: Intergovernmental Review of Federal Programs

For the reasons set forth in the Final Rule Related Notice for 7 CFR part 3015, subpart V (48 FR 29115, June 24, 1983), this program is excluded from the scope of the Executive Order 12372, which requires intergovernmental consultation with State and local officials. This program does not directly affect State and local governments.

H. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This proposed rule does not significantly or uniquely affect “one or more Indian tribes . . . the relationship between the Federal Government and Indian tribes, or . . . the distribution of power and responsibilities between the Federal Government and Indian tribes.” Thus, no further action is required under Executive Order 13175.

I. Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 through 3520), the information collection under this proposed rule is currently approved under OMB control number 0503-0011.

J. E-Government Act Compliance

USDA is committed to compliance with the E-Government Act, which requires Government agencies in general to provide the public the option of submitting information or transacting business electronically to the maximum extent possible. USDA is implementing an electronic information system for posting information voluntarily submitted by manufacturers or vendors on the products they intend to offer for Federal preferred procurement under each designated product category. For information pertinent to E-Government Act compliance related to this rule, please contact Marie Wheat at (202) 239-4502.

List of Subjects in 7 CFR Part 3201

Biobased products, Procurement.

For the reasons stated in the preamble, the Department of Agriculture proposes to amend 7 CFR chapter XXXII as follows:

CHAPTER XXXII—OFFICE OF PROCUREMENT AND PROPERTY MANAGEMENT

PART 3201—GUIDELINES FOR DESIGNATING BIOBASED PRODUCTS FOR FEDERAL PROCUREMENT

■ 1. The authority citation for part 3201 continues to read as follows:

Authority: 7 U.S.C. 8102.

■ 2. Add §§ 3201.108 through 3201.119 to subpart B to read as follows:

Sec.

- 3201.108 Intermediates—Plastic Resins.
- 3201.109 Intermediates—Chemicals.
- 3201.110 Intermediates—Paint and Coating Components.
- 3201.111 Intermediates—Textile Processing Materials.
- 3201.112 Intermediates—Foams.
- 3201.113 Intermediates—Fibers and Fabrics.
- 3201.114 Intermediates—Lubricant Components.
- 3201.115 Intermediates—Binders.
- 3201.116 Intermediates—Cleaner Components.
- 3201.117 Intermediates—Personal Care Product Components.
- 3201.118 Intermediates—Oils, Fats, and Waxes.
- 3201.119 Intermediates—Rubber Materials.

§ 3201.108 Intermediates—Plastic Resins.

(a) *Definition.* Intermediates—Plastic Resins are materials that are typically viscous liquids with the ability to harden permanently and may exist in liquid or solid (powder or pellets) states. Intermediates—Plastic Resins may be used in a variety of finished products neat, consisting of a single resin, or a homogeneous blend of two or more neat resins, or composite, containing two or more distinct materials such as fiber-reinforced resins.

Additionally, Intermediates—Plastic Resins may be used in finished products as additives such as plasticizers, pigments, thermal stability agents, or impact modifiers.

(b) *Minimum biobased content.* The Federal preferred procurement product must have a minimum biobased content of at least 22 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than [date one year after the date of publication of the final rule], procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased Intermediates—Plastic Resins. By that date, Federal agencies responsible for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased Intermediates—Plastic Resins.

§ 3201.109 Intermediates—Chemicals.

(a) *Definition.* Intermediates—Chemicals are those used as reactants for organic synthesis reactions rather than for their functional properties in a chemical mixture; those used as

building block chemicals and secondary chemicals such as glycerol, succinic acid, propanediol, and monomers such as lactic acid and propylene; those used for specific functional properties during manufacturing of other products such as pH regulators, flocculants, precipitants, neutralizing agents, emulsifiers, detergents, wetting agents, foaming agents, or dispersants; those that are added to end-use products for their specific functional properties including solvents for thinning and drying applications but excluding solvents used for cleaning; and those used for dyes, pigments, and scents including flavorings for non-food products such as lip balm.

(b) *Minimum biobased content.* The Federal preferred procurement product must have a minimum biobased content of at least 22 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than [date one year after the date of publication of the final rule], procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased Intermediates—Chemicals. By that date, Federal agencies responsible for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased Intermediates—Chemicals.

§ 3201.110 Intermediates—Paint and Coating Components.

(a) *Definition.* Intermediates—Paint and Coating Components are ingredients used to formulate finished waterborne or solvent borne paint and coating products. Examples of Intermediates—Paint and Coating Components include binders, pigments thickeners, curing agents, modifiers, alkyd latex resins, polyols, reactive oligomers, or reactive diluents.

(b) *Minimum biobased content.* The Federal preferred procurement product must have a minimum biobased content of at least 22 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than [date one year after the date of publication of the final rule], procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased Intermediates—Paint and Coating Components. By that date, Federal agencies responsible for drafting or reviewing specifications for products to

be procured shall ensure that the relevant specifications require the use of biobased Intermediates—Paint and Coating Components.

§ 3201.111 Intermediates—Textile Processing Materials.

(a) *Definition.* Intermediates—Textile Processing Materials are used to treat or finish textiles for the purposes of altering textile characteristics such as color, fading, wrinkle resistance, texture, or moisture management.

(b) *Minimum biobased content.* The Federal preferred procurement product must have a minimum biobased content of at least 22 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than [date one year after the date of publication of the final rule], procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased Intermediates—Textile Processing Materials. By that date, Federal agencies responsible for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased Intermediates—Textile Processing Materials.

§ 3201.112 Intermediates—Foams.

(a) *Definition.* Intermediates—Foams are dry polymer foams used for non-construction purposes, such as cushions for furniture.

(b) *Minimum biobased content.* The Federal preferred procurement product must have a minimum biobased content of at least 22 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than [date one year after the date of publication of the final rule], procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased Intermediates—Foams. By that date, Federal agencies responsible for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased Intermediates—Foams.

§ 3201.113 Intermediates—Fibers and Fabrics.

(a) *Definition.* Intermediates—Fibers and Fabrics encompasses plant and animal fibers, fibers made from plant-derived polymers that are not yet formed into more complex products

such as carpet or fabrics, fabrics made from natural fibers, fabrics made from synthetic fibers, or fabrics made from a blend of the two. These materials are used to manufacture finished products such as clothing, upholstery, or drapes.

(b) *Minimum biobased content.* The Federal preferred procurement product must have a minimum biobased content of at least 25 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than [date one year after the date of publication of the final rule], procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased Intermediates—Fibers and Fabrics. By that date, Federal agencies responsible for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased Intermediates—Fibers and Fabrics.

§ 3201.114 Intermediates—Lubricant Components.

(a) *Definition.* Intermediates—Lubricant Components are ingredients that used specifically to formulate finished lubricant products. Examples of Intermediates—Lubricant Components include base oils, base fluids, additives, or friction modifiers.

(b) *Minimum biobased content.* The Federal preferred procurement product must have a minimum biobased content of at least 44 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than [date one year after the date of publication of the final rule], procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased Intermediates—Lubricant Components. By that date, Federal agencies responsible for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased Intermediates—Lubricant Components.

§ 3201.115 Intermediates—Binders.

(a) *Definition.* Intermediates—Binders are materials used to provide cohesiveness throughout an entire finished product. The product category does not include adhesives and glues that are finished products used to attach the surfaces of two or more distinct and separate components to one another.

(b) *Minimum biobased content.* The Federal preferred procurement product must have a minimum biobased content of at least 47 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than [date one year after the date of publication of the final rule], procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased Intermediates—Binders. By that date, Federal agencies responsible for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased Intermediates—Binders.

§ 3201.116 Intermediates—Cleaner Components.

(a) *Definition.* Intermediates—Cleaner Components are intermediate ingredients used specifically for formulating finished cleaning products. Examples of Intermediates—Cleaner Components include chelating agents, surfactants, hydrotropes, fatty acids, or solvents.

(b) *Minimum biobased content.* The Federal preferred procurement product must have a minimum biobased content of at least 55 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than [date one year after the date of publication of the final rule], procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased Intermediates—Cleaner Components. By that date, Federal agencies responsible for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased Intermediates—Cleaner Components.

§ 3201.117 Intermediates—Personal Care Product Components.

(a) *Definition.* Intermediates—Personal Care Product Components are ingredients used to formulate finished personal care products. Examples of Intermediates—Personal Care Product Components include surfactants, oils, humectants, emollients, or emulsifiers.

(b) *Minimum biobased content.* The Federal preferred procurement product must have a minimum biobased content of at least 62 percent, which shall be based on the amount of qualifying biobased carbon in the product as a

percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than [date one year after the date of publication of the final rule], procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased Intermediates—Personal Care Product Components. By that date, Federal agencies responsible for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased Intermediates—Personal Care Product Components.

§ 3201.118 Intermediates—Oils, Fats, and Waxes.

(a) *Definition.* Intermediates—Oils, Fats, and Waxes include raw or modified fats and oils derived from plants or animals.

(b) *Minimum biobased content.* The Federal preferred procurement product must have a minimum biobased content of at least 65 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than [date one year after the date of publication of the final rule], procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased Intermediates—Oils, Fats, and Waxes. By that date, Federal agencies responsible for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased Intermediates—Oils, Fats, and Waxes.

§ 3201.119 Intermediates—Rubber Materials.

(a) *Definition.* Intermediates—Rubber Materials are used in finished products such as rubber gloves, vehicle tires, footwear, sports apparel and equipment, bedding and pillow foams, tubing, catheters, gasketing, or cosmetic adhesives and bases.

(b) *Minimum biobased content.* The Federal preferred procurement product must have a minimum biobased content of at least 96 percent, which shall be based on the amount of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference compliance date.* No later than [date one year after the date of publication of the final rule], procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased

Intermediates—Rubber Materials. By that date, Federal agencies responsible for drafting or reviewing specifications for products to be procured shall ensure that the relevant specifications require the use of biobased Intermediates—Rubber Materials.

Dated: December 16, 2016.

Gregory L. Parham,

Assistant Secretary for Administration, U.S. Department of Agriculture.

[FR Doc. 2016-31128 Filed 1-12-17; 8:45 am]

BILLING CODE 3410-93-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2016-9443; Airspace Docket No. 16-ASO-17]

Proposed Amendment of Class E Airspace; Kyle-Oakley Field Airport, Murray, KY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend Class E airspace at Murray, KY, as the Calloway Non-Directional Beacon (NDB) has been decommissioned, requiring airspace reconfiguration at Kyle-Oakley Field Airport. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations at the airport. This action also would update the geographic coordinates of the airport, and update the designation header.

DATES: Comments must be received on or before February 27, 2017.

ADDRESSES: Send comments on this proposal to: U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE., West Bldg. Ground Floor Rm. W12-140, Washington, DC 20590; Telephone: 1-800-647-5527, or 202-366-9826. You must identify the Docket No. FAA-2016-9443; Airspace Docket No. 16-ASO-17, at the beginning of your comments. You may also submit and review received comments through the Internet at <http://www.regulations.gov>. You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays.

FAA Order 7400.11A, Airspace Designations and Reporting Points, and subsequent amendments can be viewed

on line at http://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: 202-267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11A at NARA, call 202-741-6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: John Fornito, Operations Support Group, Eastern Service Center, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305-6364.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This proposed rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend Class E airspace at Kyle-Oakley Field Airport, Murray, KY.

Comments Invited

Interested persons are invited to comment on this rule by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers and be submitted in triplicate to the address listed above. You may also submit comments through the Internet at <http://www.regulations.gov>.

Persons wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2016-9443; Airspace Docket No. 16-ASO-17." The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded from and comments submitted through <http://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's Web page at <http://www.regulations.gov>.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal Holidays. An informal docket may also be examined between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal Holidays at the office of the Eastern Service Center, Federal Aviation Administration, Room 350, 1701 Columbia Avenue, College Park, Georgia 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016. FAA Order 7400.11A is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11A lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is considering an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to amend Class E airspace extending upward from 700 feet above the surface at Kyle-Oakley Field Airport, Murray, KY. Airspace reconfiguration to within a 7

mile radius of the airport is necessary due to the decommissioning of the Calloway NDB and cancellation of the NDB approach, and for continued safety and management of IFR operations at the airport. The geographic coordinates of the airport would be adjusted to coincide with the FAA's aeronautical database, and the airport designation header would be updated to include the airport name.

Class E airspace designations are published in Paragraph 6005 of FAA Order 7400.11A, dated August 3, 2016, and effective September 15, 2016, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal would be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, effective September 15, 2016, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ASO KY E5 Kyle-Oakley Field, Murray, KY [Amended]

Kyle-Oakley Field Airport, KY
(Lat. 36°39'52" N., long. 88°22'22" W.)

That airspace extending upward from 700 feet above the surface within a 7 mile radius of Kyle-Oakley Field Airport.

Issued in College Park, Georgia, on December 29, 2016.

Debra L. Hogan,

Acting Manager, Operations Support Group Eastern Service Center, Air Traffic Organization.

[FR Doc. 2017-00284 Filed 1-12-17; 8:45 am]

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2016-9118; Airspace Docket No. 16-AGL-3]

Proposed Amendment of Class D and E Airspace for the Following North Dakota Towns; Wahpeton, ND; Hettinger, ND; Fargo, ND; Grand Fork, ND; Carrington, ND; Cooperstown, ND; Pembina, ND; Rugby, ND; Devils Lake, ND; Bottineau, ND; Valley City, ND and Gwinner, ND

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify Class E airspace extending upward from 700 feet above the surface at Wahpeton/Harry Stern Airport, Wahpeton, ND; Hettinger Municipal Airport, Hettinger, ND; Gwinner-Roger Melroe Field, Gwinner, ND; and Rugby Municipal Airport, Rugby, ND. Decommissioning of non-directional radio beacons (NDBs), cancellation of NDB approaches, and implementation of area navigation (RNAV) procedures have made this action necessary for the safety and management of Instrument

Flight Rules (IFR) operations at these airports. This action would also update the geographic coordinates and airport names for certain airports listed also under these airports in the Class D and E airspace areas.

DATES: Comments must be received on or before February 27, 2017.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590; telephone (202) 366-9826, or 1-800-647-5527. You must identify FAA Docket No. FAA-2016-9118; Airspace Docket No. 16-AGL-3 at the beginning of your comments. You may also submit comments through the Internet at <http://www.regulations.gov>. You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays.

FAA Order 7400.11, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at http://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: 202-267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11A at NARA, call 202-741-6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: Ron Laster, Contract Support, Federal Aviation Administration, Operations Support Group, Central Service Center, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222-5879.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A,

Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend controlled airspace in the respective Class D and E airspace areas at Wahpeton/Harry Stern Airport, Wahpeton, ND; Hettinger Municipal Airport, Hettinger, ND; Gwinner-Roger Melroe Field, Gwinner, ND; Rugby Municipal Airport, Rugby, ND; Hector International Airport, Fargo, ND; Grand Forks Air Force Base, Grand Forks, ND; Carrington Municipal Airport, Carrington, ND; Pembina Municipal Airport, Pembina, ND; Bottineau Municipal Airport, Bottineau, ND; Cooperstown Municipal Airport, ND; Devils Lake Regional Airport, Devils Lake, ND, and Barnes County Municipal Airport, Valley City, ND.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2016-9118/Airspace Docket No. 16-AGL-3." The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at <http://www.regulations.gov>. Recently published rulemaking

documents can also be accessed through the FAA's Web page.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Availability and Summary of Documents Proposed for Incorporation by Reference

This document proposes to amend FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016. FAA Order 7400.11A is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11A lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 by modifying:

Geographic coordinates in Class D airspace for Hector International Airport, Fargo, ND; Class E airspace extending upward from 700 feet above the surface:

Within a 6.4-mile radius (previously a 7-mile radius) of Harry Stern Airport, Wahpeton, ND, and updating the geographic coordinates of the airport to coincide with the FAA's aeronautical database;

Within a 6.4-mile radius (previously a 7-mile radius) of Hettinger Municipal Airport, Hettinger, ND, and updating the geographic coordinates of the airport to coincide with the FAA's aeronautical database;

Within a 6.5-mile radius (previously a 7-mile radius) of Gwinner-Roger Melroe Field, Gwinner, ND; and updating the geographic coordinates of the airport to coincide with the FAA's aeronautical database;

Within a 6.3-mile radius (previously a 7-mile radius) of Rugby Municipal Airport, Rugby, ND; and updating the geographic coordinates of the airport to coincide with the FAA's aeronautical database.

Airspace reconfiguration is necessary due to the decommissioning of NDBs, cancellation of NDB approaches, and

implementation of RNAV procedures that would enhance the safety and management of standard instrument approach procedures for IFR operations at these airports. The geographic coordinates would be adjusted for Hector International Airport, Fargo, ND; Grand Forks Air Force Base, Grand Forks, ND; Barnes County Municipal Airport, Valley City, ND; Pembina Municipal Airport, Pembina, ND; Devils Lake VOR/DME; Devils Lake Regional Airport, Devils Lake, ND; Carrington Municipal Airport, Carrington, ND; Bottineau Municipal Airport, Bottineau, ND; Cooperstown Municipal Airport, ND, as well as the airport names for Barnes County Municipal Airport (formerly Valley City/Barnes County Municipal), Valley City, ND, and Devils Lake Regional Airport (formerly Devils Lake Municipal Airport), Devils Lake, ND, to coincide with the FAA's aeronautical database.

Class D and E airspace designations are published in paragraph 5000, 6002, 6004 and 6005, respectively, of FAA Order 7400.11A, dated August 3, 2016, and effective September 15, 2016, which is incorporated by reference in 14 CFR 71.1. The Class D and E airspace designations listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11A, Airspace Designations and Reporting Points, dated August 3, 2016, and effective September 15, 2016, is amended as follows:

Paragraph 5000 Class D Airspace.

* * * * *

AGL ND D Fargo, ND [Amended]

Hector International Airport, ND (Lat. 46°55'14" N., long. 96°48'57" W.)

That airspace extending upward from the surface to and including 3,400 feet MSL within a 4.5-mile radius of Hector International Airport.

* * * * *

Paragraph 6002 Class E Airspace Designated as Surface Areas.

* * * * *

AGL ND E2 Devils Lake, ND [Amended]

Devils Lake Regional Airport, ND (Lat. 48°06'53" N., long. 98°54'30" W.)
Devils Lake VOR/DME (Lat. 48°06'55" N., long. 98°54'45" W.)

Within a 4-mile radius of Devils Lake Regional Airport, and within 3 miles each side of the Devils Lake VOR/DME 134° radial extending from the 4-mile radius to 8.7 miles southeast of the VOR/DME and within 2.3 miles each side of the Devils Lake VOR/DME 324° radial extending from the 4-mile radius to 8.7 miles northwest of the VOR/DME. This Class E airspace area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Chart Supplement.

* * * * *

Paragraph 6004 Class E Airspace Designated as an Extension to a Class D or Class E Surface Area.

* * * * *

AGL ND E4 Fargo, ND [Amended]

Fargo, Hector International Airport, ND (Lat. 46°55'14" N., long. 96°48'57" W.)

Fargo VORTAC (Lat. 46°45'12" N., long. 96°51'05" W.)

That airspace extending upward from the surface within 1.7 miles each side of the Fargo VORTAC 009° radial, extending from the 4.5-mile radius of Hector International Airport to 7.8 miles south of the airport.

* * * * *

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AGL ND E5 Bottineau, ND [Amended]

Bottineau Municipal Airport, ND (Lat. 48°49'50" N., long. 100°25'02" W.)

That airspace extending upward from 700 feet above the surface within a 6.4-mile radius of Bottineau Municipal Airport, and that airspace extending upward from 1,200 feet above the surface within an area bounded on the north by lat. 49°00'00" N., on the east by long. 99°49'00" W., on the south by the 10.5-mile radius of Rugby, ND, Class E airspace area, and on the west by the 47-mile radius of the Minot, ND, Class E airspace area.

AGL ND E5 Carrington, ND [Amended]

Carrington Municipal Airport, ND (Lat. 47°27'04" N., long. 99°09'05" W.)

Devils Lake VOR/DME (Lat. 48°06'55" N., long. 98°54'45" W.)

That airspace extending upward from 700 feet above the surface within a 6.4-mile radius of Carrington Municipal Airport; and that airspace extending upward from 1,200 feet above the surface bounded on the north by the 22-mile arc south of Devils Lake VOR/DME, on the east by V-170, on the south by V-55, on the west by long. 99°30'00" W., and on the northwest by V-169.

* * * * *

AGL ND E5 Cooperstown, ND [Amended]

Cooperstown Municipal Airport, ND (Lat. 47°25'22" N., long. 98°06'21" W.)

Devils Lake VOR/DME (Lat. 48°06'55" N., long. 98°54'45" W.)

Fargo, Hector International Airport, ND (Lat. 46°55'14" N., long. 96°48'57" W.)

Grand Forks AFB, ND (Lat. 47°57'41" N., long. 97°24'04" W.)

Jamestown VOR/DME (Lat. 46°55'58" N., long. 98°40'44" W.)

Valley City, Barnes County Municipal Airport, ND (Lat. 46°56'28" N., long. 98°01'05" W.)

That airspace extending upward from 700 feet above the surface within a 6.4-mile radius of Cooperstown Municipal Airport and that airspace extending upward from 1,200 feet above the surface within an area bounded on the north by V-430; on the northeast by the 34-mile radius of Grand Forks AFB; on the southeast by the 40-mile radius of Fargo, Hector International Airport; on the south by V-2/V-510 east of Valley City, ND, the 7.9-mile radius of Barnes County Municipal Airport, and V-2/V-510 west of Valley City, ND; on the southwest by the 16.5-mile radius of Jamestown VOR/DME; on the west by V-170; and on the

northwest by the 22-mile radius of Devils Lake VOR/DME.

* * * * *

AGL ND E5 Devils Lake, ND [Amended]

Devils Lake Regional Airport, ND
(Lat. 48°06'53" N., long. 98°54'30" W.)
Devils Lake VOR/DME
(Lat. 48°06'55" N., long. 98°54'45" W.)

That airspace extending upward from 700 feet above the surface within an 8.7-mile radius of Devils Lake Regional Airport and that airspace extending upward from 1,200 feet above the surface within a 22-mile radius of Devils Lake VOR/DME.

* * * * *

AGL ND E5 Gwinner, ND [Amended]

Gwinner-Roger Melroe Field, ND
(Lat. 46°13'06" N., long. 97°38'36" W.)

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Gwinner-Roger Melroe Field Airport.

* * * * *

AGL ND E5 Hettinger, ND [Amended]

Hettinger Municipal Airport, ND
(Lat. 46°00'54" N., long. 102°39'22" W.)

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Hettinger Municipal Airport; and that airspace extending upward from 1,200 feet above the surface bounded by a line beginning at lat. 46°20'00" N., long. 102°58'00" W., to lat. 46°20'00" N., long. 102°44'00" W., to lat. 45°45'00" N., long. 102°09'00" W., to lat. 45°45'00" N., long. 102°58'00" W., to the point of beginning, excluding that airspace within V-491.

* * * * *

AGL ND E5 Pembina, ND [Amended]

Pembina Municipal Airport, ND
(Lat. 48°56'33" N., long. 97°14'27" W.)
Humboldt VORTAC
(Lat. 48°52'09" N., long. 97°07'02" W.)
Grand Forks AFB, ND
(Lat. 47°57'41" N., long. 97°24'03" W.)
Devils Lake VOR/DME
(Lat. 48°06'55" N., long. 98°54'45" W.)

That airspace extending upward from 700 feet above the surface within a 6.2-mile radius of Pembina Municipal Airport, and within 1.8 miles each side of Humboldt VORTAC 132/312° radials extending from the 6.2-mile radius to 7 miles southeast of the airport; and that airspace extending upward from 1,200 feet above the surface beginning at lat. 49°00'00" N., long. 97°30'01" W.; to lat. 48°48'00" N., long. 97°30'01" W.; to lat. 48°18'34" N., long. 98°39'53" W.; thence clockwise around a 15.3-mile radius of Devils Lake VOR/DME to V-430; thence east along V-430 to the intersection of a 34-mile radius of Grand Forks AFB; thence clockwise along the 34-mile radius of Grand Forks AFB to the North Dakota/Minnesota state boundary; thence north along the state boundary to the United States/Canada border; thence west along the United States/Canada border to the point of beginning, excluding that airspace within all Federal airways.

* * * * *

AGL ND E5 Rugby, ND [Amended]

Rugby Municipal Airport, ND
(Lat. 48°23'25" N., long. 100°01'27" W.)

That airspace extending upward from 700 feet above the surface within a 6.3-mile radius of Rugby Municipal Airport; and that airspace extending upward from 1,200 feet above the surface within a 13-mile radius of Rugby Municipal Airport, and within 8.1 miles north and 4.2 miles south of the 115° bearing from the airport extending from the 13-mile radius to 16.1 miles east of the airport, and within 8.5 miles south and 3.8 miles north of the 314° bearing from the airport extending from the 13-mile radius to 16.1 miles northwest of the airport, excluding that airspace within Minot, ND, and Rolla, ND, Class E airspace areas, and excluding all Federal airways.

* * * * *

AGL ND E5 Valley City, ND [Amended]

Barnes County Municipal Airport, ND
(Lat. 46°56'28" N., long. 98°01'05" W.)

That airspace extending upward from 700 feet above the surface within a 6.4 mile radius of Barnes County Municipal Airport; and that airspace extending upward from 1,200 feet above the surface within a 7.9-mile radius of the airport, and within 4 miles southwest and 8.3 miles northeast of the 133° bearing from the airport extending from the 7.9-mile radius to 21.8 miles southeast of the airport.

* * * * *

AGL ND E5 Wahpeton, ND [Amended]

Harry Stern Airport, ND
(Lat. 46°14'40" N., long. 96°36'26" W.)

That airspace extending upward from 700 feet above the surface within a 6.4-mile radius of Harry Stern Airport and that airspace extending upward from 1,200 feet above the surface within a 25-mile radius of Harry Stern Airport bounded on the east by the Minnesota border and on the west by V-181.

Issued in Fort Worth, Texas, on December 15, 2016.

Walter Tweedy,

Acting Manager, Operations Support Group,
ATO Central Service Center.

BILLING CODE 4910-13-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 101

[Docket No. FDA-2016-D-3401]

Scientific Evaluation of the Evidence on the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates Submitted as a Citizen Petition; Draft Guidance for Industry; Extension of Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Notification of availability; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA or we) is extending the comment period for the notice of availability of a draft guidance entitled "Scientific Evaluation of the Evidence on the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates Submitted as a Citizen Petition" that appeared in the **Federal Register** of November 23, 2016. The draft guidance, when finalized, will describe our views on the scientific evidence needed and the approach to evaluating the scientific evidence on the physiological effects of isolated or synthetic non-digestible carbohydrates that are added to foods that are beneficial to human health. We are taking this action in response to requests for an extension to allow interested persons additional time to submit comments.

DATES: We are extending the comment period on the notice that published in the **Federal Register** of November 23, 2016 (81 FR 84516). Submit either electronic or written comments by February 13, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such

as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2016-D-3401 for “Scientific Evaluation of the Evidence on the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates Submitted as a Citizen Petition; Draft Guidance for Industry.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” We will review this copy, including the claimed confidential information, in our consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover

sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT:

Paula R. Trumbo, Center for Food Safety and Applied Nutrition (HFS-830), Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240-402-2579.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of November 23, 2016 (81 FR 84516), we published a notice announcing the availability of a draft guidance entitled “Scientific Evaluation of the Evidence on the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates Submitted as a Citizen Petition.” The draft guidance explains the scientific review approach we plan to use for evaluating scientific evidence submitted to us in citizen petitions to determine whether a particular isolated or synthetic non-digestible carbohydrate that is added to food should be added to our definition of “dietary fiber” that is found in the Nutrition and Supplement Facts label final rule, which appeared in the **Federal Register** of May 27, 2016 (81 FR 33742). Only those isolated or synthetic non-digestible carbohydrates that meet the definition can be declared as a dietary fiber on a Nutrition and Supplement Facts label. We provided a 60-day comment period that was scheduled to close on January 23, 2017.

Elsewhere in this issue of the **Federal Register**, we have published a notice to reopen the comment period for a related notice that appeared in the **Federal Register** of November 23, 2016 (81 FR 84595). We requested scientific data, information and comments in the related November 23, 2016, notice to help us evaluate the potential beneficial physiological effects on human health of

26 specific isolated or synthetic non-digestible carbohydrates that are added to food so that we may determine whether any of them should be added to our definition of dietary fiber in our Nutrition Facts and Supplement Facts label final rule. The November 23, 2016, notice also announced the availability of a document entitled “Science Review of Isolated and Synthetic Non-Digestible Carbohydrates,” which summarizes a scientific literature review that we conducted of clinical studies associated with the 26 specific isolated or synthetic non-digestible carbohydrates. The original comment period for this notice closed on January 9, 2017.

We have received requests to extend the comment period for the isolated or synthetic non-digestible carbohydrates draft guidance. The requests conveyed concern that the current 60-day comment period does not allow sufficient time to develop meaningful or thoughtful comments to the draft guidance.

We have considered the requests and are extending the comment period for the draft guidance until February 13, 2017. We believe that this extension allows adequate time for interested persons to submit comments without significantly delaying finalizing the guidance. The extended comment period deadline February 13, 2017, for the draft guidance also coincides with the reopened comment period for our related request for scientific data, information, and comments for the November 23, 2016, notice.

Dated: January 10, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF STATE

22 CFR Part 121

[Public Notice: 9852]

Notice of Inquiry; Request for Comments Regarding United States Munitions List Category XII

AGENCY: Department of State.

ACTION: Notice of Inquiry, request for comments.

SUMMARY: The Department of State requests comments from the public regarding recent revisions to Category XII of the United States Munitions List (USML). In light of the ongoing transition of the USML to a more “positive list” pursuant to the President’s Export Control Reform (ECR)

initiative, the Department requests that the public comment on (1) alternatives to controls on certain items when “specially designed for a military end user,” (2) the scope of the control in paragraph (b)(1), and (3) certain technical parameters that the Department is evaluating to replace “specially designed” controls.

DATES: The Department of State will accept comments on this Notice of Inquiry until March 14, 2017.

ADDRESSES: Interested parties may submit comments by one of the following methods:

- *Email:* DDTCTPublicComments@state.gov with the subject line, “Request for Comments Regarding USML Category XII.”

- *Internet:* At www.regulations.gov, search for this notice using its docket number, DOS-2017-0002.

Comments submitted through www.regulations.gov will be visible to other members of the public; the Department will publish all comments on the Directorate of Defense Trade Controls Web site (www.pmdtc.state.gov). Therefore, commenters are cautioned not to include proprietary or other sensitive information in their comments.

FOR FURTHER INFORMATION CONTACT: Mr. C. Edward Peartree, Director, Office of Defense Trade Controls Policy, Department of State, telephone (202) 663-2792; email DDTCTPublicComments@state.gov. ATTN: Request for Comments Regarding USML Category XII.

SUPPLEMENTARY INFORMATION: On December 10, 2010, the Department provided notice to the public of its intent, pursuant to the ECR initiative, to revise the USML to create a “positive list” that describes controlled items using, to the extent possible, objective criteria rather than broad, open-ended, subjective, or design intent-based criteria (see 75 FR 76935). As a practical matter, this meant revising USML categories so that, with some exceptions, the descriptions of defense articles that continued to warrant control under the USML did not use catch-all phrases to control unspecified items. As a general matter, the defense articles that warranted control under the USML were those that provided the United States with a critical military or intelligence advantage. All other items were to become subject to the Export Administration Regulations. Since that time, the Department has published final rules setting forth revisions for eighteen USML categories, each of which has been reorganized into a uniform and more positive list structure.

The advantage of revising the USML into a more positive list is that its controls can be tailored to satisfy the national security and foreign policy objectives of the U.S. government by maintaining control over those defense articles that provide a critical military or intelligence advantage, or otherwise warrant control under the International Traffic in Arms Regulations (ITAR), without inadvertently controlling items in normal commercial use. This approach, however, requires that the lists be regularly revised and updated to account for technological developments, practical application issues identified by exporters and reexporters, and changes in the military and commercial applications of items affected by the list. In addition, the USML and the Commerce Control List require regular revision in order to ensure that they satisfy the national security and foreign policy objectives of the reform effort, which are to (i) improve interoperability of U.S. military forces with allied countries, (ii) strengthen the U.S. industrial base by, among other things, reducing incentives for foreign manufacturers to design out and avoid U.S.-origin content and services, which ensures continued U.S. visibility and control, and (iii) allow export control officials to focus government resources on transactions that pose greater concern.

Comments on Specially Designed for a Military End User Parameters: On October 12, 2016, the Department published a final rule amending USML Category XII, effective December 31, 2016 (81 FR 70340). In the final rule, the Department adopted control text in seven subparagraphs that controls specific items when they are specially designed for a military end user. The term military end user is defined in the new Note to Category XII, as the national armed services (army, navy, marine, air force, or coast guard), national guard, national police, government intelligence or reconnaissance organizations, or any person or entity whose actions or functions are intended to support military end uses. As the Note further states, an item is not specially designed for a military end user if it was developed for both military and non-military end users, or if the item was created for no specific end user. The Note also provides that contemporaneous documents are required to support the design intent; otherwise, use by a military end user establishes that the item is specially designed for a military end user.

As stated in the final rule, the Department adopted this control based

on original design intent because the Department and its interagency partners cannot yet articulate objective technical criteria that would establish a bright line between military and commercial and civil systems. The Department is soliciting additional public input, asking for suggested control parameters for these seven entries in the final rule:

1. (b)(6) Light detection and ranging (LIDAR), laser detection and ranging (LADAR), or range-gated systems, specially designed for a military end user.

2. (c)(1) Binoculars, bioculars, monoculars, goggles, or head or helmet-mounted imaging systems (including video-based articles having a separate near-to-eye display), as follows:

- (iii) Having an infrared focal plane array or infrared imaging camera, and specially designed for a military end user.

3. (c)(3) Electro-optical reconnaissance, surveillance, target detection, or target acquisition systems, specially designed for articles in this subchapter or specially designed for a military end user.

4. (c)(4) Infrared search and track (IRST) systems having one of the following: (ii) Specially designed for a military end user.

5. (c)(5) Distributed aperture systems having a peak response wavelength exceeding 710 nm specially designed for articles in this subchapter or specially designed for a military end user.

6. (c)(6) Infrared imaging systems, as follows:

- (viii) Gimbaled infrared systems, as follows:

- (B) Specially designed for articles in this subchapter or specially designed for a military end user.

7. (c)(7) Terahertz imaging systems as follows: (ii) Specially designed for a military end user.

Comments on Scope of Paragraph (b)(1): Paragraph (b)(1) includes all laser target designators and coded target markers that can mediate the delivery of ordnance to a target. This includes a laser target designator or coded target marker that may also be used for other purposes, including battlefield target handoff or communication of battlefield intelligence information. The Department requests that the public comment on this provision.

Comments to Assist with the Evaluation of Potential Control Parameters: The Department is also evaluating several potential parameters. The Department is requesting that the public comment on these parameters to aid in its evaluation. Specifically, the Department requests comment on

whether any civil or commercial items are described by the following parameters, including items for which civil or commercial use is anticipated in the next five years:

A. Free-space laser communication systems specially designed for articles in this subchapter.

B. Binoculars, bioculars, monoculars, goggles, or head or helmet-mounted imaging systems (including video-based articles having a separate near-to-eye display), having any of the following:

(i) A dynamically gain modulated image intensifier tube incorporating a GaAs, GaInAs, or other III-V semiconductor photocathode with a peak response in the wavelength range exceeding 400 nm but not exceeding 2,000 nm;

(ii) An image intensifier tube incorporating a photocathode with a peak response in the wavelength range exceeding 400 nm but not exceeding 2,000 nm and incorporating a focal plane array in the tube vacuum space;

(iii) Fusing outputs of multiple infrared focal plane arrays each having a peak response at a wavelength greater than 1,000 nm;

(iv) An infrared focal plane array with a peak response in the wavelength range exceeding 1,000 nm but not exceeding 2,500 nm with a total noise floor less than 75 electrons at an operating temperature of 300 K; or

(v) An infrared focal plane array with a peak response in the wavelength range exceeding 7,500 nm, and a laser illuminator or pointer.

C. Weapon sights (*i.e.*, with a reticle), aiming or imaging systems (*e.g.*, clip-on), specially designed to mount to a weapon or to withstand weapon shock or recoil, with or without an integrated viewer or display, and also incorporating or specially designed to incorporate any of the following:

(i) An image intensifier tube having a multi-alkali photocathode with a peak response in the wavelength range exceeding 400 nm but not exceeding 2,000 nm and a luminous sensitivity exceeding 350 microamps per lumen;

(ii) An image intensifier tube having a GaAs, GaInAs, or other III-V semiconductor photocathode, with a peak response in the wavelength range exceeding 400 nm but not exceeding 2,000 nm; or

(iii) An image intensifier tube having a photocathode with a peak response in the wavelength range exceeding 400 nm but not exceeding 2,000 nm and a focal plane array in the tube vacuum space.

D. Infrared imaging systems, as follows: Mobile reconnaissance, mobile scout, or mobile surveillance systems, that provide real-time target geolocation

at ranges greater than 3 km (*e.g.*, LRS3, CIV, HTI, SeeSpot, MMS).

E. Infrared imaging systems, as follows: Gimbaled infrared systems (*e.g.*, T-bar, yoke, ball turrets, or pods), as follows and specially designed parts and components therefor:

(i) Having a root mean square (RMS) stabilization better (less) than 25 microradians and incorporating an infrared camera having a peak response at a wavelength exceeding 1,000 nm with an optical angular resolution (*i.e.*, detector instantaneous field-of-view) of 25 microradians or less;

(ii) Having an RMS stabilization better (less) than 25 microradians for any payload having any dimension of 15 inches or greater; or

(iii) Specially designed for articles in this subchapter or specially designed for a military end user.

F. Image intensifier tubes having all the following, and specially designed parts and components therefor:

(i) A peak response in the wavelength range exceeding 400 nm but not exceeding 1,050 nm;

(ii) A multi-alkali photocathode with a luminous sensitivity of 1,300 microamps per lumen or greater; and

(iii) A limiting resolution of 64 line pairs per millimeter or greater.

G. Image intensifier tubes having all of the following, and specially designed parts and components therefor:

(i) A peak response in the wavelength range exceeding 400 nm but not exceeding 1,050 nm;

(ii) A GaAs, GaInAs, or other III-V compound semiconductor photocathode having a luminous sensitivity of 1,800 microamps per lumen or greater; and

(iii) A limiting resolution of 57 line pairs per millimeter or greater.

H. Image intensifier tubes having all of the following, and specially designed parts and components therefor:

(i) A peak response in the wavelength range exceeding 1,050 nm but not exceeding 2,000 nm; and

(ii) A GaAs, GaInAs, or other III-V compound semiconductor photocathode having a radiant sensitivity of 10 milliamps per watt or greater.

I. Infrared focal plane arrays or dewars specially designed for optical augmentation reduction.

J. Infrared focal plane array dewar assemblies with peak response in the wavelength range greater than 3,000 nm but not exceeding 14,000 nm, and having a variable aperture mechanism.

K. Infrared focal plane arrays having all of the following:

(i) A peak response in the wavelength range exceeding 710 nm but not exceeding 1,100 nm;

(ii) A non-binned pixel pitch of 10 microns or greater;

(iii) More than 1,024 detector elements in any direction; and

(iv) Total noise of 3 electrons or less at an input light level of 1 millilux, in a binned or non-binned operating mode, and measured at an ambient operating temperature of 300 K.

L. Infrared focal plane arrays having greater than 81,920 but not exceeding 327,680 detector elements, a peak response in the wavelength range 1,100 nm but not exceeding 1,700 nm, and any of the following:

(i) Noise equivalent irradiance less than 829 million photons per centimeter squared per second;

(ii) Readout integrated circuits capable of pulse interval modulation decoding or pulse repetition frequency decoding (*e.g.*, an asynchronous detector read out integrated circuit, frame rates windowed or non-windowed greater than 2,000 Hz); or

(iii) Temperature dependent non-uniformity correction (*e.g.*, without the use of a temperature stabilization)

Note: Noise equivalent irradiance is defined as a ratio with the numerator comprised of the focal plane noise floor in units of electrons at a focal plane array temperature of 300 K and the denominator as the multiplied value of detector area in square centimeters, spectral quantum efficiency at 1,550 nm, and an integration time of 0.032 seconds.

M. Infrared focal plane arrays having greater than 327,680 detector elements, a peak response in the wavelength range exceeding 1,100 nm but not exceeding 1,700 nm, and any of the following:

(i) Noise equivalent irradiance less than 1.54 billion photons per centimeter squared per second;

(ii) A readout integrated circuits capable of pulse interval modulation decoding or pulse repetition frequency decoding (*e.g.*, an asynchronous detector read out integrated circuit, frame rates windowed or non-windowed greater than 2,000 Hz); or

(iii) Temperature dependent non-uniformity correction (*e.g.*, without the use of temperature stabilization)

Note: Noise equivalent irradiance is defined as a ratio with the numerator comprised of the focal plane noise floor in units of electrons at a focal plane array temperature of 300 K and the denominator as the numerator to the multiplied value of detector area in square centimeters, spectral quantum efficiency at 1,550 nm, and an integration time of 0.032 seconds.

N. Infrared focal plane arrays having greater than 327,680 detector elements, a peak response in the wavelength range exceeding 1,700 nm but not exceeding 3,000 nm, and any of the following:

(i) Readout integrated circuits capable of pulse interval modulation decoding

or pulse repetition frequency decoding (e.g. an asynchronous detector read out integrated circuit, frame rates windowed or non-windowed greater than 2,000 Hz);

(ii) A total noise floor less than 75 electrons at an operating temperature of 300 K; or
(iii) A detector pitch less than or equal to 20 microns.

O. Infrared focal plane arrays having an internal quantum efficiency exceeding 10 percent anywhere in the wavelength range exceeding 3,000 nm but not exceeding 7,500 nm and any of the following:

(i) A detector pitch less than 12.5 microns; or

(ii) More than 1,331,200 detector elements.

P. Infrared focal plane arrays having a peak response in the wavelength range exceeding 7,500 nm but not exceeding 30,000 nm, and all of the following:

(i) A detector element of the photon, not thermal, type;

(ii) A detector pitch less than or equal to 30 microns; and

(iii) Greater than or equal to 262,144 detector elements.

Q. Infrared focal plane arrays having a peak response in the wavelength range exceeding 7,500 nm but not exceeding 14,000 nm and all of the following:

(i) A detector element of the photon, not thermal, type;

(ii) Greater than 300 detector elements; and

(iii) Time delay integration of detector elements.

R. Microbolometer focal plane arrays having an unfiltered response in the wavelength range exceeding 7,500 nm but not exceeding 14,000 nm and any of the following:

(i) Vacuum packaged and specially designed to withstand weapon shock; or
(ii) Greater than 328,000 detector elements with a detector pitch less than or equal to 14 microns.

S. Infrared focal plane arrays specially designed to provide distinct outputs corresponding to more than one spectral band, and having all the following:

(i) Multiple spectral bands with a photo-response in the wavelength range exceeding 1,100 nm but not exceeding 14,000 nm; and

(ii) A detector element pitch less than 50 microns.

T. Digital low-light-level sensors incorporating a photocathode and a focal plane array within the vacuum space, with a peak response in the wavelength range exceeding 400 nm but not exceeding 2,000 nm, and having any of the following:

(i) A photocathode with a luminous sensitivity greater than 1,800 microamps per lumen; or

(ii) Greater than 2,040,000 focal plane array detector elements.

U. Analog readout integrated circuits specially designed for articles in this subchapter.

and

V. Digital readout integrated circuits specially designed for focal plane arrays having a peak spectral response in the wavelength band exceeding 1,100 nm but not exceeding 30,000 nm, a digital signal output, and any of the following:

(i) Dynamic range greater than 54 dB; or

(ii) Pixel read-out rate greater than 540 million bits per second.

The Department will review all comments from the public. If a rulemaking is warranted based on the comments received, the Department will respond to comments received in a proposed rulemaking in the **Federal Register**.

C. Edward Peartree,

Office Director, Defense Trade Controls Policy, Bureau of Political-Military Affairs, Department of State.

BILLING CODE 4710-25-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG-2015-1113]

RIN 1625-AA00

Safety zone; Tennessee River, Mile 446.0 to 454.5

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish a safety zone for all waters of the Tennessee River, beginning at mile marker 446.0 and ending at mile marker 454.5 during periods of high water flow. High water flow is determined by flow rates that have reached or exceeded 100,000 cubic feet per second at Chickamauga lock and dam on the Tennessee River at mile marker 471.0. This proposed safety zone is necessary to provide safety for mariners transiting on the Tennessee River during periods of high water flow. Entry into this area will be prohibited unless specifically authorized by the Captain of the Port Ohio Valley or designated representative. We invite your comments on this proposed rulemaking. **DATES:** Comments and related material must be received by the Coast Guard on or before January 30, 2017.

ADDRESSES: You may submit comments identified by docket number USCG-2015-1113 using the Federal eRulemaking Portal at <http://www.regulations.gov>. See the "Public Participation and Request for Comments" portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email Petty Officer Ashley Schad, MSD Nashville, Nashville, TN, at 615-736-5421 or at Ashley.M.Schad@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
E.O. Executive order
FR Federal Register
NPRM Notice of proposed rulemaking
Pub. L. Public Law
§ Section
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

The Captain of the Port Ohio Valley is proposing to establish a safety zone for all waters of the Tennessee River, from mile 446.0 to 454.5 during periods of high water flow. This proposed safety zone is necessary to provide safety for mariners transiting on the Tennessee River during periods of high water flow. There have been temporary final rules issued in the past establishing a safety zone on the Tennessee River beginning at mile marker 446.0 and ending at mile marker 454.5 when flow rates reached or exceeded 100,000 cubic feet per second at Chickamauga lock and dam. Examples of these previous temporary final rules were published under docket numbers USCG-2013-0025 and USCG-2011-1148. This proposed rulemaking is also necessary to more efficiently effect necessary safety measures during emergent high water events in the future by reducing administrative burden and the amount of paperwork required for multiple individual rulemakings. The Tennessee River beginning at mile marker 446.0 and ending at 454.5 poses a navigational hazard during periods of high water flow. A high water flow determination for this area is established when flow rates reach or exceed 100,000 cubic feet per second at Chickamauga lock and dam on the Tennessee River at mile marker 471.0. The Captain of the Port Ohio Valley has determined that additional safety measures are necessary to protect all mariners during periods of high water flow. Therefore, the Coast Guard

proposes to establish a permanent safety zone on specified waters of the Tennessee River triggered by high water flow. This proposed regulation would be in effect whenever flow rates reach or exceed 100,000 cubic feet per second at Chickamauga lock and dam on the Tennessee River at mile marker 471.0.

The Coast Guard proposes this rulemaking under the authority in 33 U.S.C. 1231.

III. Discussion of Proposed Rule

The Captain of the Port Ohio Valley is proposing to establish a safety zone for all waters of the Tennessee River beginning at mile marker 446.0 and ending at mile marker 454.5. Vessels or persons would not be able to enter into, depart from, or move within this area without permission from the Captain of the Port Ohio Valley or designated representative. Persons or vessels requiring entry into or passage through the proposed safety zone will be required to request permission from the Captain of the Port Ohio Valley, or designated representative. They can be contacted on VHF-FM Channel 13, 16, or through Coast Guard Sector Ohio Valley at 1-800-253-7465. This proposed rule would be effective during periods of high water flow when flow rates reach or exceed 100,000 cubic feet per second at Chickamauga lock and dam. The Captain of the Port Ohio Valley would inform the public through broadcast notices to mariners during periods of high water flow when the safety zone is established as well as when flow rates fall below 100,000 cubic feet per second and the safety zone is no longer in effect.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and executive orders (E.O.s) related to rulemaking. Below we summarize our analyses based on a number of these statutes and E.O.s, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

E.O.s 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This NPRM has not been designated a “significant regulatory action,” under E.O. 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget.

This regulatory action determination is based on the size, location, duration, and time-of-day of the safety zone. Vessel traffic would only be impacted during times of high water which pose dangerous navigational hazards when flow rates exceed 100,000 cubic feet per second at Chickamauga lock and dam. Moreover, the Coast Guard would issue a Broadcast Notice to Mariners via VHF-FM marine channel 16 about the zone, and the rule would allow vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section IV.A above this proposed rule would not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under E.O. 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in E.O. 13132.

Also, this proposed rule does not have tribal implications under E.O. 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves a safety zone lasting only during periods of high water flow measured by Chickamauga lock and dam. Normally such actions are categorically excluded from further review under paragraph 34(g) of Figure

2–1 of Commandant Instruction M16475.ID. A preliminary environmental analysis checklist and Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at <http://www.regulations.gov>. If your material cannot be submitted using <http://www.regulations.gov>, contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you have provided. For more about privacy and the docket, you may review a Privacy Act notice regarding the Federal Docket Management System in the March 24, 2005, issue of the **Federal Register** (70 FR 15086).

Documents mentioned in this NPRM as being available in the docket, and all public comments, will be in our online docket at <http://www.regulations.gov> and can be viewed by following that Web site's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.844 to read as follows:

§ 165.844 Safety Zone; Tennessee River, Mile 446.0 to 454.5; Chattanooga, TN

(a) *Location.* All waters of the Tennessee River beginning at mile marker 446.0 and ending at mile marker 454.5 at Chattanooga, TN.

(b) *Effective date.* This rule is effective during periods of high water flow when flow rates reach or exceed 100,000 cubic feet per second at Chickamauga lock and dam on the Tennessee River at mile marker 471.0.

(c) *Periods of Enforcement.* This rule will be enforced whenever flow rates reach or exceed 100,000 cubic feet per second at Chickamauga lock and dam on the Tennessee River at mile marker 471.0. The Captain of the Port Ohio Valley or a designated representative will inform the public through broadcast notice to mariners of the enforcement period for the safety zone.

(d) Regulations.

(1) In accordance with the general regulations in § 165.23 of this part, entry into this zone is prohibited unless authorized by the Captain of the Port Ohio Valley or a designated representative.

(2) Persons or vessels desiring entry into or passage through the zone must request permission from the Captain of the Port Ohio Valley or a designated representative. U. S. Coast Guard Sector Ohio Valley may be contacted on VHF Channel 13 or 16, or at 1–800–253–7465.

(3) All persons and vessels shall comply with the instructions of the Captain of the Port Ohio Valley and designated U.S. Coast Guard patrol personnel. On-scene U.S. Coast Guard patrol personnel include commissioned, warrant, and petty officers of the U.S. Coast Guard.

Dated: January 10, 2017.

M.B. Zamperini,

Captain, U.S. Coast Guard, Captain of the Port Ohio Valley.

BILLING CODE 9110–04–P

POSTAL SERVICE

39 CFR Part 111

Seamless Acceptance Program

AGENCY: Postal Service™.

ACTION: Proposed rule.

SUMMARY: The Postal Service proposes to revise *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM®) to add the mail preparation requirements governing participation in the Seamless Acceptance Program.

DATES: Submit comments on or before February 13, 2017.

ADDRESSES: Mail or deliver written comments to the manager, Product Classification, U.S. Postal Service, 475 L'Enfant Plaza SW., Room 4446, Washington, DC 20260–5015. If sending comments by email, include the name and address of the commenter and send to ProductClassification@usps.gov, with a subject line of “Seamless Acceptance Program.” Faxed comments are not accepted.

You may inspect and photocopy all written comments, by appointment only, at USPS® Headquarters Library, 475 L'Enfant Plaza SW., 11th Floor North, Washington, DC 20260. These records are available for review on Monday through Friday, 9 a.m.–4 p.m., by calling 202–268–2906.

FOR FURTHER INFORMATION CONTACT: Direct questions or comments to Heather Dyer by email at heather.l.dyer@usps.gov or phone (207) 482–7217, or Jacqueline Erwin by email at jacqueline.r.erwin@usps.gov or phone (202) 268–2158.

SUPPLEMENTARY INFORMATION: Seamless Acceptance is an option for entering commercial mailings. It leverages full-service mailing technology by using scans from USPS® mail processing equipment and hand held devices to automate verification and payment for commercial First-Class Mail cards, letters, and flats, Periodicals, Standard Mail letters and flats, and Bound Printed Matter Flats. Mailers may participate in the Seamless Acceptance Program by contacting the *PostalOne!* Helpdesk at 1–800–522–9085. To participate in the Seamless Acceptance Program, mailers must meet the

standards in DMM 705.22.0. Additional information, including information regarding verification and associated assessments under the Seamless Acceptance Program, is provided in Publication 6850, *Publication for Streamlined Mail Acceptance for Letters and Flats*, at <https://postalpro.usps.com/node/581>.

List of Subjects in 39 CFR Part 111

Administrative practice and procedure, Postal Service.

Although exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553(b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service invites public comments on the following proposed revisions to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

Accordingly, 39 CFR part 111 is proposed to be amended as follows:

PART 111—[AMENDED]

■ 1. The authority citation for 39 CFR part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 13 U.S.C. 301–307; 18 U.S.C. 1692–1737; 39 U.S.C. 101, 401, 403, 404, 414, 416, 3001–3011, 3201–3219, 3403–3406, 3621, 3622, 3626, 3632, 3633, and 5001.

■ 2. Revise the following sections of *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), as follows:

Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM)

* * * * *

700 Special Standards

* * * * *

705 Advanced Preparation and Special Postage Payment Systems

* * * * *

[Add new section 22.0, to read as follows:]

22.0 Seamless Acceptance Program

22.1 Description

Seamless Acceptance uses Intelligent Mail barcodes, electronic documentation (eDoc), and scans from USPS mail processing equipment and hand held devices, to automate verification of and payment for First-Class Mail cards, letters, and flats, Periodicals, Standard Mail letters and flats, and Bound Printed Matter flats. Additional information, including information regarding verification and

associated assessments on the Seamless Acceptance Program, is provided in Publication 6850, *Publication for Streamlined Mail Acceptance for Letters and Flats*, available at <https://postalpro.usps.com/node/581>.

22.2 Approval

Mailers may seek authorization to participate in the Seamless Acceptance Program by contacting the *PostalOne!* Helpdesk at 1–800–522–9085.

22.3 Basic Standards

First-Class Mail, Periodicals, and Standard Mail letters and flats and BPM barcoded flats, are potentially eligible for Seamless Acceptance. All mailpieces, including basic and nonautomation must be prepared as outlined in 23.0; mailers must meet the following standards:

- a. Meet all the content and price eligibility standards for the price claimed.
- b. Prepare 90% Full-Service eligible volume
- c. Participate in the Seamless Parallel Program
- d. Participate in eInduction under 20.0 for DMU-verified origin entry or destination entry-drop shipments.

22.3.1 Intelligent Mail Barcode Exception

Under special circumstances where mailers are unable to use an Intelligent Mail Barcode on every piece an exception may be granted by Business Mailer Support (BMS); see 608.8 for contact information.

* * * * *

We will publish an appropriate amendment to 39 CFR part 111 to reflect these changes, if our proposal is adopted.

Stanley F. Mires,
Attorney, Federal Compliance.

National Emission Standards for Hazardous Air Pollutants: Nutritional Yeast Manufacturing Risk and Technology Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; Notice of public hearing and extension of comment period.

SUMMARY: On December 28, 2016, the Environmental Protection Agency (EPA) published a notice to announce its proposed amendments to the National Emission Standards for Hazardous Air Pollutants for the Manufacturing of Nutritional Yeast source category. The notice also requested public comment on the proposed amendments. The EPA is announcing that a public hearing will be held. In addition, the EPA is extending the public comment period.

DATES: The public hearing will be held on January 25, 2017. Written comments must be received on or before February 24, 2017.

ADDRESSES: The public hearing will be held on January 25, 2017, at the EPA’s North Carolina campus located at 109 T.W. Alexander Drive, Research Triangle Park, NC 27711. The hearing will convene at 10:00 a.m. (Eastern Time) and will conclude no later than 4:00 p.m. (Eastern Time). If there are no additional registered speakers, the EPA will end the hearing 2 hours after the last registered speaker has concluded their comments. The EPA will make every effort to accommodate all speakers. The EPA’s Web site for the rulemaking, which includes the proposal and information about the hearing, can be found at: <https://www.epa.gov/stationary-sources-air-pollution/manufacturing-nutritional-yeast-national-emission-standards>.

For information on submitting your written comments, refer to the proposed reconsideration notice published at 81 FR 95810 in the **Federal Register** on December 28, 2016.

FOR FURTHER INFORMATION CONTACT: If you would like to present oral testimony at the public hearing, registration will begin on January 13, 2017. To register to speak at a hearing, please contact Aimee St. Clair at (919) 541–1063 or at stclair.aimee@epa.gov. The last day to pre-register to present oral testimony in advance will be January 23, 2017. If using email, please provide the following information: The time you wish to speak, name, affiliation, address, email address, and telephone number. Time slot preferences will be given in the order requests are received. Additionally, requests to speak will be taken the day of the hearing at the hearing registration desk, although preferences on speaking times may not be able to be fulfilled. Please note that registration requests received before each hearing will be confirmed by the EPA via email. We cannot guarantee

that we can accommodate all timing requests and will provide requestors with the next available speaking time, in the event that their requested time is taken. Please note that the time outlined in the confirmation email received will be the scheduled speaking time. Again, depending on the flow of the day, times may fluctuate. Please note that any updates made to any aspect of the hearing will be posted online at: <https://www.epa.gov/stationary-sources-air-pollution/manufacturing-nutritional-yeast-national-emission-standards>. While the EPA expects the hearing to go forward as set forth above, we ask that you monitor our Web site or contact Aimee St. Clair at (919) 541-1063 or at stclair.aimee@epa.gov to determine if there are any updates to the information on the hearing. The EPA does not intend to publish a notice in the **Federal Register** announcing any such updates.

Questions concerning the rule that was published in the **Federal Register** on December 28, 2016, should be addressed to Allison Costa, Office of Air Quality Planning and Standards, Sector Policies and Programs Division (E140), Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541-1322; facsimile number: (919) 541-3470; email address: costa.allison@epa.gov.

Public hearing: The proposal for which the EPA is holding the public hearing was published in the **Federal Register** on December 28, 2016, and is available at: <https://www.epa.gov/stationary-sources-air-pollution/manufacturing-nutritional-yeast-national-emission-standards>, and also in Docket ID No. EPA-HQ-OAR-2015-0730. The public hearing will provide interested parties the opportunity to present oral comments regarding the EPA's proposed standards, including data, views, or arguments concerning the proposal. The EPA may ask clarifying questions during the oral presentations, but will not respond to the presentations at that time. Written statements and supporting information submitted during the comment period will be considered with the same weight as any oral comments and supporting information presented at the public hearing. The period for providing written comments to the EPA will remain open until February 24, 2017.

Commenters should notify Aimee St. Clair if they will need specific equipment or if there are other special needs related to providing comments at the public hearing. The EPA will provide equipment for commenters to make computerized slide presentations if we receive special requests in advance. Oral testimony will be limited

to 5 minutes for each commenter. The EPA encourages commenters to submit to the docket a copy of their oral testimony electronically (via email or CD) or in hard copy form.

Because the hearing will be held at a U.S. government facility, individuals planning to attend the hearing should be prepared to show valid picture identification to the security staff in order to gain access to the meeting room. Please note that the REAL ID Act, passed by Congress in 2005, established new requirements for entering federal facilities. If your driver's license is issued by Minnesota, Missouri or the State of Washington, you must present an additional form of identification to enter the federal building. Acceptable alternative forms of identification include: Federal employee badges, passports, enhanced driver's licenses, and military identification cards. In addition, you will need to obtain a property pass for any personal belongings you bring with you. Upon leaving the building, you will be required to return this property pass to the security desk. No large signs will be allowed in the building, cameras may only be used outside of the building, and demonstrations will not be allowed on federal property for security reasons.

The public hearing schedule, including lists of speakers, will be posted on the EPA's Web site at: <https://www.epa.gov/stationary-sources-air-pollution/manufacturing-nutritional-yeast-national-emission-standards>. Verbatim transcripts of the hearing and written statements will be included in the docket for the rulemaking. The EPA will make every effort to follow the schedule as closely as possible on the day of the hearing; however, please plan for the hearing to run either ahead of schedule or behind schedule.

How can I get copies of this document and other related information?

The EPA has established a docket for the proposed rule, "National Emission Standards for Hazardous Air Pollutants: Nutritional Yeast Manufacturing Risk and Technology Review," under Docket ID No. EPA-HQ-OAR-2015-0730, available at <http://www.regulations.gov>.

Dated: January 9, 2017.

Mary Henigin,

Acting Director, Office of Air Quality Planning and Standards.

Public Notification Requirements for Combined Sewer Overflows to the Great Lakes Basin

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing a rule to implement section 425 of the Consolidated Appropriations Act of 2016, which requires EPA to work with the Great Lakes states to establish public notification requirements for combined sewer overflow (CSO) discharges to the Great Lakes. The proposed requirements address signage, notification of local public health departments and other potentially affected public entities, notification to the public, and annual notice provisions.

The proposed rules, when finalized, will protect public health by ensuring timely notification to the public and to public health departments, public drinking water facilities and other potentially affected public entities, including Indian tribes. Timely notice may allow the public to take steps to reduce their potential exposure to pathogens associated with human sewage, which can cause a wide variety of health effects, including gastrointestinal, skin, ear, respiratory, eye, neurologic, and wound infections.

DATES: Comments must be received on or before March 14, 2017.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-OW-2016-0376 to the *Federal eRulemaking Portal*: <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (e.g.,

on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-s>.

I. General Information

A. Does this action apply to me?

Entities within the Great Lakes Basin potentially regulated by this proposed action include:

Category	Examples of regulated entities	North American industry classification system (NAICS) code
Federal and state government	EPA or state NPDES permit authorities	924110
Local governments	NPDES permittees with a CSO discharge to the Great Lakes Basin.	221320

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. This table lists the types of entities that EPA is now aware could potentially be regulated or otherwise affected by this action. Other types of entities not listed in the table could also be regulated. To determine whether your entity is regulated by this action, you should carefully examine the applicability criteria found in § 122.32 title 40 of the Code of Federal Regulations, and the discussion in the preamble. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

B. What action is the Agency proposing?

EPA is proposing a rule to establish public notification requirements for CSOs to the Great Lakes Basin. The proposed rule would implement Section

425 of the Consolidated Appropriations Act of 2016 (Pub. L. 114–113) (hereafter referred to as “Section 425”), which requires EPA to work with the Great Lake states to establish public notice requirements for CSO discharges to the Great Lakes and prescribes minimum requirements for such notice. EPA sought and considered public input during the development of the proposed rule.

This proposal includes required methods for CSO permittees in the Great Lakes Basin to provide public notification of CSO discharges and for the minimum content of such notification. The proposed requirements for methods of providing public notice of CSO discharges include signage, initial and supplemental notice to potentially affected public entities and to the public, and an annual notice that allows for analysis of trends in combined sewer system performance and the operator’s plans for CSO

controls. In addition, EPA proposes requirements for Great Lakes Basin CSO permittees to develop a public notification plan that reflects community-specific details (e.g., proposed monitoring locations, means for disseminating information to the public) as to how the permittee would implement the proposed public notification requirements. EPA proposes that Great Lakes Basin CSO permittees would submit the public notification plan to the NPDES permitting authority (“Director”) within six months after publication of a final regulation. The public notification plan would provide a means of public engagement on the details of implementation of the notification requirements.

Under the proposal, the public notification provisions, including the requirement to develop a public notification plan, would be implemented through two regulatory mechanisms. First, EPA proposes to add

a new section to the NPDES permit regulations, to be codified at 40 CFR 122.38, establishing the public notification requirements for Great Lakes CSO permittees. The proposed requirements in § 122.38 would apply directly to Great Lakes CSO permittees until their NPDES permits are next reissued after publication of a final regulation.

EPA proposes that the requirements for developing the public notification plan and the methods of notification other than the annual notice would directly apply to CSO permittees that discharge to the Great Lakes Basin six months after publication of a final regulation. EPA proposes that the annual notice requirements would directly apply one year after publication of a final regulation to allow permittees time to collect data for a full year. Under this proposal, the Director could extend the compliance dates for notification and/or submittal of the public notification plan for individual communities if the Director determines the community needs additional time to comply in order to avoid undue economic hardship.

Second, under this proposal, the public notification requirements for CSO discharges to the Great Lakes Basin would be implemented as a condition in NPDES permits when they are next reissued after publication of a final regulation. EPA proposes that when the permittee's CSO NPDES permit is reissued, the permit would be required to include a permit condition addressing public notification of CSO discharges to the Great Lakes Basin. The proposed permit condition would incorporate the proposed requirements in § 122.38 for signage, methods of notification and annual notice, as well as requirements to provide specific information relevant to the permittee's implementation of the notification requirements. This two-stage implementation approach would ensure that the requirements of Section 425 will be implemented during the interim period before the permit condition is incorporated into the relevant NPDES permits, consistent with Section 425, which requires implementation by December 18, 2017.

The objectives of these proposed requirements are to:

- Ensure *timely notice to the public* of CSO discharges. This notice is intended to alert members of the public to CSO discharges which may allow them to take steps to reduce their potential exposure to pathogens associated with the discharges.
- Ensure *timely notice to local public health departments, public drinking*

water facilities and other potentially affected public entities, including Indian tribes, of CSO discharges. This notice is intended to alert these entities to specific CSO discharges and support the development of appropriate responses to the discharges, such as ensuring that beach closures and advisories reflect the most accurate and up-to-date information or adjusting the intake or treatment regime of drinking water treatment facilities that have intakes from surface waters affected by CSO discharges.

- Provide the community and interested stakeholders with *effective and meaningful follow-up notification* that allows for analysis of trends in combined sewer system (CSS) performance and provides stakeholders with information on the CSS operator's plans to control CSO discharges. This information is intended to help the community understand the current performance of their collection system and how the community's ongoing investment to reduce overflows would address the impacts of CSOs.

C. What is the Agency's authority for taking this action?

The authority for this rule is Section 425 of the Consolidated Appropriations Act of 2016 (Pub. L. 114–113) and the Federal Water Pollution Control Act, 33 U.S.C. 1251 *et seq.*, including sections 1314(i), 1318, 1342 and 1361(a).

II. Background

A. Combined Sewer Overflows From Municipal Wastewater Collection Systems

Municipal wastewater collection systems collect domestic sewage and other wastewater from homes and other buildings and convey it to wastewater treatment plants for treatment and disposal. The collection and treatment of municipal sewage and wastewater is vital to the public health in our cities and towns. In the United States, municipalities historically have used two major types of sewer systems—separate sanitary sewer systems and CSSs.

Municipalities with separate sanitary sewer systems use that system solely to collect domestic sewage and convey it to a publicly owned treatment works (POTW) treatment plant for treatment. These municipalities also have separate sewer systems to collect surface drainage and stormwater, known as “municipal separate storm sewer systems” (MS4s). Separate sanitary sewer systems are not designed to collect large amounts of runoff from rain or snowmelt or provide widespread

surface drainage, although they typically are built with some allowance for some amount of stormwater or groundwater that enters the system as a result of storm events.

The other type of sewer system, CSSs, is designed to collect both sanitary sewage and stormwater runoff in a single-pipe system. This type of sewer system provides the primary means of surface drainage by carrying rain and snowmelt away from streets, roofs, and other impervious surfaces. CSSs were among the earliest sewer systems constructed in the United States and were built until the first part of the 20th century.

Under normal, dry weather conditions, combined sewers transport all of the combined wastewater (sewage and stormwater runoff) collected to a sewage treatment plant for treatment. However, under wet weather conditions when the volume of wastewater and stormwater exceeds the capacity of the CSS or treatment plant, these systems are designed to divert some of the combined flow prior to reaching the POTW treatment plant and to discharge combined stormwater and sewage directly to nearby streams, rivers and other water bodies. These discharges of sewage from a CSS that occur prior to the POTW treatment plant are referred to as combined sewer overflows or CSOs. Depending on the CSS infrastructure design, CSO discharges may be untreated or may receive some level of treatment, such as solids settling in a retention basin and disinfection, prior to discharge.

CSO discharges contain human and industrial waste, toxic materials, and debris as well as stormwater. CSO discharges can be harmful to human health and the environment because they introduce pathogens (*e.g.*, bacteria, viruses, protozoa) and other pollutants to receiving waters, causing beach closures, water quality impairment, and contaminate drinking water supplies and shellfish beds. CSOs can also cause depleted oxygen levels which can impact fish and other aquatic populations.

CSSs serve a total population of about 40 million people nationwide. Most communities with CSSs are located in the Northeast and Great Lakes regions, particularly in Illinois, Indiana, Maine, Michigan, New York, Ohio, Pennsylvania, and West Virginia. Although large cities like Chicago, Cleveland, and Detroit have CSSs, most communities with CSSs have fewer than 10,000 people. Most CSSs have multiple CSO discharge locations or outfalls, with some larger communities with

combined sewer systems having hundreds of CSO outfalls.

B. Combined Sewer Overflows to the Great Lakes Basin

As of September 2015, 859 active NPDES permits for CSO discharges had been issued in 30 states plus the District of Columbia and Puerto Rico. Of these 859 permits, 190 permits¹ are for CSO

discharges to waters located in the watershed for the Great Lakes and the Great Lakes System (“Great Lakes Basin”).² The 190 permits for CSO discharges to the Great Lakes Basin have been issued to 182 communities³ or permittees. These permittees are located in the states of New York, Pennsylvania, Ohio, Michigan, Illinois, Indiana, and Wisconsin. CSO communities are

scattered across the Great Lakes Basin, with the greatest concentration in Ohio, southeastern Michigan and northeastern Indiana discharging to Lake Erie, and in northern Indiana and southwestern Michigan discharging to Lake Michigan (see Figure 1). Hereafter, the owner or operator of a CSS is referred to as a “CSO permittee.”

Figure 1. CSO Permittees in the Great Lakes Basin

EPA recently summarized available information on the occurrence and volume of discharges from CSOs to the Great Lakes Basin during 2014 (see Report to Congress: Combined Sewer Overflows into the Great Lakes Basin (EPA 833-R-16-006)), contained in the public docket for this rulemaking. As summarized in this report, seven states reported 1,482 events where untreated

sewage was discharged from CSOs to the Great Lakes Basin in 2014 and an additional 187 CSO events where treated sewage was discharged. For the purposes of the Report, treated discharges referred to CSO discharges that received a minimum of:

- Primary clarification (removal of floatables and settleable solids may be achieved by any combination of

treatment technologies or methods that are shown to be equivalent to primary clarification);

- Solids and floatable disposal; and
- Disinfection of effluent, if necessary to meet water quality standards and protect human health, including removal of harmful disinfection chemical residuals, where necessary.

¹ EPA identified 184 CSO permits in the Great Lakes Basin in the 2016 Report to Congress: Combined Sewer Overflows into the Great Lakes Basin (EPA 833-R-16-006). EPA has adjusted that estimate to reflect additional information. First, six CSO permittees identified in the Report to Congress were subtracted because their permit coverage had been terminated due to sewer separation or other reasons. Second, EPA conducted a GIS analysis and verified with States that 12 permits for CSO discharges to the Great Lakes Basin were not identified in the 2016 Great Lakes CSO Report to Congress. A list of these 18 permits is available in the docket for this rulemaking.

² Section 425 specifies in Section 425(a)(4) that the term “Great Lakes” means “any of the waters as defined in the Section 118(a)(3) of the Federal Water Pollution Control Act (33 U.S.C. 1292).” This, therefore, includes Section 118(a)(3)(B), which defines “Great Lakes” as “Lake Ontario, Lake Erie, Lake Huron (including Lake St. Clair), Lake Michigan, and Lake Superior, and the connecting channels (Saint Mary’s River, Saint Clair River, Detroit River, Niagara River, and Saint Lawrence River to the Canadian Border);” and Section 118(a)(3)(C), which defines “Great Lakes System” as “all the streams, rivers, lakes, and other bodies of water within the drainage basin of the Great Lakes.”

Collectively, EPA is referring to the Great Lakes and the Great Lakes System as the “Great Lakes Basin.”

³ The number of CSO communities in the Great Lakes Basin is different than the number of CSO permits. Four CSO communities have more than one CSO NPDES permit. These include Metropolitan Water Reclamation District of Greater Chicago (MWRDGC) (4 permits); Wayne County, MI (4 permits); Oakland County, MI (2 permits); and the City of Oswego, NY (2 permits). For the purposes of counting communities, communities with multiple CSO permits are counted as one CSO community.

Additional information regarding CSO discharges to the Great Lakes Basin, including the Report to Congress, is available at <https://www.epa.gov/npdes/combined-sewer-overflows-great-lakes-basin>. Table 1 provides the size distribution of the 182 CSO communities in the Great Lakes Basin.

TABLE 1—GREAT LAKES BASIN CSO COMMUNITIES BY COMMUNITY POPULATION

Community Population	Over 50,000	10,000–49,999	Under 10,000	Total
Number of CSO Communities	32	70	80	182

Permits issued to Metropolitan Water Reclamation District of Greater Chicago and Wayne County used the population for Chicago and Wayne County, respectively.

As stated above, CSOs can cause human health and environmental impacts.⁴ CSOs often discharge simultaneously with other wet weather sources of water pollution, including stormwater discharges from various sources including municipal separate storm sewers, wet weather sanitary sewer overflows (SSOs) from separate sanitary sewer systems, and nonpoint sources of pollution. The cumulative effects of wet weather pollution can make it difficult to identify and assign specific cause-and-effect relationships between CSOs and observed water quality problems. The environmental impacts of CSOs are most apparent at the local level.⁵

C. The CSO Control Policy and Clean Water Act Framework for Reducing and Controlling Combined Sewer Overflows

The Clean Water Act (CWA) establishes national goals and requirements for maintaining and restoring the nation's waters. CSO discharges are point sources subject to the technology-based and water quality-based requirements of the CWA under NPDES permits. Technology-based effluent limitations for CSO discharges are based on the application of best available technology economically achievable (BAT) for toxic and nonconventional pollutants and best conventional pollutant control technology (BCT) for conventional pollutants. BAT and BCT effluent limitations for CSO discharges are determined based on "best professional judgment." CSO discharges are not subject to permit limits based on secondary treatment requirements that are applicable to discharges from

POTWs.⁶ Permits authorizing discharges from CSO outfalls must include more stringent water quality-based requirements, when necessary, to meet water quality standards (WQS).

EPA issued the CSO Control Policy on April 19, 1994 (59 FR 18688). The CSO Control Policy "represents a comprehensive national strategy to ensure that municipalities, permitting authorities, water quality standards authorities, and the public engage in a comprehensive and coordinated effort to achieve cost-effective CSO controls that ultimately meet appropriate health and environmental objectives." (59 FR 18688). The policy assigns primary responsibility for implementation and enforcement to NPDES permitting authorities (generally referred to as the "Director" in the NPDES regulations) and water quality standards authorities.

The policy also established objectives for CSO permittees to: (1) Implement "nine minimum controls" and submit documentation on their implementation; and (2) develop and implement a long-term CSO control plan (LTCP) to ultimately result in compliance with the CWA, including water quality-based requirements. In describing NPDES permit requirements for CSO discharges, the CSO Control Policy states that the BAT/BCT technology-based effluent limitations "at a minimum include[s] the nine minimum controls." (59 FR 18696) One of the nine minimum controls is "Public notification to ensure that the public receives adequate notification of CSO occurrences and CSO impacts."

In December 2000, as part of the Consolidated Appropriations Act for Fiscal Year 2001 (Pub. L. 106–554), Congress amended the CWA by adding Section 402(q). This amendment is commonly referred to as the "Wet Weather Water Quality Act of 2000." It requires that each permit, order, or decree issued pursuant to the CWA after the date of enactment for a discharge from a municipal combined sewer

system shall conform to the CSO Control Policy.

D. NPDES Regulations Addressing CSO Reporting

The NPDES regulations require NPDES permits to include requirements for monitoring discharges, including CSO discharges, and reporting the results, on a case-by-case basis with a frequency dependent on the nature and effect of the discharge, but in no case less than once a year (see 40 CFR 122.44(i)(2)). In addition, permits must require that permittees orally report to the NPDES permitting authority any noncompliance with NPDES permits related to CSO discharges that may endanger human health or the environment within 24 hours from the time the permittee becomes aware of the circumstances, and in writing within 5 days (see § 122.41(l)(6)). Permits must also require reporting of other noncompliance related to CSOs when their discharge monitoring reports are submitted (see § 122.41(l)(7)).

On October 22, 2015, EPA published a final rule to modernize CWA reporting for municipalities, industries, and other facilities by converting to an electronic data reporting system. Known as the NPDES Electronic Reporting Rule, or E-Reporting Rule, this final rule requires regulated entities and state and federal regulators to report electronically data required by the NPDES permit program instead of filing written paper reports. EPA is phasing in the requirements of the E-Reporting Rule over a five-year period. Starting on December 21, 2016, permittees will begin submitting their Discharge Monitoring Reports (DMRs) electronically. Starting on December 21, 2020, permittees will begin submitting electronically certain other NPDES reports, including "Sewer Overflow/Bypass Event Reports," which may include information on some CSO discharges. Under the rule, Table 2 of Appendix A of Part 127 identifies data elements that are required to be reported in a DMR for CSO discharges (pursuant to § 122.41(4)(i)) after December 21, 2016, and in "Sewage Overflow/Bypass Event Reports" (pursuant to

⁴ Report to Congress—Implementation and Enforcement of the Combined Sewer Overflow Control Policy. EPA 833–R–01–003, 2002; Report to Congress—Impacts and Control of CSOs and SSOs. See <https://www.epa.gov/npdes/combined-sewer-overflows-policy-reports-and-training>.

⁵ Report to Congress—Impacts and Control of CSOs and SSOs. EPA 833–R–04–001, 2004. See <https://www.epa.gov/npdes/combined-sewer-overflows-policy-reports-and-training>.

⁶ *Montgomery Environmental Coalition et al. v. Costle*, 646 F.2d 568, 592 (D.C. Cir. 1980).

§§ 122.41(l)(6) or (7) and 122.41(m)(3)) submitted after December 21, 2020. A subset of the data elements that are required to be reported that are relevant to public notification of a CSO discharge include the following data elements:

- Sewer Overflow Cause;
- Duration of Sewer Overflow (hours);
- Sewer Overflow Discharge Volume (gallons);
- Corrective Actions Taken or Planned for Sewer Overflow; and
- Type of Potential Impact of Sewer Overflow.

In addition, starting on December 21, 2020, NPDES authorities are required to provide, and update as appropriate, information regarding the following data elements for each CSO permittee:

- Long-Term CSO Control Plan (LTCP) Permit Requirements and Compliance;
- Nine Minimum CSO Controls Developed;
- Nine Minimum CSO Controls Implemented;
- LTCP Submission and Approval Type;
- LTCP Approval Date;
- Enforceable Mechanism and Schedule to Complete LTCP and CSO Controls;
- Actual Date Completed LTCP and CSO Controls;
- Approved Post-Construction Compliance Monitoring Program; and
- Other CSO Control Measures with Compliance Schedule.

EPA is working with states to define data standards for the sewer overflow data elements in 40 CFR 127, Appendix A, and how this data can be best presented on EPA's Enforcement and Compliance History Online (ECHO) Web site.⁷

E. Section 425 of the Consolidated Appropriations Act of 2016—Requirements for Public Notification of CSO Discharges to the Great Lakes Basin

Section 425 was enacted as part of the 2016 Consolidated Appropriations Act and did not amend the CWA. Section 425(b)(1) requires EPA to work with the Great Lakes states to establish public notice requirements for CSO discharges to the Great Lakes Basin. Section 425(b)(2) provides that the notice requirements are to address the method of the notice, the contents of the notice, and requirements for public availability of the notice. Section 425(b)(3)(A) provides that at a minimum, the contents of the notice are to include the dates and times of the applicable

discharge; the volume of the discharge; and a description of any public access areas impacted by the discharge. Section 425(b)(3)(B) provides that the minimum content requirements are to be consistent for all affected states.

Section 425(b)(4)(A) calls for follow-up notice requirements that provide a description of each applicable discharge; the cause of the discharge; and plans to prevent a reoccurrence of a CSO discharge to the Great Lakes Basin consistent with section 402 of the Federal Water Pollution Control Act (33 U.S.C. 1342) or an administrative order or consent decree under such Act. Section 425(b)(4)(B) provides for annual publication requirements that list each treatment works from which the Administrator or the affected state receive a follow-up notice.

Section 425(b)(5) requires that the notice and publication requirements described in Section 425 shall be implemented by not later than December 18, 2017. However, the Administrator of the EPA may extend the implementation deadline for individual communities if the Administrator determines the community needs additional time to comply in order to avoid undue economic hardship. Finally, Section 425(b)(6) clarifies that “[n]othing in this subsection prohibits an affected State from establishing a State notice requirement in the event of a discharge that is more stringent than the requirements described in this subsection.”

F. Examples of Existing Local Public Notification Practices in CSO Communities

In 1995, EPA published a guidance entitled “Combined Sewer Overflows—Guidance for Nine Minimum Controls”⁸ to assist with the implementation of the 1994 CSO Policy. As mentioned above, one of the nine minimum controls called for in that policy is “public notification to ensure that the public receives adequate notification of CSO occurrences and CSO impacts.” The 1995 guidance recognizes that the most appropriate mechanism for public notification will probably vary with local circumstances, such as the character and size of the use area and means of public access to waters affected by CSOs. The guidance also provides examples of potential measures for notifying the public about CSO events that were available at the time, including:

- Posting at affected use areas;

- Posting at selected public places;
- Posting at CSO outfalls;
- Notices in newspapers or on radio and TV news programs;
- Letter notification to affected residents that reflect long-term restrictions; and
- Telephone hot lines.

While the general themes identified in the 1995 guidance are still useful and appropriate, the significant technology changes that have occurred since then allow for a much wider set of tools to be used in public notification. EPA's 2016 document “National Pollutant Discharge Elimination System Compendium of Next Generation Compliance Examples”⁹ provides examples of CSO notification using current technology. This compendium describes examples of CSO public notice efforts in New York and Ohio and provides examples of CSO public notification outside the Great Lakes Basin.

In addition to those examples outlined in the Next Generation Compliance Compendium, EPA has summarized other existing public notification practices for CSO discharges both to the Great Lakes Basin and to other waters.¹⁰

Existing public notice practices summarized in these two resources include, but are not limited to:

- The NPDES permit for CSO discharges from the City of Seattle, Washington requires the city to implement a web-based public notification system to inform the citizens of when and where CSOs occur. Seattle and King County maintain a real-time public notification Web site that has CSO overflow information updated with available data every 10 minutes for King County sites, and every 60 minutes for Seattle sites.

- The City of Cambridge, Massachusetts and the City of Chelsea, Massachusetts post signs at all CSO structures and at public access locations and other sites identified by the Massachusetts Department of Environmental Protection. Cities notify local health agents and local watershed advocacy groups by email and issue an annual press release discussing past CSOs. Cambridge also provides the following information on its Web site:

- General information regarding CSOs, including their potential health impacts;

⁹ <https://www.epa.gov/compliance/compendium-next-generation-compliance-examples-water-air-waste-and-cleanup-programs>.

¹⁰ see “Summary of CSO Public Notification provisions,” Docket ID No. EPA-HQ-OW-2016-0376 at <http://www.regulations.gov>.

⁷ <https://echo.epa.gov>.

⁸ https://www.epa.gov/sites/production/files/2015-10/documents/owm0030_2.pdf.

- Locations of CSO discharges in the Charles River and Alewife Brook watersheds;
- The overall status of all CSO abatement programs;
- Web links to CSO communities and watershed advocacy groups; and
- The most recent information on all CSO activations and volumes in both watersheds.
- The District of Columbia Water and Sewer Authority (DC Water) operates CSO Event Indicator Lights to notify river users of CSO discharges. A red light must be illuminated during a CSO occurrence and a yellow light must be illuminated for 24 hours after a CSO has stopped.
- Connecticut’s two-part Public Act: “An Act Concerning The Public’s Right to Know of a Sewage Spill” requires the Connecticut Department of Energy and Environmental Protection (DEEP) to provide a map indicating the CSOs anticipated to occur during certain storm events.
- The Vermont Department of Environmental Conservation (DEC) posts on its Web site a report of any sewage release that reaches waters of the State.
- The Allegheny County Sanitary Authority (ALCOSAN) raises orange flags signifying CSOs have occurred at

- eight locations along the Allegheny, Monongahela and Ohio rivers during and after CSO discharge events. ALCOSAN also provides notifications of sewer overflows via text message and/or email.
- Sanitation District No. 1 (SD1) of Northern Kentucky issues an email advisory when a rainfall of 0.25 inches or more is predicted or recorded. They also issue an advisory when the Ohio River level exceeds 38 feet. Advisories will remain in effect for 72 hours after rainfall and 72 hours after river levels have fallen below 38 feet.
 - Onondaga County, New York maintains a “Save the Rain” Web site which serves as a notification system to alert the public of the occurrence of CSO events and as a prediction of elevated bacteria levels in Onondaga Lake and its tributaries. The discharge status of CSO outfalls are mapped on this Web page. The information on the map is updated using a model to anticipate the quantity of rainfall that will trigger each CSO.
 - The Metropolitan Sewer District (MSD) of Greater Cincinnati issues a CSO advisory via a CSO hotline or email alert when a rainfall of 0.25 inches or more is predicted or recorded or when water levels in area rivers and streams are elevated and could cause a CSO to

occur. Advisories will remain in place for 72 hours after a rainfall event and 72 hours after water levels in area waterways have returned to normal. Actual occurrences of CSO discharges are reported and summarized in reports that are posted on MSD’s Web site.

G. Existing State-Level Public Notification Requirements for CSOs in the Great Lakes Basin

EPA worked with the Great Lake states to identify existing state-level notification requirements for CSO discharges to the Great Lakes Basin, which are summarized in the proposed rule docket, see “Summary of State CSO Public Notification Requirements in the Great Lakes Basin” See Docket ID No. EPA-HQ-OW-2016-0376 at <http://www.regulations.gov>. Almost all of the NPDES permits for CSO discharges to the Great Lakes Basin currently require some level of public notification to ensure citizens receive adequate information regarding CSO occurrences and CSO impacts. Permit requirements which add specificity to this requirement and additional state public notification requirements are discussed below. Table 2 summarizes some of the main components of existing Great Lakes state programs that relate to public notification of CSO discharges.

TABLE 2—SUMMARY OF STATE PROGRAM REQUIREMENTS FOR PUBLIC NOTICE REQUIREMENTS FOR CSO DISCHARGES TO THE GREAT LAKES BASIN

	NY	PA	OH	MI	IN	IL	WI
State CSO public notification regulation	X	X	X
Requires Public Notification Plan	X	/	X	X	X
Requires CSO Outfall Signs	X	X	X	X	X	X	
Alert system (text/email)	X	/	X	X
Immediate notification of local public health department and drinking water supply	X	X	X	X
Annual reporting on CSO discharges	X	X	/	X

‘X’ indicates all CSO discharges to the Great Lakes Basin are subject to requirement.
 ‘/’ indicates that some CSO discharges to the Great Lakes Basin are subject to requirement.

Illinois

All forty Illinois CSO communities in the Great Lakes Basin are in the Metropolitan Water Reclamation District of Greater Chicago (MWRD) service area. The NPDES permits for these CSO communities provide that public notification programs may be developed in conjunction with MWRD. MWRD’s NPDES permits for each of its four treatment plants require MWRD to develop a public notification plan. MWRD is implementing its plan by:

- Providing the public with the opportunity to sign up for emails and/ or text messages when a confirmed CSO discharge or diversion to Lake Michigan occurs.

- Posting a map of the city’s waterways showing the status of discharges at CSO outfalls.

Indiana

- Indiana requires NPDES CSO permittees to:
- Post signs within the permittee’s jurisdiction at access points to an affected water or to make attempts to do so when access is not on community property.
 - Provide notification to the affected public, local health departments and drinking water suppliers having surface water intakes located within ten miles downstream of a discharging CSO outfall whenever information indicates

that a CSO discharge is occurring or is imminent based on predicted or actual precipitation or a related event.

- Incorporate CSO notification procedures into the permittee’s CSO operational plan which must be approved by the Indiana Department of Environmental Management. A member of the public may request that the department reevaluate the CSO notification procedures.

Michigan

- Michigan state regulations and permits require CSO permittees to:
- Notify the Michigan Department of Environmental Quality (DEQ); local health departments; a daily newspaper

of general circulation in the county or counties in which the municipality is located; and a daily newspaper of general circulation in the county in which CSO discharges occurred immediately, but not more than 24 hours after the discharge begins.

- Initial notification that the discharge is occurring is to be by telephone or other manner required by DEQ.

- At the conclusion of the discharge, in writing or in another manner required by DEQ, additional notice provides more detailed information including the volume and quality of the discharge as measured pursuant to procedures and analytical methods approved by the department, reason for discharge, receiving water or land affected, date and time discharge began and ended, and compliance status.

- Contact each municipality annually whose jurisdiction contains waters that may be affected by the discharge and provide immediate notification of CSO discharges to these municipalities if requested.

- Test the affected waters for *E. coli* to assess the risk to the public health as a result of the discharge and provide the test results to the affected local county health departments and to DEQ. The testing is to be done at locations specified by each affected local county health department. This testing requirement may be waived by the affected local county health department if it is determined that such testing is not needed to assess the public health risks.

Michigan state regulations require Michigan DEQ to:

- Promptly post the notification on its Web site upon being notified of a discharge.

- Maintain and publish a list of occurrences of discharges of untreated or partially treated sewage that have been reported. The list is to be posted on the department's Web site and published annually and made available to the general public.

New York

New York state statutes, regulations, and permits require CSO permittees to:

- Install and maintain signs at all CSO outfalls owned and operated by the permittee.

- Implement a public notification program to inform citizens of the location and occurrence of CSO events.

- Notify the local public health department of CSO discharges immediately, but in no case later than two hours after discovery.

- Notify any adjoining municipality that may be affected as soon as possible,

but no later than four hours from discovery of the CSO discharge.

CSO communities can report CSO discharges to a state operated electronic notification system, NY-Alert. The NY-Alert system provides public health departments, adjoining municipalities and subscribing citizens with notice of CSO discharges.

CSO permittees are required to submit an annual report to the state that describes implementation of 14 CSO best management practices. The state uses this and other information to prepare an annual report on sewer system discharges. The New York Department of Environmental Conservation's Web site includes a map of CSO outfalls in New York that provides information about CSO discharges.

Ohio

Ohio state regulations and permits require CSO permittees to:

- Install and maintain signs at all regulated outfalls, including CSOs; and
- Notify public water supply operators as soon as practicable if a spill, overflow, bypass, or upset reaches a water of the state within a set distance of a public water supply intake.

Public notification plans and annual reporting of CSO discharges are required on a case-by-case basis.

Pennsylvania

The NPDES permit for Erie, Pennsylvania (the only city with a CSS in Pennsylvania that discharges to the Great Lakes Basin) requires Erie to submit an annual CSO status report to the state, which is available to the public upon request.

Wisconsin

Of Wisconsin's two CSO permittees, one permit does not specify any public notification requirements. The other requires the permittee to have a public notification process in place and to make personal contact with affected members of the public in the event of an overflow.

H. Working With the Great Lake States and Requesting Public Input

EPA has worked with the Great Lakes states on creating proposed requirements to implement Section 425 of the 2016 Consolidated Appropriations Act. NPDES program officials in each state with CSO discharges to the Great Lakes Basin have described existing state notification requirements, shared insights on implementation issues and provided individual perspectives on what should be included in the proposed rule.

On August 1, 2016, EPA published a document in the **Federal Register** requesting stakeholder input regarding potential approaches for developing public notice requirements for CSO discharges to the Great Lakes Basin under Section 425. As part of this effort, EPA held a public "listening session" on September 14, 2016, which provided stakeholders and other members of the public an opportunity to share their views regarding potential new public notification requirements for CSO discharges to the Great Lakes Basin. A summary of the oral comments made at the public listening session is included in the docket for this rulemaking.¹¹ In addition, the Agency requested written comments. EPA received 40 unique written comments and a total of 787 written comments, all of which were submitted to the docket (see EPA-HQ-OW-2016-0376-2 through EPA-HQ-OW-2016-0376-41). These comments have informed the development of the proposed rule and are discussed throughout the preamble below.

III. Proposed Requirements

A. Overview of Proposal

The proposed requirements to implement Section 425 are based on an evaluation of current notification requirements and practices in the Great Lakes Basin and elsewhere, and input from officials in the Great Lakes states and the public, including input received in response to EPA's August 1, 2016 request. The proposal clarifies EPA's expectations for CSO permittees discharging to the Great Lakes Basin to provide public notification to ensure that the public receives adequate notification of CSO occurrences and CSO impacts. The proposed requirements would conform to the CSO Control Policy by specifying requirements for implementation of one of the nine minimum controls for the CSO discharges addressed by Section 425.

EPA proposes requirements for public notification of CSO discharges to the Great Lakes Basin to be codified at 40 CFR 122.38. This section would apply directly to Great Lakes Basin CSO permittees six months after publication of a final rule, except for annual notice requirements which would apply one year after publication. EPA proposes to implement section 425(b)(5)(B) of the Consolidated Appropriations Act of 2016 by providing that the NPDES permitting authority (referred to in the NPDES regulations as the Director)

¹¹ See Docket ID No. EPA-HQ-OW-2016-0376 at <http://www.regulations.gov>.

could extend the compliance dates for notification and/or submittal of the public notification plan for individual communities if the Director determines the community needs additional time to comply in order to avoid undue economic hardship.

The proposed requirements address signage, initial and supplemental notification of local public health departments and other potentially affected public entities (which may include neighboring municipalities, public drinking water utilities, state and county parks and recreation departments and Indian tribes) whose waters may be potentially impacted, initial and supplemental notification of the public and annual notice to the public and the Director.

EPA further proposes to require NPDES permittees authorized to discharge CSOs to the Great Lakes Basin to develop a public notification plan that would provide community-specific details (e.g., proposed flow monitoring locations, means for disseminating information to the public) as to how they would implement the notification requirements. Under the proposed rule, CSO permittees in the Great Lakes Basin would be required to seek and consider input from local public health departments, any potentially affected public entities and Indian tribes whose waters may be impacted by the permittee's CSO discharges in developing the public notification plan that would be submitted to the Director. The proposal would require the plan to be made available to the public and to be submitted to the Director within six months of the date the final rule is published.

Ultimately, public notice requirements for CSO discharges in the Great Lakes Basin would be incorporated as requirements in NPDES permits when such permits are next reissued at least six months after the date the final regulation is published. (This process will follow normal permit reissuance timelines). Under both proposed §§ 122.21(j)(8)(iii) and 122.38(d), the public notification plan would be submitted to the Director as part the Great Lakes Basin CSO permittee's application for a renewed permit. The plan would provide information to the Director to inform the development of a NPDES permit condition implementing the public notification requirements. EPA proposes minimum requirements at § 122.42(f) for a permit condition for all permits issued for CSO discharges within the Great Lakes Basin. See Preamble section III.D.2. for a discussion of the proposed permit condition.

B. Types of Notification

EPA proposes to require several types of public notification, as follows:

- Signage;
- Initial and supplemental notice to local public health department and other potentially affected public entities, such as drinking water utilities, public beach and recreation agencies;
- Initial and supplemental notice to the public; and
- Annual CSO notice to the Director and the public.

The types of notification are discussed below.

1. Signage

Signage at CSO outfalls and public access areas potentially impacted by CSO discharges can raise public awareness of the potential for CSO discharges and impacts. EPA's 1995 guidance, "Combined Sewer Overflows—Guidance for Nine Minimum Controls"¹² provides examples of signage that can be used to notify the public of CSO discharges, such as posting at affected use areas (e.g., along a beach front), selected public places (e.g., public information center at a public park or beach) and posting at CSO outfalls where outfalls are visible and the affected shoreline area is accessible to the public.¹³

EPA proposes that the Great Lakes Basin CSO permittee provide adequate signage where signage is feasible at CSO outfalls and potentially impacted public access areas. The Agency proposes that signage contain at a minimum the following information:

- The name of the combined sewer system operator;
- A description of the discharge (e.g., untreated human sewage, treated wastewater);
- Notice that sewage may be present in the water; and
- The permittee's contact information, including a telephone number, NPDES permit number and outfall number as identified in the NPDES permit.

EPA also proposes that the Great Lakes Basin CSO permittee conduct periodic maintenance of the sign to ensure that it is legible, visible and factually correct.

The proposal would require the permittee to provide signage at

¹² See "Combined Sewer Overflow Guidance for Nine Minimum Controls" EPA 832-B-95-003, (1995). https://www.epa.gov/sites/production/files/2015-10/documents/owm0030_2.pdf.

¹³ The 2016 "National Pollutant Discharge Elimination System Compendium of Next Generation Compliance Examples" and the 2016 "Summary of CSO Public Notification provisions" EPA-HQ-OW-2016-0376, identify additional examples of signage used by CSO communities.

potentially affected public areas. The permittee's identification of potentially affected public areas where signage is required is to be based on a review and consideration of local conditions and circumstances of a particular community. This determination may be informed by the identification of sensitive areas in the community's long term CSO control plan (LTCP). Under today's proposal, when a Great Lakes Basin CSO permit is reissued, the NPDES authority will determine specific locations where signs are required and will identify in the permit the location of any outfall where a sign is not required because it is not feasible.

EPA requests comment on providing more specific regulatory language that would require signage at locations other than the CSO outfalls, such as potentially impacted public access areas and selected public places that CSO discharges may impact.

One commenter on the August 1, 2016 notice suggested that signs at public access areas include quick response codes that could provide a link to either a public health department's Web site or the permittees Web site. EPA requests comment on requiring quick response codes on signs. EPA also requests comment on the proposed signage requirements and on whether the proposal includes the appropriate minimum information to be included on signs.

EPA notes that several of the Great Lakes states do not require signage at every CSO outfall for various reasons, such as limited or no public access to the area or the infeasibility for the permittee to physically access the outfall point for inspections and maintenance of signs. For example, Ohio does not require signs at outfalls that are not accessible to the public by land or by recreational use of the water body.¹⁴ Indiana allows for alternatives to signs for outfalls located on private property or that are outside the jurisdiction of the CSO discharger.¹⁵ New York allows permittees to apply for a waiver from the requirement to install a sign under limited circumstances which are listed in the state's regulations.¹⁶

The Agency requests comment on specific situations where it may not be feasible to provide signage at a CSO outfall. In addition, the Agency requests comment on alternative or additional regulatory criteria to clarify or describe

¹⁴ Ohio Admin. Code 3745-33-08 (2011), available at <http://codes.ohio.gov/oac/3745-33-08>.

¹⁵ See 327 IAC 5-2.1-6 (2003), available at http://www.in.gov/legislative/iac/iac_title?iact=327.

¹⁶ See 6 NYCRR 750-1.12 (2003), available at <http://www.dec.ny.gov/regs/2485.html>.

where signs are not possible. The Agency also requests comment on whether it is appropriate to remove the proposed qualification that signage be feasible and instead require signage at all CSO outfalls.

EPA recognizes that the Great Lake NPDES authorities require permittees to install signs at many CSO outfalls and potentially impacted public access areas. EPA proposes that where a permittee has installed a sign at a CSO outfall or potentially impacted public access area before the effective date of this rule, the sign does not have to meet the minimum requirements specified in the proposed rule until the sign is replaced or reset. EPA requests comment on this approach. The Agency requests comment on any specific language with regard to the proposed signage requirements that may be inconsistent with existing signs, and whether the proposed language should be adjusted to provide more flexibility.

EPA does not propose to prescribe the specific circumstances under which other methods of notice such as indicator lights (as used by the District of Columbia Water and Sewer Authority) or alert flags (as used by the Allegheny County Sanitary Authority) must be used. These types of notification may not be appropriate for every CSO community in the Great Lakes Basin. Rather, such requirements may be established on a permit-by-permit basis where appropriate. Nothing in the proposed rule or Section 425 would, however, preclude any Great Lakes state from establishing such requirements.

2. Initial and Supplemental Notice to Local Public Health Officials and Other Potentially Affected Public Entities

Local public health officials play a vital role in responding to environmental risks. Local public health organizations typically have a role in water quality monitoring of waterways and public beaches and in providing swimming and beach advisories and beach closures. Timely notice of CSO discharges to local public health departments can provide information needed to determine appropriate actions such as issuing swimming or beach advisories or beach closures.

When CSOs discharge into sources of drinking water, operators of drinking water facilities that have intakes in waters impacted by the discharge can make adjustments to their intake and treatment procedures after receiving notice of the CSO discharge.

EPA proposes that the operator of a CSO outfall in the Great Lakes Basin provide initial notice of the CSO

discharge as soon as possible to the local public health department (or if there is no local health department, to the state health department), any potentially affected public entity (such as the superintendent of a public drinking water supply with potentially affected intakes), and Indian tribes whose waters may be affected, but no later than four hours after becoming aware as determined by monitoring, modeling or other means of a CSO discharge. The initial notice would be required to include, at a minimum, the following information:

- The location of the discharge(s) and the water body that received the discharge(s);
- The location and a description of any public access areas that may be potentially impacted by the discharge;
- The date(s) and time(s) that the discharge commenced or the time the permittee became aware of the discharge;
- Whether, at the time of the notification, the discharge has ended or is continuing and, if the discharge(s) has ended, the approximate time that the discharge ended; and
- A point of contact for the CSO permittee.

EPA proposes that the CSO permittee describe the location of the discharge. Typically, this would be the location of the CSO outfall that is discharging. However, for larger combined sewer systems with multiple outfalls, where CSO discharges occur at multiple locations at the same time, the CSO permittee may provide a description of the area in the waterbody where discharges are occurring and does not have to identify the specific location of each discharge. This approach may be more protective in that it may provide for a better description of potentially impacted areas, and could avoid delays associated with identifying when individual discharges commenced.

EPA also proposes that Great Lakes Basin CSO permittees be required to seek and consider input from local public health departments and other potentially affected entities to develop protocols for providing notification. Under the proposal, the CSO permittee is to seek and consider input from local health departments and other potentially affected entities prior to submitting its public notification plan initially and resubmitting as part of the process for reapplying for their permit.

The Agency anticipates that the Great Lakes Basin CSO permittee will establish protocols that will address the timing of notification. This could include predictive notifications that are based on weather forecasts. Under the

proposed rule, the public notification plan would help inform the development of NPDES permit requirements that would specify the timing of this notification. EPA anticipates that this approach would allow for the consideration of community-specific factors, development of programs and changes in technology.

Timely notice of CSO discharges to public health departments, drinking water facilities and other affected municipal entities and Indian tribes is critical to the effectiveness and timeliness of their response. EPA does not propose to prescribe the specific means (e.g., email, phone call) for this notice. Rather, the proposed rule would allow the CSO discharger to seek and consider input from local public health departments and other potentially affected public entities to determine the most appropriate way to provide this notice.

EPA proposes that the timeframe for initial notice to local public health departments and other potentially affected public entities be as soon as possible, but no later than four hours after the Great Lakes Basin CSO permittee becomes aware of the CSO discharge as determined by monitoring, modeling or other means. EPA expects, however, that as technologies change and communities and states improve their notice protocols, communities may be able to notify public health departments and the public in less than four hours. In addition, nothing in the proposed rule would preclude the permitting authority from establishing a maximum timeframe for notification that is more stringent (shorter) than four hours. EPA anticipates that NPDES permit authorities would consider more stringent notification timeframes based on a variety of factors, including the nature of the receiving waters, technology advances and the experience and progress of the permittee. EPA notes that New York and Connecticut require CSO permittees to notify public health departments within two hours. Both states have state-run Web sites that facilitate notification. The Agency also notes that most Great Lake states currently have not established a state Web site to facilitate public notification. EPA specifically requests comment on the appropriate maximum timeframe for providing initial notification to the local public health department and other potentially affected entities. The Agency also requests comment on the minimum contents of the initial and supplemental notification to the local public health department and other potentially affected entities.

Section 425(b)(3)(A)(ii) provides that public notice requirements also must include the volume of the discharge. EPA recognizes that for a number of reasons, determining the volume of a CSO discharge within the short timeframe provided for the initial notice may not be practical. EPA therefore proposes that notification of the volume of the discharge may occur in a supplemental notice that would be required within 24 hours of the end of the CSO discharge. EPA proposes this approach because the initial notification that a CSO discharge may occur or is occurring should not be delayed by waiting until the discharge stops or volume estimates are developed. EPA is concerned that requiring the Great Lakes Basin CSO permittee to include the volume of the CSO discharge as part of the initial notification would mean that the initial notification would need to be delayed, which would in turn cause delays in responding to the overflow. In addition, requiring an estimate or calculation of the discharge volume as part of the initial notification may discourage predictive notifications. It is critical that the local public health department and other affected municipalities or tribes be notified of the occurrence of the event as soon as possible without delays associated with waiting for the discharge to end or determining the CSO volume. Accordingly, EPA proposes that the CSO permittee may either provide notification of the time the discharge ended and the volume of the CSO discharge as part of the initial notification when CSO discharges are of a short enough duration to allow for this information to be known, or as a separate supplemental notification within 24 hours of the end of the CSO discharge.

EPA requests comment on whether 24 hours from the time the permittee becomes aware that the discharge ended is the appropriate time period for completing notification. EPA also requests comment on whether the proposed minimum requirements for the 24-hour supplemental notice are sufficient and appropriate.

The proposed requirement to provide a volume estimate would not mandate monitoring or direct measurement of CSO discharges. As discussed below, EPA proposes that the operator of a CSS with CSO discharges to the Great Lakes Basin develop a public notification plan that, among other things, describes for each outfall how the volume and duration of CSO discharges would be measured or estimated. In addition, as discussed below, EPA proposes that NPDES permits for CSO discharges to

the Great Lakes Basin specify the location of CSO discharges that must be monitored for volume and discharge duration and the location of CSO discharges where CSO volume and duration may be estimated rather than monitored.

In addition to seeking comment generally on the proposed requirements for notifying local health departments and other potentially affected public entities, EPA requests comment specifically on whether the initial notice to public health departments and other potentially affected entities should also be provided to the Director and/or the state public health agency.

3. Initial and Supplemental Notice to the Public

Initial notice of CSO discharges to the public via text alerts, social media, posting on a Web site, or other appropriate means can be an effective, efficient means of alerting the public to CSO discharges in a timely manner. This initial notice may allow the public to make informed decisions regarding areas where they would visit and recreate. EPA proposes requirements for the Great Lakes Basin CSO permittee to provide initial notification to the public within four hours of becoming aware as determined by monitoring, modeling or other means of the CSO discharge. Under the proposal, the Great Lakes Basin CSO permittee would be required to use electronic media, such as text, email, and social media alerts to subscribers, or posting a notice on its public access Web site, to provide members of the public with notice of CSO discharges. Other electronic media that could be used include broadcast media (radio and/or television) and newspaper Web sites. However, EPA is not proposing a specific type of electronic media to be used by all CSO communities as electronic media technologies and usage continue to change and the availability and appropriateness of different media options will vary from community to community. EPA seeks comment on whether public notice by broadcast media and/or local newspapers should be required for all CSO permittees in the Great Lakes Basin, or whether this specificity is better addressed in permits.

EPA proposes the same minimum information content requirements that it proposes for the initial notice to the local public health department, with the exception that a point of contact for the discharger is not included in the notice to the general public. EPA does not propose to require that a point of contact be provided in the notice for the

public because this could generate a large number of calls or emails to the CSO permittee that could hinder the permittee's ability to respond to the CSO discharge and to communicate with public health officials and other affected municipal entities.

EPA also proposes that the Great Lakes Basin CSO permittee provide a supplemental notice specifying the time the discharge ended and the volume of the CSO discharge unless this information has already been provided in the initial notice. EPA proposes that the supplemental public notice would be required within 24 hours of the end of the CSO discharge.

As mentioned above, EPA received a number of comment in response to the August 1, 2016 **Federal Register** document, in writing and at the public listening session on September 14, 2016, regarding notification methods and timeframes for notification to the public. One commenter recommended that information on how to receive email or text alerts should be provided to the public on the permittee's Web site and in wastewater bill mailings. EPA requests comment on whether the proposed regulation should include specific requirements for the permittee to make information on how to receive alerts available to the public.

One commenter indicated that it would not be possible to estimate system-wide CSO volumes within 24 hours, given the size of their system, size of the storm, number of outfalls, number of receiving waters, and other complex factors that are considered to determine overflow locations, timing, and volumes. Another commenter recommended that the supplemental notice be required within 24 to 48 hours. Another commenter recommended that the Great Lakes Basin CSO permittee be given five days before discharge volume estimates must be provided. Other commenters advocated for real-time or faster alerts such as requiring public notification within 15 minutes, if possible. Another commenter suggested that if real time monitoring is not feasible, all discharges should be required to notify the public within two hours of the start of the CSO discharge.

Other commenters expressed concerns about the time it would take to provide detailed notification. For example, one comment said reporting in-depth on volume, length of discharge and preventative measures for each CSO event would take resources away from more critical water quality initiatives. EPA requests comment on whether the 24-hour time period is appropriate and whether the minimum information

requirements for the 24-hour notice are appropriate.

EPA requests comment on providing a longer timeframe than four hours for small communities to make the initial notification, such as eight or twelve hours as well as appropriate population thresholds (e.g., under 2,000 or 1,000) for such a requirement. Some of the representatives of the Great Lakes states expressed concerns that introducing an alternative timeframe for initial reporting for small communities could create confusion in the regulated community. EPA requests comment on the appropriateness of the proposed four-hour time period and on whether all communities should be subject to the same four-hour maximum timeframe for providing initial notification.

Some commenters responding to the August 1, 2016 **Federal Register** document raised concerns that overuse of text alerts of CSO discharges to the public could be counter-productive because the public could be over saturated by the alerts and the alerts overly simplify a complex message about health risks. Another commenter raised concerns that supplemental notifications indicating that CSO discharges have ceased may send an incorrect message that the waters are safe. EPA requests comment on allowing permittees flexibility to use different mechanisms for providing initial and supplemental notice (e.g. text/email alerts and Web site notice for initial notification and limiting supplemental notice to posting information on the permittees Web site).

4. Annual CSO Notice

EPA proposes that all permittees authorized to discharge a CSO to the Great Lakes Basin are required to make an annual notice available to the public by the first of May each year. In addition, EPA proposes that the permittee notify the Director of the availability of the annual notice. The information in the annual notice would provide the public with a comprehensive understanding of how the permittee's CSS is performing and of the permittee's CSO control program. The Agency proposes that the annual notice would include a summary of both the prior year's discharges and upcoming implementation of CSO controls. EPA proposes that the annual notice include at a minimum:

- A description of the availability of the permittee's public notification plan and a summary of significant modifications to the plan that were made in the past year;

- A description of the location, treatment provided, and receiving water of each CSO outfall;

- The date, location, duration, and volume of each wet weather CSO discharge that occurred during the past calendar year;

- The date, location, duration, and volume of each dry weather CSO discharge that occurred during the past calendar year;

- A summary of available monitoring data from the past calendar year;

- A description of any public access areas impacted by the discharge;

- Representative rain gauge data in total inches to the nearest 0.1 inch that resulted in each CSO discharge;

- A point of contact; and

- A concise summary of implementation of the nine minimum controls and the status of implementation of the long-term CSO control plan (or other plans to reduce or prevent CSO discharges), including:

- A description of key milestones remaining to complete implementation of the plan; and

- A description of the average annual number of CSO discharges anticipated after implementation of the long-term control plan (or other plan relevant to reduction of CSO overflows) is completed.

The proposed elements of the annual notice summarize the information provided in the initial and supplemental notifications to the public and provide additional follow-up information required in Section 425(b)(4)(A). Section 425(b)(4)(A) requires inclusion of follow-up notice requirements that provide a description of "(i) each applicable discharge; (ii) the cause of the discharge; and (iii) plans to prevent a reoccurrence of a combined sewer overflow discharge to the Great Lakes Basin consistent with section 402 of the Federal Water Pollution Control Act (33 U.S.C. 1342) or an administrative order or consent decree under such Act."

EPA proposes an annual notice requirement that would address the information required by Section 425(b)(4)(A)(ii) and (iii) by requiring a summary of how the CSO permittee is implementing the nine minimum controls and their LTCP. The summary would include a description of key milestones remaining to complete implementation of the LTCP and a description of the anticipated average annual number of CSO discharges after the LTCP is completed.

As described in section I.C of this preamble, Section 402(q) of the CWA (33 U.S.C. 1342(q)), provides that NPDES permits and enforcement orders

for discharges from combined sewer systems "shall conform" to the 1994 CSO Control Policy. By requiring the annual report to summarize how the permittee is implementing the nine minimum controls and LTCP, the proposed rule would result in a description of the permittee's plans under their permit, administrative order or consent decree, "consistent with section 402 of the Federal Water Pollution Control Act (33 U.S.C. 1342) or an administrative order or consent decree under such Act" as required by Section 425(b)(4)(A)(iii). This information is intended to provide the public with a description of the current performance of their system as well as progress on CSO reduction. This notice can serve to increase public awareness, and enable the public to better understand the community's current and future investments into collection system infrastructure. This can promote stronger public support for actions necessary to reduce CSOs. EPA requests comment on the proposed elements of the annual notice.

EPA anticipates that any community that already generates an annual CSO report would ensure that the required elements of the proposed rule are addressed in that report and then use that annual CSO report to comply with the annual notice requirements proposed today, rather than generating a separate report solely to meet these new requirements. Communities choosing this approach under the proposed rule would need to ensure that the annual report is published to their Web site by the date specified in the proposed rule (May 1 of each calendar year).

EPA requests comment on requiring permittees to supplement the annual notice by providing quarterly notice of a description of each CSO discharge, the cause of the discharge, and plans to prevent a reoccurrence of the CSO discharge. This approach may assist interested members of the public in following the status of CSO remediation efforts in their communities in a more up-to-date timeframe. EPA requests comment on this approach or other means of updating the public more frequently than annually.

C. Public Notification Plans

EPA proposes requirements for public notification plans at § 122.38(d). The Agency proposes that Great Lakes Basin CSO permittees be required to develop and submit to the Director a public notification plan within six months after publication of a final rule and then as part of the permittee's application for permit renewal. In addition, EPA proposes at § 122.38(e) that, prior to

submitting the proposed public notification plan, CSO permittees must seek and consider input from the local public health department (or if there is no local health department, the state health department) and potentially affected public entities and Indian tribes whose waters may be affected by CSO discharges.

The public notification plans are intended to provide system-specific detail (e.g., proposed monitoring locations, means for disseminating information to the public) describing the discharger's public notification efforts. The plan will enhance communication with public health departments and other potentially affected public entities and Indian tribes whose waters may be affected by the CSO discharge. The plan would also assist NPDES permit writers in establishing public notification permit conditions. In addition, the plan would provide the public with a better understanding of the permittee's public notification efforts.

Under the proposal, the plan would describe:

- The permittee's signage program;
- The identification of municipal entities that may be affected by the permittee's CSO discharges;
- Input from the health department and other potentially affected entities;
- Protocols for the initial and supplemental notice of the public, public health departments and other public entities;
- How the volume and duration of CSO discharges would be determined; and
- Protocols for making the annual notice available to the public.

Regarding signage, the plan would describe what information is in the message on the signs and identify any CSO outfall where a sign under § 122.38(a)(1) is not and will not be provided, explain why a sign at that location is not feasible. The plan would also describe the maintenance protocols for signage, such as inspection intervals and replacement schedule.

Section 425(b)(3)(A)(iii) of the 2016 Consolidated Appropriations Act provides that public notice for CSO discharges is to include a description of any public access areas impacted by the discharge. EPA proposes to lay the groundwork for this provision by requiring that public notification plans identify which municipalities and other public entities may be affected by the permittee's CSO discharges. Potentially affected public entities whose waters may be affected by the CSO discharge could include adjoining municipalities, public drinking water utilities, state and county parks and recreation

departments. Such areas may have already been identified in the CSO permittee's LTCP, which should identify CSO discharges to sensitive areas.¹⁷ In deciding which public entities and Indian tribes are "potentially impacted" and should be contacted for their input, the Great Lakes Basin CSO permittee should evaluate:

- The location of the CSO discharge point and what users of that waterbody may exist in the surrounding region;
- The direction of flow in the receiving water and uses of that waterbody, or connected waterbodies, downstream of the CSO discharge point;
- The presence of public access areas near, or downstream of, the discharge point;
- The presence of drinking water supply systems near, or downstream of, the discharge point; and
- The presence of municipal entities, Indian tribes, and/or parks and recreation department lands near, or downstream of, the discharge point.

EPA proposes that the plan would identify any municipality and Indian tribe that was contacted for input on public notification protocols. In addition, the plan would provide a summary of the comments and any recommendations from these entities, as well as a summary of the significant comments and recommendations provided by the local public health department(s).

Local public health departments, public entities, and Indian tribes whose waters may be affected by a CSO discharge are in a unique position to recommend the timing, means and content of the public notification requirements addressed in this proposal. Seeking input from these entities would allow the permittee to reflect in the public notification plan the needs and preferences of these entities with regard to notice of CSO discharges. Also, these groups can help inform decisions regarding what is the most appropriate means of communicating information to the public, taking into consideration specific populations in the community and their access to various electronic communication methods and social

media. For example, if there is a segment of the population without access to cell phones or computers, or who would incur costs by receiving text notifications, the consulted entities may suggest other communications means that would be more appropriate to reach these groups (e.g., radio broadcast, postings in public places, announcements through community flyers).

The plan would also be required to describe how the volume and duration of CSO discharges would be either measured or estimated. If the Great Lakes Basin CSO permittee intends to use a model to estimate discharge volumes and durations, the plan would be required to summarize the model and describe how the model was or would be calibrated. CSO permittees that are a municipality or sewer district with a population of 75,000 or more must calibrate their model at least once every 5 years.

EPA requests comment on the minimum elements of a plan listed in § 122.38(c) and whether additional minimum requirements may be appropriate. Other such elements could include: A description of outreach that would be conducted to alert the public of the notification system and how to subscribe or otherwise gain access to the information, and information on how the public notification plan would be made available to the public. In addition, EPA seeks comment on requiring Great Lakes Basin CSO permittees to seek and consider input from public health departments and other potentially affected entities in developing their public notification plans. EPA also requests comment on whether the final rule should specifically require that the permittee provide an opportunity for members of the public to review and comment on the public notification plan, as was suggested by one commenter responding to the August 1, 2016 **Federal Register** document.

EPA proposes that the Great Lakes Basin CSO permittee make its public notification plan available to the public on the permittee's Web site (if it has a Web site) and periodically provide information in bill mailings and by other appropriate means on how to view the notification plan. The EPA seeks comment on whether there should be specific requirements for requiring notice of the plan and if so, how the plan should be made available. In addition, EPA seeks comment on whether there should be specific requirements for requiring notice of when significant modifications are made to the plan.

¹⁷ The CSO Policy clarifies EPA's expectation that a permittee's LTCP give the highest priority to controlling overflows to sensitive areas. The Policy provides that sensitive areas, as determined by the NPDES authority in coordination with State and Federal agencies, as appropriate, include designated Outstanding National Resource Waters, National Marine Sanctuaries, waters with threatened or endangered species and their habitat, waters with primary contact recreation, public drinking water intakes or their designated protection areas, and shellfish beds. (59 FR 18692).

D. Implementation

EPA proposes to implement the public notification provisions as a stand-alone regulatory requirement until the proposed required condition is incorporated into the NPDES permit of the Great Lakes Basin CSO permittee. Section 425(b)(5) of the 2016 Consolidated Appropriations Act provides that the notice and publication requirements described in the Act are to be implemented by “not later than” December 18, 2017. The Act also provides that the Administrator of the EPA may extend the implementation deadline for individual communities if the Administrator determines the community needs additional time to comply in order to avoid undue economic hardship. The Agency recognizes that if NPDES permits were the only means of implementing these requirements, permits would have to be reissued with these requirements before they would take effect. Given the current status of CSO permits in the Great Lakes Basin, it would take over five years for the proposed public notification requirements to be incorporated into all permits. Implementing the public notification requirements by regulation would result in all Great Lakes Basin CSO permittees establishing their public notification system within the same timeframe, and is more consistent with the implementation deadline in Section 425(b)(5)(A).

In addition to Section 425 of the Consolidated Appropriations Act of 2016, EPA’s authority for these public notification requirements includes Sections 304(i) and 308 of the CWA, which provide broad authority to issue procedural requirements for reporting (including procedures to make information available to the public) and to require point source owners and operators to establish and maintain records, make reports, monitor, and provide other “reasonably required” information.

The requirements of § 122.38(a) (signage and notification requirements), § 122.38(b) (annual notice), § 122.38(c) (reporting) would be enforceable under the CWA prior to incorporation into a permit as requirements of CWA section 308. With respect to the public notification plan, the requirement to develop a public notification plan consistent with § 122.38(d) and (e) would also be enforceable under the CWA as a requirement of CWA section 308. Once public notification requirements are incorporated into an NPDES permit, they would be enforceable

as a condition of permit issued under CWA section 402.

The details and content of the public notification plan, however, would not be enforceable under § 122.38(d) or as effluent limitations of the permit, unless the document or the specific details with the plan were specifically incorporated into the permit. Under the proposed approach, the contents of the public notification plan would instead provide a road map for how the permittee would comply with the requirements of the permit (or with the requirements of § 122.38(a)–(c) prior to inclusion in the permit as a permit condition). Once the public notification requirements are incorporated into the permit as a permit condition, the plan could be changed based on adaptations made during the course of the permit term, thereby allowing the permittee to react to new technologies, circumstance and experience gained and to make adjustments to its program to provide better public notification and better comply with the permit. This approach would allow the CSO permittee to modify and continually improve its approach during the course of the permit term without requiring the permitting authority to review each change as a permit modification.

1. Section 122.38 Requirements

As discussed in detail above, a new § 122.38 would set forth requirements that would apply to all permittees with CSO discharges to the Great Lakes Basin. Under the proposed rule, Great Lakes Basin CSO permittees would be required to develop a public notification plan, after seeking and considering input from public health departments and other potentially affect public entities. EPA proposes that the plan must be submitted to the Director and made available to the public within six months of publication of the final rule. Proposed § 122.38 would also require implementation of the signage and notice to affected public entities and the public within six months of publication of the final rule. Thus, a Great Lakes Basin CSO permittee would be required to develop its plan and implement it within six months of the final rule.

EPA has considered how much time it should take to implement public notification requirements. EPA also recognizes that every Great Lakes Basin CSO permittee already provides some public notification, in order to implement one of the nine minimum control measures in the 1994 CSO Control Policy. However, small communities in particular may not provide public notification to the extent that would be required under the

proposed rule. Therefore, EPA seeks comment on whether six months is adequate for implementing the proposed public notification requirements, including development of a public notification plan. In particular, EPA seeks comment on whether some (e.g., small) communities should have more time than others to implement public notification requirements and/or whether there should be additional time to implement the signage or notification requirements after the public notification plan is developed, submitted to the Director, and made available to the public, and if so, how much additional time should be allowed. For example, should municipal permittees with a population of less than 10,000, or in the case of sewerage districts, a service population of less than 10,000, be required to submit a public notification plan to the Director within nine or 12 months after the publication of the final rule, rather than six months?

2. Required Permit Condition

EPA’s long-term objective is to use NPDES permits to implement public notice requirements for CSO discharges in the Great Lakes Basin. To that end, EPA proposes to revise both the permit application regulation requirements in § 122.21(j) and to add a required permit condition for NPDES permits issued for these discharges. EPA proposes to add § 122.21(j)(8)(iii) to require the CSO permittees in the Great Lakes Basin to submit a public notification plan to the Director with its permit application (and any updates to its plan that may have occurred since the last plan submission). EPA also proposes to add a new condition at § 122.42(f) that would apply to permits for CSO discharges to the Great Lakes Basin. The proposed provision would ensure that CSO public notice requirements are incorporated into the NPDES permit where they can be updated as appropriate with each permit cycle. Public notification plans, submitted with subsequent permit applications, would reflect changes in collection systems and technology, as well as public notice practices. By requiring the Great Lakes Basin CSO permittee to include its updated public notice plan with its permit application, the Director would have the information that would be needed for including requirements for public notification in the permit when it is reissued.

The proposed required permit condition would provide flexibility in a number of areas to allow NPDES permit writers to address in their plans the particular circumstances of each

community (e.g., size of community, differences in public access areas potentially impacted by a CSO discharge). This provision would not preclude the Great Lake states from modifying the condition to establish more stringent public notification requirements (see Section 425(b)(6) of the 2016 Consolidated Appropriations Act).

As outlined in § 122.42(f) of the proposed rule, permits for CSO discharges within the Great Lakes Basin would, at a minimum:

- Require implementation of the public notification requirements in § 122.38(a);
- Specify the information that must be included on outfall signage;
- Specify outfalls and public access areas where signs are required;
- Specify the timing and minimum information for providing initial notification to local public health departments and other potentially affected entities and the public;
- Specify the location of CSO discharges that must be monitored for volume and discharge duration and the location of CSO discharges where CSO volume and duration may be estimated;
- Require submittal of an annual notice;
- Specify protocols for making the annual notice available to the public; and
- Require all CSO discharges be reported electronically either in a discharge monitoring report or as a non-compliance event.

Section 402(q) of the CWA requires NPDES permits for discharges from combined sewers to “conform” to the 1994 CSO Control Policy. One of the “Nine Minimum Controls” identified in the Policy is that NPDES permits for CSO discharges require public notification to ensure that the public receives adequate notification of CSO occurrences and CSO impacts. The proposed required permit condition would conform to the 1994 CSO Control Policy’s minimum control to provide the public with “adequate notification” and would further provide specificity to better implement the public notification provision identified in the Policy. Including this provision in permits would give the Great Lakes states an opportunity to update and fine-tune public notice requirements to reflect continued development of the permittee’s public notice effort, ensure consistency with state legislative and regulatory requirements for public notification, reflect new technologies and be informed by public input. In addition, by including public notification requirements as a condition

in permits, the public would have a formalized opportunity to comment on the proposed permit conditions.

E. Additional Considerations

1. Definitions

EPA proposes to add three definitions to the NPDES regulations, “Combined Sewer System,” “Combined Sewer Overflows,” and “Great Lakes Basin.” The proposed definition of *combined sewer system* is based on the description of combined sewer system found in the 1994 CSO Policy. The Policy provides that “A combined sewer system (CSS) is a wastewater collection system owned by a state or municipality (as defined by § 502(4) of the CWA) which conveys sanitary wastewaters (domestic, commercial and industrial wastewaters) and storm water through a single-pipe system to a Publicly Owned Treatment Works (POTW) Treatment Plant (as defined in § 403.3(p)).” The proposed definition of *combined sewer overflow* also conforms to the description of CSO in the CSO Policy which provides that a “CSO is the discharge from a CSS at a point prior to the POTW Treatment Plant.”

The 2016 Consolidated Appropriations Act specifies in Section 425(a)(4) that the term “Great Lakes” means “any of the waters as defined in the § 118(a)(3) of the Federal Water Pollution Control Act (33 U.S.C. 1292).” This, therefore, includes § 118(a)(3)(B), which defines “Great Lakes” as “Lake Ontario, Lake Erie, Lake Huron (including Lake St. Clair), Lake Michigan, and Lake Superior, and the connecting channels (Saint Mary’s River, Saint Clair River, Detroit River, Niagara River, and Saint Lawrence River to the Canadian Border);” and § 118(a)(3)(C), which defines “Great Lakes System” as “all the streams, rivers, lakes, and other bodies of water within the drainage basin of the Great Lakes.” Collectively, EPA is referring to the Great Lakes and the Great Lakes System as the “Great Lakes Basin.”

2. List of Treatment Works

Section 425(b)(4)(B) provides that EPA shall work with the Great Lakes states to establish annual publication requirements that list each treatment works from which the Administrator or the affected state receive a follow-up notice. EPA has developed a Web page that identifies the communities in the Great Lakes Basin with CSO discharges.¹⁸ In the future, EPA will update this Web page with information

¹⁸ <https://www.epa.gov/npdes/combined-sewer-overflows-great-lakes-basin>.

on how to access the annual notices of these communities.

3. Adjusting Deadlines To Avoid Economic Hardship

Section 425(b)(5)(A) of the 2016 Appropriations Act provides that the notice and publication requirements of the provision must be implemented by not later than December 17, 2017, unless the EPA Administrator determines the community needs additional time to comply in order to avoid undue economic hardship. All of the Great Lakes states are authorized to administer the NPDES program. Because EPA proposes to implement Section 425 as part of the NPDES permit program, under proposed § 122.38(f), this determination would be made by the Director. As the NPDES authority, the state is in a better position to evaluate the economic conditions and financial capability of the permittee as they have worked with individual communities to ensure implementation of their LTCPs.

EPA proposes that the Great Lakes Basin CSO permittee must submit a public notification plan to the Director of the NPDES program not later than six months after publication of a final rule. The Great Lakes Basin CSO permittee would be required to comply with the public notice requirements of § 122.38 by six months for initial and supplemental notifications and 12 months in the case of annual notification, after publication of a final rule, unless the Director specifies a later date to avoid economic hardship. Under the proposed rule at § 122.38(e), the Director may extend the compliance dates for public notification under § 122.38(a), annual notice under § 122.38(b), and/or public notification plan submittal under § 122.38(c) for individual communities if the Director determines the community needs additional time to comply in order to avoid undue economic hardship. The proposed rule would require the Director to notify the Regional Administrator of the extension and the reason for the extension. In addition, the Director would be required to post on its Web site a notice that includes the name of the community and the new compliance date(s). EPA also proposes to amend 40 CFR 123.25, which sets forth the requirements of an approved state NPDES program, to include a requirement for Great Lakes States to have the authority to implement the public notification requirements in § 122.38. No revision to § 123.25 would be needed with respect to proposed revisions to § 122.21(j) and § 122.42, as both of those sections are already included in § 123.25. As noted above in

section II.G of today's preamble, all of the Great Lakes States already have some form of public notification requirements, therefore EPA does not anticipate that any Great Lakes state would need to revise its regulations or seek additional authority from the legislature to implement proposed § 122.38 or revised § 122.21(j) and § 122.42.

EPA requests comment on this proposed implementation of Section 425(b)(5)(B).

4. Notification of CSO volumes

Most NPDES permits for CSO discharges to the Great Lakes Basin require the permittee to report CSO volumes in DMRs. In addition, CSO discharge volume information is typically needed to implement the nine minimum controls and LTCPs under the CSO Policy. One of the nine minimum controls identified in the CSO Control Policy addresses monitoring to effectively characterize CSO impacts and the efficacy of CSO controls. Similarly, one of the minimum elements of a LTCP is characterization monitoring and modeling of the CSS. In addition, the post-construction compliance monitoring program in the CSO Policy calls for effluent and ambient monitoring. EPA has issued technical guidance on monitoring and modeling of CSO discharges.¹⁹ EPA has also identified examples of where CSO monitoring technologies have also been used by regulators and communities to better identify significant pollution and noncompliance problems in the "NPDES Compendium of Next Generation Compliance Examples."²⁰

Typically, CSO permittees use a combination of monitoring and modeling to estimate CSO volume. This approach is reflected in many CSO permits that require monitoring of CSO discharges from some outfalls, and for other outfalls allows for estimating CSO discharge volumes by modeling or some other means. For larger collection systems with multiple outfalls, the permit may require monitoring the volume discharged at the most active outfalls with the largest discharge volumes. CSO permits may provide that for less active CSO outfalls, the permittee report volume in the DMR based on estimates. In some cases,

volume estimates for DMR reporting purposes are based on models which were developed to characterize flows in the collection system as part of developing and implementing a LTCP. These models can vary in complexity, and may be calibrated by periodic flow measurements or other data from various locations in the collection system.

The Agency recognizes that for many CSO permittees, CSO monitoring efforts have tended to become more robust as monitoring technology has evolved and continues to evolve. In general, EPA encourages CSO permittees to consider using monitoring to determine CSO discharge durations and volume. Traditionally, the cost of installing and maintaining monitoring sensors has been high when compared to modeling. However, the cost of monitoring technologies has decreased and is expected to continue to do so. In addition, new tools are being developed to communicate, analyze and display data collected by these monitoring technologies. One example of a CSO community with a more comprehensive monitoring program is the City of Seattle, WA. The NPDES permit for CSO discharges in Seattle (WA0031682) requires the permittee to use automatic flow monitoring equipment to monitor the discharge volume, discharge duration, storm duration and precipitation at all 86 CSO outfalls from the CSS. In another example, the Capital Region Water (CRW) in Harrisburg, PA is conducting a pilot study to evaluate the potential use of CSO activation monitoring equipment.²¹ CRW will use the results of this pilot study to determine which technology to implement to send an alert each time a monitored CSO outfall begins discharging.

Some of the public comments received in response to EPA's August 1, 2016 **Federal Register** document discussed several challenges associated with volume measurement and reporting. Some commenters suggested that wastewater monitoring devices may be placed in a harsh environment and require active maintenance. One commenter suggested that the configuration of a CSO outfall may present unique and challenging circumstances which make monitoring difficult. For example, discharges from the outfall may include contributions

from separate storm sewers or wastewater flows may be influenced by currents and tides in the receiving water.

Many commenters discussed the importance of flexibility for Great Lakes Basin CSO permittees to determine the data collection method that works best for their community. A commenter also recommended that CSO discharge volume be noticed in a simplified way that is easier to understand for the public, such as small, medium, or large discharges. Another commenter indicated that installing, operating, and maintaining meters at each of their 52 CSO locations would be cost prohibitive.

The proposed rule would require the Great Lakes Basin CSO permittee to provide an estimate of CSO discharge volumes as part of the supplemental notice to the initial notification to the local public health department and other potentially affected public entities and the supplemental notification to the public. The proposal would require this information within 24-hours of becoming aware that the CSO discharge has ended. In addition, the proposal would require the CSO discharger to provide the volume of each CSO discharge that occurred during the past calendar year in the annual notice. EPA anticipates that the information in the annual notice may reflect refinements in the volume and duration estimates provided at the time of the supplemental notification, and therefore these numbers may not be the same. EPA requests comment on the adequacy of a 24-hour reporting window for reporting CSO discharge volume and duration data. EPA also requests comment on whether these data should be required to be reported for each outfall, or whether it would be appropriate to allow for reporting aggregated data at the water body or stream or river segment level.

Under the proposed approach, where a CSO permittee has CSO discharges occurring at multiple locations at the same time, the CSO permittee would not have to estimate the volume discharged for each outfall, but would be allowed to make an estimate of the cumulative volume of CSOs discharged to a given waterbody. This approach would simplify the information provided to the public and focus on individual watersheds. This is consistent with the proposed notification requirements for outfalls, which would not require identification of individual outfalls in all cases. EPA requests comment on this approach.

Under the proposed approach, the Great Lake states would determine

¹⁹ See "Combined Sewer Overflows—Guidance for Monitoring and Modeling" EPA-832-B-99-022, 1999 and "CSO Post Construction Compliance Monitoring Guidance", EPA-833-K-11-001, 2012). <https://www.epa.gov/npdes/combined-sewer-overflows-csos>.

²⁰ See <https://www.epa.gov/compliance/compendia-next-generation-compliance-examples-water-air-waste-and-cleanup-programs>.

²¹ See the Consent Decree between Harrisburg, PA, Capital Region Water (CRW), the Pennsylvania Department of Environmental Protection and EPA (U.S. District Court for the Middle District of Pennsylvania, Civil Action No. 1:15-cv-00291-WWC). (<https://www.epa.gov/sites/production/files/2015-02/documents/cityofharrisburg-cd.pdf>)

which outfalls must be monitored and where volume estimates are appropriate for the purpose of public notification when reissuing CSO permits. This approach would provide flexibility for adapting volume reporting requirements that would be consistent with and build on ongoing compliance and implementation monitoring and could respond to technology advancements that occur in the future. The flexibility would also allow states and permittees to focus on system specific priorities (e.g., highest priority outfalls, predictive modeling).

5. Treated Discharges

Section 425(b)(1) of the 2016 Consolidated Appropriations Act requires EPA to work with the Great Lakes states to establish public notice requirements for CSO discharges. The Agency recognizes that some CSO discharges receive treatment, including solids removal and disinfection, such that the end-of-pipe discharge may meet state water quality standards, including standards for bacteria indicators designed to protect recreational uses. Under the proposal and consistent with Section 425(b)(1), permittees would be required to provide public notice for all CSO discharges, regardless of the level or type of treatment a CSO received, if any, prior to discharge. However, nothing in the proposed rule would preclude permittees from also describing the level of treatment that various CSO discharges receive.

EPA received comments at the listening session on September 14, 2016 in response to EPA's August 1, 2016 **Federal Register** document that indicate that some municipalities with engineered treatment systems for CSO discharges do not believe primary treated and disinfected CSO discharges should be subject to the same public notification requirements as untreated discharges. In addition, some state workgroup members have also made this recommendation, including those from Michigan and Indiana.

The Agency requests comment on whether it would be appropriate to establish alternative public notice requirements for CSO discharges that are treated to a specified level (e.g., primary treatment plus disinfection). EPA requests comment on whether the final regulations should provide additional flexibility for Great Lakes Basin CSO permittees to recommend in their public notification plan different public notification procedures for treated CSO discharges as compared to untreated CSO discharges. One approach would be to provide the NPDES authority with flexibility to not

require initial notification requirements in the permit for treated CSO discharges. Another approach would be to only establish initial notification requirements in proposed § 122.38 for CSO discharges that are not in compliance with permit limits or that do not receive at least primary treatment and disinfection. EPA requests comment on this flexibility. The existing practices in the state of Indiana allow such flexibility.²² Other states, such as New York, require public notification for all CSO discharges, including treated discharges.²³ Still another approach is to limit initial notification of treated CSO discharges to public health officials and other impacted communities. However, EPA notes that traditional bacteria indicators that are used in state water quality standards may not be the best indicators of viral and other pathogens associated with fecal contamination.²⁴ CSO discharges that only receive primary treatment prior to disinfection and that meet water quality standards based on indicator bacteria may have levels of viruses and other pathogens that are higher than discharges of wastewater that are treated by secondary treatment processes prior to disinfection. This is because bacteria respond to water treatment processes and environmental degradation processes differently than viruses. In addition, particles in wastewater may shield pathogens from disinfection.²⁵ CSO discharges that only receive

²² Indiana's interpretation is based on the stated purposes in 327 IAC 5-2.1-1, and the definitions of "Affected Public" and "Affected Waters" in 327 IAC 5-2.1-3(1) & (2). These provisions signify the intent of the notification rule is to properly warn citizens of possible health impacts from exposure to waterborne pathogens/E. coli related to CSO events. Notifications to health departments and drinking water suppliers are also related primarily to waterborne pathogen concerns. Any "treated" CSOs in Indiana must meet the minimum treatment requirements of the Federal CSO Policy (which includes disinfection). "Treated" CSO discharges are regulated in Indiana's NPDES permits with appropriate effluent sampling and numeric limitations for E. coli applied during the defined recreational season. As these "treated" CSO discharges must comply with E. coli limitations which are protective of full body contact recreational uses, such discharges are not considered to be imminent risks to human health (in regards to waterborne pathogens), any more than are discharges from wastewater treatment plant outfalls which disinfect and discharge continuously. Therefore, public notification for "treated" CSO discharges is not required in Indiana.

²³ New York Environmental Conservation Law § 17-0826-a requires public notification for all CSO discharges.

²⁴ "Review of Coliphages as Possible Indicators of Fecal Contamination for Ambient Water Quality," EPA, 820-R-15-098, April 17, 2015.

²⁵ "Impact of Wet-Weather Peak Flow Blending on Disinfection and Treatment: A Case Study at Three Wastewater Treatment Plants," Interstate Environmental Commission, March, 2008.

primary treatment prior to disinfection may also have higher levels of trihalomethanes and other disinfection byproducts due to the higher concentration of chlorine needed to disinfect and potential interactions with particles in the wastewater.

Some of the entities from whom input is sought in the plan development may prefer to receive notice of all CSO discharges, regardless of treatment status, because of the potential risks posed by elevated pathogen levels (e.g., drinking water facilities may want notification because of concerns about elevated levels of viruses or other pathogens in the source water).

6. More Stringent State Requirements

Consistent with Section 425(b)(6) of the 2016 Consolidated Appropriations Act, nothing in the proposal would prohibit a Great Lakes state from establishing notice requirements for Great Lakes Basin CSO permittees in that state that are more stringent than the requirements proposed today. The NPDES regulations specifically allow for state NPDES permit authorities to establish permit requirements that are more stringent than the permit conditions specified at § 122.42 (see § 123.25(a)).

7. Reporting

Most NPDES permits for CSO discharges to the Great Lakes Basin require all CSO discharges be reported in a DMR at a frequency specified in the permit or within 24 hours pursuant to § 122.41(l)(6). As discussed in section II.D of today's preamble, the NPDES electronic reporting rule requires that these reports be made electronically. EPA proposes that all NPDES permits for CSO discharges to the Great Lakes Basin require that all CSO discharges are reported electronically. In addition, the Agency proposes a provision in § 122.43(f) that would require Great Lakes Basin CSO permittees to electronically report any CSO discharge that occurred during the past calendar year that has not been previously reported pursuant to a permit requirement by May 1 of the following calendar year.

These proposed provisions are intended to ensure that the NPDES electronic database has complete information on CSO discharges to the Great Lakes Basin and to minimize any potential discrepancies between a permittee's annual notice and the NPDES electronic database.

8. Ambient Monitoring

One municipality has suggested that a targeted approach to public notification

that prioritizes high-use recreational areas may reduce health risks more than an overly broad, general notification requirement. They suggested a targeted public notification approach could include monitoring the water quality of recreational areas for *E. coli* and cyanobacteria, public notification, posting water quality advisories, predictive modeling and source tracking. They suggested posting information from predictive models and the previous day *E. coli* sampling results

on multiple Web sites and working with local television stations, newspapers, and radio stations to provide public notice.

The proposed rule would not mandate ambient monitoring for all CSO permittees as part of a public notification program. However, the proposal would provide flexibility for such approaches to be incorporated into an NPDES permit. EPA requests comment on when ambient monitoring and predictive monitoring of ambient

water conditions should be incorporated as a requirement for the public notification program.

IV. Incremental Costs of Proposed Rule

The economic analysis estimates the incremental costs of requiring operators of a CSO discharge to the Great Lakes Basin to provide public notification of CSO discharges. Table 3 summarizes the estimated incremental costs for the proposed rule.

TABLE 3—ANNUAL INCREMENTAL COSTS BY RESPONDENT CATEGORY
[Average of first three years]

	Respondents	Labor costs	Capital/ start-up/ O&M costs	Total
CSO permittees with a population of less than 10,000	80	\$102,114	\$55,251	\$157,365
CSO permittees with a population of between 10,000 and 50,000	70	118,894	1,296	120,190
CSO permittees with a population of more than 50,000	32	86,720	3,456	90,176
States	7	17,526	0	17,526
Totals	325,254	60,003	385,257

The average incremental cost per CSO permittee is about \$2,000 per CSO permittee per year. These estimates are all below the threshold level established by statute and various executive orders for determining that a rule has a significant or substantial impact on affected entities. See further discussion in Section V of this document.

The Economic Analysis assumes that costs will be borne by Great Lakes Basin CSO permittees in the form of one-time implementation activities that would occur within one to two years, once per year activities including an annual notice, and ongoing activities that would occur during and after CSO discharges. The Economic Analysis also assumes costs for state agencies, mainly in the review of CSO permittee plans and reports.

V. Statutory and Executive Orders Reviews

Additional information about these statutes and Executive Orders can be found at <https://www.epa.gov/laws-regulations/laws-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and therefore this proposal was not submitted to the Office of Management and Budget (OMB) for review. The final rule may be submitted to OMB for review.

B. Paperwork Reduction Act (PRA)

The information collection activities in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under the PRA. The Information Collection Request (ICR) document that the EPA prepared has been assigned EPA ICR number 2562.01. The ICR is summarized here; a complete copy can be found in the docket.

As discussed in section II.C of today's notice, NPDES permits for CSO discharges to the Great Lakes Basin should require permittees to provide public notification to ensure that the public receives adequate notification of CSO occurrences and CSO impacts. The information burden associated with this provision is approved in "Information Collection Request for NPDES Program (Renewal)", OMB Control No. 2040-0004, EPA ICR No. 0229.21. EPA has developed an additional analysis to provide a better, updated estimate of the public notification requirements proposed today. The analysis used to develop these estimates is described in "ICR Supporting Statement, Information Collection Request: Public Notification Requirements for CSOs in the Great Lakes Basin," EPA ICR number 2562.01. Key estimates and assumptions in the analysis include:

- 93% percent of existing outfalls for all CSO permittees have installed signs and that they are being maintained;
- Approximately half of the CSO permittees already have a system for developing estimates of the occurrence

and volume of discharges from CSO outfalls;

- Each Great Lakes Basin CSO permittee already operates a Web site that can be modified to provide the public with notification of an CSO event;
- Larger CSO communities may have access to listserv technology;
- Electronic technology significantly reduces the burden of providing initial and supplemental notification to the public and to local public health departments and other affected public entities;
- Much of the effort in developing public notification plan are included in burden estimates for the individual public notification components in the proposal. The activities attributed to the burden for the public notification plan include preparation of the document describing the public notification activities.
- The burdens on NPDES authority are applied to one-fifth of all Great Lakes Basin CSO permits within each state beginning in year 2 of the ICR to account for the five year permit term.

The public notification requirements in this proposed rule are designed to alert the public and public health departments, and other potentially affected entities of CSO discharges in a more wide-spread and timely manner than is currently practiced. The notification requirements which involve distribution of CSO discharge related information (e.g., CSO discharge location, receiving waterbody, time started, time ended, volume) to the

public and affected local governmental agencies would enable potentially affected parties to take action that may help prevent serious health effects that may otherwise occur if they were to remain unaware of the occurrence of CSO discharges.

Respondents/affected entities: The ICR covers information that must be provided by operators of combined sewer systems (Great Lakes Basin CSO permittees) that discharge within the watershed of the Great Lakes Basin. In addition, the ICR covers information burdens of the seven NPDES authorized States that are implementing the program.

Respondent's obligation to respond: Compliance with the notification requirements would be mandatory. Requirements for public notification of CSO discharge are part of the "nine minimum controls" established as part of EPA's CSO Control Policy. Section 425 of the consolidated Appropriations Act of 2016 (Pub. L. 114-113) requires EPA to work with the Great Lakes states to establish these public notice requirements.

Estimated number of respondents: EPA has identified 182 CSO communities that discharge to the Great Lakes Basin and seven state NPDES permitting authorities.

Frequency of response: Responses include one-time implementation activities, such as signage, activities that occur once per year, such as providing annual notice, and ongoing activities that would occur during and after CSO discharge events.

Total estimated burden: EPA estimates that the burden of implementing the rule would be 8,641 hours per year. Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: EPA estimates that the rule would cost \$385,257 per year during the three year ICR period. This is the total annual incremental cost for all 182 Great Lakes Basin CSO permittees. The average incremental cost per CSO permittee is about \$2,000 per year and the average incremental cost per state NPDES authority is about \$2,500.

EPA may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the EPA's regulations in 40 CFR are listed in 40 CFR part 9.

Submit your comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the EPA using the docket identified at

the beginning of this proposed rule. You may also send your ICR-related comments to OMB's Office of Information and Regulatory Affairs via email to OIRA submission@omb.eop.gov, Attention: Desk Officer for the EPA. Since OMB is required to make a decision concerning the ICR between 30 and 60 days after receipt, OMB must receive comments no later than February 13, 2017. The EPA will respond to any ICR-related comment in the final rule.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. The small entities subject to the requirements of this action are small governmental jurisdictions. The Agency has determined that 152 (83%) of the 182 communities discharging CSOs to the Great Lakes Basin are governmental jurisdictions with a population of less than 50,000 and thus can be classified as small entities and may experience an impact of between 0% and 0.75% of annual revenue. Details of this analysis are presented in the Economic Analysis for the proposed rule (see "Economic Analysis for the Proposed Public Notification of CSOs to the Great Lakes Rule," EPA, 2016).

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of \$100 million or more as described in UMRA, 2 U.S.C. 1531-1538. EPA has conducted an economic analysis examining the potential burden to state, tribal and local governments. Details of this analysis are presented in the economic analysis for the proposed rule (see "Economic Analysis for the Proposed Public Notification of CSOs in the Great Lakes Rule," EPA, 2016). EPA estimates that the costs of rule to states, tribes and local governments will be well below \$100 million per year. In addition, EPA compared the estimated annualized cost of the rule and revenue estimates for small local governments using four estimates of revenue data. The annualized compliance cost as a percentage of annual government revenues were all well below 1% for all four revenue estimate methods. EPA concludes that the impact of the rule is very unlikely to reach or exceed 1% of small local government revenue.

EPA has provided small local governments an opportunity to share their views regarding potential new public notification requirements for CSO discharges in the Great Lakes Basin

as part of the September 14, 2016 listening session and August 1, 2016 request for stakeholder input discussed in Section I.K of this notice. EPA is also encouraging the Great Lake states to notify small local governments affected by this rule about the opportunity to review and comment on this proposal.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

The rule proposes a requirement for CSO permittees to notify the public of CSO discharges. This requirement includes the development of a public notification plan and the release of an annual notice that includes monitoring data. The incremental impact to state permitting authorities is estimated to be \$2,503.71 annually per state. The incremental impact to local permittees may range from a total of \$1,000 to \$3,000 annually per CSO permittee, depending on the number of CSO events and preparation time for the annual notice. Details of this analysis are presented in "Economic Analysis for the Public Notification Requirements for Combined Sewer Overflow discharges within the Great Lakes Basin," which is available in the docket for the proposed rule (Docket ID No. EPA-HQ-OW-2016-0376 <http://www.regulations.gov>).

Keeping with the spirit of E.O. 13132 and consistent with EPA's policy to promote communications between EPA and state and local governments, EPA met with state and local officials throughout the process of developing the proposed rule and received feedback on how potential new regulatory requirements would affect them. EPA engaged in extensive outreach via conference calls to affected states to enable officials of affected state to have meaningful and timely input into the development of the proposed rule. EPA also held a public listening session and solicited written comments from the public and impacted stakeholder groups, including affected municipalities, to inform the development of the public notice proposed requirements. See Docket ID No. EPA-HQ-OW-2016-0376 to the *Federal eRulemaking Portal*: <http://www.regulations.gov>.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175 since it does not have a direct substantial impact on one or more federally recognized tribes. No tribal governments are authorized NPDES permitting authorities and none of the combined sewer systems subject to this rule are located on Indian nation lands.

The proposed rule would address the way in which municipalities share information with the public, public health departments, and potentially impacted communities (including Indian tribes) about CSOs in the Great Lakes Basin. EPA therefore evaluated the proximity of CSSs that would be subject to the proposed rule in relation to Indian lands. EPA identified six CSO permittees with the potential to affect waters near four Indian nations in New York State:

- *Seneca Nation of Indians (SNI)*: The Dunkirk WWTP is located south of the Cattaraugus Reservation. The Buffalo Sewer Authority and Niagara Falls WWTP are located close to SNI lands within the city of Niagara Falls, NY and Buffalo, NY (where the Seneca casinos are located).

- *Tuscarora Nation (TN)*: The Tuscarora Nation lands are located directly between the Niagara Falls WWTP and Lockport WWTP but not on the Niagara River or Eighteen Mile Creek.

- *Tonawanda Seneca Nation (TSN)*: The Medina WWTP is located 10 miles north of the Tonawanda Seneca Nation lands.

- *St. Regis Mohawk Tribe (SRMT)*: Any of the three WWTP plants along the St. Lawrence River would be of concern to the Mohawks at Akwesasne. SRMT is directly impacted by the Massena WWTP as the St. Lawrence River goes directly thru the heart of Akwesasne, the St. Regis Mohawk Tribe's reservation lands.

Consistent with the EPA Policy on *Consultation and Coordination with Indian Tribes*,²⁶ EPA conducted outreach to tribal officials during the development of this action. EPA contacted the above mentioned tribes through outreach conducted by EPA's Office of Environmental Justice to ensure they were aware of the public listening session held regarding this rulemaking, and the associated opportunity to provide written comments to the Agency. In addition,

²⁶ <https://www.epa.gov/sites/production/files/2013-08/documents/cons-and-coord-with-indian-tribes-policy.pdf>.

the proposed rule would require Great Lakes Basin CSO permittees to consult with potentially affected Indian Tribes whose waters may be affected by a CSO discharge prior to submitting the public notification plan. This requirement would ensure that needs of tribes using potentially affected waters are considered in terms of timing of notification, the type of information that is provided, and the means by which public notification is communicated.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This action is not subject to Executive Order 13045 because it is not economically significant as defined in Executive Order 12866, and because the EPA does not believe the environmental health or safety risks addressed by this action present a disproportionate risk to children. The proposed rule would, in some cases, increase public awareness of CSO discharges to the Great Lakes Basin, including information about public use areas such as beaches that may be impacted by contaminated CSO discharges, and by doing so could decrease health risks for children, infants, and adults.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211, because it does not significantly affect energy supply, distribution or use.

I. National Technology Transfer and Advancement Act

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

EPA determined that the human health or environmental risk addressed by this action would not have potential disproportionately high and adverse human health or environmental effects on minority, low-income, or indigenous populations. This action affects the way in which Great Lakes Basin CSO permittees communicate information regarding CSO discharges to the public. It does not change any current human health or environmental risk standards.

However, because the proposed rule would address the way in which information about CSO discharges is communicated to the public, EPA did reach out to environmental justice organizations to specifically solicit

input on what may be the best approaches to reaching environmental justice communities with this information. Prior to the public listening session on September 14, 2016, EPA contacted over 800 environmental justice stakeholders through the Office of Environmental Justice Listserv, to ensure they were aware of the listening session and the opportunity to provide written input to the Agency through the public docket.

In addition, the proposed rule would require the Great Lakes Basin CSO permittee to consult with local public health departments and potentially affected public entities when developing the public notification plan. These consultations may alert the Great Lakes Basin CSO permittee to specific environmental justice community considerations regarding the best ways to effectively communicate this information. EPA requests comment on this requirement and whether it is expected to sufficiently account for the needs of environmental justice communities that may utilize waters that could be affected by a CSO discharge to the Great Lakes Basin.

List of Subjects

40 CFR Part 122

Environmental protection, Administrative practice and procedure, Combined sewer overflow, Confidential business information, Hazardous substances, Reporting and recordkeeping requirements, Water pollution control, Water pollution, public notification, reporting.

40 CFR Part 123

Environmental protection, Administrative practice and procedure, Combined sewer overflow, Hazardous substances, Indians—lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Water pollution control, Water pollution, public notification, reporting.

Dated: December 16, 2016.

Gina McCarthy,
Administrator.

For the reasons set forth in the preamble, EPA proposes to amend 40 CFR part 122 as follows:

PART 122—EPA ADMINISTERED PERMIT PROGRAMS: THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

■ 1. The authority citation for part 122 continues to read as follows:

Authority: The Clean Water Act, 33 U.S.C. 1251 *et seq.*

■ 2. Amend § 122.2 by adding the definitions for “Combined sewer overflow,” “Combined sewer system,” and “Great Lakes Basin” in alphabetical order to read as follows:

§ 122.2 Definitions.

* * * * *

Combined sewer overflow (CSO) means a discharge from a combined sewer system (CSS) at a point prior to the Publicly Owned Treatment Works (POTW) Treatment Plant (defined at § 403.3(r) of this chapter).

Combined sewer system (CSS) means a wastewater collection system owned by a State or municipality (as defined by section 502(4) of the CWA) which conveys sanitary wastewaters (domestic, commercial and industrial wastewaters) and storm water through a single-pipe system to a Publicly Owned Treatment Works (POTW) Treatment Plant (as defined at § 403.3(r) of this chapter).

* * * * *

Great Lakes Basin means the waters defined as “Great Lakes” and “Great Lakes System” as those terms are defined in § section 132.2 of this chapter.

* * * * *

■ 3. Amend § 122.21 by adding paragraph (j)(8)(iii).

§ 122.21 Application for a permit (applicable to State programs, see § 123.25).

* * * * *

(j) * * *

(8) * * *

(iii) *Public Notification Plan for CSO discharges to the Great Lakes Basin.*

Each applicant that discharges a combined sewer overflow to the Great Lakes Basin as defined in § 122.2 must submit a public notification plan developed in accordance with § 122.38 as part of its permit application. The public notification plan shall describe any significant updates to the plan that may have occurred since the last plan submission.

* * * * *

■ 4. Add § 122.38 to read as follows:

§ 122.38 Public Notification requirements for CSO discharges to the Great Lakes Basin.

(a) All permittees authorized to discharge a combined sewer overflow (CSO) to the Great Lakes Basin (“Great Lakes Basin CSO permittee”) must provide public notification of CSO discharges as described in this paragraph after [date 6 months after publication of final rule]. Public notification shall consist of:

(1) *Signage.* (i) The Great Lakes Basin CSO permittee shall ensure that there is adequate signage where signage is

feasible at CSO outfalls and potentially impacted public access areas. At a minimum, signs shall include:

(A) The name of the Great Lakes Basin CSO permittee,

(B) A description of the discharge (e.g., untreated human sewage, treated wastewater) and notice that sewage may be present in the water, and

(C) The Great Lakes Basin CSO permittee contact information, including a telephone number, NPDES permit number and outfall number as identified in the NPDES permit.

(ii) The Great Lakes Basin CSO permittee shall perform periodic maintenance of signs to ensure that they are legible, visible and factually correct.

(iii) Where a permittee has before [date 6 months after publication of final rule] installed a sign at a CSO outfall or potentially impacted public access area that is consistent with state requirements, the sign is not required to meet the minimum requirements specified in paragraph (a)(1)(i) of this section until the sign is replaced or reset.

(2) *Notification of Local Public Health Department and other potentially affected public entities.* (i) As soon as possible, but no later than four (4) hours after becoming aware by monitoring,

modeling or other means that a CSO discharge has occurred, the Great Lakes Basin CSO permittee shall provide initial notice of the CSO discharge to the local public health department (or if there is no local health department, to the state health department), any potentially affected public entities (such as municipalities, public drinking water utilities, state and county parks and recreation departments), and Indian Tribes whose waters may be affected. Such initial notice shall, at a minimum, include the following information:

(A) The water body that received the discharge(s);

(B) The location of the discharge(s). Where CSO discharges from the same system occur at multiple locations at the same time, the Great Lakes Basin CSO permittee may provide a description of the area in the waterbody where discharges are occurring and identification of the public access areas potentially impacted by the discharge, and the permittee is not required to identify the specific location of each discharge;

(C) The date(s) and time(s) that the discharge(s) commenced or the time the permittee became aware of the discharge(s) or when discharges are expected to occur;

(D) Whether, at the time of the notification, the discharge(s) is continuing or has ended. If the

discharge(s) has ended, the approximate time that the discharge ended; and

(E) A point of contact for the CSO permittee.

(ii) Within twenty-four (24) hours after becoming aware by monitoring, modeling or other means that the CSO discharge(s) has ended, the Great Lakes Basin CSO permittee shall provide the following supplemental information to the public health department and affected public entities and Indian Tribes receiving the initial notice under paragraph (a)(2)(i) of this section unless the information had been provided in an earlier notice:

(A) The measured or estimated volume of the discharge(s). Where CSO discharges from the same system occur at multiple locations at the same time, the Great Lakes Basin CSO permittee may provide an estimate of the cumulative volume discharged to a given waterbody; and

(B) The approximate time that the discharge(s) ended.

(3) *Notification of the Public.* (i) As soon as possible, but no later than four (4) hours after becoming aware by monitoring, modeling or other means that a CSO discharge has occurred, the Great Lakes Basin CSO permittee shall provide public notification of CSO discharges. The Great Lakes Basin CSO permittee shall provide public notification of CSO discharges electronically, such as by text, email, social media alerts to subscribers or by posting a notice on its public access Web site, and by other appropriate means (e.g. newspaper, radio, television).

(ii) At a minimum, the notice shall include:

(A) The water body that received the discharge(s);

(B) The location of the discharge(s). Where CSO discharges from the same system occur at multiple locations at the same time, the Great Lakes Basin CSO permittee may provide a description of the area in the waterbody where discharges are occurring and identification of the public access areas potentially impacted by the discharge, and the permittee is not required to identify the specific location of each discharge;

(C) The date(s) and time(s) that the discharge(s) commenced or the time the permittee became aware of the discharge(s); and

(D) Whether, at the time of the notification, the discharge(s) is continuing or has ended. If the discharge(s) has ended, the approximate time that the discharge(s) ended.

(iii) Within twenty-four (24) hours after becoming aware by monitoring,

modeling or other means that the CSO discharge(s) has ended, the Great Lakes Basin CSO permittee shall update the electronic notice with the following information unless the information had been provided in an earlier notice:

(A) The measured or estimated volume of the discharge(s). Where CSO discharges from the same system occur at multiple locations at the same time, the Great Lakes Basin CSO permittee may provide an estimate of the cumulative volume discharged to a given waterbody; and

(B) The approximate time that the discharge(s) ended, unless this information was provided in an earlier notice.

(b) *Annual Notice.* By May 1 of each calendar year (or an earlier date specified by the Director), all permittees authorized to discharge a CSO to the Great Lakes Basin shall make available to the public an annual notice describing the CSO discharges from its outfall(s) that occurred in the previous calendar year and shall provide the Director with notice of how the annual notice is available. Permittees that are owners or operators of a satellite collection system with one or more CSO outfalls shall provide the annual notice to the public and a copy of the annual notice to the operator of the POTW treatment plant providing treatment for its wastewater. At a minimum, the annual notice shall include:

(1) Information on the availability of the permittee's public notification plan and a summary of significant modifications to the plan that were made in the past year;

(2) A description of the location, treatment provided and receiving water for each CSO outfall;

(3) The date, location, duration, and volume of each wet weather CSO discharge that occurred during the past calendar year. Where CSO discharges from the same system occur at multiple locations at the same time, the Great Lakes Basin CSO permittee may provide an estimate of the cumulative volume discharged to a given waterbody;

(4) The date, location, duration, and volume of each dry weather CSO discharge that occurred during the past calendar year;

(5) A summary of available monitoring data for CSO discharges from the past calendar year;

(6) A description of any public access areas impacted by each CSO discharge;

(7) Representative rain gauge data in total inches to the nearest 0.1 inch that resulted in a CSO discharge;

(8) A point of contact; and

(9) A concise summary of the implementation of the nine minimum

controls and the status of implementation of the long-term CSO control plan (or other plans to reduce or prevent CSO discharges), including:

(i) A description of key milestones remaining to complete implementation of the plan; and

(ii) A description of the average annual number of CSO discharges anticipated after implementation of the long-term control plan (or other plan relevant to reduction of CSO overflows) is completed.

(c) *Reporting.* By May 1 of each calendar year (or an earlier date specified by the Director), all permittees authorized to discharge a CSO to the Great Lakes Basin shall electronically report any CSO discharge that occurred during the past calendar year that has not been previously reported pursuant to a permit requirement, to the initial recipient, as defined in 40 CFR 127.2(b), in compliance with 40 CFR 127 using the discharge monitoring report (NPDES Data Group 3, Appendix A to 40 CFR 127) or the Sewer Overflow Event Report (NPDES Data Group 9, Appendix A to 40 CFR 127).

(d) *Public Notification Plan.* The Great Lakes Basin CSO permittee shall develop a public notification plan that describes how the Great Lakes Basin CSO permittee will ensure that the public receives adequate notification of CSO occurrences and CSO impacts. The Great Lakes Basin CSO permittee must provide notice of the availability of the plan on the permittee's Web site (if it has a Web site), and periodically provide information in bill mailings and by other appropriate means on how to view the notification plan. The Great Lakes Basin CSO permittee must submit its public notification plan to the Director by [date 6 months after publication of a final rule] and as part of a permit application under § 122.21(j)(8)(iii). The plan must:

(1) Identify the location of signs required under paragraph (a)(1) of this section and the location of any CSO outfall where a sign is not feasible.

Where a sign has not been provided at an outfall, the plan shall explain why a sign at that location is not feasible.

(2) Describe the message used on signs required under paragraph (a)(1) of this section;

(3) Describe protocols for maintaining signage (e.g., inspections at set intervals);

(4) Identify (with points of contact) the municipalities, public drinking water supplies, public parks with water access, Indian Tribe(s), and describe other sensitive area(s) identified in the permittee's long-term CSO control plan,

that may be affected by the permittee's CSO discharges;

(5) Summarize significant comments and recommendations raised by the local public health department under paragraph (e) of this section;

(6) Identify other affected public entities and Indian Tribes whose waters may be affected by a CSO discharge that were contacted under paragraph (e) of this section and provide a summary of their significant comments and recommendations;

(7) Describe protocols for the initial and supplemental notice to public health departments and other public entities;

(8) Describe protocols for the initial and supplemental notice to the public;

(9) Describe, for each outfall, how the volume and duration of CSO discharges shall be either measured or estimated for the purposes of complying with paragraphs (a)(2)(B)(i), (a)(3)(C)(i), (b)(2), and (b)(3) of this section. If the Great Lakes Basin CSO permittee intends to use a model to estimate discharge volumes and durations, the plan must summarize the model and describe how the model was or will be calibrated.

CSO permittees that are a municipality or sewer district with a population of 75,000 or more must calibrate their model at least once every 5 years; and

(10) Describe protocols for making the annual notice described in paragraph (b) of this section available to the public and to the Director.

(e) Prior to submitting the public notification plan, or resubmitting under § 122.21(j)(8)(iii), the Great Lakes Basin CSO permittee must:

(1) Seek input from the local public health department (or if there is no local health department, the state health department), to:

(i) Develop recommended protocols for providing notification of CSO discharges to the public health department. The protocols will specify which CSO discharges are subject to notification, the means of notification, timing of notification and other relevant factors; and

(ii) Develop recommendations for providing notice to the general public of CSO discharges electronically and by other appropriate means.

(2) Seek input from other potentially affected public entities and Indian Tribes whose waters may be affected by a CSO discharge.

(3) Consider the recommendations of the public health department and other potentially affected entities in developing protocols in its public notification plan for providing notification of CSO discharges to the public health department and

potentially affected public entities and Indian Tribes.

(f) The Director may extend the compliance dates in paragraphs (a), (b), and (d) of this section for individual communities if the Director determines the community needs additional time to comply in order to avoid undue economic hardship. Where the Director extends the compliance date of any of these requirements for a community, the Director shall notify the Regional Administrator of the extension and the reason for the extension. The Director shall post on its Web site a notice that includes the name of the community and the new compliance date(s). The notice shall remain on the Director's Web site until the new compliance date.

■ 5. Amend § 122.42 by adding paragraph (f) to read as follows:

§ 122.42 Additional conditions applicable to specified categories of NPDES permits (applicable to State NPDES programs, see § 123.25).

* * * * *

(f) *Public Notification requirements for CSO discharges to the Great Lakes Basin.* Any permit issued for combined sewer overflow (CSO) discharges to the Great Lakes Basin must:

(1) Require implementation of the public notification requirements in § 122.38(a);

(2) Specify the information that must be included on outfall signage, which, at a minimum, must include those elements in § 122.38(a)(1)(i);

(3) Specify outfalls and public access areas where signs are required pursuant to § 122.38(a)(1)(i);

(4) Specify the timing and minimum information required for providing initial and supplemental notification to:

(i) Local public health department and other potentially affected entities under § 122.38(a)(2); and

(ii) The public under § 122.38(a)(3).

(5) Specify the location of CSO discharges that must be monitored for volume and discharge duration and the location of CSO discharges where CSO volume and duration may be estimated;

(6) Require submittal of an annual notice in accordance with § 122.38(b);

(7) Specify protocols for making the annual notice under § 122.38(b) available to the public; and

(8) Require all CSO discharges be electronically reported in a discharge monitoring report or a sewer overflow event report pursuant to 40 CFR 122.41(l)(6) or (7).

* * * * *

PART 123—STATE PROGRAM REQUIREMENTS

■ 6. The authority for part 123 continues to read as follows:

Authority: Clean Water Act, 33 U.S.C. 1251 *et seq.*

■ 7. Amend § 123.25 by revising paragraph (a)(46) and adding paragraph (a)(47) to read as follows:

§ 123.25 Requirements for permitting.

(a) * * *

(46) For states that wish to receive electronic documents, 40 CFR part 3—(Electronic Reporting); and

(47) For a Great Lakes State, § 122.38.

RIN 2070–AK24

TSCA Inventory Notification (Active-Inactive) Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The recent amendments to the Toxic Substances Control Act (TSCA) require EPA to designate chemical substances on the TSCA Chemical Substance Inventory as either “active” or “inactive” in U.S. commerce. To accomplish that, EPA is proposing to require a retrospective electronic notification of chemical substances on the TSCA Inventory that were manufactured (including imported) for non-exempt commercial purposes during the ten-year time period ending on June 21, 2016. EPA would also accept such notices for chemical substances that were processed. EPA would use these notifications to distinguish active substances from inactive substances. EPA would include the active and inactive designations on the TSCA Inventory and as part of its regular publications of the Inventory. EPA is also proposing to establish procedures for forward-looking electronic notification of chemical substances on the TSCA Inventory that are designated as inactive, if and when the manufacturing or processing of such chemical substances for non-exempt commercial purposes is expected to resume. Upon receipt of a valid notice, EPA would change the designation of

the pertinent chemical substance on the TSCA Inventory from inactive to active. EPA is proposing the procedures regarding the manner in which such retrospective and forward-looking activity notifications must be submitted, the details of the notification requirements, exemptions from such requirements, and procedures for handling claims of confidentiality.

DATES: Comments must be received on or before March 14, 2017.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2016–0426, by one of the following methods.

• *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.

Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

• *Mail:* Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.

• *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>. Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:

For technical information contact: Myrta R. Christian, Chemistry, Economics, and Sustainable Strategies Division (Mailcode 7401M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; telephone number: (202) 564–8498; email address: christian.myrta@epa.gov.

For general information contact: The TSCA–Hotline, ABVI–Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: TSCA-Hotline@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

You may be affected by this action if you domestically manufactured, imported, or processed chemical substances listed on the TSCA Chemical Substance Inventory for nonexempt commercial purposes during the ten-year time period ending on June 21,

2016. You may also be affected by this action if you intend to domestically manufacture, import, or process chemical substances listed on the TSCA Chemical Substance Inventory in the future. The following list of North American Industrial Classification System (NAICS) codes are not intended to be exhaustive, but rather provides a guide to help readers determine whether this action may apply to them:

- Chemical manufacturing or processing (NAICS code 325).
- Petroleum and Coal Products Manufacturing (NAICS code 324).

In addition, the discussion in Unit III.A. describes in more detail which chemical substances would and would not be subject to reporting under this proposed action. You may also consult 40 CFR 710.3 and 710.4, as well as the proposed regulatory text in this document, for further information on the applicability of exemptions to this proposed rule. If you have any questions regarding the applicability of this action to a particular entity, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What is the Agency's authority for taking this action?

EPA is proposing this rule under TSCA section 8(b), 15 U.S.C. 2607(b). As described in more detail in Unit II.A., TSCA was amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act, Public Law 114–182. The Government Paperwork Elimination Act (GPEA), 44 U.S.C. 3504, provides that, when practicable, Federal organizations use electronic forms, electronic filings, and electronic signatures to conduct official business with the public.

Note that TSCA's statutory definition of "manufacture" includes importing. Accordingly, the regulatory definition of "manufacture" for this rule includes importation. All references to manufacturing in this notice should be understood to also encompass importing. Where EPA's intent is to specifically refer to domestic manufacturing or importing (both activities constitute "manufacture"), this notice will do so expressly.

C. What action is the Agency taking?

Pursuant to TSCA section 8(b)(4)(A), EPA is proposing procedural, retrospective notification requirements for persons who manufactured chemical substances on the TSCA Inventory as described in Unit III.A. Persons who manufactured these chemical substances for nonexempt commercial purposes during the ten-year time period ending on June 21, 2016, would be required to notify the Agency of

certain information described in Unit III.C., including chemical identity and the date range when manufacture occurred in that ten-year time period. EPA would use the chemical identity information obtained from this retrospective reporting to designate as active those chemical substances on the TSCA Inventory for which notices were received. If no notice is received during this retrospective reporting for a chemical substance subject to designation on the TSCA Inventory, then that substance would be designated as inactive. EPA would require date range information in order to obtain confirmation that the chemical substance in question had indeed been manufactured or processed between June 21, 2006 and June 21, 2016.

Pursuant to TSCA section 8(b)(5)(B), EPA is also proposing procedural, forward-looking notification requirements for persons who intend to manufacture or process inactive chemical substances on the TSCA Inventory. After EPA's first publication of the TSCA Inventory that includes active and inactive designations determined by the retrospective reporting, persons who intend to manufacture or process for nonexempt commercial purposes those chemical substances designated as inactive on the TSCA Inventory would be required to notify the Agency of certain information described in Unit III.C. Such notification must occur before the actual date of manufacturing or processing. EPA is proposing that notification, which shall include chemical identity and the actual date of manufacturing or processing, occur no more than 30 days before the actual date of manufacturing or processing.

Included in this proposed rule are electronic reporting requirements described in Unit III.D. that are similar to those established in 2013 for reporting other kinds of information to EPA under TSCA sections 4, 5, 8(a), and 8(d). See 78 FR 72818, December 4, 2013 (FRL 9394–6). The Agency is proposing to require submitters to use EPA's Central Data Exchange (CDX), the Agency's electronic reporting portal, for reporting information under this proposed rule. The information would be submitted to the Agency under TSCA section 8(b), but the practical rationales for requiring submissions to proceed through CDX, cited in 2013, are also pertinent here by analogy.

Also included in this proposal are amendments to 40 CFR part 710, which conform the definitions applicable to these reporting requirements with those that apply to Chemical Data Reporting rule requirements (definitions found at

40 CFR 704.3 and 711.3) and the submission of Premanufacture Notifications (definitions found at 40 CFR 720.3). EPA believes that basing Section 8(b) reporting on definitions that are already familiar to the public from CDR and PMN reporting would reduce the potential for confusion and reduce the burden of rule familiarization. EPA is not proposing to modify the 40 CFR part 710 definitions in any manner that either is not conforming to Part 704, 710, or 720, or is a purely technical correction (e.g., eliminating references to the Canal Zone from the definition of "State"). Any other changes to the definitions in 40 CFR part 710 are beyond the scope of this proposal.

Included in this proposed rule are procedures for persons who co-manufacture or co-process a reportable chemical substance. These procedures would allow the submission of a single commercial activity notification in single instances of co-manufacturing or co-processing of a particular volume of a chemical substance. These proposed procedures are similar to Chemical Data Reporting rule requirements (40 CFR 711.22) when two or more persons are involved in a particular manufacture or import transaction. EPA believes that allowing a single notification for co-manufacturers and co-processors would serve to provide the Agency with the information necessary to designate a chemical substance as active on the TSCA Inventory while reducing duplicative reporting.

Also included in this proposed rule are requirements for filing a joint submission when specific chemical identity information is claimed confidential by a supplier. If an importer cannot provide the specific chemical identity of a reportable substance to EPA because the information is claimed confidential by a supplier, and therefore is unknown to the importer, the importer would be required to ask the supplier to provide the confidential chemical identity information directly to the Agency in a joint submission. If a domestic manufacturer or processor cannot provide the specific chemical identity of a reportable substance to EPA because the chemical identity of a reactant is claimed confidential by a supplier, and therefore is unknown to the domestic manufacturer or processor, the manufacturer or processor would be required to ask the supplier to provide the confidential chemical identity information directly to the Agency in a joint submission. EPA would only accept joint submissions that are submitted electronically using CDX.

This requirement is similar to Chemical Data Reporting rule requirements (40 CFR 711.15) and would allow EPA to obtain the information necessary to identify the specific chemical identity of a reportable substance and designate it as active on the TSCA Inventory.

D. Why is the Agency taking this action?

TSCA section 8(b)(4)(A) requires EPA to issue a final retrospective reporting rule by June 22, 2017. These proposed reporting requirements would enable EPA to fulfill a statutory obligation to designate chemical substances on the TSCA Inventory as active or inactive in U.S. commerce. This proposed rule is not intended to indicate conclusions about the risks of chemical substances on the TSCA Inventory. Nonetheless, the designation of a chemical substance as active or inactive would be relevant to the Agency's prioritization of chemical substances in U.S. commerce under TSCA section 6(b).

Furthermore, TSCA section 8(b)(5) establishes a forward-looking notification requirement that goes into effect as soon as EPA designates inactive substances. EPA is proposing to establish the procedural framework whereby manufacturers and processors would discharge their notice obligations under this section of TSCA.

E. What are the estimated incremental impacts of this action?

EPA has evaluated the potential costs of establishing the proposed reporting requirements for manufacturers and processors. This analysis, which is available in the docket, is discussed in Unit VI. and is briefly summarized here (Ref. 1).

During the retrospective (or "start-up") period, between approximately June 2017 and June 2018, typical costs per firm are estimated at \$1,346 per submission (with an estimated seven chemicals per submission), with possible additional costs at \$40.22 per CDX registration in the event that the submitter is not currently registered in CDX. Among manufacturers, an estimated 6,169 firms would undertake rule familiarization with 4,692 completing compliance determination, form completion, and recordkeeping. For manufacturers, the total burden during start-up is estimated at 86,783 hours with an associated total cost of \$6.68 million. For processors, the estimate of the universe of potentially affected firms is 161,550 who might initiate rule familiarization. For processors initiating rule familiarization, the cost would be 4 hours per firm (about \$300 per firm). EPA believes that it is unlikely that

100% of processors will initiate rule familiarization and that the percentage will be less. EPA estimates that only 100 processors will complete compliance determination, form completion, and recordkeeping. For the 100 processors who complete a submission with one chemical, the burden during start-up is estimated at 692 hours with an associated cost of \$0.05 million. Lastly, for 469 new CDX registrations (for individuals lacking previous experience with electronic reporting to EPA), burden during start-up is estimated at 249 hours with an associated cost of \$0.02 million.

The rule has minimal burden and cost implications related to ongoing reporting after the start-up year. The forward-looking (or "Ongoing") reporting after June 2018 involves compliance determination, form completion, and recordkeeping for twenty manufacturers and/or processors per year. Burden and cost are estimated to total 142 burden hours per year with an associated cost of \$10,790 per year.

Agency activities due to the rule include CDX and Chemical Information Submission System (CISS) capacity expansions, time to manage commercial activity notices, and increased costs incurred when making revisions to the TSCA Inventory. Associated costs are estimated at \$3.84 million during start-up, and \$0.20 million annually thereafter.

Combining Industry and Agency cost estimates, and annualizing over a 10-year period, the total cost of the rule is estimated at \$7.22 million per year using a 3% discount rate, and at \$8.77 million per year using a 7% discount rate.

F. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through [regulations.gov](http://www.regulations.gov) or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a CD-ROM or other electronic media that you mail to EPA, mark the outside of the media as CBI and then identify electronically within the media the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked would not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your

comments, see the commenting tips at <http://www.epa.gov/dockets/comments.html>.

II. Background

A. Overview of Applicable Authority

EPA is required under TSCA section 8(b), 15 U.S.C. 2607(b), to compile and keep current a list of chemical substances manufactured or processed in the United States. In 1977, EPA promulgated a rule under TSCA section 8(a), 15 U.S.C. 2607(a), to provide the information necessary for EPA to compile a list of chemical substances that had been in commerce since January of 1975 (Ref. 2). This list is known as the TSCA Chemical Substance Inventory (or simply the "TSCA Inventory"). Since compiling the initial TSCA Inventory, EPA regularly adds new chemical substances that have completed new chemical review requirements pursuant to TSCA section 5(a), 15 U.S.C. 2604(a), and that have been manufactured or processed for nonexempt commercial purposes. EPA maintains the TSCA Inventory as the authoritative list of all the chemical substances reported to the Agency for inclusion on the TSCA Inventory.

1. *Retrospective reporting under TSCA section 8(b)(4)(A).* TSCA section 8(b)(4)(A) requires EPA to promulgate a rule that requires manufacturers to notify the Agency, by not later than 180 days after the date on which the final rule is published in the **Federal Register**, of each chemical substance on the TSCA Inventory that was manufactured for nonexempt commercial purpose during the 10-year period ending on June 21, 2016. If EPA receives a valid notice for a chemical substance on the TSCA Inventory, EPA must designate that chemical substance as an active substance. If EPA receives no valid notice for a chemical substance on the TSCA Inventory (and that is subject to designation), EPA must designate that chemical substance as an inactive substance.

2. *Forward-looking reporting under TSCA section 8(b)(5)(B).* TSCA section 8(b)(5)(B) requires persons who intend to manufacture or process chemical substances for nonexempt commercial purposes in the future that are designated on the TSCA Inventory as inactive to notify EPA prior to the date that these chemicals are to be manufactured or processed. Upon receiving a valid notice, EPA must change the designation of the chemical substance from inactive to active.

3. *Processors.* TSCA section 8(b)(4)(A) indicates that the Administrator may require processors to report similarly to

manufacturers under the rule. This proposed rule would not require processors to report during the retrospective reporting period. However, once EPA has designated a chemical substance as an inactive substance, the processing of that chemical substance for a non-exempt commercial purpose would be unlawful, unless the processor first submits a notice as required by TSCA section 8(b)(5)(B). Therefore, this proposed rule would allow processors to report during the retrospective reporting period, extended to not later than 360 days after the date on which the final rule is published in the **Federal Register** (which will be 180 days after EPA's publication of the first version of the TSCA Inventory with preliminary commercial activity designations). Processors could report any chemical substance that they had processed for a nonexempt commercial purpose during the 10-year period ending on June 21, 2016. The extended submission period for processors would allow processors time to evaluate whether they wish to voluntarily report chemical substances that have not been reported by manufacturers or importers and that are preliminarily designated as inactive on EPA's publication of the first version of the revised TSCA Inventory. (These designations would be merely preliminary so there would not yet be an obligation to report under TSCA Section 8(b)(5)(B).) If EPA receives no notice on a chemical substance that is subject to designation, EPA then must designate that preliminarily inactive substance as actually inactive. Hence, persons who processed a chemical substance between June 2006 and June 2016 may wish to report under TSCA section 8(b)(4)(A) in order to avoid a subsequent obligation to curtail processing on the day that EPA designates the substance as inactive, under TSCA section 8(b)(5)(B). Processing could resume as soon as the notice under TSCA section 8(b)(5)(B) is submitted, but processors may nonetheless find it less disruptive to ensure that the chemical substance is earlier reported as active under TSCA section 8(b)(5)(A).

4. General provisions. General provisions for TSCA section 8(b) rules appear in 40 CFR part 710. These provisions include definitions that apply to reporting under this proposed rule and also describe the scope of the Inventory. For example, 40 CFR 710.1 describes requirements for EPA to compile and keep current the TSCA Inventory of chemical substances manufactured or processed for commercial purposes, including the

periodic updates to the Inventory to include new chemical substances reported under TSCA section 5(a) and commercialized for nonexempt purposes. In addition, the definitions in TSCA section 3 apply to this rulemaking.

5. Electronic reporting under the Government Paperwork Elimination Act (GPEA). GPEA, 44 U.S.C. 3504, provides that, when practicable, Federal organizations should use electronic forms, electronic filings, and electronic signatures to conduct official business with the public. EPA's Cross-Media Electronic Reporting Regulation (CROMERR) (40 CFR part 3), provides that any requirement in title 40 of the CFR to submit a notice directly to the Agency can be satisfied with an electronic submission that meets certain conditions once the Agency published a document in the **Federal Register** announcing that EPA is prepared to receive certain documents in electronic form (Ref. 3). For more information about CROMERR, go to <http://www.epa.gov/cromerr>.

III. Summary of Proposed Rule

EPA is proposing reporting and procedural requirements for manufacturers and processors of chemical substances pursuant to TSCA section 8(b).

A. What chemical substances would be reportable under this rule?

1. Reportable chemical substances. As a general matter, the retrospective reporting requirement of this proposed rule would apply to chemical substances listed on the TSCA Inventory that were manufactured for a nonexempt commercial purposes during the 10-year period ending on June 21, 2016. This lookback period is set by statute. TSCA also establishes forward-looking reporting requirements, at section 8(b)(5)(B), with respect to chemical substances listed on the TSCA Inventory that EPA designates as inactive. The TSCA Inventory is available at <https://www.epa.gov/tscainventory>.

2. Exemptions from reporting. *i. Statutory background.* This proposed rule provides exemptions from reporting based on sections 8(b)(4) and (5) and the general objectives that EPA can infer from that text. Unlike the reporting that informed the initial compilation of the TSCA Inventory (which arose under TSCA section 8(a)), the reporting requirements described in this proposed rule arise directly under TSCA section 8(b). EPA must finalize the retrospective reporting requirements by June 22, 2017, and all mandatory reporting under

TSCA section 8(b)(4) must be completed by not later than 180 days thereafter. TSCA section 8(b)(4) and 8(b)(5) reporting requirements apply to "each chemical substance," found on the TSCA Inventory, subject to the provision that reporting obligations shall only be triggered by manufacturing or processing for a "nonexempt commercial purpose." The retrospective reporting requirements under TSCA section 8(b)(4) are expressed as being "subject to the limitations" of TSCA section 8(a)(5)(A). TSCA section 8(a)(5)(A), in turn, specifies that "to the extent feasible," EPA shall: (1) Avoid requiring reporting that is "unnecessary or duplicative;" (2) "minimize the cost of compliance" to small manufacturers and processors; and (3) apply reporting obligations to the persons likely to have information relevant for effective implementation.

Furthermore, as EPA interprets its statutory authority, the reporting is intended to support two key objectives. First, to enable EPA to determine which reportable chemical substances are active in U.S. commerce. EPA will accomplish this based on notices received. Reportable chemical substances for which no notices are received would be considered inactive in U.S. commerce. See TSCA section 8(b)(4)(A)(iii). Second, with respect to chemical substances identified as being active in commerce that are listed on the confidential portion of the TSCA Inventory, to require that persons manufacturing or processing such chemical substances request that existing claims for protection against disclosure of the specific chemical identity be maintained. See TSCA sections 8(b)(4)(B)(ii), 8(b)(4)(C), 8(b)(5).

ii. Excluded chemical substances. If a chemical substance is not listed on the TSCA Inventory, then by the terms of TSCA sections 8(b)(4) and (5), it is not subject to reporting under this proposed rule. For example, chemical substances that are manufactured under a TSCA section 5(h) exemption are not added to the TSCA Inventory. Accordingly, this proposed rule would not require that reporting occur with respect to such substances. This is reflected in the proposed definitions at 40 CFR 710.23, which are drafted in such a manner that if a chemical substance was not on the TSCA Inventory as of June 22, 2016, it would not be subject to reporting.

Naturally occurring chemical substances also are proposed to be excluded from reporting under this proposed rule, so long as the manufacturing and processing of such substances meets the criteria set forth in 40 CFR 710.27(b). When EPA required

manufacturers and processors to submit notices in support of the original compilation of the TSCA Inventory in 1977, EPA made clear that reporting on naturally occurring chemical substances would not be necessary, as these substances would automatically be included in the Inventory as a category: “Naturally Occurring Chemical Substances,” 42 FR 64578 (1977). EPA proposes to simply designate the whole category of Naturally Occurring Chemical Substances as active substances, by rule, without the need for reporting to differentiate among such substances.

Finally, this proposed rule would not require manufacturers to report chemical substances that are on both the non-confidential portion of the TSCA Inventory and the interim list of active substances described in TSCA section 8(b)(6). Such reporting would be unnecessary, since EPA already has reporting data to establish that the chemical substance was in active commerce at some time between June 21, 2006 and June 21, 2016. Furthermore, for such substances, there are no existing claims for protection against disclosure of the specific identity of the chemical substance for any party to elect to maintain or not maintain. With respect to chemical substances on the confidential portion of the TSCA Inventory, however, such reporting still serves a statutory function under TSCA sections 8(b)(4)(B)(ii) and 8(b)(4)(C), even where there is already adequate evidence, prior to reporting, that the substance was in active commerce during the lookback period.

Regarding the composition of the interim list of active substances, TSCA section 8(b)(6) requires EPA to compile an interim list of active substances reported under 40 CFR part 711 for the purposes of TSCA section 6(b), before promulgation of the rule. The definition of the interim list is somewhat ambiguous, since it refers to the “reporting period that most closely preceded June 22, 2016.” The term “reporting period” is not defined under 40 CFR part 711. In light of the definitional ambiguity of TSCA section 8(b)(6) and EPA’s weighing of the statutory objectives noted previously, EPA has construed the “interim list of active substances” to include 2012 CDR data, which avoids delay of this proposed rule, but would allow for the 2016 CDR data to give rise to a reporting exemption as soon as they are publicly released in final form. Under the proposal, manufacturers and processors of chemical substances on the non-confidential portion of the Inventory would be exempt from reporting if the

manufacture of that chemical substance was already reported (by any party) in response to 2012 or 2016 CDR.

iii. Manufacturing or processing for an exempt commercial purpose. TSCA section 8(b) directs EPA to limit reporting obligations to manufacturing and processing for “nonexempt commercial purpose.” This phrase had a commonly-accepted usage at the time that TSCA was amended, in 2016. See, for example, “Certain New Chemicals; Receipt and Status Information” (referencing TSCA section 5 requirements as applying to manufacture for “nonexempt commercial purpose”) (Ref. 4), and “2016 Chemical Data Reporting Frequent Questions” (associating “nonexempt commercial purpose” with exemptions codified at 40 CFR 720.30 and 40 CFR 711.10(a)) (Ref. 5). Since reporting under TSCA section 8(b) is a form of existing chemical reporting, EPA construes the phrase “nonexempt commercial purpose” consistent with the manner in which the 40 CFR 720.30 exemptions from pre-manufacture reporting requirements were adapted for use in the CDR at 40 CFR 711.10. Thus, for example, the manufacturing or processing of chemical substances solely in small quantities for research and development would not trigger reporting obligations under this proposed rule. Similarly, the manufacturing or processing of impurities, or byproducts that have no subsequent commercial purpose, would not trigger reporting obligations under this proposed rule. Finally, since the CDR integrates reporting exemptions for persons who import chemical substances solely as part of articles with reporting exemptions for nonexempt commercial purposes (see 40 CFR 711.10), EPA construes the TSCA 8(b) reference to “nonexempt commercial purpose” as also encompassing this article exemption. Further supporting this interpretation, EPA believes it would be incongruous to establish a more comprehensive reporting obligation for the import of inactive existing chemical substances under TSCA section 8(b)(5) (*i.e.*, including import as part of an article), than would be applicable to the import of new chemical substances under TSCA section 5 (*i.e.*, excluding import as part of an article).

3. Chemical substances added to the Inventory on or after June 22, 2016. In this proposed rule, chemical substances added to the Inventory on or after June 22, 2016 would be designated as active, without the need for any reporting to establish that the chemical substance is active and without the need for any

statement by manufacturers or processors indicating whether such persons wish to maintain an existing claim for protection against disclosure of the specific chemical identity of the chemical substance. Reporting under TSCA section 8(b)(4) is based on manufacturing or processing, for non-exempt commercial purposes, that occurred between June 21, 2006 and June 21, 2016. TSCA section 8(b)(4)(A)(iii) directs EPA to classify a chemical substance as inactive if no notice of manufacturing or processing is received by EPA. A substance added to the Inventory on or after June 22, 2016, however, would be added so recently that it has no manufacturing or processing overlapping with the lookback period. It would be illogical to designate a very recent addition to the Inventory as inactive, on the grounds that the chemical substance was too recently added to the Inventory to be captured in the retrospective reporting of current manufacturing and processing. Furthermore, if a chemical substance was added to the Inventory on or after June 22, 2016, then any claim for the protection against disclosure of the specific chemical identity of such a substance would be a new claim rather than the maintenance of an existing claim for protection of the information. For the reasons presented previously, EPA construes TSCA section 8(b)(4) reporting requirements to be limited to chemical substances that were added to the Inventory prior to June 22, 2016.

B. When would reporting be required?

1. Retrospective reporting period for manufacturers. This proposed rule would require manufacturers to report to the Agency not later than 180 days after the final rule is published in the **Federal Register**. The 180-day time period for this retrospective reporting for manufacturers is the maximum time allowed under TSCA section 8(b)(4)(A). Following this retrospective reporting for manufacturers, EPA would include the active and inactive designations, determined by the notices received, on the TSCA Inventory.

2. Retrospective reporting period for processors. This proposed rule would allow processors to report to the Agency not later than 360 days after the final rule is published in the **Federal Register**. The 360-day time period for this retrospective reporting for processors would allow processors to search EPA’s publication of a first draft of the TSCA Inventory with active designations and draft inactive designations, based on retrospective reporting by manufacturers, and to report only those chemical substances

not already reported. This first draft of the TSCA Inventory with active designations and draft inactive designations would not have the legal effect of actually designating any chemical substance as inactive. Processors would have the option to simply not report under TSCA section 8(b)(4) and continue processing until such time when EPA has actually designated a chemical substance as inactive. At such time, any further processing of the chemical substance, without prior notification to EPA, would be prohibited by section 8(b)(5). Prior notification would allow EPA to add the chemical substance to the TSCA Inventory as an active substance.

3. Forward-looking reporting. After EPA completes its review of the notices submitted under TSCA section 8(b)(4)(A), it must designate as inactive any chemical substance (subject to designation) for which no notice was received. TSCA section 8(b)(5)(B) provides that, once a chemical substance has been designated as inactive, any person who intends to manufacture or process that inactive substance for a nonexempt commercial purpose must first notify the Agency before the date on which the inactive substance is manufactured or processed. EPA proposes to furthermore limit the submission period for such notices, so that they may not be submitted more than 30 days before the actual date of manufacturing or processing.

The 30-day time period for forward-looking reporting is based on EPA's experience with Premanufacture Notices (PMNs). Although persons often form the intent to commercially manufacture or process chemical substances several months ahead of time, EPA's experience with processing PMNs is that business decisions, technical difficulties, and other unforeseen circumstances may delay a company's plans to commercialize. EPA believes that a commercial activity notice reflects a more tentative or provisional intent to manufacture or process if it is submitted more than 30 days prior to the actual date of manufacturing or processing of the chemical substance. As such, it is less reliable as evidence that placement as active Inventory is warranted. Reassigning chemical substances from inactive to active status, based on relatively unreliable indicia of intent to manufacture, could affect the reliability of the Inventory designations. Therefore, this proposed rule would require that forward-looking reporting of chemical substances designated as inactive on the TSCA Inventory occur not earlier than 30 days before companies intend to

manufacturing or processing for nonexempt commercial purposes.

C. What information would be reported?

1. Retrospective reporting period for manufacturers. This proposed rule would require that manufacturers reporting for the retrospective reporting period provide certain information including chemical identity, type of commercial activity (*i.e.*, whether it is domestic manufacture and/or import), date range of manufacture for nonexempt commercial purpose during the 10-year reporting period ending on June 21, 2016, and whether they seek to maintain an existing claim for protection against disclosure of a confidential chemical identity, if applicable.

2. Retrospective reporting period for processors. This proposed rule would allow processors to report for the retrospective reporting period, provided that the processor reports timely and consistent with the pertinent reporting requirements, including providing certain information such as chemical identity, date range of processing for nonexempt commercial purpose during the 10-year reporting period ending on June 21, 2016, and whether they seek to maintain an existing claim for protection against disclosure of a confidential chemical identity, if applicable.

3. Forward-looking reporting. TSCA section 8(b)(5) requires that manufacturers and processors of inactive substances notify EPA before the date on which they manufacture or process an inactive substance for non-exempt commercial purposes. This proposed rule stipulates that they would do so in the following manner: By reporting certain information including chemical identity, type of commercial activity (*i.e.*, whether it is domestic manufacture, import, and/or processing), actual date of manufacturing or processing for nonexempt commercial purpose, and whether they seek to maintain an existing claim for protection against disclosure of a confidential chemical identity, if applicable.

4. Reporting forms. EPA developed two versions of a Notice of Activity (NOA) reporting form for submitting the information described in this proposed rule for the two reporting scenarios, retrospective and forward-looking (Ref. 6). NOA Form A (EPA Form No. TBD-1) would be used by manufacturers for the retrospective reporting period. It would also be used by processors who report for the retrospective reporting period. NOA Form B (EPA Form No. TBD-2) would be used by

manufacturers and processors for forward-looking reporting. The new NOA forms are based on EPA's Notice of Commencement (NOC) form (Ref. 7), since much of the information submitted in an NOC form is the same or similar to the information proposed in the NOA.

Any person required to report under this proposed rule would provide the information identified in the relevant version of the NOA forms to the extent it is known to or reasonably ascertainable by them. Drafts of the two versions of the proposed NOA reporting forms are available in the docket for public review (Ref. 6).

As noted previously, these forms require very basic explanatory information about the type of commercial activity at issue (domestic manufacture, import, or processing) as well as the date range over which the activity occurred or the date when the activity is intended to resume. The collection of this explanatory information is intended to reduce the likelihood of receiving erroneous notices (*e.g.*, notices regarding commercial activity outside the lookback period), to support EPA's capacity to inquire into the accuracy of activity notices, and thus to increase the reliability of commercial activity designations on the TSCA Inventory.

D. How would information be submitted to EPA?

In 2013, EPA finalized a rule to require electronic reporting of certain information submitted to the Agency under TSCA sections 4, 5, 8(a) and 8(d) (Ref. 8). The final rule followed two previous rules requiring similar electronic reporting of information submitted to the Agency for TSCA Chemical Data Reporting and Pre-Manufacture Notifications. This proposed rule would require electronic reporting similar to the requirements established in 2013 for submitting certain other information under TSCA (see 711.35 and 720.40). This proposed rule would require submitters to use EPA's CDX, the Agency's electronic reporting portal, and EPA's Chemical Information Submission System (CISS), a web-based reporting tool, for all reporting under this proposed rule in accordance with section 3.2000 of 40 CFR part 3 (CROMERR) (Ref. 3).

This proposed rule would require persons submitting notices of activity to EPA under TSCA section 8(b) to follow these same electronic reporting procedures used for other TSCA submissions, *i.e.*, to register with EPA's CDX and use CISS to prepare a data file for submission. Registration in CDX

enables CDX to authenticate identity and verify authorization. To register, the CDX registrant (also referred to as “Electronic Signature Holder” or “Public/Private Key Holder”) agrees to the Terms and Conditions, provides information about the submitter and organization, and selects a user name and password. Users who have previously registered with CDX for other submissions would be able to add the “Submission for Chemical Safety and Pesticide Program” service to their current registration in CDX and use the CISS web-based reporting tool.

EPA developed the Chemical Information Submission System (CISS) for use in submitting data electronically under TSCA sections 4, 5, 8(a), and 8(d) to the Agency. The tool is available for use with Windows, Macs, Linux, and UNIX based computers and uses “Extensible Markup Language” (XML) specifications for efficient data transmission across the Internet. CISS works with CDX to secure online communication and provides user-friendly navigation. The NOA forms described in this proposed rule will be included in an e-NOA software module in CISS. Once a user completes entry of the relevant data fields and metadata information in the appropriate NOA form, the CISS reporting tool validates the submission by performing a basic error check. CISS also allows the user to choose “Preview,” “Save,” or “Submit.” When “Submit” is selected, the user is asked to provide the user name and password that was created during the CDX registration process. CISS then submits the data via CDX. Upon successful receipt of the submission by EPA, the status of the submissions will be flagged as “Submitted.” The user can also login to the application and download their Copy of Record.

EPA believes that electronic reporting reduces the reporting burden for submitters by reducing the cost and time required to review, edit, and transmit data to the Agency. It also allows submitters to share a draft submission within their organization and more easily save a copy for their records or future use. The resource and time requirements to review, process, store, and retrieve data by the Agency would also be reduced.

Any person submitting a reporting form could claim any part or all of the form as confidential. Except as otherwise provided in this proposed rule, any information that is claimed as confidential would be disclosed by EPA only to the extent and by the means of the procedures set forth in 40 CFR part 2.

E. How would CBI claims and requests be handled?

Notices pursuant to this rulemaking may contain two different types of CBI assertions: Claims for protection of information other than specific chemical identity, and requests to maintain existing claims for protection of specific chemical identity.

1. *Information other than specific chemical identity.* For all new claims for protection (*i.e.*, for all CBI assertions under this rule other than requests to maintain existing claims for protection of specific chemical identity), TSCA section 14(c)(1)(B) and 14(c)(5) require that persons claiming CBI must provide a specific, certification statement regarding the basis for the CBI claims. In addition, this proposed rule would require that all such claims be substantiated at the time of submission, except for claims for information exempted from substantiation under section 14(c)(2). In view of the rapid EPA review of claims required by section 14(g)(1), and in order to reduce the likelihood of unwarranted claims, EPA believes that a concurrent substantiation is required. EPA will review a representative subset of these claims as specified by section 14(g)(1).

2. *Requests to maintain existing CBI claims for chemical identity.* Requests to maintain existing CBI claims for specific chemical identity on Form A are governed in part by TSCA sections 8(b)(4)(C–E). TSCA section 8(b)(4)(C), in particular, requires EPA to issue a rule to establish a review plan for these requests. That review plan must specify a time when the Form A CBI requests for specific chemical identity are to be substantiated. EPA will be conducting a separate rulemaking to establish this review plan. Therefore, this proposal does not include mandatory substantiation requirements for Form A CBI requests for chemical identity. Mandatory substantiation requirements will be part of the review plan promulgated under section 8(b)(4)(C). However, the Agency proposes to allow companies to submit early substantiation at the same time that their Form A is filed, if they so choose. As long as the period between the date these earlier substantiations are received and the due date to be established in the review plan (yet to be proposed) is not more than five years, these early substantiations would exempt the company from the requirement to submit additional substantiation for their Form A under the terms of the review plan. See section 8(b)(4)(D)(i). EPA will review requests to maintain CBI claims for specific chemical identity

in accordance with the 8(b)(4)(D) review plan in the timeframe mandated by section 8(b)(4)(E).

Any manufacturer or processor submitting an active chemical notification under TSCA section 8(b)(4)(A) may seek to maintain an existing CBI claim for specific chemical identity, regardless of whether that person asserted the original claim that caused the specific chemical identity to be treated as confidential. EPA believes this is the correct interpretation of “a manufacturer or processor . . . that seeks to maintain an existing claim for protection of against disclosure” of specific chemical identity. A number of manufacturers and processors may legitimately benefit from the confidential status of a specific chemical identity, and the initial claimant may no longer exist. EPA does not believe that Congress intended for specific confidential chemical identities to be disclosed without providing the opportunity for manufacturers and processors to make a request that the identities should remain confidential simply because the original claimants no longer manufacture the chemical substances.

Pursuant to TSCA section 8(b)(4)(B)(iv), EPA would move an active chemical substance from the confidential portion of the Inventory to the non-confidential portion if no manufacturer or processor submitting an active chemical notification under TSCA section 8(b)(4)(A) requests to maintain the existing CBI claim for the specific identity of that chemical substance. See proposed 710.37(a).

Requests to maintain existing CBI claims for specific chemical identity on Form B are governed by TSCA section 8(b)(5)(B), which provides that the request to maintain the claim must be substantiated not later than 30 days after submitting Form B. See section 8(b)(5)(B)(ii)(II). Proposed substantiation requirements for Form B CBI claims for chemical identity are found in section 710.37(a)(1)(ii).

Although TSCA section 8(b)(5) provides that substantiation for requests to maintain existing CBI claims for specific chemical identity must be provided not later than 30 days after submitting a Form B, persons submitting a Form B may find it more efficient to simply provide the substantiation for a CBI claim for specific chemical identity at the time of filing. Section 8(b)(5)(iii)(II) provides that the Agency shall “promptly” review CBI claims for specific chemical identity in Form B. The Agency intends to review these claims within 90 days of receipt of the substantiation.

IV. Request for Comments

EPA is seeking public comment on all aspects of this proposed rule, including specific issues throughout this document, as well as other issues discussed in this Unit.

A. Considerations for the Agency's Economic Impact Analysis

EPA has evaluated the potential costs for manufacturers and processors of chemical substances reportable under this proposed rule (Ref. 1). EPA is specifically seeking additional information and data that the Agency could consider in developing the final economic analysis. In particular, EPA is seeking data that could facilitate the Agency's further evaluation of the potentially affected industry and firms, including data related to potential impacts for those small businesses that would be subject to reporting.

B. Electronic Reporting

Requiring electronic reporting under this proposed rule that is similar to those established in 2013 for other TSCA reporting, EPA expects to save time, improve data quality, and provide efficiencies for both submitters and the Agency. EPA is specifically interested in comments related to the adoption of the existing mechanisms and procedures for use in transmitting the notices proposed in this rule, including comments related to the extent to which potential reporting entities are already familiar with these mechanisms and procedures because of their existing use for other TSCA reporting. EPA is also interested in feedback on how electronic reporting affects potential reporting entities in terms of reporting time, reporting efficiency, and potential burden associated with training to use the electronic systems (*i.e.*, CDX and CISS).

V. References

The following is a listing of the documents that are specifically referenced in this proposed rule. The docket includes these references and other information considered by EPA. VI. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at <http://www2.epa.gov/laws-regulations/laws-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action that was submitted to the Office of Management and Budget (OMB) for review under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011).

B. Paperwork Reduction Act (PRA)

The information collection activities associated with this proposed rule have been submitted to OMB for review and approval under the PRA, 44 U.S.C. 3501 *et seq.* Specifically, EPA has prepared an Information Collection Request (ICR) to estimate the potential burden and costs associated with the proposed requirements (Ref. 9). The ICR, which is available in the docket, has been assigned the EPA ICR No. 2517.01 (OMB Control No. 2070-[new]). You can find a copy of the ICR in the docket for this proposed rule (Ref. 9), and it is briefly summarized here.

Start-Up Year Burden/Cost (Retrospective). Covers respondents/affected entities, *i.e.*, persons who manufacture chemical substances.
Respondents' obligation to respond: Mandatory.
Estimated number of respondents: 4,692.

Frequency of response: Once and on occasion.

Estimated burden: 86,783 hours. The term "burden" is defined at 5 CFR 1320.3(b).

Estimated cost: \$6.68 million.

Note that an additional number of respondents (*i.e.*, processors), as high as 161,550, are each assumed to undergo four hours of rule familiarization (about \$300 per firm), but would likely not be required to submit information. This is based on an assumption that 100 percent of processor firms would undertake rule familiarization. However, EPA believes that it is unlikely that 100% of processors would initiate rule familiarization and that the actual percentage would be lower. Although this count, and the associated burden and costs, are not included in the estimates, the estimated burden and costs account for the bulk of total start-up costs (88%). In addition, the estimated burden and costs includes 469 CDX registrations in addition to NOA submissions.

Ongoing Annual Burden/Cost (Forward-looking): Covers respondents/affected entities, *i.e.*, persons who manufacture or process chemical substances.

Respondents' obligation to respond: Mandatory.

Estimated number of respondents: 20.

Frequency of response: On occasion.

Total estimated burden: 142 hours.

Total estimated cost: \$10,790.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and included on any related collection instrument (*e.g.*, the form).

Submit your comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to EPA using the docket identified at the beginning of this proposed rule. You may also send your ICR-related comments to OMB's Office of Information and Regulatory Affairs via email to OIRA_submission@omb.eop.gov, Attention: Desk Officer for EPA. Since OMB is required to make a decision concerning the ICR between 30 and 60 days after receipt, OMB must receive comments no later than February 13, 2017. EPA will respond to any ICR-related comments in the final rule.

C. Regulatory Flexibility Act (RFA)

EPA certifies under section 605(b) of the RFA, 5 U.S.C. 601 *et seq.*, that this action will not have a significant economic impact on a substantial number of small entities under the RFA. In making this determination, the impact of concern is any significant adverse economic impact on small entities. An agency may certify that a rule would not have a significant economic impact on a substantial number of small entities if the rule has a very small level of impact on the small entities subject to the rule.

The small entities subject to the requirements of this action are manufacturers, and processors of chemical substances. As the most burdensome conditions are incurred during the start-up year for manufacturers, these reporters are the subject of the quantitative analysis with other reporters and other years assessed by inference. The detailed analysis is available in the docket (Ref. 10).

The quantitative analysis addresses the “most affected” subset of entities who are expected to incur the highest typical burden under the proposed rule as entities manufacturing (or importing) chemicals that must submit NOAs involving an average of seven chemicals per entity in the start-up year. These small entities most directly regulated by this rule are small businesses in NAICS 325: Chemical Manufacturing, and 324: Petroleum and Coal Products Manufacturing reporting during the start-up year. EPA has determined that all of the small entities (comprising about 96% of the total number of entities) within the scope of the quantitative analysis would experience an impact of less than 1% of revenues. This analysis follows EPA guidance on Regulatory Flexibility Act (RFA) and Small Business Regulatory Enforcement Fairness Act (SBREFA) analyses. Per this guidance document, the preferred measure of economic impacts is the “sales test:” Annualized compliance costs as a percentage of sales (or revenue or receipts when sales data are not readily available). This measure is termed “cost impact percentage” in the small entity analysis.

Additional groups of small entities may be affected by the rule and are expected to incur similar or lesser impacts, by inference. First, processors submitting NOAs during the start-up year are expected to incur a smaller unit burden with one chemical per NOA, and therefore experience similar or lesser impacts than manufacturers. Secondly, all reporters in future years, with lower counts and relatively smaller

unit burdens, would therefore incur much lower impact than entities during the start-up year. Therefore, inferences drawn regarding small entity impacts on the most affected group may be extended to characterize the impacts on processors during the start-up year and all entities for future years.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action is not expected to impose enforceable duty on any state, local or tribal governments, and the requirements imposed on the private sector are not expected to result in annual expenditures of \$100 million or more for the private sector. As such, EPA has determined that the requirements of UMRA sections 202, 203, 204, or 205 do not apply to this action.

E. Executive Order 13132: Federalism

This action does not have federalism implications because it would not have any effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999).

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications because it is not expected to have any effect on tribal governments, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000).

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets Executive Order 13045 (62 FR 19885, April 23, 1997), as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of Executive Order 13045 has the potential to influence the regulation. This action is not subject to Executive Order 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not a “significant energy action” as defined in Executive Order 13211 (66 FR 28355, May 22, 2001), because it is not likely to have a significant adverse effect on energy supply, distribution, or use.

I. National Technology Transfer and Advancement Act (NTTAA)

Since this action does not involve any technical standards, NTTAA section 12(d), 15 U.S.C. 272 note, does not apply to this action.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

This action does not entail special considerations of environmental justice related issues as delineated by Executive Order 12898 (59 FR 7629, February 16, 1994), because EPA has determined that this action would not have disproportionately high and adverse human health or environmental effects on minority or low-income populations. This action does not affect the level of protection provided to human health or the environment.

List of Subjects in 40 CFR Part 710

Environmental protection, Chemicals, Reporting and Recordkeeping, TSCA Inventory.

Dated: December 23, 2016.

James J. Jones,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

Therefore, it is proposed that 40 CFR chapter I be amended as follows:

PART 710—[AMENDED]

■ 1. The authority citation for part 710 would continue to read as follows:

Authority: 15 U.S.C. 2607(a).

■ 2. Redesignate §§ 710.1 through 710.4 as subpart A under the following subpart A heading:

PART 710—COMPILATION OF THE TSCA CHEMICAL SUBSTANCE INVENTORY

Subpart A—General Provisions

Sec.

710.1 Scope and compliance.

710.3 Definitions.

710.4 Scope of the Inventory.

Subpart B—Commercial Activity Notification

710.23 Definitions.

- 710.25 Persons subject to the notification requirement.
 710.27 Activities for which notification is not required.
 710.29 Information required in the notification.
 710.30 When to submit notifications.
 710.33 Co-manufacturers and co-processors.
 710.35 Recordkeeping requirements.
 710.37 Confidentiality claims.
 710.39 Electronic filing.

* * * * *

■ 3. Revise § 710.1 paragraph (b) to read as follows:

Subpart A—General Provisions

§ 710.1 Scope and compliance.

* * * * *

(b) This part applies to the activities associated with the compilation of the TSCA Chemical Substance Inventory (TSCA Inventory) and the designation of chemical substances on the TSCA Inventory as active or inactive in U.S. commerce.

* * * * *

■ 4. Revise § 710.3 paragraph (d) to read as follows:

§ 710.3 Definitions.

* * * * *

(d) The following definitions also apply to this part:

Act means the Toxic Substances Control Act, 15 U.S.C. 2601 *et seq.*

Administrator means the Administrator of the U.S. Environmental Protection Agency, any employee or authorized representative of the Agency to whom the Administrator may either herein or by order delegate his/her authority to carry out his/her functions, or any other person who will by operation of law be authorized to carry out such functions.

Article means a manufactured item (1) which is formed to a specific shape or design during manufacture, (2) which has end use function(s) dependent in whole or in part upon its shape or design during end use, and (3) which has either no change of chemical composition during its end use or only those changes of composition which have no commercial purpose separate from that of the article and that may occur as described in § 710.4(d)(5); except that fluids and particles are not considered articles regardless of shape or design.

Byproduct means a chemical substance produced without a separate commercial intent during the manufacture, processing, use, or disposal of another chemical substance(s) or mixture(s).

CASRN means Chemical Abstracts Service Registry Number.

Chemical substance means any organic or inorganic substance of a

particular molecular identity, including any combination of such substances occurring in whole or in part as a result of a chemical reaction or occurring in nature, and any chemical element or uncombined radical; except that “chemical substance” does *not* include: (1) Any mixture; (2) any pesticide when manufactured, processed, or distributed in commerce for use as a pesticide; (3) tobacco or any tobacco product, but not including any derivative products; (4) any source material, special nuclear material, or byproduct material; (5) any pistol, firearm, revolver, shells, and cartridges; and (6) any food, food additive, drug, cosmetic, or device, when manufactured, processed, or distributed in commerce for use as a food, food additive, drug, cosmetic, or device.

Commerce means trade, traffic, transportation, or other commerce (1) between a place in a State and any place outside of such State or (2) which affects trade, traffic, transportation, or commerce between a place in a State and any place outside of such State.

Customs territory of the United States means the 50 States, Puerto Rico, and the District of Columbia.

Distribute in commerce and distribution in commerce means to sell in commerce, to introduce or deliver for introduction into commerce, or to hold after its introduction into commerce.

Domestic means within the geographical boundaries of the 50 United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, and any other territory or possession of the United States.

EPA means the U.S. Environmental Protection Agency.

Importer means any person who imports any chemical substance, including a chemical substance as part of a mixture or article, into the customs territory of the United States. “Importer” includes the person primarily liable for the payment of any duties on the merchandise or an authorized agent acting on his or her behalf. The term also includes, as appropriate, (1) the consignee, (2) the importer of record, (3) the actual owner if an actual owner’s declaration and superseding bond has been filed in accordance with 19 CFR 141.20, or (4) the transferee, if the right to draw merchandise in a bonded warehouse has been transferred in accordance with subpart C of 19 CFR 144.

Impurity means a chemical substance which is unintentionally present with another chemical substance.

Intermediate means any chemical substance that is consumed, in whole or in part, in chemical reaction(s) used for the intentional manufacture of other chemical substance(s) or mixture(s), or that is intentionally present for the purpose of altering the rate(s) of such chemical reaction(s).

Inventory means the TSCA Chemical Substance Inventory, which is EPA’s comprehensive list of confidential and non-confidential chemical substances manufactured or processed in the United States for non-exempt commercial purpose that EPA compiled and keeps current under section 8(b) of the Act.

Manufacture means to manufacture, produce, or import, for commercial purposes. Manufacture includes the extraction, for commercial purposes, of a component chemical substance from a previously existing chemical substance or complex combination of chemical substances. When a chemical substance, manufactured other than by import, is: (1) Produced exclusively for another person who contracts for such production, and (2) that other person specifies the identity of the chemical substance and controls the total amount produced and the basic technology for the plant process, then that chemical substance is co-manufactured by the producing manufacturer and the person contracting for such production.

Manufacture for commercial purposes means: (1) To manufacture, produce, or import with the purpose of obtaining an immediate or eventual commercial advantage, and includes, among other things, the “manufacture” of any amount of a chemical substance or mixture (i) for commercial distribution, including for test marketing, or (ii) for use by the manufacturer, including use for product research and development or as an intermediate. (2) The term also applies to substances that are produced coincidentally during the manufacture, processing, use, or disposal of another substance or mixture, including byproducts that are separated from that other substance or mixture and impurities that remain in that substance or mixture. Byproducts and impurities without separate commercial value are nonetheless produced for the purpose of obtaining a commercial advantage, since they are part of the manufacture of a chemical substance for commercial purposes.

Manufacturer means a person who manufactures a chemical substance.

Mixture means any combination of two or more chemical substances if the combination does not occur in nature and is not, in whole or in part, the result of a chemical reaction; except that

“mixture” does include (1) any combination which occurs, in whole or in part, as a result of a chemical reaction if the combination could have been manufactured for commercial purposes without a chemical reaction at the time the chemical substances comprising the combination were combined, and if all of the chemical substances comprising the combination are not new chemical substances, and (2) hydrates of a chemical substance or hydrated ions formed by association of a chemical substance with water, so long as the nonhydrated form is itself not a new chemical substance.

New chemical substance means any chemical substance which is not included on the Inventory.

Person includes any individual, firm, company, corporation, joint-venture, partnership, sole proprietorship, association, or any other business entity; any State or political subdivision thereof; any municipality; any interstate body; and any department, agency, or instrumentality of the Federal Government.

Process means to process for commercial purposes. Process includes the preparation of a chemical substance or mixture, after its manufacture, (1) in the same form or physical state as, or in a different form or physical state from, that in which it was received by the person so preparing such substance or mixture, or (2) as part of a mixture or article containing the chemical substance or mixture.

Process for commercial purposes means the preparation of a chemical substance or mixture after its manufacture for distribution in commerce with the purpose of obtaining an immediate or eventual commercial advantage for the processor. Processing of any amount of a chemical substance or mixture is included in this definition. If a chemical substance or mixture containing impurities is processed for commercial purposes, then the impurities also are processed for commercial purposes.

Processor means any person who processes a chemical substance or mixture.

Site means a contiguous property unit. Property divided only by a public right-of-way will be considered one site. More than one manufacturing plant may be located on a single site. (1) For chemical substances manufactured under contract, *i.e.*, by a toll manufacturer, the site is the location where the chemical substance is physically manufactured. (2) The site for an importer who imports a chemical substance described in § 710.25 is the U.S. site of the operating unit within the

person’s organization that is directly responsible for importing the chemical substance. The import site, in some cases, may be the organization’s headquarters in the United States. If there is no such operating unit or headquarters in the United States, the site address for the importer is the U.S. address of an agent acting on behalf of the importer who is authorized to accept service of process for the importer.

Small quantities solely for research and development (or “small quantities solely for purposes of scientific experimentation or analysis or chemical research on, or analysis of, such substance or another substance, including such research or analysis for the development of a product”) means quantities of a chemical substance manufactured, imported, or processed or proposed to be manufactured, imported, or processed solely for research and development that are not greater than reasonably necessary for such purposes.

State means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, or any other territory or possession of the United States.

Technically qualified individual means a person (1) who because of his/her education, training, or experience, or a combination of these factors, is capable of appreciating the health and environmental risks associated with the chemical substance which is used under his/her supervision, (2) who is responsible for enforcing appropriate methods of conducting scientific experimentation, analysis, or chemical research in order to minimize such risks, and (3) who is responsible for the safety assessments and clearances related to the procurement, storage, use, and disposal of the chemical substance as may be appropriate or required within the scope of conducting the research and development activity. The responsibilities in this paragraph may be delegated to another individual, or other individuals, as long as each meets the criteria in paragraph (1) of this definition.

Test marketing means the distribution in commerce of no more than a predetermined amount of a chemical substance, mixture, or article containing that chemical substance or mixture, by a manufacturer or processor to no more than a defined number of potential customers to explore market capability in a competitive situation during a predetermined testing period prior to the broader distribution of that chemical

substance, mixture, or article in commerce.

United States, when used in the geographic sense, means all of the States, territories, and possessions of the United States.

■ 5. Add a new subpart B to read as follows:

Subpart B—Commercial Activity Notification

§ 710.23 Definitions.

The following definitions also apply to subpart B of this part.

Active substance means any interim active substance, any naturally occurring chemical substance as defined by § 710.27(b), any substance added to the TSCA Inventory on or after June 22, 2016, and any chemical substance subject to commercial activity designation that the Administrator designated as active based on the receipt of a notice under this subpart.

Central Data Exchange or CDX means EPA’s centralized electronic document reporting portal, or its successors.

Chemical substance subject to commercial activity designation means a chemical substance that requires a designation as either an active or an inactive substance. A chemical substance is subject to commercial activity designation if it was added to the TSCA Inventory before June 22, 2016, it is not an interim active substance, it is not a naturally occurring chemical substance as defined by § 710.27(b), and it has not yet been designated by the Administrator as either an active or an inactive substance.

Chemical Information Submission System or CISS means EPA’s web-based reporting tool for preparing and submitting a Notice of Activity.

e-NOA means EPA’s software module within CISS for generating and completing Notice of Activity forms A and B.

Existing claim for protection of specific chemical identity against disclosure is a claim to continue protection of specific chemical identity of a chemical substance that is listed on the confidential portion of the TSCA Inventory.

Inactive substance means any chemical substance subject to commercial activity designation, that the Administrator designates as inactive based on the lack of receipt of a notice under this subpart.

Interim active substance means any chemical substance that was reported, pursuant to 40 CFR part 711, as having been manufactured in either 2010 or 2011. After such time when EPA has made public a compiled list of chemical

substances that were reported, pursuant to 40 CFR part 711, as having been manufactured in either 2012, 2013, 2014, or 2015, the term shall also include any such additional chemical substances that were there reported as having been manufactured in those additional years.

Known to or reasonably ascertainable by means all information in a person's possession or control, plus all information that a reasonable person similarly situated might be expected to possess, control, or know.

Lookback period means the period beginning on June 21, 2006 and ending on June 21, 2016.

Reportable chemical substance means a chemical substance that is listed on the TSCA Inventory and that is either: (1) A chemical substance subject to commercial activity designation for which notification is required or allowed under § 710.25(a) and § 710.25(b), (2) an interim active substance for which notification is required under § 710.25(a), or (3) an inactive substance for which notification is required under § 710.25(c).

Submission period means the applicable period for submitting a Notice of Activity under § 710.25.

§ 710.25 Persons subject to the notification requirement.

The following persons are subject to the requirements of this subpart.

(a) *Who must submit the Notice of Activity Form A?* Any person who manufactured a chemical substance subject to commercial activity designation or who manufactured an interim active substance that is on the confidential portion of the TSCA Inventory, at any time during the lookback period, except as provided in § 710.27, must submit a Notice of Activity Form A as specified under § 710.29 and § 710.30.

(b) *Who else may submit the Notice of Activity Form A?* Any person who processed a chemical substance subject to commercial activity designation, at any time during the lookback period, except as provided in § 710.27, may submit a Notice of Activity Form A as specified under § 710.29 and § 710.30.

(c) *Who must submit the Notice of Activity Form B?* Any person who intends to manufacture or process an inactive chemical substance, except as provided in § 710.27, after the effective date of the Administrator's designation of such chemical substance as an inactive substance, must submit a Notice of Activity Form B as specified under § 710.29 and § 710.30.

§ 710.27 Activities for which notification is not required.

(a) *In general.* The following activities do not trigger notification requirements under this subpart:

(1) The manufacturing or processing of a chemical substance solely in small quantities for research and development.

(2) The import of a chemical substance as part of an article.

(3) The manufacturing or processing of a chemical substance as described in § 720.30(g) or (h).

(b) *Manufacturing or processing naturally occurring chemical substances.* The following activities do not trigger notification requirements under this subpart:

(1) The manufacture of a naturally occurring chemical substance, as described in § 710.4(b). Some chemical substances can be manufactured both as described in § 710.4(b) and by means other than those described in § 710.4(b). If a person manufactures a chemical substance by means other than those described in § 710.4(b), this exemption is inapplicable, regardless of whether the chemical substance also could have been produced as described in § 710.4(b). This exemption does not cover the manufacture of a chemical substance from a naturally occurring chemical substance.

(2) The processing of a naturally occurring chemical substance only by manual, mechanical, or gravitational means; by dissolution in water; by flotation; or by heating solely to remove water.

§ 710.29 Information required in the notification.

(a) *Reporting information to EPA.* Any person who reports information to EPA, including post-notification substantiation of confidentiality claims under § 710.37(b), must do so using the e-NOA software module, the CISS reporting tool, and the CDX electronic reporting portal provided by EPA at the addresses set forth in § 710.39. For notices of activity under § 710.25(a) and § 710.25(b), the submission must include all information described in paragraph (b) of this section. For a Notice of Activity under § 710.25(c), the submission must include all information described in paragraph (c) of this section. A person must submit a separate form for each chemical substance that the person is required to report. CDX, CISS, and e-NOA allow a person to report multiple chemical substances in one session that will be transmitted to EPA on separate forms. Using e-NOA and registering in CDX are described in instructions available from

EPA at the Web sites set forth in § 710.39.

(b) *Information to be reported on the Notice of Activity Form A.* Any person submitting a Notice of Activity Form A under § 710.25(a) or § 710.25(b) must submit the information described in this paragraph for each reportable chemical substance during the submission period specified in § 710.30(a). A person submitting information under § 710.25(a) or § 710.25(b) must report information to the extent that such information is known to or reasonably ascertainable by that person. A notice must be submitted for each chemical substance for which the person is required to report. A person reporting information under § 710.25(a) or § 710.25(b) must report the following:

(1) Information specified in § 710.29(d).

(2) The type of commercial activity for each reportable chemical substance: Whether the chemical substance was domestically manufactured in the United States, imported into the United States, or both domestically manufactured in the United States and imported into the United States during the lookback period.

(3) The first date and the last date that each reportable chemical substance was domestically manufactured in the United States, imported into the United States, or both domestically manufactured in the United States and imported into the United States during the lookback period.

(c) *Information to be reported on a Notice of Activity Form B.* Any person submitting a Notice of Activity Form B under § 710.25(c) must provide the information described in this paragraph for each inactive chemical substance intended to be manufactured or processed at the time specified in § 710.30(b). A person submitting information under § 710.25(c) must report information to the extent that such information is known to or reasonably ascertainable by that person. A notice must be submitted for each chemical substance that the person intends to manufacture or process. A person submitting a notice of activity under § 710.25(c) must report the following:

(1) Information specified in § 710.29(d).

(2) The type of intended commercial activity for the inactive substance: Whether the inactive substance is intended to be domestically manufactured in the United States, imported into the United States, processed in the United States, or a particular combination of these.

(3) The actual date by which the inactive substance is to be domestically manufactured in the United States, imported into the United States, or processed in the United States.

(d) *Information to be reported on either the Notice of Activity Form A or Form B.*

(1) *Company.* The name of the submitting company.

(2) *Authorized official.* The name and address of the authorized official for the submitting company.

(3) *Technical contact.* The name and telephone number of a person who will serve as technical contact for the submitting company and who will be able to answer questions about the information submitted by the company to EPA.

(4) *Chemical-specific information.* The correct CA Index name as used to list the chemical substance on the Inventory and the correct corresponding CASRN must be submitted for each reportable chemical substance. Persons who wish to report chemical substances listed on the confidential portion of the TSCA Inventory must report the chemical substances using a TSCA Accession Number and generic name.

(i) If an importer submitting a notice cannot provide the information specified in § 710.29(d)(4) because it is unknown to the importer and claimed as confidential by the supplier of the chemical substance or mixture, the importer must ask the supplier to provide the specific chemical identity information directly to EPA in a joint submission using the same e-NOA software module used for commercial activity reporting. Such request must include instructions for submitting chemical identity information electronically, using e-NOA, CISS, and CDX (see § 710.39), and for clearly referencing the importer's submission. Contact information for the supplier, a trade name or other name for the chemical substance or mixture, and a copy of the request to the supplier must be included with the importer's submission with respect to the chemical substance.

(ii) If a manufacturer or processor submitting a notice cannot provide the information specified in § 710.29(d)(4) because the reportable chemical substance is manufactured or processed using a reactant having a specific chemical identity that is unknown to the manufacturer or processor and claimed as confidential by its supplier, the manufacturer or processor must ask the supplier of the confidential reactant to provide the specific chemical identity of the confidential reactant directly to EPA in a joint submission using the

same e-NOA software module used for commercial activity reporting. Such request must include instructions for submitting chemical identity information electronically using e-NOA, CISS, and CDX (see § 710.39), and for clearly referencing the manufacturer's or processor's submission. Contact information for the supplier, a trade name or other name for the chemical substance, and a copy of the request to the supplier must be included with the manufacturer's or processor's submission with respect to the chemical substance.

(iii) EPA will only accept joint submissions that are submitted electronically using e-NOA, CISS, and CDX (see § 710.39) and that clearly reference the primary submission to which they refer.

(5) *Certification statement.* The authorized official must certify that the submitted information has been completed in compliance with the requirements of this part and that the confidentiality claims made on the form are true and correct using the certification statement in this paragraph.

(i) The certification must be signed and dated by the authorized official for the submitting company.

(ii) The following is the required certification language:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision and the information contained therein, to the best of my knowledge is, true, accurate, and complete. I am aware there are significant penalties for submitting incomplete, false and/or misleading information, including the possibility of fine and imprisonment for knowing violations."

§ 710.30 When to submit notifications.

(a) *When must a Notice of Activity Form A be submitted?* The Notice of Activity Form A required to be submitted under § 710.25(a) must be submitted during the applicable submission period.

(1) *Manufacturers.* The submission period for manufacturers under § 710.25(a) begins on [date on which the final rule is published in the **Federal Register**] and ends on [180 days after the date on which the final rule is published in the **Federal Register**].

(2) *Processors.* The submission period for processors under § 710.25(b) begins on [date on which the final rule is published in the **Federal Register**] and ends on [360 days after the date on which the final rule is published in the **Federal Register**].

(b) *When must a Notice of Activity Form B be submitted?* The Notice of Activity Form B required to be submitted under § 710.25(c) must be submitted before a person manufactures or processes the inactive substance, but not more than 30 days prior to the actual date of manufacturing or processing.

§ 710.33 Co-manufacturers and co-processors.

(a) *Notice of Activity submitted by co-manufacturers.* When, in a single instance of manufacturing or importing a particular volume of a chemical substance during the lookback period, two or more persons qualify as the manufacturer or importer of that volume, they may determine among themselves who should make the required submission under § 710.25(a). If no notice is submitted as required under this subpart, EPA will hold each such person liable for failure to submit a notice.

(b) *Notice of activity by prospective co-manufacturers or co-processors.* If two or more persons intend to manufacture, import, or process a particular volume of an inactive substance, such that multiple persons would qualify as the manufacturer, importer, or processor of that volume, they may determine among themselves who will submit the required notice under § 710.25(c). If no notice is submitted as required under this subpart, all of the persons remain subject to the reporting requirements, and EPA will hold each such person liable for a failure to submit a notice prior to the date of manufacturing, importing, or processing.

§ 710.35 Recordkeeping requirements.

Each person who is subject to the notification requirements of this part must retain records that document any information reported to EPA. Records relevant to a notice of activity under § 710.25(a) and § 710.25(b) must be retained for a period of 5 years beginning on the last day of the submission period. Records relevant to a notice of activity under § 710.25(c) must be retained for a period of 5 years beginning on the day that the notice was submitted.

§ 710.37 Confidentiality claims.

(a) *Chemical identity.* Any persons submitting information under this part may request to maintain an existing claim of confidentiality for the specific chemical identity of a reportable chemical substance only if the identity of the chemical substance is listed on the confidential portion of the TSCA

Inventory as of the time the notice is submitted for that chemical substance under this part. Any such requests to maintain an existing claim of confidentiality must be made at the time the information is submitted. If no person submitting the information specified in § 710.29(d)(4) for a particular chemical substance requests that the claim be maintained, EPA will treat the specific chemical identity of that chemical substance as not subject to a confidentiality claim and will move the chemical substance to the public portion of the TSCA Inventory. Except as set forth in this subsection, information claimed as confidential in accordance with this section will be treated and disclosed in accordance with the procedures in 40 CFR part 2. The following steps must be taken to maintain an existing claim of confidentiality for the specific chemical identity of a reportable chemical substance.

(1) *Substantiation of requests.*

(i) *Notice of Activity Form A.* A person requesting to maintain an existing claim of confidentiality for specific chemical identity may submit with the notice detailed written answers to the questions in paragraph (1)(iii) of this section, signed and dated by an authorized official. If these early answers are received less than five years before the date on which substantiation is due pursuant to TSCA Section 8(b)(4)(D)(i) the early answers will be deemed to be substantiations made under TSCA Section (8)(b)(4)(D)(i) and the person will be exempt from further substantiation requirements under Section (8)(b)(4)(D)(i). Early answers that do not include the answers to questions in paragraph (1)(iii) of this section will not be deemed to be substantiations made under the TSCA section (8)(b)(4)(D)(i) requirement.

(ii) *Notice of Activity Form B.* A person requesting to maintain an existing claim of confidentiality for specific chemical identity must submit detailed written answers to the questions in paragraph (1)(iii) of this section within 30 days of submitting the notice, signed and dated by an authorized official. If this information is not submitted within 30 days of submitting the notice, EPA will consider the specific chemical identity as not subject to a confidentiality claim and may make the information public without further notice.

(iii) *Substantiation questions.*

(A) What harmful effects to your competitive position, if any, or to your supplier's competitive position, do you think would result from the identity of the chemical substance being disclosed

in connection with reporting under this part? How could a competitor use such information? Would the effects of disclosure be substantial? What is the causal relationship between the disclosure and the harmful effects?

(B) How long should confidential treatment be given? Until a specific date, the occurrence of a specific event, or permanently? Why?

(C) Has the chemical substance been patented? If so, have you granted licenses to others with respect to the patent as it applies to the chemical substance? If the chemical substance has been patented and therefore disclosed through the patent, why should it be treated as confidential?

(D) Has the identity of the chemical substance been kept confidential to the extent that your competitors do not know it is being manufactured for a commercial purpose by anyone?

(E) Is the fact that the chemical substance is being manufactured for a commercial purpose available to the public, for example in technical journals, libraries, or State, local, or Federal agency public files?

(F) What measures have been taken to prevent undesired disclosure of the fact that the chemical substance is being manufactured for a commercial purpose?

(G) To what extent has the fact that this chemical substance is manufactured for commercial purposes been revealed to others? What precautions have been taken regarding these disclosures? Have there been public disclosures or disclosures to competitors?

(H) Does this particular chemical substance leave the site of manufacture in any form, e.g., as product, effluent, emission? If so, what measures have been taken to guard against the discovery of its identity?

(I) If the chemical substance leaves the site in a product that is available to the public or your competitors, can the chemical substance be identified by analysis of the product?

(J) For what purpose do you manufacture the chemical substance?

(K) Has EPA, another Federal agency, or any Federal court made any pertinent confidentiality determinations regarding this chemical substance? If so, please attach copies of such determinations.

(2) *Identification of claims.* If any of the information contained in the answers to the questions listed in paragraph (a)(1)(iii) of this section is asserted to be confidential, the submitter must clearly identify the information that is claimed as confidential by marking the specific information on each page with a label such as "confidential business

information," "proprietary," or "trade secret."

(b) *Information other than specific chemical identity.* Any persons submitting information under this part may assert a claim of confidentiality for information other than specific chemical identity. Any such confidentiality claims must be made at the time the information is submitted. Confidentiality claims will apply only to the information submitted with the claim. Confidentiality claims cannot be made when a response field on a reporting form is left blank or designated as not known or reasonably ascertainable. Except as set forth in this section, information claimed as confidential in accordance with this subsection will be treated and disclosed in accordance with 40 CFR part 2. The following steps must be taken to assert a claim of confidentiality for information other than specific chemical identity. If no claim is asserted at the time the information is submitted, or if the following steps are not taken, EPA will consider the information as not subject to a confidentiality claim and may make the information public without further notice.

(1) *Substantiation of claims.* A person asserting a claim of confidentiality for information other than specific chemical identity must submit detailed written answers to the following questions at the time of submission, signed and dated by an authorized official.

(i) For what period of time do you request that the information be maintained as confidential, e.g., until a certain date, until the occurrence of a specified event, or permanently? If the occurrence of a specific event will eliminate the need for confidentiality, please specify that event.

(ii) Information submitted to the EPA becomes stale over time. Why should the information you claim as confidential be protected for the time period specified in your answer to question #1?

(iii) What measures have you taken to protect the information claimed as confidential? Have you disclosed the information to anyone other than a governmental body or someone who is bound by an agreement not to disclose the information further? If so, why should the information be considered confidential?

(iv) Is the information contained in any publicly available material such as the Internet, publicly available databases, promotional publications, annual reports, or articles? If so, specify which.

(v) Is there any means by which a member of the public could obtain access to the information? Is the information of a kind that you would customarily not release to the public?

(vi) Has any governmental body made a determination as to the confidentiality of the information? If so, please attach a copy of the determination.

(vii) For each item or category of information claimed as confidential, *explain with specificity* why release of the information is likely to cause substantial harm to your competitive position. Explain the specific nature of those harmful effects, why they should be viewed as substantial, and the causal relationship between disclosure and such harmful effects. How could your competitors make use of this information to your detriment?

(viii) Do you assert that the information is submitted on a voluntary or a mandatory basis? Please explain the reason for your assertion. If you assert that the information is voluntarily submitted information, please explain whether the information is the kind that would customarily not be released to the public.

(ix) Whether you assert the information as voluntary or involuntary, please address why disclosure of the information would tend to lessen the availability to the EPA of similar information in the future.

(x) If you believe any information to be (a) trade secret(s), please so state and explain the reason for your belief. Please attach copies of those pages containing such information with brackets around the text that you claim to be (a) trade secret(s).

(xi) Explain any other issue you deem relevant.

(2) *Identification of claims.* If any of the information contained in the answers to the questions listed in paragraph (b)(1) of this section is asserted to be confidential, the submitter must clearly identify the information that is claimed as confidential by marking the specific information on each page with a label such as “confidential business information,” “proprietary,” or “trade secret.”

(3) *Certification statement for claims.* In submitting a claim of confidentiality, a person must certify the truth of the following four statements concerning all information which is claimed as confidential:

(i) My company has taken reasonable measures to protect the confidentiality of the information.

(ii) I have determined that the information is not required to be

disclosed or otherwise made available to the public under any other Federal law.

(iii) I have a reasonable basis to conclude that disclosure of the information is likely to cause substantial harm to the competitive position of the person.

(iv) I have a reasonable basis to believe that the information is not readily discoverable through reverse engineering.

§ 710.39 Electronic filing.

(a) EPA will accept information submitted under this subpart only if submitted in accordance with this section. All information must be submitted electronically to EPA via CDX. Prior to submission to EPA via CDX, Notices of Activity and any associated information must be generated and completed using the e-NOA software module.

(b) Obtain instructions for registering in CDX as follows:

(1) *Web site.* The CDX Registration User Guide is available at https://www.epa.gov/sites/production/files/documents/cdx_registration_guide_v0_02.pdf. To register in CDX, go to <https://cdx.epa.gov> and follow the appropriate links.

(2) *Telephone.* Contact the EPA CDX Help Desk at 1-888-890-1995.

(3) *Email.* Email the EPA CDX Help Desk at HelpDesk@epacdx.net.

(c) Obtain instructions for using the e-NOA software module as follows:

(1) *Web site.* Go to the EPA New Chemicals under the Toxic Substances Control Act Web site at <https://www.epa.gov/reviewing-new-chemicals-under-toxic-substances-control-act-tsca/how-submit-e-pmn> and follow the appropriate links.

(2) *Telephone.* Contact the EPA TSCA Hotline at 1-202-554-1404.

(3) *Email.* Email the EPA TSCA Hotline at TSCA-Hotline@epa.gov.

[FR Doc. 2016-31923 Filed 1-12-17; 8:45 am]

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[IB Docket No. 98-96; FCC 16-179]

1998 Biennial Regulatory Review—Review of Accounts Settlement in the Maritime Mobile and Maritime Mobile-Satellite Radio Services

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: In this document, the Federal Communications Commission

(Commission) proposes to withdraw as an accounting authority and transition its functions and duties to private accounting authorities. The Commission seeks comment on a transition plan and a timetable to implement an orderly transition to the privatization of the accounts-settlement function.

DATES: Comments due on or before March 14, 2017, and reply comments due on or before April 13, 2017.

ADDRESSES: You may submit comments, identified by IB Docket 98-96, by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Federal Communications Commission's Web site:* <http://www.fcc.gov/cgb/ecfs>. Follow the instructions for submitting comments.

- *People with Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: FCC504@fcc.gov or phone: 202-418-0530 or TTY: 202-418-0432.

- *Email:* ecfs@fcc.gov. Include IB Docket No. 98-96 in the subject line of the message.

- *Mail:* Commercial overnight mail (other than U.S. Postal Service Express Mail, and Priority Mail, must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743. U.S. Postal Service first-class, Express, and Priority mail should be addressed to 445 12th Street SW., Washington, DC 20554.

For detailed instructions for submitting comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT:

Dana Shaffer, Office of Managing Director at (202) 418-0832.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Second Further Notice of Proposed Rulemaking (*Second FNPRM*), FCC 16-179, IB Docket No. 98-96, adopted on December 22, 2016, and released on December 30, 2016. The full text of this document is available for inspection and copying during normal business hours in the FCC Reference Center, 445 12th Street SW., Room CY-A257, Portals II, Washington, DC 20554, and may also be purchased from the Commission's copy contractor, BCPI, Inc., Portals II, 445 12th Street SW., Room CY-B402, Washington, DC 20554. Customers may contact BCPI, Inc. via their Web site, <http://www.bcpi.com>, or call 1-800-378-3160. This document is available in alternative formats (computer diskette, large print, audio record, and braille).

Persons with disabilities who need documents in these formats may contact the FCC by email: FCC504@fcc.gov or phone: 202-418-0530 or TTY: 202-418-0432.

I. Procedural Matters

A. Ex Parte Rules—Permit-But-Disclose

1. The proceeding this *Second FNPRM* initiates shall be treated as a “permit-but-disclose” proceeding in accordance with the Commission’s *ex parte* rules.¹ Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter’s written comments, memoranda or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with rule 1.1206(b). In proceedings governed by rule 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (e.g., .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission’s *ex parte* rules.

B. Comment Period and Procedures

2. Pursuant to sections 1.415 and 1.419 of the Commission’s rules, 47 CFR 1.415, 1.419, interested parties may file comments and reply comments on or

before the dates indicated on the first page of this document. Comments may be filed using the Commission’s Electronic Comment Filing System (ECFS). See *Electronic Filing of Documents in Rulemaking Proceedings*, 63 FR 24121 (1998).

▪ *Electronic Filers:* Comments may be filed electronically using the Internet by accessing the ECFS: <http://fjallfoss.fcc.gov/ecfs2/>.

▪ *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing. If more than one docket or rulemaking number appears in the caption of this proceeding, filers must submit two additional copies for each additional docket or rulemaking number.

Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission’s Secretary, Office of the Secretary, Federal Communications Commission.

▪ All hand-delivered or messenger-delivered paper filings for the Commission’s Secretary must be delivered to FCC Headquarters at 445 12th St. SW., Room TW-A325, Washington, DC 20554. The filing hours are 8:00 a.m. to 7:00 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes and boxes must be disposed of before entering the building.

▪ Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743.

▪ U.S. Postal Service first-class, Express, and Priority mail must be addressed to 445 12th Street SW., Washington DC 20554.

People with Disabilities: To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202-418-0530 (voice), 202-418-0432 (tty).

C. Initial Regulatory Flexibility Analysis

3. As required by the Regulatory Flexibility Act of 1980 (RFA),² the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on small entities of the policies and rules proposed in this *Second FNPRM*. The IRFA is found near the end of this document. We request written public comment on the analysis.

Comments must be filed in accordance with the same deadlines as comments filed in response to this *Second FNPRM*, and must have a separate and distinct heading designating them as responses to the IRFA. The Commission’s Consumer and Governmental Affairs Bureau, Reference Information Center, will send a copy of this *Second FNPRM*, including the IRFA, to the Chief Counsel for Advocacy of the Small Business Administration.

4. Copies to Private Accounting Authorities and Governmental Users. The Commission’s Consumer and Governmental Affairs Bureau, Reference Information Center, shall send a copy of this *Second Further Notice of Proposed Rulemaking*, including the Initial Regulatory Flexibility Analysis, to the current U.S.-certified private accounting authorities: Mackay Communications, Inc., Astrium Services Business Communications Inc., Seven Seas Communications Inc., Omnet, Inc., KFS World Communications dba GLOBE WIRELESS, GMPCS Personal Communications, Inc., ShipCom, L.L.C. (formerly M M R Radio, L.L.C.), Stratos Mobile Networks Inc., Exxon Communications Company, Vizada, Inc., Raytheon Service Co., Telemar USA LLC, MVS USA Inc., A-N-D Group Plc, Selex ES Ltd, Selex ES Ltd, NSSLGlobal, Airtime Billing Department.

D. Initial Paperwork Reduction Analysis

5. This document does not contain a proposed information collection(s) subject to the Paperwork Reduction Act of 1995 (PRA, Pub. L. 104-13). In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4).

II. Introduction

6. In this *Second Further Notice of Proposed Rulemaking (2016 Accounting Authority Second FNPRM)*, we propose to transition the functions and duties performed by the Commission as an accounting authority to private accounting authorities. In doing so, we seek to revisit findings in the 1999 Report and Order and *Further Notice of Proposed Rulemaking (1999 Accounting Authority Order & FNPRM)*,³ which

³ 1998 Biennial Regulatory Review—Review of Accounts Settlement in the Maritime Mobile and Maritime Mobile-Satellite Radio Services and Withdrawal of the Commission as an Accounting Authority in the Maritime Mobile and the Maritime Mobile-Satellite Radio Services, *Report and Order and Further Notice of Proposed Rulemaking*, 15

¹ 47 CFR 1.1200 *et seq.*

² See 5 U.S.C. 603.

included the Commission's decision that it should withdraw as an accounting authority in the maritime mobile and maritime mobile-satellite radio services.⁴ The Commission tentatively concluded that a three-year transition period following adoption of a Report and Order was appropriate to permit the preparation and implementation of a plan to ensure a smooth, non-disruptive transition to private accounting authorities, and to develop the transition plan.⁵ Although in that Order the Commission concluded that "the Commission shall cease operating as an accounting authority for settling accounts for maritime mobile, maritime satellite, aircraft,⁶ and handled terminal radio services," and that "a transition period is necessary to allow for an orderly transition to a full privatization of the accounts-settlement function," we stopped short of proscribing a transition plan, instead seeking further comment "on a number of proposals regarding how best to implement this transition."⁷

7. The completion of a plan based on those comments, however, was subsequently delayed. Thus, no definitive timeline for the transition to implement our decision in the Order to withdraw as accounting authority has been established.

8. We continue to believe that it is in the public interest for the Commission to withdraw as an accounting authority. Given the passage of time, we now, in this *2016 Accounting Authority Second FNPRM*, seek further comment on the appropriate transition plan and period to implement our decision in the *1999 Accounting Authority Order & FNPRM* to withdraw as an accounting authority in the maritime mobile and maritime mobile-satellite radio services.

III. Background

9. International maritime mobile communications are HF or VHF radio communications between a ship and a coast station operated by the telecommunications operator in the country in which the station is located, and international maritime mobile-

satellite communications services are conducted by satellite. Payment for the services provided by the telecommunications operators involves interaction with an entity known as an "accounting authority," which settles an account between the telecommunications operator and the customer. In practice, the telecommunications operator, the earth or coast station, sends its bill either to the accounting authority that the customer has designated to act for it or to an "accounting authority of last resort," which, as the name implies, settles accounts for customers that have not designated a particular accounting authority. The function of the accounting authority, also referred to as a "clearinghouse" or "settlement authority," involves presenting the bill to the customer, accepting payment from the customer, and remitting the collected funds to the telecommunications operator.

10. Historically, most nations required individual ships to settle their accounts with their telecommunications provider; however, since 1934, the Commission has acted as an accounting authority in the United States, to settle accounts for maritime, aircraft, and hand-held terminal radio services to both private users and other U.S. federal government agencies. Over time, the Commission has reduced its accounting authority or clearinghouse function related to the maritime mobile radio services and the satellite-based services, including aeronautical and hand-held terminals. The primary reason for this reduction is that private accounting authorities provide similar account settlement services for U.S. users. Certification and operation of private accounting authorities are governed under part 3 of our rules, which ensure that qualified applicants are authorized as accounting authorities and that such authorities, once approved, have adequate guidance of the standard of conduct required of them by the Commission. We believe that this process has been working effectively.⁸ Currently, there are twenty-two entities certified as U.S. private accounting authorities.⁹

11. When the Commission last considered this matter more than fifteen years ago, it found no public policy reason for the Commission's continued function as an accounting authority,¹⁰ and concluded in the Report and Order section of the decision, therefore, that the Commission should withdraw as a clearinghouse for the settlement of accounts in the maritime mobile radio, maritime mobile-satellite, and other satellite-based communications services.¹¹ The Commission tentatively concluded that it should not designate a new accounting authority of last resort,¹² and that a three year transition plan was sufficient to ensure a smooth transition.¹³ The Commission sought further comment on these tentative conclusions.¹⁴

IV. Discussion

12. In the Order portion of the *1999 R&O and FNPRM*, the Commission announced its decision to withdraw from the accounting authority function. Additionally, it revised section 3.10(e) to make explicit the authorities' obligations not to discriminate,¹⁵ grandfathered the accounting authority of EXXON to permit it to continue to settle accounts only for its ships, and provided guidance to allow applicants to amend their pending applications in light of the change to section 3.10(e). In the *Second FNPRM*, the Commission requested comments on two issues. First, the Commission sought comment on whether to appoint or allow an entity to take over the Commission's function as the accounting authority of last resort, require customers to pre-subscribe to an accounting authority or to designate an accounting authority on every message, or to develop a formula to spread undesignated messages among several private accounting authorities. Second, the Commission tentatively concluded that the appropriate phase-out period was three years following **Federal Register** publication of a final order, and invited comment.

A. Withdrawal by the Commission From the Accounting Authority Function

13. In the *1999 R&O and FNPRM*, the Commission decided to withdraw from performing the functions of an accounting authority, and to leave the settlement of accounts to the private

any certified U.S. accounting authority to the settlement of accounts for only one class of service.

¹⁰ *1999 Accounting Authority Order & FNPRM* at 20709.

FCC Rcd 20703 (1999) (*1999 Accounting Authority Order & FNPRM*).

⁴ *Id.*

⁵ *Id.* at 20717.

⁶ The focus of this FNPRM is the effect on maritime communications, as the Commission has not, for several years, settled aeronautical accounts. It is important to note, however, that our withdrawal as accounting authority of last resort would include a cessation in our settling of accounts for maritime mobile, maritime satellite, aircraft, and handled terminal radio services, as we previously concluded.

⁷ *Id.*

⁸ See Letter from Bruce Hensch, Inmarsat, to Accounting Authority Certification Office, Federal Communications Commission (dated April 20, 2015); Letter from Robert Swanson, Airbus Defense and Space, to Marlene Dortch, Federal Communications Commission (dated January 30, 2015); Letter from Steven Chernoff, Lukas, Nace, Gutierrez, and Sachs, LLP, to Accounting Authority Certification Officer, Federal Communications Commission (April 15, 2015) (providing inventories of accounting authority settlements).

⁹ Some of these private accounting authorities may not currently settle accounts for maritime services; however, our certification does not limit

accounting authorities subject to part 3 of our rules. Although the Commission never implemented a transition plan, many users of the Commission's services subsequently have transitioned to one of these accounting authorities. We continue to believe that it is in the public interest for the Commission to withdraw as an accounting authority and seek comment on our proposals to do so below. The function of an accounting authority is not necessarily a governmental function, but can be performed equally well by privately owned entities, subject to Commission oversight under our part 3 rules.¹⁶ Since the Commission last visited this issue, U.S. private accounting authorities have continued to succeed in providing these functions.¹⁷ We anticipate that our action to step away from the functions of an accounting authority will create further competition for the settlement of maritime and satellite accounts, and may thereby encourage the industry to provide the public with more choices in obtaining settlement of their accounts.

14. Since 1999, the number of users relying on the Commission to provide accounting authority services has decreased,¹⁸ even as the activity handled by other accounting authorities, in general, appears to have increased in scope. We recognize that an immediate departure of the Commission as an accounting authority will require those U.S. international ship and satellite operators currently handled by the Commission to select an alternative accounting authority. We also believe, unlike in 1999 when we suggested a three-year transition period, that maritime operators are far better prepared to adjust to the departure of the Commission as the accounting authority. First, the Commission possesses the ability to contact current users and thereby their expedite transition. Second, through outreach and coordination with the maritime industry, Commission staff have learned that many of those entities using the

Commission's accounting authority services have anticipated the change, and they have initiated a transition process in contracting with other accounting authorities. Consequently, we believe that most maritime mobile satellite users will be able to accommodate this change, and that they will act promptly to select an alternative accounting authority. We therefore, recommend a one year transition period and seek comment on this recommendation.

15. We continue to believe that we should not designate a new accounting authority of last resort, but, rather, customers should designate an accounting authority for each call or should presubscribe for the services of an accounting authority.¹⁹ We seek further comment on this tentative conclusion.

B. Government Agencies

16. In the 1999 *R&O and FNPRM* we acknowledged that the Commission at that time acted as the accounting authority for the maritime and satellite communications of a majority of U.S. governmental agencies.²⁰ At the time, because we anticipated that Government agency users might have special needs that differ from other users, we requested the agencies to address this issue in their comments.²¹

17. In their 1998 comments, the United States Coast Guard urged the Commission to maintain a default accounting authority, provide ample notice to affected users and small vessel organizations, provide a smooth transition process to a new default accounting authority, and ensure the economic impact on small entities is non-significant.²² The National Telecommunications and Information Administration (NTIA), in coordination with the Interdepartment Radio Advisory Committee (which includes the Coast Guard), expressed concern that the Commission's withdrawal might lead to disruption or curtailment of communication services to federal users, as well as increased cost to the taxpayer.²³ They requested that the FCC retain its accounting authority, or, in the alternative, noted that most government agencies operate on a three year budget

cycle, and asked that the FCC defer termination of its accounting authority responsibility "until an [sic] alternative billing and payment arrangements ensuring uninterrupted service can be established."²⁴ NTIA further urged that the FCC either retain its accounting authority, or designate an authority of last resort that would "not charge more than the Commission currently charges its accounts until users are notified and given a chance to select their own accounting authority or accept the terms offered."²⁵

18. We agree that, as part of an effective plan for the Commission to withdraw as an accounting authority, U.S. Government agencies must have in place alternate arrangements upon the Commission's withdrawal to ensure that critical communications are not disrupted. In the more than fifteen years, since our 1999 decision, Commission staff have contacted the various government agencies informing them of the Commission's intent to terminate its accounting authority; as a result, many of these various agencies, have moved to alternative accounting authorities for some or all of their services.²⁶ In light of this trend, and the more than fifteen years impacted entities have had to transition to a new accounting authority, we seek comment on the appropriate time period to complete the Commission's transition from serving as accounting authority for government agencies. Movement of government agencies anticipating our change in function suggests that a transition period shorter than the three-year period previously proposed is appropriate to accommodate these particular changes, including anticipated government budget planning changes. We propose that the transition period for government and non-government entities be the same. We seek comment on whether one year suffices for government agencies to transition to an alternative accounting authority. Alternatively, we invite comment on whether this period should be longer or shorter.

C. Accounting Authority of Last Resort

19. The Commission historically has served as the "accounting authority of last resort" for the United States, which resulted in the Commission receiving from foreign telecommunications

¹⁶ The FCC's withdrawal as an accounting authority will in no way change the rules by which we certify and monitor private entities serving as accounting authorities for maritime mobile and maritime satellite services. See 47 CFR 3.1 *et seq.*

¹⁷ See 1999 *R&O and FNPRM*, 15 FCC Rcd at 20706-09, paragraphs 7-12; See Letter from Bruce Henoch, Inmarsat, to Accounting Authority Certification Office, Federal Communications Commission (dated April 20, 2015); Letter from Robert Swanson, Airbus Defense and Space, to Marlene Dortch, Federal Communications Commission (dated January 30, 2015); Letter from Steven Chernoff, Lukas, Nace, Gutierrez, and Sachs, LLP, to Accounting Authority Certification Officer, Federal Communications Commission (dated April 15, 2015) (providing inventories of accounting authority settlements).

²⁶ Commission staff have confirmed the removal of many of the terminals once billed to these agencies from the FCC as the accounting authority.

operators all accounts for which the customer did not designate a specific accounting authority.²⁷ In 1999, we tentatively concluded that we should not designate a new accounting authority of last resort.²⁸ Instead, we found that customers should designate an accounting authority for each call or should presubscribe for the services of an accounting authority.²⁹ We noted, however, that in order to prevent a deleterious effect on safety communications, the Commission must take care to ensure a seamless transition to new accounting authorities.³⁰

20. We continue to believe that, although the functions of an accounting authority of last resort may still be necessary to address infrequent situations where an authority is or cannot be designated due to circumstances beyond the control of the user, it remains the basic responsibility of the user, whether a private or governmental entity, to provide for an accounting authority to handle its calls. However, as we withdraw as an accounting authority, we tentatively conclude, based on the commenters' urging us, in 1998, to either retain our accounting authority or ensure an alternative is in place before withdrawing,³¹ that it will be necessary to have an alternative arrangement in place that will eliminate the possibility of messages being sent without having an accounting authority necessary to settle accounts. We seek comment on possible approaches to ensure an alternative is in place: (1) Requiring all customers to pre-subscribe to an accounting authority or to designate an accounting authority on every message; (2) developing a formula to spread undesignated messages among several private accounting authorities; and/or (3) appointing through comparative selection one of the private accounting authorities as the new authority of last resort.

21. Given the reduction of reliance on the FCC as an accounting authority and the resulting lower volume of customers³² who will be affected when we withdraw as accounting authority (see Table 1 above), we tentatively conclude that the best alternative is the first option noted above, to require all customers to pre-subscribe to an accounting authority or to designate an accounting authority on every message. We seek comment on this tentative conclusion as well as the merits of each of the three proposals. For example, is it technically feasible, for U.S. maritime and satellite radio traffic for which no accounting authority is designated and for which the customer is not able or willing to designate an accounting authority on every message, to allow the provider to bill for such traffic through a certified accounting authority of its choice? Is this feasible for a ship-to-shore radiotelephone call made through a foreign coast station? In the alternative, is it feasible to allow public coast stations to designate their own

³² We note that, for 2016, traffic billed by the FCC as accounting authority to private and/or third parties is exclusively satellite traffic, and ask commenters to address whether that fact, coupled with the potential to allow providers to choose a U.S. accounting authority to bill traffic for which no accounting authority has been designated by the customer, mitigates any concerns regarding a potential gap in service once the FCC withdraws as accounting authority of last resort.

“default” accounting authority in order to send bills to mariners who have not chosen/designated a private accounting authority?³³ Is there a need for the Commission to adopt additional qualifying criteria for an existing accounting authority to serve as a designated accounting authority of last resort? If so, what should the additional criteria be? We also seek comment on any potential enforcement or authority issues that may arise from each of the proposed alternatives for providing an accounting authority of last resort. We also request that commenting parties propose any other viable alternatives that help ensure a smooth transition while relieving the Commission from performing this function.

22. We note that withdrawal of the Commission as an accounting authority without an effective transition plan could leave a gap for some U.S. maritime and satellite radio traffic for which no accounting authority is designated. Thus, during any transition period and subsequently, we intend to conduct outreach to make users aware of our decision and their options for ensuring that they continue to receive the services of an accounting authority.

23. In any event, we believe that an accounting authority, whether selected by the ship, the provider, or a competent default accounting authority, must be in place for distress and safety telecommunications on board ships, particularly when a maritime mobile satellite system is being used. We therefore seek comment on whether, if we decline to designate an accounting authority, we should designate an accounting authority of last resort specifically for Global Maritime Distress and Safety System (GMDSS) mobile satellite communications.³⁴ Although maritime distress and certain safety communications are provided at no charge, other types of safety communications do incur a charge. If neither the designated nor a competent default accounting authority exists, then foreign earth stations may have no way to bill the U.S. satellite user. As a result, the user may, through no fault of its

³³ There are few users of maritime public coast stations now due to the closure worldwide of public coast stations; however, ensuring the safety of such users is important. We, therefore, seek comment on what different approaches may be necessary for radio communications via a foreign public coast station versus satellite communications via a mobile satellite communications provider.

³⁴ INMARSAT continues to be the only worldwide maritime mobile satellite system providing these safety communications. INMARSAT will commission a new ship terminal intended to carry distress and safety communications only if the application designates an accounting authority.

own, find that its ship earth station has been barred for non-payment of bills. We understand that, although a ship mobile device has been “barred” from the network provider (e.g., foreign earth station), a ship can still initiate a ship-to-shore distress alert. In such a situation, however, it could not communicate further with the Coast Guard, even if those further communications are safety related. A ship on the high seas that has been barred from such communications may be a danger to itself and others, as well as a potential problem for the Coast Guard. We agree with commenters that any change in accounting authorities must ensure that critical communications are not disrupted. First, during any transition period that we adopt, we will notify users of GMDSS mobile satellite communications of our decision to withdraw as an accounting authority and of their need to select a new accounting authority. Moreover, we seek comment, not only on designation of an accounting authority of last resort for all users, including GMDSS mobile satellite and GMDSS maritime mobile communications, but also on whether there are other options to ensure that the Commission’s withdrawal as accounting authority would not cause ship stations to become barred because they were unaware that they need to choose a new accounting authority.

24. We also invite comment whether advancements in technology and the business community could reduce the burdens associated with our proposal to withdraw as accounting authority of last resort. Technological changes may mitigate concerns that stem from the fact that the Commission’s service as the accounting authority of last resort has made it unnecessary for users to be aware that they may select a private accounting authority. We can promptly notify users which relied on the Commission as accounting authority of last resort for the need to select an alternative accounting authority. In doing so, we seek comment on notifying users from the past seven years. Alternatively, should we make the period of users which relied on the Commission as carrier of last resort shorter or longer? In addition, the Commission could review on a periodic basis the plan it adopts to ensure that the need for accounting authority services is being met, including distress and safety communications on board ships, and determine whether further modifications are appropriate.

Initial Regulatory Flexibility Analysis

1. As required by the Regulatory Flexibility Act (RFA),³⁵ the Commission prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on small entities by the policies and rules proposed in this *Second Further Notice of Proposed Rulemaking (Second FNPRM)*. Written comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadline for comments on this *Second FNPRM*. The Commission will send a copy of this *Second FNPRM*, including the IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA).³⁶ In addition, this *Second FNPRM* and IRFA (or summaries thereof) will be published in the **Federal Register**.³⁷

A. Need for and Objectives of, the Notice

2. In this *Second Further Notice of Proposed Rulemaking (Second FNPRM)*, we propose to transition the functions and duties performed by the Commission as an accounting authority to private accounting authorities. In doing so, we seek to revisit findings in the 1999 Report and Order and *Further Notice of Proposed Rulemaking (1999 Accounting Authority Order & FNPRM)*,³⁸ which included the Commission’s decision that it should withdraw as an accounting authority in the maritime mobile and maritime mobile-satellite radio services. The Commission tentatively concluded that a three-year transition period following adoption of a Report and Order was appropriate to permit the preparation and implementation of a plan to ensure a smooth, non-disruptive transition to private accounting authorities, and to develop the transition plan.³⁹ The

³⁵ 5 U.S.C. 603. The RFA, 5 U.S.C. 601–612 has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), Public Law 104–121, Title II, 110 Stat. 847 (1996).

³⁶ 5 U.S.C. 603(a).

³⁷ *Id.*

³⁸ 1998 Biennial Regulatory Review—Review of Accounts Settlement in the Maritime Mobile and Maritime Mobile-Satellite Radio Services and Withdrawal of the Commission as an Accounting Authority in the Maritime Mobile and the Maritime Mobile-Satellite Radio Services, *Report and Order and Further Notice of Proposed Rulemaking*, 15 FCC Rcd 20703 (1999) (1999 *R&O and FNPRM*). The Commission as part of its *Further Notice of Proposed Rulemaking* sought comments to be filed by comments August 23, 1999, and replies by September 8, 1999.

³⁹ 1998 Biennial Regulatory Review—Review of Accounts Settlement in the Maritime Mobile and Maritime Mobile-Satellite Radio Services and Withdrawal of the Commission as an Accounting Authority in the Maritime Mobile and the Maritime Mobile-Satellite Radio Services, Order, 14 FCC Rcd 13504 (1999). The order extended the deadline for

completion of the plan was subsequently delayed and until now, the proceeding has been inactive.

3. In this *2016 Accounting Authority Second FNPRM*, we now seek comment on whether the findings in the *1999 Accounting Authority Order & FNPRM* remain in the public interest. As such, we seek input on whether the Commission should withdraw as an accounting authority in the maritime mobile and maritime mobile-satellite radio services. In doing so, we seek information on whether interested parties continue to support the Commission’s 1999 decision and if not, why that decision should be revisited or amended.

B. Legal Basis

4. This *Second Further Notice of Proposed Rulemaking* is adopted pursuant to Sections 1, 4(i), 4(j), 11, 201–205, 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 161, 201–205, and 303(r).

C. Description and Estimate of the Number of Small Entities To Which the Rules Will Apply

5. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the proposed rules and policies, if adopted.⁴⁰ The RFA generally defines the term “small entity” as having the same meaning as the terms “small business,” “small organization,” and “small governmental jurisdiction.”⁴¹ In addition, the term “small business” has the same meaning as the term “small business concern” under the Small Business Act.⁴² A “small business concern” is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.⁴³

6. The rules proposed in this *Second Notice of Proposed Rulemaking* apply to entities providing account-settlement services for maritime mobile and maritime mobile-satellite radio services.

filing comments to October 25, 1999 and reply comments to November 29, 1999. The extension of time was made to allow for a fuller record.

⁴⁰ 5 U.S.C. 603(b)(3).

⁴¹ 5 U.S.C. 601(6).

⁴² 5 U.S.C. 601(3) (incorporating by reference the definition of “small-business concern” in the Small Business Act, 15 U.S.C. 632). Pursuant to 5 U.S.C. 601(3), the statutory definition of a small business applies “unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the **Federal Register**.”

⁴³ 15 U.S.C. 632.

Small businesses may be able to become accounting clearinghouses, as the establishment of such a function does not appear to involve high implementation costs. The rules also apply to existing maritime mobile and maritime satellite customers who have not presubscribed to a U.S. accounting authority and are, therefore, billed through the FCC as the accounting authority of last resort. An estimated thirty small entities have been billed for traffic by the FCC as an accounting authority in 2016. The proposed action in this *Second Notice of Proposed Rulemaking* does not appear to involve high implementation costs for such entities.

D. Reporting, Recordkeeping, and Other Compliance Requirements

7. The proposed action in this *Second Further Notice of Proposed Rulemaking* would affect those entities already certified and those applying for certification as a private accounting authority in the maritime mobile, maritime mobile-satellite, aeronautical and other satellite-based radio services. The amended rule, however, merely clarifies an existing requirement imposed on accounting authorities. It, therefore, does not alter the reporting, recordkeeping or other compliance requirements of certified accounting authorities.

E. Steps Taken To Minimize Significant Economic Impact on Small Entities and Significant Alternatives Considered

8. As stated above, we propose to transition the functions and duties performed by the Commission as an accounting authority to private accounting authorities. In doing so, we seek to revisit findings in *1999 Accounting Authority Order & FNPRM*,⁴⁴ which included the Commission's decision that it should withdraw as an accounting authority in the maritime mobile and maritime mobile-satellite radio services. We seek comment on the impact of our proposals on small entities and on any possible alternatives that could minimize the impact of our rules on small entities.

⁴⁴ 1998 Biennial Regulatory Review—Review of Accounts Settlement in the Maritime Mobile and Maritime Mobile-Satellite Radio Services and Withdrawal of the Commission as an Accounting Authority in the Maritime Mobile and the Maritime Mobile-Satellite Radio Services, *Report and Order and Further Notice of Proposed Rulemaking*, 15 FCC Rcd 20703 (1999) (1999 R&O and FNPRM). The Commission as part of its *Further Notice of Proposed Rulemaking* sought comments to be filed by comments August 23, 1999, and replies by September 8, 1999.

F. Federal Rules That Overlap, Duplicate or Conflict With These Proposed Requirements

9. None.

V. Ordering Clauses

10. *It is ordered* that pursuant to sections 4(i), 4(j), 11, 201–205 and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 161, 201–205 and 303(r), this *Second Further Notice of Proposed Rulemaking* is adopted.

11. *It is further ordered* that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, shall send a copy of this *Second Further Notice of Proposed Rulemaking*, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

Federal Communications Commission.

Marlene H. Dortch,
Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 44

[WC Docket No. 10–90; FCC 16–178]

Connect America Fund

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) seeks comment on whether to expand the Alternative Connect America Cost Model (A–CAM) budget for rate-of-return carriers to provide additional funding with an associated increase in broadband deployment obligations.

DATES: Comments are due on or before February 13, 2017 and reply comments are due on or before February 27, 2017. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this document, you should advise the contact listed below as soon as possible.

ADDRESSES: You may submit comments, identified by WC Docket No. 10–90, by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Federal Communications Commission's Web site:* <http://fjallfoss.fcc.gov/ecfs2/>. *Electronic Filers:*

Comments may be filed electronically using the Internet by accessing the ECFS: <http://fjallfoss.fcc.gov/ecfs2/>.

• *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing. Because more than one docket number appears in the caption of this proceeding, filers must submit two additional copies for each additional docket number.

• Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

• All hand-delivered or messenger-delivered paper filings for the Commission's Secretary must be delivered to FCC Headquarters at 445 12th St. SW., Room TW–A325, Washington, DC 20554. The filing hours are 8:00 a.m. to 7:00 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes and boxes must be disposed of *before* entering the building.

• Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743.

• U.S. Postal Service first-class, Express, and Priority mail must be addressed to 445 12th St. SW., Washington, DC 20554.

• *People with Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: FCC504@fcc.gov or phone: (202) 418–0530 or TTY: (202) 418–0432.

FOR FURTHER INFORMATION CONTACT:

Alexander Minard, Wireline Competition Bureau, (202) 418–7400 or TTY: (202) 418–0484.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Further Notice of Proposed Rulemaking (FNPRM) in WC Docket No. 10–90; FCC 16–178, adopted on December 19, 2016 and released on December 20, 2016. The full text of this document is available for public inspection during regular business hours in the FCC Reference Center, Room CY–A257, 445 12th St. SW., Washington, DC 20554 or at the following Internet address: http://transition.fcc.gov/Daily_Releases/Daily_Business/2016/db1220/FCC-16-178A1.pdf.

I. Further Notice of Proposed Rulemaking

1. In this Further Notice of Proposed Rulemaking, the Commission seeks

comment on whether to allocate additional high-cost funding to the voluntary path to the model. Rate-of-return carriers that accept the second offer of model-based support will do so on the condition that they commit to meet the deployment obligations of the original offer if authorized no later than December 31, 2017 to receive additional A-CAM funding equivalent to the original offer. The Commission therefore seeks comment on whether the Commission should further increase the budget for A-CAM to provide the full amount of the original offer for some or all of those carriers that accepted the second offer of model-based support.

2. The Commission seeks comment on increasing the budget by a lesser amount. If the increased budget for A-CAM were insufficient to cover all participants, should the Wireline Competition Bureau (Bureau) prioritize funding to those with the least broadband deployment using the same data set as that utilized for the adjusted offer? Alternatively, if the Commission increases the budget by a smaller amount, should the Bureau revise the offers to an amount less than the original offer? In that latter situation, the Commission expects that the Bureau would make a new offer, limited to the carriers that originally elected the first offer and accepted the revised offer; those carriers would be free to choose whether to accept that new offer and the associated broadband deployment obligations.

3. The Commission notes that commenters responding to the Bureau's A-CAM Election Results Public Notice uniformly support increasing the A-CAM budget by more than \$50 million. The Commission would need to increase the overall high-cost budget by an additional \$110 million per year if all carriers elect the second offer, and by a lesser amount if fewer do. The Commission invites comment from all interested stakeholders on whether to enlarge the budget for A-CAM support, including the costs and benefits of allocating limited funding for this particular purpose.

II. Procedural Matters

4. This document does not contain new information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104-13. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4).

5. In the *April 2014 Connect America FNPRM*, 79 FR 39196, July 9, 2014, the Commission proposed a framework for a voluntary election by rate-of-return carriers to receive model-based support and tentatively concluded that such a framework could achieve important universal service benefits by creating incentives for deployment of voice and broadband-capable infrastructure. The Commission sought written comment on the proposal, including comment on the Initial Regulatory Flexibility Analysis (IRFA). The Commission did not receive any comments on the *April 2014 Connect America FNPRM IRFA*. In the *Rate-of-Return Reform Order*, 81 FR 24282, April 25, 2016, the Commission adopted a voluntary path under which rate-of-return carriers may elect to receive model-based support for a term of 10 years in exchange for meeting defined build-out obligations. The Commission issued a Final Regulatory Flexibility Analysis (FRFA) that conforms to the Regulatory Flexibility Act of 1980 (RFA), as amended. This present Report and Order and Further Notice of Proposed Rulemaking implements the framework previously adopted by the Commission and seeks comment on additional funding to implement that framework. The Commission promulgates no additional final rules, and our present action is, therefore, not an RFA matter.

6. The proceeding this Notice initiates shall be treated as a "permit-but-disclose" proceeding in accordance with the Commission's *ex parte* rules. Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing

them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with rule 1.1206(b). In proceedings governed by rule 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (e.g., .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

7. *People with Disabilities*: To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202-418-0530 (voice), 202-418-0432 (TTY).

III. Ordering Clauses

8. *It is further ordered*, pursuant to the authority contained in sections 1, 2, 4(i), 5, 10, 201-206, 214, 218-220, and 254 of the Communications Act of 1934, as amended, and section 706 of the Telecommunications Act of 1996, 47 U.S.C. 151, 152, 154(i), 155, 160, 201-206, 214, 218-220, 254, and 1302, and sections 1.1, 1.3, 1.421, 1.427, and 1.429 of the Commission's rules, 47 CFR 1.1, 1.3, 1.421, 1.427, and 1.429, that this Further Notice of Proposed Rulemaking *is adopted*, effective thirty (30) days after publication of the text or summary thereof in the **Federal Register**.

Federal Communications Commission.

Marlene H. Dortch,
Secretary.

50 CFR Parts 223 and 224

RIN 0648-XF080

Endangered and Threatened Species; Petition for Rulemaking To Establish a Whale Protection Zone for Southern Resident Killer Whales

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of petition; request for comments.

SUMMARY: This document announces receipt by the National Marine Fisheries Service (NMFS) of a petition for rulemaking to establish a whale protection zone in the San Juan Islands, Washington, to support recovery of endangered Southern Resident killer whales. NMFS is requesting comments on the petition and will consider all comments and available information when determining whether to accept the petition and proceed with the suggested rulemaking.

DATES: The closing date for comments on the petition is April 13, 2017.

ADDRESSES: You may submit information on this document identified by NOAA–NMFS–2016–0152 and the petition by either of the following methods:

- *Electronic submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal www.regulations.gov. To submit comments via the Federal e-Rulemaking Portal, go to www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2016-0152, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

- *Mail or hand-delivery:* Lynne Barre, NMFS West Coast Region, 7600 Sand Point Way NE., Seattle, WA 98115.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Lynne Barre, West Coast Regional Office, 206–526–4745.

SUPPLEMENTARY INFORMATION: In 2009, NMFS proposed vessel traffic regulations to minimize vessel impacts to Southern Resident killer whales, including a 200-yard approach rule, a prohibition on parking vessels in the path of the whales, and a protected area (no-go zone) in Puget Sound along the west side of San Juan Island, Washington (74 FR 37674; July 29,

2009). In 2011, we finalized vessel traffic regulations that included an approach rule and path prohibitions but did not finalize a protected area (76 FR 20870; April 14, 2011). In deciding not to move forward with a protected area in the final rule, we noted the degree of public opposition to the concept and concluded a no-go zone required further analysis. We further noted that to be effective, regulations must be understood by the public and have a degree of public acceptance. We stated that we would evaluate the enacted regulations, gather additional information and conduct further analysis and public outreach on the concept of identifying a protected area or no-go zone as a future protective measure. Since 2011, we have conducted a public workshop in 2013, continued communicating with a variety of interested groups (including the petitioners) on this topic, and are currently completing a review of the 2011 vessel traffic regulations. NOAA’s Northwest Fisheries Science Center has also conducted further research on the impacts of vessels on Southern Resident killer whales.

On November 10, 2016, NMFS received a petition pursuant to the Administrative Procedure Act (APA) from the Orca Relief Citizen’s Alliance, Center for Biological Diversity, and Project Seawolf requesting that we utilize our authorities under the Endangered Species Act (ESA) and Marine Mammal Protection Act (MMPA) to establish a whale protection zone to reduce noise and disturbance of Southern Resident killer whales. The petitioners identify threats to the whales, discuss alleged insufficiencies with existing protections, and describe NMFS’ authority under the ESA and MMPA to establish a whale protection zone with regulations. The petition describes the features of a whale protection zone and cites information from our evaluation of the benefits of a protected area supporting our 2009 proposed rule. The area proposed for a protection zone is similar to, but wider and longer than the zone originally considered by NMFS in 2009 (74 FR 37674; July 29, 2009).

To ensure our decision about whether to accept the petition and move forward with the petitioned action to establish a whale protection zone is based on the best available scientific and commercial information, we are soliciting information from the public, governmental agencies, Tribes, the scientific community, industry, environmental entities, and any other interested parties concerning the petitioned action. In particular we

request information and comments on:

(1) The advisability of and need for regulations to establish a whale protection zone; (2) the geographic scope of regulations; (3) alternative management options for regulating vessel interactions with killer whales, including but not limited to the option in the petition; (4) scientific and commercial information regarding the effects of vessels on killer whales and their habitat; (5) information regarding potential economic effects of regulating vessel interactions; and (6) any additional relevant information that NMFS should consider should it accept the petition. To inform your comments, information on the previous vessel regulations, the petition and other supporting documents is available at: http://www.westcoast.fisheries.noaa.gov/protected_species/marine_mammals/killer_whale/vessel_regulations.html.

You may submit your information and materials electronically or via mail (see **ADDRESSES** section). We request that all information be accompanied by supporting documentation such as maps, bibliographic references, or reprints of pertinent publications. We also would appreciate the submitter’s name, address, and any association, institution, or business that the person represents; however, anonymous submissions will also be accepted.

If NMFS decides to accept the petition and initiate rulemaking, we will notify the petitioners and publish a notice of our decision in the **Federal Register**. If NMFS decides not to proceed with the petitioned action, we will notify the petitioners, provide a brief statement of the grounds for the decision, and publish notice of our decision in the **Federal Register**.

Authority: 16 U.S.C. 1531 *et seq.*

Dated: January 6, 2017.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

[Docket No. 070719377–2189–01]

RIN 0648–AV81

Confidentiality of Information; Magnuson-Stevens Fishery Conservation and Management Reauthorization Act

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; withdrawal.

SUMMARY: The National Marine Fisheries Service (NMFS) withdraws a proposed rule to revise existing regulations governing the confidentiality of information submitted in compliance with any requirement or regulation under the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). NMFS published the proposed rule on May 23, 2012. After careful consideration, NMFS has decided that the proposed changes discussed in the proposed rule are not warranted at this time.

DATES: The proposed rule published on May 23, 2012 (77 FR 30486) is withdrawn as of January 13, 2017.

FOR FURTHER INFORMATION CONTACT: Karl Moline at 301–427–8225.

SUPPLEMENTARY INFORMATION:

Background

The Magnuson-Stevens Act sets forth information confidentiality requirements at section 402(b), 16 U.S.C. 1881a(b). Section 402(b)(3) of the Act provides that the “Secretary shall, by regulation, prescribe such procedures as may be necessary to preserve the confidentiality of information submitted in compliance with any requirement or regulation under this Act . . .”. Id. 1881a(b)(3). Accordingly, NMFS has promulgated confidentiality of information regulations, which are set forth at 50 CFR part 600, subpart E. Certain terms used in these regulations are defined under 50 CFR part 600, subpart A. NMFS last revised the regulations under subpart E in February 1998 (63 FR 7075).

On May 23, 2012, NMFS proposed revisions to its regulations at 50 CFR part 600 subpart A, subpart B, and subpart E, in order to implement confidentiality requirements amendments, which were included in the 1996 Sustainable Fisheries Act (SFA) and the 2006 Magnuson Stevens Fishery Conservation and Management Reauthorization Act (MSRA) (77 FR 30486). In the proposed rule, NMFS proposed three types of changes: (1) Changes related to broadening the scope of the confidentiality requirements, (2) changes concerning exceptions authorizing the disclosure of confidential information, and lastly, (3) non-substantive changes intended to improve the clarity and accuracy of the regulations.

During the proposed rule’s comment period, NMFS received several requests

from fishery management councils and representatives of fishing and environmental organizations to extend the comment period to allow the councils and other organizations to review the proposed rule and prepare comments. On June 13, 2012, NMFS published a notice in the **Federal Register** extending the comment period end date of the proposed rule from June 22, 2012 to August 21, 2012 (77 FR 35349). Subsequently, NMFS received requests to extend the comment period beyond August 21, 2012. In response, NMFS published a notice in the **Federal Register** extending the comment period an additional 60 days, from August 21, 2012 to October 21, 2012 (July 26, 2012, 77 FR 43803).

NMFS would like to reevaluate the proposed revisions to the existing regulations governing the confidentiality of information submitted in compliance with the Magnuson-Stevens Act. As a result, NMFS has decided that the changes covered in the proposed rule from 2012 are not warranted at this time. Therefore, NMFS is withdrawing the proposed rule published in the **Federal Register** on May 23, 2012 (77 FR 30486).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 5, 2017.

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Notice of Intent to Grant Exclusive License

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of intent.

SUMMARY: Notice is hereby given that the U.S. Department of Agriculture, Agricultural Research Service, intends to grant to Huvepharma, Inc. of Peachtree City, Georgia, an exclusive license to U.S. Patent Application Serial No. 15/108,725, "MUTATED SALMONELLA ENTERIACA", filed on June 28, 2016.

DATES: Comments must be received on or before February 13, 2017.

ADDRESSES: Send comments to: USDA, ARS, Office of Technology Transfer, 5601 Sunnyside Avenue, Rm. 4-1174, Beltsville, Maryland 20705-5131.

FOR FURTHER INFORMATION CONTACT: Mojdeh Bahar of the Office of Technology Transfer at the Beltsville address given above; telephone: 301-504-5989.

SUPPLEMENTARY INFORMATION: The Federal Government's patent rights in this invention are assigned to the United States of America, as represented by the Secretary of Agriculture. It is in the public interest to so license this invention as Huvepharma, Inc. of Peachtree City, Georgia has submitted a complete and sufficient application for a license. The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within thirty (30) days from the date of this published Notice, the Agricultural Research Service receives written evidence and argument which establishes that the grant of the license would not be consistent with the

requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Mojdeh Bahar,
Assistant Administrator.

BILLING CODE 3410-03-P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

January 10, 2017.

The Department of Agriculture has submitted the following information collection requirement(s) to Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13. Comments are requested regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by February 13, 2017 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725 17th Street NW., Washington, DC 20502. Commenters are encouraged to submit their comments to OMB via email to: OIRA_Submission@OMB.EOP.GOV or fax (202) 395-5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250-7602. Copies of the submission(s) may be obtained by calling (202) 720-8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to

the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Rural Utilities Service

Title: 7 CFR 1783, Revolving Fund Program.

OMB Control Number: 0572-0138.

Summary of Collection: Section 6002 of the Farm Security and Rural Investment Act of 2002 amended the Consolidated Farm and Rural Development Act by adding a grant program that established the Revolving Fund Program (RFP) to assist communities with water or wastewater systems. Qualified private non-profit organizations will receive RFP grant funds to establish a revolving loan fund. Loans will be made to eligible entities to finance predevelopment costs of water or wastewater projects, or short-term small capital projects not part of the regular operation and maintenance of current water and wastewater systems.

Need and Use of the Information: Non-profit organizations applying for the RFP grant(s) must submit an application package that includes an application form, narrative proposal (work plan), various other forms, certifications, and supplemental information. The Rural Development State Offices and the Rural Utilities Service National Office staff will use the information collected to determine applicant eligibility, project feasibility, and the applicant's ability to meet the grant and regulatory requirements. Grant recipients will set up a revolving loan fund to provide loans to finance predevelopment costs of water or wastewater projects, or short-term small capital projects not part of the regular operation and maintenance of current water and wastewater systems.

Description of Respondents: Not-for-profit institutions.

Number of Respondents: 4.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 376.

Charlene Parker,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410-15-P

DEPARTMENT OF AGRICULTURE**Office of the Secretary****Privacy Act of 1974: Notice of Computer Matching Agreement Between Food Nutrition Service (FNS) and State Agencies Administering the Supplemental Nutrition Assistance Program (SNAP)**

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice of proposed new Computer Matching Agreement.

SUMMARY: In accordance with the Privacy Act of 1974, as amended by the Computer Matching and Privacy Protection Act of 1988 (Pub. L. 100503), Office of Management and Budget (OMB) Guidelines on the Conduct of Matching Programs (54 FR 25818 published June 19, 1989), and OMB Circular No. A130, revised November 28, 2000, the USDA, Food and Nutrition Service is publishing notice of its intent to conduct a computer matching program with the State agencies of all 50 States and the State agencies of the District of Columbia and the territories of Guam and the Virgin Islands administering the Supplemental Nutrition Assistance Program (SNAP). Under this matching program, FNS will provide records from the Electronic Disqualified Recipient System (eDRS) to State agencies to verify SNAP recipient (applicants and individuals being certified or recertified for eligibility) eligibility for SNAP benefits.

DATES: The effective date of this Computer Matching Agreement will begin 30 days from the publication date in the **Federal Register** or 30 days from the date copies of the approved agreement and the notice of the matching program are sent to the Congressional committee of jurisdiction under subsections (0)(2)(B) and (r) of the Privacy Act, as amended, or 30 days from the date the approved agreement is sent to the Office of Management and Budget, whichever is later, provided no comments are received which result in a contrary determination.

ADDRESSES: State Administration Branch, Program Accountability and Administration Division, Supplemental Nutrition Assistance Program, 3101 Park Center Drive, Room 818, Alexandria, Virginia 22302.

FOR FURTHER INFORMATION CONTACT: Jane Duffield, (703) 605-4385.

SUPPLEMENTARY INFORMATION:

FNS Computer Matching Program Subject to the Privacy Act

The purpose of this FNS Computer Matching Program is to provide and disclose information about individuals disqualified from the program to the State agency in order to allow the State agency to assist the State agency in determining eligibility status of individuals applying for or receiving program benefits and to assign the correct disqualification periods for individuals determined to be disqualified from the program.

Notice of Computer Matching Program

The States will match SNAP recipient records with eDRS to verify the recipient's eligibility for SNAP benefits.

A. Participating Agencies

The U.S. Department of Agriculture FNS and the State agencies of all 50 States, including the State agencies of the District of Columbia and the territories of Guam and the Virgin Islands.

B. Purpose of the Matching Program

The State agencies shall use eDRS to conduct matches as specified in 7 CFR 273.16 on initial program applications prior to certification and to ascertain the appropriate penalty to impose based on past disqualifications in a case under consideration.

C. Authority for Conducting the Matching Program

The legal authority for conducting the matching program is the Food and Nutrition Act of 2008, as amended. Section 6(b) of the Act, 7 U.S.C. 2015(b), prescribes mandatory periods of ineligibility for persons found on one or more occasions to have committed fraud, misrepresentation, or other violation of statute or regulation in connection with SNAP eligibility and use of benefits. Section 6(b)(4), prescribes regulations to ensure that appropriate State and Federal entities forward information concerning determinations rising out of such proscribed activity by a specific individual. The States agencies shall also use eDRS to conduct matches as specified in 7 CFR 273.16 on initial program application prior to certification.

D. Categories of Records and Individuals Covered

The State agency agrees to the following:

1. To update eDRS at least monthly with information on individuals disqualified from the program. The specific data elements that will be

reported on such individuals are full name, Social Security Number, date of birth, sex, State and locality in which the disqualification was either determined or implemented, disqualification number, disqualification length, decision date, disqualification start date, and a State case identification number if used. The State will also provide the title, organization, and phone number of the contacts which will verify the information submitted for each locality identified in the records it submits. This information is supplied with the initial eDRS record and is updated if the contact information changes or if additional localities are added.

2. To obtain information from eDRS on the disqualification status of individuals against whom a disqualification period will be assessed in accordance with the provisions of 7 CFR 273.16.

3. To determine the eligibility of individuals applying for program benefits or to verify the continuing eligibility of individuals already participating.

FNS agrees to provide records from the eDRS to all State agencies.

E. Effective Dates of the Matching Program

The effective date of this Computer Matching Agreement will begin 30 days from the publication date in the **Federal Register** or 30 days from the date copies of the approved agreement and the notice of the matching program are sent to the Congressional committee of jurisdiction under subsections (0)(2)(B) and (r) of the Privacy Act, as amended, or 30 days from the date the approved agreement is sent to the Office of Management and Budget, whichever is later, provided no comments are received which result in a contrary determination.

F. Address for Receipt of Public Comments

Individuals wishing to comment on this matching program should send comments to Jane Duffield, Chief, State Administration Branch, Program Accountability and Administration Division, Supplemental Nutrition Assistance Program, Room 818, Alexandria, Virginia 22302, (703) 605-4385, Jane.Duffield@fns.usda.gov.

Dated: January 5, 2017.

Thomas J. Vilsack,
Secretary.

[FR Doc. 2017-00596 Filed 1-12-17; 8:45 am]

BILLING CODE 3410-30-P

DEPARTMENT OF AGRICULTURE**Farm Service Agency****Information Collection Request;
General Program Administration****AGENCY:** Farm Service Agency, USDA.**ACTION:** Notice; request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Farm Service Agency (FSA) is requesting comments from all interested individuals and organizations on an extension with a revision of a currently approved information collection associated with FSA's Farm Loan Programs (FLP) General Program Administration. The information collected is used to ensure that applicants meet statutory eligibility requirements, loan funds are used for authorized purposes, and the Government's interest in security is adequately protected.

DATES: We will consider comments that we receive by March 14, 2017.

ADDRESSES: We invite you to submit comments on this notice. In your comments, include date, volume, and page number of this issue of the **Federal Register**. You may submit comments by any of the following methods:

- *Federal Rulemaking Portal:* Go to <http://www.regulations.gov>. Follow the online instructions for submitting comments.

- *Mail:* Niki Chavez, Senior Loan Officer, USDA/FSA/FLP, STOP 0521, 1400 Independence Avenue SW., Washington, DC 20250-0521.

You may also send comments to the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20253. Copies of the information collection may be requested by contacting Niki Chavez at the above address.

FOR FURTHER INFORMATION CONTACT: Niki Chavez, (202) 690-6129.

SUPPLEMENTARY INFORMATION:

Title: Farm Loan Programs, General Program Administration.

OMB Control Number: 0560-0238.

Expiration Date of Approval: 05/31/2017.

Type of Request: Extension with a revision.

Abstract: General Program Administration, as specified in the 7 CFR 761, contains requirements that are applicable to making and servicing direct loans. The information collections are necessary to ensure that applicants meet statutory eligibility requirements, loan funds are used for authorized purposes, and the Federal

Government's interest in security is adequately protected. Specific information collection requirements include financial information in the form of a balance sheet and cash flow projection used in loan making and servicing decisions; information needed to establish joint bank accounts in which loan funds, proceeds derived from the sale of loan security and insurance proceeds, may be deposited; collateral pledges from financial institutions when the balance of a supervised bank account will exceed the maximum amount insurable by the Federal Government; and documents that construction plans and specifications to comply with state and local building standards.

Since the introduction of Microloan Loan (ML) Program certain forms are being used less in this request and there are fewer farmers and businesses reporting information resulting in a total program changes decrease of 6,997 respondents; 16,392 responses; and 19,678 burden hours.

For the following estimated total annual burden on respondents, the formula used to calculate the total burden hours is the estimated average time per response multiplied by the estimated total annual responses.

Estimated Respondent Burden: Public reporting burden for this collection of information is estimated to average 1.12 hours per response. The average travel time, which is included in the total annual burden, is estimated to be 1 hour per respondent.

Type of Respondents: Individuals or households, businesses or other for profit and farms.

Estimated Number of Respondents: 84,833.

Estimated Number of Responses per Respondent: 2.40.

Estimated Total Annual Number of Responses: 204,438.

Estimated Average Time per Response: 1.12 hours.

Estimated Total Annual Burden on Respondents: 229,203 hours.

We are requesting comments on all aspects of this information collection to help us to:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of FSA, including whether the information will have practical utility;

(2) Evaluate the accuracy of the FSA's estimate of burden including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of the information on those who are to respond, including through the use of appropriate automated, electronic, mechanical or other technological collection techniques or other forms of information technology.

All responses to this notice, including name and addresses when provided, will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Val Dolcini,*Administrator, Farm Service Agency.*

BILLING CODE 3410-05-P**DEPARTMENT OF AGRICULTURE****Food and Nutrition Service****Administrative Reviews in the School Nutrition Programs; Approval of Information Collection Request****AGENCY:** Food and Nutrition Service, USDA.**ACTION:** Notice of approval of Information Collection Request (ICR).

SUMMARY: The final rule titled Administrative Reviews in the School Nutrition Programs was published on July 29, 2016 (81 FR 50170). The Office of Management and Budget (OMB) cleared the associated information collection requirements (ICR) on September 12, 2016. This document announces approval of the ICR.

DATES: The ICR associated with the final rule published in the **Federal Register** on July 29, 2016, at 81 FR 50170, was approved by OMB on September 12, 2016, under OMB Control Number 0584-0006.

FOR FURTHER INFORMATION CONTACT: Sarah Smith-Holmes, Child Nutrition Monitoring and Operations Support Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, Alexandria, Virginia 22302; telephone: (703) 605-3223.

Dated: December 23, 2016.

Richard Lucas,*Acting Administrator, Food and Nutrition Service.*

[FR Doc. 2016-31955 Filed 1-12-17; 8:45 am]

BILLING CODE 3410-30-P

DEPARTMENT OF AGRICULTURE**Forest Service****Notice of Initiating the Assessment Phase of the Forest Plan Revision for the Salmon-Challis National Forest****AGENCY:** Forest Service, USDA.**ACTION:** Notice.

SUMMARY: The Salmon-Challis National Forest, located in east central Idaho, is initiating the first phase of the forest planning process pursuant to the 2012 National Forest System Land Management Planning rule. This process will result in a revised forest land management plan (Forest Plan) which describes the strategic direction for management of forest resources on the Salmon-Challis National Forest for the next ten to fifteen years. The planning process encompasses three-stages: assessment, plan revision, and monitoring. The first stage of the planning process involves assessing ecological, social, and economic conditions of the planning area, which is documented in an assessment report.

The Forest is inviting the public to contribute in the development of the Assessment. The Forest will be hosting public forums near the end of February into early March 2017 with a second set of meetings forthcoming in June 2017. We will invite the public to share information relevant to the assessment including existing information, current trends, and local knowledge. Public engagement opportunities associated with the development of the Assessment will be announced on the Web site cited below.

DATES: From January 2017 through August 2017, the public is invited to participate in the development of the Assessment. The draft assessment report for the Salmon-Challis National Forest is being initiated and is expected to be available in August 2017 on the Forest Web site at: <http://www.fs.usda.gov/scnf/>.

Following completion of the assessment, the Forest will initiate procedures pursuant to the National Environmental Policy Act (NEPA) to prepare and evaluate a revised forest plan.

ADDRESSES: Written correspondence can be sent to Salmon-Challis National Forest, 1206 S. Challis Street, Salmon, ID 83467, or sent via email to jmilligan@fs.fed.us. All correspondence, including names and addresses when provided, are placed in the record and are available for public inspection and copying.

FOR FURTHER INFORMATION CONTACT: Josh Milligan, Forest Plan Revision Team Leader at 208-756-5560. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8:00 a.m. and 8:00 p.m. (Eastern time), Monday through Friday.

More information on the planning process can also be found on the Salmon-Challis National Forest Planning Web site at <http://www.fs.usda.gov/detail/scnf/home/?cid=FSEPRD522039>.

SUPPLEMENTARY INFORMATION: The National Forest Management Act (NFMA) of 1976 requires that every National Forest System (NFS) unit develop a land management plan (LMP). On April 9, 2012, the Forest Service finalized its land management planning rule (2012 Planning Rule, 36 CFR part 291), which describes requirements for the planning process and the content of the land management plans. Forest plans describe the strategic direction for management of forest resources for ten to fifteen years, and are adaptive and amendable as conditions change over time. Pursuant to the 2012 Forest Planning Rule (36 CFR part 219), the planning process encompasses three-stages: assessment, plan revision, and monitoring. The first stage of the planning process involves assessing social, economic, and ecological conditions of the planning area, which is documented in an assessment report. This notice announces the start of the initial stage of the planning process, which is the development of the assessment report.

The second stage, formal plan revision, involves the development of our Forest Plan in conjunction with the preparation of an Environmental Impact Statement under the NEPA. Once the plan revision is completed, it will be subject to the objection procedures of 36 CFR part 219, subpart B, before it can be approved. The third stage of the planning process is the monitoring and evaluation of the revised plan, which is ongoing over the life of the revised plan.

The assessment rapidly evaluates existing information about relevant ecological, economic, cultural and social conditions, trends, and sustainability and their relationship to land management plans within the context of the broader landscape. This information builds a common understanding prior to entering formal plan revision. The development of the assessment will include public engagement.

With this notice, the Salmon-Challis National Forest invites other governments, non-governmental parties, and the public to contribute in assessment development. The intent of public engagement during development of the assessment is to identify as much relevant information as possible to inform the upcoming plan revision process. We encourage contributors to share material about existing conditions, trends, and perceptions of social, economic, and ecological systems relevant to the planning process. The assessment also supports the development of relationships with key stakeholders that will be used throughout the plan revision process.

As public meetings, other opportunities for public engagement, and public review and comment opportunities are identified to assist with the development of the forest plan revision, public announcements will be made, notifications will be posted on the Forest's Web site at: <http://www.fs.usda.gov/scnf/> and information will be sent out to the Forest's mailing list. If anyone is interested in being on the Forest's mailing list to receive these notifications, please contact Josh Milligan at the address identified above, or by sending an email jmilligan@fs.fed.us.

Responsible Official

The responsible official for the revision of the land management plan for the Salmon-Challis National Forest is Charles Mark, Forest Supervisor, Salmon-Challis National Forest.

Dated: January 4, 2017.

Charles A. Mark,
Forest Supervisor.

[FR Doc. 2017-00684 Filed 1-12-17; 8:45 am]

BILLING CODE 3411-15-P**DEPARTMENT OF AGRICULTURE****Forest Service****Superior National Forest; Minnesota; Application for Withdrawal****AGENCY:** Forest Service, USDA.**ACTION:** Notice of intent to prepare an environmental impact statement.

SUMMARY: The United States Forest Service (USFS) has submitted an application to the Secretary of Interior proposing a withdrawal of approximately 234,328 acres of National Forest System (NFS) lands, for a 20-year term, within the Rainy River Watershed on the Superior National Forest from disposition under United States mineral and geothermal leasing laws, subject to

valid existing rights. This proposal will also include an amendment to the Superior National Forest Land and Resource Management Plan to reflect this withdrawal.

The purpose of the withdrawal request is protection of the natural resources and waters located on NFS lands from the potential adverse environmental impacts arising from exploration and development of fully Federally-owned minerals conducted pursuant to the mineral leasing laws within the Rainy River Watershed that flow into the Boundary Waters Canoe Area Wilderness (BWCAW) and the Boundary Waters Canoe Area Wilderness Mining Protection Area (MPA) in northeastern Minnesota. The USFS acknowledges this proposed request subjects these NFS lands to temporary segregation for up to 2 years from entry under the United States mineral and geothermal leasing laws. The lands have been and will remain open to such forms of use and disposition as may be allowed by law on National Forest System lands including the disposition of mineral materials. The USFS recognizes that any segregation or withdrawal of these lands will be subject to valid existing rights and therefore inapplicable to private lands owned in fee, private mineral estates, and private fractional minerals interests. This notice also gives the public an opportunity to comment on the proposed request for withdrawal, and announces the opportunity for a future public meeting.

DATES: Comments concerning the proposed request for withdrawal and the scope of the environmental analysis must be received by April 13, 2017. This Notice coincides with the Bureau of Land Management's (BLM) "Notice of Application for Withdrawal and Notification of Public Meeting" announced today in the **Federal Register**. The USFS comment period for the EIS is commensurate with the BLM's 90-day comment period associated with the consideration of the USFS application to propose a withdrawal of approximately 234,328 acres of NFS lands from disposition under United States mineral and geothermal leasing laws (subject to valid existing rights) within the Rainy River Watershed on the Superior National Forest.

The draft environmental impact statement is expected June 2018 and the final environmental impact statement is expected January 2019. The USFS and BLM will hold a public meeting within the initial 90-day comment period to gather public input on the proposed request for withdrawal. This meeting

will be held at the Duluth Entertainment and Convention Center on March 16, 2017 from 5:00 to 7:30 p.m. CT (350 Harbor Drive, Duluth, MN 55802). The USFS will publish a notice of the meeting location and time in a local newspaper at least 30 days before the scheduled date of the meeting.

ADDRESSES: Address written comments regarding the environmental effects associated with this proposed request for withdrawal to Connie Cummins, Forest Supervisor, Superior National Forest. Written comments are to be mailed to 8901 Grand Avenue Place, Duluth, MN 55808-1122. Comments may also be sent via email to *comments-eastern-superior@fs.fed.us* or via facsimile to 218-626-4398.

FOR FURTHER INFORMATION CONTACT: Matt Judd, Superior National Forest (218-626-4382). The Superior National Forest Web site (<https://www.fs.usda.gov/projects/superior/landmanagement/projects>) also contains information relative to this proposed request for withdrawal.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday. This relay service is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The USFS has submitted an application on January 5, 2017 to the Secretary of the Interior proposing to withdraw the identified lands from disposition under United States mineral and geothermal leasing laws (subject to valid existing rights) for a period of 20 years.

All the NFS Lands identified in this application are described in Appendix A and displayed on a map in Appendix B. This application is available upon request at the Superior National Forest office (8901 Grand Ave Place, Duluth, MN 55808) or their Web site (<https://www.fs.usda.gov/projects/superior/landmanagement/projects>). The lands depicted on this map include NFS lands in the townships below, and all non-Federal lands within the exterior boundaries described below that are subsequently acquired by the Federal government to the boundary of the Boundary Waters Canoe Area Wilderness (BWCAW) and the Boundary Waters Canoe Area Wilderness Mining Protection Area (MPA).

National Forest System Lands

Superior National Forest

4th Principal Meridian, Minnesota

Tps. 61 and 62 N., Rs. 5 W.,
Tps. 60 to 62 N., Rs. 6 W.,
Tps. 59 and 61 N., Rs. 7 W.,
Tps. 59 to 61 N., Rs. 8 W., to the boundary of the BWCAW
Tps. 58 to 61 N., Rs. 9 W., to the boundary of the BWCAW
Tps. 57 to 62 N., Rs. 10 W.,
Tps. 57 to 63 N., Rs. 11 W.,
Tp. 59 N., R. 12 W.,
Tps. 61 to 63 N., Rs. 12 W.,
Tps. 61 to 63 N., Rs. 13 W.,
Tp. 63 N., R. 15 W.,
Tp. 63 N., R. 16 W.,
Tps. 65 to 67 N., Rs. 16 W.,
Tp. 64 N., R. 17 W.,

The areas described contain approximately 234,328 acres of NFS lands that overlay Federally-owned minerals in Cook, Lake, and Saint Louis Counties, Minnesota located adjacent to the BWCAW and the MPA.

Purpose and Need for Action

The purpose of this withdrawal request is protection of NFS lands located in the Rainy River Watershed, and preservation of NFS lands within the BWCAW, from the potential adverse environmental impacts arising from exploration and development of fully Federally-owned minerals conducted pursuant to the Federal mineral leasing laws.

The 234,328 acres of Federal land in this proposed request for withdrawal are located within the Rainy River watershed on the Superior National Forest and are adjacent to the BWCAW and MPA. There is known interest in the development of hardrock minerals that have been found—and others that are thought to exist—in sulfide-bearing rock within this portion of the Rainy River Watershed. Any development of these mineral resources could ultimately result in the creation of permanently stored waste materials and other conditions upstream of the BWCAW and the MPA with the potential to generate and release water with elevated levels of acidity, metals, and other potential contaminants. Additionally, any failure of mitigation measures, containment facilities or remediation efforts at mine sites and their related facilities located upstream of the BWCAW and the MPA could lead to irreversible impacts upon natural resources and the inability to meet the purposes for the designation of the BWCAW and the MPA specified by Sec. 2 of Public Law 95-495, 92 Stat. 1649 (1978) and the inability to comply with Section 4(b) of the 1964 Wilderness Act. These concerns are exacerbated by the likelihood that perpetual maintenance

of waste storage facilities along with the perpetual treatment of water discharge emanating from the waste storage facilities and the mines themselves would likely be required to ameliorate these adverse effects. Yet, it is not at all certain that such maintenance and treatment can be assured over many decades.

Proposed Action

The United States Forest Service (USFS) has submitted an application to the Secretary of Interior proposing a withdrawal, for a 20-year term, of approximately 234,328 acres of NFS lands within the Rainy River Watershed on the Superior National Forest from disposition under United States mineral and geothermal leasing laws, subject to valid existing rights. This proposal will also include an amendment to the Superior National Forest Land and Resource Management Plan to reflect this withdrawal.

Possible Alternatives

In addition to the USFS proposal, a "no action" alternative will be analyzed, and no additional alternatives have been identified at this time. No alternative sites are feasible because the lands subject to the withdrawal application are the lands for which protection is sought from the impacts of exploration and development under the United States mineral and geothermal leasing laws.

Lead and Cooperating Agencies

The USFS will be the lead agency. The USFS will designate the BLM as a cooperating agency. The BLM shall independently evaluate and review the draft and final environmental impact statements and any other documents needed for the Secretary of Interior to make a decision on the proposed withdrawal.

Responsible Official

Forest Supervisor, Superior National Forest.

Nature of Decision To Be Made

The Responsible Official will complete an environmental impact statement, documenting the information and analysis necessary to support a decision on withdrawal, and to support an amendment to the Superior National Forest Land and Resource Management Plan.

The Secretary of Interior is the authorized official to approve a proposal for withdrawal.

The Responsible Official is the authorized official to approve an amendment to the Superior National

Forest Land and Resource Management Plan to reflect the proposed withdrawal.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. The USFS and Bureau of Land Management (BLM) will hold a public meeting within the initial 90-day comment period to gather public input on the proposed request for withdrawal. This meeting will be held at the Duluth Entertainment and Convention Center on March 16, 2017 from 5:00 to 7:30 p.m. CT (350 Harbor Drive, Duluth, MN 55802). Further opportunities for public participation will be provided upon publication of the Draft EIS, including a minimum 45-day public comment period. A plan amendment is subject to pre-decisional objection procedures at 36 CFR 219, Subpart B.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, however.

Dated: January 6, 2017.

Richard Periman,

Deputy Forest Supervisor.

[FR Doc. 2017-00506 Filed 1-12-17; 8:45 am]

BILLING CODE 3410-11-P

DEPARTMENT OF COMMERCE

Census Bureau

Generic Clearance for Proposed Information Collection; Comment Request; Generic Clearance for Internet Nonprobability Panel Pretesting and Qualitative Survey Methods Testing

AGENCY: U.S. Census Bureau, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information

collections, as required by the Paperwork Reduction Act of 1995.

DATES: To ensure consideration, written comments must be submitted on or before March 14, 2017.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at jjessup@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Jennifer Hunter Childs, U.S. Census Bureau, 4600 Silver Hill Road, Center for Survey Measurement, Washington, DC 20233 or (202)603-4827.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau is committed to conducting research in a cost efficient manner. Prior to this generic clearance, several stages of testing occurred in research projects at the Census Bureau. As a first stage of research, the Census Bureau pretests questions on surveys or censuses and evaluates the usability and ease of use of Web sites using a small number of subjects during focus groups, usability and cognitive testing. These projects are in-person and labor-intensive, but typically only target samples of 20 to 30 respondents. This small-scale work is done through another existing OMB generic clearance. Often the second stage is a larger-scale field test with a split-panel design of a survey or a release of a Census Bureau data dissemination product with a feedback mechanism. The field tests often involve a lot of preparatory work and often are limited in the number of panels tested due to the cost considerations. They are often targeted at very large sample sizes with over 10,000 respondents per panel. These are typically done using stand-alone OMB clearances.

Cost efficiencies can occur by testing some research questions in a medium-scale test, using a smaller number of participants than what we typically use in a field test, yet a larger and more diverse set of participants than who we recruit for cognitive and usability tests. Using Internet panel pretesting, we can answer some research questions more thoroughly than in the small-scale testing, but less expensively than in the large-scale field test. This clearance established a medium-scale (defined as having sample sizes from 100-2000 per study), cost-efficient method of testing

questions and contact strategies over the Internet through different types of nonprobability samples.

This research program will be used by the Census Bureau and survey sponsors to test alternative contact methods, including emails and text messages (via an opt-in strategy), improve online questionnaires and procedures, reduce respondent burden, and ultimately increase the quality of data collected in the Census Bureau censuses and surveys. We will use the clearance to conduct pretesting of decennial and demographic census and survey questionnaires prior to fielding them as well as communications and/or marketing strategies and data dissemination tools for the Census Bureau. The primary method of identifying measurement problems with the questionnaire or survey procedure is split panel tests. This will encompass both methodological and subject matter research questions that can be tested on a medium-scale nonprobability panel.

This research program will also be used by the Census Bureau for remote usability testing of electronic interfaces and to perform other qualitative analyses such as respondent debriefings. An advantage of using remote, medium-scale testing is that participants can test products at their convenience using their own equipment, as opposed to using Census Bureau-supplied computers. A diverse participant pool (geographically, demographically, or economically) is another advantage. Remote usability testing would use click through rates and other paradata, accuracy and satisfaction scores, and written qualitative comments to determine optimal interface designs and to obtain feedback from respondents.

The public is currently offered an opportunity to participate in this research remotely, by signing up for an online research panel. If a person opts in, the Census Bureau will occasionally email (or text, if applicable) the person an invitation to complete a survey for one of our research projects. Invited respondents will be told the topic of the survey, and how long it will take to complete it. Under this clearance, we will also conduct similar-scale and similarly designed research using other email lists to validate preliminary findings and expand the research.

II. Method of Collection

Split sample experiments. This involves testing alternative versions of questionnaires, invitations to questionnaires (e.g., emails or text messages), or Web sites, at least some of which have been designed to address problems identified in draft versions or

versions from previous waves. The use of multiple questionnaires, invitations, or Web sites, randomly assigned to permit statistical comparisons, is the critical component here; data collection will be via the Internet. Comparison of revised questionnaires (or invitations) against a control version, preferably, or against each other facilitates statistical evaluation of the performance of alternative versions of the questionnaire (or invitation or Web site).

The number of versions tested and the number of cases per version will depend on the objectives of the test. We cannot specify with certainty a minimum panel size, although we would expect that no questionnaire versions would be administered to less than fifty respondents.

Split sample tests that incorporate methodological questionnaire design experiments will have a larger maximum sample size (up to several hundred cases per panel) than other pretest methods. This will enable the detection of statistically significant differences, and facilitate methodological experiments that can extend questionnaire design knowledge more generally for use in a variety of Census Bureau data collection instruments.

Usability Interviews: This method involves getting respondent input to aid in the development of automated questionnaires and Web sites and associated materials. The objective is to identify problems that keep respondents from completing automated questionnaires accurately and efficiently with minimal burden, or that prevent respondents from successfully navigating Web sites and finding the information they seek. Remote usability testing may be conducted under this clearance, whereby a user would receive an invitation to use a Web site or survey, then answer targeted questions about that experience.

Qualitative Interviews: This method involves one-on-one (or sometimes group) interviews in which the respondent is typically asked questions about survey content areas, survey questions or the survey process. A number of different techniques may be involved, including cognitive interviews and focus groups. The objective is to identify problems of ambiguity or misunderstanding, or other difficulties respondents may have answering survey questions in order to improve the information ultimately collected in large scale surveys and censuses.

Data collection for this project is authorized under the authorizing legislation for the questionnaire being tested. This authorization may be Title

13, United States Code (U.S.C.), Sections 131, 141, 161, 181, 182, 193, and 301 for Census Bureau-sponsored surveys, and Title 13 and 15 for surveys sponsored by other Federal agencies. We do not now know what other titles will be referenced, since we do not know what survey questionnaires will be pretested during the course of the clearance.

Literature on and considerations about the use of nonprobability samples for this type of work have recently been thoroughly covered by a Task Force commissioned by the American Association for Public Opinion Research and are well documented there (Baker, et al., 2013).

The information collected in this program of developing and testing questionnaires will be used by staff from the Census Bureau and sponsoring agencies to evaluate and improve the quality of the data in the surveys and censuses that are ultimately conducted. Because the questionnaires being tested under this clearance are still in the process of development, the data that result from these collections are not considered official statistics of the Census Bureau or other Federal agencies. Data will be included in research reports prepared for sponsors inside and outside of the Census Bureau. The results may also be prepared for presentations related to survey methodology at professional meetings or publications in professional journals.

III. Data

OMB Control Number: 0607-0978.
Form Number(s): TBD.

Type of Review: Extension of a Currently Approved Collection.

Affected Public: Individuals and households.

Number of Respondents: 60,000.

Average Hours per Response: 0.167

Burden Hours: 10,000.

Estimated Total Annual Cost to Public: None.

Respondent's Obligation: Voluntary.

Legal Authority: Data collection for this project is authorized under the authorizing legislation for the questionnaire being tested. This may be Title 13, U.S.C., Sections 131, 141, 161, 181, 182, 193, and 301 for Census Bureau-sponsored surveys, and Title 13 and 15 for surveys sponsored by other Federal agencies. We do not now know what other titles will be referenced, since we do not know what survey questionnaires will be pretested during the course of the clearance.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information

is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Sheleen Dumas,

PRA Departmental Lead, Office of the Chief Information Officer.

BILLING CODE 3510-07-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request; Report of Requests for Restrictive Trade Practice or Boycott

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Industry and Security.

Title: Report of Requests for Restrictive Trade Practice or Boycott.

Form Number(s): BIS-621P, BIS-6051P, BIS-6051 P-a.

OMB Control Number: 0694-0012.

Type of Request: Regular.

Burden Hours: 482.

Estimated Number of Respondents: 412.

Estimated Time per Response: 1 hour to 1 hour and 30 minutes.

Needs and Uses: This information is used to monitor requests for participation in foreign boycotts against countries friendly to the U.S. The information is analyzed to note changing trends and to decide upon appropriate action to be taken to carry out the United States' policy of discouraging its citizens from participating in foreign restrictive trade practices and boycotts directed against friendly countries.

Affected Public: Business or other for-profit organizations.

Frequency: On Occasion.

Respondent's Obligation: Mandatory.

This information collection request may be viewed at [reginfo.gov](http://www.reginfo.gov/public/) <http://www.reginfo.gov/public/>. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395-5806.

Sheleen Dumas,

PRA Departmental Lead, Office of the Chief Information Officer.

BILLING CODE 3510-33-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B-003-2017]

Foreign-Trade Zone (FTZ) 122—Corpus Christi, Texas, Notification of Proposed Production Activity, Superior Weighting Products LLC, (Barite/Calcium Carbonate/Bentonite), Corpus Christi, Texas

The Port of Corpus Christi, grantee of FTZ 122, submitted a notification of proposed production activity to the FTZ Board on behalf of Superior Weighting Products LLC (Superior Weighting), located in Corpus Christi, Texas. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on January 3, 2017.

A separate application for subzone designation at the Superior Weighting facility was submitted and will be processed under Section 400.38 of the Board's regulations. The facility will be used to process raw barite into ground barite, and to further process calcium carbonate (limestone) and bentonite. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status materials and components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt Superior Weighting from customs duty payments on the foreign-status components used in export production. On its domestic sales, Superior Weighting would be able to choose the duty rate during customs entry procedures that applies to natural barium sulfate (barite) ground, processed calcium carbonate (limestone)

and processed bentonite (duty rates 0.0%) for the foreign-status inputs noted below. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The components and materials sourced from abroad include: natural barium sulfate (raw barite) not ground (duty rate ranging from \$0.00 to \$1.25/t-CN); calcium carbonate (limestone) (duty rate 0.0%); bentonite (duty rate 0.0%).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is February 22, 2017.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230-0002, and in the "Reading Room" section of the Board's Web site, which is accessible via www.trade.gov/ftz.

For further information, contact Juanita H. Chen at Juanita.Chen@trade.gov or (202) 482-1378.

Dated: January 6, 2017.

Elizabeth Whiteman,

Acting Executive Secretary.

Foreign-Trade Zones Board

[B-61-2016]

Foreign-Trade Zone (FTZ) 79—Tampa, Florida; Authorization of Production Activity; Givaudan Flavors Corporation (Flavor Products); Lakeland, Florida

On September 12, 2016, Givaudan Flavors Corporation submitted a notification of proposed production activity to the Foreign-Trade Zones (FTZ) Board for its facility within Subzone 79E, in Lakeland, Florida.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (81 FR 64870, September 21, 2016). The FTZ Board has determined that no further review of the activity is warranted at this time. The production activity described in the notification is authorized, subject to the FTZ Act and the Board's regulations, including Section 400.14.

Dated: January 9, 2017.

Andrew McGilvray,

Executive Secretary.

Foreign-Trade Zones Board

[B-64-2016]

Foreign-Trade Zone (FTZ) 21— Dorchester County, South Carolina, Authorization of Limited Production Activity, Volvo Car US Operations, Inc., (Motor Vehicles and Related Parts), Ridgeville, South Carolina

On September 9, 2016, Volvo Car US Operations, Inc. (Volvo) submitted a notification of proposed production activity to the Foreign-Trade Zones (FTZ) Board for its facility within FTZ 21, in Ridgeville, South Carolina.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (81 FR 66257-66259, September 27, 2016). The FTZ Board has determined that further review of part of the proposed activity is warranted at this time. The production activity described in the notification is authorized on a limited basis, subject to the FTZ Act and the Board's regulations, including Section 400.14, and further subject to a restriction requiring that the following foreign-status materials/components be admitted to the subzone in privileged foreign status (19 CFR 146.41): upholstery leather (HTSUS 4107.99); leather cases/bags (HTSUS 4202.11); felt strips (HTSUS 5602.10); manmade fiber felt shapes (HTSUS 5602.90); felt damping strips (HTSUS 5602.90); netting of twines or ropes (HTSUS 5608.19); manmade fiber twine/cordage/rope nettings (HTSUS 5608.90); nylon carpets (HTSUS 5703.20); tufted other manmade textile carpets/mats (HTSUS 5703.30); felt carpets (HTSUS 5704.90); manmade fiber tufted and non-tufted carpets/mats (HTSUS 5705.00); velcro straps (HTSUS 5806.10); vent pads of polyester fleece (HTSUS 5911.90); textile child seat protector covers (HTSUS 8708.99); textile sun shade curtains (HTSUS 8708.99); manmade fiber cargo nets (HTSUS 8708.99); textile seats/arm rests/head rests/seat belts and related parts (HTSUS 9401.90 and HTSUS 9403.90); and, textile child safety seat covers (HTSUS 9401.90).

Dated: January 9, 2017.

Foreign-Trade Zones Board

[S-153-2016]

Approval of Expansion of Subzone 100D; Thor Industries, Inc.; Jackson Center, Ohio

On November 1, 2016, the Executive Secretary of the Foreign-Trade Zones (FTZ) Board docketed an application submitted by the Greater Dayton Foreign-Trade Zone, Inc., grantee of FTZ 100, requesting an expansion of Subzone 100D subject to the existing activation limit of FTZ 100, on behalf of Thor Industries, Inc., in Jackson Center, Ohio.

The application was processed in accordance with the FTZ Act and Regulations, including notice in the **Federal Register** inviting public comment (81 FR 78773-78774, November 9, 2016). The FTZ staff examiner reviewed the application and determined that it meets the criteria for approval. Pursuant to the authority delegated to the FTZ Board Executive Secretary (15 CFR Sec. 400.36(f)), the application to expand Subzone 100D is approved, subject to the FTZ Act and the Board's regulations, including Section 400.13, and further subject to FTZ 100's 2,000-acre activation limit.

Dated: January 9, 2017.

Andrew McGilvray,

Executive Secretary.

Bureau of Industry and Security

[Docket No. 170106032-7037-01]

RIN 0694-XC035

Increase of Controls: Infrared Detection Items

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Notice of inquiry with request for comments.

SUMMARY: On October 12, 2016, the Bureau of Industry and Security (BIS) published a final rule entitled "Revisions to the Export Administration Regulations (EAR): Control of Fire

Control, Laser, Imaging, and Guidance Equipment the President Determines No Longer Warrant Control Under the United States Munitions List (USML)." This notice of inquiry is published to request comments from the public on the impact of further increasing certain controls implemented by that final rule.

DATES: Comments must be received by BIS no later than March 14, 2017.

ADDRESSES: Comments on this rule may be submitted to the Federal rulemaking portal (www.regulations.gov). The regulations.gov ID for this rule is: BIS-2017-0001. Please refer to RIN 0694-XC035 in all comments.

FOR FURTHER INFORMATION CONTACT: For questions regarding the ECCNs included in this rule, contact Christopher Costanzo at 202-482-0718 or Email Christopher.Costanzo@bis.doc.gov.

SUPPLEMENTARY INFORMATION:

Background

On October 12, 2016, the Bureau of Industry and Security (BIS) published a final rule entitled "Revisions to the Export Administration Regulations (EAR): Control of Fire Control, Laser, Imaging, and Guidance Equipment the President Determines No Longer Warrant Control Under the United States Munitions List (USML)" (81 FR 70320), hereafter referred to as the "October 12 final rule." This final rule was preceded by two proposed rules published on May 5, 2015 (80 FR 25798) ("May 5, 2015 proposed rule") and February 19, 2016 (81 FR 8421) ("February 19, 2016 proposed rule"). Revisions made by the October 12 final rule became effective on December 31, 2016. During the course of public comment and interagency discussion on the rule that became effective at the end of 2016, several ideas for new types of controls under the ITAR arose. Because these controls were not proposed earlier and not subject to public comment, they were not included in the October 12 final rule. Thus, the Department of State is publishing a notice of inquiry addressing those controls. Along with those possible new controls under the ITAR, this notice of inquiry requests comments from the public on the potential impact of increasing certain EAR controls established in the October 12 final rule. Items controlled in certain Export Control Classification Numbers (ECCNs) in Category 6 of the Commerce Control List (CCL) can be incorporated into foreign military commodities. To provide greater visibility into exports, reexports, and in-country transfers of such items, the October 12 final rule increased the scope of controls described in § 744.9 (Restrictions on

exports, reexports, and transfers of certain cameras, systems, or related components) and the scope of Export Control Classification Number (ECCN) 0A919 (“Military Commodities” Located and Produced Outside the United States . . .). This Notice of Inquiry seeks public comment on the impact of imposing additional license requirements for certain transactions, including the effect such controls would have on: The national security or foreign policy interests of the United States; the export performance of the United States; the competitive position of the United States in the international economy; the international reputation of the United States as a supplier of goods and technology; or the economic well-being of individual United States companies. This includes comments addressing the competitive advantage of U.S. companies vis-à-vis non-U.S. companies, any impacts to the technological edge of U.S. companies, and whether these changes would influence assembly and integration activities inside and outside of the United States. Public comments should also state whether or not foreign availability exists for items subject to potential additional controls and, to the extent such foreign availability exists, describe such foreign availability in detail.

Section 734.4 “De Minimis U.S. Content” for 0A919 Foreign Military Commodities

Prior to December 31, 2016. Section 734.4(a)(5) of the EAR provided that there is no *de minimis* level for non-U.S. made military commodities, as described in ECCN 0A919, that incorporate uncooled thermal imaging cameras controlled in 6A003.b.4.b. The May 5, 2015 proposed rule maintained that standard in § 734.4(a)(5), but proposed to increase the scope of incorporated infrared detection items in ECCN 0A919 to include ECCNs 6A002, 6A003, 6A990, or 6A993.a (having a maximum frame rate equal to or less than 9 Hz and thus meeting the criterion of Note 3.a to 6A003.b.4). The February 19, 2016 proposed rule maintained the change in scope to ECCN 0A919 but narrowed the destinations subject to the no *de minimis* provision in § 734.4(a)(5) to Group D:5 countries. This was done to treat foreign-made products using such dual-use items the same as foreign-made products using items previously subject to the ITAR (*i.e.*, 600 series and 9x515 items)

As of December 31, 2016. Consistent with the February 19, 2016 proposed rule, the October 12 final rule broadened the scope of ECCN 0A919 to

include incorporated infrared detection items in ECCNs 6A002, 6A003, 6A990, or 6A993.a (having a maximum frame rate equal to or less than 9 Hz and thus meeting the criterion of Note 3.a to 6A003.b.4) and limited the destinations subject to the no *de minimis* provision to Group D:5 countries.

Potential Revision. Expand the destinations subject to the no *de minimis* provision to “any destination, except Canada,” for non-U.S. military commodities (0A919) to those that incorporate any of the following: (1) Image intensifier tubes having a figure of merit (FOM) exceeding 1,400 lp/mm (line pairs per millimeter); (2) an infrared focal plane array (FPA) with format exceeding 75,000 detector elements, or (3) related infrared focal plane array read-out integrated circuit having more than 75,000 unit cells. FOM would be defined as the product of the tube’s signal to noise ratio (SNR) and limiting resolution ($FOM = SNR \text{ (unitless)} \times \text{Limiting Resolution (lp/mm)}$) and is a term of art regularly associated with exports of image intensifier tubes and related devices subject to the ITAR.

Rationale. With no *de minimis* control level for commodities controlled by ECCN 0A919.a.1 only for countries listed in Country Group D:5 of Supplement No. 1 to part 740 of the EAR, there could be reexports, without U.S. Government review, of certain foreign-made military commodities incorporating items subject to the EAR to countries not in Country Group D:5. Examples of military commodities that would not reach the generally applicable 25 percent *de minimis* level, absent other controlled EAR content, and thus would not require a U.S. reexport license to countries outside of Country Group D:5, include: (1) Thermal Weapon Sights (320 × 256 bolometer (VOx or alpha Si)): Approximate cost: >\$4,000. Incorporated microbolometer core camera: Approximate cost: \$400 – \$700; (2) Multi-sensor targeting turrets (640x480 InSb): Approximate cost: >\$250,000. Incorporated Integrated Detector Cooler Assembly: Approximate cost: \$25,000. (3) Airborne Targeting Pods (640 x 480 MW HgCdTe): Approximate cost: >\$1,000,000. Incorporated Integrated Detector Cooler Assembly: Approximate cost: \$25,000. (4) Airborne Infrared Search and Track (640 x 480 InSb): Approximate cost: >\$1,000,000. Incorporated Integrated Detector Cooler Assembly: Approximate cost: \$25,000.

The absence of U.S. controls over the reexport of such military commodities could result in potentially high performance systems incorporating U.S.

components being exported to a wide range of destinations outside of Country Group D:5 without U.S. Government review.

Section 740.20, License Exception Strategic Trade Authorization (STA) for Certain Night Vision Equipment To Be Embedded

Prior to December 31, 2016. Section 740.20(b)(2)(x) restricted the use of License Exception STA for specific commodities controlled by ECCN 6A002, as well as related technology controlled by 6E001 or 6E002. The May 5, 2015 proposed rule expanded that restriction to also include ECCNs 0E987; 6A002; 6A990; 6D002 (for the use of commodities controlled under ECCN 6A002.b); 6D003.c; 6D991 (for the development, production, or use of commodities controlled under ECCNs 6A002, 6A003, or 6A990); 6E001 (for the development of commodities controlled under ECCNs 6A002 or 6A003); 6E002 (for the production of commodities controlled under ECCNs 6A002 or 6A003); 6E990; and 6E994. The February 19, 2016 proposed rule maintained those restrictions, but did not include the restriction for ECCN 6E994 since that proposed ECCN was removed.

As of December 31, 2016. Consistent with the February 19, 2016 proposed rule, the October 12 final rule expanded that restriction to include all items in the following ECCNs: 0E987; 6A002; 6A990; 6D002 (for the use of commodities controlled under ECCN 6A002.b); 6D003.c; 6D991 (for the development, production, or use of commodities controlled under ECCNs 6A002, 6A003, or 6A990); 6E001 (for the development of commodities controlled under ECCNs 6A002 or 6A003); 6E002 (for the production of commodities controlled under ECCNs 6A002 or 6A003); and 6E990.

Potential Revision. Remove STA eligibility for infrared imaging cameras controlled in ECCN 6A003.b.4 that:

(i) Are being exported to be embedded into a higher level assembly, system or equipment; and

(ii) incorporate two dimensional FPAs specified in either ECCN 6A002.a.3.c or ECCN 6A002.a.3.f, and that have more than 328,000 detector elements.

Rationale. Removing STA eligibility for such items will ensure that those infrared imaging cameras to be embedded (*e.g.*, kits, cores, modules) that could exceed the size of those incorporated in military fielded systems, receive U.S. Government review when exported for incorporation into commercial/civil equipment and systems.

ECCN 6A993

Prior to December 31, 2016. The export, reexport or in-country transfer of cameras in ECCN 6A993.a (meeting the criteria of Note 3 to ECCN 6A003.b.4) require a license if destined to a country designated as a state sponsor of terrorism (Country Group E:1). The May 5, 2015 and February 19, 2016 proposed rules expanded the license requirement in § 744.9 to include those cameras when destined to a military end-user or to be incorporated into a military commodity.

As of December 31, 2016. Consistent with those proposed rules, the October 12 final rule expanded the license requirement to those cameras when destined to a military end-user or to be incorporated into a military commodity.

Potential Revision. Require a license for the export, reexport or in-country transfer, to or in a D:5 country, of cameras that meet the criteria of Note 3 to ECCN 6A003.b.4 and incorporate a microbolometer FPA with greater than 75,000 detector elements and that are being exported to be incorporated into a higher level assembly, equipment or system.

Rationale: Section 744.9 does not cover camera cores to be incorporated in imaging cameras for civil end-users or civil commodities. These cores could be incorporated into night vision thermal monoculars that are not regarded as weapon sights but that could be used as such. These cores can also be incorporated into civil UAVs that could provide day and night surveillance of U.S. and coalition forces.

Supplement No. 1 to Part 774 (Commerce Control List)**ECCN 3C001**

Current control status. ECCN 3C001 has NS Column 2 and AT Column 1 controls. ECCN 3C001 is not eligible for License Exceptions GBS and CIV. Neither the May 5, 2015 nor the February 19, 2016 proposed rules included changes to the control status of ECCN 3C001.

Potential Revision. Add RS Column 1 controls (worldwide except Canada) to items in 3C001 that are III–V compounds of gallium or indium, and aluminum, antimony, or arsenic, forming a strained layer superlattice having a photoluminescence signal maxima originating from the superlattice in the wavelength range exceeding 3,000 nm but not exceeding 15,000 nm at a temperature less than 200 K. License review policy for RS:1 controls are found in § 742.6 of the EAR.

Rationale: Materials meeting these parameters are necessary for the

production of FPAs controlled in ECCN 6A002, which are subject to an RS:1 control.

ECCN 3E001

Current control status. ECCN 3E001 has the following controls: NS Column 1 applies to “technology” for items controlled by 3A001, 3A002, 3A003, 3B001, 3B002, or 3C001 to 3C006; MT Column 1 applies to “technology” for equipment controlled by 3A001 or 3A101 for MT Reasons; NP Column 1 applies to “technology” for equipment controlled by 3A001, 3A201, or 3A225 to 3A234 for NP reasons; and AT Column 1 applies to the entire entry.

Potential Revision. Add RS Column 1 to “technology” for items in 3C001 that are III–V compounds of gallium or indium, and aluminum, antimony, or arsenic forming a strained layer superlattice having a photoluminescence signal maxima originating from the superlattice in the wavelength range exceeding 3,000 nm but not exceeding 15,000 nm at a temperature less than 200 K. RS Column 1 controls apply to all destinations except Canada. License review policy for RS:1 controls are found in § 742.6 of the EAR. Note that License Exceptions CIV and TSR would no longer be eligible for these specified items in ECCN 3E001, because of the addition of RS Column 1 controls.

Rationale: Technology for the production of materials meeting these parameters is necessary for the production of FPAs controlled in ECCN 6A002, which are subject to an RS:1 control.

ECCNs 6E001, 6E002 and 6E990

Prior to December 31, 2016 and current control status. The May 5, 2015 proposed rule included a new worldwide RS control for commodities controlled under ECCNs 6A002 and 6A990, as well as for related software and technology controlled under 6D002, 6D003.c, 6D991, 6E001, and 6E002. The proposed worldwide RS control would have introduced a new license requirement for such items for exports or reexports to Canada. After receiving extensive public comments opposing the inclusion of the worldwide RS control, the February 19, 2016 proposed rule did not retain that proposal, and as such, the final rule maintained the current controls in place for such items.

Proposed Revision. Add a worldwide RS control for specific technology related to components controlled under ECCN 6A002 or 6A990, as follows:

(i) 6E001 development technology or 6E002 production technology for image intensifier tubes controlled in

6A002.a.2.a or 6A002.a.2.b and their specially designed components controlled in 6A002.a.2.c, except those tubes having a multialkali photocathode.

(ii) 6E001 development technology or 6E002 production technology for microbolometer infrared focal plane arrays controlled in 6A002.a.3.f and two-dimensional infrared focal plane arrays controlled in 6A002.a.3.c.

(iii) 6E990 development and production technology for read-out integrated circuits specially designed for those focal plane arrays specified in ii, above (*i.e.*, microbolometer infrared focal plane arrays controlled in 6A002.a.3.f and two-dimensional infrared focal plane arrays controlled in 6A002.a.3.c).

Rationale. This proposed revision, while similar to proposals from the May 5, 2015 proposed rule, would add new license requirements for Canada for a narrower range of items than those previously proposed. Thus, this one potential revision would be limited to that development or production technology required for the most sensitive items controlled in ECCNs 6A002 or 6A990. Given the close relationship between the U.S. and Canadian industrial bases and the very limited license requirements for exports of dual-use items to Canada in the EAR, BIS also requests comments on how this potential change would affect the U.S.-Canada trade and defense relationship and whether this potential revision would further the collective North American security.

Request for Comments

BIS is seeking comments on foreign availability, as well as the impact these potential revisions may have on: The national security or foreign policy interests of the United States; the export performance of the United States; the competitive position of the United States in the international economy; the international reputation of the United States as a supplier of goods and technology; or on the economic well-being of individual United States companies. As stated under the **DATES** caption to this notice, comments should be received no later than March 14, 2017.

Dated: January 9, 2017.

Kevin J. Wolf,

Assistant Secretary for Export Administration.

Steel Wire Garment Hangers From the People's Republic of China; 2015–2016; Partial Rescission of the Eighth Antidumping Duty Administrative Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On December 16, 2016, the Department of Commerce (“Department”) published a notice of initiation of an administrative review of the antidumping duty order on steel wire garment hangers from the People’s Republic of China (“PRC”). Based on M&B Metal Products Co., Ltd.’s (“Petitioner”) timely withdrawal of the requests for review of certain companies, we are now rescinding this administrative review with respect to 42 companies.

DATES: Effective January 13, 2017.

FOR FURTHER INFORMATION CONTACT: Jessica Weeks, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone (202) 482-4877.

SUPPLEMENTARY INFORMATION:**Background**

On October 3, 2016, the Department published a notice of “Opportunity to Request Administrative Review” of the antidumping order on steel wire garment hangers from the PRC.¹ In October 2016, the Department received multiple timely requests to conduct an administrative review of the antidumping duty order on steel wire garment hangers from the PRC.² Based upon these requests, on December 16, 2016, the Department published a notice of initiation of an administrative review of the *Order* covering the period October 1, 2015, to September 30, 2016.³ The Department initiated the administrative review with respect to 46 companies.⁴ On December 22, 2016, Petitioner withdrew its request for an

administrative review on 42 companies.⁵

Partial Rescission

Pursuant to 19 CFR 351.213(d)(1), the Secretary will rescind an administrative review, in whole or in part, if a party who requested the review withdraws the request within 90 days of the date of publication of notice of initiation of the requested review. Petitioner timely withdrew its review request and no other party requested a review of the companies for which the petitioner requested a review. All requests for administrative reviews on the 42 companies listed in the Appendix were withdrawn.⁶ Accordingly, we are rescinding this review, in part, with respect to these entities, in accordance with 19 CFR 351.213(d)(1).

This administrative review will continue with respect to Hangzhou Yingqing Material Co., Ltd., Hangzhou Qingqing Mechanical Co., Ltd., Shanghai Wells Hanger Co., Ltd., and Hong Kong Wells Ltd.

Assessment

The Department will instruct U.S. Customs and Border Protection (“CBP”) to assess antidumping duties on all appropriate entries. For the companies for which this review is rescinded, antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). The Department intends to issue appropriate assessment instructions directly to CBP 15 days after publication of this notice.

Notification to Importers

This notice serves as the only reminder to importers for whom this review is being rescinded, as of the publication date of this notice, of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with

⁵ See Letter to the Secretary of Commerce from Petitioner “Re: Eighth Administrative Review of Steel Wire Garment Hangers from China—Petitioner’s Withdrawal of Review Requests for Specific Companies” (December 22, 2016).

⁶ As stated in *Change in Practice in NME Reviews*, the Department will no longer consider the non-market economy (“NME”) entity as an exporter conditionally subject to administrative reviews. See *Antidumping Proceedings: Announcement of Change in Department Practice for Respondent Selection in Antidumping Duty Proceedings and Conditional Review of the Nonmarket Economy Entity in NME Antidumping Duty Proceedings*, 78 FR 65963 (November 4, 2013).

this requirement could result in the Secretary’s presumption that reimbursement of the antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification Regarding Administrative Protective Orders

This notice also serves as a reminder to parties subject to administrative protective order (“APO”) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

This notice is issued and published in accordance with sections 751 and 777(i)(l) of the Tariff Act of 1930, as amended, and 19 CFR 351.213(d)(4).

Dated: January 9, 2017.

Gary Taverman,

Associate Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Granular Polytetrafluoroethylene Resin From Italy: Rescission of Antidumping Duty Administrative Review; 2015-2016

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) is rescinding the administrative review of the antidumping duty order on granular polytetrafluoroethylene (PTFE) resin from Italy, for the period of review (POR) August 1, 2015, through July 18, 2016, based on the timely withdrawal of request for review by Polis S.r.l., (Polis).

DATES: Effective January 13, 2017.

FOR FURTHER INFORMATION CONTACT: Aimee Phelan, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-0697.

SUPPLEMENTARY INFORMATION:

Background

On August 5, 2016, the Department published the notice of opportunity to request an administrative review of the antidumping order on granular PTFE resin from Italy for the POR August 1,

2015, through July 31, 2016.¹ On August 31, 2016, Polis, an Italian exporter of granular PTFE resin requested that the Department conduct an administrative review of itself.² On October 14, 2016, the Department initiated an administrative review for the POR August 1, 2015, through July 18, 2016, pursuant to Polis' request.³ On October 14, 2016, Polis timely withdrew its request for an administrative review.⁴

Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), the Department will rescind an administrative review, in whole or in part, if the party or parties that requested a review withdraws the request within 90 days of the publication date of the notice of initiation of the requested review. As noted above, Polis withdrew its request for review within the 90-day period. No other party requested a review and, therefore, the Department is rescinding this administrative review.

Assessment

The Department will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on all appropriate entries of granular PTFE resin from Italy. For Polis, antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption in accordance with 19 CFR 351.212(c)(1)(i). The Department intends to issue appropriate assessment instructions to CBP 15 days after the

¹ See *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request Administrative Review*, 81 FR 51850, 51851 (August 5, 2016) (*Opportunity Notice*). On August 11, 2016, the Department revoked the antidumping duty order on *Granular Polytetrafluoroethylene Resin from Italy*, effective July 18, 2016. See *Granular Polytetrafluoroethylene Resin from Italy: Final Results of Sunset Review and Revocation of Antidumping Duty Order*, 81 FR 53119 (August 11, 2016). Although the *Opportunity Notice* identified the POR as August 1, 2015, through July 31, 2016, in light of the revocation of the order, effective July 18, 2016, the POR would be August 1, 2015, through July 18, 2016. See Memorandum to the File, re: "Administrative Review of the Antidumping Duty Order on Granular Polytetrafluoroethylene Resin (PTFE) From Italy" dated September 8, 2016.

⁴ See letter from Polis, re: "Polis Srl Withdrawal of Administrative Review Request of the Antidumping Duty Order on Granular Polytetrafluoroethylene Resin (PTFE) From Italy (A-475-703)" dated October 14, 2016.

date of publication of this notice in the **Federal Register**.

Notifications

This notice also serves as a final reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under an APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

This notice is issued and published in accordance with sections 751(a)(l) and 777(i)(1) of the Tariff Act of 1930, as amended, and 19 CFR 351.213(d)(4).

Dated: January 9, 2017.

Certain Pasta From Italy: Final Results of Antidumping and Countervailing Duty Changed Circumstances Reviews

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On June 22, 2016, the Department of Commerce (the Department) published its initiation and preliminary results in these changed circumstances reviews. Based on our analysis of the comments submitted by interested parties, our final results remain unchanged from the preliminary results.

DATES: Effective January 13, 2017.

FOR FURTHER INFORMATION CONTACT: Jennifer Shore, Office I for AD/CVD Operations, at (202) 482-2778; George McMahon, Office III for AD/CVD Operations, at (202) 482-1167; or Renee D'Antonio, Customs Liaison Unit for AD/CVD Operations, at (202) 482-1318, AD/CVD Operations, Enforcement & Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On June 22, 2016, the Department published a notice of *Initiation and Preliminary Results of Antidumping and Countervailing Duty Changed Circumstances Reviews*¹ on certain pasta from Italy (1) in furtherance of the International Trade Data System (ITDS) initiative and U.S. Customs and Border Protection's (CBP) efforts to modernize the electronic submission of import documents using the Automated Commercial Environment (ACE), and (2) to align the scope language regarding certifications accompanying imports of organic pasta across the *AD/CVD Italy Pasta Orders*.²

Specifically, the Department preliminarily determined to: (1) Convert the organic pasta certification submission requirement to a record-keeping requirement and to adjust the scope exclusion language to reflect this change, (2) authorize electronic submission of the certification when the certificate is requested by CBP or the Department, (3) update the scope language to remove the reference to the National Organic Program certificate, and (4) to align the certification language across the *AD/CVD Italy Pasta Orders* to reflect that the same certification authority (or authorities) is acceptable for purposes of both orders. Since the publication of the *Initiation and Preliminary Results of Antidumping and Countervailing Duty Changed Circumstances Reviews*, the Department received a single case brief, filed on July 6, 2016, on behalf of American Italian Pasta Company, Dakota Growers Pasta Company and New World Pasta Company (Petitioners). No interested party submitted a rebuttal brief.

Scope of the Orders

The scope of these orders covers shipments of certain non-egg dry pasta in packages of five pounds four ounces or less, whether or not enriched or fortified or containing milk or other optional ingredients such as chopped vegetables, vegetable purees, milk, gluten, diastasis, vitamins, coloring and flavorings, and up to two percent egg

white. The pasta covered by the scope of these Orders is typically sold in the retail market, in fiberboard or cardboard cartons, or polyethylene or polypropylene bags of varying dimensions.³

The merchandise subject to the *AD/CVD Italy Pasta Orders* is currently classifiable under items 1901.90.90.95 and 1902.19.20 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and Customs purposes, the written description of the merchandise subject to these Orders is dispositive.

Analysis of Comments Received

In their July 6, 2016, case brief, Petitioners agree with the Department's revision of the organic pasta exclusion to harmonize the scope language regarding certifications concerning imports of organic pasta across the *AD/CVD Italy Pasta Orders*. Petitioners, however, express concern regarding the Department's proposal to replace the requirement to file the organic certification at entry with a record-keeping requirement. Petitioners argue that because organic pasta is an excluded product, an exporter or importer dealing exclusively with organic pasta might never become subject to the Department's jurisdiction in an administrative review or other segment and would therefore, never be required to produce the certification. Additionally, Petitioners note that, at the outset of the *Initiation and Preliminary Results of Antidumping and Countervailing Duty Changed Circumstances Reviews*, the Department indicated it was initiating a changed circumstances review to change the requirement to submit an organic certification at entry to a record-keeping requirement and to allow for electronic submission of the document. However, the Department did not further discuss the possible electronic submission requirement or how it would work.

Petitioners suggest that in lieu of, or in addition to, the record-keeping requirement, the Department should require importers to scan electronically and submit the organic certification using the Document Imaging System (DIS) in ACE so that the certification will be attached to each relevant entry. Petitioners conclude that the Department would have access to the certifications if the Department obtained copies of entry packages from CBP.

Department's Position

The Department considered the comments submitted by Petitioners and continues to find that it is appropriate to convert the current requirement to submit the organic certification at entry to a record-keeping requirement. Petitioners have not provided any information to indicate that enforcement of the *AD/CVD Italy Pasta Orders* would be compromised by such a change. Under the record keeping requirement described in the preliminary results, both the exporter and the importer would be required to maintain a copy of the original certification in their respective records, as well as documentation supporting the certification, that would be subject to verification by the U.S. Government.⁴

With respect to our statement in the summary of the *Initiation and Preliminary Results of Antidumping and Countervailing Duty Changed Circumstances Reviews* regarding authorization for electronic submission of the certification, this was meant to refer to one manner through which a party could submit a certification, once requested by the Department or CBP. CBP or the Department may request that the certification and/or supporting documentation be submitted electronically, through the DIS component of ACE or in some other form or manner as required by the requesting agency. As further discussed in the *Initiation and Preliminary Results of Antidumping and Countervailing Duty Changed Circumstances Reviews*, should the Department or CBP have concerns about entries of pasta, either agency, or both agencies, may require submission of the certifications to substantiate a party's claim that the imported pasta meets the requirements of the organic pasta exclusion. As such, the importer, or the party filing on its behalf, would be required to submit the organic pasta certification upon request by CBP or the Department.

Absent evidence that the organic pasta certification record-keeping requirement undermines the enforcement of the *AD/CVD Italy Pasta Orders*, and because this change furthers the ITDS initiative and CBP's efforts to modernize the electronic submission of import documents using ACE, we find that it is appropriate to adopt the organic pasta certification record-keeping requirement. However, this Notice should not be construed as an indication that the Department relinquishes its ability to require the

¹ See *Certain Pasta from Italy: Initiation and Preliminary Results of Antidumping and Countervailing Duty Changed Circumstances Reviews*, 81 FR 40659 (June 22, 2016) (*Initiation and Preliminary Results of Antidumping and Countervailing Duty Changed Circumstances Reviews*).

² See *Notice of Antidumping Duty Order and Amended Final Determination of Sales at Less Than Fair Value: Certain Pasta from Italy*, 61 FR 38547 (July 24, 1996); and *Notice of Countervailing Duty Order and Amended Final Affirmative Countervailing Duty Determination: Certain Pasta ("Pasta") from Italy*, 61 FR 38544 (July 24, 1996) (collectively, *AD/CVD Italy Pasta Orders*).

³ For a full description of the scope of these *AD/CVD Italy Pasta Orders*, see the Appendix to this Notice.

⁴ See *Initiation and Preliminary Results of Antidumping and Countervailing Duty Changed Circumstances Reviews*, 81 FR at 40660.

filing of the organic certification for each entry of pasta subject to the *AD/CVD Italy Pasta Orders*. If, at any time, either CBP or the Department becomes aware of evidence indicating that the elimination of the requirement to file the organic certification with each entry is undermining the enforcement of the *AD/CVD Italy Pasta Orders*, the Department can reconsider whether to require that the organic certification be filed with each entry, using the DIS for entries filed in ACE or through other means as appropriate.

Final Results of Changed Circumstances Review

After an analysis of the comments submitted, we continue to find that the organic pasta certification submission requirement should be converted to a record-keeping requirement. Under this record-keeping requirement, both the exporter and the importer are required to maintain a copy of the original EU authorized body certification in their respective records, as well as documentation supporting the certification, that would be subject to verification by the U.S. Government. Because this certification requirement will now be a record-keeping requirement, the exporter and importer are required to submit the certification in response to a request from CBP or the Department, in the form or manner required by the requesting agency (*i.e.*, electronically or otherwise). Additionally, the certification must be issued, signed, and dated prior to the exportation of the merchandise from Italy. Entries for which an exporter or importer is unable to produce the required certification and/or documentation supporting the certification upon the request of CBP or the Department may be subject to antidumping or countervailing duties.

In addition, we continue to find that the scope language relating to the organic pasta exclusion should be updated to: (1) Reflect the conversion to a record-keeping requirement; (2) remove the reference to the National Organic Program certificate; and (3) align the certification language across the *AD/CVD Italy Pasta Orders* to reflect that the same certification authority is acceptable for purposes of both orders. Based on the foregoing, the Department adopts the revised scope of the *AD/CVD Italy Pasta Orders* to reflect the aforementioned changes. The full text of the revised scopes is found in the Appendix to this document.

Notification to Parties

This notice is the only reminder to parties subject to administrative

protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

These final results are being issued and published in accordance with sections 751(b)(1) and 777(i) of the Tariff Act of 1930, as amended and 19 CFR 351.216 and 351.221(b)(5).

Dated: January 6, 2017.

Paul Piquado,

Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the AD Order on Certain Pasta From Italy

Imports covered by this Order are shipments of certain non-egg dry pasta in packages of five pounds four ounces or less, whether or not enriched or fortified or containing milk or other optional ingredients such as chopped vegetables, vegetable purees, milk, gluten, diastasis, vitamins, coloring and flavorings, and up to two percent egg white. The pasta covered by the scope of the Order is typically sold in the retail market, in fiberboard or cardboard cartons, or polyethylene or polypropylene bags of varying dimensions.

Excluded from the scope of this Order are refrigerated, frozen, or canned pastas, as well as all forms of egg pasta, with the exception of non-egg dry pasta containing up to two percent egg white. Multicolored pasta, imported in kitchen display bottles of decorative glass that are sealed with cork or paraffin and bound with raffia, is excluded from the scope of the Order. Note 1. Pursuant to the Department's August 14, 2009, changed circumstances review, effective July 1, 2008, gluten free pasta is also excluded from the scope of the Order. Note 2. Effective January 1, 2012, ravioli and tortellini filled with cheese and/or vegetables are also excluded from the scope of the Order. Note 3.

Also excluded are imports of organic pasta from Italy that are certified by an EU authorized body in accordance with the United States Department of Agriculture's National Organic Program for organic products. The organic pasta certification must be retained by exporters and importers and made available to U.S. Customs and Border Protection or the Department of Commerce upon request.

The merchandise subject to this order is currently classifiable under items 1901.90.90.95 and 1902.19.20 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and Customs purposes, the written description of the merchandise subject to the Order is dispositive.

Note 1. See Memorandum to Richard Moreland, dated August 25, 1997, which is on file in the Central Records Unit.

Note 2. See *Certain Pasta From Italy: Notice of Final Results of Antidumping Duty Changed Circumstances Review and Revocation*, in Part, 74 FR 41120 (August 14, 2009).

Note 3. See *Certain Pasta From Italy: Final Results of Antidumping Duty and Countervailing Duty Changed Circumstances Reviews and Revocation*, in Part, 79 FR 58319, 58320 (September 29, 2014).

Scope of the CVD Order on Certain Pasta From Italy

Imports covered by this Order are shipments of certain non-egg dry pasta in packages of five pounds four ounces or less, whether or not enriched or fortified or containing milk or other optional ingredients such as chopped vegetables, vegetable purees, milk, gluten, diastasis, vitamins, coloring and flavorings, and up to two percent egg white. The pasta covered by the scope of the Order is typically sold in the retail market, in fiberboard or cardboard cartons, or polyethylene or polypropylene bags of varying dimensions.

Excluded from the scope of this Order are refrigerated, frozen, or canned pastas, as well as all forms of egg pasta, with the exception of non-egg dry pasta containing up to two percent egg white. Multicolored pasta, imported in kitchen display bottles of decorative glass that are sealed with cork or paraffin and bound with raffia, is excluded from the scope of the Order. Note 1. Pursuant to the Department's May 12, 2011, changed circumstances review, effective January 1, 2009, gluten free pasta is also excluded from the scope of the Order. Note 2. Effective January 1, 2012, ravioli and tortellini filled with cheese and/or vegetables are also excluded from the scope of the Order. Note 3.

Also excluded are imports of organic pasta from Italy that are certified by an EU authorized body in accordance with the United States Department of Agriculture's National Organic Program for organic products. The organic pasta certification must be retained by exporters and importers and made available to U.S. Customs and Border Protection or the Department of Commerce upon request.

The merchandise subject to this order is currently classifiable under items 1901.90.90.95 and 1902.19.20 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and Customs purposes, the written description of the merchandise subject to the Order is dispositive.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

International Trade Administration

Initiation of Antidumping and Countervailing Duty Administrative Reviews

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (“the Department”) has received requests to conduct administrative reviews of various antidumping and countervailing duty orders and findings with November anniversary dates. In accordance with the Department’s regulations, we are initiating those administrative reviews.

DATES: Effective January 13, 2017.

FOR FURTHER INFORMATION CONTACT: Brenda E. Waters, Office of AD/CVD Operations, Customs Liaison Unit, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230, telephone: (202) 482-4735.

SUPPLEMENTARY INFORMATION:

Background

The Department has received timely requests, in accordance with 19 CFR 351.213(b), for administrative reviews of various antidumping and countervailing duty orders and findings with November anniversary dates.

All deadlines for the submission of various types of information, certifications, or comments or actions by the Department discussed below refer to the number of calendar days from the applicable starting time.

Notice of No Sales

If a producer or exporter named in this notice of initiation had no exports, sales, or entries during the period of review (“POR”), it must notify the Department within 30 days of publication of this notice in the **Federal Register**. All submissions must be filed electronically at <http://access.trade.gov> in accordance with 19 CFR 351.303.¹ Such submissions are subject to verification in accordance with section 782(i) of the Tariff Act of 1930, as

amended (“the Act”). Further, in accordance with 19 CFR 351.303(f)(1)(i), a copy must be served on every party on the Department’s service list.

Respondent Selection

In the event the Department limits the number of respondents for individual examination for administrative reviews initiated pursuant to requests made for the orders identified below, the Department intends to select respondents based on U.S. Customs and Border Protection (“CBP”) data for U.S. imports during the period of review. We intend to place the CBP data on the record within five days of publication of the initiation notice and to make our decision regarding respondent selection within 30 days of publication of the initiation **Federal Register** notice. Comments regarding the CBP data and respondent selection should be submitted seven days after the placement of the CBP data on the record of this review. Parties wishing to submit rebuttal comments should submit those comments five days after the deadline for the initial comments.

In the event the Department decides it is necessary to limit individual examination of respondents and conduct respondent selection under section 777A(c)(2) of the Act:

In general, the Department has found that determinations concerning whether particular companies should be “collapsed” (*i.e.*, treated as a single entity for purposes of calculating antidumping duty rates) require a substantial amount of detailed information and analysis, which often require follow-up questions and analysis. Accordingly, the Department will not conduct collapsing analyses at the respondent selection phase of this review and will not collapse companies at the respondent selection phase unless there has been a determination to collapse certain companies in a previous segment of this antidumping proceeding (*i.e.*, investigation, administrative review, new shipper review or changed circumstances review). For any company subject to this review, if the Department determined, or continued to treat, that company as collapsed with others, the Department will assume that such companies continue to operate in the same manner and will collapse them for respondent selection purposes. Otherwise, the Department will not collapse companies for purposes of respondent selection. Parties are requested to (a) identify which companies subject to review previously were collapsed, and (b) provide a citation to the proceeding in which they were collapsed. Further, if

companies are requested to complete the Quantity and Value (“Q&V”) Questionnaire for purposes of respondent selection, in general each company must report volume and value data separately for itself. Parties should not include data for any other party, even if they believe they should be treated as a single entity with that other party. If a company was collapsed with another company or companies in the most recently completed segment of this proceeding where the Department considered collapsing that entity, complete Q&V data for that collapsed entity must be submitted.

Deadline for Withdrawal of Request for Administrative Review

Pursuant to 19 CFR 351.213(d)(1), a party that has requested a review may withdraw that request within 90 days of the date of publication of the notice of initiation of the requested review. The regulation provides that the Department may extend this time if it is reasonable to do so. In order to provide parties additional certainty with respect to when the Department will exercise its discretion to extend this 90-day deadline, interested parties are advised that the Department does not intend to extend the 90-day deadline unless the requestor demonstrates that an extraordinary circumstance has prevented it from submitting a timely withdrawal request. Determinations by the Department to extend the 90-day deadline will be made on a case-by-case basis.

Separate Rates

In proceedings involving non-market economy (“NME”) countries, the Department begins with a rebuttable presumption that all companies within the country are subject to government control and, thus, should be assigned a single antidumping duty deposit rate. It is the Department’s policy to assign all exporters of merchandise subject to an administrative review in an NME country this single rate unless an exporter can demonstrate that it is sufficiently independent so as to be entitled to a separate rate.

To establish whether a firm is sufficiently independent from government control of its export activities to be entitled to a separate rate, the Department analyzes each entity exporting the subject merchandise under a test arising from the *Final Determination of Sales at Less Than Fair Value: Sparklers from the People’s Republic of China*, 56 FR 20588 (May 6, 1991), as amplified by *Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the*

¹ See *Antidumping and Countervailing Duty Proceedings: Electronic Filing Procedures; Administrative Protective Order Procedures*, 76 FR 39263 (July 6, 2011).

People's Republic of China, 59 FR 22585 (May 2, 1994). In accordance with the separate rates criteria, the Department assigns separate rates to companies in NME cases only if respondents can demonstrate the absence of both *de jure* and *de facto* government control over export activities.

All firms listed below that wish to qualify for separate rate status in the administrative reviews involving NME countries must complete, as appropriate, either a separate rate application or certification, as described below. For these administrative reviews, in order to demonstrate separate rate eligibility, the Department requires entities for whom a review was requested, that were assigned a separate rate in the most recent segment of this proceeding in which they participated, to certify that they continue to meet the criteria for obtaining a separate rate. The Separate Rate Certification form will be available on the Department's Web site at <http://enforcement.trade.gov/nme/nme-sep-rate.html> on the date of publication of this **Federal Register** notice. In responding to the certification, please follow the "Instructions for Filing the Certification" in the Separate Rate

Certification. Separate Rate Certifications are due to the Department no later than 30 calendar days after publication of this **Federal Register** notice. The deadline and requirement for submitting a Certification applies equally to NME-owned firms, wholly foreign-owned firms, and foreign sellers who purchase and export subject merchandise to the United States.

Entities that currently do not have a separate rate from a completed segment of the proceeding² should timely file a Separate Rate Application to demonstrate eligibility for a separate rate in this proceeding. In addition, companies that received a separate rate in a completed segment of the proceeding that have subsequently made changes, including, but not limited to, changes to corporate structure, acquisitions of new companies or facilities, or changes to their official company name,³ should timely file a Separate Rate Application to demonstrate eligibility for a separate rate in this proceeding. The Separate Rate Status Application will be available on the Department's Web site at <http://enforcement.trade.gov/nme/nme-sep-rate.html> on the date of publication of this **Federal Register**

notice. In responding to the Separate Rate Status Application, refer to the instructions contained in the application. Separate Rate Status Applications are due to the Department no later than 30 calendar days of publication of this **Federal Register** notice. The deadline and requirement for submitting a Separate Rate Status Application applies equally to NME-owned firms, wholly foreign-owned firms, and foreign sellers that purchase and export subject merchandise to the United States.

For exporters and producers who submit a separate-rate status application or certification and subsequently are selected as mandatory respondents, these exporters and producers will no longer be eligible for separate rate status unless they respond to all parts of the questionnaire as mandatory respondents.

Initiation of Reviews

In accordance with 19 CFR 351.221(c)(1)(i), we are initiating administrative reviews of the following antidumping and countervailing duty orders and findings. We intend to issue the final results of these reviews not later than November 30, 2017.

	Period to be reviewed
Antidumping Duty Proceedings	
Indonesia: Monosodium Glutamate, A-560-826 PT Cheil Jedang Indonesia	11/1/15-10/31/16

Suspension Agreements

None.

Duty Absorption Reviews

During any administrative review covering all or part of a period falling between the first and second or third and fourth anniversary of the publication of an antidumping duty order under 19 CFR 351.211 or a determination under 19 CFR 351.218(f)(4) to continue an order or suspended investigation (after sunset review), the Secretary, if requested by a domestic interested party within 30 days of the date of publication of the notice of initiation of the review, will determine, consistent with *FAG Italia v. United States*, 291 F.3d 806 (Fed Cir. 2002), as appropriate, whether antidumping duties have been absorbed by an exporter or producer subject to the review if the subject merchandise is sold in the United States through an

importer that is affiliated with such exporter or producer. The request must include the name(s) of the exporter or producer for which the inquiry is requested.

Gap Period Liquidation

For the first administrative review of any order, there will be no assessment of antidumping or countervailing duties on entries of subject merchandise entered, or withdrawn from warehouse, for consumption during the relevant provisional-measures “gap” period, of the order, if such a gap period is applicable to the POR.

Administrative Protective Orders and Letters of Appearance

Interested parties must submit applications for disclosure under administrative protective orders in accordance with 19 CFR 351.305. On January 22, 2008, the Department published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures*, 73 FR 3634 (January 22, 2008). Those procedures apply to administrative reviews included in this notice of initiation. Parties wishing to participate in any of these

⁴Hyundai Steel Company is the successor-in-interest to Hyundai HYSCO, for which we received a review request. administrative reviews should ensure that they meet the requirements of these procedures (e.g., the filing of separate letters of appearance as discussed at 19 CFR 351.103(d)).

Revised Factual Information Requirements

On April 10, 2013, the Department published *Definition of Factual Information and Time Limits for Submission of Factual Information: Final Rule*, 78 FR 21246 (April 10, 2013), which modified two regulations related to antidumping and countervailing duty proceedings: The definition of factual information (19 CFR 351.102(b)(21)), and the time limits for the submission of factual information (19 CFR 351.301). The final rule identifies five categories of factual information in 19 CFR 351.102(b)(21), which are summarized as follows: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by the Department; and (v) evidence other than factual information described in (i)–(iv). The final rule requires any party, when submitting factual information, to specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct. The final rule also modified 19 CFR 351.301 so that, rather than providing general time limits, there are specific time limits based on the type of factual information being submitted. These modifications are effective for all segments initiated on or after May 10, 2013. Please review the final rule, available at <http://enforcement.trade.gov/frn/2013/1304frn/2013-08227.txt>, prior to submitting factual information in this segment.

Any party submitting factual information in an antidumping duty or countervailing duty proceeding must certify to the accuracy and completeness of that information.¹² Parties are hereby reminded that revised certification requirements are in effect for company/government officials as well as their representatives. All segments of any antidumping duty or countervailing duty proceedings initiated on or after

August 16, 2013, should use the formats for the revised certifications provided at the end of the *Final Rule*.¹³ The Department intends to reject factual submissions in any proceeding segments if the submitting party does not comply with applicable revised certification requirements.

Revised Extension of Time Limits Regulation

On September 20, 2013, the Department modified its regulation concerning the extension of time limits for submissions in antidumping and countervailing duty proceedings: *Final Rule*, 78 FR 57790 (September 20, 2013). The modification clarifies that parties may request an extension of time limits before a time limit established under Part 351 expires, or as otherwise specified by the Secretary. In general, an extension request will be considered untimely if it is filed after the time limit established under Part 351 expires. For submissions which are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. on the due date. Examples include, but are not limited to: (1) Case and rebuttal briefs, filed pursuant to 19 CFR 351.309; (2) factual information to value factors under 19 CFR 351.408(c), or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2), filed pursuant to 19 CFR 351.301(c)(3) and rebuttal, clarification and correction filed pursuant to 19 CFR 351.301(c)(3)(iv); (3) comments concerning the selection of a surrogate country and surrogate values and rebuttal; (4) comments concerning U.S. Customs and Border Protection data; and (5) quantity and value questionnaires. Under certain circumstances, the Department may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, the Department will inform parties in the letter or memorandum setting forth the deadline (including a specified time) by which extension requests must be filed to be considered timely. This modification also requires that an extension request must be made in a separate, stand-alone submission, and clarifies the circumstances under which the Department will grant untimely-filed requests for the extension of time

limits. These modifications are effective for all segments initiated on or after October 21, 2013. Please review the final rule, available at <http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm>, prior to submitting factual information in these segments.

These initiations and this notice are in accordance with section 751(a) of the Act (19 U.S.C. 1675(a)) and 19 CFR 351.221(c)(1)(i).

Dated: January 9, 2017.

Gary Taverman,

Associate Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–601]

Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, From the People's Republic of China: Rescission, in Part, of Antidumping Duty Administrative Review; 2015–2016

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On August 11, 2016, the Department of Commerce (Department) initiated an administrative review of the antidumping duty order on tapered roller bearings and parts thereof, finished and unfinished (TRBs) from the People's Republic of China (PRC) for eight companies. Based on timely withdrawal of requests for review, we are now rescinding this administrative review with respect to two of these companies, Changshan Peer Bearing Co. Ltd. (CPZ/SKF) and GGB Bearing Technology (Suzhou) Co., Ltd. (GGB).

DATES: Effective January 13, 2017.

FOR FURTHER INFORMATION CONTACT: Andrew Medley or Whitley Herndon, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482–4987 or (202) 482–6274, respectively.

Background

In June 2016, the Department received multiple timely requests to conduct an administrative review of the antidumping duty order on TRBs from the PRC. Based upon these requests, on August 11, 2016, in accordance with section 751(a) of the Tariff Act of 1930,

¹³ See *Certification of Factual Information To Import Administration During Antidumping and Countervailing Duty Proceedings*, 78 FR 42678 (July 17, 2013) (“*Final Rule*”); see also the frequently asked questions regarding the *Final Rule*, available at http://enforcement.trade.gov/lei/notices/factual_info_final_rule_FAQ_07172013.pdf.

¹² See section 782(b) of the Act.

as amended (the Act), the Department published a notice of initiation of an administrative review covering the period June 1, 2015, through May 31, 2016, with respect to eight companies.¹ On September 29, 2016, and October 11, 2016, CPZ/SKF and GGB, respectively, withdrew their requests for an administrative review.

Partial Rescission

Pursuant to 19 CFR 351.213(d)(1), the Secretary will rescind an administrative review, in whole or in part, if a party who requested the review withdraws the request within 90 days of the date of publication of notice of initiation of the requested review. CPZ/SKF and GGB timely withdrew their requests for an administrative review of themselves; no other party requested a review of these companies. Accordingly, we are rescinding this review, in part, with respect to these companies, pursuant to 19 CFR 351.213(d)(1).

Assessment

The Department will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on all appropriate entries. For CPZ/SKF and GGB, the companies for which these reviews are rescinded, antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). The Department intends to issue appropriate assessment instructions to CBP 15 days after publication of this notice.

Notification to Importers

This notice serves as a reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Notification Regarding Administrative Protective Orders

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues

to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This notice is issued and published in accordance with sections 751 and 777(i)(1) of the Act, and 19 CFR 351.213(d)(4).

Dated: January 10, 2017.

Gary Taverman,

Associate Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Certain Magnesia Carbon Bricks From the People's Republic of China: Rescission of Countervailing Duty Administrative Review; 2014

AGENCY: Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce.

SUMMARY: On September 13, 2016, the Department of Commerce (the Department) published the preliminary results of the administrative review of the countervailing duty (CVD) order on certain chemically-bonded magnesia carbon bricks (MCBs) from the People's Republic of China (PRC). The period of review (POR) is January 1, 2014, through December 31, 2014. The Department preliminarily found no evidence of any reviewable entries and received no comments on the preliminary results. Therefore, the Department is rescinding the administrative review of the CVD order on MCBs from the PRC.

DATES: Effective January 13, 2017.

FOR FURTHER INFORMATION CONTACT: Andrew Huston, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-4261.

SUPPLEMENTARY INFORMATION:

Background

On September 13, 2016, the Department published the *Preliminary*

Results.¹ In accordance with 19 CFR 351.309(c)(1)(ii), we invited parties to comment on our *Preliminary Results*. No parties submitted comments.

Rescission

It is the Department's practice to rescind an administrative review of a CVD order, pursuant to CFR 351.213(d)(3), when there are no reviewable entries of subject merchandise during the POR for which liquidation is suspended.² Normally, upon completion of an administrative review, the suspended entries are liquidated at the CVD assessment rate calculated for the review period. See 19 CFR 351.212(b)(1). Therefore, for an administrative review to be conducted, there must be a reviewable, suspended entry that the Department can order CBP to liquidate at the newly calculated CVD assessment rate. Accordingly, in the absence of suspended entries of subject merchandise during the period of this administrative review (January 1, 2014, through December 31, 2014), we are rescinding this administrative review of the CVD order on MCBs from the PRC.

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(1) of the Tariff Act of 1930, as amended, and 19 CFR 351.213(d)(4).

Dated: January 9, 2017.

Gary Taverman,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

DEPARTMENT OF COMMERCE**International Trade Administration**

[A-570-910]

Circular Welded Carbon Quality Steel Pipe From the People's Republic of China: Rescission of Antidumping Duty Administrative Review; 2015-2016**AGENCY:** Enforcement and Compliance, Department of Commerce.**SUMMARY:** The Department of Commerce ("the Department") is rescinding the administrative review of the antidumping duty order on circular welded carbon quality steel pipe from the People's Republic of China ("PRC") for the period July 1, 2015, through June 30, 2016.**DATES:** Effective January 13, 2017.**FOR FURTHER INFORMATION CONTACT:** Howard Smith or Jonathan Hill, AD/CVD Operations, Office IV, Enforcement & Compliance, International Trade Administration, Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-5193 or (202) 482-3518, respectively.**SUPPLEMENTARY INFORMATION:****Background**

On September 12, 2016, based on a timely request for review by Wheatland Tube Company ("Wheatland"), the Department published in the *Federal Register* a notice of initiation of an administrative review of the antidumping duty order on circular welded carbon quality steel pipe from the PRC with respect to 20 companies covering the period July 1, 2015, through June 30, 2016.¹ On December 12, 2016, Wheatland withdrew its request for an administrative review of all of the companies listed in its review request.

Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), the Department will rescind an administrative review, in whole or in part, if the party that requested the review withdraws its request within 90 days of the publication of the notice of initiation of the requested review. In this case, Wheatland timely withdrew its review request by the 90-day deadline, and no other party requested an administrative review of the antidumping duty order.² As a result,

¹ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 81 FR 62720 (September 12, 2016) ("*Initiation Notice*").

² The 90-day deadline to withdraw a request for review was December 11, 2016. However, as

we are rescinding the administrative review of circular welded carbon quality steel pipe from the PRC for the period July 1, 2015, through June 30, 2016.

Assessment

The Department will instruct U.S. Customs and Border Protection ("CBP") to assess antidumping duties on all appropriate entries. Because the Department is rescinding this administrative review in its entirety, the entries to which this administrative review pertained shall be assessed antidumping duties at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). The Department intends to issue appropriate assessment instructions to CBP 15 days after the publication of this notice.

Notifications

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Department's presumption that reimbursement of the antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

This notice also serves as a final reminder to parties subject to administrative protective order ("APO") of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Tariff Act of 1930, as amended, and 19 CFR 351.213(d)(4).

December 11, 2016 was a Sunday, the deadline to withdraw a request for review was the next business day, December 12, 2016. See *Notice of Clarification: Application of "Next Business Day" Rule for Administrative Determination Deadlines Pursuant to the Tariff Act of 1930, As Amended*, 70 FR 24533 (May 10, 2005).

Dated: January 9, 2017.

Gary Taverman,*Associate Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.*

Caribbean Fishery Management Council; Public Meetings**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.**ACTION:** Notice of a public meeting.**SUMMARY:** The Caribbean Fishery Management Council's Scientific and Statistical Committee (SSC) will hold a five-day meeting in San Juan, Puerto Rico.**DATES:** The meetings will be held on February 6-10, 2017. The meeting will begin at 1 p.m. on February 6, 2017 and adjourn at 5 p.m. on February 10, 2017.**ADDRESSES:** The meetings will be held at the Council Office, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico.**FOR FURTHER INFORMATION CONTACT:** Caribbean Fishery Management Council, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico 00918-1903, telephone (787) 766-5926.**SUPPLEMENTARY INFORMATION:** The Caribbean Fishery Management Council's SSC will hold a five-day meeting to discuss the items contained in the following agenda:

- Call to Order
- Adoption of Agenda
- SEDAR 46 US Caribbean Data Limited Species—Southeast Fisheries Science Center (SEFSC) Complete and final review of the revisions to the SEDAR 46 and its potential for OFL and/or ABC advice
- Island Based Fishery Management Plans (IBFMPs)

The Caribbean Fishery Management Council is developing an Island Based FMP to manage fisheries in each Puerto Rico, St. Thomas/St. John and St. Croix. There are 5 Actions contained in the Draft documents but the SSC will be discussing Action 2 and 3 at this meeting. The Draft Document of Actions and Alternatives presented at the 158th

CFMC meeting is available at www.caribbeanfmc.com.

Finalize Action 2: Establish Stock or Stock Complexes for each Puerto Rico, St. Thomas/St. John and St. Croix Fishery Management Plan (FMP)

—Review Consolidated List of Stocks and Stock Complexes/Species Complexes—NMFS Southeast Regional Office (SERO) Update

—SSC final recommendations to the CFMC on species/stock complexes groupings, and recommendations on the use of indicator species in Action 2 of the IBFMPs

Review/Finalize Action 3: Management Reference Points for Stocks/Stock for each Puerto Rico, St. Thomas/St. John and St. Croix Fishery Management Plan (FMP)

Action 3(a): Time Series: Select a time series of landings data to establish management reference points for a stock/stock complex, as applicable.

Action 3(b): Maximum Sustainable Yield (MSY) Proxy for a Stock/Stock Complex for each Puerto Rico, St. Thomas/St. John and St. Croix FMP

Action 3(c): Overfishing Limit (OFL) for Stocks/Stocks Complexes for each Puerto Rico, St. Thomas/St. John and St. Croix FMP

Action 3(d): Acceptable Biological Catch (ABC) Control Rule for Stocks/Stocks Complexes for each Puerto Rico, St. Thomas/St. John and St. Croix FMP.

Action 3(e): Optimum Yield (OY) and Annual Catch Limit (ACL) for Stocks/Stocks Complexes for each Puerto Rico, St. Thomas/St. John and St. Croix FMP.

—SSC final recommendations to the Council on Action 3 of the IBFMPs: Process for Setting Reference Points, MSY proxies, OFL, ABC for species/species complexes/groupings

—Other Business

—Next Meeting

Special Accommodations

These meetings are physically accessible to people with disabilities. For more information or request for sign language interpretation and other auxiliary aids, please contact Mr. Miguel A. Rolón, Executive Director, Caribbean Fishery Management Council, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico, 00918–1903, telephone (787) 766–5926, at least 5 days prior to the meeting date.

Dated: January 10, 2017.

Jeffrey N. Lonergan,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Monterey Peninsula Water Supply Project; Notice of Availability of a Draft Environmental Impact Report/Environmental Impact Statement

AGENCY: Office of National Marine Sanctuaries (ONMS), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA).

ACTION: Notice of availability of a draft environmental impact report/environmental impact statement; request for public comments; announcement of public meetings.

SUMMARY: A permit application has been submitted by California American Water Company (CalAm) to NOAA's Monterey Bay National Marine Sanctuary (MBNMS) to construct and operate a reverse osmosis (RO) desalination facility project (Project) in Monterey County, California. The permit review process is being conducted concurrently with a public process conducted pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) and California Environmental Quality Act (CEQA, Cal. Pub. Res. Code § 21000 *et seq.*). NOAA has prepared, in cooperation with the California Public Utilities Commission (CPUC), a joint draft environmental impact review/environmental impact statement (EIR/EIS) that analyzes the potential effects on the physical and human environment related to the Project proposed within MBNMS boundaries. NOAA is soliciting public comment on the draft EIR/EIS.

DATES: Comments must be received on or before February 27, 2017. Public meetings will be on the following dates:

- (1) Wednesday, February 15, 11:00 a.m. to 1:00 p.m., Marina, CA
- (2) Wednesday, February 15, 6:00 p.m. to 8:00 p.m., Seaside, CA
- (3) Thursday, February 16, 4:00 p.m. to 8:00 p.m., Carmel, CA

ADDRESSES: Comments may be submitted by either of the following methods:

- **Electronic Submissions:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov/

#*docketDetail;D=NOAA-NOS-2016-0156*, click the “Comment Now!” icon, complete the required fields and enter or attach your comments.

- **Mail:** MBNMS Project Lead for CalAm Desalination Project, 99 Pacific Ave, BLDG 455a, Monterey, CA 93940.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NOAA. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (*e.g.*, name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. ONMS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

Copies of the DEIR/EIS can be downloaded or viewed on the internet at www.regulations.gov (search for docket # NOAA–NOS–2016–0156), or at www.regulations.gov/

#*docketDetail;D=NOAA-NOS-2016-0156*. Copies can also be obtained by contacting the person identified under

FOR FURTHER INFORMATION CONTACT.

- The public meeting locations are:
- (1) Marina, CA: Marina Public Library, Community Meeting Room, 188 Seaside Ave., Marina, CA 93933 (February 15, 2017)
 - (2) Seaside, CA: Oldemeyer Center, Seaside Room, 986 Hilby Ave., Seaside, CA 93955 (February 15, 2017)
 - (3) Carmel, CA: Sunset Center, Carpenter Hall, San Carlos Street, Carmel, CA 93921 (February 16, 2017)

FOR FURTHER INFORMATION CONTACT:

Karen Grimmer at 99 Pacific Ave, BLDG 455a, Monterey, CA 93940 or mbnms.comments@noaa.gov.

SUPPLEMENTARY INFORMATION:

Background Information

I. Background

A permit application has been submitted by CalAm for construction and operation of its proposed Monterey Peninsula Water Supply Project (MPWSP or Project). The purpose of the MPWSP is to supplement existing water supplies for CalAm's Monterey District service area.

The MPWSP comprises various facilities and improvements, including: A sub-surface seawater intake system; a 9.6-million-gallons-per-day (mgd) reverse osmosis (RO) desalination plant; desalinated water storage and conveyance facilities; and expanded

Aquifer Storage and Recovery (ASR) facilities.

The desalination facility would be capable of producing 9.6 million gallons per day (MGD) of potable water on a 46-acre site located north of the City of Marina on unincorporated Monterey County property. The MPWSP proposes ten subsurface slant wells (nine new wells and conversion of an existing test well) to draw seawater from beneath the ocean floor in Monterey Bay to produce the source water for the desalination plant. The subsurface slant wells would be located primarily within the City of Marina, in the active mining area of the CEMEX sand mining facility. The slant wells would be approximately 700 to 1000 feet in length and extend beneath the coastal dunes, sandy beach, and the surf zone, terminating approximately 161 to 356 feet seaward of the Mean High Water line and at a depth of 190 to 210 feet below the seafloor. Up to 24.1 mgd of source water would be needed to produce 9.6 mgd of desalinated product water.

Under the proposed project, the desalination plant would generate approximately 13.98 mgd of brine, including 0.4 mgd of decanted backwash water. The brine would be discharged into Monterey Bay via a 36-inch diameter pipeline to a new connection with the existing Monterey Regional Water Pollution Control Agency's (MRWPCA) outfall and diffuser located offshore.

II. NOAA Proposed Action

NOAA is releasing for public comment a draft EIR/EIS that was prepared in accordance with: Section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, as amended; and the White House Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA (CEQ NEPA Regulations). NOAA's proposed action would be whether to approve the installation of a subsurface seawater intake system, the discharge of brine into MBNMS via an existing outfall pipe, and the continued presence of pipelines in MBNMS to transport seawater to a desalination facility.

The Project was subject to a Draft Environmental Impact Report (EIR), under the provisions of the California Environmental Quality Act (CEQA), published by the California Public Utilities Commission (CPUC) in April 2015. The NEPA environmental documentation includes an Environmental Impact Statement (EIS), which is issued as a joint draft CEQA/NEPA (EIR/EIS) document with the CPUC.

The EIR/EIS identifies and assesses potential environmental impacts associated with the proposed Project, and identifies 6 alternatives, plus a no action alternative. Federal agencies would use the EIR/EIS to consider related permits or other approvals for the Project as proposed. NOAA's preferred alternative (Alternative 5a) is the environmentally preferred alternative. Alternative 5a would be implemented in conjunction with the Pure Water Monterey Groundwater Replenishment Project (GWR), which would offer the same amount of freshwater as the proposed project but result in a larger footprint than the proposed action alone, yet the pairing of Alternative 5a and the GWR project would result in reduced operational energy use and reduced GHG emissions compared to the proposed project. In addition, the combination of Alternative 5a and the GWR Project result in reduced effects on groundwater levels influenced by fewer slant wells and less volume of pumping, and the GWR project would provide water to the Castroville Seawater Intrusion Project that would benefit the groundwater basin. Lastly, Alternative 5a paired with the GWR project would be consistent with the 2016 California Action Plan seeking integrated water supply solutions, the Governor's drought proclamations, the CPUC Water Action Plan goal of promoting water infrastructure investment, the California Ocean Plan, and MBNMS Desalination Guidelines.

III. Process

This NOA is published by NOAA, the lead federal agency. NOAA, along with the CPUC, as CEQA lead agency, have determined that a joint CEQA/NEPA document is appropriate, and the two agencies have prepared a joint draft EIR/EIS after completion of a federal scoping process. In accordance with Section 102(2)(C) of NEPA, NOAA published a Notice of Intent (NOI) to prepare an EIS for the proposed project on August 26, 2015 (80 FR 51787). During the EIS scoping meeting held on September 10, 2015, five participants commented publically on the proposed project. Twelve written comments were received throughout the public comment period. The complete written comments are available for review at: <https://www.regulations.gov/docket?D=NOAA-NOS-2015-0105>.

IV. Federal Consultations

This notice also advises the public that NOAA is coordinating its consultation responsibilities under section 7 of the Endangered Species Act,

Essential Fish Habitat under the Magnuson Stevens Fishery Conservation and Management Act, section 106 of the National Historic Preservation Act, and Federal Consistency review under the Coastal Zone Management Act, along with its ongoing NEPA process including the use of NEPA documents and public and stakeholder meetings to also meet the requirements of other federal laws.

NOAA is seeking public comment on the DEIR/DEIS, which is available at <http://montereybay.noaa.gov> or may be obtained by contacting the individual listed under the heading **FOR FURTHER INFORMATION CONTACT**.

Authority: 16 U.S.C. 1431 *et seq.*

Dated: January 4, 2017.

John Armor,
Director for the Office of National Marine Sanctuaries.

BILLING CODE 3510-NK-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XF129

Addition of Species to the Annexes of the Protocol Concerning Specially Protected Areas and Wildlife in the Wider Caribbean Region

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for public comments.

SUMMARY: During a meeting of the Scientific and Technical Advisory Committee (STAC) under the Protocol to the Cartagena Convention on Specially Protected Areas and Wildlife (SPAW Protocol), held in Miami, Florida in November 2016, twelve species of fauna were nominated and recommended to be added to the Annexes of the SPAW Protocol. The Department of State, U.S. Fish and Wildlife Service, and National Marine Fisheries Service solicit comment on the recommendations to add these twelve species to the Annexes.

DATES: Comments must be received by February 13, 2017.

ADDRESSES: You may submit comments on the recommendations to add the twelve species to the Annexes of the SPAW Protocol, by including NOAA-NMFS-2016-0166, by either of the following methods:

• *Federal e-Rulemaking Portal*: Go to www.regulations.gov/ #!docketDetail;D=NOAA-NMFS-2016-0166. Click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

• *Mail*: Submit written comments to Addition of Species to the Annexes of the SPAW Protocol, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Room 13535, Silver Spring, MD 20910.

Instructions: NMFS may not consider comments if they are sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter N/A in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT:

Chelsey Young, NOAA (301) 427-8491; chelsey.young@noaa.gov; and Rosemarie Gnam, U.S. Fish and Wildlife Service (703) 358-1708; rosemarie_gnam@fws.gov. Persons who use a Telecommunications Device for the Deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, 24 hours a day, 7 days a week.

SUPPLEMENTARY INFORMATION: The SPAW Protocol is a protocol to the Convention for the Protection and Development of the Marine Environment of the Wider Caribbean Region (Cartagena Convention or Convention). There is also a protocol to the Convention addressing land-based sources of pollution and a protocol addressing regional cooperation on oil pollution preparedness and response.

The SPAW Protocol was adopted in 1990 and entered into force in 2000. The United States ratified the SPAW Protocol in 2003. There are currently 16 State Parties to the SPAW Protocol from throughout the Wider Caribbean Region.

Participants at the November 2016 meeting of the STAC to the SPAW Protocol included representatives from: Antigua and Barbuda, Bahamas, Belize, Colombia, Dominican Republic, France, Grenada, Guyana, Jamaica, the Netherlands, Saint Lucia, and the United States of America. Representatives of several non-governmental organizations also attended as observers.

The U.S. delegation included representatives from the U.S. Department of State; the National Oceanic and Atmospheric Administration, National Marine Fisheries Service and National Ocean Service. Copies of the official “Recommendations of the Meeting,” a full list of participants, and the text of the Cartagena Convention and SPAW Protocol can be obtained at www.cep.unep.org/meetings/2016-meetings/7th-spaw-stac.

Convention and Convention Area

The Cartagena Convention is a regional agreement for the protection and development of the marine environment of the wider Caribbean. The Convention was adopted in 1983 and entered into force in 1986. The United States ratified the Convention in 1984. The Convention area includes the marine environment of the Gulf of Mexico, the Caribbean Sea and the adjacent areas of the Atlantic Ocean south of lat. 30° N. and within 200 nautical miles (nmi) of the Atlantic coasts of the Parties. The United States’ responsibility within this Convention area includes: U.S. waters off of Puerto Rico, the Virgin Islands, and peninsular Florida, including the Atlantic coast; the waters off of a number of islands including coastal barrier islands and the Florida Keys; and the Gulf of Mexico waters under U.S. jurisdiction. The SPAW Protocol provides that each Party may designate related terrestrial areas over which they have sovereignty and jurisdiction (including watersheds) to be covered by the SPAW Protocol. The United States has not designated any terrestrial areas under the SPAW Protocol and “does not intend to designate a terrestrial area under the Protocol unless requested to do so by an interested state or territory . . .” (Senate Executive Report 107-8).

The Annexes and U.S. Obligations Under Each Annex

The SPAW Protocol includes three Annexes. Plant species subject to the highest levels of protection are listed in Annex I, and animal species subject to the highest levels of protection are listed in Annex II. Plants and animals subject to some management, but lesser protections than those afforded to species listed in Annexes I or II, are listed in Annex III.

Annexes I (flora) and II (fauna) are to include endangered and threatened species, or subspecies, or their populations as well as rare species. The SPAW Protocol describes rare species as those “that are rare because they are usually localized within restricted

geographical areas or habitats or are thinly scattered over a more extensive range and which are potentially or actually subject to decline and possible endangerment or extinction.”

For fauna listed in Annex II, Parties “shall ensure total protection and recovery to the species . . . by prohibiting: (i) The taking, possession or killing (including, to the extent possible, the incidental taking, possession or killing) or commercial trade in such species, their eggs, parts or products; [and] (ii) to the extent possible, the disturbance of such species, particularly during periods of breeding, incubation, estivation or migration, as well as other periods of biological stress.”

For Annex III species, the SPAW Protocol states: “Each Party shall adopt appropriate measures to ensure the protection and recovery of the species of flora and fauna listed in Annex III and may regulate the use of such species in order to ensure and maintain their populations at the highest possible levels.” Therefore, some regulated harvest may be permitted for species on Annex III. The protective provisions of this Annex are not intended to be more restrictive than the provisions of Annexes I and II.

The United States ratified the SPAW Protocol, including Annexes, subject to certain reservations, including the following with respect to Article 11(1): “The United States does not consider itself bound by Article 11(1) of the [SPAW] Protocol to the extent that United States law permits the limited taking of flora and fauna listed in Annexes I and II [] which is incidental, or [] for the purpose of public display, scientific research, photography for educational or commercial purposes, or rescue and rehabilitation.”

The United States has not designated any terrestrial area under the SPAW Protocol. As the United States explained at the time the SPAW Protocol was ratified, “The United States does not plan to designate terrestrial area under the Protocol since no state or territory has identified a need or desire to designate terrestrial area. . . .” (Senate Treaty Document 103-5). In addition, “Several terrestrial species, e.g. bats (*Tadarida brasiliensis* and *Brachyphylla cavernarum*) and falcons (*Falco peregrinus*), are listed in the Annexes. The listing of these species, however, is not intended to describe the relevant terrestrial scope of the Protocol. As the United States has not designated any terrestrial area, the Protocol obligations will not apply with respect to such species.” *Id.*

Summary of Annexes

Annex I contains a total of 53 plant species. All plant species on Annex I are either: (1) Listed under the U.S. Endangered Species Act (ESA); (2) endemic to Florida and protected under Florida law; (3) occur only on Federal land and are fully protected where they occur; (4) are not native to the United States, and are listed in the Appendices of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) where primarily commercial trade would be prohibited; or (5) are not native to, nor believed to be commercially imported into the United States. 56 FR 12026, 12028 (March 21, 1991). There have been no additions to Annex I since the adoption of the SPAW Protocol.

Annex II currently contains 114 species and 3 groups of species, including all sea turtles and all marine mammals in the region. Most of these animal species are either: (1) Listed under the U.S. Endangered Species Act or the Marine Mammal Protection Act; (2) are not native to the United States and are listed in Appendix I of CITES; (3) are offered complete protection by domestic legislation in all range States (whereby the Lacey Act, among other things, prohibits commercial trade in specimens taken, possessed, transported or sold in violation of foreign law); or (4) are endemic to foreign countries and are not commercially imported into the United States. Six new species were added to Annex II by the SPAW Parties in December 2014. *Id.*

Annex III currently contains 43 species of plants and 32 species of animals in addition to species of corals, mangroves, and sea-grasses that occur in the region.

Composition of the Annexes

The plant and animal species present on each Annex can be found here: <http://www.car-spaw-rac.org/?Annexes-of-the-SPAW-Protocol,83>.

Species Recommended by SPAW STAC To Be Added to the SPAW Protocol Annexes

ANNEX II

Species	Common name
BIRDS	
<i>Passerina ciris</i>	Painted bunting.
FISH	
<i>Pristis pectinata</i>	Smalltooth sawfish.

ANNEX III

Species	Common name
SNAILS	
<i>Liguus fasciatus</i>	Florida tree snail.
SHARKS AND RAYS	
<i>Manta birostris</i> , <i>Manta alfredi</i> , <i>Manta sp. cf. birostris</i> .	Manta rays.
<i>Sphyrna lewini</i> , <i>Sphyrna mokarran</i> , <i>Sphyrna zygaena</i> .	Hammerheads.
<i>Carcharhinus longimanus</i> .	Oceanic whitetip shark.
<i>Rhincodon typus</i>	Whale shark.
<i>Epinephelus striatus</i> ..	Nassau grouper.

Circumstances of SPAW STAC Recommendations

Article 11(4) of the SPAW Protocol details the requirements for amending the Annexes and states, in part, that a Party may submit a nomination of a species for inclusion in or deletion from the Annexes; that the Party shall submit supporting documentation; and that the SPAW STAC shall review the nomination. At the November 2016 meeting in Miami, Florida, the SPAW STAC reviewed the species proposed by Parties for listing under the SPAW Protocol and made recommendations to the ninth SPAW Conference of the Parties (COP9) meeting, expected to be held in March 2017. The STAC determined that the procedures for nominating species and the supporting documentation were satisfactory for positive recommendations to the COP regarding the species identified above.

Species Under the Jurisdiction of the National Marine Fisheries Service

Ten of the twelve species that were recommended by the STAC to be added to the Annexes at the November 2016 meeting fall under the jurisdiction of the National Marine Fisheries Service (NMFS). The majority of the species under NMFS' jurisdiction have been recommended to be added to Annex III and include manta rays (*Manta birostris*, *M. alfredi*, and *M. cf. birostris*), hammerhead sharks (*Sphyrna lewini*, *S. mokarran*, and *S. zygaena*), the oceanic whitetip shark (*Carcharhinus longimanus*), the whale shark (*Rhincodon typus*), and the Nassau grouper (*Epinephelus striatus*). The Nassau grouper is listed as a threatened species under the ESA. One species of fish, the smalltooth sawfish (*Pristis pectinata*), has been recommended to be added to Annex II. The smalltooth

sawfish is currently listed as endangered under the ESA, and was originally listed under the ESA in 2003.

Species Under the Jurisdiction of the U.S. Fish and Wildlife Service

Two of the twelve species that were recommended by the STAC to be added to the Annexes at the November 2016 Miami meeting fall under the jurisdiction of the U.S. Fish and Wildlife Service (FWS). One bird species, the Painted bunting (*Passerina ciris*) has been recommended to be added to Annex II. One snail species, the Florida tree snail (*Liguus fasciatus*), has been recommended to be added to Annex III.

Both the Painted bunting and the Florida tree snail are terrestrial species. As explained earlier in this Notice, the United States has not designated any terrestrial area under the SPAW Protocol and the obligations under the SPAW Protocol do not apply in the United States with respect to terrestrial species. Accordingly, no obligations under the SPAW Protocol would apply to these two terrestrial species if they are added to the SPAW Annexes.

Comments Solicited

The Department of State, U.S. Fish and Wildlife Service, and National Marine Fisheries Service solicit comments and information that will inform the United States' consideration of the potential listing of these twelve species in the SPAW Annexes.

Dated: January 9, 2017.

Donna S. Wieting,

Director, Office of Protected Resources, National Marine Fisheries Service.

Mid-Atlantic Fishery Management Council (MAFMC); Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council (Council) will hold public meetings of the Council and its Committees.

DATES: The meeting will be held on Tuesday, February 14 through Thursday, February 16, 2017. For

agenda details, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meetings will be held at: Hilton Garden Inn Kitty Hawk, 5353 N. Virginia Dare Trail, Kitty Hawk, NC 27949, telephone: (252) 261-1290.

Council address: Mid-Atlantic Fishery Management Council, 800 N. State Street, Suite 201, Dover, DE 19901; telephone: (302) 674-2331 or on their Web site at www.mafmc.org.

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526-5255.

SUPPLEMENTARY INFORMATION: The following items are on the agenda, though agenda items may be addressed out of order (changes will be noted on the Council's Web site when possible).

Agenda

Tuesday, February 14, 2017

River Herring/Shad Committee Meeting

Discuss criteria to assess progress in river herring/shad conservation
Mackerel, Squid, and Butterfish Meeting as a Committee of the Whole
Review and approve public hearing document Squid Amendment

Law Enforcement Report

Presentation on National Marine Sanctuary Nomination Process

Wednesday, February 15, 2017

Meeting with the Atlantic States Marine Fisheries Commission's Summer Flounder, Scup, and Black Sea Bass Boards

62nd Northeast Regional Stock Assessment Workshop (62nd SAW)
Overview of black sea bass benchmark stock assessment findings and peer review panelist findings

Black Sea Bass 2017-2019

Specifications
Overview and staff recommendation, SSC recommendation, review Monitoring Committee and Advisory Panel recommendations, and adopt recommendations for 2017-2019

Black Sea Bass Research Update

Black Sea Bass Recreational

Specifications
Review Monitoring Committee and Advisory Panel recommendations, adopt recommendations for 2017 management measures, review Recreational Working Group recommendations and regional/state proposals (possible Board action)

Black Sea Bass Commercial AM Framework

Review background, issues, and draft alternatives

Summer Flounder Amendment
Update on progress and timeline

Thursday, February 16, 2017

Business Session

The day will conclude with brief reports from the National Marine Fisheries Service's GARFO and the Northeast Fisheries Science Center, NOAA's Office of General Counsel, the ASMFC, the New England and South Atlantic Fishery Council's liaisons and the Regional Planning Body Report. The Council will also receive the Council's Executive Director's Report, the Science Report, Committee Reports, and discuss any continuing and/or new business.

Although other non-emergency issues not contained in this agenda may come before this Council for discussion, those issues may not be the subjects of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens act, provided that the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to M. Jan Saunders, (302) 526-5251, at least 5 days prior to the meeting date.

Dated: January 10, 2017.

Jeffrey N. Lonergan,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

National Environmental Policy Act Implementing Procedures and Executive Order 12114 Categorical Exclusions

AGENCY: National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

ACTION: Notice of availability.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA) publishes this notice to notify the public that NOAA has finalized revisions to the

agency's procedures for implementing the National Environmental Policy Act (NEPA) and related authorities, as contained in the Companion Manual to NOAA Administrative Order NAO 216-6A (Companion Manual). Included in the Companion Manual are NOAA's revised categorical exclusions (CE) and related extraordinary circumstances. This notice provides a summary of the public comments received and the agency's responses as well as a summary of changes from the draft to the final procedures. The final Companion Manual is available online at <http://www.nepa.noaa.gov>.

DATES: The revised procedures are effective January 13, 2017.

FOR FURTHER INFORMATION CONTACT: For information regarding NOAA's NEPA procedures, contact Katherine Renshaw, NOAA NEPA Coordinator, at noaa.nepa@noaa.gov or 301-713-7380.

SUPPLEMENTARY INFORMATION:

I. Background

On April 22, 2016, NOAA issued NOAA Administrative Order 216-6A (NAO 216-6A), which updated NOAA's policy for compliance with NEPA, the CEQ NEPA regulations, and other related authorities, including Executive Order (EO) 12114, *Environmental Effects Abroad of Major Federal Actions*; EO 11988, *Floodplain Management*; and EO 11990, *Protection of Wetlands*. The NOAA Administrative Order authorized the development of a Companion Manual entitled *Policy and Procedures for Compliance with the National Environmental Policy Act and Related Authorities* ("Companion Manual"). On November 17, 2016, NOAA published a notice in the **Federal Register** inviting public comments for a 30-day period on the draft Companion Manual, which included NOAA's revised CEs. After careful consideration of the public comments received in response to that notice, and upon further internal review, NOAA has decided to finalize the Companion Manual and CEs with some minor revisions from the November 17, 2016 draft.

II. Comments Received and NOAA's Responses

NOAA received comments from private citizens, nongovernmental organizations, states and state organizations. All substantive comments received and considered are available online at (<http://noaa.nepa.gov>), and on the *Regulations.gov* Web site (www.regulations.gov) at docket ID: [NOAA-HQ-2016-0145]. NOAA has considered all comments received, and

NOAA's response to the comments is contained below.

A. Comments on NOAA's NEPA Process

State commenters raised concerns regarding the process of applying NEPA to the Federal grant application process. State commenters also sought additional criteria for determining whether cumulative and secondary impacts will trigger an Environmental Assessment (EA), specifically requesting a clear flow chart on the process.

NOAA appreciates the concerns expressed by these comments and will continue to seek ways to improve coordination of environmental review requirements as we begin implementing these revised procedures.

B. Comments on Previously Analyzed Activities

State commenters requested that NOAA develop a CE that "includes projects that have already undergone sufficient environmental review under NEPA."

NOAA does not agree that a broad CE that would cover all such activities would be appropriate. Instead, NOAA would point the commenters to section 5 of the Companion Manual that provides guidance on how to determine whether existing NOAA NEPA documents adequately analyze the impacts of a proposed action; as well as section 6(H) that provides guidance on adopting other agency NEPA documents. We believe that the processes outlined in those sections that include factors to consider and required documentation (including, for example, the requirement that NOAA issue its own FONSI when adopting another agency EA), are the appropriate processes to use when relying on existing NEPA documents, consistent with the Council on Environmental Quality (CEQ) regulations and guidance.

C. Comments on Definitions Used in the Companion Manual and CEs

State commenters requested that NOAA provide definitions for frequently used terms including "minor," "small scale," "nondestructive," and "substantial."

NOAA provided definitions for the terms "previously disturbed ground," "minor," "small scale," and "negligible" in the November 17, 2016 **Federal Register** notice (81 FR 81067). In order to ensure consistent application of its procedures, NOAA determined that such definitions should be included in the Companion Manual and will add the definitions included in our initial **Federal Register** notice to the glossary at Appendix A of the Companion

Manual. NOAA will also add definitions for the terms "short term," "long term," and "nondestructive," to provide further clarity. These additional terms will be defined as follows:

Short-term—refers to a potential impact of short duration, relative to the proposed project and the environmental resource. Short-term impacts occur while the activity is underway, and do not persist once the activity ends. Noise produced by temporary construction activities is an example of a short-term impact. *Long-term*—refers to a potential impact of long duration, relative to the proposed project and the environmental resources. Long-term impacts continue after the project has ceased. Permanent impacts that remain after the construction phase of a project is an example of a long-term impact.

Nondestructive—this term refers to actions that do not result in long term or permanent physical alteration of a component of the human environment. Passive acoustics, ground penetrating radar, and air quality sampling are examples of nondestructive methods to collect environmental data.

D. Comments on Individual CEs

A1

One commenter recommended deleting the phrase "access to fishery resources" from A1. The commenter notes that actions that change access to fishery resources do not necessarily result in environmental impacts when there are no changes of any of the other actions listed in the CE, *i.e.*, fishing location, timing, effort, authorized gear types, or harvest levels.

We agree, and have removed the phrase "access to fishery resources" from the text of CE A1.

A5

State commenters requested that NOAA modify CE A5 so as to include minor five-year updates to National Estuarine Research Reserve (NERR) management plans relative to boundary expansion based on acquisition of property for conservation purposes. The proposed A5 applies to updates to NERR management plans, provided that the update does not change NERR boundaries.

Boundary changes will involve areas that fall outside the geographic scope of the original Environmental Impact Statement (EIS) prepared pursuant to 15 CFR 921.13, and may involve potentially significant impacts to additional species or habitats that were not considered when the reserve was established. For this reason, NOAA will retain the proposed limiting language in the CE in the final procedures.

B4

One comment raised concerns with proposed CE B4. Generally, the comment expresses concern that the application of the CE will result in a failure to consider the cumulative impacts of activities authorized under that CE. Additionally, the commenter is concerned about NOAA's decision to include authorizations under both sections 101(a)(5)(A) and (D) of the Marine Mammal Protection Act (MMPA) in the same CE, arguing that doing so ignores the differences in these authorizations. The commenter finally expressed a concern that NOAA has eliminated language from the 1999 procedures that had specifically stated that "if authorization under 101(a)(5)(A) does not tier from a programmatic environmental review, that action may require an EIS, EA, or CE, based on a case-by-case review."

NOAA has determined that this CE, by its terms, and in light of the requirement to consider extraordinary circumstances, is appropriate and would not have the potential for significant impacts. In particular, NOAA notes that extraordinary circumstances (l) refers to "the potential for significant cumulative impacts when the proposed action is combined with other past, present and reasonably foreseeable future actions, even though the impacts of the proposed action may not be significant by themselves." See Companion Manual for NOAA Administrative Order 216-6A at 4-5.

Additionally, the B4 CE does not ignore the differences between 101(a)(5)(A) and (D); rather it was crafted to apply to incidental take authorizations issued under either provision *if* they meet the criterion of no serious injury or mortality (and are not disqualified under the extraordinary circumstances evaluation). While it is true that criterion will be satisfied with any authorization issued under section 101(a)(5)(D), it is also true that in some cases authorizations issued under section 101(a)(5)(A) could meet that criterion as well, depending on the specified activity. Section 101(a)(5)(A) allows for authorization of take by serious injury or mortality but is not only for activities involving those effects.

Finally, NOAA notes that although language specific to the application of NEPA to the MMPA process was removed in the revised NEPA procedures, generally applicable provisions still apply to MMPA authorizations. For example, section 3 of the Companion Manual explains how, on a case-by-case basis, to

determine the proper level of NEPA analysis for an action.

One comment raises a concern that proposed CE B12 is overly broad and requests that NOAA delete the CE. As proposed, B12 would cover “issuance of Exempted Fishing Permits (EFP) under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) and Scientific Research Permits (SRP) and other permits for research that may impact species regulated under the authority of the MSA and the Atlantic Tunas Convention Act (ATCA). This includes permitted research of limited size, magnitude or duration with negligible individual or cumulative impacts, which requires temporary relief of fishery management regulations.”

NOAA has determined that this CE, by its terms, and in light of the requirement to consider extraordinary circumstances, is appropriate and would not have the potential for significant impacts. We agree, however, that as proposed, CE B12 would benefit from revision for clarity to make clear that the limitations described in the proposed category apply to all activities under the CE. NOAA will revise B12 in the following manner: “Issuance of Exempted Fishing Permits (EFP), Scientific Research Permits (SRP), and other permits for research that may impact species regulated under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) and the Atlantic Tunas Convention Act (ATCA). This CE is limited to permits that authorize activities of limited size, magnitude or duration, which have no potential for significant individual or cumulative impacts.”

C1

State commenters asked for several areas of clarification regarding the application of CE C1 that addresses habitat restoration activities.

The state commenters requested that NOAA either remove the CE’s dredge and fill limitation, or provide additional clarity as to the application of that limitation. As proposed, C1 is limited to projects that “[do] not require substantial placement of fill or dredging.”

NOAA believes that the limitation of the CE with respect to dredging and placement of fill is appropriate and notes that its application will be context dependent. When considering whether placement of fill or dredging are “substantial,” NOAA will consider the volume of the fill to be placed, as well as the context in which it would occur to determine that the placement will not

have the potential to cause significant environmental impacts. Thus, NOAA is not proposing any modifications to this CE to address this issue.

Additionally, the states requested that NOAA further limit covered habitat restoration actions to those that transplant only native species. The proposed C1 language would limit actions to those that “transplant” only organisms currently or formerly present at the site or in its immediate vicinity (if transplant is a component of the action). The states expressed concern that without limiting transplant to native species that such actions may result in impacts from exotic invasive species.

NOAA has determined that this CE, by its terms, and in light of the requirement to consider extraordinary circumstances, is appropriate and would not have the potential for significant impacts. In particular, NOAA notes that extraordinary circumstance (j) refers to the “contribution to the introduction, continued existence, or spread of noxious weeds or non-native invasive species known to occur in the area or actions that may promote the introduction, growth, or expansion of the range of the species.” See Companion Manual for NOAA Administrative Order 216–6A at 4–5. Accordingly, if a proposed action to transplant organisms has the potential to result in significant impacts due to the potential spread of exotic invasive species, such an action may require additional analysis.

Finally, the states requested further guidance as to the applicability of C1 to various restoration activities such as living shoreline construction, routine terrestrial restoration activities, and stocking fish and associated activities.

As noted in Appendix E, the examples provided with the CEs are intended to be illustrative, but not exhaustive. Thus, omission of a particular activity does not mean that such activity could not potentially be covered by the CE. In reviewing whether an activity, such as a living shoreline construction project would be potentially included within C1, NOAA would consider the particular elements of that project to determine whether the proposed action fits within the limits of the CE.

F3

State commenters requested clarification as to whether CE F3 applies to the restoration or repair of buildings of cultural or historic significance. Additionally, state commenters sought clarification as to whether the CE applies to small-scale construction of

boat ramps, fishing piers, and observation platforms. Commenters note that limitations in F3(b), such as F3(b)(3) that would preclude proposed uses of newly constructed facilities that will substantially increase the number of marine vessels in the area would potentially preclude application to the construction of public access facilities such as boat ramps. Finally, one commenter questioned how NOAA will determine viewshed impacts.

NOAA’s extraordinary circumstance (e) would require evaluation of whether a proposed activity would involve adverse effects on properties listed or eligible for listing on the National Register of Historic Places authorized by the National Historic Preservation Act of 1966, National Historic Landmarks designated by the Secretary of the Interior, or National Monuments designated through the Antiquities Act of 1906; Federally recognized tribal and Native Alaskan lands, cultural or natural resources, or religious or cultural sites that cannot be resolved through applicable regulatory processes. See Companion Manual for NOAA Administrative Order 216–6A at 4–5.

With respect to the construction of public access facilities, NOAA notes that such activities are covered explicitly under F3(c), and not F3(b). Thus, the limitations that the commenters are concerned with would not be applicable to the construction of public access facilities such as boat ramps, docks, or observation platforms. Those projects are potentially allowable under the CE so long as the proposed activity is (1) small-scale and nondestructive; and (2) is consistent with applicable right-of-way conditions and approved land use plans. NOAA notes that there is a typographical error in the proposed CE that included an “and” following F3(c)(2), which may be confusing, and has corrected that error.

As discussed above, NOAA is adding several additional definitions to the handbook, including “nondestructive.” NOAA does not believe that it is necessary to make any modifications to the CE to exempt small scale construction of public access facilities such as boat ramps, fishing piers, and observation platforms as such activities are explicitly covered by F3(c), and included as examples of activities covered by the CE. As described in our definitions section, we believe that it is appropriate to define small scale relative to the potential impacts of the project, rather than with respect to the funding level involved.

Finally, with respect to viewshed impact evaluation, NOAA’s staff will rely upon their professional expertise

and standard practices and procedures to evaluate potential impacts to viewsheds. Viewshed analysis, through the use of GIS technology, is commonly used by researchers and natural resource managers to assess potential visual impacts of development.

F4

State commenters request that NOAA clarify whether routine grounds keeping and landscaping would include native landscaping installation or rain gardens and other storm water Best Management Practices.

As discussed above, when determining whether a particular proposed action would be potentially included within a CE, NOAA will consider the particular elements of the project to determine its eligibility. NOAA does note however, that activities that involve improvements of real property may be better categorized under CE F3.

G1

State commenters request clarification as to whether CE G1 applies to the development of community development plans, vulnerability assessments, erosion management plans, feasibility studies, and engineering/design plans for restoration projects.

G1 includes routine administrative actions such as development, establishment, and revisions to documents including, but not limited to interagency agreements, memoranda of understanding, memoranda of agreement, cooperative agreements and university agreements. As noted in Appendix E, the examples provided with the CEs are intended to be illustrative, but not exhaustive. Thus, omission of a particular activity does not mean that such activity could not potentially be covered by the CE. NOAA will evaluate proposed actions on a case-by-case basis to determine whether they are appropriately addressed by the CE.

H4

State commenters request clarification as to whether the acquisition of land intended for habitat restoration, including removal of invasive plant species or off-site native plants/trees would be included within CE H4. Commenters additionally request the development of a new CE to explicitly cover tree removal activities.

CE H4 applies to the acquisition of real property that is not acquired through condemnation of a lease interest, and will not result in significant change in use and does involve construction or modification.

Accordingly, so long as the acquisition is done in accordance with the terms of the CE, and upon review by NOAA's NEPA professional staff, acquisition of land intended for habitat restoration may potentially be covered. NOAA notes that one of the examples provided of activities covered by the CE includes funding for land acquisition under the Coastal Zone Management Act (CZMA) and Fish and Wildlife Conservation Act (FWCA) to purchase land (submerged or not submerged) or interests in land that includes but is not limited to conservation easements, for purposes that do not involve construction or modification.

With respect to the request for the development of an additional CE to specifically cover tree removal, NOAA does not currently have the experience to support expanding the CE to include such projects, but this may change as NOAA gains experience over time.

III. Additional Changes to Companion Manual and Categorical Exclusions

In addition to revisions to CEs based on its consideration of public comments, NOAA further reviewed the proposed CEs and determined that certain CEs would benefit from revisions that clarified the scope and applicability of the CE, specifically the limitations described in the text of the CE to ensure it is only applied to activities with no potential for significant effects on the environment under normal circumstances. Internal discussions also resulted in many instances in the addition or revision of examples provided for the CEs for the benefit of NOAA NEPA practitioners. Additionally, NOAA identified typographical and grammatical errors and corrected those errors. This section explains the substantive revisions NOAA made to its proposed CEs and the rationale for those revisions.

E3

NOAA is adding two additional examples of activities that fit within this category: "use of mobile platforms (*e.g.*, ships, aircraft, balloons, vehicles) to study biological, chemical, or physical processes;" and "collection of cultural and environmental data to find and assess archaeological resources."

E4

NOAA has made minor modifications to the text of E4 following internal discussions with subject matter experts in order to ensure that the category of activities is sufficiently limited. The revised text is as follows: "Activities that remotely survey or observe living resources in the field using non-invasive

techniques, which have little to no potential to adversely affect the environment or interfere with organisms or habitat." NOAA has also slightly modified one of the examples provided to make clear that electronic monitoring activities under this category are limited to deployment of non animal-borne devices.

E5

NOAA has made minor modifications to the text of E5 following internal discussions with subject matter experts in order to ensure that the category of activities is sufficiently limited. The revised text is as follows: "Activities involving invasive techniques or methods that are conducted for scientific purposes, when such activities are conducted in accordance with all applicable provisions of the Endangered Species Act, Marine Mammal Protection Act, Migratory Bird Treaty Act, and Magnuson-Stevens Fishery Conservation and Management Act. Such activities will be limited to impacting living resources on a small scale relative to the size of their populations, and limited to methodologies and locations to ensure that there are no long-term, adverse ecosystem impacts."

E6

NOAA made a minor modification to the text of E6 to improve internal consistency. The text of the revised CE is as follows: "Research that involves the development and testing of new and modified fishing gear and technology in order to reduce adverse effects from fishing gear on non-target species, and is limited in size, magnitude or duration with no potential for significant individual or cumulative impacts."

E7

Based on internal discussions on proposed CE E7, NOAA has revised the text of the CE to remove the references to fishing vessels and dockside as locations for the collection of data and biological samples. These terms were intended to be broad and to encompass any number of locations, including, for example, on fishing vessels, on motherships, in processing plants, dockside, and shoreside. However, that broad scope might not have been obvious to readers on the face of the proposed CE, and including the terms "fishing vessels" and "dockside" may have unintentionally suggested a narrower scope than what was intended. Therefore, we are removing those terms from the text of the CE and leaving the CE to broadly encompass data and biological samples collected as part of

previously authorized commercial and/or recreational fishing activities. This change does not change the intended scope of the proposed CE, but only makes the scope of the CE clearer for users and the public. In addition, we have revised the first example under this CE to add “Collecting data from” before “observer coverage onboard commercial and recreational fishing vessels.” This change is being made to make it more explicit that the example is referring only to the collection of data through previously authorized observer coverage, and nothing else related to observer coverage. This CE does not cover observer coverage requirements onboard commercial or recreational fishing vessels, which are generally addressed through fishery management plans or regulations for the fishery for which observer coverage is being implemented.

E8

NOAA made a minor modification to the text of E8 following internal discussions with subject matter experts to ensure that the scope of the CE correctly described the activities undertaken and funded by NOAA. The text of the revised CE is as follows: “Biological, chemical, food production, ecological, or toxicological research conducted in closed system mesocosm/aquaculture facilities that are conducted according to recommended protocols that provide containment and disposal of waste, chemicals, toxins, non-native species, etc., in compliance with established Federal and state regulatory guidelines, and best management practices.”

IV. NOAA Categorical Exclusions

The following series of CEs includes actions that may be implemented either directly by NOAA or by the recipient of a financial assistance award. The activities contemplated in the series of CEs have been evaluated and found not to have individual or cumulative significant impacts on the human environment, whether implemented by a grantee through a financial assistance award or directly implemented by NOAA. These CEs can be found as appendix E to the Companion Manual, along with illustrative examples for many of the categories.

Trust Resource Management Actions

[A1]. “An action that is a technical correction or a change to a fishery management action or regulation, which does not result in a substantial change in any of the following: fishing location, timing, effort, authorized gear types, or harvest levels.”

[A2]. “Preparation of a recovery plan pursuant to section 4(f)(1) of the ESA. Such plans are advisory documents that provide consultative and technical assistance in recovery planning and do not implement site-specific or species-specific management actions. However, implementation of specific tasks identified in a recovery plan may require an EA or EIS depending on the nature of the action.”

[A3]. “Temporary fishery closures or extensions of closures under Section 305(c)(3)(C) of the Magnuson-Stevens Fishery Conservation and Management Act to ensure public health and safety.”

[A4]. “Minor updates to existing national marine sanctuary management plans. This CE does not apply to sanctuary designations, expansions, changes in terms of designation, or new sanctuary management plans.”

[A5]. “Updates to existing National Estuarine Research Reserve (NERR) management plans, provided that the update does not change NERR boundaries or add or significantly change allowable uses, uses requiring a permit, or restrictions on uses. This CE does not apply to new NERR management plans, or to the execution of any specific action subsequently funded to support the updated NERR management plan.”

[A6]. “Review and approval of changes to state coastal management programs under the Coastal Zone Management Act (CZMA) § 306(e) (16 U.S.C. 1455(e)) and NOAA’s regulations at 15 CFR part 923.”

Trust Resource Authorization and Permitting Actions

[B1]. “Issuance of permits or permit modifications under section 10(a)(1)(A) of the ESA for take, import, or export of endangered species for scientific purposes or to enhance the propagation or survival of the affected species, or in accordance with the requirements of an ESA section 4(d) regulation for threatened species.”

[B2]. “Issuance of permits or permit amendments under section 104 of the MMPA for take or import of marine mammals for scientific research, enhancement, commercial or educational photography or public display purposes; and issuance of Letters of Confirmation under the General Authorization for scientific research involving only Level B harassment.”

[B3]. “Issuance of, and amendments to, “low effect” Incidental Take Permits and their supporting “low effect” Habitat Conservation Plans under section 10(a)(1)(B) of the ESA.”

[B4]. “Issuance of incidental harassment authorizations under section 101(a)(5)(A) and (D) of the MMPA for the incidental, but not intentional, take by harassment of marine mammals during specified activities and for which no serious injury or mortality is anticipated.”

[B5]. “Issuance of, or amendments to, general permits for activities that are included in established permit categories at 15 CFR pt. 922 and that meet the regulatory review criteria at 15 CFR pt. 922, that limit any potential impacts so that the proposed activity will be conducted in a manner compatible with the National Marine Sanctuaries Act’s primary objective of resource protection.”

[B6]. “Issuance of, or amendments to, special use permits for activities in a national marine sanctuary that are necessary to either establish conditions of access to and use of any sanctuary resource or promote public use and understanding of a sanctuary resource and must be conducted in a manner that does not destroy, cause the loss of, or injure sanctuary resources in accordance with the National Marine Sanctuaries Act.”

[B7]. “Issuance of or amendments to, authorizations for activities allowed by a valid federal, regional, state, local or tribal government approval (e.g., leases, permits and licenses) issued after the effective date of sanctuary designation or expansion, so long as such authorizations are based upon a consideration of the regulatory review criteria at 15 CFR pt. 922, and will only result in negligible effects to sanctuary resources.”

[B8]. “Issuance of, or amendments to certifications for pre-existing activities authorized by a valid federal, regional, state, local, or tribal government approval (e.g., leases, permits and licenses) or rights of subsistence use or access in existence on the date of the designation or expansion of any national marine sanctuary where the Office of National Marine Sanctuaries issues terms and conditions that are either ministerial or prescribe avoidance, minimization, or mitigation measures designed to ensure negligible effects to sanctuary resources.”

[B9]. “Issuance of, or amendments to Papahānaumokuākea Marine National Monument (as originally established by Presidential Proclamation 8031 and named Papahānaumokuākea Marine National Monument by Presidential Proclamation 8112) permits for activities that are included in established permit categories (50 CFR pt. 404) and that meet the regulatory review criteria at (50 CFR 404.11), that

limit any potential impacts so that the proposed activity will be conducted in a manner compatible with the monument's primary objective of resource protection."

[B10.] "Issuance of, or amendments to, Papahānaumokuākea Marine National Monument special ocean use permits for activities or use of the monument that are engaged in to generate revenue or profits for one or more of the persons associated with the activity or use, and do not destroy, cause the loss of, or injure monument resources."

[B11.] "Issuance of, or amendments to permits or authorizations for activities that are conducted within Marine National Monuments other than Papahānaumokuākea that are limited in scope so that the potential impacts of the proposed activities will be conducted in a manner compatible with a monument's primary objective of resource protection, and do not destroy, cause the loss of, or injure monument resources."

[B12.] "Issuance of Exempted Fishing Permits (EFPs), Scientific Research Permits (SRPs), and other permits for research that may impact species under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) and the Atlantic Tunas Convention Act (ATCA). This CE is limited to permits that authorize activities that are limited in size, magnitude or duration with no potential for significant individual or cumulative impacts."

Habitat Restoration Actions

[C1.] "Habitat restoration actions, provided that such action: (1) transplants only organisms currently or formerly present at the site or in its immediate vicinity (if transplant is a component of the action); (2) does not require substantial placement of fill or dredging; (3) does not involve any removal of debris, excavation, or conditioning of soils unless such removal of debris, excavation, or conditioning of soils is geographically limited to the impact area such that site conditions will not impede or negatively alter natural processes, is in compliance with all permit and disposal requirements, and will not impact critical aquifers or recharge areas; and (4) does not involve an added risk of human or environmental exposure to toxic or hazardous substances, pathogens, or radioactive materials.

Notes: If applicable, limitations and mitigation measures identified in the NOAA Restoration Center Programmatic Environmental Impact Statement for Habitat Restoration Actions must be

followed. This CE includes, but is not limited to, response or restoration actions under CERLCA, OPA, or NMSA, if such actions help to restore an ecosystem, habitat, biotic community, or population of living resources to a determinable preimpact condition prior to the incident leading to the response or restoration."

Additional External Funding

[D1.] "Financial activities for the following financial services: (1) Loans for purchase, refinancing, or reconstruction of fishing vessels and purchase or refinancing of individual fishing quota through the Fisheries Finance Program; (2) Deferred tax program provided to fishermen to construct, reconstruct, or acquire fishing vessels through the Capital Construction Fund Program; and (3) Compensation to fishermen for economic and property losses caused by oil and gas obstructions on the U.S. Outer Continental Shelf under the Fishermen's Contingency Fund."

[D2.] "Provision of a grant, a contract or other financial assistance to a State, Fishery Management Council or Marine Fisheries Commission under 16 U.S.C. 1881a(d)."

Research Actions

[E1.] "Activities conducted in laboratories and facilities where research practices and safeguards prevent environmental impacts."

[E2.] "Social science projects and programs, including economic, political science, human geography, demography, and sociology studies, including information collection activities in support of studies."

[E3.] "Activities to collect aquatic, terrestrial, and atmospheric data in a non-destructive manner."

[E4.] "Activities that remotely survey or observe living resources in the field using non-invasive techniques, which have little to no potential to adversely affect the environment or interfere with organisms or habitat."

[E5.] "Activities involving invasive techniques or methods that are conducted for scientific purposes, when such activities are conducted in accordance with all applicable provisions of the Endangered Species Act, Marine Mammal Protection Act, Migratory Bird Treaty Act, and Magnuson-Stevens Fishery Conservation and Management Act. Such activities will be limited to impacting living resources on a small scale relative to the size of their populations, and limited to methodologies and locations to ensure

that there are no long-term adverse ecosystem impacts."

[E6.] "Research that involves the development and testing of new and modified fishing gear and technology in order to reduce adverse effects from fishing gear on non-target species, and is limited in size, magnitude, or duration with no potential for significant individual or cumulative impacts."

[E7.] "Collection of data and biological samples as part of previously authorized commercial and/or recreational fishing activities."

[E8.] "Biological, chemical, food production, ecological, or toxicological research conducted in closed system mesocosm/aquaculture facilities that are conducted according to recommended protocols that provide containment and disposal of waste, chemicals, toxins, non-native species, etc., in compliance with established Federal and state regulatory guidelines, and best management practices."

Real and Personal Property Improvement, Maintenance, and Construction Actions

[F1.] "Siting, construction (or modification), and operation of support buildings and support structures (including, but not limited to, trailers and prefabricated buildings) within or contiguous to an already developed area (where active utilities and currently used roads are readily accessible)."

[F2.] "In-kind replacement of personal property and fixtures and other components of real property when such activities do not result in a substantial change in the existing construction footprint. In-kind replacement includes installation of new components to replace outmoded components if the replacement does not result in a substantial change to the design capacity, or function of the facility."

[F3.] "(a) Routine repair, maintenance, and improvement of real and personal property, where such activities are required to maintain and preserve buildings, structures, infrastructures, vehicles, and equipment in a condition suitable to be used for its designed purpose.

(b) New construction, expansion and/or improvement of facilities where all of the following conditions are met:

(1) The site is in a developed area and/or a previously disturbed site;

(2) The structure and proposed use are compatible with applicable Federal, Tribal, State, and local planning and zoning standards and consistent with Federally approved State coastal management programs and the National Historic Preservation Act;

(3) The proposed use will not substantially increase the number of motor vehicles, marine vessels, or aircraft at the facility or in the area;

(4) The site and scale of construction or improvement are consistent with those of existing, adjacent, or nearby buildings;

(5) The construction or improvement will not result in uses that exceed existing infrastructure capacities (*e.g.*, electrical, roads, sewer, water, parking);

(6) The construction or improvement will not result in operational uses that adversely affect the surrounding community (*e.g.*, noise); and

(7) The community-valued view sheds are not adversely affected.

(c) Installation, repair, maintenance, and enhancement of public access facilities and infrastructure, if the activity:

(1) Is small-scale and nondestructive; and

(2) Is consistent with applicable right-of-way conditions and approved land use plans.”

[F4.] “Routine groundskeeping and landscaping activities where ground disturbance is limited to previously disturbed areas (*e.g.*, previously filled paved, or cleared areas).”

[F5.] “Installation, operation, maintenance, improvements, repair, upgrade, removal, and/or replacement of instruments or instrument systems in or on:

1. An existing structure or object (*e.g.*, tower, antenna, building, pier, buoy, terrestrial vehicle, or bridge) or

2. on previously disturbed (*e.g.*, filled, paved, or cleared) ground, or

3. on undisturbed ground, if the equipment installation, operation, and removal will require no or minimal ground disturbance.”

Microwave/radio communications towers and antennas must be limited to 200 feet in height without guy wires. NOAA proposes a new CE to cover activities of installing, operating, repairing, maintaining, upgrading, removing and/or replacing instruments or instrument systems in or on an existing structure or object, or on previously disturbed ground or on undisturbed ground that involve either no or minimal ground disturbance.

[F6.] “The determination that real property is excess to the needs of the Agency, when the real property is excessed in conformity with General Services Administration procedures or is legislatively authorized to be excessed.”

[F7.] “The disposal, demolition or removal of real property and related improvements, buildings and structures, including associated site restoration,

and the disposal of personal property and debris in accordance with all applicable agency procedures and legal requirements.”

Operational Actions

[G1.] “Routine administrative actions such as (1) program planning, direction and evaluation, (2) administrative tasks, services and support including personnel and fiscal management, advisory services, document and policy preparation, and records management, and (3) development, establishment, and revisions to documents including, but not limited to interagency agreements, memoranda of understanding, memoranda of agreement, cooperative agreements, and university agreements. This CE does not include any associated activities proposed in these documents beyond the administrative task of creating and establishing the document. Actions subsequently funded by or undertaken pursuant to the approved documents may require additional NEPA review at the time those actions are proposed.”

[G2.] “Routine movement of mobile assets, such as vessels and aircraft, for homeport reassignments or repair/overhaul, where no new support facilities are required.”

[G3.] “Topographic, bathymetric, land use and land cover, geological, hydrologic mapping, charting, and surveying services that do not involve major surface or subsurface land disturbance and involve no permanent physical, chemical, or biological change to the environment.”

[G4.] “Basic environmental services and monitoring, such as weather observations, communications, analyses, and predictions; environmental satellite operations and services; digital and physical environmental data and information services; air and water quality observations and analysis, and IT operations. All such activities must be conducted within existing facilities.”

[G5.] “Enforcement operations conducted under legislative mandate such as the MSA, ESA, MMPA, the Lacey Act Amendments of 1981 (Lacey), and/or the National Marine Sanctuaries Act. This does not include bringing judicial or administrative civil or criminal enforcement actions which are outside the scope of NEPA in accordance with 40 CFR 1508.18(a).”

[G6.] “Actions that change the NEXRAD radar coverage patterns that do not lower the lowest scan elevation and do not result in direct scanning of previously non-scanned terrain by the NEXRAD main beam.”

[G7.] “Preparation of policy directives, rules, regulations, and guidelines of an administrative, financial, legal, technical, or procedural nature, or for which the environmental effects are too broad, speculative or conjectural to lend themselves to meaningful analysis and will be subject later to the NEPA process, either collectively or on a case-by-case basis.”

[G8.] “Activities that are educational, informational, or advisory to other agencies, public and private entities, visitors, individuals, or the general public, including training exercises and simulations.”

[G9.] “Actions taken to identify, determine sources of, assess, prevent, reduce, remove, dispose, or recycle marine debris when removal is undertaken in a non-destructive manner and actions are in accordance with Federal, State, and local laws and regulations for environmental protection, and where all relevant regulatory consultation, and/or permit requirements have been satisfied.”

Acquisition and Real Property Actions

[H1.] “Procurement of labor, equipment, materials, data and software needed to execute mission requirements in accordance with applicable procurement regulations, executive orders, and policies. This includes, but is not limited to, procurement of mobile and portable equipment that is stored in existing structures or facilities.”

[H2.] “Procurement of space by purchase or lease of or within an existing facility or structure in accordance with applicable procurement regulations, executive orders, and policies when there is no change in the general type of use, no new construction of buildings or utilities, and minimal change in design from the previous occupancy level.”

[H3.] “Outgranting of government-controlled property in accordance with applicable regulations, executive orders, and policies to a Federal entity for any purpose consistent with the existing land or facility use or to a non-Federal entity, when the use will remain substantially the same.”

[H4.] “Acquisition of real property (including fee simple estates, leaseholds, and easements) that is not acquired through condemnation of a lease interest, and will not result in significant change in use and does not involve construction or modification.”

[H5.] “Granting easements or rights of entry to use NOAA controlled property for activities that, if conducted by NOAA, could be categorically excluded. Grants of easements or rights-of-way for the use of NOAA controlled real

property complementing the use of existing rights-of-way or real property use for use by vehicles (not to include significant increases in vehicle loading); electrical, telephone, and other transmission and communication lines; water, wastewater, stormwater, and irrigation pipelines, pumping stations, and facilities; and similar utility and transportation uses.”

[H6.] “Relocation of employees into existing Federally-owned or commercially leased office space within the same metropolitan area not involving a substantial increase in the number of motor or other vehicles at a facility.”

[H7.] “Transferring real property to a non-Federal entity, an agency other than GSA, as well as to States, local agencies and Indian Tribes, including return of public domain lands to the Department of the Interior.”

Dated: January 6, 2017.

Lois J. Schiffer,

General Counsel for the National Oceanic and Atmospheric Administration.

BILLING CODE 3510-12-P

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

[Docket No. 170105023-7023-01]

RIN 0660-XC033

The Benefits, Challenges, and Potential Roles for the Government in Fostering the Advancement of the Internet of Things

AGENCY: National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Notice, request for public comment.

SUMMARY: Recognizing the vital importance of the Internet to U.S. innovation, prosperity, education, and civic and cultural life, the Department of Commerce (Department) has made it a top priority to encourage growth of the digital economy and ensure that the Internet remains an open platform for innovation. Thus, as part of the Department’s Digital Economy Agenda, the National Telecommunications and Information Administration (NTIA) issued a green paper “Fostering the Advancement of the Internet of Things” that lays out an approach and areas of engagement for the Department’s possible future work on the Internet of Things (IoT). Through this Notice, NTIA seeks broad input from all interested

stakeholders—including the private industry, researchers, academia, and civil society—on the issues and proposed approach, current initiatives, and next steps laid out in this paper. These comments will help inform Department leadership on possible future Department action regarding IoT.

DATES: Comments are due on or before 5 p.m. Eastern Time on February 27, 2017.

ADDRESSES: Written comments may be submitted by email to iotrfc2017@ntia.doc.gov. Comments submitted by email should be machine-readable and should not be copy-protected. Written comments also may be submitted by mail to the National

Telecommunications and Information Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Room 4725, Attn: IOT RFC 2017, Washington, DC 20230. Responders should include the name of the person or organization filing the comment, as well as a page number on each page of their submissions. All comments received are a part of the public record and will generally be posted on the NTIA Web site, <http://www.ntia.doc.gov/>, without change. All personal identifying information (for example, name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information. NTIA will accept anonymous comments.

FOR FURTHER INFORMATION CONTACT: Travis Hall, National Telecommunications and Information Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW., Room 4725, Washington, DC 20230; telephone (202) 482-3522; email thall@ntia.doc.gov. Please direct media inquiries to NTIA’s Office of Public Affairs, (202) 482-7002, or at press@ntia.doc.gov.

SUPPLEMENTARY INFORMATION:

Background: As part of the Department’s Digital Economy Agenda, the National Telecommunications and Information Administration (NTIA) is requesting comment on the benefits, challenges, and potential roles for the government in fostering the advancement of the Internet of Things (IoT).

The Internet of Things—in which connected devices are proliferating at an unprecedented rate—is transforming the way we live and do business. IoT continues the decades-long trend of increasing connectivity among devices and the Internet, bringing online

everything from refrigerators to automobiles to factory inventory systems. At the same time, IoT encompasses a widening scope of industries and activities and a vastly increasing scale and number of devices being connected, thus raising the stakes and impacts of broad connectivity. Due to its expertise and experience with the issues raised by IoT, as well as its economy-wide perspective, the Department is well placed to meet the challenges of IoT and to champion the development of a robust IoT environment that benefits consumers, the economy, and society as a whole.

With an April 2016 Request for Comment, “The Benefits, Challenges, and Potential Roles for the Government in Fostering the Advancement of the Internet of Things,” the Department sought to review the current technological and policy landscape relating to IoT.¹ A broad array of stakeholders—from the private sector, academia, government, and civil society—offered perspectives in response to the request.² In September 2016, the Department hosted a workshop to delve deeper into the questions raised by the Request for Comment, and to explore some of the related issues arising from the public comments.³ The Department issued a green paper entitled “Fostering the Advancement of the Internet of Things,” which represents the Department’s analysis of those comments.⁴ The green paper also identifies key issues that can impact the deployment of IoT technologies, highlights potential benefits and challenges, and discusses what role, if any, the U.S. Government, particularly the Department, should play in this evolving landscape. With this Request for Comment, the Department is asking for a response to the issues raised by the green paper, as well as the proposed approach, current initiatives, and next steps.

¹ Request for Comments on the Benefits, Challenges, and Potential Roles for the Government in Fostering the Advancement of the Internet of Things, 81 FR 19956 (April 16, 2016), available at <https://ntia.doc.gov/federal-register-notice/2016/rfc-potential-roles-government-fostering-advancement-internet-of-things>.

² All comments are publicly available at: <https://ntia.doc.gov/federal-register-notice/2016/comments-potential-roles-government-fostering-advancement-internet-of-things>.

³ “Fostering the Advancement of the Internet of Things Workshop Webcast,” September 1, 2016, available at <https://ntia.doc.gov/other-publication/2016/09012016-fostering-advancement-internet-things-workshop-webcast> (In addition to the webcast, also available are the Workshop agenda, transcript, and various presentations).

⁴ The IOT green paper is available at: <https://www.ntia.doc.gov/other-publication/2017/green-paper-fostering-advancement-internet-things>.

Request for Comment

Instructions for Commenters: The Department invites comment on the full range of issues that may be presented by this inquiry, including issues that are not specifically raised in the following questions. Commenters are encouraged to address any or all of the following questions. Comments that contain references to studies, research, and other empirical data that are not widely published should include copies of the referenced materials with the submitted comments.

(1) *Is our discussion of IoT presented in the green paper regarding the challenges, benefits, and potential role of government accurate and/or complete? Are there issues that we missed, or that we need to reconsider?*

(2) *Is the approach for Departmental action to advance the Internet of Things comprehensive in the areas of engagement? Where does the approach need improvement?*

(3) *Are there specific tasks that the Department should engage in that are not covered by the approach?*

(4) *What should the next steps be for the Department in fostering the advancement of IoT?*

For any response, commenters may wish to consider describing specific goals or actions that the Department, or the U.S. Government in general, might take (on its own or in conjunction with the private sector) to achieve those goals; the benefits and costs associated with the action; whether the proposal is agency-specific or interagency; the rationale and evidence to support it; and the roles of other stakeholders.

Dated: January 10, 2017.

Kathy D. Smith,

Chief Counsel, National Telecommunications and Information Administration.

BILLING CODE 3510-60-P

DEPARTMENT OF COMMERCE**Patent and Trademark Office**

[Docket No. PTO-P-2016-0046]

Reopening of the Period for Comments on a Preliminary Draft Convention on the Recognition and Enforcement of Foreign Judgments Currently Being Negotiated at The Hague Conference on Private International Law

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Reopening of the comment period.

SUMMARY: The United States Patent and Trademark Office is publishing this notice to reopen the comment period provided in its notice of November 18, 2016, entitled Request for Comments and Notice of Public Meeting on a Preliminary Draft Convention on the Recognition and Enforcement of Foreign Judgments Currently Being Negotiated at the Hague Conference on Private International Law. The new deadline for public comments is January 18, 2017.

DATES: *Written Comments:* Written comments must be received on or before January 18, 2017.

ADDRESSES: *Written Comments:* Interested parties are encouraged to file written comments electronically by email to judgmentsproject@uspto.gov. Comments submitted by email should be machine-searchable and should not be copy-protected. Written comments also may be submitted by mail to the Office of Policy and International Affairs, United States Patent and Trademark Office, Mail Stop International Affairs, P.O. Box 1450, Alexandria, Virginia 22313-1450. Responders should include the name of the person or organization filing the comment, as well as a page number, on each page of their submissions. Paper submissions should also include a CD or DVD containing the submission in MS Word®, WordPerfect®, or pdf format. CDs or DVDs should be labeled with the name and organizational affiliation of the filer, and the name of the word processing program used to create the document. All personally identifiable information (for example, name, address, etc.) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information. The USPTO will accept anonymous written comments (enter "N/A" in the required fields if you wish to remain anonymous).

All comments received are part of the public record and will be available for public inspection without charge via the USPTO's Web site at www.uspto.gov/learning-and-resources/ip-policy/hague-conference-private-international-law and at the Office of the Director, Policy and International Affairs, located in Madison West, Tenth Floor, 600 Dulany Street, Alexandria, Virginia 22314, upon request. Because comments will be available for public inspection, information that is not desired to be made public, such as name, an address or phone number, etc., should not be included in the written comments.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information should be directed to the attention of Michael Shapiro, Senior Counsel, Office of Policy and International Affairs, USPTO, by telephone at 571-272-9300, or by email to judgmentsproject@uspto.gov.

SUPPLEMENTARY INFORMATION:**Background**

The Hague Conference on Private International Law ("The Hague Conference"), an international organization in the Netherlands, is sponsoring negotiations for a convention on the recognition and enforcement of foreign judgments in civil and commercial matters. In February 2016, the Council on General Affairs and Policy of The Hague Conference created a Special Commission on the Recognition and Enforcement of Foreign Judgments ("the Special Commission") to prepare a preliminary draft text of the convention, which is subject to a formal diplomatic negotiation open to member States of The Hague Conference. At its first session in June 2016, the Special Commission produced a Preliminary Draft Convention that includes general and specific provisions that would apply to the recognition and enforcement of judgments arising from transnational intellectual property disputes.

On November 18, 2016, the United States Patent and Trademark Office (USPTO) requested public comments on the June 2016 Preliminary Draft Convention (the "Preliminary Draft") as it relates to intellectual property matters (81 FR 81741 (Nov. 18, 2016)), with the comment period ending on January 9, 2017. The USPTO is now reopening the comment period to ensure that all stakeholders have sufficient opportunity to submit comments. The new deadline for submitting public comments is January 18, 2017. Any comments received between the close of the previous deadline of January 9, 2017, and January 13, 2017 will be treated as timely and given full consideration.

Further information about the Preliminary Draft, as well as questions about the draft that the USPTO presented for consideration, are set forth in the earlier notice requesting comments (81 FR 81741 (Nov. 18, 2016)).

Dated: January 9, 2017.

Michelle K. Lee,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

[FR Doc. 2017-00671 Filed 1-12-17; 8:45 am]

BILLING CODE 3510-16-P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed additions to and deletions from the procurement list.

SUMMARY: The Committee is proposing to add products and a service to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and deletes products previously furnished by such agencies.

DATES: Comments must be received on or before: 2/12/2017.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia, 22202-4149.

FOR FURTHER INFORMATION OR TO SUBMIT COMMENTS CONTACT: Barry S. Lineback, Telephone: (703) 603-7740, Fax: (703) 603-0655, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Additions

If the Committee approves the proposed additions, the entities of the Federal Government identified in this notice will be required to procure the products and service listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

The following products and service are proposed for addition to the Procurement List for production by the nonprofit agencies listed:

Products

NSN(s)—Product Name(s): 8920-00-SAM-0169—Super Cereal Plus
Mandatory Source(s) of Supply: Transylvania Vocational Services, Inc., Brevard, NC
Mandatory for: An additional 10% of the requirement of the U.S. Agency for International Development's World Food

Program, as aggregated by the USDA Farm Service Agency, IPD Packaged, Kansas City, MO. Total requirement on the U.S. AbilityOne Commission Procurement List will be 30%.

Contracting Activity: USDA, Farm Service Agency, IPD Packaged

Distribution: C-List

NSN(s)—Product Name(s):

7510-00-NIB-0823—Tab, Self-Stick, Durable, 1", Assorted Colors
7510-00-NIB-0824—Tabs, Self-Stick, Filing, Repositionable, 2", Red/Yellow
7510-01-421-4751—Tabs, Self-Stick, Page Makers Repositionable, .5" x 2", Assorted Colors

Mandatory Source(s) of Supply: Association for the Blind and Visually Impaired—Goodwill Industries of Greater Rochester, Rochester, NY

Mandatory for: Total Government Requirement

Contracting Activity: General Services Administration, New York, NY

Distribution: A-List

NSN(s)—Product Name(s):

6530-00-NIB-0209—Hot Pack, Instant, Disposable, 6" x 8"
6530-00-NIB-0217—Cold Pack, Instant, Disposable, 5" x 6"
6530-00-NIB-0219—Cold Pack, Instant, Disposable, 5" x 7"
6530-00-NIB-0221—Cold Pack, Instant, Disposable, 6" x 8.75"
6530-00-NIB-0222—Hot Pack, Instant, Disposable, 5" x 6"
6530-00-NIB-0223—Hot Pack, Instant, Disposable, 5" x 7"

Mandatory Source(s) of Supply: Central Association for the Blind & Visually Impaired, Utica, NY

Mandatory for: Total Government Requirement

Contracting Activity: Defense Logistics Agency Troop Support

Distribution: B-List

NSN(s)—Product Name(s):

9905-00-NIB-0376—Flag, Marking, 2-1/2" x 3-1/2", 21" Staff, Fluorescent Orange
9905-00-NIB-0377—Flag, Marking, 2-1/2" x 3-1/2", 21" Staff, Fluorescent Pink
9905-00-NIB-0378—Flag, Marking, 2-1/2" x 3-1/2", 21" Staff, Orange
9905-00-NIB-0379—Flag, Marking, 2-1/2" x 3-1/2", 21" Staff, Red
9905-00-NIB-0380—Flag, Marking, 2-1/2" x 3-1/2", 21" Staff, Yellow
9905-00-NIB-0384—Flag, Marking, 2-1/2" x 3-1/2", 15" Staff, Yellow
9905-00-NIB-0386—Flag, Marking, 2-1/2" x 3-1/2", 15" Staff, Red
9905-00-NIB-0387—Flag, Marking, 2-1/2" x 3-1/2", 15" Staff, Orange
9905-00-NIB-0389—Flag, Marking, 4" x 5", 21" Staff, Fluorescent Orange
9905-00-NIB-0390—Flag, Marking, 4" x 5" 21" Staff, Fluorescent Pink
9905-00-NIB-0392—Flag, Marking, 4" x 5", 21" Staff, Red
9905-00-NIB-0393—Flag, Marking, 4" x 5" 21" Staff, Yellow
9905-00-NIB-0391—Flag, Marking, 4" x 5", 21" Staff, Orange

Mandatory Source(s) of Supply: West Texas Lighthouse for the Blind, San Angelo, TX

Mandatory for: Total Government

Requirement
Contracting Activity: General Services Administration, Fort Worth, TX
Distribution: B-List

Service

Service Type: Janitorial Service
Mandatory for: U.S. Department of Justice, Robert F. Kennedy Building, 950 Constitution Avenue NW., Washington, DC

Mandatory Source(s) of Supply: Melwood Horticultural Training Center, Upper Marlboro, MD

Contracting Activity: Dept of Justice, Offices, Boards and Divisions Washington, DC

Deletions

The following products are proposed for deletion from the Procurement List:

Products

NSN(s)—Product Name(s):

8415-01-503-0761—Shirt, Cold Weather 100 Weight Fleece, Army, Coyote Brown, S
8415-01-503-0762—Shirt, Cold Weather 100 Weight Fleece, Army, Coyote Brown, M
8415-01-503-0763—Shirt, Cold Weather 100 Weight Fleece, Army, Coyote Brown, L
8415-01-503-0766—Shirt, Cold Weather 100 Weight Fleece, Army, Coyote Brown, XL

Mandatory Source(s) of Supply: Peckham Vocational Industries, Inc., Lansing, MI

Contracting Activity: Defense Logistics Agency Troop Support

NSN(s)—Product Name(s):

7530-01-578-9300—Label, File Folder, Recycled, Laser and Inkjet, Assorted Color Stripes, 1³/₁₆" x 3-⁷/₁₆"

Mandatory Source(s) of Supply: North Central Sight Services, Inc., Williamsport, PA

Contracting Activity: General Services Administration, New York, NY

NSN(s)—Product Name(s): 7510-01-519-4362—Binder, Round Ring, Clear Overlay, Pockets, Cinnamon, 1-1/2" Capacity, Letter Size

Mandatory Source(s) of Supply: South Texas Lighthouse for the Blind, Corpus Christi, TX

Contracting Activity: Department of Veterans Affairs, Strategic Acquisition Center General Services Administration, New York, NY

NSN(s)—Product Name(s): 6645-01-467-8481—Clock, Wall, Black Custom Logo, 28" Diameter

Mandatory Source(s) of Supply: Chicago Lighthouse Industries, Chicago, IL

Contracting Activity: General Services Administration, New York, NY

NSN(s)—Product Name(s): 7520-01-094-4309—Tray, Desk, Plastic, Side Loading, Stackable, Legal, Black

Mandatory Source(s) of Supply: LC Industries, Inc., Durham, NC

Contracting Activity: General Services Administration, New York, NY

NSN(s)—Product Name(s): 7930-01-513-9967—Cleaner, General, Disinfectant,

Aerosol, 18 oz.
Mandatory Source(s) of Supply: The
 Lighthouse for the Blind, St. Louis, MO
Contracting Activity: General Services
 Administration, Fort Worth, TX

Barry S. Lineback,

Director, Business Operations.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions and Deletions

AGENCY: Committee for Purchase from
 People Who are Blind or Severely
 Disabled.

ACTION: Additions to and Deletions from
 the Procurement List.

SUMMARY: This action adds products and
 a service to the Procurement List that
 will be furnished by nonprofit agencies
 employing persons who are blind or
 have other severe disabilities, and
 deletes products and a service from the
 Procurement List previously furnished
 by such agencies.

DATES: *Effective Date:* February 12,
 2017.

ADDRESSES: Committee for Purchase
 From People Who Are Blind or Severely
 Disabled, 1401 S. Clark Street, Suite
 715, Arlington, Virginia, 22202-4149.

FOR FURTHER INFORMATION CONTACT:
 Barry S. Lineback, Telephone: (703)
 603-7740, Fax: (703) 603-0655, or email
CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION:

Additions

On 9/23/2016 (81 FR 65629-65630)
 and 12/9/2016 (81 FR 89086), the
 Committee for Purchase from People
 Who Are Blind or Severely Disabled
 published notices of proposed additions
 to the Procurement List.

After consideration of the material
 presented to it concerning capability of
 qualified nonprofit agencies to provide
 the products and service and impact of
 the additions on the current or most
 recent contractors, the Committee has
 determined that the products and
 service listed below are suitable for
 procurement by the Federal Government
 under 41 U.S.C. 8501-8506 and 41 CFR
 51-2.4.

Regulatory Flexibility Act Certification

I certify that the following action will
 not have a significant impact on a
 substantial number of small entities.
 The major factors considered for this
 certification were:

1. The action will not result in any
 additional reporting, recordkeeping or
 other compliance requirements for small
 entities other than the small
 organizations that will furnish the
 products and service to the Government.

2. The action will result in
 authorizing small entities to furnish the
 products and service to the Government.

3. There are no known regulatory
 alternatives which would accomplish
 the objectives of the Javits-Wagner-
 O'Day Act (41 U.S.C. 8501-8506) in
 connection with the products and
 service proposed for addition to the
 Procurement List.

End of Certification

Accordingly, the following products
 and service are added to the
 Procurement List:

Products

NSN(s)—Product Name(s):

6515-00-NIB-0571—Glove, Exam, Nitrile,
 Non-Latex, Textured, Midnight, Black,
 Small

6515-00-NIB-0572—Glove, Exam, Nitrile,
 Non-Latex, Textured, Midnight, Black,
 Medium

6515-00-NIB-0573—Glove, Exam, Nitrile,
 Non-Latex, Textured, Midnight, Black,
 Large

6515-00-NIB-0574—Glove, Exam, Nitrile,
 Non-Latex, Textured, Midnight, Black,
 X-Large

6515-00-NIB-8229—Glove, Vinyl,
 Powder-Free, Evolution One, Natural
 Color, X-Small

6515-00-NIB-8230—Glove, Vinyl,
 Powder-Free, Evolution One, Natural
 Color, Small

6515-00-NIB-8231—Glove, Vinyl,
 Powder-Free, Evolution One, Natural
 Color, Medium

6515-00-NIB-8232—Glove, Vinyl,
 Powder-Free, Evolution One, Natural
 Color, Large

6515-00-NIB-8233—Glove, Vinyl,
 Powder-Free, Evolution One, Natural
 Color, X-Large

6515-00-NIB-8235—Glove, Exam, Nitrile,
 Non-Latex, Textured, Midnight, Black,
 X-Small

Mandatory for: 100% of the requirement of
 the Federal Bureau of Investigation (FBI)

Mandatory Source(s) of Supply: Central
 Association for the Blind & Visually
 Impaired, Utica, NY

Contracting Activity: Dept of Justice, Federal
 Bureau of Investigation

Distribution: C-List

Service

Service Type: Mailroom Operation Service
Mandatory for:

Missile Defense Agency, MDA Mailroom
 Schriever AFB, CO

Mandatory Source(s) of Supply: Huntsville
 Rehabilitation Foundation, Huntsville,
 AL

Contracting Activity: Missile Defense
 Agency, Huntsville, AL

Deletions

On 12/9/2016 (81 FR 89086) and 12/
 16/2016 (81 FR 91140-91141), the
 Committee for Purchase From People
 Who Are Blind or Severely Disabled
 published notices of proposed deletions
 from the Procurement List.

After consideration of the relevant
 matter presented, the Committee has
 determined that the products and
 service listed below are no longer
 suitable for procurement by the Federal
 Government under 41 U.S.C. 8501-8506
 and 41 CFR 51-2.4.

Regulatory Flexibility Act Certification

I certify that the following action will
 not have a significant impact on a
 substantial number of small entities.
 The major factors considered for this
 certification were:

1. The action will not result in
 additional reporting, recordkeeping or
 other compliance requirements for small
 entities.

2. The action may result in
 authorizing small entities to furnish the
 products and service to the Government.

3. There are no known regulatory
 alternatives which would accomplish
 the objectives of the Javits-Wagner-
 O'Day Act (41 U.S.C. 8501-8506) in
 connection with the products and
 service deleted from the Procurement
 List.

End of Certification

Accordingly, the following products and
 service are deleted from the Procurement
 List:

Products

NSN(s)—Product Name(s): 7510-00-272-
 9804—Envelope, Transparent, 6-1/2" x
 10-1/2", Clear Plastic, Job Ticket Holder

Mandatory Source(s) of Supply: UNKNOWN

DEPARTMENT OF EDUCATION

Applications for New Awards; Fulbright-Hays Doctoral Dissertation Research Abroad Fellowship Program

AGENCY: Office of Postsecondary
 Education, Department of Education.

ACTION: Notice.

Overview Information:

Fulbright-Hays Doctoral Dissertation
 Research Abroad (DDRA) Fellowship
 Program Notice inviting applications for
 new awards for fiscal year (FY) 2017.

*Catalog of Federal Domestic
 Assistance (CFDA) Number:* 84.022A.

DATES: *Applications Available:* January
 13, 2017.

*Deadline for Transmittal of
 Applications:* March 14, 2017.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The Fulbright-
 Hays DDRA Fellowship Program
 provides opportunities to doctoral
 candidates to engage in full-time
 dissertation research abroad in modern
 foreign languages and area studies. The
 program is designed to contribute to the
 development and improvement of the
 study of modern foreign languages and
 area studies in the United States.

Priorities: This notice contains one
 absolute priority, two competitive
 preference priorities, and one
 invitational priority. In accordance with
 34 CFR 75.105(b)(2)(ii), the absolute and
 competitive preference priorities are
 from the regulations for this program (34
 CFR 662.21(d)).

Absolute Priority: For FY 2017, this
 priority is an absolute priority. Under 34
 CFR 75.105(c)(3), we consider only
 applications that meet this priority.

This priority is:

*Specific Geographic Regions of the
 World.*

A research project that focuses on one
 or more of the following geographic
 areas: Africa, East Asia, Southeast Asia
 and the Pacific Islands, South Asia, the
 Near East, Central and Eastern Europe
 and Eurasia, and the Western
 Hemisphere (excluding the United
 States and its territories). Please note
 that applications that propose projects
 focused on the following countries are
 not eligible: Andorra, Austria, Belgium,
 Cyprus, Denmark, Finland, France,
 Germany, Greece, Iceland, Ireland, Italy,
 Liechtenstein, Luxembourg, Malta,
 Monaco, Netherlands, Norway, Portugal,
 San Marino, Spain, Sweden,
 Switzerland, United Kingdom, or
 Vatican City.

Competitive Preference Priorities:

Within this absolute priority, we give
 competitive preference to applications
 that address one or both of the following
 priorities.

Under 34 CFR 75.105(c)(2)(i), for FY
 2017, we award an additional three
 points to an application that meets
 Competitive Preference Priority 1 and
 two points for an application that meets
 Competitive Preference Priority 2 (up to
 5 additional points possible).

These priorities are:

Competitive Preference Priority 1:
Focus on Priority Languages (3 points).

A research project that makes use of
 any of the 78 priority languages selected
 from the U.S. Department of Education's
 list of Less Commonly Taught
 Languages, as follows:

Akan (Twi-Fante), Albanian,
 Amharic, Arabic (all dialects),
 Armenian, Azeri (Azerbaijani), Balochi,

Bamanakan (Bamana, Bambara,
 Mandikan, Mandingo, Maninka, Dyula),
 Belarusian, Bengali (Bangla), Berber (all
 languages), Bosnian, Bulgarian,
 Burmese, Cebuano (Visayan), Chechen,
 Chinese (Cantonese), Chinese (Gan),
 Chinese (Mandarin), Chinese (Min),
 Chinese (Wu), Croatian, Dari, Dinka,
 Georgian, Gujarati, Hausa, Hebrew
 (Modern), Hindi, Igbo, Indonesian,
 Japanese, Javanese, Kannada, Kashmiri,
 Kazakh, Khmer (Cambodian), Kirghiz,
 Korean, Kurdish (Kurmanji), Kurdish
 (Sorani), Lao, Malay (Bahasa Melayu or
 Malaysian), Malayalam, Marathi,
 Mongolian, Nepali, Oromo, Panjabi,
 Pashto, Persian (Farsi), Polish,
 Portuguese (all varieties), Quechua,
 Romanian, Russian, Serbian, Sinhala
 (Sinhalese), Somali, Swahili, Tagalog,
 Tajik, Tamil, Telugu, Thai, Tibetan,
 Tigrigna, Turkish, Turkmen, Ukrainian,
 Urdu, Uyghur/Uigur, Uzbek,
 Vietnamese, Wolof, Xhosa, Yoruba, and
 Zulu.

Competitive Preference Priority 2:
*Thematic Focus on Academic Fields (2
 points).*

A research project conducted in the
 field of economics, engineering,
 international development,
 mathematics, political science, public
 health, science, comparative or
 international education, or technology.

Invitational Priority: For FY 2017, this
 priority is an invitational priority.
 Under 34 CFR 75.105(c)(1), we do not
 give an application that meets this
 invitational priority a competitive or
 absolute preference over other
 applications.

This priority is:

*Applications from Minority-Serving
 Institutions.* For purposes of this
 invitational priority, Minority-Serving
 Institution means an institution that is
 eligible to receive assistance under part
 A of title III, under part B of title III, or
 under title V of the Higher Education
 Act of 1965, as amended.

Program Authority: 22 U.S.C.
 2452(b)(6).

Applicable Regulations: (a) The
 Education Department General
 Administrative Regulations (EDGAR) in
 34 CFR parts 75, 77, 81, 82, 84, 86, 97,
 98, and 99. (b) The OMB Guidelines to
 Agencies on Governmentwide
 Debarment and Suspension
 (Nonprocurement) in 2 CFR part 180, as
 adopted and amended as regulations of
 the Department in 2 CFR part 3485. (c)
 The Uniform Administrative
 Requirements, Cost Principles, and
 Audit Requirements for Federal Awards
 in 2 CFR part 200, as adopted and
 amended as regulations of the
 Department in 2 CFR part 3474. (d) The

regulations for this program in 34 CFR part 662.

Note: The regulations in 34 CFR part 86 apply to institutions of higher education (IHEs) only.

II. Award Information

Type of Award: Discretionary grants redistributed as fellowships to individual beneficiaries.

Estimated Available Funds: \$3,477,151.

Estimated Range of Awards: \$15,000 to \$60,000.

Estimated Average Size of Awards: \$33,461.

Estimated Number of Awards: 98.

Note: The Department is not bound by any estimates in this notice.

Project Period: The institutional project period is 18 months, beginning October 1, 2017. Students may request funding for a period of no less than six months and no more than 12 months.

III. Eligibility Information

1. *Eligible Applicants:* IHEs. As part of the application process, students submit individual applications to the IHE. The IHE then officially submits all eligible individual student applications with its grant application to the Department.

Note: As part of its FY 2017 budget request, the Administration proposed to continue to allow funds to be used to support the applications of individuals who plan both to utilize their language skills in world areas vital to United States national security and to apply their language skills and knowledge of these countries in the fields of government, international development, and the professions. Therefore, students planning to apply their language skills in such fields and those planning teaching careers are eligible to apply to IHEs for funds from this program.

2. *Cost Sharing or Matching:* This program does not require cost sharing or matching.

IV. Application and Submission Information

1. *Address to Request Application Package:* Both IHEs and student applicants can obtain an application package via the Internet or from the Education Publications Center (ED PUBS). To obtain a copy via the Internet, use the following address: www.G5.gov. To obtain a copy from ED Pubs, write, fax, or call the following: ED Pubs, U.S. Department of Education, P.O. Box 22207, Alexandria, VA 22304. Telephone, toll free: 1-877-433-7827. FAX: (703) 605-6794. If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call, toll free: 1-877-576-7734.

You can contact ED Pubs at its Web site, also: www.EDPubs.gov or at its email address: edpubs@inet.ed.gov.

If you request an application package from ED Pubs, be sure to identify this program as follows: CFDA number 84.022A.

Individuals with disabilities can obtain a copy of the application package in an accessible format (e.g., braille, large print, audiotape, or compact disc) by contacting the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice.

2. *Content and Form of Application Submission:* Requirements concerning the content and form of an application, together with the forms the applicant must submit, are in the application package for this program. Page Limit: The application narrative is where the student applicant addresses the selection criteria that reviewers use to evaluate the application. The student applicant must limit the application narrative to no more than 10 pages and the bibliography to no more than two pages, using the following standards:

- A "page" is 8.5" × 11", on one side only, with 1" margins at the top, bottom, both sides, and portrait orientation.

Note: For purposes of determining compliance with the page limits, each page on which there are words will be counted as one full page.

- Double space (no more than three lines per vertical inch) all text in the application narrative. However, student applicants may single space all text in charts, tables, figures, graphs, titles, headings, footnotes, endnotes, quotations, bibliography, and captions.

- Use a font that is either 12 point or larger, or no smaller than 10 pitch (characters per inch). Student applicants may use a 10-point font in charts, tables, figures, graphs, footnotes, and endnotes. However, these items are considered part of the narrative and counted within the 10-page limit.

- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial. An application submitted in any other font (including Times Roman or Arial Narrow) will not be accepted.

The page limits only apply to the application narrative and bibliography. The page limits do not apply to the Application for Federal Assistance face sheet (SF 424), the supplemental information form required by the Department of Education, or the assurances and certification. However, student applicants must include their complete responses to the selection criteria in the application narrative.

We will reject a student applicant's application if the application exceeds the page limits.

3. *Submission Dates and Times:* Applications Available: January 13, 2017.

Deadline for Transmittal of Applications: March 14, 2017.

Applications for grants under this program must be submitted electronically using G5, the Department's grant management system, accessible through the Department's G5 site. For information (including dates and times) about how to submit an IHE's application electronically, or in paper format by mail or hand delivery if an IHE qualifies for an exception to the electronic submission requirement, please refer to *Other Submission Requirements* in section IV of this notice.

We do not consider an application that does not comply with the deadline requirements.

Individuals with disabilities who need an accommodation or auxiliary aid in connection with the application process should contact the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice. If the Department provides an accommodation or auxiliary aid to an individual with a disability in connection with the application process, the individual's application remains subject to all other requirements and limitations in this notice.

4. *Intergovernmental Review:* This program is not subject to Executive Order 12372 and the regulations in 34 CFR part 79.

5. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

6. *Data Universal Numbering System Number, Taxpayer Identification Number, and System for Award Management:*

To do business with the Department of Education, you must—

- Have a Data Universal Numbering System (DUNS) number and a Taxpayer Identification Number (TIN);
- Register both your DUNS number and TIN with the System for Award Management (SAM), the Government's primary registrant database;
- Provide your DUNS number and TIN on your application; and
- Maintain an active SAM registration with current information while your application is under review by the Department and, if you are awarded a grant, during the project period.

You can obtain a DUNS number from Dun and Bradstreet at the following Web site: <http://fedgov.dnb.com/webform>. A DUNS number can be created within one to two business days.

If you are a corporate entity, agency, institution, or organization, you can obtain a TIN from the Internal Revenue Service. If you are an individual, you can obtain a TIN from the Internal Revenue Service or the Social Security Administration. If you need a new TIN, please allow two to five weeks for your TIN to become active.

The SAM registration process can take approximately seven business days, but may take upwards of several weeks, depending on the completeness and accuracy of the data you enter into the SAM database. Thus, if you think you might want to apply for Federal financial assistance under a program administered by the Department, please allow sufficient time to obtain and register your DUNS number and TIN. We strongly recommend that you register early.

Note: Once your SAM registration is active, it may be 24 to 48 hours before you can submit an application through G5.

If you are currently registered with SAM, you may not need to make any changes. However, please make certain that the TIN associated with your DUNS number is correct. Also note that you will need to update your registration annually. This may take three or more business days.

Information about SAM is available at www.SAM.gov. To further assist you with obtaining and registering your DUNS number and TIN in SAM or updating your existing SAM account, we have prepared a SAM.gov Tip Sheet, which you can find at: www2.ed.gov/fund/grant/apply/sam-faqs.html.

7. Other Submission Requirements: Applications for grants under this program must be submitted electronically unless an IHE qualifies for an exception to this requirement in accordance with the instructions in this section.

a. Electronic Submission of Applications.

Applications for grants under the Fulbright-Hays DDRA Fellowship Program, CFDA number 84.022A, must be submitted electronically using the G5 system, accessible through the Department's G5 site at: www.G5.gov. While completing the electronic application, both the IHE and the student applicant will be entering data online that will be saved into a database. Neither the IHE nor the student applicant may email an

electronic copy of a grant application to us.

We will reject an application if an IHE submits it in paper format unless, as described elsewhere in this section, the IHE qualifies for one of the exceptions to the electronic submission requirement *and* submits, no later than two weeks before the application deadline date, a written statement to the Department that the IHE qualifies for one of these exceptions. Further information regarding calculation of the date that is two weeks before the application deadline date is provided later in this section under *Exception to Electronic Submission Requirement*.

Please note the following:

- The process for submitting applications electronically under the Fulbright-Hays DDRA Fellowship Program has several parts. The following is a brief summary of the process; however, all applicants should review and follow the detailed description of the application process that is contained in the application package. In summary, the major steps are:

- (1) IHEs must email the following information to ddra@ed.gov: Name of university and full name and email address of potential project director. We recommend that applicant IHEs submit this information as soon as possible to ensure that they obtain access to G5 well before the application deadline date. We suggest that IHEs send this information no later than two weeks prior to the closing date in order to facilitate timely submission of their applications;

- (2) Students must complete their individual applications and submit them to their IHE's project director using G5;

- (3) Persons providing references for individual students must complete and submit reference forms for the students and submit them to the IHE's project director using G5; and

- (4) The IHE's project director must officially submit the IHE's application, which must include all eligible individual student applications, reference forms, and other required forms, using G5.

- The IHE must complete the electronic submission of the grant application by 4:30:00 p.m., Washington, DC time, on the application deadline date. G5 will not accept an application for this competition after 4:30:00 p.m., Washington, DC time, on the application deadline date. Therefore, we strongly recommend that both the IHE and the student applicant not wait until

the application deadline date to begin the application process.

- The hours of operation of the G5 Web site are 6:00 a.m. Monday until 9:00 p.m., Wednesday; and 6:00 a.m. Thursday until 3:00 p.m., Sunday, Washington, DC time. Please note that, because of maintenance, the system is unavailable between 3:00 p.m. on Sundays and 6:00 a.m. on Mondays, and between 9:00 p.m. on Wednesdays and 6:00 a.m. on Thursdays, Washington, DC time. Any modifications to these hours are posted on the G5 Web site.

- Student applicants will not receive additional point value because the student submits his or her application in electronic format, nor will we penalize the IHE or student applicant if the applicant qualifies for an exception to the electronic submission requirement, as described elsewhere in this section, and submits an application in paper format.

- IHEs must submit all documents electronically, including all information typically provided on the following forms: The Application for Federal Assistance (SF 424), the Department of Education Supplemental Information for SF 424, Budget Information—Non-Construction Programs (ED 524), and all necessary assurances and certifications.

- Both IHEs and student applicants must upload any narrative sections and all other attachments to their application as files in a read-only, non-modifiable Portable Document Format (PDF). Do not upload an interactive or fillable PDF file. If you upload a file type other than a read-only, non-modifiable PDF (e.g., Word, Excel, WordPerfect, etc.) or submit a password-protected file, we will not review that material. Please note that this could result in your application not being considered for funding because the material in question—for example, the application narrative—is critical to a meaningful review of your proposal. For that reason it is important to allow yourself adequate time to upload all material as PDF files. The Department will not convert material from other formats to PDF.

- Student transcripts must be submitted electronically through the G5 system.

- Both the IHE's and the student applicant's electronic applications must comply with any page limit requirements described in this notice.

- Prior to submitting your electronic application, you may wish to print a copy of it for your records.

- After the individual student applicant electronically submits his or her application to the student's IHE, the student will receive an automatic

acknowledgment. After a person submits a reference electronically, he or she will receive an online confirmation. After the applicant IHE submits its application, including all eligible individual student applications, to the Department, the applicant IHE will receive an automatic acknowledgment that will include a unique PR/Award number for the IHE's application.

- Within three working days after submitting its electronic application—
 - (1) Print SF 424 from G5;
 - (2) The applicant IHE's Authorizing Representative must sign this form;
 - (3) Place the PR/Award number in the upper right-hand corner of the hard-copy signature page of the SF 424; and
 - (4) Fax the signed SF 424 to the Application Control Center at (202) 245-6272.

- We may request that you provide us original signatures on other forms at a later date.

Application Deadline Date Extension in Case of System Unavailability: If an IHE is prevented from electronically submitting its application on the application deadline date because the G5 system is unavailable, we will grant the IHE an extension until 4:30:00 p.m., Washington, DC time, the following business day to enable the IHE to transmit its application electronically, by mail, or by hand delivery. We will grant this extension if—

(1) The IHE is a registered user of the G5 system and the IHE has initiated an electronic application for this competition; and

(2)(a) G5 is unavailable for 60 minutes or more between the hours of 8:30 a.m. and 3:30 p.m., Washington, DC time, on the application deadline date; or

(b) G5 is unavailable for any period of time between 3:30 p.m. and 4:30:00 p.m., Washington, DC time, on the application deadline date.

We must acknowledge and confirm these periods of unavailability before granting the IHE an extension. To request this extension or to confirm our acknowledgment of any system unavailability, an IHE may contact either (1) the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice or (2) the e-Grants help desk at 1-888-336-8930. If G5 is unavailable due to technical problems with the system and, therefore, the application deadline is extended, an email will be sent to all registered users who have initiated a G5 application. Extensions referred to in this section apply only to the unavailability of the G5 system.

Exception to Electronic Submission Requirement: An IHE qualifies for an exception to the electronic submission

requirement, and may submit its application in paper format, if the IHE is unable to submit an application through G5 because—

- The IHE or a student applicant does not have access to the Internet; or
- The IHE or a student applicant does not have the capacity to upload large documents to G5; *and*
- No later than two weeks before the application deadline date (14 calendar days or, if the fourteenth calendar day before the application deadline date falls on a Federal holiday, the next business day following the Federal holiday), the IHE mails or faxes a written statement to the Department, explaining which of the two grounds for an exception prevents the IHE from using the Internet to submit its application. If an IHE mails a written statement to the Department, it must be postmarked no later than two weeks before the application deadline date. If an IHE faxes its written statement to the Department, we must receive the faxed statement no later than two weeks before the application deadline date.

Address and mail or fax this statement to: Mariam Ouhamou, U.S. Department of Education, 400 Maryland Ave. SW., Room 3E207, Washington, DC 20202-4260. Telephone: (202) 453-6764 or by email: ddra@ed.gov.

The IHE's paper application must be submitted in accordance with the mail or hand delivery instructions described in this notice.

b. Submission of Paper Applications by Mail.

If an IHE qualifies for an exception to the electronic submission requirement, the IHE may mail (through the U.S. Postal Service or a commercial carrier) its application to the Department. The IHE must mail the original and two copies of the application, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.022A), LBJ Basement Level 1, 400 Maryland Avenue SW., Washington, DC 20202-4260.

The IHE must show proof of mailing consisting of one of the following:

- (1) A legibly dated U.S. Postal Service postmark.
- (2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.
- (3) A dated shipping label, invoice, or receipt from a commercial carrier.
- (4) Any other proof of mailing acceptable to the Secretary of the U.S. Department of Education.

If the IHE mails its application through the U.S. Postal Service, we do

not accept either of the following as proof of mailing:

- (1) A private metered postmark.
- (2) A mail receipt that is not dated by the U.S. Postal Service.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, the IHE should check with its local post office.

We will not consider applications postmarked after the application deadline date.

c. Submission of Paper Applications by Hand Delivery.

If an IHE qualifies for an exception to the electronic submission requirement, the IHE (or a courier service) may deliver its paper application to the Department by hand. The IHE must deliver the original and two copies of the application, by hand, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.022A), 550 12th Street SW., Room 7039, Potomac Center Plaza, Washington, DC 20202-4260. The Application Control Center accepts hand deliveries daily between 8:00 a.m. and 4:30:00 p.m., Washington, DC time, except Saturdays, Sundays, and Federal holidays.

Note for Mail or Hand Delivery of Paper Applications:

If an IHE mails or hand delivers its application to the Department—

(1) The IHE must indicate on the envelope and—if not provided by the Department—in Item 11 of the SF 424 the CFDA number, including suffix letter, if any, of the competition under which the IHE is submitting its application; and

(2) The Application Control Center will mail a notification of receipt of the IHE's grant application. If the IHE does not receive this grant notification within 15 business days from the application deadline date, the IHE should call the U.S. Department of Education Application Control Center at (202) 245-6288.

V. Application Review Information

1. *General:* For FY 2017, student applications are divided into seven categories based on the world area focus of their research projects, as described in the absolute priority listed in this notice. Language and area studies experts in discrete world area-based panels will review the student applications. Each panel reviews, scores, and ranks its applications separately from the applications assigned to the other world area panels. However, all fellowship applications will be ranked together from the highest to lowest score for funding purposes.

2. *Selection Criteria:* The selection criteria for this competition are from the

regulations for this program in 34 CFR 662.21 and are listed in the application package.

3. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department of Education (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

Under 34 CFR 662.22(b), no applicant may receive grants from the Fulbright U.S. Student Program (FUSP) and the Fulbright-Hays DDRA Fellowship Program concurrently. Once a candidate has accepted an award from FUSP and FUSP has expended funds on the student, the student is then ineligible for a grant under the Fulbright-Hays DDRA Fellowship Program. A student applying for a grant under the Fulbright-Hays DDRA Fellowship Program must indicate on the application if the student has currently applied for a FUSP grant. If, at any point, the candidate accepts a FUSP award prior to being notified of the candidate's status with the Fulbright-Hays DDRA Fellowship Program, the candidate should immediately notify the program contact person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice. If, after consultation with FUSP, we determine that FUSP has expended funds on the student (*e.g.*, the candidate has attended the pre-departure orientation or was issued grant funds), the candidate will be deemed ineligible for an award under the Fulbright-Hays DDRA Fellowship Program at that time.

4. *Risk Assessment and Special Conditions:* Consistent with 2 CFR 200.205, before awarding grants under this program the Department conducts a review of the risks posed by applicants. Under 2 CFR 3474.10, the Secretary may impose special conditions and, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance;

has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

5. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently \$150,000), under 2 CFR 200.205(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through SAM. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds \$10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed \$10,000,000.

VI. Award Administration Information

1. *Award Notices:* If a student application is successful, we notify the IHE's U.S. Representative and U.S. Senators and send the IHE a Grant Award Notification (GAN); or we may send the IHE an email containing a link to access an electronic version of the GAN. We may notify the IHE informally, also.

If a student application is not evaluated or not selected for funding, we notify the IHE.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates the approved application as part of the binding commitments under the grant.

3. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. Grantees are required to use the electronic data instrument *International Resource Information System (IRIS)* to complete the final report. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to www.ed.gov/fund/grant/apply/appforms/appforms.html.

4. *Performance Measures:* Under the Government Performance and Results Act of 1993 (GPRA), the objective for the Fulbright-Hays DDRA Fellowship Program is to provide grants to colleges and universities to fund individual doctoral students to conduct research in other countries in modern foreign languages and area studies for periods of 6 to 12 months.

The Department will use the following measures to evaluate its success in meeting this objective:

DDRA GPRA Measure 1: The percentage of DDRA fellows who increased their foreign language scores in speaking, reading, and/or writing by at least one proficiency level.

DDRA GPRA Measure 2: The percentage of DDRA fellows who complete their degree in their program of study within four years of receipt of the fellowship.

DDRA GPRA Measure 3: The percentage of DDRA fellows who found employment that utilized their language and area studies skills within eight years of receiving their award.

DDRA GPRA Measure 4: Efficiency Measure—The cost per DDRA fellow who found employment that utilized their language and area studies skills within eight years.

The information provided by grantees in their performance report submitted via IRIS will be the source of data for this measure. Reporting screens for institutions and fellows may be viewed at: http://iris.ed.gov/iris/pdfs/DDRA_director.pdf; http://iris.ed.gov/iris/pdfs/DDRA_fellow.pdf.

VII. Agency Contact

FOR FURTHER INFORMATION CONTACT:

Mariam Ouhamou, International and Foreign Language Education, U.S. Department of Education, 400 Maryland Ave. SW., Room 3E207, Washington, DC 20202-4260. Telephone: (202) 453-6764 or by email: ddra@ed.gov.

If you use a TDD or a TTY, call the FRS, toll free, at 1-800-877-8339.

If you request an application from ED Pubs, be sure to identify this program as follows: CFDA number 84.022A.

VIII. Other Information

Accessible Format: Individuals with disabilities can obtain this document and a copy of the application package in an accessible format (e.g., braille, large print, audiotope, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: www.gpo.gov/fdsys. At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or PDF. To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: January 10, 2017.

Mohamed Abdel-Kader,

Deputy Assistant Secretary for International and Foreign Languages.

BILLING CODE 4000-01-P

DEPARTMENT OF EDUCATION

Application for New Awards; Expanding Opportunity Through Quality Charter Schools Program (CSP)—Grants to Charter Management Organizations for the Replication and Expansion of High-Quality Charter Schools

AGENCY: Office of Innovation and Improvement, Department of Education.

ACTION: Notice.

Overview Information:

CSP—Grants to Charter Management Organizations for the Replication and Expansion of High-Quality Charter Schools

Notice inviting applications for new awards for fiscal year (FY) 2017.

Catalog of Federal Domestic Assistance (CFDA) Number: 84.282M.

DATES:

Applications Available: January 13, 2017.

Date of Pre-Application Webinar: Tuesday, January 24, 2017, 1:00 p.m., Washington, DC time.

Deadline for Transmittal of Applications: February 27, 2017.

Deadline for Intergovernmental Review: April 28, 2017.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The major purposes of the CSP are to expand opportunities for all students, particularly traditionally underserved students, to attend charter schools and meet challenging State academic standards; provide financial assistance for the planning, program design, and initial implementation of public charter schools; increase the number of high-quality charter schools available to students across the United States; evaluate the impact of charter schools on student achievement, families, and communities; share best practices between charter schools and other public schools; encourage States to provide facilities support to charter schools; and support efforts to strengthen the charter school authorizing process. Through CSP Grants to Charter Management Organizations for the Replication and Expansion of High-Quality Charter Schools (CFDA number 84.282M) (also referred to as Charter Management Organization, or CMO, grants), the Department provides funds to *charter management organizations (CMOs)*¹ on a competitive basis to enable them to *replicate* or *expand* one or more *high-quality charter schools*. Grant funds may be used to expand the enrollment of one or more existing *high-quality charter schools*, or to *replicate* one or more new charter schools that are based on an existing, *high-quality charter school* model.

Background

The CMO grant program is intended to support *high-quality charter schools* that are operated by high-performing CMOs seeking to broaden and increase

their impact on student achievement. Since FY 2010, the Department has awarded new CMO grants each year (except in FY 2013),² which has resulted in a portfolio of high-quality CMOs using Federal funds to *replicate* and *expand* their successful charter school models to serve greater numbers of students, particularly *educationally disadvantaged students*.

In December 2015, the CMO grant program was reauthorized under the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act of 2015 (ESSA) (20 U.S.C. 7221-7221j). This notice contains newly authorized priorities, definitions, application requirements, and selection criteria from the ESEA (as amended by the ESSA), as well as other priorities, definitions, application requirements, and selection criteria, to ensure that the Department's CMO grant portfolio continues to consist of *high-quality charter schools* operated by high-performing CMOs that are improving academic outcomes for all students, particularly *educationally disadvantaged students*. In particular, we continue to use the same absolute priority from previous competitions for serving a large percentage of low-income students. In addition, we include selection criteria that emphasize the applicant's success in operating more than one *high-quality charter school* and serving *educationally disadvantaged students*, and we continue to include a competitive preference priority for applicants that have not previously received funding under this program.

For FY 2017, we are establishing three competitive preference priorities. The first competitive preference priority is from the newly amended program statute, with a few minor changes to clarify the Department's goals.

Competitive Preference Priority 1—Promoting Diversity gives priority to applicants that plan to use CSP funds to operate or manage charter schools intentionally designed to be racially and socioeconomically diverse. An applicant addressing this priority is invited to discuss how the proposed design of its project will encourage approaches by charter schools that help bring together students of different backgrounds, including students from different racial and socioeconomic backgrounds, to attain the benefits that

² From FY 2010 through FY 2016, the Department's authority to use CSP funds to award grants to CMOs and other eligible entities for the replication and expansion of high-quality charter schools was provided through annual appropriations acts.

¹ Italicized terms are defined in the Definitions section of this notice.

flow from a diverse student body. The applicant should ensure that those approaches are permissible under current law, including applicable civil rights laws.³

The second competitive preference priority, School Improvement, focuses on applicants that have shown past success in turning around academically poor-performing schools and plan to use CMO grant funds to turn around academically poor-performing schools during the grant project period. Accordingly, this priority is intended both to reward and provide new incentives to high-performing CMOs for engaging in the difficult task of turning around our Nation's struggling public schools.

The third competitive preference priority is for *novice applicants*. In order to ensure that the CMO grant program is supporting a wide range of organizations, this priority provides additional points to applicants that have neither received a CSP Replication and Expansion of High-Quality Charter Schools⁴ grant—either individually or as part of a group—at any point in the past nor received a discretionary grant from the Federal government in the previous five years.

This competition also includes an invitational priority that encourages applicants to conduct rigorous evaluations of practices within their charter schools that will, if well implemented, produce evidence that meets *What Works Clearinghouse (WWC) Evidence Standards*. The Department is committed both to increasing the number of schools that implement practices that are based on evidence and to building evidence of the effectiveness of a range of educational practices in order to identify educational practices that other schools or school systems can adopt to improve outcomes for their students (e.g., educator induction practices or positive behavioral interventions and supports). In addition, building and utilizing evidence of the effectiveness of various educational approaches is a key feature of the reauthorized program under the ESEA, as amended by the ESSA.

³ For information about how applicants can lawfully promote student body diversity, see the Department's December 2, 2011 "Guidance on the Voluntary Use of Race to Achieve Diversity and Avoid Racial Isolation in Elementary and Secondary Schools," available at <http://www2.ed.gov/ocr/docs/guidance-ese-201111.pdf>.

⁴ The name of the competition in this notice has changed from previous years; from FY 2010 through FY 2016, the Department had the authority to make CMO grants under the Grants for Replication and Expansion of High-Quality Charter Schools competition.

All charter schools receiving CSP funds, as outlined in section 4310(2)(G) of the ESEA (as amended by the ESSA), must comply with various non-discrimination laws, including the Age Discrimination Act of 1975, Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, section 444 of the General Education Provisions Act (GEPA), and part B of the Individuals with Disabilities Education Act (IDEA).

Priorities: This notice includes one absolute priority, three competitive preference priorities, and one invitational priority. We are establishing these priorities for the FY 2017 grant competition and any subsequent year in which we make awards from the list of unfunded applications from this competition, in accordance with section 437(d)(1) of GEPA, 20 U.S.C. 1232(d)(1).

Absolute Priority: This priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is: *Absolute Priority—Low-Income Demographic*.

To meet this priority, an applicant must demonstrate that at least 60 percent of the students across all of the charter schools the applicant currently operates or manages are *individuals from low-income families*.

Competitive Preference Priorities: These priorities are competitive preference priorities. Under 34 CFR 75.105(c)(2)(i), we will award an additional three points to an application that meets Competitive Preference Priority 1, an additional five points to an application that meets Competitive Preference Priority 2, and an additional two points to an application that meets Competitive Preference Priority 3. The maximum total competitive preference priority points an application can receive for this competition is 10.

These priorities are:

Competitive Preference Priority 1—Promoting Diversity. (0 or 3 points).

This priority is for projects that will provide for the replication or expansion of *high-quality charter schools* that have an intentional focus on recruiting and retaining racially and socioeconomically diverse student bodies (see Section 4305(b)(5)(A) of the ESEA, as amended by the ESSA).

Note: For information on permissible ways to meet this priority, please refer to the joint guidance issued by the Department's Office for Civil Rights and the U.S. Department of Justice entitled, "Guidance on the Voluntary Use of Race to Achieve Diversity and Avoid Racial Isolation in Elementary and Secondary Schools" (www2.ed.gov/about/offices/list/ocr/docs/guidance-ese-201111.pdf).

Competitive Preference Priority 2—School Improvement through Turnaround Efforts. (0 or 5 points).

This priority is for applicants that both:

(a) Demonstrate past success in improving the academic performance of one or more academically poor-performing public schools by taking over the operation of the school or restarting the school as a charter school; and

(b) Propose to use CMO funds to restart as a charter school one or more academically poor-performing public schools during the project period, to do so by replicating a successful charter school model for which the applicant has provided evidence of success, and to do so by targeting a similar student population in the replicated charter school as was served by the academically poor-performing public school. In accordance with section 4310(2)(B) of the ESEA, as amended by the ESSA, students who are enrolled in the academically poor-performing public school at the time of restart are exempt from the charter school's lottery.

For purposes of this priority, academically poor-performing public schools may include, but are not limited to, *persistently lowest-achieving schools*, as defined in this notice and the final requirements for the School Improvement Grants (SIG) program under Title I of the ESEA (<https://www.federalregister.gov/articles/2015/02/09/2015-02570/final-requirements-school-improvement-grants-title-i-of-the-elementary-and-secondary-education-act>); and priority schools in States that exercised flexibility⁵ under the ESEA, as amended by the No Child Left Behind Act of 2001 (NCLB) (see the Department's June 7, 2012 guidance entitled, "ESEA Flexibility," at www.ed.gov/esea/flexibility, and the Office of Elementary and Secondary Education's December 18, 2015 Dear Colleague Letter at <https://www2.ed.gov/policy/elsec/leg/essa/transition-dcl.pdf>).

Note: For applicants proposing to use CMO grant funds to *replicate a high-quality charter school* by restarting as a charter school one or more academically poor-performing public schools, the CMO's proposed charter school must be newly created and operating under

⁵ As of August 1, 2016, States may no longer exercise flexibility, except in the limited circumstances where they implemented interventions previously in priority schools under the SIG program. For additional information related to ESEA flexibility and interventions in priority schools, see section B of the Department's June 29, 2016 guidance entitled, "Transitioning to the Every Student Succeeds Act—Frequently Asked Questions," at <http://www2.ed.gov/policy/elsec/leg/essa/essafaqtransition62916.pdf>.

a separate charter and governance than the academically poor-performing public school.

Competitive Preference Priority 3—*Novice Applicant.* (0 or 2 points).

This priority is for applications submitted by *novice applicants*.

Invitational Priority: This priority is an invitational priority. Under 34 CFR 75.105(c)(1), we do not give an application that meets this invitational priority any preference over other applications.

This priority is: Invitational Priority—Rigorous Evaluation of School Practices.

The Secretary is particularly interested in funding applications that demonstrate that the applicant is currently conducting, or will conduct, a rigorous independent evaluation of specific practices within the applicant's charter schools (*e.g.*, positive behavioral interventions and supports or professional development practices, such as teacher coaching) through a *quasi-experimental design study* or *randomized controlled trial* that will, if well implemented, meet *WWC Evidence Standards*, and that other schools or school systems can adopt to improve outcomes for their students.

Definitions

The following definitions, where cited, are from 34 CFR 75.225 and 77.1 and the ESEA, as amended by the ESSA. We are establishing the remaining definitions for the FY 2017 grant competition and any subsequent year in which we make awards from the list of unfunded applications from this competition.

Ambitious means promoting continued, meaningful improvement for program participants or for other individuals or entities affected by the grant, or representing a significant advancement in the field of education research, practices, or methodologies. When used to describe a *performance target*, whether a *performance target* is *ambitious* depends upon the context of the relevant *performance measure* and the *baseline* for that measure. (34 CFR 77.1)

Baseline means the starting point from which performance is measured and targets are set. (34 CFR 77.1)

Charter management organization means a nonprofit organization that operates or manages a network of charter schools linked by centralized support, operations, and oversight. (Section 4310(3) of the ESEA, as amended by the ESSA)

Educationally disadvantaged students means students in the categories described in section 1115(c)(2) of the ESEA, as amended by the ESSA, which include children who are economically

disadvantaged, students with disabilities, migrant students, English learners, neglected or delinquent students, and homeless students.

Expand, when used with respect to a *high-quality charter school*, means to significantly increase enrollment or add one or more grades to the *high-quality charter school*. (Section 4310(7) of the ESEA, as amended by the ESSA)

High-quality charter school means a charter school that—

(a) Shows evidence of strong academic results, which may include strong student academic growth, as determined by a State;

(b) Has no significant issues in the areas of student safety, financial and operational management, or statutory or regulatory compliance;

(c) Has demonstrated success in significantly increasing student academic achievement, including graduation rates where applicable, for all students served by the charter school; and

(d) Has demonstrated success in increasing student academic achievement, including graduation rates where applicable, for each of the subgroups of students, as defined in section 1111(c)(2), except that such demonstration is not required in a case in which the number of students in a group is insufficient to yield statistically reliable information or the results would reveal personally identifiable information about an individual student. (Section 4310(8) of the ESEA, as amended by the ESSA)

Individual from a low-income family means an individual who is determined by a State educational agency (SEA) or local educational agency (LEA) to be a child from a low-income family on the basis of (a) data used by the Secretary to determine allocations under section 1124 of the ESEA, (b) data on children eligible for free or reduced-price lunches under the Richard B. Russell National School Lunch Act, (c) data on children in families receiving assistance under part A of title IV of the Social Security Act, (d) data on children eligible to receive medical assistance under the Medicaid program under Title XIX of the Social Security Act, or (e) an alternate method that combines or extrapolates from the data in items (a) through (d) of this definition.

Logic model (also referred to as theory of action) means a well-specified conceptual framework that identifies key components of the proposed process, product, strategy, or practice (*i.e.*, the active “ingredients” that are hypothesized to be critical to achieving the relevant outcomes) and describes the relationships among the key

components and outcomes, theoretically and operationally. (34 CFR 77.1)

Novice applicant means—

(a) Any applicant for a grant from the Department that—

(1) Has never received a grant or subgrant under the program from which it seeks funding;

(2) Has never been a member of a group application, submitted in accordance with 34 CFR 75.127–75.129, that received a grant under the program from which it seeks funding; and

(3) Has not had an active discretionary grant from the Federal government in the five years before the deadline date for applications for new awards under the program.

(b) For purposes of paragraph (a)(3), a grant is active until the end of the grant's project or funding period, including any extensions of those periods that extend the grantee's authority to obligate funds. (34 CFR 75.225)

Performance measure means any quantitative indicator, statistic, or metric used to gauge program or project performance. (34 CFR 77.1)

Performance target means a level of performance that an applicant would seek to meet during the course of a project or as a result of a project. (34 CFR 77.1)

Persistently lowest-achieving school means, as determined by the State—

(a)(1) Any title I school in improvement, corrective action, or restructuring that—

(A) Is among the lowest-achieving five percent of title I schools in improvement, corrective action, or restructuring or the lowest-achieving five title I schools in improvement, corrective action, or restructuring in the State, whichever number of schools is greater; or

(B) Is a high school that has had a graduation rate as defined in 34 CFR 200.19(b) that is less than 60 percent over a number of years; and

(2) Any secondary school that is eligible for, but does not receive, title I funds that—

(A) Is among the lowest-achieving five percent of secondary schools or the lowest-achieving five secondary schools in the State that are eligible for, but do not receive, title I funds, whichever number of schools is greater; or

(B) Is a high school that has had a graduation rate as defined in 34 CFR 200.19(b) that is less than 60 percent over a number of years.

(b) To identify the lowest-achieving schools, a State must take into account both—

(1) The academic achievement of the “all students” group in a school in

terms of proficiency on the State's assessments under section 1111(b)(3) of the ESEA in reading/language arts and mathematics combined; and

(2) The school's lack of progress on those assessments over a number of years for the "all students" group. (80 FR 7223)

Quasi-experimental design study means a study using a design that attempts to approximate an experimental design by identifying a comparison group that is similar to the treatment group in important respects. These studies, depending on design and implementation, can meet *WWC Evidence Standards* with reservations (but not *WWC Evidence Standards* without reservations). (34 CFR 77.1)

Randomized controlled trial means a study that employs random assignment of, for example, students, teachers, classrooms, schools, or districts to receive the intervention being evaluated (the treatment group) or not to receive the intervention (the control group). The estimated effectiveness of the intervention is the difference between the average outcome for the treatment group and for the control group. These studies, depending on design and implementation, can meet *WWC Evidence Standards* without reservations. (34 CFR 77.1)

Replicate, when used with respect to a *high-quality charter school*, means to open a new charter school, or a new campus of a *high-quality charter school*, based on the educational model of an existing *high-quality charter school*, under an existing charter or an additional charter, if permitted or required by State law. (Section 4310(9) of the ESEA, as amended by the ESSA)

What Works Clearinghouse (WWC) Evidence Standards means the standards set forth in the What Works Clearinghouse Procedures and Standards Handbook (Version 3.0, March 2014), which can be found at the following link: <http://ies.ed.gov/ncee/wwc/DocumentSum.aspx?sid=19>. (34 CFR 77.1)

Waiver of Proposed Rulemaking: Under the Administrative Procedure Act (5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on proposed priorities, selection criteria, definitions, and requirements. Section 437(d)(1) of GEPA, however, allows the Secretary to exempt from rulemaking requirements regulations governing the first grant competition under a new or substantially revised program authority. This is the first grant competition for this program under section 4305(b) of the ESEA, as amended by the ESSA, and, therefore, this competition

qualifies for this exemption. In order to ensure timely grant awards, the Secretary has decided to forgo public comment on the priorities, requirements, definitions, and selection criteria in this notice in accordance with section 437(d)(1) of GEPA. These priorities, requirements, definitions, and selection criteria will apply to grants awarded under this competition in FY 2017 and any subsequent year in which we make awards from the list of unfunded applications from this competition.

Program Authority: Section 4305(b) of the ESEA, as amended by the ESSA.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 76, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended in 2 CFR part 3474.

II. Award Information

Type of Award: Discretionary grants.
Estimated Available Funds: For FY 2017, the Administration has requested \$350,000,000 under the CSP and authority to use up to \$100,000,000 of CSP funds for CMO awards. We intend to use an estimated \$57,000,000 for new awards under this competition and may use FY 2017 funds to support multiple years of a grant project for one or more grantees. The actual level of funding, if any, depends on final congressional action. However, we are inviting applications now to allow enough time to complete the grant process if Congress appropriates funds for this program.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in FY 2018 from the list of unfunded applications from this competition.

Estimated Range of Awards: \$600,000–\$3,500,000 per year.

Estimated Average Size of Awards: \$2,000,000 per year.

Maximum Award: See *Reasonable and Necessary Costs* in section III.4.(a) for information regarding the maximum amount of funds that may be awarded per new school seat and per new school.

Estimated Number of Awards: 10–20 awards.

Note: The Department is not bound by any estimates in this notice. The estimated range

and average size of awards are based on a single 12-month budget period.

Project Period: Up to 60 months.

III. Eligibility Information

1. *Eligible Applicants: Charter management organizations*. Eligible applicants may apply individually or as part of a group or consortium.

2. *Audits*: (a) All grantees must provide to the Department their most recent independent audits of the CMO's financial statements prepared in accordance with generally accepted accounting principles, and all grantees must continue to provide independent, annual audits of their financial statements prepared in accordance with generally accepted accounting principles each year of the grant.

(b) All grantees must ensure that charter schools operated or managed by the applicant conduct independent, annual audits of their financial statements prepared in accordance with generally accepted accounting principles, and ensure that any such audits are publicly reported.

3. *Cost Sharing or Matching*: This competition does not require cost sharing or matching.

4. *Other*: (a) *Reasonable and Necessary Costs*: The Secretary may elect to impose maximum limits on the amount of grant funds that may be awarded per charter school *replicated*, per charter school *expanded*, or per new school seat created.

For this competition, the maximum limit of grant funds that may be awarded per new school seat in a new charter school is \$3,400, including a maximum limit per *replicated* charter school of \$900,000. The maximum limit per new school seat in a charter school that is *expanding* its enrollment is \$1,700, including a maximum limit per *expanded* school of \$900,000.

Note: Applicants must ensure that all costs included in the proposed budget are reasonable and necessary in light of the goals and objectives of the proposed project. Any costs determined by the Secretary to be unreasonable or unnecessary will be removed from the final approved budget.

(b) *Other CSP Grants*: A charter school that previously has received CSP funds for replication or expansion, or for planning or initial implementation of a charter school under CFDA number 84.282A or 84.282B (as administered under the ESEA, as amended by the NCLB), may not use funds under this grant for the same purpose. However, such charter school may be eligible to receive funds under this competition to *expand* the charter school beyond the existing grade levels or student count.

Likewise, a charter school that receives funds under this competition is ineligible to receive funds for the same purpose under section 4303(b)(1) of the ESEA, as amended by the ESSA, including opening and preparing for the operation of a new charter school, opening and preparing for the operation of a *replicated high-quality charter school*, or *expanding a high-quality charter school* (i.e., CFDA number 84.282A or 84.282B).

(c) *Costs for Evaluation*: In accordance with 34 CFR 75.590, CMO grant funds may be used to cover post-award costs associated with an evaluation described in response to the invitational priority or Selection Criterion (c) of this notice, provided that such costs are reasonable and necessary to meet the objectives of the approved project.

IV. Application and Submission Information

1. Address to Request Application Package:

Eddie Moat, U.S. Department of Education, 400 Maryland Avenue SW., Room 4W259, Washington, DC 20202-5970. Telephone: (202) 401-2266 or by email: charterschools@ed.gov.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1-800-877-8339.

Individuals with disabilities can obtain a copy of the application package in an accessible format (e.g., braille, large print, audiotope, or compact disc) by contacting the program contact person listed in this section.

2.a. *Content and Form of Application Submission*: Requirements concerning the content and form of an application, together with the forms you must submit, are in the application package for this competition.

Page Limit: The application narrative (Part III of the application) is where you, the applicant, address the priorities, selection criteria, and application requirements that reviewers use to evaluate your application. We recommend that you limit the application narrative to no more than 60 pages, using the following standards:

- A "page" is 8.5" x 11", on one side only, with 1" margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.

- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).

- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial. An application submitted in any other font (including Times Roman or Arial Narrow) will not be accepted.

The page limit does not apply to Part I, the cover sheet; Part II, the budget section, including the narrative budget justification; Part IV, the assurances and certifications; or the one-page abstract, the resumes, the bibliography, or the letters of support. However, the page limit does apply to all of the application narrative.

b. *Submission of Proprietary Information*: Given the types of projects that may be proposed in applications for the CMO grant competition, your application may include business information that you consider proprietary. In 34 CFR 5.11 we define "business information" and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552, as amended).

Because we plan to make successful applications available to the public, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600, please designate in your application any information that you feel is exempt from disclosure under Exemption 4. In the appropriate Appendix section of your application, under "Other Attachments Form," please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

3. *Submission Dates and Times: Applications Available*: [INSERT DATE OF PUBLICATION IN THE **FEDERAL REGISTER**].

Date of Pre-Application Webinar: The Department will hold a pre-application meeting via Webinar for prospective applicants on January 24, 1:00 p.m., Washington, DC, time. Individuals interested in attending this meeting are encouraged to pre-register by emailing their name, organization, and contact information with the subject heading "PRE-APPLICATION MEETING" to CharterSchools@ed.gov. There is no registration fee for attending this meeting.

For further information about the pre-application meeting, contact Eddie Moat, U.S. Department of Education, 400 Maryland Avenue SW., Room 4W259, Washington, DC 20202-5970.

Telephone: (202) 401-2266 or by email: charterschools@ed.gov.

Deadline for Transmittal of Applications: February 27, 2017.

Applications for grants under this competition must be submitted electronically using the *Grants.gov* Apply site (*Grants.gov*). For information (including dates and times) about how to submit your application electronically, or in paper format by mail or hand delivery if you qualify for an exception to the electronic submission requirement, please refer to *Other Submission Requirements* in section IV of this notice.

We do not consider an application that does not comply with the deadline requirements.

Individuals with disabilities who need an accommodation or auxiliary aid in connection with the application process should contact the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice. If the Department provides an accommodation or auxiliary aid to an individual with a disability in connection with the application process, the individual's application remains subject to all other requirements and limitations in this notice.

Deadline for Intergovernmental Review: [INSERT DATE 105 DAYS AFTER DATE OF PUBLICATION IN THE **FEDERAL REGISTER**].

4. *Intergovernmental Review*: This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.

5. *Funding Restrictions*: Grantees under this program must use the grant funds to *replicate* or *expand* the charter school model or models for which the applicant has presented evidence of success. Grant funds must be used to carry out allowable activities, as described in section 4303(h) of the ESEA, as amended by the ESSA, which include—

(a) Preparing teachers, school leaders, and specialized instructional support personnel, including through paying costs associated with—

- (i) Providing professional development; and
- (ii) Hiring and compensating, during the applicant's planning period specified in the application for funds, one or more of the following:

- (A) Teachers,
- (B) School leaders, and
- (C) Specialized instructional support personnel.

(b) Acquiring supplies, training, equipment (including technology), and educational materials (including developing and acquiring instructional materials).

(c) Carrying out necessary renovations to ensure that a new school building complies with applicable statutes and regulations, and minor facilities repairs (excluding construction).

(d) Providing one-time, startup costs associated with providing transportation to students to and from the charter school.

(e) Carrying out community engagement activities, which may include paying the cost of student and staff recruitment.

(f) Providing for other appropriate, non-sustained costs related to the replication or expansion of high-quality charter schools when such costs cannot be met from other sources.

A grantee may use up to 20 percent of grant funds for initial operational costs associated with the expansion or improvement of the grantee's oversight or management of its charter schools, provided that (i) the specific charter schools being replicated or expanded under the grant are the intended beneficiaries of such expansion or improvement; (ii) such expansion or improvement is intended to improve the grantee's ability to manage or oversee the charter schools replicated or expanded under the grant; and (iii) the costs cannot be met from other sources.

We reference additional regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

6. *Data Universal Numbering System Number, Taxpayer Identification Number, and System for Award Management*: To do business with the Department of Education, you must—

a. Have a Data Universal Numbering System (DUNS) number and a Taxpayer Identification Number (TIN);

b. Register both your DUNS number and TIN with the System for Award Management (SAM), the Government's primary registrant database;

c. Provide your DUNS number and TIN on your application; and

d. Maintain an active SAM registration with current information while your application is under review by the Department and, if you are awarded a grant, during the project period.

You can obtain a DUNS number from Dun and Bradstreet at the following Web site: <http://fedgov.dnb.com/webform>. A DUNS number can be created within one to two business days.

If you are a corporate entity, agency, institution, or organization, you can

obtain a TIN from the Internal Revenue Service. If you are an individual, you can obtain a TIN from the Internal Revenue Service or the Social Security Administration. If you need a new TIN, please allow two to five weeks for your TIN to become active.

The SAM registration process can take approximately seven business days, but may take upwards of several weeks, depending on the completeness and accuracy of the data you enter into the SAM database. Thus, if you think you might want to apply for Federal financial assistance under a program administered by the Department, please allow sufficient time to obtain and register your DUNS number and TIN. We strongly recommend that you register early.

Note: Once your SAM registration is active, it may be 24 to 48 hours before you can access the information in, and submit an application through, *Grants.gov*.

If you are currently registered with SAM, you may not need to make any changes. However, please make certain that the TIN associated with your DUNS number is correct. Also note that you will need to update your registration annually. This may take three or more business days.

Information about SAM is available at www.SAM.gov. To further assist you with obtaining and registering your DUNS number and TIN in SAM or updating your existing SAM account, we have prepared a *SAM.gov* Tip Sheet, which you can find at: www2.ed.gov/fund/grant/apply/sam-faqs.html.

In addition, if you are submitting your application via *Grants.gov*, you must (1) be designated by your organization as an Authorized Organization Representative (AOR); and (2) register yourself with *Grants.gov* as an AOR. Details on these steps are outlined at the following *Grants.gov* Web page: www.grants.gov/web/grants/register.html.

7. Other Submission Requirements.

Applications for grants under this competition must be submitted electronically unless you qualify for an exception to this requirement in accordance with the instructions in this section.

a. Electronic Submission of Applications.

Applications for grants under the CSP Grants to Charter Management Organizations for Replication and Expansion of High-Quality Charter Schools, CFDA number 84.282M, must be submitted electronically using the Governmentwide *Grants.gov* Apply site at www.Grants.gov. Through this site, you will be able to download a copy of the application package, complete it

offline, and then upload and submit your application. You may not email an electronic copy of a grant application to us.

We will reject your application if you submit it in paper format unless, as described elsewhere in this section, you qualify for one of the exceptions to the electronic submission requirement and submit, no later than two weeks before the application deadline date, a written statement to the Department that you qualify for one of these exceptions. Further information regarding calculation of the date that is two weeks before the application deadline date is provided later in this section under *Exception to Electronic Submission Requirement*.

You may access the electronic grant application for CSP Grants to Charter Management Organizations for Replication and Expansion of High-Quality Charter Schools at www.Grants.gov. You must search for the downloadable application package for this competition by the CFDA number. Do not include the CFDA number's alpha suffix in your search (e.g., search for 84.282, not 84.282M).

Please note the following:

- When you enter the *Grants.gov* site, you will find information about submitting an application electronically through the site, as well as the hours of operation.

- Applications received by *Grants.gov* are date and time stamped. Your application must be fully uploaded and submitted and must be date and time stamped by the *Grants.gov* system no later than 4:30:00 p.m., Washington, DC time, on the application deadline date. Except as otherwise noted in this section, we will not accept your application if it is received—that is, date and time stamped by the *Grants.gov* system—after 4:30:00 p.m., Washington, DC time, on the application deadline date. We do not consider an application that does not comply with the deadline requirements. When we retrieve your application from *Grants.gov*, we will notify you if we are rejecting your application because it was date and time stamped by the *Grants.gov* system after 4:30:00 p.m., Washington, DC time, on the application deadline date.

- The amount of time it can take to upload an application will vary depending on a variety of factors, including the size of the application and the speed of your Internet connection. Therefore, we strongly recommend that you do not wait until the application deadline date to begin the submission process through *Grants.gov*.

- You should review and follow the Education Submission Procedures for submitting an application through *Grants.gov* that are included in the application package for this competition to ensure that you submit your application in a timely manner to the *Grants.gov* system. You can also find the Education Submission Procedures pertaining to *Grants.gov* under News and Events on the Department's G5 system home page at www.G5.gov. In addition, for specific guidance and procedures for submitting an application through *Grants.gov*, please refer to the *Grants.gov* Web site at: www.grants.gov/web/grants/applicants/apply-for-grants.html.

- You will not receive additional point value because you submit your application in electronic format, nor will we penalize you if you qualify for an exception to the electronic submission requirement, as described elsewhere in this section, and submit your application in paper format.

- You must submit all documents electronically, including all information you typically provide on the following forms: The Application for Federal Assistance (SF 424), the Department of Education Supplemental Information for SF 424, Budget Information—Non-Construction Programs (ED 524), and all necessary assurances and certifications.

- You must upload any narrative sections and all other attachments to your application as files in a read-only, non-modifiable Portable Document Format (PDF). Do not upload an interactive or fillable PDF file. If you upload a file type other than a read-only, non-modifiable PDF (e.g., Word, Excel, WordPerfect, etc.) or submit a password-protected file, we will not review that material. Please note that this could result in your application not being considered for funding because the material in question—for example, the application narrative—is critical to a meaningful review of your proposal. For that reason it is important to allow yourself adequate time to upload all material as PDF files. The Department will not convert material from other formats to PDF.

- Your electronic application must comply with any page-limit requirements described in this notice.

- After you electronically submit your application, you will receive from *Grants.gov* an automatic notification of receipt that contains a *Grants.gov* tracking number. This notification indicates receipt by *Grants.gov* only, not receipt by the Department. *Grants.gov* will also notify you automatically by email if your application met all the *Grants.gov* validation requirements or if

there were any errors (such as submission of your application by someone other than a registered Authorized Organization Representative, or inclusion of an attachment with a file name that contains special characters). You will be given an opportunity to correct any errors and resubmit, but you must still meet the deadline for submission of applications.

Once your application is successfully validated by *Grants.gov*, the Department will retrieve your application from *Grants.gov* and send you an email with a unique PR/Award number for your application.

These emails do not mean that your application is without any disqualifying errors. While your application may have been successfully validated by *Grants.gov*, it must also meet the Department's application requirements as specified in this notice and in the application instructions. Disqualifying errors could include, for instance, failure to upload attachments in a read-only, non-modifiable PDF; failure to submit a required part of the application; or failure to meet applicant eligibility requirements. It is your responsibility to ensure that your submitted application has met all of the Department's requirements.

- We may request that you provide us original signatures on forms at a later date.

Application Deadline Date Extension in Case of Technical Issues with the Grants.gov System: If you are experiencing problems submitting your application through *Grants.gov*, please contact the *Grants.gov* Support Desk, toll free, at 1-800-518-4726. You must obtain a *Grants.gov* Support Desk Case Number and must keep a record of it.

If you are prevented from electronically submitting your application on the application deadline date because of technical problems with the *Grants.gov* system, we will grant you an extension until 4:30:00 p.m., Washington, DC time, the following business day to enable you to transmit your application electronically or by hand delivery. You also may mail your application by following the mailing instructions described elsewhere in this notice.

If you submit an application after 4:30:00 p.m., Washington, DC time, on the application deadline date, please contact the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice and provide an explanation of the technical problem you experienced with *Grants.gov*, along with the *Grants.gov* Support Desk Case Number. We will accept your

application if we can confirm that a technical problem occurred with the *Grants.gov* system and that the problem affected your ability to submit your application by 4:30:00 p.m., Washington, DC time, on the application deadline date. We will contact you after we determine whether your application will be accepted.

Note: The extensions to which we refer in this section apply only to the unavailability of, or technical problems with, the *Grants.gov* system. We will not grant you an extension if you failed to fully register to submit your application to *Grants.gov* before the application deadline date and time or if the technical problem you experienced is unrelated to the *Grants.gov* system.

Exception to Electronic Submission Requirement: You qualify for an exception to the electronic submission requirement, and may submit your application in paper format, if you are unable to submit an application through the *Grants.gov* system because—

- You do not have access to the Internet; or

- You do not have the capacity to upload large documents to the *Grants.gov* system; and

- No later than two weeks before the application deadline date (14 calendar days or, if the fourteenth calendar day before the application deadline date falls on a Federal holiday, the next business day following the Federal holiday), you mail or fax a written statement to the Department, explaining which of the two grounds for an exception prevents you from using the Internet to submit your application.

If you mail your written statement to the Department, it must be postmarked no later than two weeks before the application deadline date. If you fax your written statement to the Department, we must receive the faxed statement no later than two weeks before the application deadline date.

Address and mail or fax your statement to: Eddie Moat, U.S. Department of Education, 400 Maryland Avenue SW., Room 4W259, Washington, DC 20202-5970. FAX: (202) 401-2266.

Your paper application must be submitted in accordance with the mail or hand delivery instructions described in this notice.

b. Submission of Paper Applications by Mail.

If you qualify for an exception to the electronic submission requirement, you may mail (through the U.S. Postal Service or a commercial carrier) your application to the Department. You must mail the original and two copies of your application, on or before the application deadline date, to the

Department at the following address: U.S. Department of Education, Application Control Center, Attention: CFDA Number 84.282M, LBJ Basement Level 1, 400 Maryland Avenue SW., Washington, DC 20202–4260.

You must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary of the U.S. Department of Education.

If you mail your application through the U.S. Postal Service, we do not accept either of the following as proof of mailing:

(1) A private metered postmark.

(2) A mail receipt that is not dated by the U.S. Postal Service.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, you should check with your local post office.

We will not consider applications postmarked after the application deadline.

c. Submission of Paper Applications by Hand Delivery.

If you qualify for an exception to the electronic submission requirement, you (or a courier service) may deliver your paper application to the Department by hand. You must deliver the original and two copies of your application by hand, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: CFDA Number 84.282M, 550 12th Street SW., Room 7039, Potomac Center Plaza, Washington, DC 20202–4260.

The Application Control Center accepts hand deliveries daily between 8:00 a.m. and 4:30:00 p.m., Washington, DC time, except Saturdays, Sundays, and Federal holidays.

Note for Mail or Hand Delivery of Paper Applications: If you mail or hand deliver your application to the Department—

(1) You must indicate on the envelope and—if not provided by the Department—in Item 11 of the SF 424 the CFDA number, including suffix letter, if any, of the competition under which you are submitting your application; and

(2) The Application Control Center will mail to you a notification of receipt of your grant application. If you do not receive this notification within 15 business days from the application deadline date, you should call the U.S. Department of Education Application Control Center at (202) 245–6288.

V. Application Review Information

1. Application Requirements:

Applications for CSP CMO grant funds must address the following application requirements. An applicant must respond to requirement (a) in a stand-alone section of the application or in an appendix. For all other application requirements, an applicant may choose to respond in the context of its responses to the selection criteria in section V.2 of this notice.

(a) Demonstrate that the applicant currently operates or manages more than one charter school. For purposes of this competition, multiple charter schools are considered to be separate schools if each school—

(i) meets the definition of “charter school” under section 4310(2) of the ESEA, as amended by the ESSA, and

(ii) is treated as a separate school by its authorized public chartering agency and the State, including for purposes of accountability and reporting under title I of the ESEA, as amended.

(b) For each charter school currently operated or managed by the applicant, provide—

1. Student assessment results for all students and for each subgroup of students described in section 1111(c)(2) of the ESEA, as amended by the NCLB;⁶

2. Attendance and student retention rates for the most recently completed school year and, if applicable, the most recent available four-year adjusted cohort graduation rates and extended year adjusted cohort graduation rates;

3. Suspension and expulsion rates for the past three years for each subgroup of students described in section 1111(c)(2) of the ESEA, as amended by the NCLB; and

4. Information on any significant compliance and management issues encountered within the last three school years by any school operated or managed by the eligible entity, including in the areas of student safety and finance.

(c) Provide information, including information regarding how any compliance issues were resolved, on any charter schools operated or managed by the applicant that have been closed; have had their charter(s) revoked due to problems with statutory or regulatory compliance, including compliance with sections 4310(2)(G) and (J) of the ESEA, as amended by the ESSA; have had their affiliation with the

applicant revoked or terminated, including through voluntary disaffiliation; or have experienced significant problems with statutory or regulatory compliance, including compliance with sections 4310(2)(G) and (J) of the ESEA, as amended by the ESSA, that could lead to revocation of the school’s charter(s).

(d) Provide a complete *logic model* for the grant project. The *logic model* must include the applicant’s objectives for implementing a *high-quality charter school* program with funding under this competition, including the number of *high-quality charter schools* the applicant proposes to *replicate* or *expand*.

(e) Describe the educational program that the applicant will implement in each *replicated* or *expanded* charter school, including—

(1) Information on how the program will enable all students to meet the State’s challenging academic and performance standards;

(2) The grade levels or ages of students who will be served; and

(3) The instructional practices that will be used, including whether the applicant currently operates or is proposing to *replicate* or *expand* a single-sex charter school or coeducational charter school that provides a single-sex class or extracurricular activity (collectively referred to as a “single-sex educational program”).

Note: Prior to receiving an award, an applicant currently operating or proposing to *replicate* or *expand* a charter school that provides a single-sex educational program must demonstrate that the existing and proposed single-sex educational programs are in compliance with applicable nondiscrimination laws, including the Equal Protection Clause of the U.S. Constitution (as interpreted in *United States v. Virginia*, 518 U.S. 515 (1996), and other cases) and Title IX of the Education Amendments of 1972 (20 U.S.C. 1681, *et seq.*) and implementing regulations, including 34 CFR 106.34. Such an applicant likely will be required to provide fact-specific information about the single-sex educational program(s) within specified timeframes. In addition, special conditions related to compliance with applicable nondiscrimination laws are likely to be placed on any grant awarded to an applicant that operates or proposes to *replicate* or *expand* a charter school that provides a single-sex educational program. Please see the application package for additional information related to the requirements for single-sex educational programs.

(f) Describe how the applicant currently operates or manages the charter schools for which it has presented evidence of success, and how the proposed *replicated* or *expanded*

⁶ Section 5(e)(1)(B) of the ESSA states that “subsections (c) and (d) of section 1111 of the [ESEA] (20 U.S.C. 6311), as amended by [the ESSA], shall take effect beginning with school year 2017–2018.” For purposes of this competition, “section 1111(c)(2)” refers to section 1111(c)(2) of the ESEA, as amended by the NCLB.

charter schools will be operated or managed. Include a description of central office functions, relationship with charter holder(s) if other than the applicant, governance, daily operations, financial management, human resources management, and instructional management. If applying as a group or consortium, describe the roles and responsibilities of each member of the group or consortium and how each member will contribute to this project.

(g) Describe how the operation of each *replicated* or *expanded* charter school will be sustained after the grant has ended, which shall include a multi-year financial and operating model for the applicant.

(h) Describe how the applicant will solicit, consider, and include in governance input from parents and other members of the community on the implementation and operation of each *replicated* or *expanded* charter school.

(i) Describe how the applicant will ensure that each *replicated* or *expanded* charter school will recruit and enroll students, including students with disabilities, English learners, and other *educationally disadvantaged students*, and describe the lottery and enrollment procedures that will be used for each *replicated* or *expanded* charter school if more students apply for admission than can be accommodated. For applicants that propose to use a weighted lottery, describe how the weighted lottery complies with section 4303(c)(3)(A) of the ESEA, as amended by the ESSA.

(j) Describe how the applicant will ensure that all eligible students with disabilities receive a free appropriate public education in accordance with Part B of the IDEA.

(k) Describe how the proposed project will assist *educationally disadvantaged students* in mastering State academic content standards and State student academic achievement standards.

(l) Describe the applicant's planned activities and expenditures of Federal grant funds.

(m) Include a request and justification for any waivers of Federal statutory or regulatory requirements that the applicant believes are necessary for the successful operation of its *replicated* or *expanded* charter schools.

2. *Selection Criteria.* The maximum possible score for addressing all of the criteria in this section is 100 points. The maximum possible score for addressing each criterion is indicated in parentheses following the criterion.

In evaluating an application, the Secretary considers the following criteria:

(a) *Quality of the eligible applicant.* (45 points)

1. The degree to which the applicant has demonstrated success in increasing academic achievement, including graduation rates where applicable, for all students and for each of the subgroups of students described in section 1111(c)(2) of the ESEA, as amended by the NCLB, attending the charter schools the applicant operates or manages (15 points).

2. The extent to which the academic achievement results (including annual student performance on statewide assessments and annual student attendance and retention rates, and where applicable and available, student academic growth, high school graduation rates, college attendance rates, and college persistence rates) for *educationally disadvantaged students* served by the charter schools operated or managed by the applicant have exceeded the average academic achievement results for such students in the State (15 points).

3. The extent to which charter schools operated or managed by the applicant have not been closed; have not had a charter revoked due to noncompliance with statutory or regulatory requirements; have not had their affiliation with the applicant revoked or terminated, including through voluntary disaffiliation; have not had any significant issues in the area of financial or operational management; have not experienced significant problems with statutory or regulatory compliance that could lead to revocation of the school's charter; and have not had any significant issues with respect to student safety (15 points).

(b) *Contribution in assisting educationally disadvantaged students.* (25 points)

The significance of the contribution the proposed project will make in expanding educational opportunities for *educationally disadvantaged students* and enabling those students to meet challenging State academic standards. In determining the significance of the contribution the proposed project will make, the Secretary considers:

1. The extent to which charter schools currently operated or managed by the applicant serve *educationally disadvantaged students*, including students with disabilities and English learners, at rates comparable to surrounding public schools (10 points); and

2. The quality of the plan to ensure that the charter schools the applicant proposes to *replicate* or *expand* will recruit and enroll *educationally disadvantaged students* (15 points).

(c) *Quality of the evaluation plan for the proposed project.* (10 points)

In determining the quality of the evaluation plan for the proposed project, the Secretary considers the alignment of the evaluation plan to the *logic model* for the proposed grant project and the extent to which the methods of evaluation include the use of objective *performance measures* that are clearly related to the intended outcomes of the proposed grant project articulated in the applicant's response to application requirement (c) and will produce quantitative and qualitative data by the end of the performance period.

(d) *Quality of the management plan and personnel.* (20 points)

In determining the quality of the management plan and personnel to *replicate* or *expand high-quality charter schools* under the proposed project, the Secretary considers—

(1) The adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks (5 points);

(2) The qualifications, including relevant training and experience, of the project director, chief executive officer or organization leader, and key project personnel, especially in managing projects of the size and scope of the proposed project (10 points); and

(3) The ability of the applicant to sustain the operation of the *replicated* or *expanded* charter schools after the grant has ended, as demonstrated by the multi-year financial and operating model included in the applicant's response to application requirement (g) (5 points).

3. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department of Education (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

4. *Risk Assessment and Special Conditions*: Consistent with 2 CFR 200.205, before awarding grants under this competition the Department conducts a review of the risks posed by applicants. Under 2 CFR 3474.10, the Secretary may impose specific conditions and, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

5. *Integrity and Performance System*: If you are selected under this competition to receive an award that, over the course of the project period, may exceed the simplified acquisition threshold (currently \$150,000), under 2 CFR 200.205(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through SAM. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds \$10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed \$10,000,000.

VI. Award Administration Information

1. *Award Notices*: If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements*: We identify administrative and national policy requirements in the application package and reference these and other

requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Reporting*: (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to www.ed.gov/fund/grant/apply/appforms/appforms.html.

(c) Under 34 CFR 75.250(b), the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

4. *Performance Measures*: (a) The primary goal of the CSP is to support the creation and development of a large number of *high-quality charter schools* that are free from State or local rules that inhibit flexible operation, are held accountable for enabling students to reach challenging State performance standards, and are open to all students. The Secretary has two performance indicators to measure progress towards this goal: (1) The number of charter schools in operation around the Nation, and (2) the percentage of fourth- and eighth-grade charter school students who are achieving at or above the proficient level on State assessments in mathematics and reading/language arts. Additionally, the Secretary has established the following measure to examine the efficiency of the CSP: Federal cost per student in implementing a successful school (defined as a school in operation for three or more consecutive years).

(b) *Project-Specific Performance Measures*. Applicants must propose project-specific *performance measures*

and *performance targets* consistent with the objectives of the proposed project. Applications must provide the following information as directed under 34 CFR 75.110(b) and (c):

(1) *Performance measures*. How each proposed *performance measure* would accurately measure the performance of the project and how the proposed *performance measure* would be consistent with the *performance measures* established for the program funding the competition.

(2) *Baseline data*. (i) Why each proposed *baseline* is valid; or (ii) if the applicant has determined that there are no established *baseline* data for a particular *performance measure*, an explanation of why there is no established *baseline* and of how and when, during the project period, the applicant would establish a valid *baseline* for the *performance measure*.

(3) *Performance targets*. Why each proposed *performance target* is *ambitious* yet achievable compared to the *baseline* for the *performance measure* and when, during the project period, the applicant would meet the *performance target(s)*.

(4) *Data collection and reporting*. (i) The data collection and reporting methods the applicant would use and why those methods are likely to yield reliable, valid, and meaningful performance data; and (ii) the applicant's capacity to collect and report reliable, valid, and meaningful performance data, as evidenced by high-quality data collection, analysis, and reporting in other projects or research.

All grantees must submit an annual performance report with information that is responsive to these *performance measures*.

5. *Continuation Awards*: In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things, whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, the *performance targets* in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

6. *Project Director's Meeting:* Applicants approved for funding under this competition must attend a two-day meeting for project directors at a location to be determined in the continental United States during each year of the project. Applicants may include the cost of attending this meeting in their proposed budgets.

VII. Agency Contact

FOR FURTHER INFORMATION CONTACT:

Eddie Moat, U.S. Department of Education, 400 Maryland Avenue SW., Room 4W259, Washington, DC 20202-5970. Telephone: (202) 401-2266 or by email: charterschools@ed.gov.

If you use a TDD or a TTY, call the FRS, toll free, at 1-800-877-8339.

VIII. Other Information

Accessible Format: Individuals with disabilities can obtain this document and a copy of the application package in an accessible format (e.g., braille, large print, audiotape, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: www.gpo.gov/fdsys. At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or PDF. To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: www.federalregister.gov. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: January 10, 2017.

Margo Anderson,

Acting Assistant Deputy Secretary for Innovation and Improvement.

BILLING CODE 4000-01-P

DEPARTMENT OF EDUCATION

[Docket No.: ED-2016-ICCD-0092]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; EDFacts Data Collection School Years 2016-17, 2017-18, and 2018-19

AGENCY: National Center for Education Statistics (NCES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a revision of an existing information collection.

DATES: Interested persons are invited to submit comments on or before February 13, 2017.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED-2016-ICCD-0092. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 224-84, Washington, DC 20202-4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact NCES Information Collections at NCES.Information.Collections@ed.gov.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that

is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: EDFacts Data Collection School Years 2016-17, 2017-18, and 2018-19.

OMB Control Number: 1850-0925.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 61.

Total Estimated Number of Annual Burden Hours: 126,800.

Abstract: EDFacts is a U.S. Department of Education (ED) initiative to collect, analyze, report on and promote the use of high-quality, pre-kindergarten through grade 12 (pre-K-12) performance data for use in education planning, policymaking, and management and budget decision making to improve outcomes for students. EDFacts enables the National Center for Education Statistics (NCES) to report on students, schools, staff, services, and education outcomes at the state, district, and school levels, by centralizing data provided by state education agencies, local education agencies, and schools. This centralized approach provides ED users with the ability to efficiently analyze and report on submitted data and has reduced the reporting burden for state and local data producers through the use of streamlined data collection, analysis, and reporting tools. EDFacts collects information on behalf of ED grant and program offices for approximately 180 data groups for all 50 states, Washington DC, Puerto Rico, and seven outlying areas and freely associated states (American Samoa, Federated States of Micronesia, Guam, Marshall Islands, Commonwealth of the Northern Mariana Islands, Republic of Palau, and the U.S. Virgin Islands), the Department of Defense Education Activity (DoDEA), and the Bureau of Indian Education (BIE). NCES seeks authorization from OMB to revise its EDFacts data collection and is requesting a new

clearance for the 2016–17, 2017–18, and 2018–19 school years in order to support the Elementary and Secondary Act (ESEA), as amended by the Every Student Succeeds Act (ESSA) in December, 2015. In response to the 60-day public comment period announced in the **Federal Register** on August 24, 2016, ED received comments from 21 distinct commenters and 5 anonymous submissions. A summary of the comments and ED's responses are provided in Attachment F. This notice announces that the revised collection package is now available for a 30-day public comment period. This submission includes a few proposed changes to the EDFacts data collection. The proposed changes are detailed for review in Attachments C and B.

Dated: January 10, 2017.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

[FR Doc. 2017–00666 Filed 1–12–17; 8:45 am]

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Request for Public Comment on Draft Consent-Based Siting Process for Consolidated Storage and Disposal Facilities for Spent Nuclear Fuel and High-Level Radioactive Wastes

AGENCY: Spent Fuel & Waste Disposition, Office of Nuclear Energy, Department of Energy.

ACTION: Notice of public comment period.

SUMMARY: The U.S. Department of Energy (DOE) is designing a consent-based siting process to establish an integrated waste management system to transport, store, and dispose of commercial spent nuclear fuel and high-level radioactive waste. In a consent-based siting approach, DOE will work with communities, tribal governments and states across the country that express interest in hosting federal consolidated interim storage facilities and disposal facilities for spent nuclear fuel and high-level radioactive waste as part of an integrated waste management system. The Department is seeking input on the *Draft Consent-Based Siting Process for Consolidated Storage and Disposal Facilities for Spent Nuclear Fuel and High-Level Radioactive Wastes*.

DATES: The 90-day public comment period begins January 12, 2017 and ends April 14, 2017.

ADDRESSES: You may submit comments on the draft document by any of the following methods:

Email: Responses may be provided by email to consentbasedsiting@hq.doe.gov. Please submit electronic comments in Microsoft Word, or PDF file format, and avoid the use of special characters or any form of encryption.

Mail: Responses may be provided by mail to the following address: U.S. Department of Energy, Office of Nuclear Energy, Draft Consent-Based Siting Process, 1000 Independence Ave. SW., Washington, DC 20585.

Fax: Responses may be faxed to 202–586–0544. Please include “Draft Consent-Based Siting Process” on the fax cover page.

Online: Responses will be accepted online at www.regulations.gov.

Data collected via the mechanisms listed above will not be protected from the public view in any way. Individual commenters' names and addresses (including email addresses) received as part of this Request for Public Comment are part of the public record. DOE plans to reproduce comment documents in their entirety, as appropriate, and to post all comment documents received in their entirety at energy.gov/consentbasedsiting following the close of the public comment period. Any person wishing to have his/her name, address, email address, or other identifying information withheld from the public record of comment documents must state this request prominently at the beginning of any comment document, or else no redactions will be made.

FOR FURTHER INFORMATION CONTACT: Requests for further information should be sent to Mr. Andrew Griffith via consentbasedsiting@hq.doe.gov or at U.S. Department of Energy, Office of Spent Fuel and Waste Disposition (NE–8), Office of Nuclear Energy, 1000 Independence Ave. SW., Washington, DC 20585. Telephone: (202) 586–3715.

SUPPLEMENTARY INFORMATION: *General Information:* Where can I obtain a copy of the *Draft Consent-Based Siting Process for Consolidated Storage and Disposal Facilities for Spent Nuclear Fuel and High-Level Radioactive Wastes*?

All documents in the docket are listed in the www.regulations.gov index. You may also download a copy of the document at energy.gov/consentbasedsiting.

Issued in Washington, DC, on January 9, 2017.

Melissa Bates,

Acting Team Lead for Office of Integrated Waste Management, Spent Fuel & Waste Disposition, Office of Nuclear Energy, Department of Energy.

[FR Doc. 2017–00670 Filed 1–12–17; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Office of Energy Efficiency and Renewable Energy

Innovative Pathways Funding Opportunity Announcement

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of funding opportunity announcement.

SUMMARY: The U.S. Department of Energy's (DOE) Office of Energy Efficiency and Renewable Energy's (EERE) Technology-to-Market (T2M) team is issuing a Funding Opportunity Announcement (DE-FOA-0001703) entitled Innovative Pathways. This FOA is seeking to surface new testable and scalable ways to alleviate common structural challenges facing promising new energy technologies on the pathway to market.

DATES: Letters of Intent are requested on or before January 18, 2017 and Full Applications are requested on or before February 15, 2017.

ADDRESSES: Interested persons are encouraged to submit questions, which must be submitted electronically to T2M@ee.doe.gov. The complete FOA, including the list of specific questions and submission instructions for the Letters of Intent and Full Applications, can be found at <https://eere-exchange.energy.gov/>.

FOR FURTHER INFORMATION CONTACT: Questions may be directed to Johanna Wolfson, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, EE–61, 1000 Independence Avenue SW., Washington, DC 20585–0121. Telephone: 202–586–1040. Email: T2M@ee.doe.gov.

SUPPLEMENTARY INFORMATION: EERE is seeking proposals under two topic areas: (1) Technical Community and Industry Collaboration, and (2) Lowering Barriers to Resource Access. The two highlighted areas of interest for this FOA are Models for industry-startup partnerships under Topic 1, and New investment models under Topic 2. EERE's intent is to pilot and evaluate new mechanisms, and

position those that are successful for adoption by the private sector. These mechanisms are intended to augment existing Tech-to-Market efforts currently supported. This Funding Opportunity is not intended to fund individual technology solutions directly. Rather, it will fund approaches that address common barriers across the larger energy ecosystem and help create more efficient pathways to market for clean energy technologies.

Subject to the availability of funds, up to \$4,200,000 in Federal assistance will be provided over two years through this funding opportunity. A 20% recipient cost-share is required. EERE anticipates selecting up to seven pilot projects in the first year. After the first year, EERE will conduct a continuation review of the pilot projects. Up to three of the projects will be granted a continuation for a second year.

Lead applicants may include, but are not limited to, educational institutions, incubators/accelerators, research labs, non-profit entities, industry associations, corporations, and investment/financial/insurance firms.

Issued in Washington, DC, on January 9, 2017.

Johanna Wolfson,

Program Director/Selection Official, Office of Energy Efficiency and Renewable Energy.

BILLING CODE 6450-01-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2016-0094-1138; FRL-9958-27-OEI]

Agency Information Collection Activities; Proposed Collection; Comment Request; Information Collection for Importation of On-Highway Vehicles and Motorcycles and Nonroad Engines, Vehicles, and Equipment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "Importation of On-highway Vehicles and Motorcycles and Nonroad Engines, Vehicles, and Equipment" EPA ICR Number 2583.01, OMB Control Number 2060-NEW to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This new ICR is the consolidation of two individual ICRs that are currently

approved by OMB. EPA currently has an approved collection that covers the information requirements for importation of on-highway vehicles which expires on February 28, 2017 (OMB Control Number 2060-0095, ICR Number 0010.14). EPA also has an approved collection for information requirements for importation of nonroad engines and recreational vehicles (OMB Control Number 2060-0320, ICR Number 1723.07), which expires February 28, 2017.

Public comments were requested via the **Federal Register** on September 16, 2016 (81 FR 63758) during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before February 13, 2017.

ADDRESSES: Submit your comments referencing Docket ID No. EPA-HQ-OAR-2016-0094, to (1) EPA online using www.regulations.gov (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460, and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Holly Pugliese, Compliance Division, Office of Transportation and Air Quality, Environmental Protection Agency, 2000 Traverwood, Ann Arbor, Michigan, 48105; telephone number: 734-214-4288; fax number: 734-214-4869; email address: pugliese.holly@epa.gov.

SUPPLEMENTARY INFORMATION: Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the

Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: This ICR will consolidate two separate ICRs that currently individually cover EPA Declaration Forms 3520-1, 3520-21, and 3520-8. EPA Declaration Form 3520-1 is used by importers of on-highway vehicles and motorcycles and EPA Declaration Form 3520-21 is used by importers of nonroad vehicles, engines and equipment to help facilitate importation of products at U.S. Borders. Each form identifies the regulated category of engine or vehicle and the regulatory provisions under which the importation is taking place. In addition, this ICR covers the burden of EPA Form 3520-8 which is used to request final importation clearance for Independent Commercial Importers (ICIs) of on-highway vehicles who are required to bring the on-highway vehicles into compliance and provide test results. This form is currently covered by OMB 2060-0095. EPA is consolidating these two ICRs due to the effort being undertaken by the U.S. Customs and Border Protection to require electronic filing for all importers. Over the last several years, CBP has been developing the Automated Commercial Environment (ACE) for electronic filing. By the end of 2016, ACE will become the primary system the trade community and other importers will use to report imports and exports. Through ACE as the single window, manual processes will be streamlined and automated, and paper submissions (*e.g.*, fillable PDFs) will essentially be eliminated. However, EPA will continue to maintain the forms on our Web site in fillable PDF format.

EPA does not collect the forms, but rather makes them available to importers and CBP to facilitate entry of goods at the port. EPA may ask for them upon request to assist CPB and/or EPA enforcement personnel for any given import for which there are questions or issues. The forms are primarily used by CBP at the time of importation to assist CBP in making determination if entry should be allowed. CBP regulations require that the forms be submitted as applicable at the time of entry; see 19 CFR 12.73 and 12.74.

Form Numbers: 3520-1, 3520-21, 3520-8.

Frequency of Response: Once per entry. (One form per shipment may be used.)

Respondents/Affected Entities: Individual importers, or companies who import and/or manufacture on-highway

vehicles and nonroad engines, vehicles, and equipment.

Respondent's Obligation to Respond: Required for any importer to legally import nonroad vehicles or engines into the U.S.

Estimated Number of Respondents: 14,810.

Total Estimated Burden: 13,985 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total Estimated Cost: \$513,633 (per year), includes \$48,064 annualized capital or operation & maintenance costs.

Changes in Estimates: EPA is establishing new burden estimates as we combine the burden estimates for the two separate ICRs that currently cover the forms.

Courtney Kerwin,

Director, Regulatory Support Division.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OECA-2013-0547; FRL-9957-66-OEI]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; Performance Evaluation Studies on Wastewater Laboratories (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "Performance Evaluation Studies on Wastewater Laboratories (Renewal)" (EPA ICR No. 0234.12, OMB Control No. 2080-0021) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through March 31, 2017. Public comments were previously requested via the **Federal Register** (81 FR 44017) on July 6, 2016 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before February 13, 2017.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2013-0547, to (1) EPA online using www.regulations.gov (our preferred method), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460, and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:

Gregory Savitske, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564-2601; fax number: (202) 564-0050; email address: Savitske.Gregory@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: Discharge Monitoring Report-Quality Assurance (DMR-QA) study program participation is mandatory for major and selected minor National Pollutant Discharge Elimination System (NPDES) permit holders in accordance with Clean Water Act Section 308. The DMR-QA study program is designed to evaluate the analytic ability of the laboratories that perform chemical, microbiological and whole effluent toxicity (WET) analyses required in the NPDES permits for reporting results in Discharge Monitoring Reports (DMR). Under DMR-QA, the permit holder is responsible for having their in-house and/or contract laboratories perform proficiency tests and submit results for grading by proficiency test (PT) providers. Graded results are transmitted by either the permittee or PT provider to the appropriate federal or

state NPDES regulatory authority. Permit holders are responsible for submitting corrective action reports to the appropriate regulatory authority when results are unsatisfactory.

Form Numbers: EPA Form 6400-01.

Respondents/Affected Entities: Major and selected minor permit holders under the Clean Water Act's National Pollutant Discharge Elimination System (NPDES).

Respondent's Obligation To Respond: Mandatory under Clean Water Act Section 308(a).

Estimated Number of Respondents: 5,700 (total).

Frequency of Response: Annually, On occasion.

Total Estimated Burden: 37,620 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total Estimated Cost: \$5,113,983 (per year), includes \$3,194,052 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 1,259 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase in burden hours can be attributed to an increase in discretionary selection of minor permit holders for participation by state coordinators. Labor costs were revised upward due to market changes and inflation. Non-labor costs for obtaining proficiency test samples also increased.

Courtney Kerwin,

Director, Regulatory Support Division.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9958-04-ORD]

Environmental Laboratory Advisory Board (ELAB) Meeting Dates and Agenda

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of teleconferences and face-to-face meetings.

The Environmental Protection Agency's Environmental Laboratory Advisory Board (ELAB), as previously announced, holds teleconference meetings the third Wednesday of each month at 1:00 p.m. ET and two face-to-face meetings each calendar year. For 2017, teleconference only meetings will be February 15, March 15, April 19, May 17, June 21, July 19, September 20, October 18, November 15, and December 20, to discuss the ideas and

views presented at the previous ELAB meetings, as well as new business. Items to be discussed by ELAB during the monthly meetings include: (1) Issues in continuing the expansion of national environmental accreditation; (2) ELAB support to the Agency on issues relating to measurement and monitoring for all programs; and (3) follow-up on some of ELAB's past recommendations and issues. In addition to the teleconferences, ELAB will hold two face-to-face meetings with teleconference line also available on January 23, 2017 at the Hyatt Regency Houston Galleria in Houston, TX at 1:00 p.m. (CT) and on August 7, 2017 at the Hyatt Regency in Washington, DC at 1:00 p.m. (ET). Written comments on laboratory accreditation issues and/or environmental monitoring or measurement issues are encouraged and should be sent to Ms. Lara P. Phelps, Designated Federal Official, U.S. EPA (E243-05), 109 T.W. Alexander Drive, Research Triangle Park, NC 27709 or emailed to phelps.lara@epa.gov. Members of the public are invited to listen to the teleconference calls, and time permitting, will be allowed to comment on issues discussed during this and previous ELAB meetings. Those persons interested in participating should call Lara P. Phelps at (919) 541-5544 to obtain teleconference information. For information on access or services for individuals with disabilities, please contact Lara P. Phelps at the number above. Requests for accommodation of a disability should be made at least 10 days prior to the meeting, to give EPA as much time as possible to process your request.

Thomas A. Burke,
EPA Science Advisor.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than January 30, 2017.

A. Federal Reserve Bank of Kansas City (Dennis Denney, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri 64198-0001:

1. *James R. Barta, Fremont, Nebraska, individually; and together with Jack*

Barta, Fremont, Nebraska, and Walter Hoff, Atlanta, Georgia, as members of the Barta/Hoff Group acting in concert; to acquire voting shares of Woodstock Land and Cattle Company, and thereby control Fullerton National Bank, both of Fullerton, Nebraska.

Board of Governors of the Federal Reserve System, January 10, 2017.

Yao-Chin Chao,

Assistant Secretary of the Board.

BILLING CODE 6210-01-P

GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090-0121: Docket No. 2017-0001; Sequence 1]

General Services Administration Acquisition Regulation; Information Collection; Industrial Funding Fee and Sales Reporting

AGENCY: Office of Acquisition Policy, General Services Administration (GSA).

ACTION: Notice of request for comments regarding an extension to an existing OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act, the Regulatory Secretariat Division is submitting a request to the Office of Management and Budget (OMB) to review and approve an extension of a previously approved information collection associated with General Services Administration Acquisition Regulation clause 552.238-74, Industrial Funding Fee and Sales Reporting. GSA uses this information to collect the Industrial Funding Fee and administer the Federal Supply Schedule (FSS) program.

DATES: *Submit comments on or before:* March 14, 2017.

ADDRESSES: Submit comments identified by Information Collection 3090-0121, Industrial Funding Fee and Sales Reporting, by any of the following methods:

- *Regulations.gov:* <http://www.regulations.gov>. Submit comments via the Federal eRulemaking portal by searching the OMB control number. Select the link "Submit a Comment" that corresponds with "Information Collection 3090-0121, Industrial Funding Fee and Sales Reporting." Follow the instructions provided at the "Submit a Comment" screen. Please include your name, company name (if any), and "Information Collection 3090-0121, Industrial Funding Fee and Sales Reporting" on your attached document.

- *Mail:* General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405. ATTN: Ms. Flowers/IC 3090-0121, Industrial Funding Fee and Sales Reporting.

Instructions: Please submit comments only and cite Information Collection 3090-0121, Industrial Funding Fee and Sales Reporting, in all correspondence related to this collection. All comments received will be posted without change to <http://www.regulations.gov>, including any personal and/or business confidential information provided.

FOR FURTHER INFORMATION CONTACT:

Matthew McFarland, Senior Policy Advisor, GSA Acquisition Policy Division, at 202-690-9232 or matthew.mcfarland@gsa.gov.

SUPPLEMENTARY INFORMATION:

A. Purpose

GSA's Federal Supply Schedule (FSS) program, commonly known as the GSA Schedules program or Multiple Award Schedule (MAS) program provides federal agencies with a simplified process for acquiring commercial supplies and services. The FSS program is the Government's preeminent contracting vehicle, accounting for approximately 10 percent of all federal contract dollars with \$33 billion of purchases made through the program in fiscal year 2016.

Activities placing orders against a GSA Schedule contract must pay an Industrial Funding Fee (IFF) that reimburses GSA's Federal Acquisition Service (FAS) for the costs of operating the FSS program. FAS recoups its operating costs from ordering activities (*i.e.*, customers) as set forth in 40 U.S.C. 321: Acquisition Services Fund. Net operating revenues generated by the IFF are also applied to fund initiatives benefitting other authorized FAS programs, in accordance with 40 U.S.C. 321. The IFF, currently set at 0.75 percent, is included in the order price, so when a vendor is paid for an FSS order, it is also collecting the IFF. Collection is similar to a state sales tax, where a customer pays the tax due to a merchant, and then the merchant remits the taxes collected to the state government.

GSA requires vendors to report their FSS sales each quarter so it can determine the amount of IFF the vendors have collected from customers, and therefore must remit to GSA. However, GSA also uses this information for other purposes, including budgeting, determining whether vendors have met the

minimum sales requirement,¹ evaluating the program's performance, and monitoring small business participation.

Vendor reporting and remittance requirements are set forth in General Services Administration Acquisition Regulation (GSAR) clause 552.238-74, Industrial Funding Fee and Sales Reporting, or Alternate I of that clause. While both clause versions govern how the IFF is calculated and remitted, the reporting requirements differ between the basic version and Alternate I:

Clause 552.238-75: Basic Version: This version requires vendors to report their FSS contract sales to GSA once a quarter. GSA then calculates the IFF due based on the total amount of sales reported, and the vendor must remit that amount within 30 days after the end of the quarter. The basic version of the clause applies to approximately 72 percent of GSA Schedule contracts.

Clause 552.238-75: Alternate I: While the basic version requires vendors to report their total FSS sales each quarter, Alternate I requires vendors to report the transactional data generated from orders each month. GSA then calculates the IFF due based on the transactional data reported, and the vendor must remit that amount within 30 days after the end of the quarter. Alternate I of the clause applies to FSS contracts participating in the Transactional Data Reporting pilot. The pilot commenced on June 23, 2016 and will run for at least a year before substantial changes are considered. Approximately 28 percent of GSA Schedule contracts are eligible to participate in the pilot.

Since the reporting requirements vary by the two versions of clause 552.238-74, separate Paperwork Reduction Act information collections have been established for each version. The information collection associated with OMB control number 3090-0306, which expires on 8/31/2019, applies to Alternate I. This information collection (OMB control number 3090-0121) applies to the basic version of the clause.

Information Collection Changes and Updates

- The population of vendors subject to this information collection is smaller than the previous version, as FSS contracts eligible to participate in the Transactional Data Reporting pilot

¹ The FSS Contract Sales Criteria clause requires vendors to have at least \$25,000 in sales over the first two years of a contract and then \$25,000/year in sales for each year thereafter. Vendors that have not satisfied the minimum sales requirement are subject to cancellation in accordance with GSAR clause 552.238-73 *Cancellation*.

(approximately 28 percent of all GSA Schedule contracts) are now included under OMB control number 3090–0306.

• Previous justifications for this information collection limited the burden to the amount of time needed for vendors to input sales data in the 72A Reporting System and remit IFF payments. However, GSA now recognizes recordkeeping, quality assurance, reporting, and remittance should be included in the burden estimates. Since recordkeeping and quality assurance are the largest burden drivers for both vendors and the Government, the burden estimates for both the public and Government have increased.

B. Annual Reporting Burden

Population Overview: The basic version of clause 552.238–74 is included in 14,306 contracts held by 12,254 vendors. This includes 1,128 new contracts awarded to 819 vendors.²

Cost Estimates: The estimated cost burden for respondents was calculated by multiplying the burden hours by an estimated cost of \$68/hour (\$50/hour with a 36% overhead rate).³

Categorization of Vendors by Quarterly Sales Revenue: Sales reporting imposes a progressive burden — one that increases with a vendor’s sales volume. Quarterly reporting times will increase with a vendor’s applicable sales volume, as vendors with lower to no reportable sales will spend little time on quarterly reporting, while those with

more reportable sales with face a higher reporting burden.

GSA separated vendors into categories based on average quarterly sales volume⁴ in order to account for the differences in reporting burden. These categories are:

- Category 1: No sales activity (average quarterly sales of \$0)
- Category 2: Average quarterly sales between \$0 and \$60,000
- Category 3: Average quarterly sales between \$60,000 and \$600,000
- Category 4: Average quarterly sales between \$600,000 and \$3 million
- Category 5: Average quarterly sales over \$3 million

The distribution of vendors by sales category is as follows:

FSS AND VENDORS BY SALES CATEGORY

	FSS vendors (count)	FSS vendors (percentage)
Category 1	4,217	34
Category 2	4,020	33
Category 3	2,768	23
Category 4	970	8
Category 5	279	2
Total	12,254	100.00

Automated vs. Manual Reporting Systems: Vendors subject to these clauses must create systems or processes to produce and report accurate data. Generally, vendors will use automated or manual systems to identify the quarter’s reportable sales. An automated system is one that relies on information technology, such as an accounting system or data management software, to identify and compile reportable data. These systems can tremendously streamline the reporting process but require upfront configuration to perform the tasks, such as coding the sales types to be retrieved. Conversely, a manual system is one that incorporates little to no automation and instead relies on personnel to manually identify and

compile the reportable data. An example of a manual system would be an accountant reviewing invoices to identify the reportable data and then transferring the findings to a spreadsheet. In contrast to automation, a manual system requires relatively little setup time but the reporting effort will generally increase with the vendor’s sales volume.

The likelihood of a vendor adopting an automated system increases with their applicable sales volume. Vendors with little to no reportable data are unlikely to expend the effort needed to establish an automated reporting system since it will be relatively easy to identify and report a limited amount of data. In fiscal year 2015, 34 percent of

FSS vendors subject to this collection reported \$0 sales, while another 33 percent reported average quarterly sales between \$1 and \$60,000 per quarter. However, as a vendor’s applicable average quarterly sales increase, they will be increasingly likely to establish an automated system to reduce the quarterly reporting burden. Consequently, vendors with higher reportable sales will likely bear a higher setup burden to create an automated system, or absorb a high quarterly reporting burden if they choose to rely on manual reporting methods.

The following chart depicts the likelihood of the population of vendors adopting manual and automated reporting systems:

**VENDORS BY REPORTING SYSTEM TYPE
(Manual vs. Automated)**

	Manual system (vendor percentage)	Automated system (vendor percentage)	Manual system (vendor count)	Automated system (vendor count)
Category 1	100	0	4,217	0
Category 2	100	0	4,020	0

² These are approximations based on FY2015 data. The number of vendors equals the number of unique Data Universal Numbering System (DUNS) numbers, which are assigned to business entities.

³ The 36% overhead rate was used in reference Office of Management and Budget (OMB) Circular

No. A–76. Circular A–76 requires agencies to use standard cost factors to estimate certain costs of government performance. These cost factors ensure that specific government costs are calculated in a standard and consistent manner to reasonably reflect the cost of performing commercial activities with government personnel. The standard cost

factor for fringe benefits is 36.25%; GSA opted to round to the nearest whole number for the basis of its burden estimates.

⁴ Average quarterly sales volume was computed by taking a vendor’s total annual sales volume and dividing it by 4. All sales data is from FY2015.

VENDORS BY REPORTING SYSTEM TYPE—Continued
(Manual vs. Automated)

	Manual system (vendor percentage)	Automated system (vendor percentage)	Manual system (vendor count)	Automated system (vendor count)
Category 3	90	10	2,491	277
Category 4	50	50	485	485
Category 5	10	90	28	251
Total Vendor Count by System Type			11,241	1,013
Vendor Percentage by System Type			92	8

Initial Setup: Vendors with active FSS contracts already have procedures in place to meet these longstanding reporting requirements. However, new FSS vendors will absorb a one-time setup burden to establish reporting systems. The estimated setup time varies between automated and manual reporting systems. Vendors implementing a manual system must acclimate themselves with the new reporting requirements and train their staff as accordingly, while those with automated systems must perform these tasks in addition to configuring information technology resources. GSA is attributing the setup burden by vendor, not by contracts, because a

vendor holding multiple contracts subject to this rule will likely use a single reporting system. GSA estimates the average one-time setup burden is 8 hours for vendors with a manual system and 40 hours for those with an automated system. GSA also attributes the same system type probabilities (manual system 92%, automated system 8%) to the population of new vendors. These estimates apply to the 819 vendors awarded FSS contracts in fiscal year 2015. *Quarterly Reporting:* Vendors are required to report sales within 30 calendar days after the end of each quarter. The average reporting times vary by system type (manual or

automated) and by sales categories. GSA estimates vendors using a manual system will have average quarterly reporting times ranging from 15 minutes (0.25 hours) per quarter for vendors with \$0 sales, to an average of 8 hours per quarter for vendors with quarterly sales over \$3 million. On the other hand, GSA projects vendors with automated systems will have reporting times of 2 hours per quarter, irrespective of quarterly sales volume, as a result of efficiencies achieved through automated processes. The following table shows GSA's projected quarterly reporting times per sales category and system type.

QUARTERLY REPORTING HOURS BY SYSTEM TYPE AND CATEGORY

	Manual systems	Automated systems
Category 1	0.25	2.00
Category 2	1.00	2.00
Category 3	2.00	2.00
Category 4	4.00	2.00
Category 5	8.00	2.00

Annualized Public Burden Estimates

The burden estimates consist of quarterly reporting times for all 12,254 participating vendors and a one-time setup burden for the 819 new vendors:

Quarterly Reporting

Annual Burden (Hours): 56,983.
Annual Burden (Cost): \$3,874,817.

Initial Setup

Annual Burden (Hours): 8,718.
Annual Burden (Cost): \$592,846.

Total Information Collection Burden

Number of Respondents: 12,254.
Response per Respondent: 4.
Total Annual Responses: 49, 016.
Hours Per Response: 1.3404.
Total Burden (Hours): 65,701.
Annual Burden (Cost): \$4,467,663.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary and whether it

will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202-501-4755. Please cite OMB Control No. 3090-0235, Price Reductions Clause, in all correspondence.

Jeffrey A. Koses,
Director, Office of Acquisition Policy, Office of Government-wide Policy.

BILLING CODE 6820-61-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day-17-16BGH]

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The notice for the proposed information collection is published to obtain comments from the public and affected agencies.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address any of the

following: (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) Enhance the quality, utility, and clarity of the information to be collected; (d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and (e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639-7570 or send an email to omb@cdc.gov. Written comments and/or suggestions regarding the items contained in this notice should be directed to the Attention: CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395-5806. Written comments should be received within 30 days of this notice.

Proposed Project

Canine Leptospirosis Surveillance in Puerto Rico—Existing Collection in use without an OMB Control Number—National Center for Emerging and Zoonotic Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC) Bacterial Special Pathogens Branch (BSPB) requests a two-year approval of data collection tools used for active surveillance of canine leptospirosis in Puerto Rico. Active surveillance will allow for the collection of prospective data on acute cases to determine the incidence and

distribution of leptospirosis in dogs, assess risk factors for infection, characterize circulating *Leptospira* serovars and species, assess applicability of vaccines currently in use based on serovar determination, and assess rodent, livestock, and wildlife reservoirs of leptospirosis based on infecting serovars found in dogs. Findings from this study will aid in the development of evidence-based, targeted interventions for the prevention of canine leptospirosis, be used to focus human leptospirosis surveillance efforts, and guide future investigations on leptospirosis in humans and animals in Puerto Rico.

The information collection for which approval is sought is in accordance with BSPB’s mission to prevent illness, disability, or death caused by bacterial zoonotic diseases through surveillance, epidemic investigations, epidemiologic and laboratory research, training and public education. Authorizing Legislation comes from Section 301 of the Public Health Service Act (42 U.S.C. 241). Successful execution of BSPB’s public health mission requires data collection activities in collaboration with the state health department in Puerto Rico and with local veterinary clinics and animal shelters participating in the study.

Researchers will collect information on dogs that meet the study case definition for a suspect case of canine leptospirosis seen at participating veterinary clinics and shelters (sites) throughout Puerto Rico. Examples of information collected about the dog include the dog’s signalment, risk factors, clinical signs and symptoms, laboratory results, treatment, and clinical outcome. In addition, basic information about participating clinics and shelters such as site capacity, available resources, vaccination practices, and origin of dogs will also be collected to enhance data analysis and aid in study management.

BSPB will not directly collect the information. Veterinary staff including veterinarians, assistants, and

administrative staff will record the information onsite using paper forms by interviewing dog owners, and reviewing medical and administrative records, as necessary. BSPB and Puerto Rico Department of Health study coordinators will maintain the collected information in an electronic database.

BSPB estimates involvement of 26 veterinarians and their staff, and a maximum of 624 responses from owners of enrolled dogs. The enrollment questionnaire is completed once in the beginning of the study while the log sheet and case questionnaires will be completed for each enrolled suspect case. The number of suspect leptospirosis cases can vary from 0 to 2 cases per month per location based on anecdotal reports from local veterinarians. Taking the highest possible response per month, the number of responses per form for the log sheet and case questionnaire is calculated by multiplying 2 cases/month with 12 months giving a total of 24 responses per form for each veterinarian. The total number of veterinarians is not expected to exceed 26 (the maximum number of participating sites).

A minimum of 385 responses from dog owners is needed based on sample size calculation. However, extra clinics were enrolled to ensure that the sample size is met in the event that some clinics withdraw from the study or if fewer numbers of suspect leptospirosis cases are enrolled at the clinics. Given this, a maximum of 624 responses (26 clinics × 24 responses/clinic) are calculated for the burden to the general public (dog owners). Although it is unlikely the maximum number of responses will be reached, the total number of dog owners will not exceed 624.

This information collection will not impose a cost burden on the respondents beyond that associated with their time to provide the required data.

The total annualized burden for this information collection is estimated to be 168 hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Veterinarian	Enrollment Questionnaire	26	1	5/60
	Log Sheet	26	24	1/60
	Case Questionnaire	26	24	10/60
General Public (Dog owner)	Case Questionnaire	624	1	5/60

**DEPARTMENT OF HEALTH AND
 HUMAN SERVICES**

**Administration for Children and
 Families**

**Proposed Information Collection
 Activity; Comment Request**

Title: Pathways for Advancing Careers and Education (PACE): Third Follow-Up Data Collection.

OMB No.: 0970-0397.

Description: The Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS), is proposing a data collection activity as part of the Pathways for Advancing Careers (PACE) evaluation. PACE is an evaluation of nine promising career pathways strategies to promote education, employment, and self-sufficiency. The major goal of PACE is to increase the

empirical knowledge about the effectiveness of programs for low-income individuals and families to achieve educational credentials, attain employment, and advance to positions that enable self-sufficiency.

PACE is one project within the broader portfolio of research that the ACF Office of Planning, Research, and Evaluation (OPRE) is utilizing to assess the success of career pathways programs and models. In addition to PACE, this strategy includes a multi-pronged research and evaluation approach for the Health Profession Opportunity Grants (HPOG) Program to better understand and assess the activities conducted and their results. In order to maximize learning across this portfolio, survey development for the HPOG and PACE baseline and follow up surveys has been coordinated, and the majority of the data elements collected in these surveys are similar. (See OMB Control #0970-0394 for HPOG data collection.)

Three data collection efforts have been approved for PACE: One for baseline data collection (approved November 2011); a second for data collection activities to document program implementation, data collection activities for an initial follow-up survey of participants administered

approximately 15 months after random assignment, and data collection through in-depth interviews for a small sample of study participants (approved August 2013); and a third for a second follow-up survey of participants administered 36 months after random assignment (approved December 2014).

This **Federal Register** Notice provides the opportunity to comment on a proposed new information collection activity for PACE—a third follow-up survey for PACE participants approximately 72 months after program enrollment. The purpose of the survey is to follow-up with study participants to document their education and training experiences; employment experiences including their advancement in their career; economic well-being; student debt and repayment status; and parenting practices and child outcomes for participants with children.

Previously approved collection activities under 0970-0397 will continue under this new request, specifically the 36-Month Follow-Up Survey and Follow-Up Survey Contact Information Update Letters.

Respondents: Individuals enrolled in the PACE study at programs selected for long-term follow-up.

ANNUAL BURDEN ESTIMATES

[This information request is for a three-year period]

Instrument	Total number of respondents	Annual number of respondents	Number of responses per respondent	Average burden hours per response	Annual burden hours
72-Month Follow-Up Survey	3,600	1,200	1	0.75	1,125.

Estimated Total Annual Burden Hours: 1,125.

In compliance with the requirements of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Planning, Research, and Evaluation, 330 C Street SW., Washington, DC 20201, Attn: OPRE Reports Clearance Officer. Email address: OPREinfocollection@acf.hhs.gov. All requests should be identified by the title of the information collection.

The Department specifically requests comments on (a) whether the proposed collection of information is necessary

for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Mary Jones,
ACF/OPRE Certifying Officer.

BILLING CODE 4184-09-P

**DEPARTMENT OF HEALTH AND
 HUMAN SERVICES**

**Administration for Children and
 Families**

**Statement of Organization, Functions,
 and Delegations of Authority**

AGENCY: Administration for Children and Families, HHS.

ACTION: Notice.

SUMMARY: Statement of Organizations, Functions, and Delegations of Authority. The Administration for Children and Families (ACF) and the National Treasury Employees Union (NTEU) have renewed the ACF Labor Management Committee Charter.

FOR FURTHER INFORMATION CONTACT: Benjamin Goldhaber, Deputy Assistant Secretary for Administration, 330 C Street SW., Washington, DC 20201, (202) 795-7790.

The ACF Labor Management Committee Charter is being published as follows:

Cooperation Agreement and Charter for the Labor Management Committee (LMC) the Administration for Children and Families (ACF) and National Treasury Employees Union (NTEU)

The Administration for Children and Families (ACF) and the National Treasury Employees Union (NTEU) jointly establish the ACF/NTEU Labor Management Committee (Committee or LMC). The parties recognize that a strong relationship between labor and management as true and equal partners is essential in order for ACF to continue to deliver high quality human services to the American people as well as continue to recognize and value its employees and their union representation. This cooperative relationship envisions the open sharing of information at the earliest pre-decisional stage thereby engendering mutual trust and respect.

Purpose and Objectives

The Committee's goal is to establish an ACF/NTEU labor-management culture that fosters the full development and utilization of employees' skills, knowledge, expertise and capabilities through cooperative dialogue and endeavors with ACF employees and their union representative.

In pursuit of this goal, the Committee sets forth the following objectives:

- Focus on ACF mission achievement by serving the public interest first;
- Promote a quality workplace through improved working conditions and enhanced working relationships;
- Provide a communication and information sharing channel for all bargaining-unit employees through their union representatives;
- Enhance and establish policy and program improvement initiatives through pre-decisional involvement of NTEU without regard to whether those matters are negotiable subjects of bargaining under 5 U.S.C. § 7106;
- Make a good-faith effort to resolve issues concerning proposed changes in conditions of employment as it relates to numbers, types, and grades of employees and positions assigned to any organizational subdivision, work product, or tour of duty; and the technology, methods, and means of performing work;
- Identify and target mutual interests and shared problems and craft solutions;
- Respect each other as equal partners in order to address issues from a problem-solving, interest based, and cooperative perspective;
- Promote cooperative labor-management working relationships across the Agency; and
- Provide a forum from which to build mutual trust, respect, and understanding between the partners.

Scope

The ACF LMC will implement the purposes and objectives on which it is founded by:

- Identifying issues impacting ACF's mission, labor-management relations, and

others of mutual interest to committee members and providing proposed recommendations to ACF and NTEU leadership;

- Discussing issues and developing proposed recommendations on items referred to the Committee by ACF or NTEU leadership;
- Exchanging facts and information about agency-wide issues affecting management, labor and mission achievement, and serving as a forum for discussion of such issues; and
- Promoting and facilitating labor-management cooperation throughout ACF, including cooperative relationships at all appropriate levels.

The Parties recognize that although the work of the Committee may reduce the need for formal bargaining, the discussion of issues by the Committee does not relieve the Agency of its bargaining obligations under the Federal Labor-Management Relations Statute (the Statute), absent explicit agreement by the Union.

Principles

1. ACF allows employees through their union representatives to have pre-decisional involvement in workplace matters to the fullest extent practicable without regard to whether those matters are negotiable subjects of bargaining pursuant to 5 U.S.C. § 7106. Pre-decisional involvement takes place before the bargaining process.

2. The basic principles that underlie pre-decisional involvement are as follows:

- a. The pre-decisional process begins early: as soon as management identifies an issue or problem that it intends to address but before the scope of the problem has been defined or potential solutions are evaluated.
- b. Information is shared freely during the entire process.
- c. There is an understanding of confidentiality.
- d. The parties use interest-based problem solving.
- e. The parties must have a high degree of commitment to the process and to achieving their shared goals.

3. The Committee is responsible for reaching a common understanding on the structure of their pre-decisional involvement process.

4. Pre-decisional involvement does not waive management's statutory right to make decisions under 5 U.S.C. § 7106, nor does it waive the NTEU's right to engage in bargaining prior to implementation consistent with 5 U.S.C. § 7106. Either party retains the right to reject any recommendations and/or proposed agreements arrived at during discussions. It is understood that no agreement will become final and binding until the parties have signed a written agreement to memorialize the terms. Pre-decisional involvement may result in an agreement on an issue, which should be memorialized in a Memorandum of Understanding (MOU) that eliminates the need for further bargaining on the matter. Agency head review is required for any MOU that the parties propose.

5. ACF recognizes that bargaining unit employees represented by NTEU are an essential source of ideas and information

about the realities of achieving the ACF's mission. Their input generated through the Committee will assist management in making better informed decisions before making changes in working conditions that affect them. It is the intent of the parties that collaboration will result in less formal bargaining and/or fewer issues that must be referred to the collective bargaining process.

Structure

Composition

1. *Membership:* The Committee will consist of eight members, four NTEU representatives and four management representatives. All members of the Committee must be current and active employees of ACF. In addition, an Executive Secretary will be appointed by the Co-Chairs to perform administrative duties as directed by the Committee. The ACF Deputy Assistant Secretary for Administration and the NTEU National President, or their designees, will be considered ex officio members of the Committee. NTEU representatives will be appointed by the NTEU National President and management representatives will be appointed by the ACF Deputy Assistant Secretary for Administration or his/her designee. The parties will provide the names of appointed committee members and alternates as soon as possible, but no later than 30 days from the date of execution of this Charter. In the event that a committee member is no longer able to serve, a replacement member will be appointed as soon as possible, but no later than 30 days after the original committee member resigns. NTEU and ACF may each appoint one alternate. Alternates can participate fully in discussions but not in decisions. NTEU's representatives will be allocated appropriate official time to prepare for and participate in in the Committee, to include travel time to and from each meeting.

2. *Co-Chairs:* NTEU and ACF will each appoint a Committee Co-Chair for a term to be established individually by each entity.

3. *Guests:* NTEU and ACF may each invite two non-member guests per committee meeting. Guests may provide information and their individual views to the Committee and may fully participate in committee discussions, but will not be involved in the decision making process of the Committee and shall not be involved in making final recommendations to ACF management. Guests may vary per meeting, and may include, but are not limited to, individuals from NTEU's national office, retired/former federal government employees, and the Department's National Labor Relations Office.

Decision Making: All Committee members have equal status during Committee deliberations. The Committee has authority to recommend action to ACF management and NTEU. However, the Committee can only make decisions regarding recommendations when a quorum is present. A quorum exists when at least three representatives from labor and three representatives from ACF are present. When there is no quorum, meetings may still be held to discuss issues, however no decisions may be made. All decisions must be made by consensus. If consensus is

not reached, each party may use its statutory and other rights as specified in the "Preservation of Rights" section below. This decision making process will be evaluated by the Committee after one full year of its operation.

Meeting Schedule and Logistics: The Committee will meet on a quarterly basis or more frequently by consensus of its members. The Committee will normally meet at ACF Central Office in Washington, DC, but may also meet at another location by consensus. If a Committee member is unable to physically attend a meeting, he/she may participate by phone or video teleconferencing. The date and time for any meetings will be established by mutual agreement. Committee meetings may be held in conjunction with other meetings where it is deemed cost effective and there is consensus.

Working Groups: The Committee has the authority to form workgroups that may include individuals who are not members of the Committee. Any such workgroups will be given their charge and/or responsibilities from the LMC in writing. Non-Committee member bargaining unit participants on such groups will be appointed by NTEU and will be provided appropriate official time to participate in workgroup activities.

Support: The Committee will use the services of a facilitator trained in interest-based bargaining techniques as needed. The appointed Executive Secretary will provide administrative support to the Committee. Such support shall include creation and dissemination of meeting agenda and minutes, announcements of meetings, and other matters as determined by the Committee. The Agency will make available the use of video and telephone conferencing for the participation of all committee members at meetings. The Agency will provide meeting rooms for LMC meetings.

Participation: The Agency encourages the use of video and telephone conferencing for the participation of those members who are domiciled outside the 50 mile radius of Washington, DC, and will provide the necessary equipment to facilitate the process. Union representatives will be granted official time for preparation and participation in the meetings, pursuant to Article 10 of the Collective Bargaining Agreement. The Agency will pay for all reasonable local travel expenses, namely transportation and parking. For those participants domiciled outside the 50 mile radius, the Agency agrees to reimburse the Union representatives 50 percent of reasonable travel expenses, including transportation, lodging, and per diem.

In the interest of facilitating the working relations among the members, the Agency agrees to assume the full costs associated with travel, including transportation, lodging and per diem for participants for the first scheduled meeting of the Committee. For all subsequent meetings, the Agency will reimburse the Union representatives for 50 percent as stated above.

Agenda Development and Dissemination: The LMC's potential agenda items will be submitted to the Co-Chairs who will mutually establish a formal agenda for the

next LMC meeting. The formal agenda will be distributed to all LMC members at least three work days prior to the next LMC meeting. For issues requiring a decision by the LMC, all proposals or related materials will be distributed to the LMC members as soon as possible but no later than seven work days prior to the meeting at which the decision will need to be made.

Communication: Final, approved minutes of the Committee will be disseminated and made available to all ACF employees via methods determined by the Committee.

Evaluation

The Committee will evaluate its progress on an annual basis. It will determine whether to renew its procedures and/or to make changes in any aspect of the LMC.

Preservation of Rights

Cooperation is not intended to supplant the decision-making authority, or to usurp the responsibility of agency management, but to further involve ACF employees in developing ACF decisions through the active and systematic participation of NTEU and those it represents who perform ACF's work. This LMC is based on the belief that NTEU participation in ACF decision-making will promote decisions of such a nature that the need for formal bargaining will be reduced and, where bargaining becomes necessary, will inform and facilitate the negotiations.

Accordingly, subject to statute, executive orders, and the collective bargaining agreement, ACF reserves the right to determine whether to implement recommendations arising from the cooperation endeavor, and NTEU reserves the right to bargain concerning the substance, impact and implementation of final ACF decisions prior to implementation. The ACF recognizes its statutory, regulatory, and/or contractual obligations to provide notification to NTEU and to bargain.

Effective Date, Duration, and Modifications

This LMC shall be instituted upon the date the parties have signed the Charter. The partners may amend or supplement this Agreement at any time upon consensus. This Agreement may be terminated by either of the parties to this Agreement. Termination by either party shall be provided in writing and shall be considered effective exactly 30 calendar days after receipt by the recipient party. Notification of termination shall be sent out in a written notice to all ACF staff within 10 days of the termination and shall be published in the **Federal Register** within 30 days of the termination.

On behalf of NTEU and ACF, the undersigned execute this Agreement on this 30th day of December, 2016, by Anthony Reardon, NTEU National President; Mark H. Greenberg, Acting Assistant Secretary for Children and Families; and Benjamin Goldhaber, Deputy Assistant Secretary for Administration, Administration for Children and Families.

Dated: January 6, 2017.

Mark H. Greenberg,

Assistant Secretary for Children and Families.

BILLING CODE 4184-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2014-D-1524]

Repackaging of Certain Human Drug Products by Pharmacies and Outsourcing Facilities; Final Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is announcing the availability of a final guidance for industry entitled "Repackaging of Certain Human Drug Products by Pharmacies and Outsourcing Facilities." This guidance describes the conditions under which FDA does not intend to take action for violations of certain provisions of the Federal Food, Drug, and Cosmetic Act (the FD&C Act), when a State-licensed pharmacy, a Federal facility, or an outsourcing facility repackages certain human drug products.

DATES: Submit either electronic or written comments on Agency guidances at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2014-D-1524 for "Repackaging of Certain Human Drug Products by Pharmacies and Outsourcing Facilities." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the

electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: Sara Rothman, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 5197, Silver Spring, MD 20993, 301-796-3110.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a final guidance for industry entitled "Repackaging of Certain Human Drug Products by Pharmacies and Outsourcing Facilities." FDA regards repackaging as the act of taking a finished drug product from the container in which it was distributed by the original manufacturer and placing it into a different container without further manipulation of the drug. If a drug is manipulated in any other way, including if the drug is reconstituted, diluted, mixed, or combined with another ingredient, that act is not considered repackaging.

Repackaged drugs are generally not exempt from any of the provisions of the FD&C Act related to the production of drugs. For example, repackaged drugs are generally subject to the premarket approval, misbranding, adulteration, and drug supply chain security provisions of the FD&C Act, including section 505 (concerning new drug applications), section 502(f)(1) (concerning labeling with adequate directions for use), section 501(a)(2)(B) (concerning current good manufacturing practice (CGMP)), and section 582 (drug supply chain security requirements) (21 U.S.C. 355, 352(f)(1), 351(a)(2)(B), and 360eee-1).

Further, drugs that are repackaged are not subject to sections 503A and 503B of the FD&C Act (21 U.S.C. 353a and 353b). Therefore, drugs repackaged by state-licensed pharmacies, Federal

facilities, or outsourcing facilities are not eligible for the exemptions provided under those sections.

This guidance describes the conditions under which FDA does not intend to take action for violations of sections 505, 502(f)(1), 582, and, where specified in the guidance, section 501(a)(2)(B) of the FD&C Act, when a state-licensed pharmacy, Federal facility, or outsourcing facility repackages certain drug products.

In the **Federal Register** of February 19, 2015 (80 FR 8884), FDA issued a notice announcing the availability of the draft version of this guidance. The comment period on the draft guidance ended on May 20, 2015. FDA received approximately 625 comments on the draft guidance. In response to received comments or on its own initiative, FDA made several changes. For example, FDA removed from the guidance the condition concerning "anticipatory repackaging" (repackaging before the receipt of a patient-specific prescription) of no more than a 14-day supply. FDA made this change partly in response to comments indicating that pharmacies sometimes need to repackage more than a 14-day supply of repackaged drug products in advance of a prescription. FDA also revised the conditions concerning beyond-use-dates (BUDs) for repackaged drugs to reflect BUDs for compounded drugs in, as applicable, United States Pharmacopeia (USP) Chapter <795>, the USP's proposed revision to Chapter <797>, and FDA's guidance concerning current good manufacturing practice requirements for outsourcing facilities.

FDA received comments on the draft guidance from hospital organizations regarding the potential implications of the proposed policies in the draft guidance concerning patient-specific prescriptions for drugs repackaged for in-patient settings. The final guidance notes that FDA is considering the applicability of the policies described in this guidance to in-patient settings, including long-term care facilities and hospitals, and intends to address these issues in separate guidance.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). This guidance represents the current thinking of FDA on repackaging human drug products by pharmacies, Federal facilities, and outsourcing facilities. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

This guidance contains collections of information that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520). Under the PRA, Federal Agencies must obtain approval from OMB for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3 and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, in the **Federal Register** of February 19, 2015, we gave interested persons 60 days to comment on the information collection provisions in the draft guidance (80 FR 8884 at 8885).

After publishing the 60-day notice requesting public comment, section 3507 of the PRA (44 U.S.C. 3507) requires Federal Agencies to submit the proposed collection to OMB for review and clearance. In compliance with 44 U.S.C. 3507, we will be submitting a proposed collection of information to OMB for review and clearance. FDA is issuing this guidance as final with portions of it subject to OMB approval of the collection of information and shaded gray. Those provisions that are shaded gray and subject to OMB approval will be final if the collection of information is approved. If the collection is approved, FDA will publish a notice in the **Federal Register** concerning OMB approval and providing an OMB control number for these provisions.

The guidance also references registration and adverse event reporting for outsourcing facilities. The collections of information for outsourcing facility registration have been approved by OMB under OMB control number 0910–0777. The collections of information for adverse event reporting by outsourcing facilities have been approved by OMB under OMB control number 0910–0800.

III. Electronic Access

Persons with access to the Internet can obtain the document at either <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm> or <http://www.regulations.gov>.

Dated: January 10, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2013–D–1543]

Nonproprietary Naming of Biological Products; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a guidance for industry entitled “Nonproprietary Naming of Biological Products.” The guidance describes our current thinking on the need for biological products previously and newly licensed under the Public Health Service Act (PHS Act) to bear nonproprietary names that include FDA-designated suffixes. Accordingly, we intend to designate nonproprietary names for originator biological products, related biological products, or biosimilar products which will include a core name and a distinguishing suffix that is devoid of meaning and composed of four lowercase letters. This guidance finalizes the draft guidance issued on August 28, 2015.

FDA is also announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Submit either electronic or written comments on Agency guidances at any time. Submit written comments on the collection of information by February 13, 2017.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, Attn: FDA Desk Officer, FAX: 202–395–7285, or emailed to aira_submission@omb.eop.gov. All comments should be identified with the OMB control number 0910–New and title “Nonproprietary Naming of Biological Products.” Also include the FDA docket number found in brackets in the heading of this document.

You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2013–D–1543 for “Nonproprietary Naming of Biological Products.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential

with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of this guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002, or the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: *Regarding the guidance:* Sandra Benton, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6340, Silver Spring, MD 20993-0002, 301-796-1042; or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New

Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993-0002, 240-402-7911. *Regarding the information collection:* FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North, 10A63, 11601 Landsdown St., North Bethesda, MD 20852, PRASStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled "Nonproprietary Naming of Biological Products." The guidance describes our current thinking on the need for biological products licensed under section 351(a) and (k) of the PHS Act (42 U.S.C. 262(a) and (k)) to bear a nonproprietary name that includes an FDA-designated suffix. Under this naming convention, the nonproprietary name designated for each originator biological product, related biological product, and biosimilar product will be a proper name that is a combination of the core name and a distinguishing suffix that is devoid of meaning and composed of four lowercase letters. The suffix format described in this guidance is applicable to originator biological products, related biological products, and biosimilar products previously licensed and newly licensed under section 351(a) or 351(k) of the PHS Act. FDA is continuing to consider the appropriate suffix format for interchangeable biological products.

This naming convention will facilitate pharmacovigilance for originator biological products, related biological products, and biosimilar products containing related drug substances when other means to track a specific dispensed product are not readily accessible or available. Distinguishable nonproprietary names will also facilitate accurate identification of these biological products by health care practitioners and patients. Further, distinguishing suffixes should help minimize inadvertent substitution of any such products that have not been determined to be interchangeable. Application of the naming convention to biological products licensed under the PHS Act should (1) encourage routine use of designated suffixes in ordering, prescribing, dispensing, recordkeeping, and pharmacovigilance practices and (2) avoid inaccurate perceptions of the safety and effectiveness of biological products based on their licensure pathway, as described in detail in the guidance.

The guidance provides information to industry, the health care community, other regulatory agencies, and the

public on FDA's rationale for this naming convention. The guidance is also intended to assist applicants and application holders in proposing the suffix to be incorporated into an originator biological product, related biological product, or biosimilar product's nonproprietary name.

In the **Federal Register** of August 28, 2015 (80 FR 52296), FDA announced the availability of the draft guidance of the same title. FDA received numerous comments on the draft guidance, and those comments were considered as the guidance was finalized. In the notice announcing the draft guidance, FDA asked about the benefits and challenges of designating (1) a suffix that is devoid of meaning versus meaningful (*e.g.*, derived from the name of the license holder) and (2) a suffix that is unique to each biological product versus shared by each biological product manufactured by that license holder. FDA determined that the suffix format that best achieves the goals described in the guidance is a suffix that is devoid of meaning and not shared by each biological product manufactured by that license holder.

FDA intends to apply a naming convention to interchangeable products that will feature a core name and a suffix included in the proper name; however, FDA is continuing to consider the appropriate format of the suffix for these products.

This guidance also will apply to those biological products that are approved under the Federal Food, Drug, and Cosmetic Act (the FD&C Act) on or before March 23, 2020, when such products are deemed to be licensed under section 351 of the PHS Act on March 23, 2020 (section 7002(e)(2) through (e)(4) of the Biologics Price Competition and Innovation Act of 2009 (BPCI Act)). FDA intends to provide additional guidance regarding administrative issues associated with the transition (including the process for implementing the naming convention described in this guidance).

For the purposes of the guidance, unless otherwise specified, references to biological products include biological products licensed under the PHS Act, such as therapeutic protein products, vaccines, allergenic products, and blood derivatives, and do not include certain biological products that also meet the definition of a device in section 201(h) of the FD&C Act (21 U.S.C. 321(h)), such as in vitro reagents (*e.g.*, antibody to hepatitis B surface antigen, blood grouping reagents, hepatitis C virus encoded antigen) and blood donor screening tests (*e.g.*, HIV and hepatitis C). Also, for the purposes of the

guidance, unless otherwise specified, references to biological products do not include products for which a proper name is provided in the regulations (e.g., 21 CFR part 640) or to certain categories of biological products for which there are well-established, robust identification and tracking systems to ensure safe dispensing practices and optimal pharmacovigilance (e.g., ISBT 128 for cord blood products and blood components).

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on nonproprietary naming of biological products. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

II. Paperwork Reduction Act of 1995, Nonproprietary Naming of Biological Products, OMB Control Number 0910—New

The guidance describes FDA's current thinking on the need for biological products licensed under the PHS Act to bear a nonproprietary name that includes an FDA-designated suffix. There is a need to clearly identify biological products to facilitate pharmacovigilance and safe use. Accordingly, for originator biological products, related biological products, or biosimilar products licensed under the PHS Act, FDA intends to designate a nonproprietary name that includes a core name and a distinguishing suffix. This naming convention is applicable to biological products previously licensed and newly licensed under section 351(a) or 351(k) of the PHS Act.

The final guidance proposes a new collection of information by requesting that applicants and application holders propose a suffix composed of four lowercase letters for use as the suffix included in the proper name. The proper name is designated by FDA in

the license for biological products licensed under the PHS Act. The suffix will be incorporated in the nonproprietary name of the product. The guidance recommends that applicants and application holders submit up to 10 proposed suffixes, in the order of the applicant's preference. FDA also recommends including supporting analyses demonstrating that the proposed suffixes meet the factors described in the final guidance for FDA's consideration.

As indicated in table 1, we estimate that we will receive a total of approximately 40 requests annually for the proposed proper name for biological products submitted under section 351(a) of the PHS Act and six requests annually for the proposed proper name for biological products submitted under section 351(k) of the PHS Act. The average burden per response (hours) is based on the Agency's experience with similar information collection requirements for applicants to create and submit suffix proposals to FDA.

As noted, in the **Federal Register** of August 28, 2015, FDA published a 60-day notice requesting public comment on the proposed collection of information. Most comments supported FDA's proposal to designate a suffix. Many comments suggested that a meaningful, distinguishable suffix may help to improve pharmacovigilance, enhance safety, and facilitate identification between biological products. Some comments supported use of a random suffix to avoid creating an unfair advantage for specific manufacturers. Several comments stated that the current practices of FDA and non-FDA entities for identifying products is sufficient for the purpose of pharmacovigilance, and designation of a suffix is not needed. One comment stated that FDA's estimate of 6 hours to submit proposed suffixes is based only on the time needed to prepare the submission itself after the multiple suffixes have been selected. The comment further stated that because FDA suggests that each respondent submit three suggested suffixes for Agency consideration, the time needed to do an analysis of each suffix would

exceed 720 hours per suffix (based on their own company experience) or 2,160 hours total for the three suffixes. The commenter subsequently submitted additional information to clarify how the estimates were calculated.

Response: FDA's estimate of the annual reporting burden results from information that would be submitted to FDA by applicants in order to facilitate FDA's designation of a suffix as part of the proper name of a biological product. We estimated that sponsors would spend 2 hours completing the submission for each of the three suffixes, resulting in 6 hours as the average burden. This estimate for submission of the requested information is based on the average number of responses per respondent and the average burden per response over a 3-year period. FDA understands that there is a certain amount of research and other costs that an applicant might encounter in analyzing any proposed name for a biological product. FDA also recognizes that the burden may be higher for some applicants and lower for other applicants based on a variety of factors specific to the applicant.

The comment suggests that it will take 720 hours to complete an analysis and submission for each suffix. We have considered the information provided in support of this estimate and believe the estimate is likely too high. Our original estimate of 6 hours was based on the Agency's familiarity with the time it would take to make similar submissions to FDA. However, as identified by the comment, FDA's original estimate failed to adequately account for the time spent on creating proposed suffixes. We have reconsidered our original estimate as a result of the comment, and we have revised our estimate to account for the burden to create and submit up to 10 proposed suffixes to FDA for designation. As indicated in table 1, we estimate an average burden of approximately 420 hours to account for creating and submitting multiple proposed suffixes.

FDA estimates the information collection burden as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN ¹

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Information for the Proposed Proper Name for Applicable Biological Products Submitted Under Section 351(a) of the PHS Act	20	2	40	420	16,800

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN ¹—Continued

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Information for the Proposed Proper Name for Applicable Biological Products Submitted Under Section 351(k) of the PHS Act	3	2	6	420	2,520
Total					19,320

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

This guidance also refers to previously approved collections of information found in FDA regulations. The collection of information related to the submission of a BLA under section 351(k) of the PHS Act (biosimilar products and interchangeable products) has been approved under OMB control number 0910–0719. The guidance also refers to a previously approved collection of information found in FDA regulations that is expected to change as a result of the guidance and the retrospective application of the naming convention. The collections of information in 21 CFR part 601 related to the submission of a biologics license application (BLA) and changes to an approved application have been approved under OMB control number 0910–0338. As a result of the guidance, the estimated number of additional responses for the annual burden for changes to an approved application under § 601.12 would be increased by approximately 25 responses.

FDA is issuing this final guidance subject to OMB approval of the collections of information. Before implementing the information collection provisions of the guidance, FDA will publish a notice in the **Federal Register** announcing OMB’s decision to approve, modify, or disapprove the collections of information, including OMB control number(s) for newly approved collections.

III. Electronic Access

Persons with access to the Internet may obtain the guidance at <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, <http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, or <https://www.regulations.gov>.

Dated: January 10, 2017.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–N–3389]

Evaluation of the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates; Request For Scientific Data, Information, and Comments; Reopening of Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; reopening of comment period.

SUMMARY: The Food and Drug Administration (FDA or we) is reopening the comment period for the document requesting scientific data, information, and comments entitled “Evaluation of the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates” that appeared in the **Federal Register** of November 23, 2016 (81 FR 84595). In the document, we requested scientific data, information, and comments to help us determine whether a particular isolated or synthetic non-digestible carbohydrate should be added to our definition of “dietary fiber” for purposes of being declared as dietary fiber on a Nutrition Facts or Supplement Facts label. We also announced in the document the availability for comment of a scientific literature review document that we conducted that summarizes clinical studies associated with 26 specific isolated or synthetic non-digestible carbohydrates. We are taking this action in response to requests to allow interested persons additional time to submit comments.

DATES: Submit either electronic or written comments by February 13, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2016–N–3389 for “Evaluation of the Beneficial Physiological Effects of Isolated or Synthetic Non-Digestible Carbohydrates; Request for Scientific Data, Information, and Comments.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at

<http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” We will review this copy, including the claimed confidential information, in our consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Paula R. Trumbo, Center for Food Safety and Applied Nutrition (HFS-830), Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240-402-2579.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of November 23, 2016 (81 FR 84595), we published a document requesting scientific data, information, and comments that would help us evaluate the beneficial physiological effects to human health of isolated or synthetic non-digestible carbohydrate that are added to food. We requested such scientific data,

information, and comments to help us determine whether a particular isolated or synthetic non-digestible carbohydrate should be added to our definition of “dietary fiber” that is found in the Nutrition and Supplement Facts label final rule, which appeared in the **Federal Register** of May 27, 2016 (81 FR 33741). Only those isolated or synthetic non-digestible carbohydrates that meet the definition can be declared as a dietary fiber on a Nutrition and Supplement Facts label. The notice also announced the availability of a document entitled “Science Review of Isolated and Synthetic Non-Digestible Carbohydrates,” which summarizes a scientific literature review that we conducted of clinical studies associated with the 26 specific isolated or synthetic non-digestible carbohydrates. We provided a 45-day comment period that ended on January 9, 2017.

We have received requests to extend the period during which interested parties may submit scientific data, information, and comments regarding isolated or synthetic non-digestible carbohydrates generally and regarding our scientific literature review summary document specifically. The requests conveyed concern that the original 45-day comment period would not allow sufficient time to develop meaningful or thoughtful scientific data, information, or comments.

We have considered the requests but were unable to issue a notice extending the comment period before January 9, 2017. Consequently, we are reopening the comment period for an additional 30 days. Interested parties have until February 13, 2017, to submit scientific data, information, or comments to the docket. We believe that this action allows adequate time for interested persons to submit additional scientific data, information and comments.

Dated: January 10, 2017.

Leslie Kux,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2017-N-0086]

Suggestions, Recommendations, and Comments for Topics That May Be Considered by the Food and Drug Administration Combination Product Policy Council; Establishment of a Docket

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; establishment of docket; request for comments.

SUMMARY: The Food and Drug Administration (FDA) is establishing a docket to receive suggestions, recommendations, and comments for topics from interested parties, including academic institutions, regulated industry, patient representatives, and other interested organizations, on policy issues that may be considered by the FDA Combination Product Policy Council (Council). These comments will help the Agency identify and address combination product policy issues that need clarification through guidance, notice and comment procedures, or other means.

DATES: Submit either electronic or written comments by April 13, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the

manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2017-N-0086 for “Suggestions, Recommendations, and Comments for Topics That May Be Considered by the Food and Drug Administration Combination Product Policy Council.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/>

regulatoryinformation/dockets/default.htm.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Nina L. Hunter, Office of Medical Products and Tobacco (OMPT), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 2312, Silver Spring, MD 20993-0002, 301-796-6171, FAX: 301-847-8514, CombinationProductCouncil@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

In April 2016, FDA established the Council to ensure better coordination of combination product policy development and implementation across the Agency and consistent, predictable communication of combination product policy decisions to the public through guidance, notice and comment procedures, or other means.

Chaired by the Deputy Commissioner of OMPT, the Council provides a senior-level forum through which combination product policy issues can be raised, considered, developed, and implemented. Council members include the following senior leaders: The Center Directors and one representative from the Center for Biologics Evaluation and Research, Center for Drug Evaluation and Research, and Center for Devices and Radiological Health; the Office Director from the Office of Combination Products (OCP); and the Associate Commissioner for Special Medical Programs. Additional staff from the Centers and other FDA offices provide expertise as needed for specific combination product policy topics under consideration. While there are various other mechanisms available to raise issues for Agency consideration, by establishing this docket, FDA seeks to provide a forum for the public to recommend specific topics that should have direct, collective engagement and consideration by the Council. The Agency believes that this process will also further enhance transparency in FDA’s approach to policy development and implementation.

II. Range of Policy Issues To Be Considered

FDA envisions a variety of combination product policy topics that may be appropriate for consideration by the Council, which typically would meet one or more of the following criteria:

- A novel combination product policy issue requiring senior management input;
- An identical issue on which FDA seems to have taken inconsistent combination product policy positions;
- An existing combination product policy position that should be reconsidered in light of scientific or regulatory advances; or
- A combination product policy that may be triggered by a specific combination product, but that will be applicable to other combination products.

III. Establishment of a Docket and Request for Comments

The docket is being made available for public suggestions, recommendations, and comments relating to the combination product policy criteria identified in this document that may warrant consideration by the Council. Submissions should describe the following: (1) The combination product policy issue recommended for discussion (*e.g.*, clarifying previous advice or precedents on a specified combination product policy topic, reconciling apparently differing perspectives within FDA or between FDA and regulated industry on a specified combination product policy topic); (2) the rationale for doing so, including why it requires direct engagement by the Council; (3) recommendations on how the combination product policy issue could be addressed; and (4) existing policy documents (*e.g.*, final guidance) relevant to the combination product policy issue.

Note that combination product policy issues concerning any draft guidance or proposed rule should be submitted to the docket for that draft guidance or rulemaking; product-specific disputes should first be addressed through the appropriate appeals mechanism of the Center or other Agency component involved; and general recommendations for topics to address through guidance or rulemaking should be made to the Center, OCP, or other relevant Agency component through the mechanisms provided by that component.

The Agency will carefully consider all comments submitted. FDA generally will not respond directly to the person or organization submitting the

comment. In general, combination product policy decisions reached by the Council are communicated and implemented in accordance with FDA's good guidance practices regulation (21 CFR 10.115) or notice and comment procedures.

Dated: January 9, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2017-D-0040]

How To Prepare a Pre-Request for Designation; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled "How to Prepare a Pre-Request for Designation (Pre-RFD)." The purpose of this guidance is to explain the Pre-RFD process at the FDA Office of Combination Products (OCP), describe and help a sponsor understand the type of information that the sponsor should include in a Pre-RFD, and assist sponsors in obtaining a preliminary assessment from FDA through the Pre-RFD process. The Pre-RFD process is available to provide informal, non-binding feedback regarding the regulatory identity or classification of a human medical product as a drug, device, biological product, or combination product. In addition, this informal process provides information about a non-combination or combination product's assignment to the appropriate Agency Center (Center for Drug Evaluation and Research (CDER), Center for Devices and Radiological Health (CDRH), or Center for Biologics Evaluation and Research (CBER)) for premarket review and regulation. This draft guidance is not final nor is it in effect at this time.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment of this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by April 13, 2017.

Submit either written or electronic comments on this collection of information by March 14, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2017-D-0040 for "How to Prepare a Pre-Request for Designation (Pre-RFD); Draft Guidance for Industry." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be

made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit comments on information collection issues to the Office of Management and Budget in the following ways:

- Fax to the Office of Information and Regulatory Affairs, OMB, Attn: FDA Desk Officer, FAX: 202-395-7285, or email to oira_submission@omb.eop.gov. All comments should be identified with the title, "How to Prepare a Pre-Request for Designation (Pre-RFD); Draft Guidance for Industry."

Submit written requests for single copies of the draft guidance document entitled "How to Prepare a Pre-Request for Designation (Pre-RFD)" to the Office of Combination Products, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 5129, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your request, or fax your request to 301-847-8619. See the **SUPPLEMENTARY**

INFORMATION section for information on electronic access to the draft guidance.

FOR FURTHER INFORMATION CONTACT:

Leigh Hayes, Office of Combination Products, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 5129, Silver Spring, MD 20993-0002, or via email at combination@fda.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Since its establishment on December 24, 2002, OCP has served as a resource for sponsors at various stages of development of their product. Sponsors often seek OCP feedback on whether their medical product will be regulated as a drug, a device, a biologic, or a combination product, and which FDA medical product Center (CDER, CBER, or CDRH) will regulate it, if it is a non-combination product, or will have the primary jurisdiction for the premarket review and regulation of the product, if it is a combination product.

There are two ways that a sponsor can receive such feedback from OCP. One option is to submit an RFD to receive a formal, binding determination for the sponsor’s product with respect to classification and/or center assignment that may be changed under conditions specified in section 563 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360bbb-2) and 21 CFR 3.9 in the regulations. The RFD process is codified in 21 CFR part 3, and OCP has issued a guidance about this process (see “How to Write a Request for Designation” at <http://www.fda.gov/RegulatoryInformation/Guidances/ucm126053.htm>). A second more flexible option is for a sponsor to submit an inquiry to OCP to receive a preliminary jurisdictional assessment, which is not binding.

Many sponsors seek to utilize the flexibility of more approachable ways to interact with OCP and the medical

product Agency Centers to obtain feedback from the Agency before submitting a marketing application to FDA. Over time, these informal methods of obtaining feedback have become increasingly customary with sponsors, and for some, even preferable to the formal RFD process. Accordingly, FDA is enhancing the transparency and consistency of this process, which will now be called the “Pre-Request for Designation (Pre-RFD) Program.”

This draft guidance describes this structured process with clear recommendations for sponsors wishing to submit Pre-RFDs. It also provides the process for review of Pre-RFDs by FDA staff, the general timeframes for sponsors to receive feedback from OCP, and the process for scheduling teleconferences and meetings in relation to a Pre-RFD.

II. Significance of Guidance

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on how to prepare a Pre-RFD. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

III. Paperwork Reduction Act of 1995

Under the Paperwork Reduction Act (the PRA) (44 U.S.C. 3501–3502), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44

U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA’s functions, including whether the information will have practical utility; (2) the accuracy of FDA’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Draft Guidance for Industry; How To Prepare a Pre-Request for Designation (Pre-RFD)

This draft guidance describes how to prepare a Pre-RFD. The guidance provides recommendations regarding the information that should be submitted in a Pre-RFD request and procedures that should be followed for meetings or conference calls between OCP, the Centers, and industry representatives or sponsors.

The proposed collections of information are necessary to allow the Agency to receive Pre-RFD requests in order to implement this voluntary submission program.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN ¹

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response (in hours)	Total hours
Pre-RFD submissions	136	1	136	12	1,632
Pre-RFD meetings	136	1	136	1	136
Total					1,768

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

Respondents are product sponsors and industry representatives subject to FDA’s laws and regulations. FDA estimates that it will receive

approximately 136 Pre-RFDs annually. The Agency reached this estimate through its experience with the formal Request for Designation (RFD) program,

by reviewing the number of informal, pre-RFD inquiries from sponsors that the Agency received over the past 3 years. Based on FDA’s experience with

these informal, Pre-RFD inquiries, FDA expects the proposed Pre-RFD program to be utilized as a viable program in the future and expects that the number of Pre-RFDs will increase initially to approximately 180 submissions.

FDA estimates from past experience with informal Pre-RFD inquiries that the

complete process involved with preparing the Pre-RFD submission takes approximately 12 hours and an additional 1 hour for meetings.

This average is based upon estimates by FDA administrative and technical staff who are familiar with the information collection relating to

informal, Pre-RFD inquiries, who have consulted and advised sponsors and industry representatives on the information collection, and who have reviewed the documentation submitted.

Therefore, the total reporting burden hours is estimated to be 1,768 hours.

TABLE 2—ESTIMATED ANNUAL REPORTING BURDEN ¹

Number of respondents	Total burden hours annualized	Hourly wage rate	Total cost annualized
136	13	\$33.26	\$58,803.68

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

Assuming an hourly wage plus benefit rate of \$33.26,¹ the result is a cost of \$432.38 per respondent. The estimated submission cost of \$432.38 multiplied by 136 submissions per year equals \$58,803.68, which is the estimated aggregated industry reporting cost annualized.

This draft guidance also refers to previously approved information collections found in FDA regulations. The collections of information in 21 CFR part 3 are approved under OMB control number 0910-0523.

IV. Electronic Access

Persons with access to the Internet may obtain the document at <http://www.fda.gov/RegulatoryInformation/Guidances/ucm534661.htm>.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2016-D-4460]

Multiple Endpoints in Clinical Trials; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft

guidance for industry entitled “Multiple Endpoints in Clinical Trials.” This draft guidance provides sponsors and review staff with the Agency’s thinking about the problems posed by multiple endpoints in the analysis and interpretation of study results and how these problems can be managed in clinical trials for human drugs, including drugs subject to licensing as biological products. Most clinical trials performed in drug development contain multiple endpoints to assess the effects of the drug and to document the ability of the drug to favorably affect one or more disease characteristics. The purpose of this guidance is to describe various strategies for grouping and ordering endpoints for analysis and applying some well-recognized statistical methods for managing multiplicity within a study to control the chance of making erroneous conclusions about a drug’s effects.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by March 14, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a

third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2016-D-4460 for “Multiple Endpoints in Clinical Trials; Draft Guidance for Industry; Availability.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions*—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper

¹ Wage is based on the 2015 Bureau of Labor Statistic’s survey, National Industry Specific Occupational Employment and Wage Estimate, for standard occupational code 13-1041, compliance officer in pharmaceutical and medicine manufacturing (<http://www.bls.gov/oes/current/oes131041.htm>).

submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002; or the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Scott Goldie, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 21, Rm. 3557, Silver Spring, MD 20993-0002, 301-796-2055; or Stephen Ripley, Center for Biologics

Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993-0002, 240-402-7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled "Multiple Endpoints in Clinical Trials." This guidance describes various strategies for grouping and ordering endpoints for analysis and applying some well-recognized statistical methods for managing multiplicity within a study. FDA's International Conference on Harmonization (ICH) guidance for industry "E9 Statistical Principles for Clinical Trials" is a broad-ranging guidance that includes discussion of multiple endpoints. This draft guidance provides greater detail on the topic of multiple endpoints. The issuance of this draft guidance represents partial fulfillment of an FDA commitment under the Food and Drug Administration Amendments Act of 2007. (Title I of the Food and Drug Administration Amendments Act of 2007 (Pub. L. 110-85)). Under section XI (Expediting Drug Development) of the Prescription Drug User Fee Act (PDUFA) Performance Goals, FDA agreed to develop and publish for comment draft guidance on "Multiple Endpoints in Clinical Trials," and to complete the final guidance within one year of the close of the public comment period of the PDUFA Performance Goals (see <http://www.fda.gov/ForIndustry/UserFees/PrescriptionDrugUserFee/ucm119243.htm>).

Failure to account for multiplicity when there are several clinical endpoints evaluated in a study can lead to false positive conclusions regarding the effects of the drug. The regulatory concern regarding multiplicity arises principally in the evaluation of clinical trials intended to demonstrate effectiveness and support drug approval; however, this issue is important throughout the drug development process.

The focus of this draft guidance is control of the Type 1 error rate for the planned primary and secondary endpoints of a clinical trial so that the major findings are well supported. Multiplicity adjustments provide a means for controlling Type 1 error when there are multiple analyses of the drug's effects. The issues of multiplicity and methods to address them are illustrated in the draft guidance with examples of different study endpoints. Both the issues and methods that apply to multiple endpoints also apply to other

sources of multiplicity, including multiple doses, time points, or study population subgroups.

Once a trial is successful (demonstrates effectiveness or "wins" on the primary endpoint(s)), there are many other attributes of a drug's effects that may be described. Analyses that describe these other attributes of a drug can be informative and are often included in physician labeling. Such descriptive analyses are not the subject of this draft guidance and are not addressed in detail.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on multiple endpoints in clinical trials. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, <http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, or <http://www.regulations.gov>.

Dated: January 10, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2013-N-1496]

Agency Information Collection Activities; Proposed Collection; Comment Request; Food and Drug Administration Rapid Response Surveys (Generic Clearance)

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each

proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the use of rapid response surveys to obtain data on safety information to support quick turnaround decisionmaking about potential safety problems or risk management solutions from health care professionals, hospitals, and other user facilities (e.g., nursing homes, etc.); consumers; manufacturers of biologics, drugs, and medical devices; distributors; and importers, when FDA must quickly determine whether or not a problem with a biologic, drug, or medical device impacts the public health.

DATES: Submit either electronic or written comments on the collection of information by March 14, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your

comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2013-N-1496 for "Agency Information Collection Activities; Proposed Collection; Comment Request; Food and Drug Administration Rapid Response Surveys (Generic Clearance)." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, Three White Flint North, 10A63, 11601 Landsdown St., North Bethesda, MD 20852, PRASStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

FDA Rapid Response Surveys (Generic Collection), OMB Control Number 0910-0500—Extension

Section 505 of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 355), requires that important safety information relating to all human prescription drug products be made available to FDA so that it can take appropriate action to protect the public health when necessary. Section 702 of the FD&C Act (21 U.S.C. 372) authorizes investigational powers to FDA for enforcement of the FD&C Act. Under section 519 of the FD&C Act (21 U.S.C. 360i), FDA is authorized to require manufacturers to report medical device-

related deaths, serious injuries, and malfunctions to FDA; to require user facilities to report device-related deaths directly to FDA and to manufacturers; and to report serious injuries to the manufacturer. Section 522 of the FD&C Act (21 U.S.C. 360l) authorizes FDA to require manufacturers to conduct postmarket surveillance of medical devices. Section 705(b) of the FD&C Act (21 U.S.C. 375(b)) authorizes FDA to collect and disseminate information regarding medical products or cosmetics in situations involving imminent danger to health or gross deception of the consumer. Section 903(d)(2) of the FD&C Act (21 U.S.C. 393(d)(2)) authorizes the Commissioner of Food and Drugs to implement general powers (including conducting research) to carry out effectively the mission of FDA. These sections of the FD&C Act enable FDA to enhance consumer protection from risks associated with medical products usage that are not foreseen or apparent during the premarket

notification and review process. FDA's regulations governing application for Agency approval to market a new drug (21 CFR part 314) and regulations governing biological products (21 CFR part 600) implement these statutory provisions. Currently, FDA monitors medical product related postmarket adverse events via both the mandatory and voluntary MedWatch reporting systems using FDA Forms 3500 and 3500A (OMB control number 0910-0291) and the vaccine adverse event reporting system.

FDA is seeking OMB clearance to collect vital information via a series of rapid response surveys. Participation in these surveys will be voluntary. This request covers rapid response surveys for community based health care professionals, general type medical facilities, specialized medical facilities (those known for cardiac surgery, obstetrics/gynecology services, pediatric services, etc.), other health care professionals, patients, consumers, and

risk managers working in medical facilities. FDA will use the information gathered from these surveys to quickly obtain vital information about medical product risks and interventions to reduce risks so the Agency may take appropriate public health or regulatory action including dissemination of this information as necessary and appropriate.

FDA projects 6 emergency risk related surveys per year with a sample of between 50 and 10,000 respondents per survey. FDA also projects a response time of 0.5 hour per response. These estimates are based on the maximum sample size per questionnaire that FDA may be able to obtain by working with health care professional organizations. The annual number of surveys was determined by the maximum number of surveys per year FDA has ever conducted under this collection.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN ¹

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
FDA Rapid Response Survey	10,000	6	60,000	0.5	30,000

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

Dated: January 9, 2017.
Leslie Kux,
Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2015-D-1777]

Factors To Consider When Making Benefit-Risk Determinations for Medical Device Investigational Device Exemptions; Guidance for Investigational Device Exemption Sponsors, Sponsor-Investigators, and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of the guidance entitled “Factors to Consider When Making Benefit-Risk Determinations for Medical Device

Investigational Device Exemptions.” The purpose of this guidance is to provide greater clarity for FDA staff and Investigational Device Exemptions (IDE) application sponsors and sponsor-investigators regarding the principal factors that the Agency considers when assessing the benefits and risks of IDE applications for human clinical study. The guidance also characterizes benefits in the context of investigational research, which includes direct benefits to the subjects and benefits to others. **DATES:** Submit either electronic or written comments on this guidance at any time. General comments on Agency guidance documents are welcome at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are

solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your

comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2015–D–1777 for “Factors to Consider When Making Benefit-Risk Determinations for Medical Device Investigational Device Exemptions.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

An electronic copy of the guidance document is available for download

from the Internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance. Submit written requests for a single hard copy of the guidance document entitled “Factors to Consider When Making Benefit-Risk Determinations for Medical Device Investigational Device Exemptions” to the Office of the Center Director, Guidance and Policy Development, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002 or the Office of Communication, Outreach, and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: Karen Ulisney, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 1545, Silver Spring, MD 20993–0002, 301–796–5513; or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

A primary goal of this guidance is to clarify the factors that FDA considers when assessing risks and anticipated benefits for IDE studies, and how uncertainty may be offset by a variety of risk mitigation measures that can ensure appropriate patient and participant protections in investigational research settings. At earlier stages of device development, FDA considers appropriate mitigation measures for anticipated possible risks and unanticipated risks, whereas in later stages, risk mitigation focuses increasingly on the most probable risks. Another important goal of this guidance is to characterize benefits in the context of investigational research, which includes direct benefits to the subjects and benefits to others (to the extent there are indirect benefits to subjects or reflect the importance of knowledge to be gained).

As with the benefit-risk framework for evaluating marketing applications, FDA assessment of benefits and risks for an IDE application takes into account the contextual setting in which the study is being proposed, including, but not

limited to, the characterization of the disease or condition being treated or diagnosed, the availability of alternative treatments or diagnostics, and the risks associated with them. When available, information characterizing subject tolerance for risk and perspective on benefit may provide useful context during this assessment.

In the **Federal Register** on June 18, 2015 (80 FR 34909), FDA announced the availability of the draft guidance and interested parties were requested to comment by September 16, 2015. FDA has considered all of the public comments received prior to finalizing this guidance.

II. Significance of Guidance

This guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on “Factors to Consider When Making Benefit-Risk Determinations for Medical Device Investigational Device Exemptions.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

III. Electronic Access

Persons interested in obtaining a copy of the guidance may do so by downloading an electronic copy from the Internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at <http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm>. Guidance documents are also available at <http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm> or <http://www.regulations.gov>. Persons unable to download an electronic copy of “Factors to Consider When Making Benefit-Risk Determinations for Medical Device Investigational Device Exemptions” may send an email request to CDRH-Guidance@fda.hhs.gov to receive an electronic copy of the document. Please use the document number 1783 to identify the guidance you are requesting.

IV. Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–

3520). The collections of information in 21 CFR part 812 have been approved under OMB control number 0910–0078; the collections of information in 21 CFR 50.23 (Exception from general requirements for informed consent) have been approved under OMB control number 0910–0586; the collections of information in 21 CFR 56.115 (Institutional Review Board records) have been approved under OMB control number 0910–0130; and the collections of information in 21 CFR part 50, subpart B (Informed Consent of Human Subjects) and part 56 (Institutional Review Boards) have been approved under OMB control number 0910–0755.

Dated: January 9, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2014–D–1525]

Mixing, Diluting, or Repackaging Biological Products Outside the Scope of an Approved Biologics License Application; Revised Draft Guidance For Industry; Availability

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is announcing the availability of a revised draft guidance for industry entitled “Mixing, Diluting, or Repackaging Biological Products Outside the Scope of an Approved Biologics License Application.” This revised draft guidance describes the conditions under which FDA does not intend to take action against a State-licensed pharmacy, a Federal facility, or an outsourcing facility that mixes, dilutes, or repackages certain biological products outside the scope of an approved biologics license application (BLA). It also describes the conditions under which FDA does not intend to take action when a State-licensed pharmacy, a Federal facility, an outsourcing facility, or a physician prepares prescription sets of allergenic extracts for subcutaneous immunotherapy. This revised draft guidance for industry replaces the draft guidance for industry of the same title issued in February 2015.

DATES: Although you can comment on any guidance at any time (*see* 21 CFR 10.115(g)(5)), to ensure that the Agency

considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by March 14, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (*see* “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2014–D–1525 for “Mixing, Diluting, or Repackaging Biological Products Outside the Scope of an Approved Biologics License Application.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the

Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- *Confidential Submissions—*To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, *see* 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002; or the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Avenue, Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. *See* the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Sara Rothman, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 5197, Silver Spring, MD 20903, 301-796-3110; or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993-0002, 240-402-7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a revised draft guidance for industry entitled “Mixing, Diluting, or Repackaging Biological Products Outside the Scope of an Approved Biologics License Application.” Certain licensed biological products may sometimes be mixed, diluted, or repackaged in a way not described in the approved labeling for the product to meet the needs of a specific patient. For example, for some biological products there is no licensed pediatric strength and/or dosage form. In addition, there may be certain circumstances when a person would remove a licensed biological product from its original container and place it into a different container(s) (repackage it), in a manner that is not within the scope of the approved labeling for the product. As described in the draft guidance, mixed, diluted, or repackaged biological products are not eligible for the statutory exemptions available to certain compounded drugs under sections 503A and 503B of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 353a and 353b). In addition, a biological product that is mixed, diluted, or repackaged outside the scope of an approved BLA is considered an unlicensed biological product under section 351 of the Public Health Service (PHS) Act (42 U.S.C. 262).

This draft guidance describes the conditions under which FDA does not intend to take action for violations of section 351 of the PHS Act and section 502(f)(1) (21 U.S.C. 352(f)(1)), section 582 (21 U.S.C. 360eee-1), and where specified, section 501(a)(2)(B) (21 U.S.C. 351(a)(2)(B)) of the FD&C Act, when a state-licensed pharmacy, a Federal facility, or an outsourcing facility dilutes, mixes, or repackages certain biological products outside the scope of an approved BLA.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). This guidance, when finalized, will represent FDA’s current thinking on mixing, diluting, and repackaging of biological products not within the scope

of the product’s approved BLA as described in the approved labeling for the product. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

This draft guidance contains information collection provisions that are subject to review by OMB under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). The title, description, and respondent description of the information collection are given under this section with an estimate of the annual reporting and recordkeeping burdens. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

We invite comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA’s functions, including whether the information will have practical utility; (2) the accuracy of FDA’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

The draft guidance includes the following collection of information under the PRA.

One condition described in the draft guidance is that if the labeling for the licensed biological product includes storage and/or handling instructions (e.g., protect from light, do not freeze, keep at specified storage temperature), the labeling for the biological product that is mixed, diluted, or repackaged specifies the same storage conditions.

Another condition described in the draft guidance is that, if the biological product is mixed, diluted, or repackaged by an outsourcing facility, the label on the immediate container (primary packaging, e.g., the syringe) of the mixed, diluted, or repackaged product includes the following information:

- The statement “This biological product was mixed/diluted by [name of outsourcing facility],” or “This product was repackaged by [name of outsourcing

facility],” whichever statement is appropriate;

- The address and phone number of the outsourcing facility that mixed, diluted, or repackaged the biological product;

- The proper name of the original biological product that was mixed, diluted, or repackaged;

- The lot or batch number of the mixed, diluted, or repackaged biological product;

- The dosage form and strength;

- A statement of either the quantity or the volume of the mixed, diluted, or repackaged biological product, whichever is appropriate;

- The date the biological product was mixed, diluted, or repackaged;

- The beyond-use-date (BUD) of the mixed, diluted, or repackaged biological product;

- Storage and handling instructions for the mixed, diluted, or repackaged biological product;

- The National Drug Code (NDC) number of the mixed, diluted, or repackaged biological product, if available;¹

- The statement “Not for resale,” and, if the biological product is distributed by an outsourcing facility other than pursuant to a prescription for an individual identified patient, the statement “Office Use Only”; and

- If included on the label of the FDA-licensed product from which the biological product is being mixed, diluted, or repackaged, a list of the active and inactive ingredients; and if the biological product is mixed or diluted, a list of any ingredients that appear in the mixed or diluted product in addition to those ingredients that are on the label of the original FDA-licensed biological product.

In addition, the draft guidance includes as a condition for biological products mixed, diluted, or repackaged by an outsourcing facility that, if the immediate product label is too small to bear the active and inactive ingredients, such information should be included on the label of the container from which the individual units are removed for administration (secondary packaging, e.g., the bag, box, or other package in which the mixed, diluted, or repackaged biological products are distributed).

The draft guidance also describes the condition for biological products mixed, diluted, or repackaged by an outsourcing facility that the label on the container from which the individual units are removed for administration

¹ The NDC number of the original licensed biological product should not be placed on the mixed, diluted, or repackaged biological product.

include directions for use, including, as appropriate, dosage and administration, and the following information to facilitate adverse event reporting: <http://www.fda.gov/medwatch> and 1-800-FDA-1088.

Finally, the draft guidance described a condition for biological products repackaged by an outsourcing facility for which the BUD is established based on a stability program conducted in accordance with Appendix A of the draft guidance, that the outsourcing facility maintains records of the testing performed in accordance with Appendix A.

We estimate that annually a total of approximately 15 outsourcing facilities that mix, dilute, or repackage biological products (“Number of Respondents” in table 1, row 1) will each design, test, and produce approximately five different labels (“Frequency per Disclosure” in table 1, row 1), for a total of 75 labels that include the information set forth in section III.B of the draft guidance (including directions for use) as well as inclusion of storage and/or handling instructions (“Total Disclosures” in table 1, row 1). We also estimate that designing, testing, and producing each label will take approximately 0.5 hours (“Hours per Disclosure” in table 1, row 1). The provision to add <http://www.fda.gov/medwatch> and 1-800-FDA-1088 is not included in this burden estimate because it is not considered a collection of information under the PRA because the information is “originally supplied by the Federal Government to the recipient for the purpose of disclosure to the public” (5 CFR 1320.3(c)(2)).

Section III.C of the draft guidance discusses the preparation of

prescription sets (*i.e.*, licensed allergenic extracts that are mixed and diluted to provide subcutaneous immunotherapy to an individual patient) by a physician, State-licensed pharmacy, a Federal facility, or outsourcing facility. One of the conditions described in the draft guidance is if the prescription set is mixed or diluted by an outsourcing facility, the label on the immediate container of the prescription set (primary packaging) includes:

- The patient’s name as identified on the prescription or order;
- The statement “This prescription set was prepared by [name of outsourcing facility]”;
- The address and phone number of the outsourcing facility that prepared the prescription set;
- The identity of each allergenic extract in the prescription set and the quantity of each;
- The dilution of each dilution vial;
- The lot or batch number of the prescription set;
- The date the prescription set was prepared;
- The BUD as the expiry date for the prescription set;
- Storage and handling instructions for the prescription set; and
- The statement “Not for resale.”

Another condition under the draft guidance is that if the prescription set is prepared by an outsourcing facility, the label of the container from which the individual units of the prescription set are removed for administration (secondary packaging) includes the following information to facilitate adverse event reporting: <http://www.fda.gov/medwatch> and 1-800-FDA-1088. Each prescription set

prepared by an outsourcing facility is also accompanied by instructions for use.

We estimate that annually a total of approximately five outsourcing facilities that prepare prescription sets (“Number of Respondents” in table 2, row 1) will each include the information set forth in section III.C of the draft guidance (including directions for use) on the labels, packages, and/or containers of approximately 300 prescription sets (“Frequency per Disclosure” in table 2, row 1) for a total of 1500 disclosures (“Total Disclosures” in table 2, row 1). We also estimate that the initial process of designing, testing, and producing, and attaching each label, package, and/or container to each prescription set will take approximately 0.5 hours (“Hours per Disclosure” in table 2, row 1). The provision to add “<http://www.fda.gov/medwatch>” and “1-800-FDA-1088” is not included in this burden estimate because it is not considered a collection of information under the PRA because the information is “originally supplied by the Federal Government to the recipient for the purpose of disclosure to the public” (5 CFR 1320.3(c)(2)).

We estimate that annually a total of approximately 5 outsourcing facilities that repackage biological products and establish a BUD in accordance with Appendix A (“No. of Recordkeepers” in table 3) will maintain approximately 150 records of the testing, as described in Appendix A (“total annual records” in table 3). We estimate that maintaining the records will take approximately 5 minutes per record.

The total estimated third-party disclosure burden resulting from the draft guidance is as follows:

TABLE 1—ESTIMATED ANNUAL THIRD-PARTY DISCLOSURE BURDEN ¹

Biological product mixing, diluting, and repackaging	Number of respondents	Number of disclosures per respondent	Total annual disclosures	Average burden per disclosure	Total hours
Designing, testing, and producing the label, container, packages, and/or outer containers for each mixed, diluted, or repackaged biological product.	15	5	75	0.5 (30 minutes)	37.5

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

TABLE 2—ESTIMATED ANNUAL THIRD-PARTY DISCLOSURE BURDEN ¹

Preparation of prescription sets	Number of respondents	Number of disclosures per respondent	Total annual disclosures	Average burden per disclosure	Total hours
Designing, testing, and producing each label on immediate containers, packages, and/or outer containers.	5	300	1,500	0.5 (30 minutes)	750

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

TABLE 3—ESTIMATED ANNUAL RECORDKEEPING BURDEN¹

Type of recordkeeping	Number of recordkeepers	Number of records per recordkeeper	Total annual records	Average burden per recordkeeping	Total hours
Records that the outsourcing facility maintains of the testing performed in accordance with Appendix A of the guidance.	5	30	150	0.083 (5 minutes)	12.5

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

The draft guidance also references registration, adverse event reporting, product reporting, and current good manufacturing practice (CGMP) requirements for outsourcing facilities. The collections of information for outsourcing facility registration have been approved by the Office of Management and Budget (OMB) under OMB control number 0910–0777 (79 FR 69859). The collections of information for adverse event reporting by outsourcing facilities have been approved by OMB under OMB control number 0910–0800 (80 FR 60917). In the **Federal Register** of December 4, 2013 (78 FR 72897), FDA estimated the burden resulting from outsourcing facility electronic drug product reporting. In the **Federal Register** of July 2, 2014 (79 FR 37743), FDA estimated the burden resulting from outsourcing facility compliance with CGMP requirements.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–D–4645]

180-Day Exclusivity: Questions and Answers; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled “180-Day Exclusivity: Questions and Answers.” This draft guidance is intended to address questions that have been raised about the provisions of the Federal Food, Drug, and Cosmetic Act (FD&C Act) that relate to generic drug exclusivity, which commonly is known as “180-day exclusivity” for generic drug products. As a general matter, FDA has implemented these statutory provisions within the context of application-specific decisions. Some FDA decisions have been made publicly available (e.g., in FDA citizen petition responses and documents released in litigation). FDA believes that a guidance for industry that provides answers to commonly asked questions about 180-day exclusivity would enhance transparency and facilitate the development, approval, and timely marketing of generic drug products. FDA intends to update this guidance to include additional questions and answers as appropriate.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by March 14, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or

anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2016–D–4645 for “180-Day Exclusivity: Questions and Answers.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The

second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002; or to the Office of Communication, Outreach, and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Harry Schwirck, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 75, Rm. 1672, Silver Spring, MD 20993–0002, 301–796–4271; or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled “180-Day Exclusivity: Questions and Answers.” This draft guidance is intended to address questions that have been raised about the provisions of the FD&C Act, which relate to 180-day exclusivity for generic drug products. These provisions provide an incentive and reward to generic drug applicants that expose themselves to the risk of patent litigation that may arise during the abbreviated new drug application (ANDA) process (see section 505(j) of the FD&C Act (21 U.S.C. 355(j))). It does so by providing for a 180-day period of marketing exclusivity vis-a-vis certain other ANDA applicants to the first applicant(s) who are eligible for the exclusivity under applicable statutory provisions (see section 505(j)(2) and (j)(5) of the FD&C Act).

FDA has received a number of questions about 180-day exclusivity and has identified commonly asked questions for inclusion in the guidance. FDA expects the information provided in the guidance to enhance transparency and facilitate the development, approval, and timely marketing of generic drug products. FDA intends to update the guidance to include additional questions and answers as appropriate.

The draft guidance contains questions and answers organized according to subject matter. The subject areas are: Applicable statutory scheme, first applicants, 180-day exclusivity and patents, 180-day exclusivity trigger and scope, 180-day exclusivity relinquishment and waiver, forfeiture of 180-day exclusivity, and procedural questions regarding 180-day exclusivity determinations.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on “180-Day Exclusivity: Questions and Answers.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, <http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatory>

[Information/Guidances/default.htm](http://www.regulations.gov), or <https://www.regulations.gov>.

Dated: January 9, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2016–D–1025]

Emergency Use Authorization of Medical Products and Related Authorities; Guidance for Industry and Other Stakeholders; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a guidance for industry and other stakeholders entitled “Emergency Use Authorization of Medical Products and Related Authorities.” The purpose of this guidance is to explain FDA’s current thinking on the authorization of the emergency use of certain medical products under certain sections of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) as amended or added by the Pandemic and All-Hazards Preparedness Reauthorization Act of 2013 (PAHPRA). The provisions in PAHPRA include key legal authorities to sustain and strengthen national preparedness for public health, military, and domestic emergencies involving chemical, biological, radiological, and nuclear (CBRN) agents, including emerging infectious disease threats.

DATES: Submit either electronic or written comments on Agency guidances at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <http://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted,

such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <http://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2016-D-1025 for "Emergency Use Authorization of Medical Products and Related Authorities; Guidance for Industry and Other Stakeholders; Availability." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <http://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <http://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be

made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <http://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the guidance to Office of Counterterrorism and Emerging Threats, Office of the Commissioner, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4343, Silver Spring, MD 20993-0002, 301-796-8510. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT:

Carol Drew, Office of Counterterrorism and Emerging Threats, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 1, Rm. 4320, Silver Spring, MD 20993-0002, 301-796-8510 (this is not a toll free number).

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry and other stakeholders entitled "Emergency Use Authorization of Medical Products and Related Authorities." This guidance explains FDA's general recommendations and procedures applicable to the authorization of the emergency use of certain medical products under sections 564, 564A, and 564B of the FD&C Act¹ (21 U.S.C. 360bbb-3, 360bbb-3a, and 360bbb-3b) as amended or added by the Pandemic and All-Hazards Preparedness Reauthorization Act of 2013 (PAHPRA)²

¹ Section 564 was first added to the FD&C Act by the Project BioShield Act of 2004 (Pub. L. 108-276).

² Section 3088 of the 21st Century Cures Act, signed into law by the President on December 13,

(Pub. L. 113-5). The provisions in PAHPRA include key legal authorities to sustain and strengthen national preparedness for public health, military, and domestic emergencies involving CBRN agents, including emerging infectious disease threats such as pandemic influenza. PAHPRA clarifies and enhances FDA's authority to support emergency preparedness and response and foster the development and availability of medical products for use in these emergencies. These medical products, also referred to as "medical countermeasures" (MCMs) include drugs (e.g., antivirals and antidotes), biological products (e.g., vaccines, blood products, and biological therapeutics), and devices (e.g., in vitro diagnostics and personal protective equipment).

This guidance finalizes the draft guidance "Emergency Use Authorization of Medical Products and Related Authorities" (April 2016) and replaces the following two guidance documents, "Emergency Use Authorization of Medical Products" (July 2007) and "Emergency Use Authorization Questions and Answers" (April 2009). The public comments received on the draft guidance have been considered and the guidance has been revised to clarify issues raised as appropriate. This guidance is intended to inform industry and government sponsors and other stakeholders involved in emergency response activities, including government agencies and public health and emergency response stakeholders, and FDA staff of FDA's general recommendations and procedures for:

- Issuance of Emergency Use Authorizations (EUs) under section 564 of the FD&C Act;
- Implementation of the emergency use authorities set forth in section 564A of the FD&C Act; and
- Reliance on the governmental prepositioning authority set forth in section 564B of the FD&C Act.

Section 564 of the FD&C Act, as amended by PAHPRA, permits the

2016, (Pub. L. 114-255) amends sections 564, 564A, and 564B of the FD&C Act to add new authorities to: (1) Authorize emergency use of unapproved animal drugs; (2) make applicable other emergency use authorities (e.g., to issue emergency dispensing orders, waive compliance with current good manufacturing practices), make available Centers for Disease Control and Prevention emergency use instructions, and extend expiration dates to approved animal drugs; and (3) allow unapproved animal drugs to be held for emergency use. While much of what is described in this guidance will apply to these new authorities, this guidance does not by its terms reference them; FDA asks anyone interested in utilizing these authorities to contact FDA directly to discuss how to proceed. FDA plans to review these new authorities and address any new procedural issues raised as we develop more experience with these new authorities.

Commissioner to authorize the emergency use of an unapproved medical product or an unapproved use of an approved medical product for certain emergency circumstances after the Department of Health and Human Services (HHS) Secretary has made a declaration of an emergency or threat justifying emergency use. That declaration by the HHS Secretary must in turn be based on a determination of an emergency or potential emergency or material threat associated with the CBRN agent by, respectively, the Secretary of Homeland Security, the Secretary of Defense, or the HHS Secretary. The Commissioner may issue an EUA to allow an MCM to be used in an emergency to diagnose, treat, or prevent serious or life-threatening diseases or conditions caused by a CBRN agent, or by a product used to diagnose, treat, or prevent such diseases or conditions, when available data meet specified criteria to support such uses and there are no adequate, approved, and available alternatives.

Section 564A, as added by PAHPRA, establishes streamlined mechanisms to facilitate preparedness and response activities involving certain FDA-approved MCMs without FDA issuing EUAs, which can be a resource-intensive process. These authorities, which apply only to eligible FDA-approved medical products intended for use during a CBRN emergency, include provisions that:

- Empower FDA to extend the expiration date of an eligible FDA-approved MCM stockpiled for use in a CBRN emergency, and establish appropriate conditions relating to such extensions, such as appropriate storage, sampling, and labeling;
- Permit FDA to waive otherwise applicable current good manufacturing practice requirements (e.g., storage or handling) to accommodate emergency response needs;
- Allow emergency dispensing of MCMs during an actual CBRN emergency event without requiring an individual prescription, or all of the information otherwise required, for each recipient of the MCM; and
- Permit the Centers for Disease Control and Prevention to create and issue “emergency use instructions” concerning the FDA-approved conditions of use for eligible products. These authorities, and the definition of eligible products to which they apply, are discussed in this guidance.

To enable stakeholders to prepare for potential rapid deployment of MCMs during an actual CBRN emergency, section 564B (also added by PAHPRA)

permits Federal, State, and local governments to pre-position (e.g., stockpile, forward-deploy) MCMs in anticipation of FDA approval or clearance, authorization of an investigational use, or the issuance of an EUA. This authority is also discussed in this document.

II. Significance of Guidance

This guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on emergency use authorization of medical products and related authorities. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

III. Electronic Access

Persons with access to the Internet may obtain the guidance at <http://www.fda.gov/regulatoryinformation/Guidances/default.htm>, <http://www.regulations.gov>, or <http://www.fda.gov/medicalcountermeasures>.

IV. Paperwork Reduction Act of 1995

This guidance contains information collection provisions that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). This guidance refers to previously approved collections of information. These collections of information have been approved under OMB control numbers 0910–0308, 0910–0230, 0910–0471, 0910–0014, 0910–0078 and 0910–0595. The collection of information in this guidance was approved under OMB control number 0910–0595.

Dated: January 10, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Advisory Council on Alzheimer’s Research, Care, and Services; Meeting

AGENCY: Assistant Secretary for Planning and Evaluation, HHS.

ACTION: Notice of meeting.

SUMMARY: This notice announces the public meeting of the Advisory Council on Alzheimer’s Research, Care, and Services (Advisory Council). The Advisory Council on Alzheimer’s

Research, Care, and Services provides advice on how to prevent or reduce the burden of Alzheimer’s disease and related dementias on people with the disease and their caregivers. The theme of the February meeting will be clinical trials for Alzheimer’s disease and related dementias and recruitment challenges. Additional presentations in the afternoon will include updates on progress towards a Care and Services Summit, federal workgroup updates, and preparation for the Advisory Council’s 2017 Recommendations, due in April 2017.

DATES: The meeting will be held on Friday, February 3, 2017 from 9:00am to 5:00pm EDT.

ADDRESSES: The meeting will be held in the Great Hall in the Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

Comments: Time is allocated in the afternoon on the agenda to hear public comments. The time for oral comments will be limited to two (2) minutes per individual. In lieu of oral comments, formal written comments may be submitted for the record to Rohini Khillan, ASPE, 200 Independence Avenue SW., Room 424E, Washington, DC 20201. All comments should be submitted to napa@hhs.gov for the record and to share with the Advisory Council by January 27, 2017. Those submitting comments should identify themselves and any relevant organizational affiliations.

FOR FURTHER INFORMATION CONTACT:

Rohini Khillan (202) 690–5932, rohini.khillan@hhs.gov. Note: Seating may be limited. Those wishing to attend the meeting must send an email to napa@hhs.gov and put “February Meeting Attendance” in the Subject line by Friday, January 20, 2017 so that their names may be put on a list of expected attendees and forwarded to the security officers the Humphrey Building. Any interested member of the public who is a non-U.S. citizen should include this information at the time of registration to ensure that the appropriate security procedure to gain entry to the building is carried out. Although the meeting is open to the public, procedures governing security and the entrance to federal buildings may change without notice. If you wish to make a public comment, you must note that within your email.

SUPPLEMENTARY INFORMATION: Notice of these meetings is given under the Federal Advisory Committee Act (5 U.S.C. App. 2, section 10(a)(1) and (a)(2)). Topics of the Meeting: The theme of the February meeting will be clinical trials for Alzheimer’s disease

and related dementias and recruitment challenges. Additional presentations in the afternoon will include updates on progress towards a Care and Services Summit, federal workgroup updates, and preparation for the Advisory Council's 2017 Recommendations, due in April 2017.

Procedure and Agenda: This meeting is open to the public. Please allow 45 minutes to go through security and walk to the meeting room. The meeting will also be webcast at www.hhs.gov/live.

Authority: 42 U.S.C. 11225; Section 2(e)(3) of the National Alzheimer's Project Act. The panel is governed by provisions of Public Law 92-463, as amended (5 U.S.C. Appendix 2), which sets forth standards for the formation and use of advisory committees.

Dated: January 5, 2017.

Kathryn E. Martin,

Acting Assistant Secretary for Planning and Evaluation.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Cancer Institute; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the National Cancer Advisory Board.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting. The open session will be videocast and can be accessed from the NIH Videocasting and Podcasting Web site (<http://videocast.nih.gov>).

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Cancer Advisory Board.

Date: February 15, 2017.

Open: 1:00 p.m. to 2:00 p.m.
Agenda: Program reports and presentations; business of the Board.

Closed: 2:00 p.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Cancer Institute Shady Grove 9609 Medical Center Drive, Room TE406 Rockville, MD 20850 (Virtual Meeting).

Contact Person: Paulette S. Gray, Ph.D., Executive Secretary, Division of Extramural Activities, National Cancer Institute—Shady Grove National Institutes of Health, 9609 Medical Center Drive, Room 7W444, Bethesda, MD 20892, 240-276-6340, graypp@mail.nih.gov.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Information is also available on the Institute's/Center's home page: <http://deainfo.nci.nih.gov/advisory/ncab/ncab.htm>, where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Action Under the NIH Guidelines for Research Involving Recombinant or Synthetic Nucleic Acid Molecules (NIH Guidelines)

AGENCY: National Institutes of Health (NIH), HHS.

ACTION: Notice of action under the *NIH Guidelines*.

SUMMARY: The National Institutes of Health (NIH) considered a proposal to conduct research involving the deliberate transfer of a chloramphenicol resistance trait to *Rickettsia typhi*, *conorii*, *rickettsii*, and *felis*. The acquisition of this antibiotic resistance trait could possibly compromise the use of a class of antibiotics for the treatment of Rickettsia infections in humans. Under the *NIH Guidelines* (<http://www.osp.od.nih.gov/sites/default/files/>

NIH_Guidelines.html), these experiments can proceed only after they are reviewed by the NIH Recombinant DNA Advisory Committee (RAC) and specifically approved by the NIH Director as Major Actions. This proposal was discussed at the December 4, 2015, RAC meeting. The proposal was published in the **Federal Register** on December 29, 2015, (80 FR 81346) with a request for public comment; one comment was received. This notice announces the final NIH action regarding this proposal.

FOR FURTHER INFORMATION CONTACT: If you have questions, or require additional background information about this action, please contact the NIH by email at *SciencePolicy@od.nih.gov*, or by telephone at 301-496-9838 and reference this notice.

SUPPLEMENTARY INFORMATION: This final action does not allow an investigator at the University of Chicago to transfer chloramphenicol resistance to three different *Rickettsia* species: *Rickettsia typhi*, *rickettsii*, and *felis*. The investigator also proposed to transfer chloramphenicol resistance to a fourth *Rickettsia* species, *R. conorii*. Transfer of chloramphenicol resistance to *R. conorii* was previously approved by the NIH Director as a Major Action (see 73 FR 32719) and therefore did not need to be reviewed and approved under Section III-A-1-a of the *NIH Guidelines*. Thus, the University of Chicago investigator was allowed to proceed with the transfer of chloramphenicol resistance to *R. conorii* under Section III-B-2 of the *NIH Guidelines*.

The proposal to transfer chloramphenicol resistance to *R. typhi*, *rickettsii*, and *felis* was discussed with a working group of the RAC via a teleconference call on October 22, 2015. The recommendations of this group were presented to and discussed with the RAC at its December 4, 2015, meeting. At the March 8, 2016, meeting, the RAC continued the discussion which included consideration of the one comment received to the December 29, 2015, notice and unanimously recommended (by a vote of 11 in favor, none opposed, and no abstentions) that the transfer of chloramphenicol resistance to *R. typhi*, *rickettsii*, and *felis* should not be allowed to proceed. On August 23, 2016, the NIH Director disapproved the proposal to transfer chloramphenicol resistance to *R. typhi*, *rickettsii*, and *felis*.

Dated: January 6, 2017.

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The invention listed below is owned by an agency of the U.S. Government and is available for licensing to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

FOR FURTHER INFORMATION CONTACT: Licensing information and copies of the patent applications listed below may be obtained by communicating with the indicated licensing contact at the Technology Transfer and Intellectual Property Office, National Institute of Allergy and Infectious Diseases, 5601 Fishers Lane, Rockville, MD 20852; tel. 301-496-2644. A signed Confidential Disclosure Agreement will be required to receive copies of unpublished patent applications.

SUPPLEMENTARY INFORMATION:

Technology description follows.

Monoclonal Antibodies That Neutralize Norovirus

Description of Technology: Vaccines and therapies to prevent and treat Norovirus infections do not exist, despite the worldwide prevalence of Norovirus infections. Outbreaks of human gastroenteritis attributable to Norovirus commonly occur in group setting, such as hospitals, nursing homes, schools, dormitories, cruise ships and military barracks. This technology relates to chimpanzee-human chimeric monoclonal antibodies, which specifically bind to Norovirus and have therapeutic potential. The antibodies that were tested in a primate model of infection have shown protection against Norovirus. These Norovirus antibodies may have application as immunoprophylaxis to protect individuals from infections or as a possible treatment for infected individuals, or can be used to develop a diagnostic for detection of norovirus infections.

This technology is available for licensing for commercial development in accordance with 35 U.S.C. 209 and 37 CFR part 404, as well as for further

development and evaluation under a research collaboration.

Potential Commercial Applications:

- Therapeutics
- Diagnostics

Competitive Advantages:

- There are currently no vaccines or therapeutics available against Norovirus infections

Development Stage:

- In vivo data available (animal)

Inventors: Zhaochun Chen, Robert H. Purcell, Lisbeth Kim Green, Stanislav Sosnovtsev, Karin Bok (all from NIAID).

Publications: Chen Z, et al., Development of Norwalk virus-specific monoclonal antibodies with therapeutic potential for the treatment of Norwalk virus gastroenteritis, *J Virol.* 2013 Sep; 87(17):9547-57. [PMID 23785216].

Intellectual Property: HHS Reference No. E-226-2011/0—U.S. Provisional Application No. 61/763,879, filed February 12, 2013; PCT Application No. PCT/US2014/015809, filed February 11, 2014; European Application No. 14706239.2, filed August 5, 2015 (pending); U.S. Application No. 14/767,274, filed August 11, 2015 (allowed); and U.S. Application No. 15/359,438, filed November 22, 2016 (pending).

Licensing Contact: Dr. Jenish Patel, 240-669-2894; *Jenish.Patel@nih.gov*.

Collaborative Research Opportunity: The National Institute of Allergy and Infectious Diseases is seeking statements of capability or interest from parties interested in collaborative research to further develop, evaluate or commercialize for development of a therapeutic or a diagnostic for Norovirus infections. For collaboration opportunities, please contact Dr. Jenish Patel, 240-669-2894; *Jenish.Patel@nih.gov*.

Dated: January 9, 2017.

Suzanne Frisbie,

Deputy Director, Technology Transfer and Intellectual Property Office, National Institute of Allergy and Infectious Diseases.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552(b)(4) and 552(b)(6), Title 5 U.S.C.,

as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Surgical Sciences, Biomedical Imaging and Bioengineering Integrated Review Group; Medical Imaging Study Section.

Date: February 6-7, 2017.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Hilton Alexandria Mark Center, 5000 Seminary Road, Alexandria, VA 22311.

Contact Person: Xiang-Ning Li, MD, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5112, MSC 7854, Bethesda, MD 20892, 301-435-1744, lixiang@csr.nih.gov.

Name of Committee: Surgical Sciences, Biomedical Imaging and Bioengineering Integrated Review Group; Biomedical Imaging Technology B Study Section.

Date: February 8-9, 2017.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

Contact Person: Eileen W. Bradley, DSC, IRG Chief, Surgical Sciences Biomedical Imaging and Bioengineering, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5100, MSC 7854, Bethesda, MD 20892, (301) 435-1179, bradleye@csr.nih.gov.

Name of Committee: Healthcare Delivery and Methodologies Integrated Review Group; Biomedical Computing and Health Informatics Study Section.

Date: February 9-10, 2017.

Time: 8:00 a.m. to 7:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Embassy Suites at the Chevy Chase Pavilion, 4300 Military Road NW., Washington, DC 20015.

Contact Person: Xin Yuan, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3141, Bethesda, MD 20892, yuanx4@csr.nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Academic Research Enhancement Award.

Date: February 10, 2017.

Time: 1:00 p.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

Contact Person: Inna Gorshkova, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, 301-435-1784, gorshkoi@csr.nih.gov. (Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine;

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2016–1073]

Chemical Transportation Advisory Committee

AGENCY: Coast Guard, Department of Homeland Security.

ACTION: Notice of federal advisory committee meeting.

SUMMARY: The Chemical Transportation Advisory Committee will meet on February 28, March 1, and March 2, 2017, in Houston, TX to discuss committee matters relating to the safe and secure marine transportation of hazardous materials. These meetings will be open to the public.

DATES: Chemical Transportation Advisory Committee subcommittees will meet on Tuesday, February 28, 2017, from 9 a.m. to 5 p.m.; and on Wednesday, March 1, 2017, from 9 a.m. to 5 p.m. The full Committee will meet Thursday, March 2, 2017, from 9 a.m. to 5 p.m. Please note that the meetings may close early if the Committee completes its business.

ADDRESSES: The meeting will be held at United States Coast Guard Sector Houston-Galveston, 13411 Hilliard St., Houston, TX 77034, <http://homeport.uscg.mil/houstongalveston>.

All visitors to Sector Houston-Galveston will have to pre-register to be admitted to the building. U.S. citizens must provide your name, telephone number, and email address by close of business on February 17, 2017, to the contact person listed in **FOR FURTHER INFORMATION CONTACT** below. Non U.S. citizens must provide your name, date of birth, place of birth, country of citizenship, passport country, passport number, country of residence, company, telephone number, and email address by January 27, 2017, to the contact person listed in **FOR FURTHER INFORMATION CONTACT** below.

For information on facilities or services for individuals with disabilities or to request special assistance at the

meeting, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** as soon as possible.

Instructions: To facilitate public participation, written comments on the issues to be considered by the Committee as listed in the “Agenda” section below must be submitted no later than Friday, February 10, 2017, if you want the Committee members to review your comment prior to the meeting. Written comments must be submitted using Federal eRulemaking Portal: <http://www.regulations.gov>. You must include the words “Department of Homeland Security” and the number (USCG–2016–1073). Comments received will be posted without alteration at <http://www.regulations.gov>, including any personal information provided. You may review a Privacy Act notice regarding the Federal Docket Management System in the March 24, 2005 issue of the **Federal Register** (70 FR 15086). If you encounter technical difficulties with comment submission, contact the individual in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

Docket Search: For access to the docket to read documents or comments related to this notice, go to <http://www.regulations.gov>, type “USCG–2016–1073” in the “Search” box, press Enter, and then click on the item you wish to view.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Julie Blanchfield, Alternate Designated Federal Official of the Chemical Transportation Advisory Committee, 2703 Martin Luther King Jr. Ave. SE., Stop 7509, Washington, DC 20593–7509, Telephone 202–372–1419, Fax 202–372–8380, or Julie.e.blanchfield@uscg.mil.

SUPPLEMENTARY INFORMATION: Notice of this meeting is in compliance with the Federal Advisory Committee Act, (Title 5, United States Code Appendix).

The Chemical Transportation Advisory Committee is an advisory Committee authorized under section 871 of the Homeland Security Act of 2002, 6 United States Code 451, and is chartered under the provisions of the Federal Advisory Committee Act. The Committee acts solely in an advisory capacity to the Secretary of the Department of Homeland Security through the Commandant of the Coast Guard and the Deputy Commandant for Operations on matters relating to safe and secure marine transportation of hazardous materials activities insofar as they relate to matters within the United States Coast Guard’s jurisdiction. The Committee advises, consults with, and

makes recommendations reflecting its independent judgment to the Secretary.

Agendas of Meetings

Subcommittee Meetings on February 28 and March 1, 2017

The subcommittee meetings will separately address the following tasks:

1. Task Statement 13–03: Safety Standards for the Design of Vessels Carrying Natural Gas or Using Natural Gas as Fuel.

2. Task Statement 15–01: Marine Vapor Control System Certifying Entities Guidelines update and Vapor Control System Policy Letter to supplement the implementation of the final rule.

3. Task Statement 16–01: Hazardous Cargo Transportation Security Subcommittee.

The task statements from the last Committee meeting are located at Homeport at the following address: <http://homeport.uscg.mil/ctac>. The agenda for each subcommittee meeting will include the following:

1. Review task statements, which are listed in paragraph (7) of the agenda for the March 2, 2017, Committee meeting.

2. Work on tasks assigned in task statements mentioned above.

3. Public comment period.

4. Discuss and prepare proposed recommendations for the Chemical Transportation Advisory Committee meeting on March 2, 2017, on tasks assigned in detailed task statements mentioned above.

Full Committee Meeting on March 2, 2017

The agenda for the Chemical Transportation Advisory Committee meeting on Thursday, March 2, 2017, is as follows:

1. Introductions and opening remarks.

2. Swear in newly appointed Committee members, and thank outgoing members.

3. Thank you letter presentation for the Ships Carrying Bulk Liquid, Liquefied Gas, or Compressed Gas Hazardous Materials (46 CFR 153) Subcommittee.

4. Review of September 29, 2016, meeting minutes and status of task items.

5. Coast Guard Leadership Remarks.

6. Chairman’s and Designated Federal Officer’s remarks.

7. Committee will review, discuss, and formulate recommendations on the following items:

a. Task Statement 13–03: Safety Standards for the Design of Vessels Carrying Natural Gas or Using Natural Gas as Fuel.

b. Task Statement 15–01: Marine Vapor Control System (Certifying

Entities Guidelines update and vapor control System supplementary guidance for the implementation of the final rule).

c. Task Statement 16–01: Hazardous Cargo Transportation Security Subcommittee.

8. USCG presentations on the following items of interest:

a. Update on International Maritime Organization activities as they relate to the marine transportation of hazardous materials.

b. Update on U.S. regulations and policy initiatives as they relate to the marine transportation of hazardous materials.

c. Update on the Chemical Data Guide.

9. Presentation on lessons learned from a lightning strike on a methanol operation.

10. New business and subcommittee recommendation discussion.

11. Set next meeting date and location.

12. Set subcommittee meeting schedule.

13. Public comment period.

Public comments or questions will be taken throughout the meeting as the Committee discusses the issues and prior to deliberations and voting. There will also be a public comment period at the end of the meeting. Speakers are requested to limit their comments to 3 minutes. Please note that the public comment period may end before the period allotted, following the last call for comments. Contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section above to register as a speaker.

Dated: January 9, 2017.

J.G. Lantz,

Director of Commercial Regulations and Standards.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2017–0003; OMB No. 1660–0005]

Agency Information Collection Activities: Proposed Collection; Comment Request; National Flood Insurance Program Claims Forms

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: The Federal Emergency Management Agency, as part of its

continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a revision of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning the collection of information related to the flood insurance claims process.

DATES: Comments must be submitted on or before March 14, 2017.

ADDRESSES: To avoid duplicate submissions to the docket, please use only one of the following means to submit comments.

(1) *Online:* Submit comments at www.regulations.gov under Docket ID FEMA–2017–0003. Follow the instructions for submitting comments.

(2) *Mail:* Submit written comments to Docket Manager, Office of Chief Counsel, DHS/FEMA, 500 C Street SW., 8NE, Washington, DC 20472–3100.

All submissions received must include the agency name and Docket ID. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at <http://www.regulations.gov>, and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy Act notice that is available via the link in the footer www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Susan Bernstein, Mitigation, National Flood Insurance Program, (202) 212–2113. You may contact the Records Management Division for copies of the proposed collection of information at email address: FEMA-Information-Collections-Management@fema.dhs.gov.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP) is codified as 42 U.S.C. 4001, *et sec.* and is authorized by Public Law 90–448 (1968) and expanded by Public Law 93–234 (1973). The National Flood Insurance Act of 1968 requires that the Federal Emergency Management Agency (FEMA) provides flood insurance at full actuarial rates with limited exceptions for certain structures reflecting the complete flood risk to structures built or substantially improved on or after the effective date for the initial Flood Insurance Rate Map (FIRM) for the community, or after December 31, 1974, whichever is later, so that the risk associated with buildings in flood-prone areas are borne by those located in such areas and not by the taxpayers at large. In accordance with Public Law 93–234,

the purchase of flood insurance is mandatory when Federal or federally related financial assistance is being provided for acquisition or construction of buildings located, or to be located, within FEMA-identified special flood hazard areas of communities that are participating in the NFIP. When flood damage occurs to insured property, information is collected to report, investigate, and negotiate in order to settle the claim.

The NFIP Appeals Process

Section 205 of The Bunning-Bereuter-Blumenauer Flood Insurance Reform Act (FIRA) of 2004, Public Law 108–264, requires FEMA to establish by regulation an additional process for the appeal of decisions of flood insurance claims issued through the NFIP. Consequently, FEMA published an interim final rule on May 26, 2006 (71 FR 30294) and a final rule on October 13, 2006 (71 FR 60435) codifying into regulation what was previously an existing informal process to handle appeals regarding decisions related to coverage, or claims under the NFIP.

Collection of Information

Title: National Flood Insurance Program Claims Forms.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660–0005.

FEMA Forms: FEMA Form 086–0–6; Worksheet-Contents-Personal Property; 086–0–7; Worksheet—Building; 086–0–8; Worksheet—Building (Continued); 086–0–9; Proof of Loss; 086–0–10; Increased Cost of Compliance Proof of Loss; 086–0–11; Notice of Loss; 086–0–12; Statement as to Full Cost of Repair or Replacement under the Replacement Cost Coverage, Subject to the Terms and Conditions of this Policy (proposed for removal); 086–0–13; National Flood Insurance Program Preliminary Report; 086–0–14; National Flood Insurance Program Final Report; 086–0–15; National Flood Insurance Program Narrative Report; 086–0–16; Cause of Loss and Subrogation Report; 086–0–17; Manufactured (Mobile) Home/Travel Trailer Worksheet; 086–0–18; Manufactured (Mobile) Home/Travel Trailer Worksheet (continued); 086–0–19; Increased Cost of Compliance (ICC) Adjusters Report; 086–0–20; Adjuster Preliminary Damage Assessment; 086–0–21; Adjuster Certification Application. NFIP Claims Appeals Process (Flood Claims Insurance Handbook).

Abstract: The NFIP appeal process establishes a formal mechanism to allow NFIP policyholders to appeal the

decisions of any insurance agent, adjuster, insurance company, or any FEMA employee or contractor, in cases of unsatisfactory decisions on claims, proof of loss, and loss estimates.

Affected Public: Individuals, households, farms, businesses, and other for profit.

Number of Respondents: 49,373.

Number of Responses: 49,373.

Estimated Total Annual Burden

Hours: 31,737.

Estimated Cost: The estimated annual cost to respondents for the hour burden is \$1,432,419. There are no recordkeeping, capital, start-up or maintenance costs associated with this information collection. The cost to the Federal Government is \$4,000,434.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Dated: January 9, 2017.

Richard W. Mattison,

Records Management Program Chief, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

[FR Doc. 2017-00673 Filed 1-12-17; 8:45 am]

BILLING CODE 9110-52-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5173-N-09-C]

Affirmatively Furthering Fair Housing Assessment Tool for Public Housing Agencies: Announcement of Final Approved Document

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Notice.

SUMMARY: This notice announces that the Assessment Tool developed by HUD

for use by Public Housing Agencies receiving assistance under the United States Housing Act of 1937 has completed the notice and comment process required by the Paperwork Reduction Act (PRA), been reviewed by the Office of Management and Budget and approved. While this Assessment Tool has been approved, this Notice does not trigger the obligation of PHAs to conduct and submit an AFH in accordance with 24 CFR 5.160, as HUD has not yet provided PHAs with the data they will need. As HUD makes data available for certain PHAs, HUD will publish, in the **Federal Register**, a Notice announcing the availability of data for certain PHAs, triggering their obligation to conduct and submit an AFH, and will post such Notice on the HUD Exchange. HUD also anticipates that, at that time, the online User Interface will be available for use by PHAs. Until such time that PHAs are required to conduct and submit an AFH, HUD notes that PHAs must continue to comply with existing fair housing and civil rights requirements. This Assessment Tool, referred to as the PHA Assessment Tool, was modeled on the Local Government Assessment Tool, first approved by OMB on December 31, 2015 but with modifications to address the different public housing and Housing Choice Voucher operations that PHAs have compared to local governments, and how fair housing planning may be undertaken by PHAs in a meaningful manner. As with the Local Government Assessment Tool, the PHA Assessment Tool allows for collaboration with other PHAs. To reduce burden for PHAs, HUD has increased the threshold for the insert from QPHAs that have 550 units or less to PHAs with 1,250 or fewer combined public housing and HCV units. HUD has also committed to developing an additional Assessment Tool specifically for use by Qualified PHAs (QPHAs) who conduct and submit an individual AFH or collaborate with other QPHAs to conduct and submit a joint AFH to be issued in 2017. Therefore, this PHA Assessment Tool will be for use by PHAs submitting AFHs individually or jointly, and for collaborations among PHAs with 1,250 or fewer units and with PHAs with more than 1,250 units. In addition, to reduce burden further, this Assessment Tool includes an insert with streamlined questions for PHAs with 1,250 or fewer units to use if jointly submitting with PHA with more than 1,250 units. In addition, this Assessment Tool includes revised instructions based on public comments received during the 30-day PRA review

that provide more guidance to PHAs in conducting the AFH, including how the regional analysis is to be prepared based on the location of a PHA's geographic region and program type. Through the notice and comment process required by the PRA, HUD made changes to the PHA Assessment Tool from the 30-day notice published in the **Federal Register** on August 23, 2016.

FOR FURTHER INFORMATION CONTACT:

Krista Mills, Deputy Assistant Secretary, Office of Fair Housing and Equal Opportunity, Department of Housing and Urban Development, 451 7th Street SW., Room 5246, Washington, DC 20410; telephone number 866-234-2689 (toll-free) or 202-402-1432 (local). Individuals who are deaf or hard of hearing and individuals with speech impediments may access this number via TTY by calling the toll-free Federal Relay Service during working hours at 1-800-877-8339.

SUPPLEMENTARY INFORMATION:

I. Background

On July 16, 2015, at 80 FR 42357, HUD published in the **Federal Register** its Affirmatively Furthering Fair Housing (AFFH) final rule. The AFFH final rule provides HUD program participants with a new approach for planning and implementing locally-developed housing goals, actions and strategies involving increasing choice, mobility, preservation, community revitalization and other collaborative or outreach efforts that are designed to reduce disparities in access to opportunity and improve fair housing outcomes that will assist them in meeting their statutory obligation to affirmatively further fair housing as required by the Fair Housing Act. To assist HUD program participants in improving planning to achieve meaningful fair housing outcomes, the new approach involves an "assessment tool" for use in completing the regulatory requirement to conduct an assessment of fair housing (AFH) as set out in the AFFH rule. Because of the variations in the different HUD program participants subject to the AFFH rule, HUD has developed three separate assessment tools: One for public housing agencies (PHAs) receiving assistance under section 8 or 9 of the United States Housing Act of 1937 (42 U.S.C. 1437f or 1437g), which is the subject of this notice, the PHA Assessment Tool; one for local governments, the Local Government Assessment Tool; and one for State and Insular Areas, the State and Insular Areas Assessment Tool. PHAs submitting alone or with other PHAs

will use the PHA Tool, PHAs submitting with local governments will use the Local Government Tool, and PHAs submitting with State or Insular Areas will use the State Tool. All three assessment tools, because they are information collection documents, are required to undergo the PRA notice and comment process. HUD has also committed to developing a fourth Assessment Tool specifically for use by QPHAs who choose to conduct and submit an individual AFH or that collaborate with other QPHAs to conduct and submit a joint AFH.

II. PHA Assessment Tool

A. The PRA Process

On March 23, 2016, at 81 FR 15549, HUD published its 60-day notice, the first notice for public comment required by the PRA, to commence the process for approval of the PHA Assessment Tool. The 60-day public comment period ended on May 23, 2016, and HUD received 39 public comments.

On September 20, 2016, at 81 FR 64475, HUD published its 30-day notice under the PRA. In the 30-day notice, HUD addressed the significant issues raised by the commenters on the 60-day notice. HUD received 142 public comments in response to the 30-day notice. HUD appreciates the comments received in response to the 30-day notice, and, in developing this final version of the Assessment Tool, all comments were carefully considered. The significant issues commenters raised and HUD's responses to these issues are addressed in Section II.C. of this notice. All comments submitted on the September 20, 2016, notice can be found on www.regulations.gov at <https://www.regulations.gov/document?D=HUD-2016-0103-0001>. In addition, HUD has posted on its Web site at http://www.huduser.gov/portal/affht_pt.html and <https://www.hudexchange.info/programs/affh/>, a comparison of the PHA Assessment Tool that was published for 30-day public comment on September 20, 2016 and this final PHA Assessment Tool as announced by this notice.

B. Changes Made to the PHA Assessment Tool

The following highlights changes made to the Assessment Tool for Public Housing Agencies in response to public comment and further consideration of issues by HUD.

Contributing Factors. HUD has tailored the definitions of Contributing Factors, found in Appendix D of the Assessment Tool, to better apply in the context of a PHA's operations. HUD has made changes to contributing factors that include: Admissions and occupancy policies and procedures, including preferences in publicly supported housing; Impediments to mobility; Lack of access to opportunity due to high housing costs; Lack of local public and/or private fair housing outreach, enforcement, and/or resources; Lack of meaningful language access; Lack of public and/or private investment in specific neighborhoods, including services or amenities; Land use and zoning laws; Location of accessible housing; Source of income discrimination; and State or local laws, policies, or practices that discourage individuals with disabilities from living in apartments, family homes, and other integrated settings. HUD has consolidated and therefore removed certain contributing factors based on public comment, such as: Lack of local public fair housing enforcement; Lack of resources for fair housing agencies and organizations; Lack of state or local fair housing laws; Local Restrictions or Requirements for Landlords Renting to Voucher-holders; and Nuisance laws. HUD has combined and added certain contributing factors based on public comment, such as: Displacement of and/or lack of housing support for victims of domestic violence, dating violence, sexual assault, and stalking; Loss of affordable housing; and Private Discrimination and/or lack of fair housing laws.

Goal Setting. HUD has provided further clarifying instructions about how PHAs should identify contributing factors and that PHAs should create fair housing goals that are within their own capacity. For PHAs in a joint or regional collaboration, the User Interface will

provide for PHAs to identify which fair housing goal is to be accomplished by which PHA (or PHAs) in the collaboration.

Insert for PHAs with 1,250 or fewer Units. In the 30-day PRA notice, HUD added an insert for use by QPHAs (eligible PHAs with a combined unit total of 550 or fewer) that collaborate with non-qualified PHAs. HUD has revised this threshold, and PHAs with a combined unit total of 1,250 or fewer combined public housing units or Housing Choice Vouchers (HCVs, *i.e.*, Section 8) units can use this insert when collaborating with a PHA with a combined unit total above 1,250. The insert is meant to cover the analysis required for the collaborating PHA's service area, and region, where applicable—*i.e.*, not analyzed by another PHA, such as in the case where PHAs have overlapping regional geographies. For PHAs with 1,250 or fewer units, the insert is designed to make the analysis less burdensome while retaining the fair housing analysis required by the AFFH Rule. The instructions to the Assessment Tool have also been revised to explain this and help program participants to understand which Tool to use.

PHA Regional Analysis. In this final version of the Assessment Tool designed for PHAs, HUD has provided instructions related to the regional analysis that various size PHAs and QPHAs (*e.g.*, rural PHAs, PHAs within metropolitan areas, PHAs within micropolitan areas, etc.) must conduct when completing an AFH. There are multiple parts to this explanation: (1) A description of the service area, also known as the jurisdiction, of various size PHAs in terms of their authorized geographic operations; (2) a description of the PHA's region for purposes of analysis under the AFFH rule; (3) a description of the HUD-provided data for the PHA's applicable region; (4) instructions related to use of data and identification of fair housing issues and related contributing factors for different size PHAs; and (5) instructions related to rural PHAs, State PHAs, and PHAs in Insular Areas.

PHA jurisdiction/service area ¹	HUD-provided data for PHA region
Metropolitan and Micropolitan (CBSA) PHAs: PHA jurisdiction/service area is located within a CBSA.	Maps and Tables for the CBSA.
Sub-County Rural (Non-CBSA) PHAs: PHA jurisdiction/service area is outside of a CBSA and smaller than a county.	Tables for the county. Maps are available for the county and if patterns of segregation, R/ECAPs, disparities in access to opportunity extend into a broader area, maps are also available to identify such patterns, trends, and issues.

PHA jurisdiction/service area ¹	HUD-provided data for PHA region
County-Wide or Larger Rural (Non-CBSA) PHAs ² : PHA jurisdiction/service area is outside of a CBSA and boundaries are consistent with the county or larger.	Tables for all contiguous counties, including PHA county, in the same state. Maps are available for all counties and if patterns of segregation, R/ECAPs, disparities in access to opportunity extend into a broader area, maps are also available to identify such patterns, trends, and issues.
Statewide PHAs: The PHA's jurisdiction/service area is the State.	HUD will generally provide data consistent with that provided to the State. Maps may be used to analyze fair housing issues that extend beyond the state's borders, where applicable, but tables are provided with data within the state's borders.

As the above chart indicates, HUD will provide regional data for PHAs with different service areas based on geographic areas used by the U.S. Census Bureau. As explained further in the full instructions to the Tool, the standard data that HUD will provide may not always be the most relevant from a fair housing perspective. For PHAs and all other program participants under the AFFH rule, the Assessment Tool is framed so that it can be applied to Public Housing-only or HCV-only PHAs and combined PHAs with various types of Publicly Supported Housing (PSH)³ under their inventory with a wide variety of populations of different agency types and geographies with unique fair housing issues. Note that in completing the Assessment Tool, program participants must use the HUD-provided data, as well as local data and local knowledge, and information received in the community participation process.

Disparities in Access to Opportunity. In order to reduce burden while still eliciting a meaningful fair housing analysis, HUD has clarified that for PHAs that do not administer the Housing Choice Voucher Program (HCV), the regional analysis part of this

¹ All references to counties include counties or statistically equivalent areas (e.g., parishes).

² HUD acknowledges that there are other PHAs, including regional PHAs, that may have differing or unique geographies from the categories in this table. HUD may provide data in the AFFH Data and Mapping Tool for such PHAs appropriate for their geographies based on administrative and data considerations. All program participants are required to conduct an analysis of their jurisdiction and region consistent with the AFFH Final Rule.

³ The term "publicly supported housing" refers to housing assisted, subsidized, or financed with funding through Federal, State, or local agencies or programs as well as housing that is financed or administered by or through any such agencies or programs. HUD is currently providing data on five specific categories of housing: Public Housing; Project-Based Section 8; "Other Multifamily Housing" (including Section 202—Supportive Housing for the Elderly and Section 811—Supportive Housing for Persons with Disabilities); Low Income Housing Tax Credit (LIHTC) housing; and Housing Choice Vouchers (HCV). Other publicly supported housing relevant to the analysis includes housing funded through state and local programs, other federal agencies, such as USDA and VA, or other HUD-funded housing not captured in the five categories listed above.

section is not required. However, if PHAs receive information during community participation about regional disparities in access to opportunities, which is relevant to the PHA's service area, such information must be considered. Due to data limitations for PHAs and QPHAs in rural areas outside of CBSA regions, program participants can request technical assistance for additional guidance on how local data and knowledge may be used to respond to questions on disparities in access to opportunity in PHA service areas.

Assessment of Past Goals, Actions and Strategies: HUD has clarified when PHAs must complete this section. This section may be inapplicable for PHAs that have not previously submitted AFHs or an Analysis of Impediments. However, PHAs are to indicate what fair housing goals were selected by the PHAs in past Analyses of Impediments (if prepared jointly with a local government) or Assessments of Fair Housing, if applicable.

Fair Housing Analysis of Rental Housing. The questions in this section have been streamlined and revised to reduce burden while still eliciting a meaningful fair housing assessment.

Other Publicly Supported Housing Programs. The questions and structure of this section have been edited to tailor the analysis to PHA program operations and reduce burden while still obtaining a meaningful fair housing analysis. HUD has clarified which types of other publicly supported housing the PHA must analyze.

Local Data and Local Knowledge. HUD has clarified the instructions in the Tool regarding local data and local knowledge—including where local data and local knowledge is particularly useful because HUD data is not provided or is limited. It has reiterated in the instructions to the Tool that the phrase "subject to a determination of statistical validity by HUD" is included to clarify that HUD may decline to accept local data that HUD has determined is not valid but not that HUD will apply a rigorous statistical validity test for all local data. In addition, HUD will provide additional

further guidance to PHAs on potential sources of additional information or options for partnering with outside agencies, for example in relation to disparities in access to opportunity.

Maps and Tables. The accompanying instructions have been revised to reflect the appropriate Map and Table numbers of HUD-provided data that program participants must use in answering each question of the Assessment Tool. Descriptions of HUD-provided maps are available in Appendix B of the Assessment Tool instructions, and descriptions of HUD-provided tables are available in Appendix C.

Segregation. In the Assessment Tool, HUD has clarified the definition of "segregation" by referencing the regulatory definition and has noted that in identifying areas that may be segregated or integrated, program participants should take care to ensure they are focusing on all protected characteristics, and not solely focus on minority populations in their jurisdictions and regions. HUD has also included instructions related to analyzing segregation in so-called "majority-minority" communities and where there are concentrations of particular national origin, ethnic, or religious groups in their jurisdictions and regions.

Answering Questions in Collaborations. HUD has added language to the instructions to the Tool which reminds PHAs that are collaborating to note which contributing factors apply to which or all of the program participants. HUD has also added language that reminds PHAs that are collaborating that each program participant is responsible for answering the Assessment of Past Goals, Actions, and Strategies questions (as discussed above).

C. Responses to Significant Issues Raised by Public Commenters on the 30-Day Notice

1. Specific Questions Posed by HUD in the 30-Day Notice

In the 30-day notice, HUD posed a series of questions for which HUD specifically sought comment.

1. *Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.*

In response to this question, there were commenters who stated that completion of the Assessment Tool is not necessary for the proper performance of agency functions and will not have practical utility, because the commenters are already committed to and practicing deconcentration efforts under the HCV Program. Commenters stated that the Tool was a burden, particularly on small PHAs which lack the staff capacity and expertise to complete the Assessment and on small rural PHAs. A commenter was concerned that their agency would become “troubled.” Commenters expressed concern that nothing would be done with the information collected and that the Tool required PHAs to become reporting services. The commenters stated that they lack the funding to complete the Assessment, and High Performing PHAs should be exempt from the regulation until funding is returned and increased. A commenter noted that the approach ignores proportionality and local context, and in smaller communities with only one high school, there are no disparities in access to opportunity. Commenters stated that QPHAs in particular have little influence over factors in the region. Another commenter noted that some questions and terminology are broad and vague.

HUD Response: HUD continues to submit that the Assessment Tool has substantial utility for program participants in assessing fair housing issues, identifying significant contributing factors, formulating meaningful fair housing goals, and ultimately meeting their obligation to affirmatively further fair housing. One of the primary purposes of the Assessment Tool is to consider a wide range of policies, practices, and activities underway in a program participant’s jurisdiction and region and to consider how its policies, practices, or activities may facilitate or present barriers to fair housing choice and access to opportunity, and to further consider actions that a program participant may take to overcome such barriers. The series of questions in the Assessment Tool enables program participants to perform a meaningful assessment of key fair housing issues and contributing factors and set meaningful fair housing goals and priorities. The Assessment Tool also clearly conveys the analysis of fair housing issues and contributing factors

that program participants must undertake. In essence, HUD submits that the Assessment Tool, and the entire AFH approach, better implements the AFFH mandate under the Fair Housing Act than the Analysis of Impediments to Fair Housing Choice (AI).

In terms of resource limitations, HUD is aware that PHAs may be limited in the actions that they can take to overcome barriers to fair housing choice and that the AFH process does not mandate specific outcomes. The purpose of the AFH is for PHAs to identify fair housing issues and develop local solutions based on available resources. However, that does not mean that the PHA cannot take any action, or that the PHA should not strive to first understand the fair housing issues facing their communities and then work to overcome barriers to fair housing choice or disparities in access to opportunity. HUD has taken steps to streamline the Assessment Tool to reduce burden, while still maintaining a meaningful fair housing analysis. HUD has issued guidance on how program participants may establish appropriate goals to address contributing factors and fair housing issues that are beyond their direct control or PHA expertise. HUD has added clarifying instructions regarding prioritization of contributing factors and setting goals, consistent with the AFFH Final Rule and AFFH-related guidance. These edits state that, “Program participants have discretion, within the requirements of the AFFH Rule, to analyze and interpret data and information, identify significant contributing factors, and set goals and priorities using the Assessment Tools provided by HUD. As more fully discussed in the guidance on HUD’s review of AFHs, HUD will consider local context and the resources the program participant has available.” It is HUD’s stated policy that PHAs should be able to complete the assessment tool using their own available staff without the need to hire or contract for outside consultants. For instance, a cost limitation is one factor built directly into the regulatory definition of the term, “local data.” HUD has also issued a public guidance document providing further information on the standards HUD will use to review AFH submissions. As stated in this guidance, “HUD does not expect program participants to hire statisticians or other consultants to locate and analyze all possible sources of local data.” Furthermore, the guidance states, “HUD’s review of AFHs will likewise take into consideration the different circumstances of individual program

participants and their varying locales and available resources.” See “Guidance on HUD’s Review of Assessments of Fair Housing” available at: <https://www.hudexchange.info/resources/documents/Guidance-on-HUDs-Review-of-Assessments-of-Fair-Housing-AFH.pdf>. As discussed above, HUD has tailored questions to PHAs’ programmatic operations. HUD has also made key changes to the instructions to clarify issues raised by the commenters including the scale and scope of the service area and regional analysis that is required. For example, PHAs that do not administer the Housing Choice Voucher Program would not be required to conduct the regional analysis part of the Disparities in Access to Opportunity section. However, if PHAs receive information during community participation about regional disparities in access to opportunities, which is relevant to the PHA’s service area, such information must be considered. HUD has also provided further instructions about the HUD-provided data in maps and tables and where local data and local knowledge may be most important, such as the Disparities in Access to Opportunity and Disability and Access sections of the analysis. These clarifications include that, “The questions in the Assessment Tool are written broadly by HUD to enable PHAs in many different parts of the country to identify the fair housing issues that are present in their service areas and regions. PHAs should provide an analysis based on the HUD-provided data with respect to the fair housing issues analyzed in the AFH, as opposed to providing an inventory of what the data show.” HUD also expects that PHAs will have the benefit of local data and local knowledge, including information obtained through the community participation process, to conduct an appropriate AFH.

PHAs are required to identify the fair housing issues that are present in their service areas and regions, as even issues beyond the PHA’s control can affect the population that the PHA serves and the PHA’s operations, and influence the PHA’s actions to affirmatively further fair housing within its own programs. HUD recognizes that some of these issues are outside of the PHA’s control, and as more fully discussed in HUD guidance, the AFH planning framework, including prioritization of significant contributing factors and setting goals, allows for program participants to match their goals to their local circumstances and to set goals within the PHA’s unique control. The AFFH process also envisions the possibility of

adopting innovative and collaborative goals and priorities as a way of attempting different approaches that may yield positive fair housing outcomes. This may be useful in helping PHAs to address disparities in access to opportunity (access to proficient schools, transportation, employment clusters) and contributing factors, particularly at the regional level. HUD encourages PHAs and all program participants to work within their communities to develop cooperative approaches to fair housing issues.

2. The accuracy of the agency's estimate of the burden of the proposed collection of information.

Commenters disagreed with HUD's burden estimate and suggested that HUD conduct a more thorough analysis. One commenter estimated that the burden is likely three or four times HUD's estimate of 240 hours. Numerous commenters stated that HUD's estimate of burden was an underestimate of the actual burden that would be required, both for individual PHA respondents and for the total overall estimate. Numerous commenters stated that their PHA did not have adequate staffing or funding that would be needed to complete the assessment tool.

HUD Response: HUD appreciates the comments provided on HUD's burden estimate. HUD has made a number of improvements to reduce burden on program participants while conducting a meaningful fair housing assessment that will result in appropriate fair housing outcomes. These steps include the addition of the streamlined analysis (insert) as part of all three assessment tools and the commitment to develop a separate standalone assessment tool for QPHAs. Through this Notice, HUD is also announcing the expansion to the threshold number of units for a PHA to use the insert from 550 units to 1,250 units.

HUD intends to continue to monitor and assess the impact and burden and implementation costs of the AFH process on PHAs, including on the range of different program participants. This will include working directly with PHAs and other program participants and through the provision of technical assistance. It will also include conducting a process and implementation study based on actual program participant experience, including a review of costs and staff burden as well as barriers or obstacles faced by PHAs and other program participant across different types, sizes and locations. HUD expects to prepare revised workload and costs estimates as PHAs prepare and submit actual AFH plans in the future. Going forward, HUD

will review the appropriateness of this threshold and the possibility of increasing the 1,250-unit threshold in the future it based on experience with AFH submissions. HUD will also assess actual burden on all program participants in order to consider the need for additional improvements and prior to the renewal of the assessment tool at the end of the 3-year PRA approval period.

3. Ways to enhance the quality, utility, and clarity of the information to be collected.

A commenter suggested that instead of using a separate Assessment Tool, HUD should expand the requirements of Consolidated Plans to include fair housing, as the Assessment Tool is duplicative of the CDBG entitlement community's AFH. Another commenter suggested that HUD ask PHAs what their service area is, as this will not be an additional burden for PHAs. A commenter noted that HUD should further enhance HUD-provided maps to allow PHAs to accurately and clearly view their data.

HUD Response: HUD appreciates commenters' suggestions for enhancing the quality, utility, and clarity of the information to be collected. The Assessment Tool, and the entire AFH approach, implements the AFFH mandate under the Fair Housing Act. The Tool facilitates program participants' meaningful analysis of key fair housing issues and contributing factors to fair housing issues, and that analysis is intended to lead them to set meaningful fair housing goals and priorities. This meaningful analysis of fair housing issues is not captured as fully in other HUD planning documents that have different purposes than Affirmatively Furthering Fair Housing.

As part of the development of the AFFH Data and Mapping Tool (AFFH-T) changes for PHAs, HUD will be gathering information on PHA service areas and will add this significant new information to the AFFH-T as it becomes available. With respect to enhanced ways to make maps and data easily accessible to program participants, HUD continues to work to make the HUD-provided data and maps easily accessible and easily readable to its program participants, including unique functionality for PHAs, such as the ability to view only the PHA's housing stock and vouchers.

4. Ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Commenters provided a number of suggestions to HUD to minimize the burden of collection of information from PHAs. A commenter suggested that HUD create and provide a sample completed AFH for different sized PHAs. A commenter stated that HUD should provide suggestions for defining R/ECAPs in rural areas. A commenter noted that HUD should simplify the Assessment Tool to the greatest extent possible so that PHAs would not have to rely on expensive consultants. Multiple commenters stated that the Assessment Tool asked for information beyond a PHA's mission, expertise, or influence, such as a regional analysis and analysis of access and barriers to transportation, schools, and work. Commenters recommended that HUD not require a regional analysis outside of a PHA's service area or where data is not provided by HUD. Another commenter suggested that PHAs that serve more than two counties—*i.e.*, the case of regional PHAs—should define their own regions.

A commenter expressed concern that HUD is using an online system for the Assessment Tool, because the agency must successfully implement web-based information collecting and keep its reporting systems up to date. Another commenter found electronic submissions of AFH responses helpful, and requested that HUD report back data that it has already collected in other formats from PHAs to reduce burden.

A commenter is encouraged by HUD's application of the rental housing analysis to only PHAs that operate voucher programs, but thinks the analysis is still too broad because the data is not readily available. A commenter noted that HUD should not require program participants to analyze demographics because HUD already has this information. Instead, HUD should provide PHAs with the comparison of the demographics of occupants of the PHA's housing to the community. HUD also has thorough demographic information of RAD properties and should provide it to PHAs, instead of requiring PHAs to again provide it to HUD. HUD requires PHAs to submit data to HUD on the location of assisted housing in the locality and the region, but HUD should provide that to PHAs. HUD should provide data to support analysis of the change in the location of rental housing over time, or eliminate it from the tool. HUD should not require PHAs to identify the location of LIHTC, but HUD should instead identify the locations. The commenter states that the analysis of access to opportunity for other assisted housing is duplicative.

The commenter also notes that the Fair Housing Enforcement section requires an inventory of fair housing laws, and HUD already has this information and instead should provide it to PHAs.

Commenters appreciated that HUD removed public housing from the analysis of rental housing, as well as the inclusion of the QPHA insert and drafting of a separate QPHA tool, as this will minimize burden for PHAs with smaller operations.

HUD Response: HUD thanks commenters for their suggestions for minimizing burden. HUD has worked to streamline the Assessment Tool and provide clarifying instructions to simplify the process for program participants that are completing the AFH, while providing a meaningful framework in which program participants can analyze the fair housing issues and contributing factors in their communities and set meaningful goals and priorities. This notice clarifies that the regional analysis across multiple sections is not meant to be interpreted as an inventory of local policies and practices in all of the local governments throughout the region. The Tool emphasizes that the solicitation of information on whether there are any demographic trends, policies, or practices that could lead to higher segregation in the jurisdiction or region in the future, is not to be read as HUD seeking an inventory of local laws, policies, or practices. Understanding the demographic patterns and trends of a PHA's service area contextually within the PHA's region is important to identify fair housing issues and related contributing factors affecting the PHA's operations and inform goal setting designed to affirmatively further fair housing, especially for portability and increasing choice in the housing choice voucher program. Fair housing issues and contributing factors are often not bound by geographic or political boundaries. PHAs are not expected to conduct a neighborhood-by-neighborhood or jurisdiction-by-jurisdiction analysis, but instead are asked to identify patterns and trends over time. PHAs are advised to begin the regional analysis starting with areas immediately surrounding the PHA service areas. This analysis will cover residential living patterns, segregated and R/ECAP areas more integrated areas of opportunity (with access to proficient schools, public transportation and employment opportunities) in the immediate jurisdictions outside of their service area where there is adequate rental supply available for lease-up and utilization by voucher holders. The regional analysis will also use integrated

areas of opportunity that are feasible for new construction of affordable housing that will enhance mobility and decrease concentration of protected class while adding to the supply of affordable, low-income housing. HUD will continue to provide data through the AFFH-T as it becomes available.

HUD is exploring options for posting AFHs as an online resource for program participants and the public.

HUD appreciates comments regarding simplifying analysis and believes in this final version of the Assessment Tool designed for PHAs that it has undertaken significant steps to do so, including tailoring of questions, instructions, and contributing factor descriptions to the public housing and Housing Choice Voucher operations of PHAs. Regarding the comment on regional analysis and analysis of transportation, schools, and work to reduce disparities in access to opportunity for protected classes and recipients of publicly supported housing, HUD believes that such analyses are important to achieving meaningful fair housing outcomes. In particular, a PHA's regional analysis provides a contextual baseline for PHAs to understand the residential living patterns, rental market, and the unique fair housing issues and challenges facing their operations and service areas. In addition, such a regional analysis is important for understanding fair housing outcomes in the broader region related to mobility, portability, and collaborative efforts and goals with neighboring organizations, including other PHAs, such as the use of shared waitlists, landlord lists, and other collaborative efforts designed to address barriers to meaningful fair housing choice involving voucher mobility or production of affordable housing in areas of opportunity throughout a region. To achieve these types of goals, regional analysis and collaboration or information sharing is necessary among PHAs and local governments. With respect to analysis of transportation, schools, and work, HUD notes that disparities in access to such opportunities affect the PHA's assisted residents, and waitlisted residents, but also have significant importance from a fair housing perspective when considering goals such as how to increase voucher utilization in areas of opportunity to overcome disparities by protected classes in accessing such opportunities and when siting affordable housing. HUD has taken steps to streamline this analysis, while maintaining efforts at appropriate fair housing outcomes. Analysis of disparities in access to opportunity for

the PHA's service area can be helpful for considering how the PHA's own assets (and HCVs where applicable) are positioned and in identifying places in the surrounding area that might be appropriate for additional new affordable housing opportunities when possible. Some of these issues may be beyond the scope of expertise for PHA staff, but consultation and cooperation with government agencies may be helpful. HUD acknowledges that staffing and funding realities may limit the level of inter-governmental and inter-agency interaction that is possible, as well as the availability and cooperation of other agencies or organizations to participate or to engage in information sharing, mutual analysis, or goal setting. Nonetheless, shared information and resources may assist PHAs and other agencies with meeting fair housing objectives. In support of this goal of PHAs performing a fair housing analysis and to address the workload concerns of PHAs, this Notice clarifies that HUD has increased the threshold for PHAs with 1,250 or fewer combined units to use the insert.

HUD appreciates the comment regarding the unique service areas of regional PHAs and has provided a baseline set of data and expectations as far as regional analysis for such entities. The instructions and this notice provide more information to PHAs on how to identify the required regional analysis based on their different geographic areas. HUD notes that all program participants may conduct analysis beyond the baseline required by the Assessment Tool.

HUD appreciates the comments regarding the provision of data. HUD continues to evaluate methods of reliably providing additional nationally available sources of data, including data that may be provided in other HUD programs, to program participants.

5. Are there other ways in which HUD can further tailor this Assessment Tool for use by PHAs? If so, please provide specific recommendations for how particular questions may be reworded while still conducting a meaningful fair housing analysis, or questions that are not relevant for conducting a meaningful fair housing analysis, or other specific suggestions that will reduce burden for PHAs while still facilitating the required fair housing analysis.

Commenters noted ways in which HUD could further tailor the Assessment Tool for PHA use. One commenter suggested that HUD create a shorter guidance document specifically from the PHA's perspective. Commenters noted that HUD should

tailor the Tool to focus more on housing preservation strategies and HUD should eliminate the analysis of rental housing, since it is not applicable to PHAs. Another commenter stated that HUD should provide a streamlined set of questions for QPHAs that choose not to collaborate.

HUD response: HUD thanks commenters for their suggestions. HUD will issue further guidance to assist program participants, including PHAs, in completing their AFHs. HUD appreciates the suggestion to specifically release a streamlined guidance document for smaller PHAs. HUD will continue to provide guidance involving the balanced approach and mobility and comprehensive community revitalization strategies to address areas where PHAs engage in preservation and new construction of affordable housing in their jurisdictions. HUD added a question to the insert for PHAs to identify areas where PHAs engage in comprehensive community revitalization strategies and to address fair housing and disparities in access to opportunity issues. HUD has committed to developing a fourth Assessment Tool specifically for use by QPHAs who choose to conduct and submit an individual AFH or that collaborate with other QPHAs to conduct and submit a joint AFH.

6. Whether HUD should include any other contributing factors or amend any of the descriptions of the contributing factors to more accurately assess fair housing issues affecting PHAs' service areas and regions. If so, please provide any other factors that should be included or any additional language for the contributing factor description for which changes are recommended.

A number of commenters provided other contributing factors that they believe HUD should add to the Assessment Tool. A commenter suggested adding adverse housing decisions and policies based on criminal history as a factor. Another suggestion was to add landlords exiting the HCV program into the description of the contributing factor, "displacement of residents due to economic pressures." A commenter proposed that lack of public and private investment should not be merged into one contributing factor, but suggested that HUD add "and/or" between the two if it does merge the factors. The commenter also mentioned that HUD should add "discrimination on the basis of limited English proficiency" to the "lack of meaningful language access" contributing factor, and this should make reference to HUD and USDA's LEP guidance and Title VI. A commenter

suggested adding lead-based paint to the environmental health hazards factor, editing the factor regarding "survivors of domestic violence" to be consistent with the Violence Against Women Act by including survivors of sexual assault, dating violence, and stalking, adding in a factor for displacement and lack of housing support for victims of harassment based on membership in a protected class, and including individuals with disabilities under the "nuisance laws" factor. The commenter applauded HUD's addition of "Policies related to payment standards, FMR, and rent subsidies," but suggested that it also include PHA's policies and procedures for determining rent reasonableness for the Housing Choice Voucher program. A commenter suggested that "Private Discrimination" should not have been omitted, and that HUD should add it back into the Assessment Tool. Another commenter mentioned that contributing factors that are only addressed in some sections, such as lack of meaningful language access, should be included in all sections. The commenter suggested adding "limitations of federal regulations," "low vacancy cities," and place-based nature of public housing as contributing factors. Another commenter noted that "access to reliable automobile transportation" should be added to the Disparities in Access to Opportunity section. A commenter noted that HUD should remind Program Participants that "PHAs are required to identify contributing factors that are not listed if that contributing factor creates, perpetuates, contributes to, or increases the severity of at least one fair housing issue."

Other commenters suggested that HUD limit contributing factors in the Assessment Tool. Commenters noted that contributing factors should be limited to those that are "housing related." A commenter mentioned that in the segregation section of the tool, the contributing factor related to admissions and occupancy policies and procedures should be limited to a discussion of only the PHA's policies and procedures, because otherwise it is too broad and requires PHAs to collect and analyze policies from hundreds of properties.

HUD Response: HUD thanks commenters for their suggestions. In the final version of the Assessment Tool, HUD has tailored the descriptions of the contributing factors so that they better apply in the context of a PHA's analysis. HUD will continue to update and provide guidance to assist PHAs as they consider contributing factors of fair

housing issues in completing their AFHs.

While HUD has amended some contributing factors descriptions so that they are better tailored to meet the ways in which PHAs operate, HUD reminds program participants that they must identify contributing factors for their service area and region if that factor significantly creates, contributes to, perpetuates, or increases the severity of one or more fair housing issues. HUD acknowledges that program participants may need to identify contributing factors that are outside of their control or the boundaries of their service areas. If the program participant has met its planning requirements by identifying such factors, but addressing those factors is outside that program participant's control, the program participants are expected to undertake appropriate, good faith collaborative and outreach efforts with local government, private sector and other applicable governmental entities related to goal-setting to address the identified fair housing issue. HUD notes that addressing these types of contributing factors may require a collaborative approach that includes local, state, and private sector entities, and HUD encourages such collaboration.

HUD appreciates the suggestions from commenters of other contributing factors that may create, contribute to, perpetuate, or increase the severity of one or more fair housing issues in the PHA's service area or region. HUD agrees with the commenter that suggested that vacancy rates in cities may contribute to, perpetuate, or increase the severity of one or more fair housing issues, and has noted this in the updated definition of "lack of access to opportunity due to high housing costs." HUD accepts the comment to add "and/or" between "private" and "public" in the contributing factor related to investment. HUD thanks the commenter for the recommendation to revise the "domestic violence" contributing factor so that it is consistent with VAWA, and has accepted this recommendation. HUD has also added a definition of "private discrimination" into the tool, in combination with "lack of fair housing laws."

7. Whether the inclusion of the "insert" for Qualified PHAs (QPHAs) will facilitate collaboration between QPHAs and non-qualified PHAs, and whether these entities anticipate collaborating to conduct and submit a joint AFH. Please note any changes to these inserts that (a) would better facilitate collaboration; (b) provide for a more robust and meaningful fair housing analysis; and (c) encourage

collaboration among these program participants that do not anticipate collaborating at this time.

Commenters support the inclusion of the QPHA insert and commended HUD for reducing administrative burden, and some suggested that HUD go even further. Commenters noted that all PHAs should be able to use the QPHA insert, as this will facilitate PHAs to collaborate with States, and the QPHA insert should be the approach for all program participants, regardless of whether they are collaborating. A commenter noted that the insert should not require QPHAs to conduct a regional analysis. Commenters believe that the QPHA insert will facilitate collaboration, and offered suggestions for how to further facilitate this collaboration. One commenter noted that a way to do this is to integrate data from multiple agencies across tables and maps. Another commenter asked HUD to provide assurances that PHAs will be able to certify under their State's plan.

Other commenters appreciated HUD's efforts to reduce burden on small entities, but suggested that the QPHA insert be eliminated or revised in order to ensure a meaningful analysis. A commenter warned that the QPHA insert could send a message to QPHAs that they will be held to a different standard of analysis and it risks creating confusion. The commenter was particularly concerned that HUD combined all of the opportunity indicators into one question in the insert. The commenter suggested that the policies and practices section of the Publicly Supported Housing section should ask the QPHA to consider its Admission and Continued Occupancy Plan (ACOP) and Administrative Plans more broadly, as this merely requires QPHAs to evaluate aspects of their current policies and will not increase burden. PHAs should report on grounds for denial of admission, evictions, or terminations of subsidies, policies regarding accessibility for persons with disabilities and to LEP persons.

HUD Response: HUD thanks commenters for their responses to the insert. By allowing the inserts for some PHAs, HUD has sought to reduce burden on smaller program participants, while still facilitating a robust analysis of fair housing issues that will allow these PHAs to set meaningful fair housing goals and priorities. The approach adopted attempts to address the issue of burden for these smaller agencies, by organizing the identification of contributing factors for the four fair housing issues (Segregation, R/ECAPs, Disparities in Access to Opportunity, and Disproportionate

Housing Needs) in one step. This is intended to reduce any unnecessary duplication of effort and to better focus the analysis and identification steps to help produce meaningful fair housing goals. HUD has decided to reduce the burden for PHAs with 1,250 or fewer combined public housing and Housing Choice Voucher units by permitting them to also use the insert. At this time, HUD declines to extend the use of the insert to include all program participants but will continue to explore ways to reduce burden, regional HCV mobility planning and execution, and synchronization of AFH and PHA Agency planning, while appropriate analysis of fair housing issues is undertaken. HUD will continue to consider ways to incentivize and expand collaborations among PHAs to establish regional HCV mobility and portability efforts to increase tenant choice and utilization, PHA cooperation, and landlord outreach across multiple PHA service areas and regions. However, HUD has designed Assessment Tools that allow for collaboration between local governments and PHAs with 1,250 or fewer units and States and PHAs with 1,250 or fewer units. HUD has also committed to developing an additional Assessment Tool specifically for use by Qualified PHAs (QPHAs) who choose to conduct and submit an individual AFH or that collaborate with other QPHAs to conduct and submit a joint AFH.

With respect to the comment about PHAs certifying under their State's plan, HUD notes that PHAs will be able to partner with States when the State acts as the lead entity in the Assessment Tool designed for States, but that each program participant is ultimately responsible for its own assessment of fair housing and certifications. HUD will continue to seek ways to flexibly allow for collaborations by PHAs with other program participants.

HUD disagrees with the comment that the addition of streamlined Assessment Tool inserts for smaller program participants might inadvertently send a message that such smaller program participants are being held to a different standard of analysis. As HUD stated in the Preamble to the AFFH Final Rule, ". . . HUD commits to tailor its [Assessment Tools] to the program participant in a manner that strives to reduce burden and create an achievable AFH for all involved. HUD intends to provide, in the Assessment Tool, a set of questions in a standard format to clarify and ease the analysis that program participants must undertake. The Assessment Tool, coupled with the data provided by HUD, is designed to

provide an easier way to undertake a fair housing assessment." 80 FR 42272, at p. 42345 (July 16, 2015). Moreover, the inclusion of the inserts is also intended to facilitate joint and regional partnerships with smaller program participants. Such partnerships can result not only in improved planning and fair housing analysis but in intergovernmental and interagency cooperation and collaboration in goal setting, program operations, and results.

HUD has revised the Policies and Practices question in the insert, as it did in the Local Government tool, to elicit a more meaningful fair housing analysis by prompting PHAs of the types of policies and practices to consider with a focus on HCV portability, mobility, balanced approaches and comprehensive community revitalization strategies.

8. Whether HUD's change to the structure and content of the questions in the Disparities in Access to Opportunity section with respect to the protected class groups that PHAs must analyze is sufficiently clear and will yield a meaningful fair housing analysis. Additionally, HUD specifically solicits comment on whether an appropriate fair housing analysis can and will be conducted if the other protected class groups are assessed only in the "Additional Information" question at the end of the section, as opposed to in each subsection and question in the larger Disparities in Access to Opportunity section. HUD also requests comment on whether it would be most efficient for PHAs to have the protected class groups specified in each question in this section. If so, please provide an explanation. Alternatively, HUD requests comment on whether each subsection within the Disparities in Access to Opportunity section should include an additional question related to disparities in access to the particular opportunity assessed based on all of the protected classes under the Fair Housing Act.

Commenters expressed concern that the Assessment Tool does not require program participants to consider local data and local knowledge in completing the Disparities in Access to Opportunity section. Commenters suggested that PHAs should consider other protected classes under the Fair Housing Act and other fair housing laws, including sex and disability. Since the questions currently instruct program participants to answer based on HUD-provided data, and national data on disabilities is limited, commenters noted that this section excludes persons with disabilities. Commenters suggested that program participants use local data and

local knowledge, to the extent available, in the context of the opportunity indicator at issue to consider other protected classes.

HUD Response: HUD thanks commenters for their suggestions. Note, the regional analysis in the Disparities in Access to Opportunity section is only applicable to PHAs that administer HCVs. HUD believes that the structure of this section of the Tool in the version of the Tool that accompanied the 30-day PRA notice presents the appropriate questions to yield a meaningful analysis. HUD notes that in the final version of the Assessment Tool designed for PHAs, the instructions clarify for which questions and which protected classes HUD is currently providing data and for which questions local data and local knowledge, including community participation, will be used to answer questions regarding other protected classes. With respect to access to opportunity for individuals with disabilities, the instructions note that the second question in each section of the Disparities in Access to Opportunity section notes that disability may be identified either in such responses or in the responses related to disparities in access to opportunity in the Disability and Access section, or both, provided all required aspects are analyzed.

9. What sources of local data or local knowledge do PHAs anticipate using with respect to their analysis? Please specify which sections of the Assessment Tool PHAs anticipate using local data and local knowledge. For example, what sources of local data or local knowledge, including information obtained through the community participation process and any consultation with other relevant governmental agencies, do PHAs anticipate using for the service area as compared to the region regarding disparities in access to opportunity? Are there any different sources of local data or local knowledge for the question on disparities in access to opportunity in the publicly supported housing section?

Commenters noted a number of sources of local data and local knowledge that they anticipate using. These sources include their own internal demographics data collected through the annual review process for its public housing and Section 8 programs; data through a specific PHA's open portal on transportation, education and schools, environment, housing and development, and health and human services; community outreach to stakeholders, local service providers, local government agencies, program participants, and advocates; and

internal information systems. A commenter noted it would use information from the PHA's housing and vacancy survey, as conducted by the Census Bureau, which enables PHAs to conduct extensive analysis of the locality's residential population and households, race/ethnicity, household composition and types, crowding and doubling-up, immigration, incomes and labor market, education, homeownership, the housing inventory, vacancies and vacancy rates, rent levels, affordability, and conditions of housing and neighborhoods including trends. A commenter mentioned that it will use local data and local knowledge in analyzing factors that prevent clients from accessing housing or constitute other barriers to opportunity. One commenter expressed concern that using local data and local knowledge will divert agency staff from completing their housing-related duties.

HUD Response: HUD thanks commenters for their responses. As HUD provides continued guidance and information on how program participants can use local data and local knowledge to facilitate a meaningful analysis of fair housing issues and goal setting and priorities, it will consider how to use this helpful information from commenters. HUD anticipates that it will continue to update guidance materials to identify potential sources of local data and local knowledge, including sources identified by public commenters through the various public comment periods associated with the Paperwork Reduction Act process associated with the various Assessment Tools. HUD also encourages commenters and other stakeholders to participate in and provide information during community participation when PHAs and other program participants in their communities are preparing to submit their AFHs.

(10) Whether the instructions to the Assessment Tool provide sufficient detail to assist PHAs in responding to the questions in the Assessment Tool. If not, please provide specific recommendations of areas that would benefit from further clarity.

A commenter requested that HUD provide a streamlined guidance document to assist in completing the Assessment Tool and using the instructions.

A commenter stated that instructions on goals and priorities are not sufficient, and it is unclear what factors would not meet the standards for prioritization.

HUD Response: In this final version of the PHA Assessment Tool, HUD has tailored the instructions to provide PHAs with more guidance as they

complete the Assessment Tool, including instructions related to contributing factors, prioritization, goal-setting and the scope of regional analysis in the AFH. HUD will continue to explore options for further guidance beyond the instructions. HUD will provide additional guidance for specific questions where local data and knowledge can be used to respond to specific questions due to HUD data limitations.

(11) How can HUD best facilitate the analysis PHAs must conduct with respect to disparities in access to opportunity? For example, are questions based on the overall service area and region of the various opportunity indicators the best way for PHAs to identify access to opportunity with respect to their residents, including voucher holders? With regards to disparities in access to opportunity, how might the PHA identify contributing factors and set goals for overcoming disparities in access to opportunity?

Some commenters suggested that HUD make this section optional for PHAs because these questions are not relevant to a PHA's operations. They note that PHAs have little control over transportation, employment, and schools in a large metropolitan area. One commenter stated that in particular, PHAs should not be required to analyze job training data. Another commenter noted that the analysis of disparities in access to opportunity affecting individuals with disabilities is burdensome because data is not available and it should be deleted.

HUD Response: HUD disagrees with commenters who stated that the questions asked in the Disparities in Access to Opportunity section of the Tool are not relevant to a PHA's operations. PHAs are required to identify the fair housing issues and disparities in access to opportunities that are present in their service areas and regions, as even issues beyond the PHA's control can affect the residents that the PHA serves. Indeed, some PHAs may have little influence over education, transportation, and job-related activities. HUD notes, however, that PHAs are responsible for ensuring that their programs and activities are administered in a manner to affirmatively further fair housing, and that PHAs are responsible for ensuring the administration of such programs and activities do not perpetuate, contribute to, or exacerbate fair housing issues. HUD recognizes that some of these issues may be outside of the PHA's control and staff expertise, and as more fully discussed in HUD guidance and in this notice, the AFH planning

framework, including prioritization of significant contributing factors and setting goals, allows for program participants to match their goals to their unique local circumstances. HUD notes that while PHAs should identify all relevant contributing factors, even if they are outside of the PHA's control, PHAs should select goals that are within the control of the PHA, and that are realistically designed to affirmatively further fair housing.

HUD notes that addressing certain types of contributing factors may require a collaborative approach that includes local, State, and private sector entities. Program participants are expected to identify contributing factors regardless of their ability to exert control over a contributing factor or their proximity to the contributing factor identified if that factor significantly creates, contributes to, perpetuates, or increases the severity of one or more fair housing issues. However, if the program participant has met its planning requirements by identifying such factors, but addressing those factors is outside that program participant's control, the program participants are expected to undertake good faith collaborative and outreach efforts in the form of appropriate goals with local government, private sector, and other applicable governmental entities to address the identified fair housing issue and related contributing factors.

(12) What additional guidance would be useful to PHAs to assist in conducting the fair housing analysis in the Assessment Tool? In particular, which fair housing issues and contributing factors would benefit from additional guidance? For example, in the disparities in access to opportunity section, what guidance would PHAs benefit from?

A commenter suggested that to provide guidance, HUD should publish sample AFHs from various size program participants. Another commenter stated that HUD should provide additional guidance on the prioritization of contributing factors and goals.

HUD Response: HUD thanks commenters for their suggestions and will continue to explore ways to facilitate meaningful AFHs by issuing further guidance. HUD is exploring options for posting AFHs as an online resource for program participants and the public. HUD has provided additional guidance in the Tool's instructions about prioritization of contributing factors and goals.

(13) In the publicly supported housing section, there are several questions related to assisted housing programs that are not owned or operated by the

PHA. Are these questions sufficiently clear, or would additional instructions beyond those that are provided be helpful to PHAs in answering these questions? Are there other or different questions that would facilitate the PHAs' analyses of publicly supported housing, specifically for the other categories of publicly supported housing included in this Assessment Tool?

A number of commenters had specific suggestions for improving this section. A commenter suggested questions to be added to the Assessment Tool regarding the Housing Choice Voucher (HCV) program and geographic mobility. The commenter urged HUD to include these questions in the main Assessment Tool and not only in the QPHA insert, because this is HUD's largest assisted housing program, and persons receiving HCV assistance often face barriers to mobility. Another commenter suggested that HUD ask about waiting list demographics. A commenter suggested that the word "voucher" be added to the phrase "project-based developments" in Question V.D.1.b.i. to clarify that this refers to properties where the PHA has entered into a contract to provide project-based voucher assistance. A commenter suggested adding to the end of Question V.D.2.b.iv.A, which asks about LIHTC, "and whether there are differences in the neighborhood attributes of LIHTC developments where the PHA's vouchers are in use by members of protected classes." A commenter stated that PHAs participating in RAD should be asked whether their tenants are informed of their Choice/Mobility options and are offered moving assistance. Another commenter expressed that PHAs should not have to analyze housing stock outside of its control.

A commenter noted that it supported HUD's balanced approach, but was concerned that PHAs will not make meaningful changes, and therefore requested that HUD keep the balanced approach in perspective when it revises the Guidebook.

HUD Response: HUD appreciates commenters' responses. HUD accepted the commenter's suggestion to add the word "voucher" to the phrase "project-based developments" in Question V.D.i.2.a (previously question V.D.1.b.i). HUD has also revised the Tool to help PHAs to better analyze the fair housing impacts on persons in the HCV program by encouraging program participants to do outreach to HCV holders while conducting community participation, and by asking about HCV holders in the questions within this section.

HUD disagrees with commenters who noted that PHAs should only analyze

housing stock in its control. Issues beyond the PHA's express control can affect the participants that the PHA serves.

In a broader context related to the balanced approach to affirmatively furthering fair housing, HUD has made a number of modifications to the Assessment Tool to recognize the importance of preserving existing affordable housing in connection with affirmative fair housing goals and strategies in connection with community revitalization, as well as modifications with respect to mobility. The balanced approach does not relieve PHAs of their duties to set meaningful goals and priorities to overcome fair housing issues in their jurisdictions and regions. As HUD's own studies on worst case needs for affordable housing make clear, there is an ongoing national crisis in housing affordability that particularly affects lower income families. In many local and regional housing markets, low income households are priced out of the market altogether with some form of income support or housing subsidy being needed to access decent, safe and affordable housing. This makes the preservation of the existing limited supply of long-term affordable stock a key component of any balanced approach to addressing the fair housing issues and contributing factors identified in assessments of fair housing. At the same time, HUD maintains the importance of mobility solutions in connection with affirmative fair housing goals and strategies, and notes that such strategies are not mutually exclusive.

In support of HUD's commitment to the balanced approach to addressing fair housing issues, a number of key changes have been made to the Assessment Tool:

(1) Added the contributing factor on the "Loss of Affordable Housing." This factor was previously released for public comment as part of the Assessment Tool for States and Insular Areas. This contributing factor notes that, "The loss of existing affordable housing can limit the housing choices and exacerbate fair housing issues affecting protected class groups." This factor, along with the contributing factor on "displacement of residents due to economic pressures," allows program participants to recognize the need to preserve affordable housing in areas undergoing economic improvement as a way of maintaining access to opportunity assets for low-income residents and protected class groups as these areas experience increased opportunity.

(2) The Assessment Tool has strengthened the connection between the analysis of disproportionate housing

needs and the analysis in the publicly supported housing section. These changes include adding an instruction noting that the analysis in these sections can be compared to each other, as well as by clarifying the analysis questions in the insert to compare the demographics of who is receiving housing assistance with disproportionate housing needs. The instructions to the insert have also been clarified to note the policy linkage between this analysis and the overriding housing needs analysis required in the PHA Plan as one possible practical application of the AFH analysis.

(3) Adding instructions on LIHTC. The instructions indicate that program participants may distinguish between nine percent and four percent tax credits and the different uses that each can be used for, while analyzing the relation of such tax credit properties to fair housing issues and related contributing factors, including distinguishing for rehabilitation and preservation of affordable housing and for the various priorities available to state allocating agencies in meeting unique housing needs in their jurisdictions, in the context of identifying fair housing issues and related contributing factors.

(4) Adding more detail to the instructions for the additional information questions in the Publicly Supported Housing section. These questions provide an opportunity for program participants to reference or highlight efforts intended to preserve affordability in order to meet unmet and disproportionate housing needs in the context of fair housing issues and related contributing factors. The added instructions state that, "Program participants may describe efforts aimed at preserving affordable housing, including use of funds for rehabilitation, enacting tenant right to purchase requirements, providing incentives to extend existing affordable use agreements and preventing Section 8 opt-outs, encouraging the use of RAD conversion and the PBRA transfer authority. Program participants may also describe positive community assets and organizations, including community development corporations, non-profits, tenant organizations, community credit unions and community gardens."

(14) *There have been new questions added to the Disability and Access Analysis section, under "Housing Accessibility" (Questions 2(d) and 2(e)). Are these questions sufficiently clear, or would additional instructions beyond those that are provided be helpful to PHAs in answering these questions? Are there other or different questions that*

would facilitate the PHAs' analyses of disability, specifically related to housing accessibility?

A commenter noted that questions in this section regarding disability and access should direct PHAs to consider local data and local knowledge, and HUD should instruct program participants that information gathered in community participation may provide valuable insight into the efficacy of the PHA's actions to engage in effective communications with persons with disabilities. Commenters stated that instructions should provide greater clarity to program participants regarding local data and local knowledge. The commenter noted that instead of instructing program participants to "supplement" HUD-provided data with local data and local knowledge, HUD should instruct program participants that local data and local knowledge "will likely be particularly useful" and PHAs should be required to contact Centers for Independent Living (CILS), provide evidence of the efforts they made to collect local data and local knowledge, and note a lack of local data and local knowledge if there is none available.

A commenter offered suggestions for questions that would further facilitate the PHA's analysis of disability. The commenter stated that in its current form, the Assessment Tool does not consider individuals with disabilities in relation to other barriers and it should consider intersectionality of disability and other protected classes. In this section, the Assessment Tool should ask about low poverty neighborhoods, environmentally healthy neighborhoods, and patterns in disparity in access to opportunity. The commenter offered the example that questions about effective communication should also include LEP.

Another commenter noted that it disagreed with the Assessment Tool's requirement to analyze integration of individuals with disabilities in the regions, and felt it required PHAs to assess *Olmstead* plans developed by other entities.

HUD Response: HUD has considered the public comments and has removed Question 2(e) under "Housing Accessibility" from the Assessment Tool, and instead explains in instructions that program participants should "consider policies and practices that impact individuals' ability to access the housing, including such things as wait list procedures, admissions or occupancy policies (e.g., income targeting for new admissions), residency preferences, availability of different

accessibility features, and Web site accessibility" when responding to Question 2(b) in that section.

HUD encourages PHAs and all program participants to seek the input of stakeholders, such as civil rights and disability rights groups, when conducting its community participation. Stakeholder groups are valuable sources of information and they can provide program participants with local data and local knowledge that will assist the PHA in completing its AFH and conducting a meaningful analysis of fair housing goals and priorities.

HUD thanks commenters for their suggestion that the Assessment Tool consider intersectionality of disability and other protected classes. In the instructions to the Tool, HUD notes that "individuals can be members of more than one protected class, for instance, race, ethnicity, national origin often overlap, as will persons with disabilities with other protected characteristics. PHAs are expected to analyze fair housing issues with respect to individuals with disabilities who are also members of additional protected classes."

(15) *Are there other ways HUD can clarify the questions in the Assessment Tool, for example, through the provision of additional instructions, or different instructions from those that have been provided? Additionally, are there other or different questions or instructions that would better assist State PHAs in conducting their fair housing analysis? Please specify whether a particular section, question, or set of instructions requires clarification.*

Commenters suggested that the Assessment Tool should more clearly define the definitions of service area and region. This will help PHAs to understand the exact regional area that must be covered and the data necessary to complete the analysis.

HUD Response: In response to commenters' request for more information regarding the service area and region that PHAs must analyze when completing their AFHs, HUD has added a chart identifying applicable regions for various size PHAs in terms of geography and operations and language to the instructions of the Assessment Tool. Appendix A at Part V: Fair Housing Analysis, explains these definitions in detail. The PHA's region varies based on its service area. The revised instructions to the Assessment Tool now include: (1) A description of the service area, also known as the jurisdiction, of various size PHAs in terms of their authorized geographic operations; (2) a description of the PHA's region for purposes of analysis

under the AFFH rule; (3) a description of the HUD-provided data for the PHA's applicable region; (4) instructions related to use of data and identification of fair housing issues and related contributing factors for different size PHAs; and (5) instructions related to rural PHAs, State PHAs, Regional PHAs, and PHAs in Insular Areas.

2. Other Issues Raised by the Public Commenters

PHA Control Over Contributing Factors

Commenters expressed concerns regarding legal exposure resulting from program participants' identification of contributing factors and goals set to address fair housing issues in the AFH. Specifically, commenters were concerned that many contributing factors address issues beyond the program participants' control and/or outside of the program participants' jurisdiction or service area for PHAs. Some commenters have expressed concern about potential litigation and expressed reluctance with regard to identifying contributing factors and developing goals that are primarily outside of their control or under the jurisdiction of the State or other local governments. These commenters have asked whether HUD acceptance of their AFH goals would shield program participants from litigation.

The commenters requested that HUD take into account whether past goals may not be achieved due to a lack of external support, a lack of collaborative action from State or local government entities, or private sector investment when reviewing submitted AFH plans.

Commenters have requested that HUD shield program participants from stakeholder litigation if a program participant fails to achieve a collaborative AFH goal when that program participant exerts good faith efforts to achieve collaborative AFH goals.

HUD Response: HUD recognizes the concerns of these commenters. HUD notes that the AFH is a planning tool. By providing data and information intended to inform local planning and decision making. The AFFH process is intended to assist program participants in meeting their legal obligation to affirmatively further fair housing, which continues beyond the submission of the AFH. Program Participants have an ongoing obligation to comply with the Fair Housing Act and other civil rights requirements.

Regarding the requirement that program participants, including PHAs, must identify significant fair housing issues and contributing factors that may

be outside of their control to influence, HUD notes that doing so is still important for planning purposes. Even if they may not have the direct ability to impact or exert control over contributing factors, identifying these factors can, for example, provide context for the barriers facing the eligible populations that the PHA serves. HUD acknowledges that program participants may identify contributing factors that are outside of their control or the boundaries of their service areas. The AFH is a planning document, and a basic tenet of planning and performance management is recognition of "external factors" and other barriers to achieving goals, which sometimes are beyond an organization's control (*See, e.g.,* the Federal Government Performance and Results Act). The final AFFH rule requires grantees to identify such barriers. Included in such considerations is the identification of resources such as staffing and funding. HUD notes that addressing these types of contributing factors may require a collaborative approach that includes action by local, State, and private sector entities. Identifying contributing factors outside the control of a program participant may also be useful for considering interagency or public-private collaborative efforts. Program participants are expected to identify contributing factors regardless of their ability to exert control over a contributing factor or their proximity to the contributing factor identified if that factor significantly creates, contributes to, perpetuates, or increases the severity of one or more fair housing issues. However, if the program participant has met its planning requirements by identifying such factors, but addressing those factors is outside that program participant's control, the program participants are expected to undertake good faith collaborative and outreach efforts with local government, private sector, and other applicable governmental entities to address the identified fair housing issue. When these type of substantive collaborative actions are undertaken to address contributing factors outside of their direct sphere of influence or the service area of PHAs, HUD monitoring and oversight actions will take into consideration that there may be extenuating circumstances when there is a lack of collaboration by partnering program participants or private sector entities. Therefore, although collaborating program participants are responsible for any joint goals that are set, each collaborating program participant is only accountable for

meeting its own planning requirements in addressing the contributing factors and related fair housing issues.

HUD encourages program participants to set fair housing goals that are within their sphere of influence that can be reasonably expected to be achieved. Goals and priorities in the AFH should be meaningful, realistic, and focus on changes that are achievable. HUD understands that achievement of certain goals may depend on what resources are available or will become available within the timeframe set for achievement. Program participants have latitude in setting goals to account for available resources and to prioritize strategies and actions that are more likely to be successful and to achieve the greatest impact. A program participant need not, and indeed should not, set a goal over which it maintains no control. There may be instances where a program participant's efforts to address contributing factors it has control over will assist another program participant with a goal it has set.

HUD recognizes public commenters' concerns regarding their ability to control contributing factors and their proximity to these contributing factors. HUD recommends program participants distinguish between significant contributing factors they control, and those they do not, as well as how they might respond to contributing factors they do not control, but can address in the context of their own operations. PHAs, in particular, are advised to consider these issues as they prioritize contributing factors and establish meaningful goals to overcome the effects of the fair housing issues they can control.

HUD has included instructions in the Assessment Tools, and has issued additional guidance to clarify how program participants, including PHAs, may set collaborative goals to address contributing factors and fair housing issues that are beyond their direct purview, control, or expertise. HUD anticipates including further guidance, including in an updated version of the AFFH Rule Guidebook, on identifying contributing factors, prioritizing them, and setting appropriate goals.

HUD Provided Data

Several commenters provided feedback on HUD-provided data that is to be used to complete the AFH. A number of commenters noted that the data currently provided by HUD is not sufficient to assist them in deciding whether to collaborate. Another commenter noted that some of the PHA's units were not included in HUD-provided data. Another commenter was

concerned that the data is not user-friendly enough, and may be outside the skillset of PHA staff. A commenter stated that the disparities in access to opportunity section should include Table 12, which HUD has made optional.

Other commenters requested that HUD provide more data, or different data. A commenter requested that HUD provide data at a more granular level. The commenter noted that in order to advance fair housing, public policies must be adopted at the municipal level, but HUD does not provide relevant block-group level data by municipality. The commenter noted that Census tract-based data obscure concentrations of poverty and other characteristics within small cities where census tracts cross municipal boundaries. The commenter requested that HUD provide census data for the portion of the Census Tract within each municipality, or if it not reliable at the block group level within a portion of the Census Tract, HUD should provide data from multiple block groups of adjoining census tracts within the same municipality. Commenters requested that HUD provide additional data about individuals with disabilities, including Medicaid home and community-based waiver programs, Money Follows the Person program, disability, and individuals in nursing homes, and suggested that HUD should instruct program participants to seek supplemental information from Aging and Disability Resource Centers (ADRCs) and Centers for Independent Living (CILs). Commenters requested that HUD provide more information and demographic data on LIHTC properties, as HUD already collects data pursuant to the 2008 Recovery Act, and if HUD is unable to provide data, it should instruct PHAs to use their own demographic data for any LIHTC-assisted PHA properties. Some commenters suggested that until HUD provides data on disabilities and LIHTC, it should not ask about these subjects.

A commenter appreciated that HUD provides data in its raw format because PHAs otherwise cannot collect this raw data.

HUD Response: HUD appreciates the commenters' suggestions. HUD is continuing to work to increase the ease of electronic availability of the Assessment Tool, maps, and tables. The agency will continue to improve upon the HUD-provided data and maps to strive to make them easily accessible and easily readable to its program participants. HUD will continue to explore options for making improvements to the User Interface, to data provided and the functionality of

the data tool, and for providing additional guidance on using the HUD-provided data in the instructions to the Assessment Tool, as well as through other guidance materials. As HUD assesses longer-term improvements to the Assessment Tool data, HUD will continue to consider the comments received that recommended significant changes.

As to the comments about LIHTC data, HUD continues to administer and improve the LIHTC data on projects placed-in-service and LIHTC tenant demographic data. HUD will work to provide data for AFFH-T at an appropriate level of geography (e.g., State, County, City, development and in rural areas outside of CBSA regions, etc.) as the data becomes available and verified for consistency and reliability. These data may be available in a variety of formats external to the AFFH-T Data and Mapping Tool. It is not expected that development level tenant data will be available in the near term due to current data quality issues. Additionally, compliance with federal privacy requirements will limit certain development-level data that will be available in the future. For background on data that are currently available, please see HUD's report, "Data on Tenants in LIHTC Units as of December 31, 2013" which is available at <https://www.huduser.gov/portal/publications/data-tenants-LIHTC.html>. HUD will also continue to pursue additional guidance on potential sources of readily and easily accessible information that may be useful as supplementary local data.

Reducing Burden Through Technical Assistance and Funding

One commenter noted that HUD has stated that Technical Assistance will be provided to PHAs, but the commenter urges that HUD make this a priority. Commenters also encouraged HUD offices throughout the country to be knowledgeable about AFFH.

Other commenters expressed concern about funding and hiring consultants. Some commenters urged HUD to request additional funding from Congress for PHAs to complete their AFHs.

HUD Response: HUD thanks commenters for their responses. HUD is committed to providing program participants with the resources they need to complete their AFHs, and encourages program participants to review existing HUD guidance, notices, and responses. HUD will continue to explore opportunities for providing greater guidance, training and technical assistance to program participants.

Community Participation

Some commenters stated that HUD should encourage more robust community participation. A commentator stated that program participants should be asked if they consulted stakeholders working in areas of public health, education, workforce development, environmental planning, or transportation so that program participants take an expansive view of their community members. Another commenter stated that HUD should inquire about the extent to which program participants effectively engaged in communications with persons with disabilities. A commenter noted that HUD's outreach to the RAB and other residents are positive improvements, and HUD should include additional language to reach residents of public housing, Section 8 HCV households, and persons eligible to be served by the PHA, including those currently on a PHA-administered waitlist. HUD should also require descriptions of how documents were provided to the community and require PHAs to include solicitation of feedback on preservation of properties, and resident relocation and mobility from R/ECAPs. The commenter agreed that PHAs should be given guidance that they can solicit feedback through surveys, but as a supplement, not a substitute, to that which community participation requires. Another commenter stated that HUD should remind program participants that collaboration does not relieve individual PHAs of the duty to engage in the community participation process.

A commenter requested that "HUD should note that HUD will not apply a rigorous statistical validity test for all local data when discussing 'subject to statistical validity.' This is important so important local data and local knowledge is not dismissed by the PHA during community participation."

Other commenters urged HUD to lessen the requirements of the community participation process. One commenter suggested that HUD should tell program participants that they do not need to "expend excessive or unreasonable staff time and cost to review data received during the community participation process beyond what is necessary to adequately consider the data in accordance with the AFFH rule." Other commenters stated that community participation should be limited to RABs and applicable community partners, and another stated that program participants should not be required to consult with other government agencies.

HUD Response: The final rule strengthened the community participation requirements by directing each program participant to employ communications methods that are designed to reach the broadest audience. As HUD stated in the 30 Day PRA notice for the PHA Assessment Tool, “HUD also notes that the community participation process that is part of conducting an AFH may yield important information from members of the community about [fair housing] issues for the PHA to consider as it conducts its AFH.” 81 FR 64475, at p. 64481 (Sept. 20, 2016). HUD encourages program participants to consult stakeholders including fair housing groups, civil rights groups, disability rights groups, and other organizations in order to collect robust information through the community participation process that will provide valuable assistance to program participants in identifying contributing factors, prioritizing these factors, and setting meaningful goals that are designed to overcome fair housing issues. In the broader context, HUD notes that the area of encouraging and incorporating public involvement in planning activities is a growing field of interest and that there are likely to be technological ideas and solutions that may be worthy of additional interest and inquiry over time.

With respect to the commenter who requested that HUD note that it will not apply a statistical validity test for all local data, as HUD noted in the preamble to the final AFFH rule, “The phrase ‘subject to a determination of statistical validity by HUD’ is included to clarify that HUD may decline to accept local data that HUD has determined is not valid but not that HUD will apply a rigorous statistical validity test for all local data.” 80 FR 42272, at p. 42306 (July 16, 2015). HUD has revised the instructions to the Assessment Tool in the definition of “local data and local knowledge” to reiterate this.

Specific Suggestions for the Assessment Tool

A commenter noted that HUD should clarify timelines for collaborations.

Another commenter suggested that HUD reduce the segregation section to not require a segregation/integration analysis since PHAs are not experts. The commenter also suggested that HUD combine demographic analysis with the Publicly Supported Housing section and remove transportation, education, and employment from the disparities section. The commenter also stated that the instructions should be shortened.

A commenter stated that the question that asks, “Describe the waitlist(s) policy of the PHA to include preferences, placement determination (e.g., first-come, first-served vs. lottery), program selection (e.g., agency-wide waitlist or by development), application method, length of time application window is open, and average wait time list” in the “Disability and Access Analysis” section should also be included in the Segregation and R/ECAPs sections because these practices also affect access for other protected groups. Another commenter objected to the question because HUD already requires waitlist policies and practices in five-year and Annual Plans. Another commenter was opposed to this question because of the number of individuals on the waitlist in some PHAs. Commenter suggested that instead, HUD should include one or more questions focused on a PHA’s waiting list policies and administration from a fair housing perspective, including any PHA proposals to improve its processes to further fair housing goals.

A commenter noted that the Housing Enforcement section should ask about pending fair housing or other civil rights complaints, which may be helpful in noticing emerging fair housing issues. Another commenter found this section to be vague.

A commenter stated that the Assessment Tool should incorporate comprehensive consideration of sex, gender, and fair housing challenges experienced by women in the analysis, as well as address the fair housing barriers experienced by survivors of domestic violence and sexual assault. The commenter also suggested that the Tool ask for an analysis of barriers to fair housing choice by local nuisance laws.

A commenter noted that HUD should eliminate reviews of Analyses of Impediments (AIs) in the Assessment Tool, and HUD should revert back to the AI process.

A commenter suggested that HUD should modify the threshold for QPHAs.

A commenter noted that limitations on use of local data and local knowledge should be included in notes to the public about use of local data and local knowledge.

A commenter noted that asking PHAs to analyze trends that may influence segregation in the future is speculative, and the Assessment Tool should not ask this. The commenter also noted that the Tool should not require inventories of local laws, policies, and practices. The commenter suggested that the additional information questions be eliminated

because they are redundant, and PHAs should not be required to conduct regional analysis of admissions and occupancy policies and procedures including preferences in publicly supported housing or to analyze regional analysis of nuisance laws, land use and zoning laws, a complete inventory of all assisted housing, policies related to rents and FMRs, and source of income discrimination. The commenter stated that it believed the occupancy codes and restrictions questions should not be included because it conflicts with HUD policies and practices. The commenter also objected to questions that asked for an analysis of R/ECAPs and noted that a regional analysis of R/ECAPs is not useful to PHAs.

A commenter suggested removing the Disproportionate Housing Needs analysis because it is duplicative and is covered in other analysis.

A commenter stated that instructions for the assessment of Past Goals, Actions, and Strategies should explain that “other relevant planning documents” include ACOPs, Administrative Plans, past PHA Plans (including Five Year and Annual Plans), and Language Assistance Plans to the extent the PHA has adopted policies, practices, or procedures that implicate fair housing choice.

A commenter noted that HUD should change “transforming R/ECAPs” to “expanding opportunity into R/ECAPs.”

A commenter stated that the Assessment Tool should acknowledge the Equal Access Rule and should explore the denial of housing choice due to sexual orientation, gender identity, or marital status, and steps that PHAs and other HUD funded entities have taken to implement the Equal Access Rule.

A commenter suggested that each section of the Assessment Tool should require PHAs to ask questions about disparities in access to services and infrastructure for members of protected classes who are (1) farmworkers, (2) mobile home residents, and (3) living in disadvantaged rural areas in the PHA’s service area or region, using local data and local knowledge.

HUD Response: HUD thanks commenters for their specific suggestions to improve the Assessment Tool.

As to the first comment, HUD encourages program participants to consult § 5.156 of the final rule for the rule’s requirements for Joint and Regional AFHs.

As to commenters who suggested eliminating sections or questions of the Assessment Tool and noted that the

Tool requires an inventory, HUD reiterates that the Tool does not require an inventory of laws, policies, and practices, and the Tool is a planning tool designed to create solutions and goals that respond to the fair housing and disparities in access issues identified. HUD thanks commenters for their suggestions, and remains committed to providing Program Participants with a Tool that will allow them to conduct an analysis of fair housing issues facing their services areas, jurisdictions, and regions that will inform meaningful goal setting and priorities.

HUD also thanks commenters who suggested additional questions or areas to ask about in the Tool. HUD agrees that the Tool should ask about mobile home residents, and this is included in the final version of the Tool along with manufactured housing in the definition of the contributing factor, Land Use and Zoning Laws. HUD has also noted in the instructions to the Fair Housing and Enforcement section that program participants may discuss other protected classes covered by state and local fair housing and civil rights ordinances. While the final version of the Tool does not include Nuisance Laws as its own Contributing Factor, it adds the new factor, "Displacement of and/or lack of housing support for victims of domestic violence, dating violence, sexual assault, and stalking." HUD has revised the Assessment Tool to better capture the nuances of nuisance laws by incorporating this into both the new abovementioned factor, and in the "Land Use and Zoning Laws" contributing factor. HUD also revised the Assessment Tool to ask about the PHA's policies and practices, including those in the Admission and Continued Occupancy Policy (ACOP) and Administrative Plan, relating to fair housing.

As to the commenter who believed HUD should revert back to the AI process, HUD notes that since the AI process was not as effective as envisioned, the new AFFH process is intended to provide a more robust fair housing analysis and to help program participants to select meaningful goals and priorities to meet their statutory obligation to Affirmatively Further Fair Housing.

As to the comment seeking clarification about local data and local knowledge, HUD has clarified in the instructions that there may be limited nationally-uniform data available for the regional analysis for PHAs in rural areas, and such data limitations may be present in the AFFH Data and Mapping Tool. In cases where data is unavailable,

HUD expects that PHAs in rural areas will consult local data and local knowledge, including information obtained through the community participation process, to complete this analysis.

HUD has adopted the suggested change to modify the threshold of those PHAs that may use the insert, and has modified the threshold from QPHAs (550 units) to PHAs with 1,250 units or fewer. HUD will also continue to consider efforts to reduce administrative burden on all program participants, including PHAs.

Miscellaneous

A commenter asked whether the Tool raises the level of scrutiny for housing above *Lindsey v. Normet's* minimum level of scrutiny. The commenter stated that *Lindsey v. Normet*, held: (1) There is no fairness component of housing because there is no fairness component of property, and (2) there is homelessness. The commenter stated that in the Tool and the policies underlying it, the Government finds that fairness is a component of property and housing; further, dignity is the essence of the Tool and a component of housing. The commenter noted that in the Government's statement of interest in the *Boise* homelessness case, the government found that homelessness does not exist as homeless people are housed people whose housing is assaulted. The government's policies show that housing has a higher level of scrutiny than minimum scrutiny, and the Supreme Court in the same-sex marriage case found that dignity is an individually enforceable right with a higher level of scrutiny than minimum scrutiny. The commenter asked: Does housing enjoy a level of scrutiny higher than minimum scrutiny? According to *West Virginia v. Barnette*, a fact is an individually enforceable right in court, and the level of scrutiny is raised, if, inter alia, the fact is "unaffected by assaults upon it." Does the government deny that this is the test? Has the government found that housing passed this test? Who has the power to enforce the Rule in court and pursuant to what right? What parts of these policies are individually enforceable?

A commenter noted that it felt its area did not lend itself to completing the Assessment Tool because the area is 99% white, with a 1% Native American population, and there is no segregation and schools are as integrated as they can be. The commenter noted that the government should stop trying to track differences.

A commenter stated that using race to lead decision making has serious

constitutional questions, and cited to *Tex. Dep't of Hous. & Cmty. Affairs v. Inclusive Cmty. Project, Inc.*, 135 S. Ct. 2507 (2015).

A commenter suggested that HUD create a working group to test the PHA Tool before implementation. HUD should require PHAs to conduct assessments as part of a demonstrations program before pursuing implementation.

A commenter noted that HUD's new HUD Environmental Review Online System (HERO) requires a partial AFFH analysis of environmental factors, and this is duplicative and uncoordinated with the AFFH Tool submission. The commenter recommended relying on the AFH process, not HERO for this analysis.

HUD Response: HUD has carefully reviewed the commenters' suggestions. As to the first commenter, HUD reviewed the case law cited by the commenter and has concluded that the cases are not applicable to the obligation to affirmatively further fair housing under the Fair Housing Act and under the AFFH rule. HUD continues to assert that the AFFH rule and the Assessment Tool implementing the requirements contained in the regulation will better facilitate compliance with the AFFH mandate under the Fair Housing Act.

HUD notes that in the Assessment Tool, in the instructions, that in identifying areas of segregation and integration program participants should not only focus on areas of minority concentration in their jurisdictions and regions, but also areas of majority concentration. HUD notes that segregation and integration are defined in the AFFH regulation at 24 CFR 5.152 and apply to minority concentration and majority concentration, no matter the protected class. HUD has also included instructions related to analyzing segregation in majority-minority communities and where there are concentrations of particular national origin, ethnic, or religious groups.

HUD thanks commenters for their suggestions regarding testing the PHA Tool. HUD submits that it has given commenters sufficient time to comment on the Assessment Tool through the PRA process, with both the 60-day and 30-day notices.

Program Participants are reminded that they must apply with all applicable laws, including Fair Housing Laws and the Privacy Act.

As to the last commenter, HUD notes that the AFFH rule requires fair housing planning and describes the required elements of the fair housing planning process. The first step in the planning process is completing the fair housing

analysis required in the AFH. The rule establishes specific requirements program participants will follow for developing and submitting an AFH and for incorporating and implementing that AFH into subsequent Consolidated Plans and Public Housing Agency (PHA) Plans in the form of strategies and actions. This process will help to connect housing and community development policy and investment planning with meaningful actions that affirmatively further fair housing. The new approach put in place by this rule is designed to improve program participants' fair housing planning processes by providing data and greater clarity to the steps that program participants must take to assess fair housing issues and contributing factors, set fair housing priorities and goals to overcome them, and, ultimately, take meaningful actions to affirmatively further fair housing. A goal of the AFFH rule is to make sure states and insular areas, local communities, and PHAs understand their responsibilities in the area of fair housing planning. As the Department works to foster effective fair housing planning, goal setting, strategies, and actions, it recognizes that the people who are most familiar with fair housing issues in cities, counties, and states are the people who live there and deal with these issues on a daily basis.

D. Summary

In issuing this Public Housing Agency Assessment Tool, approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act, HUD has strived to reach the appropriate balance in having program participants produce a meaningful assessment of fair housing that carefully considers barriers to fair housing choice and accessing opportunity and how such barriers can be overcome in respective service areas and regions without being unduly burdensome. HUD has further committed to addressing program participant burden by providing data, guidance, and technical assistance, and such assistance will occur throughout the AFH process. While HUD is not specifically soliciting comment for another prescribed period, HUD welcomes feedback from HUD grantees that use this Tool on their experience with this Tool.

Dated: January 9, 2017.

Gustavo Velasquez,

Assistant Secretary for Fair Housing and Equal Opportunity.

[FR Doc. 2017-00713 Filed 1-12-17; 8:45 am]

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5173-N-10]

Affirmatively Furthering Fair Housing: Announcement of Renewal of Approval of the Assessment Tool for Local Governments

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Notice.

SUMMARY: This notice announces that the Office of Management and Budget (OMB) has approved HUD's request to renew for approval under the Paperwork Reduction Act (PRA), the Assessment Tool developed by HUD for use by local governments that receive Community Development Block Grants (CDBG), HOME Investment Partnerships Program (HOME), Emergency Solutions Grants (ESG), or Housing Opportunities for Persons with AIDS (HOPWA) formula funding from HUD when conducting and submitting their own Assessment of Fair Housing (AFH). This Assessment Tool, referred to as the Local Government Assessment Tool, is used for AFHs conducted by joint and regional collaborations between: (1) Such local governments; (2) one or more such local governments with one or more public housing agency (PHA) partners, including qualified PHAs (QPHAs); and (3) other collaborations in which such a local government is designated as the lead for the collaboration. Through the notice and comment process required by the PRA, HUD did make changes to the Local Government Assessment Tool approved by OMB in 2015. HUD's Web page at <https://www.hudexchange.info/programs/affh/> highlights the differences between the 2015 Local Government Assessment Tool and this 2016 Local Government Assessment Tool. This notice also highlights significant issues raised by commenters on the 30-day notice published in the **Federal Register** on August 23, 2016.

FOR FURTHER INFORMATION CONTACT:

Krista Mills, Deputy Assistant Secretary, Office of Fair Housing and Equal Opportunity, Department of Housing and Urban Development, 451 7th Street SW., Room 5246, Washington, DC 20410; telephone number 866-234-2689 (toll-free) or 202-402-1432 (local). Individuals who are deaf or hard of hearing and individuals with speech impediments may access this number via TTY by calling the toll-free Federal Relay Service during working hours at 1-800-877-8339.

SUPPLEMENTARY INFORMATION:

I. Background

On July 16, 2015, at 80 FR 42357, HUD published in the **Federal Register** its Affirmatively Furthering Fair Housing (AFFH) final rule. The AFFH final rule provides HUD program participants with a new approach for planning for fair housing outcomes that will assist them in meeting their statutory obligation to affirmatively further fair housing as required by the Fair Housing Act. To assist HUD program participants in improving planning to achieve meaningful fair housing outcomes, the new approach involves an "assessment tool" for use in completing the regulatory requirement to conduct an assessment of fair housing (AFH) as set out in the AFFH rule. Because of the variations in the HUD program participants subject to the AFFH rule, HUD has developed three separate assessment tools: One for local governments, which is the subject of this notice, the Local Government Assessment Tool; one for public housing agencies (PHAs), the PHA Assessment Tool; and one for States and Insular Areas, the State and Insular Areas Assessment Tool. HUD is currently developing all tools to allow for a joint or regional collaboration with local governments of all sizes and public housing agencies. All three assessments tools, because they are information collection documents, are required to undergo the PRA notice and comment process. HUD has also committed to developing a fourth Assessment Tool specifically for use by QPHAs who choose to conduct and submit an individual AFH or that collaborate with other QPHAs to conduct and submit a joint AFH.

II. Local Government Assessment Tool

A. The PRA Process

The Local Government Assessment Tool was approved by OMB under the Paperwork Reduction Act (PRA) in December 2015, and HUD announced the approval of this tool and the availability of its use by notice published in the **Federal Register** on December 31, 2015, at 80 FR 81840. The Local Government Assessment Tool was approved by OMB for a period of one year and in 2016, HUD began the process for renewal of the Local Government Assessment Tool.

On March 23, 2016, at 81 FR 15546, HUD published its 60-day notice, the first notice for public comment required by the PRA, to commence the process for renewal of approval of the Local Government Assessment Tool. Although

HUD made no changes to the Local Government Assessment Tool approved by OMB in December 2015, HUD specifically solicited public comment on 6 issues (inadvertently numbered as 7 in the March 23, 2016 publication). The 60-day public comment period ended on May 23, 2016. HUD received 18 public comments.

On August 23, 2016, at 81 FR 57602, HUD published its 30-day notice under the PRA. In the 30-day notice, HUD addressed the significant issues raised by the commenters on the 60-day notice. HUD received 28 public comments in response to the 30-day notice. HUD appreciates the comments received in response to the 30-day notice, and, in developing this final version of the Assessment Tool all comments were carefully considered. The significant issues commenters raised and HUD's responses to these issues are addressed in Section II.C. of this notice. All comments submitted on the August 23, 2016, notice can be found on www.regulations.gov at <https://www.regulations.gov/docket/Browser?rpp=50&so=ASC&sb=docId&po=0&dct=PS&D=HUD-2016-0090>.

In addition, and as noted earlier in this notice, HUD has posted on its Web site at http://www.huduser.gov/portal/affht_pt.html and <https://www.hudexchange.info/programs/affh/>, a comparison of the Local Government Assessment Tool approved by OMB in 2016 and that approved by OMB in 2015.

B. Differences in the Local Government Assessment in 2016

This section highlights the key changes between the approved 2015 Local Government Assessment Tool and this 2016 Local Government Assessment Tool that differ from the approved 2015 Local Government Assessment Tool. A comparison draft of the 2016 Local Government Assessment Tool to the 2015 Local Government Assessment Tool that shows all of the differences can be found at <https://www.hudexchange.info/programs/affh/>.¹ The following lists the more significant differences:

- The most significant difference between the 2016 and 2015 Assessment Tools is that in the 2016 Assessment Tool, HUD has included two inserts designed to facilitate collaboration

between different types of program participants that choose to conduct a joint or regional AFH with a local government as the lead entity, and to reduce burden for smaller program participants choosing to enter into joint or regional collaborations.

- The first is an insert for use by PHAs with 1,250 or fewer units, which are PHAs with a combined unit total of 1,250 or fewer public housing units and Section 8 vouchers. PHAs that collaborate with local governments are still required to complete an analysis of their service area and region, as required by the AFFH rule, but the insert is designed to make the analysis less burdensome. For PHAs with service areas in the same core-based statistical area (CBSA) as the local government, the analysis required in the insert is intended to meet the requirements of a PHA service area analysis, and it is expected that the local government's analysis of the CBSA would satisfy the PHA's regional analysis. For PHAs whose service area extends beyond, or is outside of, the local government's CBSA, the analysis in the insert must cover the PHA's service area and region. See table below:

PHA jurisdiction/service area	HUD-provided data for PHA region
<i>Metropolitan and Micropolitan (CBSA) PHAs:</i> PHA jurisdiction/service area is located within a CBSA.	Maps and Tables for the CBSA.
<i>Sub-County Rural PHAs:</i> PHA jurisdiction/service area is outside of a CBSA and smaller than a county.	Tables for the county. Maps are available for the county and if patterns of segregation, R/ECAPs, disparities in access to opportunity extend into a broader area, maps are also available to identify such patterns, trends, and issues.
<i>County-Wide or Larger Rural PHAs:</i> ² PHA jurisdiction/service area is outside of a CBSA and boundaries are consistent with the county or larger.	Tables include data for all contiguous non-CBSA counties, in the same state, and inclusive of the PHA's county (or counties). Maps are available for all counties and if patterns of segregation, R/ECAPs, disparities in access to opportunity extend into a broader area, maps are also available to identify such patterns, trends, and issues.
<i>Statewide PHAs:</i> The PHA's jurisdiction/service area is the State	HUD will generally provide data consistent with that provided to the State. Maps may be used to analyze fair housing issues that extend beyond the state's borders, where applicable, but tables are provided with data within the state's borders.

○ The second insert is for use by local government consolidated plan program participants that received a CDBG grant of \$500,000 or less, including HOME consortia whose members collectively received \$500,000 or less in CDBG funds or whose members received no CDBG funds, in the most recent fiscal year prior to the due date of the joint or regional AFH.

- The 2016 Assessment Tool emphasizes that the solicitation of

information on whether there are any demographic trends, policies, or practices that could lead to higher segregation in the jurisdiction or region in the future, is not to be read as HUD seeking an inventory of local laws, policies or practices. A similar instruction has been added noting that the regional analysis across multiple sections is not meant to be interpreted as an inventory of local policies and

practices in all of the local governments throughout the region.

- In the Disparities in Access to Opportunity section of the 2016 Assessment Tool, HUD identifies where it provides data for each of the opportunity areas to be assessed, while the instructions make clear which protected class groups the HUD-provided data includes. HUD also clarifies which questions in the Disparities in Access to Opportunity

¹ In addition to the redline/strikeout version of the assessment tool that provides a compare of the 2016 tool to the 2015 tool, HUD also provides at <https://www.hudexchange.info/programs/affh/> a redline/strikeout of the Assessment Tool that

accompanied the 30-day PRA notice and this final version.

² HUD acknowledges that there are other PHAs, including regional PHAs, that may have differing or unique geographies from the categories in this table. HUD may provide data in the AFFH Data and

Mapping Tool for such PHAs appropriate for their geographies based on administrative and data considerations. All program participants are required to conduct an analysis of their jurisdiction and region consistent with the AFFH Final Rule.

section require a jurisdictional and regional analysis.

- In the Publicly Supported Housing analysis of the 2016 tool, HUD changed the list of contributing factors that may affect the jurisdiction and region that should be considered.

- In the Disability and Access analysis of the 2016 Assessment Tool, HUD clarifies that the analysis should cover both the jurisdiction and the region as identified in the Assessment Tool.

- The accompanying instructions have been revised to reflect the changes to questions in the Assessment Tool, changes made to the HUD-provided data, and to provide additional guidance to assist program participants in conducting the AFHs.

C. Responses to Significant Issues Raised by Public Commenters on the 30-Day Notice

1. Specific Questions Posed by HUD in the 30-Day Notice

In the 30-day notice, HUD posed a series of questions for which HUD specifically sought comment.

1. *Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.*

In response to this question, there were commenters that stated completion of the Assessment Tool is not necessary for the proper performance of agency functions and will not have practical utility, because agencies must already comply with income deconcentration to help eliminate R/ECAPs, and that racial and ethnic concentrations are analyzed and measures taken to eliminate segregation. The commenters stated that for many small grantees, much of the collection of information will be superfluous and will have little utility because grantees do not have the resources or capacity to address issues identified in the analysis. The commenters stated that providing additional time and “inserts” to small CDBG grantees is an inadequate response to the burden. The commenters stated that AFH is a complicated and burdensome process, and HUD should have corrected deficiencies in the comparatively simple process for Analysis of Impediments. Commenter stated that submitters have the burden of analyzing a broad set of variables, many of which they have little or no control over, such as the regional analysis over territory where they do not exercise control. Core-based statistical areas (CBSAs) often cover multiple states/counties/jurisdictions/

school districts/special districts—which include urban cores, inner and outer suburbs, exurban communities, and rural jurisdictions. The commenters stated that the analyses will be time-consuming, likely unsupported by data, and provide little benefit to the Fair Housing Act goals.

HUD Response: HUD continues to submit that the Assessment Tool has substantial utility for program participants in assessing fair housing issues, identifying significant contributing factors, formulating meaningful fair housing goals, and ultimately meeting their obligation to affirmatively further fair housing. One of the primary purposes of the Assessment Tool is to consider a wide range of policies, practices, and activities underway in a program participant’s jurisdiction and region and to consider how its policies, practices, or activities may facilitate or present barriers to fair housing choice and access to opportunity, and to further consider actions that a program participant may take to overcome such barriers. The series of questions in the Assessment Tool enables program participants to perform a meaningful assessment of key fair housing issues and contributing factors and set meaningful fair housing goals and priorities. The Assessment Tool also clearly conveys the analysis of fair housing issues and contributing factors that program participants must undertake. In essence, HUD submits that the Assessment Tool, and the entire AFH approach, better implements the AFFH mandate under the Fair Housing Act.

In terms of resource limitations, HUD is aware that program participants may be limited in the actions that they can take to overcome barriers to fair housing choice and notes that the AFH process does not mandate specific outcomes. However, that does not mean that no actions can be taken, or that program participants should not strive to first understand the fair housing issues facing their communities and then work to overcome barriers to fair housing choice or disparities in access to opportunity. HUD has issued guidance on how program participants may establish appropriate goals pertaining to outreach, collaboration, etc. to address contributing factors and fair housing issues that are beyond their direct control or expertise. HUD has added clarifying instructions regarding prioritization of contributing factors and setting goals, consistent with the AFFH Final Rule and AFFH-related guidance. These edits state that, “Program participants have discretion, within the

requirements of the AFFH Rule, to analyze and interpret data and information, identify significant contributing factors, and set goals and priorities using the Assessment Tools provided by HUD. As more fully discussed in the guidance on HUD’s review of AFHs, HUD will consider local context and the resources the program participant has available.”

HUD has also made key changes to the instructions to clarify issues raised by the commenters including the scale and scope of the analysis that is required. These clarifications include that, “The questions in the Assessment Tool are written broadly by HUD to enable program participants in many different parts of the country to identify the fair housing issues that are present in their jurisdictions and regions.” These and similar clarifications are intended to note that the Assessment Tool is intended to be scalable to meet the needs of a wide variety of different local governments and potential joint and regional partners. Program participants may choose to set goals and priorities based on the level of impact they can have; for example, whether the goal will have a greater impact in the short-term versus the long-term, or vice versa. HUD also recognizes that efforts involving the need for cooperation between different agencies or between different local governments may often be dependent on having effective intergovernmental coordination.

The AFH planning framework, including prioritization of significant contributing factors and setting goals allows for program participants to match goals and policy options to different local circumstances and the different types of fair housing issues communities face. For instance, different approaches and goals may be needed in high cost versus low cost markets, housing markets with higher vacancy versus lower vacancy rates, in areas with different patterns of single family versus mixed use development, or in areas experiencing economic or population growth versus longer-term decline. Applying place-based, mobility, preservation and rehabilitation or incentives for new construction, affordable rental or single family approaches may be appropriate as described in the balanced approach and depending on fair housing issues and related contributing factors as identified in the AFH. The AFFH process also envisions the possibility of adopting innovative and experimental goals and priorities as a way of attempting different approaches that may yield positive fair housing outcomes.

With respect to smaller program participants, HUD continues to strive to find ways to better enable these entities to comply with their obligation to affirmatively further fair housing while recognizing their resource limitations.

In this regard, HUD published a notice in the **Federal Register** on October 24, 2016, at 81 FR 73129, in which HUD announced that it moved the AFH submission deadline for grantees that receive less than \$500,000 in CDBG who would otherwise be due to submit based on the program year that begins on or after January 1, 2018, for which a new 3 to 5-year consolidated plan is due, to the program year that begins on or after January 1, 2019, for which a new 3 to 5-year consolidated plan is due. HUD believes that the one-year delay in the submission deadline will not only help program participants that receive smaller CDBG grants, but will give HUD additional time to find ways to reduce burden for program participants that receive relatively small CDBG grants, as well as for qualified public housing agencies (QPHAs) that will also begin submitting based on their first planning cycle beginning on or after January 1, 2019.

2. The accuracy of the agency's estimate of the burden of the proposed collection of information.

Several commenters stated that they could not advise whether HUD's estimate of 240 hours is accurate, but that they could advise that completion of the assessment tool is an insurmountable financial and physical burden, especially because the consolidated planning process immediately follows. A few commenters stated they had to hire consultants to do their 2015 consolidated plan (using city money, because they would have gone over the 20 percent cap using CDBG money); listed salaries and other costs. Other commenters stated that it is difficult to know what the burden will be, as administrative burdens have been doubled for early submitters because training is just now being offered and changes to the tool have been issued while participants are doing the assessments. A commenter stated that large local governments and joint/regional AFHs cannot quantify the amount of community engagement required.

Other commenters stated that the estimate of 240 hours is too low. A commenter stated that HUD's estimate is "grossly underestimated," particularly for participants that have not previously completed robust AIs. Another commenter stated that the 240 hour estimate is inadequate, due to the time

required to plan and run public meetings, translate notices, interpret information; obtain and analyze supplementary data that is not included in the tool; and to review and to coordinate with several city departments, other cities in the region, the county, and the housing authority. A commenter stated that one grantee documented over 600 staff hours, and another documented 250 hours solely for community engagement. Another commenter adds that grantee staff cannot complete the AFH due to other required reports and administrative duties associated with the CDBG program—Citizen Participation Plan, 5-Year Consolidated Plan, Annual Action Plan, Semi-Annual Labor Reports, Consolidated Annual Performance and Evaluation Report (CAPER), quarterly financial reports, Section 3 reporting, Minority Business Enterprise (MBE)/ Women Business Enterprise (WBE) report, Integrated Disbursement and Information System (IDIS) input and environmental review for each activity, sub-recipient monitoring, Federal Funding Accountability and Transparency Act (FFATA), Central Contractor Registration (CCR)/Data Universal Numbering System (DUNS), Davis-Bacon, OMB directives, and Office of Inspector General (OIG) Bulletins.

A commenter stated that the estimate should be revised after participants complete AFHs. Another commenter stated that the AFH should ask grantees to track the hours and cost for preparing the AFH.

HUD Response: HUD appreciates the comments provided on HUD's burden estimate. HUD agrees with the commenter that a more accurate estimate of the time and cost involved in preparing the AFH may not be known until program participants submit their AFHs. HUD also appreciates the suggestion made by the commenter that the AFH should ask grantees to advise of hours and costs involved in preparing their AFH. HUD intends to also continue to monitor and assess the impact and burden of implementation of the AFH process on program participants, including on the range of different fair housing outcomes.

3. Ways to enhance the quality, utility, and clarity of the information to be collected.

Commenters stated that in the segregation section, participants are asked to identify areas in the jurisdiction and region that are segregated and integrated, and referred to Table 3 (dissimilarity index). The commenters stated that the dissimilarity index calculates values for the

jurisdiction and region as a whole, does not indicate spatial patterns, and provides no values for areas within the jurisdiction and region. The commenters asked that HUD make available values for each jurisdiction within the region and a comparison. The commenters stated that the segregation section asks for tenure data, which is not provided. The commenters stated that tract-by-tract tenure data is available on HUD's Comprehensive Housing Affordability Strategy (CHAS) site but is unlikely to be accessed unless it is part of the data for which HUD requires consideration.

Commenters stated that gaps in HUD-provided data will impede assessment of needs of individuals with disabilities. Specifically, HUD should provide Federal data from (1) the Money Follows the Person program, and the Medicaid home and community-based waiver programs and options from the Center for Medicare and Medicaid Services (CMS); (2) data on persons with disabilities living in nursing facilities and intermediate care facilities for individuals with development disabilities from CMS (including data about answers by individuals in nursing facilities to a question about whether they want to leave the facility and return to the community); and (3) data on people with disabilities experiencing homelessness (from the HUD Homeless Management Information System (HMIS) and/or Annual Homeless Assessment Report (AHAR) databases). The commenters stated that despite the lack of uniform data about people with disabilities, the lack of data is not a reason to exclude consideration of the information. One of the commenters stated that the data provided on persons with disabilities should be further broken down by income and renter status. Another commenter stated that if HUD is unable to provide data on access issues for people with disabilities, and local data is unavailable, this analysis should not be required.

Other commenters stated that the focus on R/ECAPs is misplaced without similar analysis of areas of concentrated white affluence; that identifying these areas and factors contributing to their creation and perpetuation is important to further fair housing, address segregation, and promote mobility.

Another commenter stated that HUD should explore the possibility of including more questions that would prompt a discussion within communities and regions that may have considerable concentrations of wealth, but low instances of integration, to better facilitate goal-setting for purposes

of expanding fair housing choice for members of protected class groups.

Another commenter stated that HUD should provide data underlying maps as maps can help spot issues but the maps are worthless for making objective, quantitative comparisons. A commenter stated that in the disproportionate housing needs section, Tables 9 and 10 contain no data for areas within the jurisdiction and the maps are useless for quantitative analysis. The commenter stated that HUD should provide tables underlying every map. Another commenter stated that HUD's failure to provide a data mapping tool for housing authorities means that participants may need to decide whether to collaborate without adequate information, as the map examples are insufficient.

A commenter suggested that HUD provide grantees with proposed assessments that they may accept or modify to develop locally tailored approach to affirmatively further fair housing. Another commenter stated that "region" must be better defined. The commenter added that although regional assessment is a core element of the assessment, this assessment using existing HUD data will be difficult, and that it is unclear what is required, and should be optional.

HUD Response: HUD appreciates the suggestions of the commenters. The 2016 Assessment Tool addresses some of these concerns, but not all at this time. In the 2016 Assessment Tool HUD has provided, in the instructions, that in identifying areas of segregation and integration program participants should not only focus on areas of minority concentration in their jurisdictions and regions, but also areas of majority concentration. With respect to enhanced ways to make maps and data easily accessible to program participants, HUD continues to work to make the HUD-provided data and maps easily accessible and easily readable to its program participants. HUD believes it has made considerable progress in this area, and acknowledges it has more work to do here. HUD will continue to provide updates to the AFFH Data and Mapping Tool (AFFH-T) as more current data becomes available.

4. *Ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.*

Commenters recommended that the AFH tool should be accessible through IDIS and eliminate redundancies and overlap between the AFH and the consolidated plan. A commenter stated

that electronic submission is the only practical and logical method. Another commenter stated that there should be an option to download the maps and tables that are pre-populated with HUD-provided data (similar to the Action Plan and CAPER in the eCon Planning Suite).

A commenter stated that data should be available through the portal directly, so that it is accessible to stakeholders without specialized training. Another commenter stated that there should be a way to download shape files and data in tabular format from the Assessment Tool for additional in-house geographic information system (GIS) analysis.

A commenter stated that it is concerning that to participate in a less-cumbersome process smaller communities must participate with another eligible community. The commenter stated that partnering to write the AFH would force the community to spend money the community does not have, particularly because HUD's new rules related to grant-based accounting have limited the administrative dollars the city can "tap into each grant."

Another commenter recommended that program participants only be required to conduct an AFH every 10 years, prior to the consolidated plan that follows the decennial census.

HUD Response: As stated in HUD's response to comments on question 3, HUD appreciates the commenters' suggestions. This 2016 version of the Assessment Tool has made progress in this area over the 2015 tool. HUD is continuing to work to increase the ease of electronic availability of the Assessment Tool, maps and data. HUD continues to work to make the HUD-provided data and maps easily accessible and easily readable to its program participants. HUD will continue to explore options for making improvements to the User Interface, to data provided and the functionality of the data tool, and providing additional guidance on using the HUD-provided data in the instructions to the Assessment Tool, as well as through other guidance materials. As HUD assesses longer-term improvements to the Assessment Tool data, HUD will continue to consider the comments received that recommended significant changes.

In determining the frequency in which an AFH should be prepared, HUD determined that every 5 years was an appropriate time period, similar to the time period for the PHA 5-year plan and the 5-year consolidated plan (although some consolidated plans are

submitted every 3 years at the election of the program participant).

5.³ *Whether the inclusion of the "inserts" for Qualified PHAs (QPHAs) and small program participants will facilitate collaboration; whether entities anticipate collaborating; (a): Any changes to inserts that would facilitate collaboration; (b): Changes that would provide more robust fair housing analysis; (c): Any changes that would encourage collaboration.*

In response to this question, commenters had a variety of suggestions. Several commenters stated that QPHA inserts will facilitate collaboration and that inclusion of the inserts is headed in the right direction. The commenters, however, suggested removing regional analysis by QPHAs so QPHAs can focus on areas for which they have control, and local governments can focus on larger regional control areas. The commenters stated that adoption of this proposal would reduce duplicative analysis for overlapping areas, but if not adopted, HUD must clarify when QPHAs and small program participants must conduct a regional analysis.

Another commenter recommended that to facilitate collaboration, the assessment tool should allow focus on "known" areas of concentration and on "known" locations of R/ECAPs and protected class groups, and HUD should provide data on protected class groups in PHA service area as this information is not readily known to QPHAs.

A commenter stated that HUD should substantially restructure the questions and accompanying instructions for the inserts. The commenter stated that it understood HUD's efforts to streamline the process for program participants with fewer resources, but stated the questions run the risk of sending a message to these program participants that they are being held to a different standard of analysis. The commenter stated that the AFFH rule already provides flexibility to smaller program participants when conducting joint or regional collaborations by allowing them to "divide work as they choose," and the inserts may inhibit community participation, as the analysis of these program participants will be separated from the rest of the fair housing analysis in the Assessment Tool. The commenter recommended that the inserts explicitly instruct these program participants to consider the sections of the assessment tool outside of the Fair Housing

³ The prior Notice inadvertently numbered this question as question 6. For clarity, this and the following questions have been renumbered in this summary.

Analysis section, such as community participation and the assessment of past goals, actions, and strategies. The commenter stated that if HUD retains these inserts, HUD must provide instructions at the beginning of each section of the insert that cross reference the remaining pieces of the analysis in the main portion of the Assessment Tool.

A commenter stated that in the QPHA insert, HUD should include a question regarding the QPHA's service area using geographic boundaries and other indicators commonly known in the community. The commenter stated that this will help place the maps in the HUD-provided data into context for the QPHA analysis and better facilitate community participation on the QPHA insert.

Another commenter stated that the disparities in access to opportunity question in the insert combines several questions, which is not conducive to a meaningful analysis. The commenter stated that the instructions in the QPHA insert are unclear as to whether QPHAs would have to review Table 12 (opportunity indices), which implies QPHAs are being held to a different standard. Other commenters recommended that the disparities in access to opportunity section of the QPHA insert be made optional for QPHAs because they do not have the skill set to meaningfully analyze transportation or education policies. Another commenter stated that program participants should be required to identify contributing factors in the inserts and that the disparities in access to opportunity section of the insert should include the same sub-questions as the main Assessment Tool. The commenter stated that the "secondary" participants should identify whether their own policies and processes contribute to segregation, lack of access to opportunity indices, or other fair housing issues.

A commenter stated that the "policies and practices" section of the QPHA insert should ask the QPHA to consider its admissions and occupancy policies more broadly, including grounds for denial of admission, as well as grounds for eviction or subsidy termination. The commenter stated that the grounds for which the QPHA decides to admit or evict a family, or terminate a subsidy can raise fair housing concerns. The commenter also recommended that this section ask the QPHA to outline its policies regarding providing access to persons with disabilities and LEP persons.

Another commenter stated that the list of programmatic barriers is too

cursory and PHAs should examine a more comprehensive list of programmatic barriers, and that the list should include source of income and other discrimination, availability of landlord outreach programs, low payment standards, portability restrictions, inspection delays, refusal to extend search times, lack of notice to families of their choices, lack of assistance in locating housing in opportunity areas, and geographic concentration of apartment listings provided to Housing Choice Voucher (HCV) families by the PHA.

Other commenters recommended that joint participants should adopt explicit measures to ensure that the community participation process includes the focused solicitation of information and recommendations pertinent to each individual participant, as well as the combined AFH.

A commenter stated that some small grantees are located outside of metropolitan statistical areas (MSAs), and the commenter suggested working with the National Community Development Association (NCDA) to reduce the scope of the proposed insert.

Other commenters stated that the insert does not provide enough of an incentive for small grantees to collaborate. The commenters stated that providing additional time and offering these inserts is an inadequate response to the burden small entities face in conducting an AFH.

A commenter did not propose changes to the inserts but recommended that HUD raise the threshold of those PHAs that may use the QPHA insert to PHAs with 2,000 total units instead of 550 total units. The commenter also recommended that HUD raise the threshold for small program participants that may use the insert to those that receive a CDBG grant of (at least) \$1 million or less, stating that this would reduce administrative burden and would benefit HUD staff by reducing the number of separate AFH submissions. Another commenter requested that HUD provide an additional 60-day comment period on the inserts since they were not introduced until the 30-day notice.

HUD Response: As noted earlier in this notice, HUD has raised the threshold for use of the insert from QPHAs with 550 or fewer units to PHAs with 1,250 or fewer units, which is reflected in the redline/strikeout version of the Assessment Tool that provides a comparison of the 2016 tool to the 2015 tool, HUD also provides at <https://www.hudexchange.info/programs/affh/> a redline/strikeout of the Assessment Tool that accompanied the 30-day PRA notice and this final version. This

redline/strikeout version reflects the many changes that HUD made in response to public comment. The accompanying instructions for the insert also address questions of the commenters seeking clarification about certain aspects of the inserts.

With respect to additional time to comment on the inserts, HUD submits that 30 days was sufficient time to comment, and PHAs and grantees that received a CDBG grant of \$500,000 or less are not required to undertake the analysis provided by the inserts. They may use the inserts or the main portions of the Assessment Tool to undertake the required analysis.

HUD disagrees with the comment that the addition of streamlined Assessment Tool (inserts) for smaller program participants might inadvertently send a message that such smaller program participants are being held to a different standard of analysis. As HUD stated in the Preamble to the AFFH Final Rule, ". . . HUD commits to tailor its AFHs to the program participant in a manner that strives to reduce burden and create an achievable AFH for all involved. HUD intends to provide, in the Assessment Tool, a set of questions in a standard format to clarify and ease the analysis that program participants must undertake. The Assessment Tool, coupled with the data provided by HUD, is designed to provide an easier way to undertake a fair housing assessment." 80 FR 42345 (July 16, 2015). Moreover, the inclusion of the inserts is also intended to facilitate joint and regional partnerships with smaller program participants. Such partnerships can result not only in improved planning and fair housing analysis but in intergovernmental and interagency cooperation and collaboration in goal setting, program operations and results.

Also, in the inserts for smaller program participants, HUD has adopted a modified approach in the final Assessment Tool for identifying contributing factors. The approach adopted also attempts to address the issue of burden for these smaller agencies, by combining the identification of such factors for the four fair housing issues assessed in the Assessment Tool (Segregation, R/ECAPs, Disparities in Access to Opportunity, and Disproportionate Housing Needs) in one step. This is intended to reduce any unnecessary duplication of effort and to better focus the analysis and identification steps to help produce meaningful fair housing goals.

HUD notes that all program participants using the full Assessment Tool also have the option of completing

the analysis and identification of contributing factors steps in a variety of ways that make the most sense to them. HUD has added general instruction to the Assessment Tool to clarify this. For instance, program participants may choose to complete several of the analysis sections first and then consider and identify contributing factors as a next step for those sections. HUD acknowledges that contributing factors can often affect more than one fair housing issue. Some program participants may find it beneficial for them to identify contributing factors in combination across fair housing issues after completing the analysis for those sections first. The User Interface is set up in a way to allow for this approach.

As noted above, HUD has raised the threshold of those PHAs that may use the insert to PHAs with 1,250 total units instead of 550 total units. HUD will continue to consider efforts to reduce administrative effort on all program participants, including PHAs and local governments. As lessons are learned, in the future, there may be opportunities to consider further enhancements to the Assessment Tool. HUD will continue to enhance the instructions and guidance on the analysis of jurisdictions and regions where there are new construction, rehabilitation of existing housing, mobility, and community revitalization, supporting program participants in conducting their AFH.

Regarding the public comment that the PHA insert should ask the PHA to “consider its admissions and occupancy policies more broadly,” HUD has made revisions to instructions and the contributing factors definitions that clarify the demographic analysis of protected classes living in public housing, Housing Choice Vouchers residences, and other publicly supported housing developments as related to the fair housing concerns on the concentration due to admissions, income targeting, and the demographic composition and protected class characteristics of applicants on the array of publicly supported housing waiting lists.

Regarding the public comments on PHA service areas and the need for HUD to provide accurate data for these important agencies, HUD reiterates its commitment to provide data that is useful for their AFHs. HUD’s statements on the known limitations of national level data, maps and tables when applied in rural areas is intended as an acknowledgement of the need for flexibility for these agencies in conducting an AFH. Local data and local knowledge can often be useful or more readily applied to the questions

and issues raised by the Assessment Tool. For instance, dot density maps may have limitations for large geographic areas with low population densities. In addition, as stated HUD will be providing data for individual PHA service areas as this information becomes available. Although, HUD has provided clearer instructions in the Assessment Tool related to the PHA Regional Analysis required regional analysis for PHAs in different geographic areas, which includes multiple parts to this explanation: (1) A description of the service area, also known as the jurisdiction, of various size PHAs in terms of their authorized geographic operations; (2) a description of the PHA’s region for purposes of analysis under the AFFH rule; (3) a description of the HUD-provided data for the PHA’s applicable region; (4) instructions related to use of data and identification of fair housing issues and related contributing factors for different size PHAs; and (5) instructions related to rural PHAs, State PHAs, and PHAs in Insular Areas.

6. Clarity of changes in content/ structure of questions in Disparities in Access to Opportunity with respect to protected classes. Also, whether appropriate analysis can be conducted if other protected classes are assessed only in “Additional Information” questions. Should protected classes be specified in each question? Additional question in Disparities in Access to Opportunity about all protected classes?

A commenter stated that an analysis of disparities in access to environmentally healthy neighborhoods is necessary for CDBG program participants, as grantees must do environmental review for each CDBG activity. The commenter stated that applying this to each protected class would be difficult, and that small entitlements do not have the financial capability to use CDBG funds to effect significant change with respect to this area of analysis.

Another commenter stated that the question relating to environmental policies should ask about siting and permitting processes, cumulative impact analyses, legislative or regulatory protections such as health impact assessments, and funding distribution processes that impact activities such as remediation. The commenter stated that these structural factors contribute to cumulative impacts of environmental burdens and should be included in the index and contributing factors appendix. The commenter stated that participants should assess, using local data and local knowledge, a range of environmental health factors (in

addition to air quality), including soil and water toxins, mold, standing water and water-borne illnesses due to inadequate drainage, violence, and inequitable distributions of benefits such as park space.

Other commenters stated that HUD has provided more structure and clearer directions for the disparities in access to opportunity section, and that such restructuring and clarity have made it sufficient to conduct the analysis for additional protected classes within the “Additional Information” question if there is sufficient space in that field. The commenters stated, however, that HUD should include the protected class groups within each question in this section to facilitate responses.

Another commenter stated that the questions in the disparities in access to opportunity section are clear and will yield a meaningful analysis, but that the data provided is provided only by race/ethnicity, national origin, and familial status. The commenter stated that it would be helpful if HUD provided data for other protected classes (sex, disability, age), and if HUD provided a more detailed breakdown of ethnicity (i.e., “Asian” broken into subcategories), and to cross-tabulate the categories with housing cost burden and median income by census tract—to facilitate meaningful analysis in large, diverse cities. The commenter stated that, if HUD cannot provide such data perhaps HUD can provide guidance on obtaining custom tabulations.

A commenter stated that an appropriate analysis would include an assessment of all protected classes in each section; specification of protected class groups would ensure that participants address each group without considering whether groups were not included or inadvertently omitted. Another commenter similarly recommended that HUD include questions in each subsection of the disparities in access to opportunity section about other protected classes, not just those for which HUD is providing data, stating that doing so would provide for a fuller analysis within each subsection without requiring the program participant to revisit the topic in the “additional information” section. The commenter expressed concern about waiting until the “additional information” section to conduct such an analysis could result in the exclusion of this portion of the analysis.

Another commenter recommended that HUD restructure the disparities in access to opportunity section, stating that the questions in each subsection should, ask program participants to

examine HUD-provided data, local data, and local knowledge for all protected classes under the Fair Housing Act, and describe: (1) Disparities in access to opportunity for the given opportunity indicator; (2) how disparities regarding that opportunity indicator “relate to residential living patterns in the jurisdiction and region”; and (3) “programs, policies, or funding mechanisms that affect disparities” in access to a particular opportunity indicator. The commenter stated that if this structure is not feasible, HUD should, at a minimum, include questions about all protected classes under the Fair Housing Act in each subsection.

A commenter stated that HUD should not add additional questions about disparities in access to particular opportunities because these questions will be addressed within the primary text. Another commenter similarly stated that an additional question related to disparities to the particular opportunity based on all protected classes would be redundant and too general.

A commenter stated that the education questions do not assess students’ actual access to proficient schools, and whether residential segregation results in educational segregation. The commenter stated that the questions must assess student presence or participation, and should ask: (1) The distribution of children by race/ethnicity attending proficient schools in the jurisdiction/region; (2) racial segregation in public schools in the jurisdiction/region; and (3) economic segregation of public schools in the region/jurisdiction.

Another commenter stated that HUD should delete “participant’s own” in qualifying “local data and knowledge” as participants should not only use local data and knowledge available within their own departments when assessing disparities in access to opportunity.

A commenter stated the term “access” is vague and risks confusion or evasion by program participants, and recommended that HUD clarify that access is measured by both the physical proximity to employment, educational, environmental, and transportation assets, and actual rates of participation in programs and institutions (such as actual rates of enrollment in proficient schools). The commenter further stated that the quality of transportation to these assets may be relevant in assessing access.

Another commenter stated that program participants should use local data and local knowledge to evaluate transportation policy, as well as cost

and access, as transportation can drive revitalization/gentrification, or can bypass poorer communities. The commenter stated that program participants should assess the approval, financing, and civil rights oversight of transportation policies.

HUD Response: The redline/strikeout draft of the tool that compares this final version to the 2015 tool reflects the many changes that HUD made to the 2015 approved version, primarily in response to comments that HUD received on the 60-day PRA notice. HUD made some additional minor changes in response to the 30-day notice, but believes that the structure of this section of the tool in the version of the tool that accompanied the 30-day notice presents the appropriate questions to yield a meaningful analysis.

2. Other Issues Raised by the Public Commenters

Contributing Factors

Several commenters offered suggestions on contributing factors. A commenter stated that the contributing factor of “Land use and zoning laws” (for segregation, R/ECAPs, disparities in access to opportunity, and disproportionate housing needs) is too narrow a categorization of local public policies affecting housing choice for lower income households. The commenter suggested replacing with: “public policies that limit or promote production of affordable housing.” Commenters stated that important categories of policies include: permitted project scale and density, provision of local financial resources, assistance with site selection, reduction of unnecessary parking requirements, fee reductions or waivers for affordable housing, reduction of administrative delays, permitted manufactured housing, and inclusionary housing policies. The commenter stated that “Lack of support for developing and preserving affordable housing” is a critical contributing factor for disproportionate housing needs section of the Assessment Tool.

Another commenter asked under what circumstances HUD expects program participants to identify the contributing factor of “displacement of residents due to economic pressures.” The commenter recommended that the analysis of housing be limited to the jurisdiction.

Commenters stated that the contributing factor of “lack of source of income protection” fails to account for the different nature of housing voucher programs. The commenters stated that at the Federal level, Congress has not enacted a law to require private

development owners to participate in any voucher programs.

Several commenters thanked HUD for including barriers to fair housing choice faced by victims of domestic violence and harassment, and requested that HUD make certain changes to how this is accomplished based on VAWA and HUD’s recent final Harassment Rule. One of the commenters stated that the contributing factor “Lack of housing support for victims of sexual harassment, including victims of domestic violence” should be divided into two factors because, as drafted, the factor conflates two distinct concepts that should be considered separately: (1) Displacement of and/or lack of housing support for victims of domestic violence, dating violence, sexual assault, and stalking (additions due to VAWA); and (2) sexual and other forms of harassment. Harassment includes quid pro quo and hostile environment—and harassment due to membership in any protected class gives rise to FHA liability. The commenter stated that the first contributing factor should be included in Disparities in Access to Opportunity, Disproportionate Housing Needs, and Publicly Supported Housing, and recommended that the second factor be included in Disparities in Access to Opportunity, Disproportionate Housing Needs, and Publicly Supported Housing. The commenter proposed descriptions for both contributing factors to add to Appendix C.

A commenter suggested adding “Eviction policies and practices in the geographic area” to the list of contributing factors in the following sections of the Assessment Tool: R/ECAPs, disparities in access to opportunity, and disproportionate housing needs. The commenter stated that eviction causes poverty, makes it difficult for such tenants to find housing, and tenants are unlikely to report habitability problems. The commenter stated that people living in R/ECAPs, minorities, and individuals with disabilities disproportionately experience eviction. Commenter stated that Appendix C includes “eviction policies and procedures” as part of a list relating to public housing, but that discussion of eviction should not be limited to public housing.

Another commenter stated that HUD has provided a sufficient array of contributing factors, and should allow participants the flexibility to identify other factors relevant to the jurisdiction and region (rather than requiring analysis of additional inapplicable factors). Another commenter stated that the instructions on contributing factors

should make clear that program participants are required to identify contributing factors that are not listed in the HUD-provided lists if that contributing factor creates, perpetuates, contributes to, or increases the severity of at least one fair housing issue.

A commenter recommended that HUD add the contributing factor of “Adverse housing decisions and policies based on criminal history” to the list of contributing factors based on HUD’s recently issued guidance on this subject. The commenter stated that the analysis should not be confined to the publicly supported housing section, but should be assessed more broadly, and include the private housing market. The commenter also recommended HUD include a new contributing factor of “Lack of meaningful language access for individuals with limited English proficiency” and stated that it should be included in all sections of the assessment tool, except the disability and access section. The commenter also suggested that in the description of “community opposition,” HUD include “lack of political will” that results from successful community opposition.

HUD Response: Both redline/strikeout versions provided at <https://www.hudexchange.info/programs/affh/> reflect the changes made in response to public comment received during 2016. In the instructions provided to the final approved Assessment Tool, HUD clarifies that while program participants are required to identify those factors that significantly create, contribute to, perpetuate, or increase the severity of one or more fair housing issues, program participants are not required to conduct separate statistical or similar analyses to determine which factors to identify and need only rely on the information considered in the community participation process, assessment of past goals and actions, and fair housing analysis sections of the Assessment Tool, including information obtained through the community participation process to meet its obligations to identify contributing factors under the AFFH Rule.

In addition, the instructions highlight that program participants have flexibility in how they choose to prioritize significant contributing factors, so long as they give highest priority to those factors that limit or deny fair housing choice, access to opportunity, or negatively impact fair housing or civil rights compliance. Once fair housing issues and contributing factors have been identified and prioritized, the program participant has options in how to set goals for overcoming the effects of contributing

factors and related fair housing issues. In setting goals, relevant considerations for doing so may include the resources, the likely effectiveness of the policy options that are available to the program participant, and collaborative goals among joint or regional partners.

Also, HUD agrees with the commenter regarding the scope of the land use and zoning laws contributing factor. Specifically, HUD has responded to the comment by adding language to the contributing factor on “Land Use and Zoning.” Additional language was added to clarify that this contributing factor might include, “[the lack] of support for development and preservation of affordable housing (may include efforts for neighborhood stabilization, green building, transit oriented development, and smart growth development).” HUD also agrees with the commenter on this issue and the relationship between the analysis of “disproportionate housing needs” and potential policy goals. Additional clarification on this subject are discussed in this Notice, below in the HUD responses to comments related to publicly supported housing.

User Interface

A commenter stated that user Interface is difficult to navigate. Another commenter stated that, within the Assessment Tool, it would be helpful to be able to view and print the entire document (the AFH tool webinar indicated each section would need to be printed separately). Other commenters recommended that HUD migrate the assessment tool from the User Interface to the existing IDIS e-Con planning suite which grantees are already familiar with, and this would enable closer integration of the AFH with Consolidated Plans and Action Plans.

HUD Response: During the year since the Local Government Assessment Tool was approved in 2015, HUD has spent considerable time striving to make the User Interface easier to navigate. HUD believes that the current version is easier but acknowledges additional work is still needed. HUD will continue to further improve the User Interface, as well as the AFFH Data and Mapping Tool, to meet the needs of different program participants.

AFFH-T & HUD-Provided Data

Several commenters stated that the data and mapping tool has often failed to load, and has crashed various browser. A commenter stated that when the AFFHT does work, it loads each map and changes to the map very slowly when it works. The commenter expressed concern about the utility of

the tool when multiple agencies are using it. The commenter stated that HUD must ensure that the data is accurate, for example the geocoding from IMS/PIC. Another commenter requested that the loading speed for the maps be increased.

Several commenters raised concerns about the dots in the dot density map. Commenters stated that the following: The size of the dots in the dot density maps should be adjustable to see them more clearly; when you zoom in the dot-size stays constant; if one adjusts the monitor, one loses portions of the map; there is insufficient contrast between colors at that size; the remaining dots shift if one is in the Table of Contents (TOC) and deselect a category; and that if one re-selects a category, the dots shift again, but not to their original position. The commenters stated that all of these issues should be corrected.

Commenters also raised issues about the maps and tables. With respect to maps, a commenter asked why the R/ECAP on Map 2 is different from the other maps, and another commenter stated that there are data errors in Map 5 as several Public Housing locations are missing, and several multifamily markers come up with Null, and some are misidentified, e.g., a hotel is listed as multifamily, and some markers are not active. Other commenters recommended that the HCV maps be layered with the publicly supported housing maps to comprehensively understand all subsidized housing in an area. Another commenter stated that currently, the assessment tool allows only 17 different maps to be displayed and indices can generally only be layered with demographic data. The commenter suggested that participants be able to choose from a menu of layers to use in one map and participants be able to layer more than one set of data over the indices (higher levels of user customization), and further stating that it should be easier to find the data sources for the 17 maps to facilitate verification and in-house analysis.

With respect to tables, a commenter stated that Tables 9 and 10 do not provide a useful basis for comparing the needs of families with children with publicly supported units, as the tables do not distinguish renter from homeowner needs and do not contain income group information available in the CHAS data (those with incomes less than 30 percent of area median income (AMI) need different policies than those at 60–80 percent of AMI). Another commenter stated that Tables 5, 6, 8, and 11 for use in the publicly supported housing section do not include low-income housing tax credits (LIHTC)

units (although the instructions indicate that Map 5 produces LIHTC data and the data documentation incorrectly lists it as on Table 8). The commenter stated that, without LIHTC data, answers to the questions in this section have little value, as the data does not show current affordable housing. The commenter stated that Table 6 is misleading as “Housing Type” counts households by race/ethnicity, but the next section shows race/ethnicity for the total population, and stated that note 2 in the table is wrong.

Other commenters recommended that HUD add LIHTC projects, and provide separate breakouts of elderly and family public housing, and Section 202 and 811 developments. A commenter urged HUD to add demographic data for individual LIHTC developments to the AFFHT, stating that given the prevalence of the LIHTC program, it is imperative to have this information in order for communities to conduct a robust assessment of fair housing choice in a jurisdiction and region. The commenter also expressed support for differentiating between 4 percent and 9 percent tax credits in the AFFHT.

Commenters stated that HUD should clarify: (1) How scattered site public housing is shown on the map and in the tables; (2) how units removed from the PIC as part of RAD will be shown on the map and in tables; and (3) how units with more than one subsidy (LIHTC, Section 8) are shown on the map and in tables. Another commenter stated that because the distribution of Section 8 vouchers may be different than project-based, it may be helpful to understand how multifamily rental stock is distributed (in addition to landlords’ acceptance of Section 8 vouchers). The commenter further suggested that HUD provide data on additional tenant characteristics including national origin, limited English proficiency (LEP), age, etc.

Other commenters asked if there is an assumption that all analysis of segregation and integration will be at the census tract level. A commenter stated that voucher data should be available on the census tract level. Another commenter suggested that AFH downloadable data be available at census tract level (rather than jurisdictional level) to aid local data analysis, as it would be helpful for participants to be able to select areas on the map and obtain data for that selection—whether census tract or group of census tracts—to approximate neighborhoods and planning districts.

Commenters stated that on May 18, HUD stated that the R/ECAP map data was updated from 2006–2010 to 2009–

2013 American Community Survey (ACS); however, the commenter stated that it is unclear which maps HUD was referring to and whether the rest of the ACS data in the maps and tables is 2006–2010 or 2009–2013. Commenters recommended that each table specify which ACS data is used. Another commenter stated that all data provided by HUD should be current ACS data in map and table format for accurate analysis and interpretation.

A commenter recommended that HUD provide standardized calculations of the changes in demographic and other trends over time and of comparisons between the community and CBSA region, so grantees do not need to do the calculations themselves. The commenter stated that HUD should provide national data related to schools and education and allow grantees to supplement as needed with local data and knowledge. The commenter also stated that an analysis of fair lending is more central to a fair housing analysis than some of the opportunity index measures. HUD should provide data on home purchase loans by race/ethnicity and trends, and data on HECM loans.

A commenter stated that HUD did not decide whether to exclude college students from the poverty rate in R/ECAPs, and asked that HUD reconsider excluding college students from the poverty rate calculation or calculate the poverty rate with and without college students. Another commenter expressed concern about how to appropriately define R/ECAPs in rural areas, stating that HUD should provide suggestions for how QPHAs should define R/ECAPs in rural areas, and notes that these suggestions could be included in the instructions to the assessment tool or in additional guidance.

A commenter recommended that HUD provide data on evictions and subsidy terminations in the AFFHT, stating that this will allow program participants and members of the community to be able to evaluate the extent to which members of protected class groups are experiencing evictions and subsidy terminations.

A commenter stated that HUD-provided data about disability has a variety of limitations and suggests requiring local governments to supplement with local data, and suggested that data on disability that is available to HUD be made available to localities, such as national data on disabilities among veterans. The commenter stated that HUD should obtain more data from local governments about the needs and opportunities for people with disabilities at a more granular level; the data and analysis should differentiate

between physically accessible units for people with mobility and sensory disabilities, and the need for independent, supported, and shared housing options for people with disabilities including mental health and intellectual disabilities, and people with traumatic brain injuries.

Another commenter stated that it is pleased that HUD advised that it would provide additional data on homeownership and rental housing but asks when this data will be available.

Commenters stated that HUD should provide a schedule of planned data updates in advance to minimize mid-stream revisions of the AFH. A commenter stated that some data is over 5 years old and that data sets should be updated annually.

HUD Response: HUD continues to thank all of the public commenters for their valuable and ongoing feedback on the AFFH Data and Mapping Tool, both via these public comments and through the HUD Exchange “Ask A Question” portal (<https://www.hudexchange.info/get-assistance/my-question/>).

HUD offers the following responses to specific comments as follows:

Regarding comments on the display of map information, HUD will continue to monitor and implement ways to improve performance, including improving the visual display of information and options for users to make adjustments according to their needs. Also, HUD is adopting a change in the maps for publicly supported housing by combining two separate maps into one map that can display Housing Choice Vouchers along with other housing programs simultaneously. HUD continues to work with program participants to improve geocoding accuracy of HUD administrative data. In addition, HUD will review and revise the data documentation and its footnotes and provide other explanatory language.

Regarding comments on how current the HUD-provided data is and the frequency of updates, HUD will schedule regular updates and will provide notice of any updates on the HUD Exchange Web site. HUD will also provide guidance clarifying that program participants that have started conducting an AFH will not be required to use all newly updated data. HUD is also working on making improvements to the AFFH Data and Mapping Tool to minimize the effects of data updates on program participants while they are completing their AFH.

Regarding the provision of additional types and formats for data, HUD notes that raw data is available for download directly from the HUD Exchange site,

where all other AFFH guidance and materials are also provided. HUD is planning to make the raw geo-enabled data available in GIS Open Data site where it can be downloaded in multiple open formats including GIS format.

Regarding LIHTC related data, HUD continues to administer and improve the LIHTC data on projects placed-in-service and LIHTC tenant demographic data. HUD will work to provide data for AFFH-T at an appropriate level of geography (e.g., State, County, City, development, etc.) as the data becomes available and verified for consistency and reliability. These data may be available in a variety of formats external to the AFFH-T Data and Mapping tool. It is not expected that development level tenant data will be available in the near term due to current data quality issues. Additionally, compliance with federal privacy requirements will limit certain development-level data that will be available in the future. For background on data that are currently available, please see HUD's report, "Data on Tenants in LIHTC Units as of December 31, 2013" which is available at <https://www.huduser.gov/portal/publications/data-tenants-LIHTC.html>. HUD will also continue to pursue additional guidance on potential sources of readily and easily accessible information that may be useful as supplementary local data.

Regarding the specific comment on scattered site public housing developments, HUD confirms that such developments are included in the maps and tables when they are listed as a single development in the HUD PIC administrative data system. HUD has added an instruction to the Assessment Tool noting this and advising program participants to use caution when considering such developments, particularly as it relates to census tract demographics. HUD intends to address this issue over time, as needed, but advises that this may involve addressing the issues on a case by case basis. Program participants are empowered to use local data and local knowledge in this and other cases where such information is superior to the HUD-provided data.

In regard to the public comment regarding the use of data for joint collaborations between multiple agencies, HUD notes that the User Interface currently allows individual program participants to access the maps and tables that are relevant for their own jurisdiction. HUD is making further improvements to gather information on PHA service areas and will add this significant new information to the AFFH-T as it becomes available.

Specifically regarding information relevant to PHAs, HUD is adding additional tables and functionality for maps to provide information on the assisted housing stock and residents served by individual PHAs. Also, HUD is exploring options for posting AFHs as an online resource for program participants and the public.

Regarding comments on whether to exclude college students from the calculation of R/ECAPs, HUD is taking the comments into consideration and has not made any changes at this time. Any changes to the methodology in the future will be communicated through updates on HUD Exchange.

Publicly Supported Housing Section

A commenter stated that there is no data on publicly supported housing by "bedroom size" and until the data is available, HUD should delete the question referencing bedroom size. The commenter stated that the analysis of comparing the demographics of publicly supported housing occupants to the demographics of the areas in which they are located implies that when the demographics comport with one another, this represents a positive fair housing outcome, but HUD has barred this approach. Other commenters recommended removing the new question added in the publicly supported housing section, stating that the comparison of the demographics of the types of publicly supported housing between the jurisdiction and region is not the right approach to the AFH.

A commenter requested that HUD clarify the categories it expects participants to compare and what "same category in the region" means. The commenters expressed concern that the question implies a causal relationship that is difficult or impossible for localities to assess, and further stated that the various programs have different requirements and eligible populations, and without controlling for this, the comparisons may be incorrect or misleading. A commenter stated that the comparison would not take into account critical factors that limit participation in publicly supported housing—including federal requirements such as income limits (rather than the jurisdiction's choices). The commenter also stated that the data sets and responses required are unreasonable, as reliable data is unavailable and in many subsidized projects, data gathering and reporting is not required.

HUD Response: HUD appreciates the comments received on the new question asking for a regional comparison of publicly supported housing. Specifically, this question asks for a

comparison of the demographics of assisted housing in separate publicly supported housing program categories to the regional demographics for that same program category. Based on feedback, HUD has decided to retain this question in the final Assessment Tool and has made several clarifications in the instructions. The instructions clarify the specific comparisons that are being asked. HUD has also added an instruction that is generally applicable to all regional publicly supported housing questions providing additional context. Consistent with the balanced approach, there are a myriad of public policy options available to program participants involving preservation, mobility and siting of new housing opportunities when appropriate in relation to fair housing issues and related contributing factors. As with all questions in the Assessment Tool, on a continuing basis, HUD will consider and assess the utility of this question as it relates to conducting a meaningful fair housing analysis.

The added instruction states, "Conducting a regional analysis can help identify fair housing issues in a broader context, for instance if fair housing issues in the jurisdiction are affected by regional factors, and can inform regional solutions and goal setting. For example, depending on what the regional analysis shows, and always dependent on local conditions, regional solutions could include coordinated or merged waitlists, increasing HCV portability opportunities, affirmative marketing across jurisdictional lines, administering Section 8 vouchers on a regional basis with active mobility counseling, landlord recruitment (including sharing of landlord lists across PHAs) to provide greater access to housing in areas with opportunity or the need for the preservation of affordable housing. This regional analysis can also be compared to the Disproportionate Housing Needs conducted above."

In a broader context related to the balanced approach to affirmatively furthering fair housing, HUD has made a number of modifications to the Assessment Tool to recognize the importance of preserving existing affordable housing in connection with affirmative fair housing goals and strategies in connection with community revitalization. As HUD's own studies on worst case needs for affordable housing make clear, there is an ongoing national crisis in housing affordability that particularly affects lower income families. In many local and regional housing markets, low

income households are priced out of the market altogether with some form of income support or housing subsidy being needed to access decent, safe and affordable housing. This makes the preservation of the existing limited supply of long-term affordable stock a key component of any balanced approach to addressing the findings drawn from assessments of fair housing. At the same time, HUD maintains the importance of mobility solutions in connection with affirmative fair housing goals and strategies, and notes that such strategies are not mutually exclusive.

In support of HUD's commitment to the balanced approach to addressing fair housing issues, a number of key changes have been made to the Assessment Tool.

(1) Added the contributing factor on the "Loss of Affordable Housing." This factor was previously released for public comment as part of the Assessment Tool for State and Insular Areas. This potential contributing factor notes that, "The loss of existing affordable housing can limit the housing choices and exacerbate fair housing issues affecting protected class groups." This factor, along with the contributing factor on "displacement of residents due to economic pressures" allows program participants to recognize the need to preserve affordable housing in areas undergoing economic improvement as a way of maintaining access to opportunity assets for low-income residents and protected class groups as these areas experience increased access.

(2) The Assessment Tool has strengthened the connection between the analysis of disproportionate housing needs and the analysis in the publicly supported housing section. These include adding an instruction noting that the analysis in these sections can be compared to each other, as well as by clarifying the analysis questions in the inserts for PHAs with 1,250 units or fewer and smaller local governments to compare the demographics of who is receiving housing assistance with disproportionate housing needs. The instructions to the 1,250 units or fewer PHA insert have also been clarified to note the policy linkage between this analysis and the overriding housing needs analysis required in the PHA Plan as one possible practical application of the AFH analysis.

(3) Adding instructions on LIHTC. The instructions indicate that program participants may distinguish between nine and four percent tax credits and the different uses that each can be used for, while analyzing the relation of such tax credit properties to fair housing issues and related contributing factors, including distinguishing for

rehabilitation and preservation of affordable housing and for the various priorities available to state allocating agencies in meeting unique housing needs in their jurisdictions, in the context of identifying fair housing issues and related contributing factors.

(4) Adding more detail to the instructions for the additional information questions in the Publicly Supported Housing section. These questions provide an opportunity for program participants to reference or highlight efforts intended to preserve affordability in order to meet unmet and disproportionate housing needs in the context of fair housing issues and related contributing factors. The added instructions state that, "Program participants may describe efforts aimed at preserving affordable housing, including use of funds for rehabilitation, enacting tenant right to purchase requirements, providing incentives to extend existing affordable use agreements and preventing Section 8 opt-outs, encouraging the use of RAD conversion and the PBRA transfer authority. Program participants may also describe positive community assets and organizations, including community development corporations, non-profits, tenant organizations, community credit unions and community gardens."

HUD thanks the commenter that stated that the "analysis of comparing the demographics of publicly supported housing occupants to the demographics of the areas in which they are located implies that when the demographics comport with one another, this represents a positive fair housing outcome, but HUD has barred this approach." However, HUD notes that this analysis can assist in understanding who is being served in the housing programs, where they have housing opportunities, and how the location impacts the residents' access to opportunities. Thus, the same demographics in the public housing project in the census tract it is in may or may not represent a fair housing issue.

Community Participation

A commenter stated that the requirement to describe how communications were designed to reach "the broadest audience possible" should be deleted as participants are submitting other information about community participation. The commenter stated that asking grantees to evaluate why there was low attendance is irrelevant and asks grantees to impute meaning without substantive information.

Another commenter stated that there should be substantive community participation questions in the tool (not only suggestions in the Guidebook) in order to show its importance, communicate what constitutes the parameters of meaningful participation, and enable HUD, community members, and participants to understand what constitutes sufficient community participation. The commenter recommended that HUD include more substantive content in the tool's community participation process and direct participants to assess whether engagement has occurred to multiple groups, stakeholders, and protected classes for information relevant to each section of the tool. The commenter stated that stakeholders from multiple sectors should be actively solicited early on and throughout the AFH process, as stakeholders may be unaware of housing planning processes and localities with the most severe fair housing issues may suffer the most severe deficits in equitable public engagement. The commenter further stated that the assessment tool should ask, for example, that participants "Describe efforts to include persons or organizations with local knowledge relating to public health, education, transportation, workforce development, or environmental quality." The commenter also recommended that the tool require documentation of compliance with regulatory consultation requirements. See, *e.g.*, 24 CFR 91.100.

Another commenter stated that effective, robust community participation is fundamental to the successful implementation of the AFFH regulation. The commenter commended HUD for retaining the question regarding low participation, as this question is crucial in assessing the extent to which efforts were made to "give the public reasonable opportunities for involvement in the development of the AFH." The commenter recommended that the first question in the community participation section be amended to include other PHA resident outreach. The commenter also recommended that the instructions for the second question in the community participation section be improved by adding a checklist for the types of organizations that local governments and PHAs should consider consulting (see, *e.g.*, 24 CFR 91.100). The commenter further recommended that HUD consider adding examples of organizations that may fit within the broader categories, such as legal services organizations, which are community-based organizations that serve protected

class members. The commenter requested that the instructions also remind program participants that they must explain why any comments from the community participation process were not accepted by the program participant.

A commenter suggested that HUD ask program participants, in the community participation section of the tool to describe how it ensured accessibility including physical accessibility, effective communications, accessible Web sites and electronic materials, materials in alternate formats, and reasonable accommodations.

HUD Response: In response to public commenters who were concerned that the question on levels of participation would require the program participant to speculate on possible reasons for low participation, HUD has revised that specific question and accompanying instruction. In the broader context, HUD notes that the area of encouraging and incorporating public involvement in planning activities is a growing field of interest and that there are likely to be technological ideas and solutions that may be worthy of additional interest and inquiry over time.

Local Data/Local Knowledge

A commenter stated that HUD should require local governments to use local data and local knowledge (rather than allowing program participants to state that such data is unavailable) about individuals with disabilities in home or community-based settings (including Medicaid and local government funded services), those in institutional settings (nursing homes, board and care homes (“adult homes” or “adult care homes”), assisted living facilities, and individuals ready for discharge from psychiatric hospitals). The commenter stated that if HUD does not require participants to use local data and local knowledge, AFH plans may have disparate and disadvantageous consideration of people with disabilities. Another commenter stated that HUD should provide additional guidance as to the types of local data and local knowledge that are likely available.

Other commenters stated that HUD should require (or at least encourage) participants to consult and coordinate with other public agencies and other entities, such as academic institutions. A commenter stated that participants will not interpret “reasonable amount of search” to include consultation and coordination, and suggests adding: “However, the requirement to engage in a reasonable amount of searching means that a reasonable effort should be made to consult and coordinate with public

agencies and public entities with access to relevant local data and local knowledge” to the instructions for the tool.

A commenter urged HUD to include a section that substantively guides participants’ efforts to include local data and local knowledge, and requires participants to document strategies such as outreach to other government agencies. The commenter recommended that HUD issue guidance on institutionalizing informational pipelines among agencies and enforcement entities, and collaborations with local stakeholders, and provide lists of common resources to consult.

A commenter recommended that HUD add a section within the tool that requires program participants to evaluate their efforts and processes to incorporate local data and local knowledge (similar to the community participation section).

Another commenter recommended that program participants should encourage members of the community and other stakeholders to submit local data as part of the community participation process, and this should be added to the instructions to the tool. The commenter recommended that HUD include examples to provide some clarity on HUD’s expectations with respect to the program participant’s obligation to review local data received during the community participation process.

A commenter stated that the instructions regarding local data, specifically the language telling program participants that they “need not expend extensive resources,” should be qualified and should depend on factors such as the size of the program participant and the division of responsibilities in a joint or regional collaboration.

HUD Response: HUD did not agree to the suggestion to remove language from the Assessment Tool noting that program participants are not required to expend extensive resources in reviewing or validating complex reports or studies submitted by outside parties during the community participation process. The language states, “[program participants] are required to consider the information received during the community participation process, but need not expend extensive resources in doing so.” This is consistent with past HUD statements on the topic. For example, as HUD stated in the PRA Notice on the initial Local Government Assessment Tool on September 26, 2014:

“In addition, local knowledge may be supplemented with information received through the public

participation process. In such cases, program participants retain the discretion to consider data or information collected through this process as well as the manner in which it may be incorporated into the AFH, whether in the Analysis section of the Assessment or in Section III of the AFH with an option to include extensive or lengthy comments in appendices or attachments. In short, the receipt of extensive public comments may require staff effort to review and consider input but would not result in a mandate to incur substantial additional costs and staff hours to do so. To the contrary, the public participation process should be viewed as a tool to acquire additional information to reduce burden.”

HUD also notes that the requirements to conduct community participation and consultation are detailed for consolidated plan grantees in 24 CFR part 91, subpart B and 24 CFR 5.158.

Specific Suggestions for the Assessment Tool

A commenter expressed disagreement with the newly added sentence that states “Participants should focus on patterns that affect the jurisdiction and region rather than creating an inventory of local laws, policies, or practices,” stating that requiring a detailed list of policies and practices that encourage or discourage affordable housing and mobility of lower income households is useful. The commenter stated that each category in the disparities in access to opportunity section asks for jurisdiction and region, except for the third item, implying that the question only asks about the jurisdiction. The commenter recommended that the question should also ask about region, because suburbs should provide resources and remove barriers for affordable housing, and cities should identify needed regional changes.

Another commenter stated that HUD risks diluting housing patterns to peripheral matters not directly tied to segregation, stating that HUD should leave education to DOE, transportation to DOT, workforce development to DOL, health to HHS, and environment to EPA.

Other commenters recommended deleting the Assessment of Past Goals and Actions section because it duplicates information participants have previously submitted to HUD.

A commenter stated that parenthetical references to sections of the Code of Federal Regulations are confusing and recommended deleting such citations.

A commenter stated that conducting a trend analysis over 27 years with data available at only 10-year intervals is meaningless and should be deleted. The

commenter stated that certain questions require participants to make speculative assumptions about causality and should be deleted, and recommended that, before requiring an analysis of education, HUD and DOE should develop (and provide to grantees) data about the relationships between school attendance, school performance, and residency. The commenter stated that in many districts, school assignment is no longer connected to residency, policies differ among districts, students in one community may attend schools in other districts with different policies, and students in one R/ECAP may attend a broad array of schools with widely varying performance. The commenter recommended that the regional analysis of access to high performing schools should not include schools in communities up to 128 miles apart, stating that the regional assessment of access to transportation should only require localities to assess access to transportation in or near their jurisdiction, and that HUD should not be asking for a regional analysis in the “additional information” questions.

Other commenters stated that Olmstead planning is primarily a State activity, but that local governments also have Olmstead obligations, and in some States disability service systems are largely controlled by local government agencies. One of the commenters stated that the tool and Guidebook provide insufficient guidance about Olmstead and the relationship between States and local governments with respect to Olmstead planning. The commenter recommended HUD develop additional guidance to better ensure that connections are made between the States and local governments engaged in AFH planning.

Another commenter recommended that HUD include specific prompts aimed at assessing the jurisdiction’s compliance with the Olmstead integration mandate, specifically “To what degree do people with disabilities have meaningful access to integrated housing opportunities that are not solely in special needs housing, group homes, assisted living, and other congregate housing options? For persons with disabilities that require supportive housing, the commenter asked whether they are able to choose to receive the supports they need in housing of their choice; that is, are supportive housing options available within integrated housing developments.

A commenter stated that, in the Disability and Access section, HUD should provide a more specific definition of “infrastructure,” recommending limiting “public

infrastructure” to the external physical environment and excluding buildings, consistent with the distinction in the AFH Desktop between infrastructure, accessible housing, and accessible government facilities.

Another commenter stated that with respect to the Assessment of Past Goals and Actions section, HUD must ensure that the AFH delivers concrete mechanisms for progress and accountability, stating that program participants should describe fair housing strategies, and whether they have institutionalized mechanisms (such as interagency partnerships) to facilitate implementation.

A commenter stated that the tool ask about civil rights enforcement (pending complaints, resources, and efficacy of protections, enforcement, and remedies). The commenter recommended that participants be specifically instructed to examine the sufficiency of enforcement infrastructure in related areas, such as Title VI and environmental protections.

Another commenter stated that HUD should revise the “additional information” sections throughout the tool. The commenter stated this should be done so that important considerations are not omitted from the core fair housing analysis, as this analysis informs the selection of contributing factors and goal setting.

A commenter recommended that HUD encourage local jurisdictions to share information about waiting list demographics and specifically solicit information about applicants’ needs for accessibility (physical and sensory) in its waiting list applications. The commenter stated that this information should be used in determining the needs of the jurisdiction to create more accessible housing, offer a reasonable modifications fund, or otherwise offer low-cost loans for accessibility modifications.

Another commenter made several specific recommendations for revising the various sections of the tool. The commenter stated that, for example, the segregation analysis includes a reference to disability and that “segregated setting” be defined to include housing that is exclusively for persons with disabilities. The commenter recommended that certain contributing factors be added to other sections of the tool. The commenter also recommended that HUD ask jurisdictions to report on the loss of housing for persons with disabilities, particularly where developments have adopted tenancy preferences for senior citizens to the exclusion of persons with disabilities. The commenter stated that jurisdictions

should evaluate the impact of the loss of housing for persons with disabilities in these situations and plan for how to mitigate them.

A commenter recommended that when referring to R/ECAPs, HUD not use the phrase “transforming R/ECAPs by addressing the combined effects of segregation and poverty,” and instead use the phrase “expanding opportunity into R/ECAPs.” The commenter stated that there are community assets that may exist within R/ECAPs that residents would like to retain, while still attracting investment, opportunity, and expanding fair housing choice in the community.

A commenter recommended that HUD include a question about the unequal provision of services and disparities in infrastructure in the jurisdiction.

Another commenter stated that “mobility” is used both to refer to geographic mobility and mobility disabilities, and suggested using terms “geographic mobility” and “physical mobility.”

A commenter stated that local governments ensure that their own housing programs and facilities are accessible, and suggested that the tool ask local governments to state how they ensure accessibility throughout their own housing programs and the projects they fund. The commenter expressed appreciation for the emphasis given to the needs of people with disabilities by separating out the section on disabilities; however, many parts of the required analysis fail to require an analysis of disability needs and opportunities—either in the relevant or disability sections. The commenter recommended that the tool require local governments to include: (1) The number, location, and geographic distribution of Uniform Federal Accessibility Standards (UFAS) units with mobility and sensory disability accessibility in housing subsidized with federal funds; (2) how the locality informs people with disabilities about accessible units; (3) how the locality monitors the distribution of accessible units throughout each project subsidized with federal or other funds; (4) how the locality monitors the availability of accessible units including the number of individuals with disabilities on waiting and transfer lists; (5) how the locality monitors the marketing of accessible units to individuals with disabilities; and (6) how the locality insures that its building and permitting departments are requiring compliance with federal accessibility laws.

Another commenter suggested including questions about segregation of

people with disabilities in the Segregation and R/ECAP sections of the tool, including whether the lack of accessible housing contributes to concentrations in R/ECAP areas, and whether land use, zoning laws, occupancy codes and restrictions, or lack of investment contribute to segregation in facilities that only house people with disabilities or fail to provide housing in integrated settings. The commenter also recommended asking participants to provide data about the availability of accessible transportation throughout the locality. The commenter also suggested adding “disability” to the list of protected class groups in the disproportionate housing needs section, because such individuals often face high costs burdens. The commenter recommended adding the following question: “Compare the needs of families with a member with a disability who needs accessible features to the available housing stock with such accessible features in each category of publicly supported housing for the jurisdiction and region” in the disproportionate housing needs section.

This same commenter recommended that people with disabilities be included in all portions of analysis including the publicly supported housing section and in the disability section, and program participants should be required to discuss compliance with Section 504 and the Americans with Disabilities Act. The commenter stated that the questions in the disability and access section should more specifically distinguish between people with mobility and sensory disabilities and people who need supported and integrated housing. The commenter expressed concern that participants will not provide information about barriers, needs, and solutions for people with different types of disabilities. The commenter suggested that local governments separate out the locality’s own compliance from general problems in the region. The commenter also suggested rewording the bullet that says: “State or local laws, policies, or practices that discourage individuals with disabilities from being placed in or living in apartments, family homes, and other integrated settings” to read: “State or local laws, policies, or practices that discourage or prohibit individuals with disabilities from living in apartments, family homes, supported housing, shared housing, and other integrated settings.” The commenter stated adoption of this language deletes “placed in,” which implies a lack of choice, and expands the options that should be, but often are not, available to

people with disabilities; recent proposed ordinances in California have proposed restricting shared and supported housing, and sober living situations. In the fair housing enforcement section, the commenter suggested adding “pending administrative complaints or lawsuits against the locality alleging fair housing violations or discrimination” to the first question and asked HUD to add a question soliciting information on how localities handle discrimination in their respective jurisdictions.

HUD Response: HUD appreciates all of the commenters’ specific suggestions. As to the first comment, HUD thanks the commenter but believes that the analysis of residential living patterns within a jurisdiction and region does not require an inventory of laws and policies under an assessment and planning tool to create solutions and goals that respond to the fair housing and disparities in access issues identified.

HUD appreciates the commenters’ feedback related to the contributing factors, and notes that some of the definitions have been revised.

HUD recognizes the public commenters’ feedback in regard to school proficiency, and notes that it will continue to evaluate and consider best practices involving school performance, attendance and residency issues that impact access of protected classes to proficient schools.

Regarding the comment that persons with disabilities be included in all portions of analysis including the Publicly Supported Housing section, HUD notes that the instructions state that: “The Fair Housing Act protects individuals on the basis of race, color, religion, sex, familial status, national origin, or having a disability or a particular type of disability. HUD has provided data for [the Publicly Supported Housing] section only on race/ethnicity, national origin, familial status, and limited data on disability. Include any relevant information about other protected characteristics—but note that the analysis of disability is also specifically considered in Section V(D). Program participants may include an analysis of disability here, but still must include such analysis in Section V(D).”

Miscellaneous

One commenter asked whether the tool raises the level of scrutiny for housing above *Lindsey v. Normet*’s minimum level of scrutiny. The commenters stated that it is clear that the Administration does not want to raise the level of scrutiny because that would move housing issues from the

political process to the courts, nonetheless, the Administration has clearly concluded that *Lindsey* is no longer good law. The commenters stated that the tool proposes fairness and dignity components to property (whereas *Lindsey* did not raise the level of scrutiny because that would interfere with the right to property). The commenters stated the Administration’s statement of interest in *Bell v. Boise* stated that homelessness is an individual who is “assaulted, unconstitutionally, in her or his housing.” The commenter asked the following questions: What is the relation between the statement of interest and the tool? According to *West Virginia v. Barnette*, a fact is an individually enforceable right in court (vs. a fact for the political process), and the level of scrutiny is raised, if, inter alia, the fact is “unaffected by assaults upon it.” Is it the position of the Tool that housing is such a fact? What is the relation of the Collection Financial Standards (CFS) housing component to the tool? The commenters stated that according to *Lindsey*, the level of scrutiny for housing cannot be raised, and that *Lindsey* was premised on there not being a fairness component to housing and that there is such a thing as homelessness (which is contradicted by the Boise Statement of Interest). The commenters stated the tool contradicts both of these premises. The commenter stated that the government should give an instruction in the Tool (or explain why it did not) stating that the Tool is premised on the policy that *Lindsey* is no longer good law, housing is an individually enforceable right, and the level of scrutiny is above the minimum level.

Other commenters recommended that HUD defer implementation of the AFH process until all elements applicable to each type of program participant are publicly available. Another commenter stated that HUD should revise submittal deadlines until after it has tested the HUD-provided data, incorporated final comments into the tool, and provided adequate training; otherwise, early submitters may submit AFHs with questionable or misunderstood data.

A commenter stated that HUD should extend the deadline for comments or solicit comments again to allow grantees to respond because most grantees are busy with CAPER submissions due September 30.

A commenter identified a city as one of the most highly segregated cities in the area by race, ethnicity, poverty, and housing choice. The commenter stated that it appears that, due to predatory lending practices that led to the

foreclosure crisis, homes in the city's predominantly minority working class neighborhoods that were previously family-owned have been purchased in foreclosure by slumlords and these neighborhoods are now the victims of predatory rental and eviction practices. The commenter stated that the city did not update its AI for approximately 20 years (although it finally completed an AI this year).

Another commenter requested notification from HUD when AFFH documents are published that impact local governments.

HUD Response: HUD appreciates the commenters' suggestions. HUD reviewed the case law cited by the commenter and has concluded that the cases are not applicable to the obligation to affirmatively further fair housing under the Fair Housing Act and under the AFFH rule. HUD continues to assert that the AFFH rule and the Assessment Tool implementing the requirements contained in the regulation will better facilitate compliance with the AFFH mandate under the Fair Housing Act.

In response to concerns raised regarding predatory lending and other single family and mortgage-related comments, HUD notes that these issues can be addressed in several ways in the existing Assessment Tool. The segregation section provides for an analysis of owner-occupied and rental housing, by location. The contributing factors that can be considered under this section include Private Discrimination, Lending Practices and Access to Financial Services. Issues raised by commenters related to landlord tenant and eviction policies and practices can likewise be considered, including through changes that HUD has made to the Assessment Tool in the final stage, for instance in the contributing factor on Private Discrimination.

III. Summary

In issuing this Local Government Assessment Tool, approved for renewal under the Paperwork Reduction Act, HUD has strived to reach the appropriate balance in having program participants produce a meaningful assessment of fair housing that carefully considers barriers to fair housing choice and accessing opportunity and how such barriers can be overcome in respective jurisdictions and regions without being unduly burdensome. HUD has further committed to addressing program participant burden by providing data, guidance, and technical assistance, and such assistance will occur throughout the AFH process. While HUD is not specifically soliciting comment for

another prescribed period, HUD welcomes feedback from HUD grantees that use this tool on their experience with this tool.

Dated: January 5, 2017.

Bryan Greene,

General Deputy Assistant Secretary for Fair Housing and Equal Opportunity.

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5995-N-2]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

FOR FURTHER INFORMATION CONTACT:

Juanita Perry, Department of Housing and Urban Development, 451 Seventh Street SW., Room 7266, Washington, DC 20410; telephone (202) 402-3970; TTY number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), call the toll-free Title V information line at 800-927-7588 or send an email to title5@hud.gov.

SUPPLEMENTARY INFORMATION: In accordance with the December 12, 1988 court order in *National Coalition for the Homeless v. Veterans Administration*, No. 88-2503-OG (D.D.C.), HUD publishes a Notice, on a weekly basis, identifying unutilized, underutilized, excess and surplus Federal buildings and real property that HUD has reviewed for suitability for use to assist the homeless. Today's Notice is for the purpose of announcing that no additional properties have been determined suitable or unsuitable this week.

Dated: January 5, 2017.

Brian P. Fitzmaurice,

Director, Division of Community Assistance, Office of Special Needs Assistance Programs.

BILLING CODE 4210-67-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS-R3-ES-2016-N242;
FXES11130300000-178-FF03E00000]

Endangered and Threatened Wildlife and Plants; Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, invite the public to comment on the following applications for a permit to conduct activities intended to enhance the survival of endangered or threatened species. Federal law prohibits certain activities with endangered species unless a permit is obtained.

DATES: We must receive any written comments on or before February 13, 2017.

ADDRESSES: Send written comments by U.S. mail to the Regional Director, Attn: Carlita Payne, U.S. Fish and Wildlife Service, Ecological Services, 5600 American Blvd. West, Suite 990, Bloomington, MN 55437-1458; or by electronic mail to permitsR3ES@fws.gov.

FOR FURTHER INFORMATION CONTACT:

Carlita Payne, (612) 713-5343.

SUPPLEMENTARY INFORMATION:

Background

The Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), prohibits certain activities with endangered and threatened species unless the activities are specifically authorized by a Federal permit. The ESA and our implementing regulations in part 17 of title 50 of the Code of Federal Regulations (CFR) provide for the issuance of such permits and require that we invite public comment before issuing permits for activities involving endangered species.

A permit granted by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct activities with U.S. endangered or threatened species for scientific purposes, enhancement of propagation or survival, or interstate commerce (the latter only in the event that it facilitates scientific purposes or enhancement of propagation or survival). Our regulations implementing section 10(a)(1)(A) of the ESA for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Applications Available for Review and Comment

We invite local, State, Tribal, and Federal agencies and the public to comment on the following applications. Please refer to the permit number when

you submit comments. Documents and other information the applicants have submitted with the applications are available for review, subject to the requirements of the Privacy Act (5 U.S.C. 552a) and Freedom of Information Act (5 U.S.C. 552).

Permit Applications

Proposed activities in the following permit requests are for the recovery and enhancement of survival of the species in the wild.

Application No.	Applicant	Species	Location	Activity	Type of take	Permit action
TE02651A	Ohio Department of Transportation.	Indiana bat (<i>Myotis sodalis</i>), northern long-eared bat (<i>M. septentrionalis</i>), American burying beetle (<i>Nicrophorus americanus</i>).	Ohio	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, mist-net, trap, radio-tag, release.	Amend, renew.
TE07730A	Redwing Ecological Services, Inc.	Relict darter (<i>Etheostoma chienense</i>), Cumberland darter (<i>E. susanae</i>), Palezone shiner (<i>Notropis albizonatus</i>), Scioto madtom (<i>Noturus trautman</i>), blackside dace (<i>Phoxinus cumberlandensis</i>), Big Sandy crayfish (<i>Cambarus callainus</i>), 30 mussel species.	Illinois, Indiana, Iowa, Kentucky, Minnesota, Missouri, Ohio, Pennsylvania, Tennessee, West Virginia, Wisconsin.	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, release.	Amend, renew.

National Environmental Policy Act

The proposed activities in the requested permits qualify as categorical exclusions under the National Environmental Policy Act, as provided by Department of the Interior implementing regulations in part 46 of title 43 of the CFR (43 CFR 46.205, 46.210, and 46.215).

Public Availability of Comments

We seek public review and comments on these permit applications. Please refer to the permit number when you submit comments. Comments and materials we receive in response to this notice are available for public inspection, by appointment, during normal business hours at the address listed above in **ADDRESSES**.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: We provide this notice under section 10 of the ESA (16 U.S.C. 1531 *et seq.*).

Dated: January 9, 2017.

Lori H. Nordstrom,

Assistant Regional Director, Ecological Services, Midwest Region.

[FR Doc. 2017-00663 Filed 1-12-17; 8:45 am]

BILLING CODE 4333-15-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS-R6-ES-2015-0104; 4500030113]

Endangered and Threatened Wildlife and Plants; Status Review of the Northern Rocky Mountain Distinct Population Segment of the Fisher

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of initiation of status review.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the opening of an information gathering period regarding the status of the fisher (*Pekania pennanti*) throughout the range of its northern Rocky Mountain distinct population segment (DPS) in the United States. The status review will include analysis of whether the northern Rocky Mountain DPS of the fisher warrants listing as an endangered or a threatened species under the Endangered Species Act of 1973, as amended (Act). We encourage all interested parties to provide us information regarding the status of, and any potential threats to,

the northern Rocky Mountain DPS of the fisher.

DATES: We will accept comments from all interested parties until February 13, 2017. Please note that if you are using the Federal eRulemaking Portal (see **ADDRESSES**, below), the deadline for submitting an electronic comment is 11:59 p.m. Eastern Time on this date.

ADDRESSES: You may submit comments by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. In the Search box, enter the FWS-R6-ES-2015-0104, which is the docket number for this action. Then click on the Search button. You may enter a comment by clicking on “Comment Now!” Please ensure that you have found the correct document before submitting your comment.

- *U.S. mail or hand delivery:* Public Comments Processing, Attn: Docket No. FWS-R6-ES-2015-0104, U.S. Fish and Wildlife Service, MS: BPHC, 5275 Leesburg Pike, Falls Church, VA 22041-3803.

We request that you send comments only by the methods described above. We will post all comments on <http://www.regulations.gov>. This generally means that we will post any personal information you provide us (see Request for Information, below, for more information).

FOR FURTHER INFORMATION CONTACT: Jodi Bush, Field Supervisor, U.S. Fish and Wildlife Service, Montana Ecological Services Field Office, 585 Shepard Way,

Helena, MT 59601; telephone 406-449-5225; or facsimile 406-449-5339.

Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 800-877-8339.

SUPPLEMENTARY INFORMATION:

Request for Information

This document solicits biological or other data or information on the status of, and potential threats to, the northern Rocky Mountain DPS of the fisher, a medium-sized mammal of the mustelid family. This information, along with other sources of data, will be used to determine if the northern Rocky Mountain DPS of the fisher warrants listing as an endangered or a threatened species under the Act (16 U.S.C. 1531 *et seq.*). We request any new information concerning the status of the northern Rocky Mountain DPS of the fisher. Information submitted since the 2011 status review (which culminated in our 12-month finding published on June 30, 2011, at 76 FR 38504) and the 2016 90-day petition finding (81 FR 1368; January 12, 2016) will be considered and need not be resubmitted. We will base our status review on the best scientific and commercial information available, including all information received as a result of this publication. We are soliciting information and supporting data on the northern Rocky Mountain DPS of the fisher; we specifically seek information on the following:

(1) Information regarding the species' historical and current population status, distribution, abundance, and trends; biology and ecology; and habitat selection.

(2) Information on the effects of potential threat factors that are the basis for a species' listing determination under section 4(a)(1) of the Act (16 U.S.C. 1533(a)(1)), which are:

(a) The present or threatened destruction, modification, or curtailment of the species' habitat or range;

(b) Overutilization for commercial, recreational, scientific, or educational purposes;

(c) Disease or predation;

(d) Inadequacy of existing regulatory mechanisms; and

(e) Other natural or manmade factors affecting its continued existence.

(3) Scientific and commercial data to assist in development of any proposed critical habitat designation that we may make, including:

(a) Whether the designation of critical habitat for the northern Rocky Mountain DPS of the fisher would be beneficial to the conservation of the species or whether the identification of specific

areas as critical habitat may increase threats to the species or its habitat;

(b) Habitat selection and use, and any changes or trends in the amount and distribution of habitat for the northern Rocky Mountain DPS of the fisher;

(c) Habitat requirements for feeding, breeding, and sheltering, including particular physical or biological features that are essential to the conservation of the species and where such physical or biological features are found;

(d) Whether any of these features may require special management considerations or protection;

(e) What areas that are currently occupied and contain the physical or biological features essential to the conservation of the species should be included in the critical habitat designation and why;

(f) What areas not currently occupied at the time of listing are essential for the conservation of the species and why; and

(g) The possible benefits and impacts (including probable economic impacts) of a possible critical habitat designation for the northern Rocky Mountain DPS of the fisher.

(4) Biological, commercial trade, or other relevant data concerning any threats (or lack thereof) to this species and regulations that may be addressing those threats.

(5) Any information on the biological or ecological requirements of the species and ongoing conservation measures for the species and its habitat.

(6) Information on land use designations and current or planned activities in the areas occupied by the northern Rocky Mountain DPS of the fisher or areas that may be important for its conservation, and possible impacts of these activities on this species and these areas.

(7) Information on the projected and reasonably likely impacts of climate change on the northern Rocky Mountain DPS of the fisher and its habitat.

(8) Information on any foreseeable economic, national security, or other relevant impacts that may result if we designate any area as critical habitat. We are particularly interested in any potential impacts on small entities, and the benefits of including or excluding areas from any possible future proposed designation that are subject to these impacts.

Please support submissions with documentation such as maps; bibliographic references; methods used to gather and analyze the data; or copies of pertinent publications, reports, or letters by knowledgeable sources. We request data from systematic surveys, studies, or analyses of data regarding

population size or trends, biology or ecology of the species, effects of current land management on population distribution and abundance, current condition of habitat, and conservation measures that have been implemented to benefit the species. We also request information on the current distribution of populations and threats to the species in relation to the five listing factors (as defined in section 4(a)(1) of the Act).

Comments merely stating support for or opposition to a particular action without providing supporting data may not meet the standard of information required by section 4(b)(1)(A) of the Act, which directs that determinations as to whether any species is an endangered or a threatened species must be made "solely on the basis of the best scientific and commercial data available."

You may submit your comments and materials concerning this proposed rule by one of the methods listed in **ADDRESSES**. We request that you send comments only by the methods described in **ADDRESSES**.

If you submit information via <http://www.regulations.gov>, your entire submission—including any personal identifying information—will be posted on the Web site. If your submission is made via a hardcopy that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy submissions on <http://www.regulations.gov>.

Authors

The primary authors of this document are staff of the Montana Ecological Services Field Office.

Authority: The authority for this action is the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Dated: January 5, 2017.

Stephen Guertin,

Acting Director, U.S. Fish and Wildlife Service.

Reservation Proclamations

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of availability of procedural guidance.

SUMMARY: The Bureau of Indian Affairs (BIA) has updated its Fee-to-Trust Handbook to include procedural guidance for its employees on processing reservation proclamations, including simultaneous requests for trust acquisition and reservation proclamations.

ADDRESSES: The updated Fee-to-Trust Handbook is available at the following link: <http://www.bia.gov/WhatWeDo/Knowledge/Directives/Handbooks/>.

FOR FURTHER INFORMATION CONTACT: Ms. Sharlene Round Face, Office of Trust Services, Bureau of Indian Affairs, (202) 208-3615, sharlene.roundface@bia.gov, or Ms. Tana Fitzpatrick, Counselor, Assistant Secretary—Indian Affairs, (202) 208-7163, tana.fitzpatrick@bia.gov.

SUPPLEMENTARY INFORMATION: The BIA has updated its Fee-to-Trust Handbook to establish procedures for BIA to process simultaneous requests for trust land acquisitions under 25 CFR part 151 and reservation proclamations under the Act of June 18, 1934 (48 Stat. 984; 25 U.S.C. 467). This Handbook revision will provide flexibility for Tribes who wish to submit their requests simultaneously. BIA has also updated the Handbook to include guidance for processing reservation proclamations where the land has already been acquired in trust.

Authority: 5 U.S.C. 301; 25 U.S.C. 2; 25 U.S.C. 9; 25 U.S.C. 467.

Dated: December 30, 2016.

Lawrence S. Roberts,

Principal Deputy Assistant Secretary—Indian Affairs.

[LLWO260000 L1060000.PC0000]

Renewal of Approved Information Collection; OMB Control No. 1004-0042

AGENCY: Bureau of Land Management, Interior.

ACTION: 30-Day notice and request for comments.

SUMMARY: The Bureau of Land Management (BLM) has submitted an information collection request to the Office of Management and Budget (OMB) to continue the collection of information from those who wish to adopt and obtain title to wild horses and burros. The OMB previously approved

this information collection activity, and assigned it control number 1004-0042.

DATES: The OMB is required to respond to this information collection request within 60 days but may respond after 30 days. For maximum consideration, written comments should be received on or before February 13, 2017.

ADDRESSES: Please submit comments directly to the Desk Officer for the Department of the Interior (OMB #1004-0042), Office of Management and Budget, Office of Information and Regulatory Affairs, fax 202-395-5806, or by electronic mail at OIRA_submission@omb.eop.gov. Please provide a copy of your comments to the BLM. You may do so via mail, fax, or electronic mail.

Mail: U.S. Department of the Interior, Bureau of Land Management, 1849 C Street NW., Room 2134LM, Attention: Jean Sonneman, Washington, DC 20240.

Fax: to Jean Sonneman at 202-245-0050.

Electronic mail: jesonnem@blm.gov.

Please indicate “Attn: 1004-0042” regardless of the form of your comments.

FOR FURTHER INFORMATION CONTACT:

Holle Hooks, at 405-234-1860. Persons who use a telecommunication device for the deaf may call the Federal Relay Service at 1-800-877-8339, to leave a message for Ms. Hooks. You may also review the information collection request online at <http://www.reginfo.gov/public/do/PRAMain>.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act (44 U.S.C. 3501-3521) and OMB regulations at 5 CFR part 1320 provide that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond. In order to obtain and renew an OMB control number, Federal agencies are required to seek public comment on information collection and recordkeeping activities (see 5 CFR 1320.8(d) and 1320.12(a)).

As required at 5 CFR 1320.8(d), the BLM published a 60-day notice in the **Federal Register** on September 20, 2016 (81 FR 64502), and the comment period ended November 21, 2016. The BLM received two non-substantive public comments, which did not address, and were not germane to, this information collection. Therefore, the BLM has not changed the collection in responses to the comments.

The BLM now requests comments on the following subjects:

1. Whether the collection of information is necessary for the proper

functioning of the BLM, including whether the information will have practical utility;

2. The accuracy of the BLM's estimate of the burden of collecting the information, including the validity of the methodology and assumptions used;

3. The quality, utility and clarity of the information to be collected; and

4. How to minimize the information collection burden on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other forms of information technology.

Please send comments as directed under **ADDRESSES** and **DATES**. Please refer to OMB control number 1004-0042 in your correspondence. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

The following information pertains to this request:

Title: Protection, Management, and Control of Wild Horses and Burros (43 CFR part 4700).

Forms: Form 4710-10, Application for Adoption of Wild Horse(s) or Burro(s).

OMB Control Number: 1004-0042.

Abstract: This notice pertains to the collection of information that enables the BLM to administer its private maintenance (*i.e.*, adoption) program for wild horses and burros. The BLM uses the information to determine if applicants are qualified to provide humane care and proper treatment to wild horses and burros in compliance with the Wild Free-Roaming Horses and Burros Act (16 U.S.C. 1331-1340).

Frequency: On occasion.

Description of Respondents: Those who wish to adopt and obtain title to wild horses and burros.

Estimated Number of Responses Annually: 7,093.

Estimated Reporting and Recordkeeping “Hour” Burden Annually: 3,545.

Estimated Reporting and Recordkeeping “Non-Hour Cost” Burden Annually: \$2,400.

The estimated burdens are itemized in the following table:

Type of response	Number of responses	Time per response (minutes)	Total hours (Column B × Column C)
A.	B.	C.	D.
Application for Adoption of Wild Horse(s) or Burro(s) 43 CFR 4750.3–1 and 4750.3–2 Form 4710–10	7,000	30	3,500
Supporting Information and Certification for Private Maintenance of More Than Four Wild Horses or Burros 43 CFR 4750.3–3	6	10	1
Request to Terminate Private Maintenance and Care Agreement 43 CFR 4750.4–3	75	30	38
Request for Replacement Animals or Refund 43 CFR 4750.4–4	12	30	6
Totals	7,093	3,545

Mark Purdy,
Bureau of Land Management, Management Analyst.

[LLESM00000.L14400000.FR0000; MNES–058082]

Identifying Lands Subject to Secretarial Order of Restoration of February 22, 1945

AGENCY: Bureau of Land Management, Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: On February 22, 1945, the Secretary of the Interior issued an Order restoring to the Red Lake Band of Chippewa Indians of Minnesota (“Tribe”) certain lands that the Tribe had previously ceded to the United States for use by non-Indians. The lands restored to the Tribe by the 1945 Order are lands that were continuously held in trust by the United States since the cessions, that were never sold or otherwise disposed of, and for which the Tribe was never paid. This notice provides a partial list of the legal descriptions of lands restored to the Tribe by the 1945 Order. The Secretary included in the 1945 Order “lands which have been assessed for drainage works by the State of Minnesota under the authority of the Volstead Act of May 20, 1908 . . . subject to any existing valid rights.” The Department has reviewed and resolved title issues that arose regarding applicability of the Volstead Act. Thus, without further delay, these legal descriptions are published as representing lands among the lands restored to the Tribe as trust lands.

DATES: Restoration of lands was effective on February 22, 1945.

ADDRESSES: Bureau of Land Management, Eastern States, 20 M Street SE., Suite 950, Washington, DC 20003. Bureau of Indian Affairs, Midwest Regional Office, 5600 American Blvd., West, Suite 500, Bloomington, MN 55437. Detailed information concerning this action is available for review at these addresses.

FOR FURTHER INFORMATION CONTACT: Dominica VanKoten, Deputy State Director, Division of Geospatial Services, by telephone at (202) 912–7756, or by email at *dvankote@blm.gov*. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The Nelson Act of January 14, 1889, ch. 24, 25 Stat. 642, created and authorized a Federal commission to negotiate a cession of lands in northern Minnesota from the Red Lake Band of Chippewa Indians of Minnesota to the United States. By agreement dated July 8, 1889, 2.9 million acres of land known as “Royce 706” were ceded by the Tribe to the United States for the benefit of the Tribe. The Tribe retained a much smaller area known as “Royce 707.”

On March 10, 1902, another agreement was negotiated between the Tribe and the United States for the cession of an additional 256,152 acres of land in the western portion of Royce 707. This agreement was approved, with amendments, by Congress under the Act of February 20, 1904, ch. 161, 33 Stat. 46. Consistent with the provisions of the Nelson Act, the lands the Tribe ceded to the United States were opened for timber sales and homesteading, and most of the lands were disposed of by the 1930s.

The Indian Reorganization Act of 1934 (“IRA”), 25 U.S.C. 461 *et seq.*,

authorized the Secretary of the Interior, if he found it to be in the public interest, “to restore to tribal ownership the remaining surplus lands to any Indian reservation [that prior to June 18, 1934 were] opened, or authorized to be opened, to sale or any other form of disposal by Presidential proclamation, or by any of the public land laws of the United States[.]” 25 U.S.C. 463(a).

On February 22, 1945, exercising this authority granted by the IRA, the Secretary of the Interior issued an Order of Restoration (“1945 Order”), 10 FR 2448 (1945). The 1945 Order “Restored to tribal ownership all those lands of the Red Lake Indian Reservation which were ceded by the Indians under [the Nelson Act and the Act of February 20, 1904] and which were opened for sale or entry but for which the Indians have not been paid and which now are or hereafter may be classified as undisposed of.” 10 FR at 2449. See also Act of December 4, 1942, ch. 673, 56 Stat. 1039 (“All right, title, and interest of the Minnesota Chippewa Tribe in and to the so-called Red Lake Indian ceded lands, including any administrative reserves, is hereby declared extinguished and title thereto vested in the Red Lake Band of Chippewa Indians.”).

On May 28, 1945, the Acting Commissioner of the General Land Office forwarded to the Commissioner of the Office of Indian Affairs a list of lands that satisfied the criteria of the 1945 Order and could be returned to the Tribe. On April 29, 1946, and January 9, 1947, amendments to the list of lands were made. The list of May 28, 1945, and the amendments of April 29, 1946, and January 9, 1947 (collectively, the “1945 List”) totaled approximately 157,499 acres of noncontiguous lands. The 1945 List was to have been published in the **Federal Register** to provide public notice of lands that were subject to the 1945 Order. However, shortly after the 1945 List was completed, several title and legal description problems with lands on the list were discovered, and the 1945 List

was never published in the Federal Register.

From 1945 until 1988, the Department attempted to resolve many of the title and legal description problems with the lands on the 1945 List. On December 22, 1988, the Acting State Director of the Eastern States Office, Bureau of Land Management ("BLM"), forwarded to the Bureau of Indian Affairs a comprehensive list of lands totaling approximately 186,533 acres ("1988 List") that the BLM had determined qualified for restoration to the Tribe under the 1945 Order. Many of the lands on the 1945 List were on the 1988 List. However, shortly after the 1988 List was completed, several additional title and legal description problems were discovered and the 1988 List was never published in the Federal Register.

In December 1997, the Department initiated a review of the lands on the 1945 and 1988 Lists. On February 2, 1999, the Department published in the Federal Register a list of lands totaling 86,685.89 acres which were determined to be eligible for restoration to the Tribe pursuant to the 1945 Order. 64 FR 5069 (1999). On November 15, 2001, the Department published in the Federal Register a list of lands totaling 34,578.58 acres which were also determined to be eligible for restoration to the Tribe pursuant to the 1945 Order. 66 FR 57479 (2001).

The Department has conducted an extensive review of one of the outstanding title and legal description problems. Specifically, the 1945 Order restored lands, including "lands which have been assessed for drainage works by the State of Minnesota under authority of the Volstead Act of May 20, 1908 (35 Stat. 169, 43 U.S.C. secs. 1021-1028). . . subject to existing valid rights." 10 FR 2449. In a 2015 M-Opinion (M-37031) entitled Legal Status of the Red Lake Band of Chippewa Indians' Restored Lands Assessed for Drainage Works by the State of Minnesota Under the Authority of the Volstead Act of 1908 (May 1, 2015), the Department determined that the Volstead drainage liens do not constitute a valid existing right as to restored lands for the Tribe.

The Department has determined through a review of BLM records, in accordance with M-37031, that the lands described below were ceded by the Tribe to the United States in 1889 and 1902, were held in trust by the United States subject to sale for the benefit of the Tribe, were not disposed of by the United States, and were restored to the Tribe by the 1945 Order. The descriptions include lands previously published as restored by the

1945 Order if such lands were also assessed with Volstead drainage liens. Descriptions of any additional lands that were restored by the 1945 Order may be published as they are confirmed. Lands restored to the Tribe by the 1945 Order include the following described tracts and their respective acreages:

FIFTH PRINCIPAL MERIDIAN, MINNESOTA

Table listing land parcels with descriptions such as 'T. 159 N., R 27 W., Sec. 15, NE 1/4 SW 1/4' and acreage values ranging from 40 to 120.04.

FIFTH PRINCIPAL MERIDIAN, MINNESOTA—Continued

Continuation of the land parcel table with descriptions such as 'Sec. 5, Lot 1, SE 1/4 NE 1/4' and acreage values ranging from 79.93 to 160.

FIFTH PRINCIPAL MERIDIAN, MINNESOTA—Continued

Table listing land parcels with acreage values, including sections 18, 19, 28, 31, 160 N., R 35 W., and various quarter and half sections.

FIFTH PRINCIPAL MERIDIAN, MINNESOTA—Continued

Table listing land parcels with acreage values, including sections 25, 29, 33, 35, 155 N., R 37 W., and various quarter and half sections.

The area described aggregates 59,625.01 acres, more or less. Authority: 25 U.S.C. 461 et seq.; Notice of Order of Restoration, Red Lake Reservation, Minnesota, 10 FR 2448 (Mar. 2, 1945). Janice M. Schneider, Assistant Secretary, Land and Minerals Management. Lawrence S. Roberts, Principal Deputy Assistant Secretary, Indian Affairs. DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLCOS09000 L16100000.DR0000 17X]

Notice of Availability of the Record of Decision for the Dominguez-Escalante National Conservation Area Resource Management Plan and Final Environmental Impact Statement, Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) for the Approved Resource Management Plan (RMP) and Final Environmental Impact Statement for the Dominguez-Escalante National Conservation Area (NCA) located in Mesa, Delta and Montrose counties, Colorado. The Colorado State Director signed the ROD on January 9, 2017, which constitutes the final decision of the BLM and makes the Approved RMP effective immediately.

ADDRESSES: Copies of the ROD/ Approved RMP are available upon request from the National Conservation Area Manager, Dominguez-Escalante National Conservation Area, Bureau of Land Management, 2815 H Road, Grand Junction, CO 81506; or online at http://1.usa.gov/1qKkMVi. Copies of the ROD/ Approved RMP are also available for public inspection at the Grand Junction Field Office (see address above); Uncompahgre Field Office, 2465 South Townsend Avenue, Montrose, CO 81401; Mesa County Public Library Central Branch; Delta County Library Delta Branch; and Montrose Regional Library.

FOR FURTHER INFORMATION CONTACT: Collin Ewing, National Conservation Area Manager; telephone 970-244-3049; see Grand Junction address above; email cewing@blm.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1-800-877-8339 to contact the above individual during normal business hours. The Service is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The Dominguez-Escalante NCA has worked cooperatively with the public, interest groups, stakeholders, cooperating agencies, tribes, the Dominguez-Escalante NCA Resource Advisory Council, the Environmental Protection

Agency, U.S. Forest Service, U.S. Fish and Wildlife Service, and neighboring BLM offices to develop the Approved RMP. The Approved RMP seeks to provide for the long-term conservation and protection of the “unique and important values” of the Dominguez-Escalante NCA identified in the area’s enabling legislation: The Omnibus Public Land Management Act of 2009, Public Law 111–11 (Omnibus Act). These values include the “geological, cultural, archaeological, paleontological, natural, scientific, recreational, wilderness, wildlife, riparian, historical, educational, and scenic resources of the public lands, as well as the water resources of area streams, based on seasonally available flows, that are necessary to support aquatic, riparian, and terrestrial species and communities.” The Omnibus Act specified that these values be conserved and protected “for the benefit and enjoyment of present and future generations.” Furthermore, in recognition of the historic and current traditional use of the NCA for livestock grazing, the Omnibus Act specifically stated that the BLM “shall issue and administer any grazing leases or permits in the Conservation Area in accordance with the laws (including regulations) applicable to the issuance and administration of such leases and permits on other land under the jurisdiction of the Bureau of Land Management.” This RMP continues livestock grazing to meet land health standards in consideration of the other purposes of the NCA.

Management decisions outlined in the Approved RMP apply only to BLM-managed lands in the Dominguez-Escalante NCA (approximately 210,172 acres). The Approved RMP will replace management direction contained in the 1987 Grand Junction Resource Area RMP and 1989 Uncompahgre Basin RMP. The Approved RMP establishes goals, objectives, management actions and allowable uses for resources and land uses including, but not limited to: Air, soil, water, Wild and Scenic Rivers, upland and riparian vegetation, fish and wildlife, cultural and paleontological resources, visual resources, National Historic Trails, recreation, lands with wilderness characteristics, livestock grazing, forestry and realty.

The BLM initiated scoping for the RMP revision in 2010 and collected information and public input via public meetings in order to develop the Draft RMP/Environmental Impact Statement (EIS) released in May 2013. The BLM developed the Proposed Plan Alternative based upon the Draft

Preferred Alternative and public comments on the Draft RMP/EIS.

The BLM published the Proposed RMP/Final EIS on July 1, 2016, and made it available for a 30-day public protest period. During the protest period for the Proposed RMP/Final EIS, the BLM received seven protests on a variety of issues. All protests were dismissed; however, the BLM made minor editorial modifications to the Approved RMP to provide further clarification of some of the decisions.

The BLM regulations also require a 60-day Governor’s Consistency Review period for the Proposed RMP/Final EIS to ensure consistency with State government plans or policies. The Governor did not identify any inconsistencies with State government plans or policies.

The Approved RMP includes decisions that implement components of the land use plan. These implementation decisions are displayed and numbered in the Approved RMP. Implementation decisions are generally appealable to the Interior Board of Land Appeals under 43 CFR 4.410.

For example, the decisions identifying designated routes of travel are implementation decisions and are appealable under 43 CFR part 4. The route decisions are displayed as an attachment to Appendix N of the Approved RMP. Any party adversely affected by the proposed route identifications may appeal within 30 days of publication of this Notice of Availability pursuant to 43 CFR, part 4, subpart E. The appeal should state the specific route(s), as identified in Appendix N of the Approved RMP, on which the decision is being appealed. The appeal must be filed with the NCA Manager at the above listed address. Please consult the appropriate regulations (43 CFR, part 4, subpart E) for further appeal requirements.

Authority: 40 CFR 1506.6.

Ruth Welch,

BLM Colorado State Director.

Notice of Temporary Closures and Restrictions of Public Lands in La Paz County, AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given that closures and restrictions will be in effect on public lands administered by the Bureau of Land Management (BLM), Lake Havasu Field Office. This action is being taken to protect public safety and resources within and adjacent to the permitted operations of the Best in the Desert (BITD) Racing Association “GMZ Utility Terrain Vehicle Winter Nationals Parker 250” and “BlueWater Resort Parker 425” off-highway vehicle (OHV) events.

DATES: The closures and restrictions will be in effect from 2 p.m., January 6, 2017, through 6 p.m., January 8, 2017, and 2 p.m., February 3, 2017, through 2 a.m., February 5, 2017, Mountain Standard Time.

FOR FURTHER INFORMATION CONTACT: Jonathan Azar, Colorado River District Chief Ranger, or Amanda Deeds, Assistant Field Manager, at BLM Lake Havasu Field Office, 2610 Sweetwater Avenue, Lake Havasu City, Arizona 86406, telephone 928–505–1200. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact the above individual during normal business hours. This Service is available 24 hours a day, 7 days a week, to leave a message or question for the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The closures and restrictions are issued under the authority of 43 CFR 8364.1 which allows the BLM to establish closures for the protection of persons, property, and public lands and resources. Violation of any of the terms, conditions, or restrictions contained within this closure order may subject the violator to citation or arrest with a penalty or fine or imprisonment or both as specified by law.

Description of Race Course Closed Area: With the exception of access to designated spectator areas, areas subject to this closure include all public lands situated within the interior of the race course, as well as county-maintained roads and highways located within 2 miles of the designated course’s perimeter. Beginning at the eastern boundary of the Colorado River Indian Tribe (CRIT) Reservation, the closed area runs east along Shea Road, then east into Osborne Wash on the Parker-Swansea Road to the Central Arizona Project (CAP) Canal. The closed area runs north on the west side of the CAP Canal, crossing the canal on the county-maintained road, running northeast into

Mineral Wash Canyon, then southeast on the county-maintained road, through the four-corners intersection to the Midway (Pit) intersection. From there, the course runs east on Transmission Pass Road, through State Trust Land located in Butler Valley, turning north into Cunningham Wash to North Tank then continues south to Transmission Pass Road and east (reentering public land) within 2 miles of Alamo Dam Road. The course turns south and west onto the wooden power line road, onto State Trust Land in Butler Valley, then turns southwest into Cunningham Wash to the Graham Well and intersects Butler Valley Road before heading north and west on the county-maintained road to the "Bouse Y" intersection, 2 miles north of Bouse, Arizona. The course proceeds north, paralleling the Bouse-Swansea Road to the Midway (Pit) intersection, then west along the north boundary (power line) road of the East Cactus Plain Wilderness Area to Parker-Swansea Road. The course turns west into Osborne Wash crossing the CAP Canal, along the north boundary of the Cactus Plain Wilderness Study Area; it continues west staying in Osborne Wash and crossing Shea Road along the southern boundary of Gibraltar Wilderness, rejoining Osborne Wash at the CRIT Reservation boundary.

Closure Restrictions: The following acts are prohibited during the closures:

1. Being present on or driving on the designated race course or the adjacent lands described above. The spectator areas are located on the south side of Shea Road and also at the Bouse "Y", at the intersection of Butler Valley Ranch Road and Swansea Road. All spectators must stay within the designated spectator areas as they have protective fencing and barriers. Emergency medical response shall only be conducted by personnel and vehicles operating under the guidance of the La Paz County Emergency Medical Services and Fire, the Arizona Department of Public Safety, or the BLM.
2. Vehicle parking or stopping in areas affected by the closures, except where such is specifically allowed (designated spectator areas).
3. Camping in the closed area described above, except in the designated spectator areas.
4. Discharge of firearms.
5. Possession or use of any fireworks.
6. Cutting or collecting firewood of any kind, including dead and down wood or other vegetative material.
7. Operating any vehicle, including all-terrain vehicles, motorcycles, utility terrain vehicles, golf carts, rhinos, side by sides, and any OHVs which are not

legally registered for street and highway operations.

8. Operating any vehicle in the area of the closure or on roads within the event area at a speed of more than 35 mph. This does not apply to registered race vehicles during the race, while on the designated race course.

9. Failure to obey any official sign posted by the BLM, La Paz County, or the race promoter.

10. Parking any vehicle in violation of posted restrictions, or in such a manner as to obstruct or impede normal or emergency traffic movement or the parking of other vehicles, create a safety hazard, or endanger any person, property, or feature. Vehicles parked in violation are subject to citation, removal, and/or impoundment at the owner's expense.

11. Failure to obey any person authorized to direct traffic or control access to event area including law enforcement officers, BLM officials, and designated race officials.

12. Failure to observe spectator area quiet hours of 10 p.m. to 6 a.m.

13. Failure to keep campsite or race viewing site free of trash and litter.

14. Allowing any pet or other animal to be unrestrained. All pets must be restrained by a leash of not more than 6 feet in length.

15. Reserving sites within the spectator area. Spectators are prohibited from denying other visitors or parties the use of unoccupied portions of the spectator area.

Exceptions to Closure: The restrictions do not apply to emergency or law enforcement vehicles owned by the United States, the State of Arizona, or La Paz County; or designated race officials, participants and pit crews. All BITD registered media personnel are permitted access to existing routes 50 feet from the race course per BITD standards.

Penalties: Any person who violates these closures may be tried before a United States magistrate and fined in accordance with 18 U.S.C. 3571, imprisoned no more than 12 months under 43 U.S.C. 1733(a) and 43 CFR 8360.0-7, or both. In accordance with 43 CFR 8365.1-7, State or local officials may also impose penalties for violations of Arizona law.

Effect of Closure: The entire area encompassed by the designated course and all areas outside the course as described above and in the time period as described above are closed to all vehicles. The authorized applicant or their representatives are required to post warning signs, control access to, and clearly mark the event route and areas, common access roads, and road

crossings during the closure period. Support vehicles under permit for operation by event participants must follow the race permit stipulations.

Authority: 43 CFR 8364.1.

Jason West,

Field Manager.

Notice of Grand Staircase-Escalante National Monument Advisory Committee Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Federal Land Policy and Management Act (FLPMA) and the Federal Advisory Committee Act of 1972 (FACA), the Department of the Interior, Bureau of Land Management (BLM), Grand Staircase-Escalante National Monument Advisory Committee (GSENMAC) will meet as indicated below.

DATES: The GSENM-MAC will meet Thursday, February 2 (10 a.m.–6 p.m.) and Friday, February 3, 2017, (8:00 a.m.–1:00 p.m.) in Kanab, Utah.

ADDRESSES: The Committee will meet at the Bureau of Land Management Administrative Headquarters, located at 669 S. Highway 89A, Kanab, Utah.

FOR FURTHER INFORMATION CONTACT: Larry Crutchfield, Public Affairs Officer, Grand Staircase-Escalante National Monument, Bureau of Land Management, 669 South Highway 89A, Kanab, Utah, 84741; phone (435) 644-1209.

SUPPLEMENTARY INFORMATION: The 15-member GSENM-MAC was appointed by the Secretary of Interior on January 23, 2016, pursuant to the Monument Management Plan, the Federal Land Policy and Management Act of 1976 (FLPMA), and the Federal Advisory Committee Act of 1972 (FACA). As specified the Committee charter, the GSENM-MAC may be requested to: (1) Gather and analyze information, conduct studies and field examinations, seek public input or ascertain facts to develop recommendations concerning the use and management of the Monument; (2) review programmatic documents including the annual Monument Manager's Reports, and

Monument Science Plans to provide recommendations on the achievement of the Management Plan objectives; (3) Compile monitoring data and assess and advise the DFO of the extent to which the Plan objectives are being met; (4) Make recommendations on Monument protocols and applicable planning projects to achieve the overall objectives are being met; (5) Review appropriate research proposals and make recommendations on project necessity and validity; (6) Make recommendations regarding allocation of research funds through review of research and project proposals as well as needs identified through the evaluation process; (7) Consult and make recommendations on issues such as protocols for specific projects, e.g., vegetation restoration methods or standards for excavation and curation of artifacts and objects; and/or (8) Prepare an annual report summarizing the Committee's activities and accomplishments of the past year, and make recommendations for future needs and activities.

Topics to be discussed by the GSENM-MAC during this meeting include the ongoing Livestock Grazing Management Plan Amendment and Associated Environmental Impact Statement (LGMPA/AEIS); the Skutumpah Terrace Greater Sage-Grouse Habitat Restoration Project; GSENM division briefs, a tour of the GSENM Paleontology Lab and off-site tour of dinosaur track site; future meeting dates and other matters as may reasonably come before the GSENM-MAC.

The entire meeting is open to the public. Members of the public are welcome to address the Committee at 5:00 p.m., local time, on Feb. 2, 2017; and at 12:00 p.m., local time, on Feb. 3, 2017. Depending on the number of persons wishing to speak, a time limit could be established. Interested persons may make oral statements to the GSENM-MAC during this time or written statements may be submitted for the GSENM-MAC's consideration. Written statements can be sent to: Grand Staircase-Escalante National Monument, Attn.: Larry Crutchfield, 669 South Highway 89A, Kanab, Utah, 84741. Information to be distributed to the GSENM-MAC is requested 10 days prior to the start of the GSENM-MAC meeting.

All meetings are open to the public; however, transportation, lodging, and meals are the responsibility of the participating public.

Gary Torres,

Acting State Director.

Notice of Public Meetings for the John Day-Snake Resource Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act and the Federal Advisory Committee Act of 1972, and the U.S. Department of the Interior, Bureau of Land Management (BLM), the John Day-Snake Resource Advisory Council (RAC) will meet as indicated below.

DATES: The John Day-Snake RAC will hold a meeting Thursday and Friday, January 26 and 27, 2017. The meeting will be held at the TownePlace Suites in Bend, Oregon. The meeting will run from noon to 5 p.m. on January 26, and from 8 a.m. to noon on January 27.

FOR FURTHER INFORMATION CONTACT: Lisa Clark, Public Affairs Specialist, BLM Prineville District Office, 3050 NE. 3rd Street, Prineville, OR 97754, phone 541-473-6218, or email lmclark@blm.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1(800) 877-8339 to contact the above individual during normal business hours. The service is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The John Day-Snake RAC consists of 15 members, chartered and appointed by the Secretary of the Interior. Their diverse perspectives are represented in commodity, conservation, and general interests. They provide advice to BLM and Forest Service resource managers regarding management plans and proposed resource actions on public land in central and eastern Oregon. Agenda items for the meeting include a discussion on fees associated with the Deschutes River, recruitment of a grazing representative, and discussion about forming a Snake River collaborative group.

All meetings are open to the public. Information to be distributed to the John Day-Snake RAC is requested prior to the start of each meeting. A public comment period will be offered on January 27, 2017, from 10:30 a.m. to 11 a.m. Unless otherwise approved by the John Day-Snake RAC Chairs, the public comment

period will last no longer than 30 minutes. Each speaker may address the John Day-Snake RAC for a maximum of five minutes. The public may call in at 866-650-5651 and listen to the meeting and participate during public comment by using participant code: 3696961.

Meeting times and the duration scheduled for public comment periods may be extended or altered when the authorized representative considers it necessary to accommodate business and all who seek to be heard regarding matters before the John Day-Snake RAC.

Shane DeForest,

Acting Vale District Manager.

Notice of Public Meeting For the Southeast Oregon Resource Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act and the Federal Advisory Committee Act of 1972, and the U.S. Department of the Interior, Bureau of Land Management (BLM), the Southeast Oregon Resource Advisory Council (RAC) will meet as indicated below:

DATES: The RAC will hold a public meeting Monday and Tuesday, January 30 and 31, 2017. The meeting on January 30th will begin at 12:00 p.m. and end at 5:00 p.m. The meeting on January 31st will begin at 8:00 a.m. and end at 12:00 p.m. The agenda will be released online at <http://www.blm.gov/or/rac/seorrac.php> prior to the meeting. Tentative agenda items for the meeting include updates on the Tri-State Fuels Project, Lands with Wilderness Characteristics. Any other matters that may reasonably come before the RAC may also be addressed. A public comment period will be available during the meeting at a time to be determined. Unless otherwise approved by the RAC Chair, the public comment period will last no longer than 30 minutes, and each speaker may address the RAC for a maximum of 5 minutes. Meeting times and the duration scheduled for public comment periods may be extended or altered when the authorized representative considers it

necessary to accommodate necessary business and all who seek to be heard regarding matters before the RAC.

ADDRESSES: The meeting will be held at the Burns BLM offices, 28910 Highway 20, West Hines, OR 97738. The telephone conference line number for the meeting is 1-866-524-6456, Participant Code: 608605.

FOR FURTHER INFORMATION CONTACT: Larisa Bogardus, Public Affairs Specialist, BLM Lakeview District Office, 1301 S G Street, Lakeview, Oregon 97630, (541) 947-6237 or lbogardus@blm.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1(800) 877-8339 to contact the above individual during normal business hours. The service is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: This RAC consists of 15 members chartered and appointed by the Secretary of the Interior. Their diverse perspectives are represented in commodity, conservation, and general interests. They provide advice to BLM and Forest Service resource managers regarding management plans and proposed resource actions on public land in southeast Oregon. This meeting is open to the public in its entirety. Information to be distributed to the RAC is requested prior to the start of each meeting.

Before including your address, phone number, email address, or other personal identifying information in your comments, please be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Shane DeForest,

Acting Vale District Manager.

[LLAK930000.L13100000.PP0000]

Renewal of Approved Information Collection; OMB Control No. 1004-0196

AGENCY: Bureau of Land Management, Interior.

ACTION: 60-Day notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act, the Bureau of Land Management (BLM) invites public comments on, and plans to request approval to continue, the collection of information from participants in the oil and gas leasing program within the National Petroleum Reserve—Alaska (NPRA). The Office of Management and Budget (OMB) has assigned control number 1004-0196 to this information collection.

DATES: Please submit comments on the proposed information collection by March 14, 2017.

ADDRESSES: Comments may be submitted by mail, fax, or electronic mail.

Mail: U.S. Department of the Interior, Bureau of Land Management, 1849 C Street, NW., Room 2134LM, Attention: Jean Sonneman, Washington, DC 20240.

Fax: to Jean Sonneman at 202-245-0050.

Electronic mail: Jean_Sonneman@blm.gov.

Please indicate “Attn: 1004-0196” regardless of the form of your comments.

FOR FURTHER INFORMATION CONTACT:

Wayne Svejnoha at 907-271-4407. Persons who use a telecommunication device for the deaf may call the Federal Relay Service at 1-800-877-8339 to leave a message for Mr. Svejnoha.

SUPPLEMENTARY INFORMATION: OMB regulations at 5 CFR 1320, which implement provisions of the Paperwork Reduction Act, 44 U.S.C. 3501-3521, require that interested members of the public and affected agencies be given an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8 (d) and 1320.12(a)). This notice identifies an information collection that the BLM plans to submit to OMB for approval. The Paperwork Reduction Act provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond.

The BLM will request a 3-year term of approval for this information collection activity. Comments are invited on: (1) The need for the collection of information for the performance of the functions of the agency; (2) the accuracy of the agency’s burden estimates; (3) ways to enhance the quality, utility and clarity of the information collection; and

(4) ways to minimize the information collection burden on respondents, such as use of automated means of collection of the information. A summary of the public comments will accompany our submission of the information collection requests to OMB.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

The following information is provided for the information collection:

Title: Oil and Gas Leasing; National Petroleum Reserve—Alaska.

OMB Control Number: 1004-0196.

Summary: This control number applies to the National Petroleum Reserve—Alaska (NPRA). In accordance with the Naval Petroleum Reserve Production Act (42 U.S.C. 6501-6508) and regulations at 43 CFR part 3130, the BLM may authorize participation in an NPRA unit agreement. Participants in such an agreement are required to comply with routine data submissions that are used to document drilling and production and ensure compliance with the unit agreement, lease terms, regulations, Onshore Oil and Gas Orders, Notices to Lessees, lease stipulations, or conditions of approval. In addition, participants in such an agreement may apply for reduction of royalty, suspension of operations or production, or a subsurface storage agreement.

Frequency of Collection: On occasion.

Forms: None.

Description of Respondents: Participants in the oil and gas leasing program within the NPRA.

Estimated Annual Responses: 21.

Estimated Annual Burden Hours: 218 hours.

Estimated Annual Non-Hour Costs: None.

The estimated burdens are itemized in the following table:

Type of response	Number of responses	Time per response	Total time (Column B × Column C)
A.	B.	C.	D.
Royalty reduction (43 CFR 3133.4)	1	16 hours	16 hours.
Suspension of operations (43 CFR 3135.3)	1	4 hours	4 hours.
Notification of operations (43 CFR 3135.6)	2	15 minutes	30 minutes.
Unit designation (43 CFR 3137.21 and 3137.23)	1	80 hours	80 hours.
Notification of unit approval (43 CFR 3137.25)	1	1 hour	1 hour.
Certification for modification (43 CFR 3137.52)	1	4 hours	4 hours.
Acceptable bonding (43 CFR 3137.60)	1	30 minutes	30 minutes.
Change of unit operator (43 CFR 3137.61)	1	1 hour	1 hour.
Certification of unit obligation (43 CFR 3137.70)	1	2 hours	2 hours.
Certification of continuing development (43 CFR 3137.71)	1	2 hours	2 hours.
Productivity for a participating area (43 CFR 3137.84)	1	12 hours	12 hours.
Unleased tracts (43 CFR 3137.87)	1	3 hours	3 hours.
Notification of productivity (43 CFR 3137.88)	1	30 minutes	30 minutes.
Notification of productivity for non-unit well (43 CFR 3137.91)	1	30 minutes	30 minutes.
Production information (43 CFR 3137.92)	1	1 hour	1 hour.
Lease extension (43 CFR 3137.111)	1	3 hours	3 hours.
Inability to conduct operations activities (43 CFR 3137.112)	1	2 hours	2 hours.
Unit termination (43 CFR 3137.130)	1	1 hour	1 hour.
Impact mitigation (43 CFR 3137.135)	1	4 hours	4 hours.
Storage agreement (43 CFR 3138.11)	1	80 hours	80 hours.
Totals	21		218 hours.

Public Land Order No. 7859; Withdrawal of National Forest System and Bureau of Land Management Public Lands in Southwestern Oregon; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order withdraws, subject to valid existing rights, approximately 5,216.18 acres of public domain and Revested Oregon and California Railroad lands and 95,805.53 acres of National Forest System lands from settlement, sale, location, and entry under the public land laws; location and entry under the United States mining laws; and operation of the mineral and geothermal leasing laws for a period of 20 years while Congress considers legislation to permanently withdraw those areas and to protect the Southwestern Oregon watershed from possible adverse effects of mineral development.

DATES: This Public Land Order is effective on December 30, 2016.

FOR FURTHER INFORMATION CONTACT:

Jacob Childers, Land Law Examiner, at 503-808-6225, Bureau of Land Management, Oregon/Washington State Office, P.O. Box 2965, Portland, Oregon 97208-2965. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 to reach the above individual. The FRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The purpose of this order is to protect the lands while Congress considers legislation to permanently withdraw those areas and to protect the Southwestern Oregon watershed from possible adverse effects of mineral development.

Order

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described public domain, Revested Oregon and California Railroad lands, and National Forest System lands, are hereby withdrawn from settlement, sale, location, and entry under the public land laws, location and entry under the United States mining laws, and operation of the mineral and geothermal leasing laws while Congress considers legislation to permanently withdraw those areas and to protect the Southwestern Oregon

watershed from possible adverse effects of mineral development.

BILLING CODE 3411-15-P

DEPARTMENT OF THE INTERIOR**Fish and Wildlife Service****National Park Service**

[NPS-WASO-ANRSS-22067;
 PPWONRADE2, PMP00E105.YP0000]

**Draft Environmental Impact Statement/
 Grizzly Bear Restoration Plan, North
 Cascades Ecosystem, Washington**

AGENCY: Fish and Wildlife Service and National Park Service, Interior.

ACTION: Notice of availability for public comment.

SUMMARY: The Fish and Wildlife Service (FWS) and the National Park Service (NPS) announce the availability of the Grizzly Bear Restoration Plan (plan)/ Draft Environmental Impact Statement (DEIS) in the North Cascades Ecosystem (NCE), Washington. The plan/DEIS evaluates the impacts of a range of alternatives for restoring the grizzly bear to the United States (U.S.) portion of the NCE, a portion of its historical range.

DATES: All written comments on the plan/DEIS must be postmarked or submitted no later than March 14, 2017.

FOR FURTHER INFORMATION CONTACT: Please contact Denise Shultz, Public Information Officer, North Cascades National Park Service Complex at 360-854-7302, or Ann Froschauer, Public Affairs Supervisor, FWS Washington Fish and Wildlife Office at 360-753-4370. Information will be available for public review online at <http://parkplanning.nps.gov/grizzlydeis>; in the Office of the Superintendent, 810 State Route 20, Sedro-Woolley, WA 98284 (360-854-7200, telephone); and in the Washington Fish and Wildlife Office, 510 Desmond Dr. SE., Suite 102, Lacey, WA 98503 (360-753-9440).

SUPPLEMENTARY INFORMATION: The purpose of this plan/DEIS is to determine how to restore the grizzly bear to the NCE, a portion of its historical range. Action is needed at this time to:

- Avoid the permanent loss of grizzly bears in the NCE;
- Contribute to the restoration of biodiversity of the ecosystem for the benefit and enjoyment of present and future generations of people;
- Enhance the probability of long-term survival of grizzly bears in the NCE and thereby contribute to overall grizzly bear recovery; and
- Support the recovery of the grizzly bear to the point where it can be removed from the Federal List of Endangered and Threatened Wildlife.

This plan/DEIS evaluates the impacts of the no-action alternative (Alternative

A) and three action alternatives (Alternatives B, C, and D).

Alternative A would continue existing management practices and assume no new management actions would be implemented beyond those available at the outset of the grizzly bear restoration planning process. Under Alternative A, grizzly bears would not be translocated into the NCE.

The action alternatives include capturing grizzly bears from outside the NCE and releasing them into the NCE for a period of time that is dependent on the particular alternative. The lead agencies would focus on translocating grizzly bears from areas that are ecologically similar to potential release sites. This may include grizzly bears from British Columbia, Canada, or the Northern Continental Divide ecosystem. All of the action alternatives include the replacement of translocated bears in the NCE which are lost from the population due to mortality or emigration during the period of initial releases.

The option to designate the NCE grizzly bear population as an experimental population under section 10(j) of the Endangered Species Act could be applied to any of the action alternatives. The DEIS will assess the potential impacts associated with designating, or not designating, an experimental population under each action alternative; therefore, the DEIS will serve as our National Environmental Policy Act analysis for the proposed restoration effort and any 10(j) experimental population rule.

Alternative B would involve an initial release of up to 10 grizzly bears followed by a period of monitoring in which additional releases would not occur. The alternative would then either repeat the initial release or default to alternative C as described below. At the conclusion of the initial release, there would be a period of adaptive management where additional bears could be released based on a number of factors including human-caused sources of mortality, genetic limitations, population trends, and the adjustment of the sex ratio.

Alternative C would involve the yearly release of up to 5 grizzly bears for a 5 to 10-year period to achieve an initial population of 25 grizzly bears. At the conclusion of these releases, there would be an adaptive management period where additional grizzly bears could be released based on a number of factors including human-caused sources of mortality, genetic limitations, population trends, and the adjustment of the sex ratio.

Alternative D would involve the yearly release of the maximum number

of grizzly bears available for capture (anticipated to be 5 to 7 bears) until the minimum population estimate in the NCE reaches 200 grizzly bears.

The U.S. Forest Service and the Washington Department of Fish and Wildlife are cooperating agencies on this plan/DEIS.

Public Participation: After the Environmental Protection Agency Notice of Availability is published, the FWS and NPS will schedule public meetings to be held during the comment period throughout the NCE. Dates, times, and locations of these meetings will be announced in press releases and on the NPS Planning, Environment, and Public Comment Web site for the plan/DEIS at <http://parkplanning.nps.gov/grizzlydeis>.

How to Comment: You are encouraged to comment on the plan/DEIS online at <http://parkplanning.nps.gov/grizzlydeis>. You may also mail or hand-deliver your comments to the Superintendent, North Cascades National Park Service Complex, 810 State Route 20, Sedro-Woolley, WA 98284. Written comments will also be accepted during scheduled public meetings discussed above. Comments will not be accepted by fax, email, or by any method other than those specified above. Bulk comments in any format (hard copy or electronic) submitted on behalf of others will not be accepted. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: December 13, 2016.

Jon Raby,

Acting Regional Director, Pacific Region, Fish and Wildlife Service.

Dated: December 19, 2016.

Laura E. Joss,

Regional Director, Pacific West Region, National Park Service.

BILLING CODE 4312-52-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731-TA-340-E and 340-H (Fourth Review)]

Solid Urea From Russia and Ukraine; Termination of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission instituted the subject five-year reviews in November 2016 to determine whether revocation of the antidumping duty orders on solid urea from Russia and Ukraine would be likely to lead to continuation or recurrence of material injury. On December 30, 2016, the Department of Commerce published notice that it was revoking the orders effective December 20, 2016, because the domestic interested parties did not participate in its sunset reviews (81 FR 96434). Accordingly, the subject reviews are terminated.

DATES: *Effective Date:* January 9, 2017.

FOR FURTHER INFORMATION CONTACT: Drew Dushkes (202-205-3229), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>).

Authority: These reviews are being terminated under authority of title VII of the Tariff Act of 1930 and pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. 1675(c)). This notice is published pursuant to section 207.69 of the Commission's rules (19 CFR 207.69).

By order of the Commission.

Issued: January 9, 2017.

William R. Bishop,

Supervisory Hearings and Information Officer.

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-1035]

Certain Liquid Crystal Ewriters and Components Thereof; Institution of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on December 8, 2016, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of Kent Displays, Inc. of Kent, Ohio. The complaint alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain liquid crystal eWriters and components thereof by reason of infringement of certain claims of U.S. Patent Nos. 7,351,506 (“the ‘506 patent”) and 8,947,604 (“the ‘604 patent”). The complaint further alleges that an industry in the United States exists as required by subsection (a)(2) of section 337.

The complainant requests that the Commission institute an investigation and, after the investigation, issue a limited exclusion order and cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Room 112, Washington, DC 20436, telephone (202) 205-2000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission’s TDD terminal on (202) 205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at (202) 205-2000. General information concerning the Commission may also be obtained by accessing its internet server at <https://www.usitc.gov>. The public record for this investigation may be viewed on the Commission’s electronic docket (EDIS) at <https://edis.usitc.gov>.

FOR FURTHER INFORMATION CONTACT: The Office of the Secretary, Docket Services, U.S. International Trade Commission, telephone (202) 205-1802.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and

in section 210.10 of the Commission’s Rules of Practice and Procedure, 19 CFR 210.10 (2016).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on January 9, 2017, *ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain liquid crystal eWriters and components thereof by reason of infringement of one or more of claims 1–5, 10, 11, 13–16, 18–23, 26, and 27 of the ‘506 patent and claims 1, 2, 9–11, 15–17, 21, and 22 of the ‘604 patent; and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is: Kent Displays, Inc., 343 Portage Boulevard, Kent, OH 44240.

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Shenzhen Howshow Technology Co., Ltd., d/b/a Shenzhen Howshare Technology Co., Ltd., d/b/a Howshare, Building 8, 2nd Floor, Fuyuan Industrial Zone, No. 28 Qiaotang Road, Fuyong Street, Baoan District, Shenzhen, China.

Shenzhen SUNstone Technology Co., Ltd., d/b/a iQbe, 3/F, Bldg. F, No. 1 Industry Park, Guanlong Village, Xili, Shenzhen, China.

(3) For the investigation so instituted, the Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge. OUII will not participate as a party in this investigation.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission’s Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(e) and 210.13(a), such responses will be considered by the Commission if received not later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of

investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of an exclusion order or a cease and desist order or both directed against the respondent.

By order of the Commission.

Issued: January 9, 2017.

William R. Bishop,
Supervisory Hearings and Information Officer.

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-566 and 731-TA-1342 (Preliminary)]

Softwood Lumber Products From Canada; Determinations

On the basis of the record¹ developed in the subject investigations, the United States International Trade Commission (“Commission”) determines, pursuant to the Tariff Act of 1930 (“the Act”), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of softwood lumber products from Canada, provided for in subheadings 4407.10.01, 4409.10.05, 4409.10.10, 4409.10.20, 4409.10.90, 4418.90.25, and may also be classified in subheadings 4415.20.40, 4415.20.80, 4418.90.46, 4421.90.70, 4421.90.94, and 4421.90.97 of the Harmonized Tariff Schedule of the United States, that are allegedly subsidized and sold in the United States at less than fair value (“LTFV”).²

Commencement of Final Phase Investigations

Pursuant to section 207.18 of the Commission’s rules, the Commission also gives notice of the commencement of the final phase of its investigations. The Commission will issue a final phase notice of scheduling, which will be

¹ The record is defined in sec. 207.2(f) of the Commission’s Rules of Practice and Procedure (19 CFR 207.2(f)).

² Commissioner Pinkert not participating.

published in the **Federal Register** as provided in section 207.21 of the Commission's rules, upon notice from the Department of Commerce ("Commerce") of affirmative preliminary determinations in the investigations under sections 703(b) or 733(b) of the Act, or, if the preliminary determinations are negative, upon notice of affirmative final determinations in those investigations under sections 705(a) or 735(a) of the Act. Parties that filed entries of appearance in the preliminary phase of the investigations need not enter a separate appearance for the final phase of the investigations. Industrial users, and, if the merchandise under investigation is sold at the retail level, representative consumer organizations have the right to appear as parties in Commission antidumping and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

Background

On November 25, 2016, the Committee Overseeing Action for Lumber International Trade Investigations or Negotiations (the "Coalition")³ filed a petition with the Commission and Commerce, alleging that an industry in the United States is materially injured or threatened with material injury by reason of LTFV and subsidized imports of softwood lumber products from Canada and LTFV imports of softwood lumber products from Canada. Accordingly, effective November 25, 2016, the Commission, pursuant to sections 703(a) and 733(a) of the Act (19 U.S.C. 1671b(a) and 1673b(a)), instituted countervailing duty investigation No. 701-TA-566 and antidumping duty investigation No. 731-TA-1342 (Preliminary).

Notice of the institution of the Commission's investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of December 2, 2016

³ The Coalition is an ad hoc association whose members are: U.S. Lumber Coalition, Inc., Collum's Lumber Products, L.L.C., Hankins, Inc., Potlach Corp., Rex Lumber Company, Seneca Sawmill Company, Sierra Pacific Industries, Stimson Lumber Company, Swanson Group, Weyerhaeuser Company, Carpenters Industrial Council, Giustina Land and Timber Company, Sullivan Forestry Consultants, Inc.. The Coalition is "an association, a majority of whose members is composed of interested parties" described in Section 771(9)(C) of the Act, 19 U.S.C. 1677(9)(C).

(81 FR 87069). The conference was held in Washington, DC, on December 16, 2016, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission made these determinations pursuant to sections 703(a) and 733(a) of the Act (19 U.S.C. 1671b(a) and 1673b(a)). It completed and filed its determinations in these investigations on January 9, 2017. The views of the Commission are contained in USITC Publication 4663 (January 2017), entitled *Softwood Lumber Products from Canada: Investigation Nos. 701-TA-566 and 731-TA-1342 (Preliminary)*.

By order of the Commission.

Issued: January 9, 2017.

BILLING CODE 7020-02-P

DEPARTMENT OF JUSTICE

[OMB Number 1140-0012]

Agency Information Collection Activities; Proposed eCollection Activities; Proposed eComments Requested; [Notice of Firearms Manufactured or Imported (ATF Form 2 (5320.2))]

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection was previously published in the **Federal Register** 81 FR 73140, on October 24, 2016, allowing for a 60-day comment period.

DATES: Comments are encouraged and will be accepted for an additional 30 days until February 13, 2017.

FOR FURTHER INFORMATION CONTACT: If you have additional comments, particularly with respect to the estimated public burden or associated response time, have suggestions, need a copy of the proposed information collection instrument with instructions, or desire any other additional information, please contact Gary Schaible, Office of Enforcement Programs and Services, National

Firearms Act Division, Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) either by mail at 99 New York Ave. NE., Washington, DC 20226, by email at nfaombcomments@atf.gov, or by telephone 202 648-7165. Written comments and/or suggestions can also be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503 or sent to OIRA_submissions@omb.eop.gov.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a currently approved collection.

(2) *The Title of the Form/Collection:* Notice of Firearms Manufactured or Imported.

(3) *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* Form number: ATF Form 2 (5320.2).

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:*

Primary: Business or other for-profit.

Other: None.

Abstract: The ATF Form 2 (5320.2) is required of (1) a person who is qualified to manufacture National Firearms Act

(NFA) firearms, or (2) a person who is qualified to import NFA firearms to register manufactured or imported NFA firearm(s).

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 4,552 respondents will utilize the form, and it will take each respondent 30 minutes to complete the form.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is 7,773 hours.

If additional information is required contact: Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405A, Washington, DC 20530.

Melody Braswell,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410-14-P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation and Liability Act

On January 9, 2017, the Department of Justice lodged a proposed consent decree with the United States District Court for the Central District of California in the lawsuit entitled *United States v. Estate of Dorothy Medore*, Civil Action No. 5:17-cv-00029.

The consent decree would resolve claims against the Estate of Dorothy Medore under CERCLA § 107(a), 42 U.S.C. 9607(a), for recovery of response costs in connection with the Banaire Enterprises and Banaire Radium Trailers Superfund Sites in Cabazon, California (“Sites”). The Banaire Enterprises Site consists of two parcels located at 49800 Bonita Avenue and 14993 South Broadway. EPA found radioactive contamination at both parcels. The Banaire Radium Trailers Site is located at 4972 Main Street. Trailers on the property contained radioactive airplane parts and waste solvents. From September 2013 to April 2014, EPA performed a cleanup at both Sites. EPA’s response costs through September 30, 2015, are \$2,983,852.79. The United States alleges that the Medore Estate is liable for these costs because it is an owner of Site property.

The proposed Consent Decree with the Estate of Dorothy Medore would resolve the liability of the Estate by requiring the Estate to deposit an initial amount of \$150,000 in an interest-bearing escrow account. Once the decree is entered, the amounts in escrow will be paid to the United States. The Estate also commits under the decree to inventory and appraise all remaining Estate property and to use best efforts to liquidate it. For real property, the Estate must provide EPA with notice of offers and EPA must approve the sale. If the Estate is not able to sell real property after using best efforts, the real property will be auctioned.

When all Estate property has been liquidated, and the proceeds placed in the Estate’s bank account, the Estate will petition the California probate court for permission to distribute Net Proceeds to the United States in satisfaction of Past Response Costs. At least 30 days before filing the petition, the Estate will provide the United States with an accounting of the Estate’s assets and its administration costs, including attorney’s fees.

The publication of this notice opens a period for public comment on the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States v. Estate of Dorothy Medore*, D.J. Ref. No. 90-11-3-10880. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

<i>To submit comments:</i>	<i>Send them to:</i>
By email	<i>pubcomment-ees.enrd@usdoj.gov.</i>
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044-7611.

During the public comment period, the proposed consent decree may be examined and downloaded at this Justice Department Web site: <https://www.justice.gov/enrd/consent-decrees>. We will provide a paper copy of the proposed consent decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044-7611.

Please enclose a check or money order for \$4.75 (25 cents per page

reproduction cost) payable to the United States Treasury.

Henry Friedman,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410-15-P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

On January 10, 2017, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Western District of Wisconsin in the lawsuit entitled *United States and the State of Wisconsin v. Northern States Power Co.*, Civil Action No. 17-cv-16.

In this action, the United States and the State of Wisconsin brought claims against Northern States Power Co. (“Defendant”) for response costs and injunctive relief associated with the release and threatened release of hazardous substances from facilities at and near the Ashland/Northern States Power Lakefront Superfund Site in northwestern Wisconsin (hereinafter the “Site”), pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9601 *et seq.* (“CERCLA”). The proposed Consent Decree requires Defendant to perform the Chequamegon Bay portion of the Site cleanup at a cost of approximately \$42 million. The Consent Decree also requires Defendant to pay \$1 million of EPA’s past response costs incurred at the Site and all EPA’s future response costs. In addition, Defendant will be eligible for reimbursements totaling up to \$4.5 million as it performs the work, drawing from a Site-specific special account funded by a prior settlement with other responsible parties. In return, the United States and the State agree not to sue Defendant under sections 106 and 107 of CERCLA or under section 7003 of the Resource Conservation and Recovery Act (“RCRA”). Pursuant to a prior consent decree, Defendant is also performing the on-land portion of the Site work. That consent decree was approved by the Court in the case named *United States and the State of Wisconsin v. Northern States Power Co.*, Civ. Action No. 12-cv-00565-bbc. If successfully completed, work under the two consent decrees will complete the cleanup at the Site.

The publication of this notice opens a period for public comment on the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and the State of Wisconsin v. Northern States Power Co.*, D.J. Ref. No. 90–11–2–08879/5. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	Send them to:
By email	pubcomment-ees.enrd@usdoj.gov
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Under section 7003(d) of RCRA, a commenter may request an opportunity for a public meeting in the affected area. The United States and the State of Wisconsin have scheduled a public meeting for January 26 at 6:30 p.m. at the Northern Great Lakes Visitor Center, 29270 County Highway G, Ashland, WI 54806.

During the public comment period, the Consent Decree may be examined and downloaded at this Justice Department Web site: <https://www.justice.gov/enrd/consent-decrees>. We will provide a paper copy of the Consent Decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for \$27.00 (25 cents per page reproduction cost) payable to the United States Treasury.

Randall M. Stone,

*Acting Assistant Section Chief,
Environmental Enforcement Section,
Environment and Natural Resources Division.*

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under The Comprehensive Environmental Response, Compensation, and Liability Act

On January 9, 2017, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Eastern District of Virginia

in the lawsuit entitled *United States and Commonwealth of Virginia v. Persimmon Lane, LLC, a Virginia limited liability company*, Civil Action No. 1:17–cv–00017–CMH–IDD.

The Consent Decree resolves claims against Persimmon Lane, LLC (“Persimmon Lane”) arising under the Comprehensive Environmental Response, Compensation, and Liability Act relating to the Hidden Lane Landfill Superfund Site, located near the community of Sterling in Loudoun County, Virginia. Under the Consent Decree, Defendant will endeavor to sell the Site property and distribute the proceeds of any sale(s) according to a tiered breakdown between the United States, the Commonwealth of Virginia, and Persimmon Lane, LLC. The proposed Consent Decree will resolve all CERCLA claims alleged in this action by the United States against Defendant. Defendant has an inability to pay the United States’ full demand.

The publication of this notice opens a period for public comment on the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and Commonwealth of Virginia v. Persimmon Lane, LLC, a Virginia limited liability company*, D.J. Ref. No. 90–11–3–10986. All comments must be submitted no later than 45 days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	Send them to:
By email	pubcomment-ees.enrd@usdoj.gov
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the Consent Decree may be examined and downloaded at this Justice Department Web site: <https://www.justice.gov/enrd/consent-decrees>. We will provide a paper copy of the Consent Decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for \$40.25 (25 cents per page reproduction cost) payable to the United States Treasury. For a paper copy

without the exhibits and signature pages, the cost is \$10.50.

Jeffrey Sands,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

NATIONAL SCIENCE FOUNDATION

Alan T. Waterman Award Committee; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name: Alan T. Waterman Award Committee (#1172).

Date and Time: January 31, 2017; 9:30 a.m. to 2:30 p.m.

Place: National Science Foundation, 4201 Wilson Boulevard, Room 1235, Arlington, Virginia 22230.

Type of Meeting: Closed.

Contact Person: Sherrie B. Green, Program Manager, Room 1270, National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230; (703) 292–5053.

Purpose of Meeting: To provide advice and recommendations in the selection of the Alan T. Waterman Award recipient.

Agenda: To review and evaluate nominations as part of the selection process for awards.

Reason for Closing: The nominations being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries, and personal information concerning individuals associated with the nominations. These matters are exempt under 5 U.S.C. 552(b)(c), (4) and (6) of the Government in the Sunshine Act.

Dated: January 10, 2017.

Crystal Robinson,

Committee Management Officer.

Committee on Equal Opportunities in Science and Engineering; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name: Committee on Equal Opportunities in Science and

Engineering (CEOSE) Advisory Committee Meeting (# 1173).

Dates/Time: February 9, 2017, 1:00 p.m.–5:30 p.m.; February 10, 2017, 8:30 a.m.–3:30 p.m.

Place: National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230.

To help facilitate your entry into the building, please contact Vickie Fung (vfung@nsf.gov) on or prior to February 7, 2017.

Type of Meeting: Open.

Contact Person: Dr. Bernice Anderson, Senior Advisor and CEOSE Executive Secretary, Office of Integrative Activities (OIA), National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Contact Information: 703-292-8040/banderso@nsf.gov.

Minutes: Meeting minutes and other information may be obtained from the CEOSE Executive Secretary at the above address or the Web site at: <http://www.nsf.gov/od/oia/activities/ceose/index.jsp>.

Purpose of Meeting: To study data, programs, policies, and other information pertinent to the National Science Foundation and to provide advice and recommendations concerning broadening participation in science and engineering.

Agenda:

- Opening Statement by the CEOSE Chair
- NSF Executive Liaison Report
- Presentation: NSF Big Idea—INCLUDES (Inclusion across the Nation of Communities of Learners of Underrepresented Discoverers in Engineering and Science)
- Presentation: NSF Big Idea—Navigating the New Arctic
- Working Sessions: Accountability Workshop/Workshop Report/2015–2016 CEOSE Biennial Report
- Discussion: Future Plans for CEOSE
- Discussion: CEOSE Liaisons and Federal Liaisons Reports
- Meeting with NSF Director

Dated: January 10, 2017.

Crystal Robinson,

Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52-022 and 52-023; NRC-2013-0261]

Duke Energy Progress; Combined License Applications for Shearon Harris Nuclear Plant Units 2 and 3

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an exemption in response to an October 13, 2016, letter from Duke Energy Progress (DEP). On May 2, 2013, DEP requested that the NRC suspend review of its combined license (COL) application until further notice. On October 13, 2016, DEP requested an exemption from certain regulatory requirements which,

if granted, would allow them to revise their COL application for Shearon Harris Nuclear Plant (Harris) Units 2 and 3 in order to address enhancements to the Emergency Preparedness (EP) rules by December 31, 2019, rather than by December 31, 2016, as the regulations currently require. The NRC staff reviewed this request and determined that it is appropriate to grant the exemption to the EP update requirements until December 31, 2019, but stipulated that the updates to the Final Safety Analysis Report must be submitted prior to requesting the NRC resume its review of the COL application, or by December 31, 2019, whichever comes first.

DATES: The exemption is effective on January 13, 2017.

ADDRESSES: Please refer to Docket ID NRC-2013-0261 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- **Federal Rulemaking Web site:** Go to <http://www.regulations.gov> and search for Docket ID NRC-2013-0261. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- **NRC's Agencywide Documents Access and Management System (ADAMS):** You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "*Begin Web-based ADAMS Search.*" For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it available in ADAMS) is provided the first time that a document is referenced.

- **NRC's PDR:** You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Brian Hughes, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-6582; email: Brian.Hughes@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Background

On February 18, 2008, DEP submitted to the NRC a COL application for two units of Westinghouse Electric Company's AP1000 advanced pressurized water reactors to be constructed and operated at the existing Shearon Harris Nuclear Plant (Harris) site (ADAMS Accession No. ML080580078). The NRC docketed the Harris Units 2 and 3 COL application (Docket Nos. 52-022 and 52-023) on April 23, 2008. On May 2, 2013 (ADAMS Accession No. ML13123A344), DEP requested that the NRC suspend review of the Harris Units 2 and 3 COL application. The NRC granted DEP's request for suspension and all review activities related to the Harris Units 2 and 3 COL application were suspended while the application remained docketed.

On July 29, 2013 (ADAMS Accession No. ML13212A361), DEP requested an exemption from the requirements in part 50, appendix E, Section I.5 of title 10 of the *Code of Federal Regulations* (10 CFR), as referenced by 10 CFR 52.79(a)(21), to submit an update to the COL application, addressing the enhancements to the EP rules by December 31, 2013, which the NRC granted through December 31, 2014. On August 1, 2014 (ADAMS Accession No. ML14216A432), DEP requested another exemption from the requirements of 10 CFR part 50, appendix E, Section I.5, as referenced by 10 CFR 52.79(a)(21), to submit an update to the COL application, addressing the enhancements to the EP rules by December 31, 2014, which the NRC granted through December 31, 2015. On August 12, 2015 (ADAMS Accession No. ML15226A352), DEP requested another exemption from the requirements of 10 CFR part 50, appendix E, Section I.5, as referenced by 10 CFR 52.79(a)(21), to submit an update to the COL application, addressing the enhancements to the EP rules by December 31, 2016. On October 13, 2016 (ADAMS Accession No. ML16288A816) DEP requested another exemption from the requirements of 10 CFR part 50, appendix E, Section I.5, as referenced by 10 CFR 52.79(a)(21), to submit annual updates to the COL application during the years 2016, 2017, and 2018, addressing the enhancements to the EP rules by December 31, 2019.

II. Request/Action

Part 50, appendix E, Section I.5, requires that an applicant for a COL under Subpart C of 10 CFR part 52 whose application was docketed prior to December 23, 2011, must revise their

COL application to comply with the EP rules published in the **Federal Register** (76 FR 72560) on November 23, 2011. An applicant that does not receive a COL before December 31, 2013, shall revise its COL application to comply with these changes no later than December 31, 2013.

Since DEP will not hold a COL prior to December 31, 2013, it is therefore required to revise its application to be compliant with the new EP rules. Similar to an earlier exemption request it submitted, as described above, by letter dated October 13, 2016 (ADAMS Accession No. ML16288A815), DEP requested another exemption from the requirements of 10 CFR part 50, appendix E, Section I.5, to submit the required COL application revision to comply with the new EP rules. The requested exemption would allow DEP to revise its COL application, and comply with the new EP rules on or before December 31, 2019, rather than the initial December 31, 2013, date required by 10 CFR part 50, appendix E, Section I.5. The current requirement to comply with the new EP rule could not be changed, absent the exemption.

III. Discussion

Pursuant to 10 CFR 50.12(a), the Commission may, upon application by any interested person or upon its own initiative, grant exemptions from the requirements of 10 CFR part 50, including 10 CFR part 50, appendix E, Section I.5, when: (1) The exemption(s) are authorized by law, will not present an undue risk to public health or safety, and are consistent with the common defense and security; and (2) special circumstances are present. As relevant to the requested exemption, special circumstances exist if: Application of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule (10 CFR 50.12(a)(2)(ii)).

Authorized by Law

The exemption is a one-time schedule exemption from the requirements of 10 CFR part 50, appendix E, Section I.5. The exemption would allow DEP to revise its COL application, and comply with the new EP rules on or before December 31, 2019, in lieu of the initial December 31, 2013, the date required by 10 CFR part 50, appendix E, Section I.5. As stated above, 10 CFR 50.12 allows the NRC to grant exemptions from the requirements of 10 CFR part 50. The NRC staff has determined that granting DEP the requested one-time exemption from the requirements of 10 CFR part

50, appendix E, Section I.5 will not result in a violation of the Atomic Energy Act of 1954, as amended, or NRC's regulations. Therefore, the exemption is authorized by law.

No Undue Risk to Public Health and Safety

The underlying purpose of the enhancements to EP found in 10 CFR part 50, appendix E, is to amend certain EP requirements to enhance protective measures in the event of a radiological emergency; address, in part, enhancements identified after the terrorist events of September 11, 2001; clarify regulations to effect consistent Emergency Plan implementation among licensees; and modify certain requirements to be more effective and efficient. Since plant construction cannot proceed until the NRC review of the application is completed, a mandatory hearing is completed and a license is issued, the exemption does not increase the probability of postulated accidents. Additionally, based on the nature of the requested exemption as described above, no new accident precursors are created by the exemption; thus neither the probability, nor the consequences of postulated accidents are increased. Therefore, there is no undue risk to public health and safety.

Consistent With Common Defense and Security

The requested exemption would allow DEP to submit the revised COL application prior to requesting the NRC to resume the review and, in any event, on or before December 31, 2019. This schedule change has no relation to security issues. Therefore, the common defense and security is not impacted.

Special Circumstances

Special Circumstances, in accordance with 10 CFR 50.12(a)(2)(ii) are present whenever: (1) Application of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule (10 CFR 50.12(a)(ii); or (2) The exemption would only provide temporary relief from the applicable regulation or the applicant has made good faith efforts to comply with the regulation (10 CFR 50.12(a)(2)(v)).

The purpose of 10 CFR part 50, appendix E, Section I.5 is to ensure that applicants and new COL holders updated their COL applications or COLs to allow the NRC to review them efficiently and effectively, and to bring the applicants or licensees into

compliance prior to receiving a license, or, for licensees, prior to operating the plant. If the NRC were to grant this exemption, and DEP were then required to update its application to comply with the EP rule enhancements by December 31, 2019, or prior to any request to restart their review, the purpose of the rule would still be achieved because the applicant will be required to make required updates to the emergency plan to facilitate NRC review of the application at the appropriate time. For this reason, the application of 10 CFR part 50, appendix E, Section I.5, for the suspended Harris 2 and 3 COL application is deemed unnecessary and, therefore, special circumstances are present.

Eligibility for Categorical Exclusion From Environmental Review

With respect to the exemption's impact on the quality of the human environment, the NRC has determined that this specific exemption request is eligible for categorical exclusion as identified in 10 CFR 51.22(c)(25) and justified by the NRC staff as follows:

The following categories of actions are categorical exclusions provided that:

(i) There is no significant hazards consideration;

The criteria for determining whether there is no significant hazards consideration are found in 10 CFR 50.92. The proposed action involves only a schedule change regarding the submission of an update to the application for which the licensing review has been suspended. Therefore, there are no significant hazards considerations because granting the proposed exemption would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

(ii) There is no significant change in the types or significant increase in the amounts of any effluents that may be released offsite;

The proposed action involves only a schedule change which is administrative in nature, and does not involve any changes to be made in the types or significant increase in the amounts of effluents that may be released offsite.

(iii) There is no significant increase in individual or cumulative public or occupational radiation exposure;

Since the proposed action involves only a schedule change which is administrative in nature, it does not

contribute to any significant increase in occupational or public radiation exposure.

(iv) There is no significant construction impact;

The proposed action involves only a schedule change which is administrative in nature; the application review is suspended until further notice, and there is no consideration of any construction at this time, and hence the proposed action does not involve any construction impact.

(v) There is no significant increase in the potential for or consequences from radiological accidents;

The proposed action involves only a schedule change which is administrative in nature, and does not impact the probability or consequences of accidents.

(vi) The requirements from which an exemption is sought involve:

(B) Reporting requirements;

The exemption request involves submitting an updated COL application by DEP

and

(G) Scheduling requirements;

The proposed exemption relates to the schedule for submitting a COL application update to the NRC.

IV. Conclusion

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a), the exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also special circumstances are present. Therefore, the Commission hereby grants DEP a one-time exemption from the requirements of 10 CFR part 50 Appendix E, Section I.5 pertaining to the Harris Units 2 and 3 COL application to allow submittal of the revised COL application that complies with the enhancements to the EP rules prior to any request to the NRC to resume the review, and in any event, no later than December 31, 2019.

Pursuant to 10 CFR 51.22, the Commission has determined that the exemption request meets the applicable categorical exclusion criteria set forth in 10 CFR 51.22(c)(25), and the granting of this exemption will not have a significant effect on the quality of the human environment.

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 4th day of January 2017.

For The Nuclear Regulatory Commission.

Francis M. Akstulewicz,

*Director, Division of New Reactor Licensing,
Office of New Reactors.*

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52-025 and 52-026; NRC-2008-0252]

Southern Nuclear Operating Company, Inc., Vogtle Electric Generating Plant, Units 3 and 4; Debris Screen Related Dimensions

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and is issuing License Amendment No. 63 to Combined Licenses (COL), NPF-91 and NPF-92. The COLs were issued to Southern Nuclear Operating Company, Inc., and Georgia Power Corporation, Oglethorpe Power Corporation, MEAG Power SPVM, LLC, MEAG Power SPVJ, LLC, MEAG Power SPVP, LLC, Authority of Georgia, and the City of Dalton, Georgia (the licensee); for construction and operation of the Vogtle Electric Generating Plant (VEGP) Units 3 and 4, located in Burke County, Georgia.

The granting of the exemption allows the changes to Tier 1 information asked for in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

DATES: The exemption and amendment were issued on December 29, 2016.

ADDRESSES: Please refer to Docket ID NRC-2008-0252 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2008-0252. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document. The request for the amendment and exemption was submitted by letter dated August 11, 2016 (ADAMS Accession No. ML16224B122).

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Ruth Reyes, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-3249; email: Ruth.Reyes@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is granting an exemption from Paragraph B of Section III, "Scope and Contents," of appendix D, "Design Certification Rule for the AP1000," to part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), and issuing License Amendment No. 63 to COLs, NP-91 and NPF-92, to the licensee. The exemption is required by Paragraph A.4 of Section VIII, "Processes for Changes and Departures," appendix D, to 10 CFR part 52 to allow the licensee to depart from Tier 1 information. With the requested amendment, the licensee sought proposed changes that would revise the Updated Final Safety Analysis Report in the form of departures from the incorporated plant-specific DCD Tier 2 information. The proposed amendment also involves related changes to plant-specific Tier 1 information, with corresponding changes to the associated COL Appendix C information. The proposed changes are to information identifying the frontal face area and screen surface area for the In-Containment Refueling Water Storage Tank (IRWST) screens, the location and dimensions of the protective plate located above the containment recirculation (CR) screens, and increasing the maximum Normal

Residual Heat Removal System flowrate through the IRWST and CR screens.

Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in 10 CFR 50.12, 10 CFR 52.7, and Section VIII.A.4 of appendix D to 10 CFR part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML16307A355.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to the licensee for VEGP Units 3 and 4 (COLs NPF-91 and NPF-92). The exemption documents for VEGP Units 3 and 4 can be found in ADAMS under Accession Nos. ML16307A281 and ML16307A302, respectively. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document. The amendment documents for COLs NPF-91 and NPF-92 are available in ADAMS under Accession Nos. ML16307A274 and ML16307A276, respectively. A summary of the amendment documents is provided in Section III of this document.

II. Exemption

Reproduced below is the exemption document issued to Vogtle Unit 3 and Unit 4. It makes reference to the combined safety evaluation that provides the reasoning for the findings made by the NRC (and listed under Item 1) in order to grant the exemption:

1. In a letter dated August 11, 2016, the licensee requested from the Commission an exemption to allow departures from Tier 1 information in the certified DCD incorporated by reference in 10 CFR part 52, appendix D, as part of License Amendment Request 16-013, "Debris Screen Related Dimensions."

For the reasons set forth in Section 3.1 of the NRC staff's Safety Evaluation, which can be found at ADAMS Accession No. ML16307A355, the Commission finds that:

A. The exemption is authorized by law;

B. the exemption presents no undue risk to public health and safety;

C. the exemption is consistent with the common defense and security;

D. special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;

E. the special circumstances outweigh any decrease in safety that may result from the reduction in standardization caused by the exemption; and

F. the exemption will not result in a significant decrease in the level of safety otherwise provided by the design.

2. Accordingly, the licensee is granted an exemption from the certified DCD Tier 1 information, with corresponding changes to Appendix C of the Facility COLs as described in the licensee's request dated August 11, 2016. This exemption is related to, and necessary for, the granting of License Amendment No. 63, which is being issued concurrently with this exemption.

3. As explained in Section 5.0 of the NRC staff's Safety Evaluation this exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment needs to be prepared in connection with the issuance of the exemption.

4. This exemption is effective as of the date of its issuance.

III. License Amendment Request

By letter dated August 11, 2016, the licensee requested that the NRC amend the COLs for VEGP, Units 3 and 4, COLs NPF-91 and NPF-92. The proposed amendment is described in Section I of this **Federal Register** notice.

The Commission has determined for these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** on September 27, 2016 (81 FR 66308). No comments were received during the 30-day comment period.

The Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental

assessment need be prepared for these amendments.

IV. Conclusion

Using the reasons set forth in the combined safety evaluation, the staff granted the exemption and issued the amendment that the licensee requested on August 11, 2016.

The exemption and amendment were issued on December 29, 2016, as part of a combined package to the licensee (ADAMS Accession No. ML16307A260).

Dated at Rockville, Maryland, this 3rd day of January 2017.

For the Nuclear Regulatory Commission.

Jennifer Dixon-Herrity,

Chief, Licensing Branch 4, Division of New Reactor Licensing, Office of New Reactors.

BILLING CODE 7590-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79763; File No. SR-DTC-2016-802]

Self-Regulatory Organizations; The Depository Trust Company; Notice of No Objection To Advance Notice Filing Relating To Processing of Transactions in Money Market Instruments

January 9, 2017.

The Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") on September 23, 2016 advance notice SR-DTC-2016-802 ("Advance Notice") pursuant to Section 806(e)(1) of the Payment, Clearing, and Settlement Supervision Act of 2010 ("Payment, Clearing and Settlement Supervision Act")¹ and Rule 19b-4(n)(1)(i)² under the Securities Exchange Act of 1934 ("Exchange Act") to establish a change in the processing of transactions in money market instruments ("MMI").³

¹ 12 U.S.C. 5465(e)(1). The Financial Stability Oversight Council designated DTC a systemically important financial market utility on July 18, 2012. See Financial Stability Oversight Council 2012 Annual Report, Appendix A, <http://www.treasury.gov/initiatives/fsoc/Documents/2012%20Annual%20Report.pdf>. Therefore, DTC is required to comply with the Payment, Clearing and Settlement Supervision Act and file advance notices with the Commission. See 12 U.S.C. 5465(e).

² 17 CFR 240.19b-4(n)(1)(i).

³ MMI are short-term debt securities issued by financial institutions, large corporations, or state and local governments that generally mature 1 to 270 days from their original issuance date, and include, but are not limited to, commercial paper, banker's acceptances, and short-term bank notes. Most MMI trade in large denominations (typically, \$250,000 to \$50 million) and are purchased by institutional investors.

The Advance Notice was published for comment in the **Federal Register** on November 9, 2016.⁴ The Commission did not receive any comments on the Advance Notice. This publication serves as notice of no objection to the Advance Notice.

I. Description of the Advance Notice

The Advance Notice is a proposal by DTC to modify (i) the DTC Rules, By-laws and Organization Certificate (“Rules”),⁵ (ii) the DTC Settlement Service Guide (“Settlement Guide”),⁶ and (iii) the DTC Distributions Service Guide (“Distributions Guide”),⁷ to change the way in which DTC processes transactions in money market instruments (“MMI”). The proposal would affect DTC’s processing of issuances of MMI securities as well as maturity presentments, income presentments, principal presentments, and reorganization presentments (collectively, “presentments” and with issuances of MMI securities, “MMI Obligations”).

Specifically, DTC proposes to: (i) With respect to delivery of MMI securities, require purchasers of the securities (or their custodian, if applicable) to acknowledge that they agree to receive the securities via DTC’s Receiver Authorized Delivery (“RAD”) system before DTC processes the transaction; (ii) with respect to cash, require an issuing and paying agent (“IPA”) of an MMI issuer to acknowledge its funding obligations for MMI presentments before DTC processes the transaction, except in limited circumstances where there are

no funding obligations;⁸ (iii) implement an enhanced process to check certain MMI transactions against DTC’s risk management controls (referred to as “MMI Optimization”); (iv) eliminate the largest provisional net credit risk management control; and (v) eliminate DTC’s receive versus payment net additions control, as described below. In addition, the proposal would amend DTC’s Distributions Guide to conform to the proposed changes.

A. Background

Today, according to DTC, when an issuer issues MMI securities at DTC, the IPA for that issuer sends issuance instructions to DTC electronically, which results in crediting the applicable MMI securities to the DTC account of the IPA. The MMI securities are then delivered by DTC to the accounts of the applicable DTC participants (“Participants”) that are purchasing the issuance, typically as custodians for individual investors, in accordance with their purchase amounts. The IPA’s delivery instructions may be free of payment or, most often, for payment (*i.e.*, delivery versus payment or “DVP”). Unlike deliveries free of payment, DVP transactions are subject to DTC’s risk management controls for both the IPA and the receiving Participants, which means they are monitored for Net Debit Cap and Collateral Monitor sufficiency.⁹

When MMI securities of a particular acronym¹⁰ mature, the current presentment process involves DTC automatically sweeping the matured positions from the applicable

Participant accounts and debiting the settlement account of the applicable IPA for the amount of the matured position, with corresponding credits made to the settlement accounts of the deliverers. Because presentments are currently processed automatically at DTC, IPAs have the option to refuse to pay (“RTP”) for maturing MMI Obligations to protect against the possibility that an IPA may not be able to fund settlement because it has not received funds from the relevant issuer. An IPA that refuses payment for a presentment (*i.e.*, refuses to make payment for the delivery of matured MMI securities for which it is the designated IPA and/or pay interest or dividend income on MMI securities for which it is the designated IPA) must notify DTC of its RTP. An IPA may notify DTC of an RTP until 3:00 p.m. ET on the date of the affected presentment.

Under the current Rules, the effect of an RTP is for DTC to reverse all processed MMI security deliveries of that MMI acronym, including issuances, related funds credits and debits, and presentments, which means that the securities would fail to settle. This reversal of processed (but not yet settled) transactions could override DTC’s risk management controls (*i.e.*, Collateral Monitor and Net Debit Cap) and could result in a Participant’s account having, unexpectedly, a net debit balance that exceeds its Net Debit Cap and/or having insufficient collateral to secure its settlement obligations throughout the day. Thus, RTPs can create uncertainty and pose systemic risk with respect to a Participant’s and, ultimately, DTC’s ability to complete end-of-day net funds settlement.

Currently, to mitigate the risks associated with an RTP, the Rules and the Settlement Guide provide for the Largest Provisional Net Credit control (“LPNC Control”). Under the LPNC Control, DTC withholds from each Participant’s Net Debit Cap the two largest intraday net MMI credits owed to that Participant. The MMI credits withheld are not included in the calculation of the Participant’s Collateral Monitor or its net debit balance. This provides protection in the event that processed (but not yet settled) MMI transactions are reversed by DTC as a result of an RTP.¹¹

According to DTC, its Rules and procedures relating to settlement

⁴ Securities Exchange Act Release No. 79224 (November 3, 2016), 81 FR 78884 (November 9, 2016) (SR–DTC–2016–802). DTC also filed a related proposed rule change with the Commission pursuant to Section 19(b)(1) of the Exchange Act and Rule 19b–4 thereunder, seeking approval of changes to its rules necessary to implement the Advance Notice. 15 U.S.C. 78s(b)(1) and 17 CFR 240.19b–4, respectively. Notice of the proposed rule change was published in the **Federal Register** on October 11, 2016. *See* Securities Exchange Act Release No. 34–79046 (October 5, 2016), 81 FR 70200 (October 11, 2016) (SR–DTC–2016–008). On November 18, 2016, the Commission extended to January 9, 2017 the date by which it shall either approve, disapprove, or institute proceedings to determine whether to approve or disapprove the proposed rule change. *See* Securities Exchange Act Release No. 34–79351 (November 18, 2016), 81 FR 85295 (November 25, 2016) (SR–DTC–2016–008). The Commission did not receive any comments on the proposal.

⁵ Available at <http://www.dtcc.com/legal/rules-and-procedures.aspx>.

⁶ Available at <http://www.dtcc.com/~media/Files/Downloads/legal/service-guides/Settlement.pdf>.

⁷ Available at <http://www.dtcc.com/~media/Files/Downloads/legal/service-guides/Distributions%20Service%20Guide%20FINAL%20November%202014.pdf>.

⁸ An affirmative MMI funding acknowledgement by the IPA would not be required where the aggregate amount of an issuer’s delivery of MMI securities that have been approved in RAD exceeds the aggregate amount of presentments because payment for those securities would fully fund the presentments. In such a case, the IPA would be deemed to have provided a funding acknowledgement and DTC would process the transactions, subject to risk management controls.

⁹ DVP transfers at DTC are structured so that the completion of delivery of securities to a Participant in end-of-day settlement is contingent on the receiving Participant satisfying its end-of-day net settlement obligation, if any. The risk of Participant failure to settle is managed through risk management controls that would enable DTC to complete settlement despite the failure to settle of the Participant, or affiliated family of Participants, with the largest net settlement obligation. The two principal controls are the Net Debit Cap and Collateral Monitor. The largest net settlement obligation of a Participant or affiliated family of Participants cannot exceed DTC liquidity resources, based on the Net Debit Cap, and must be fully collateralized, based on the Collateral Monitor.

¹⁰ MMI of an issuer are designated by DTC using unique four-character identifiers referred to as acronyms. An MMI issuer can have multiple acronyms representing its securities. MMI transactions and other functions relating to MMI are done on an “acronym-by-acronym” basis.

¹¹ *See* Securities Exchange Act Release No. 71888 (April 7, 2014), 79 FR 20285 (April 11, 2014) (SR–DTC–2014–02) (clarifying the LPNC procedures in the Settlement Guide) and Securities Exchange Act Release No. 68983 (February 25, 2013), 78 FR 13924 (March 1, 2013) (SR–DTC–2012–10) (updating the Rules related to LPNC).

processing for the MMI program¹² were designed to limit credit, liquidity, and operational risk for DTC and Participants. In connection with ongoing efforts by DTC to evaluate the risk associated with the processing of MMI Obligations, DTC has determined that the risks presented by intra-day reversals of processed MMI Obligations should be eliminated to prevent the possibility that a reversal could override DTC's risk controls and heighten liquidity and settlement risk. DTC also states that eliminating intra-day reversals of processed MMI Obligations would enhance intra-day finality and allow for the elimination of the LPNC Control, which creates intra-day blockage and affects liquidity through the withholding of settlement credits.

B. Proposed Changes

The proposal would eliminate provisions for intra-day reversals of processed MMI Obligations based on an IPA's RTP or issuer insolvency of which DTC becomes aware, as described below.

Pursuant to the proposal, DTC would no longer automatically process MMI Obligations. DTC's processing of MMI Obligations involves the delivery of cash and/or securities. With respect to securities, DTC would require purchasers of MMI issuances (or their custodian, if applicable) to acknowledge in RAD that they agree to receive the MMI securities before DTC processes the transaction. With respect to cash, an IPA would make an MMI funding acknowledgment using a new DTC platform designed to accept such acknowledgments. When an MMI funding acknowledgement is received, DTC would attempt to process transactions in the acronym(s) for which the MMI funding acknowledgment pertains.

If the IPA has provided an MMI funding acknowledgment for the full amount of presentments, then all transactions in that acronym would be sent to the normal DTC processing system and tested against DTC's risk management controls. If the IPA provides an MMI funding acknowledgement for only partial funding of the presentments, then DTC would undertake the proposed "MMI Optimization" process to determine whether risk management controls would be satisfied by all deliverers and purchasers of the acronym and determine whether all parties would maintain adequate positions to complete

the applicable transactions. However, as long as the issuances that could satisfy deliverer and purchaser risk controls for that MMI acronym are equal to or greater than the maturing presentments of that acronym, the applicable transactions (*i.e.*, those that pass risk controls) could be processed without an IPA's funding acknowledgement.

If DTC does not receive the necessary acknowledgments from both the IPA and purchasers for an acronym for which maturing MMI Obligations are due on that day and/or DTC is aware, through ordinary business channels, that the issuer of an acronym is insolvent ("Acronym Payment Failure"), then DTC would not process transactions in the acronym.¹³

In the event of an Acronym Payment Failure, DTC would: (i) Prevent further issuance and maturity activity for the acronym in DTC's system; (ii) prevent deliveries of MMI securities of the acronym and halt all activity in that acronym; (iii) set the collateral value of the MMI securities in the acronym to zero for purposes of calculating the Collateral Monitor of any affected Participant; and (iv) notify Participants of the Acronym Payment Failure via DTC's current notification process. Notwithstanding the occurrence of an Acronym Payment Failure, the IPA would remain liable for funding pursuant to any MMI funding acknowledgment previously provided for that business day.

A "Temporary Acronym Payment Failure" would occur when an IPA notifies DTC that it temporarily refuses to pay income presentments, and only income presentments, for an acronym, which typically would be due to an issuer's inability to fund income presentments on that day. A Temporary Acronym Payment Failure would only be initiated if there are no maturity presentments, principal presentments, and/or reorganization presentments on that business day. DTC would require the issuer and/or IPA to resolve such a situation by the next business day.

In the event of a Temporary Acronym Payment Failure, DTC would: (i) Temporarily devalue to zero all of the issuer's MMI securities for purposes of calculating the Collateral Monitor, unless and until the IPA acknowledges funding with respect to the income payments on the following business day; (ii) notify Participants of the delayed payment; and (iii) block from DTC's systems all further issuances and

maturities by that issuer for the remainder of the business day on which notification of the Temporary Payment Failure was received by DTC. An IPA would not be able to avail itself of a Temporary Acronym Payment Failure for the same acronym on consecutive business days.

The Commission understands that the proposal would not: (i) Decrease the total number and value of transactions that would pass DTC's risk controls throughout the processing day; or (ii) increase the volume of transactions that would fail to settle. The Commission also understands that the proposal would reduce blockage caused by DTC. Non-MMI transactions and fully funded MMI transactions would likely have a reduction in blockage as a result of the elimination of the LPNC Control. The elimination of the LPNC Control would no longer withhold billions of dollars of settlement credits as it does today, thus permitting MMI transactions subject to the LPNC Control to process earlier in the day. Moreover, it is expected that the value and volume of MMI transactions recycling due to failure to meet DTC's risk management controls during the late morning and afternoon periods would be reduced, as a result of such transactions being held outside of DTC's processing system while they await the necessary acknowledgments.

Similar to the LPNC Control, the RVPNA Control is used to prevent a Participant from delivering free of value or undervalued any MMI securities that were received for payment on the same day.¹⁴ For example, under DTC's current rules, if Participant A delivers MMI securities to Participant B for payment, and then Participant B delivers the same MMI securities to Participant C free of payment (subject to risk management controls), the delivery to Participant C is final when the securities are credited to Participant C. DTC would, therefore, be unable to reverse the delivery to Participant C and, thus, DTC could not reverse the delivery from Participant B to Participant A. The RVPNA Control protects DTC against being unable to reverse such transactions of MMI Securities in the event of an RTP by the IPA. Because DTC would no longer permit the reversal of processed MMI transactions, DTC would no longer need the RVPNA Control.

¹² The procedures applicable to MMI settlement processing are set forth in the Settlement Guide. *Supra* note 6.

¹³ DTC would automatically consider an Acronym Payment Failure that occurred due to an IPA's failure to provide timely MMI funding acknowledgement (*i.e.*, provide the acknowledgment by 3:00 p.m. ET) as an RTP.

¹⁴ For purposes of RVPNA, MMI securities are considered undervalued if they are delivered for less than 10 percent below market value.

II. Discussion and Commission Findings

Although the Act does not specify a standard of review for an advance notice, its stated purpose is instructive: To mitigate systemic risk in the financial system and promote financial stability by, among other things, promoting uniform risk management standards for systemically important financial market utilities and strengthening the liquidity of systemically important financial market utilities.¹⁵ Section 805(a)(2) of the Act authorizes the Commission to prescribe risk management standards for the payment, clearing, and settlement activities of designated clearing entities and financial institutions engaged in designated activities for which it is the Supervisory Agency or the appropriate financial regulator.¹⁶ Section 805(b) of the Act states that the objectives and principles for the risk management standards prescribed under Section 805(a) shall be to:

- Promote robust risk management;
- promote safety and soundness;
- reduce systemic risks; and
- support the stability of the broader financial system.¹⁷

The Commission has adopted risk management standards under Section 805(a)(2) of the Act¹⁸ and Section 17A of the Exchange Act¹⁹ (“Clearing Agency Standards”).²⁰ The Clearing Agency Standards require registered clearing agencies to establish, implement, maintain, and enforce written policies and procedures that are reasonably designed to meet certain minimum requirements for their operations and risk management practices on an ongoing basis.²¹ Therefore, it is appropriate for the Commission to review proposed changes in advance notices against the objectives and principles of these risk management standards as described in Section 805(b) of the Act and in the Clearing Agency Standards.

A. Consistency With Section 805(b) of the Act

The Commission believes that the proposed changes in the Advance Notice are consistent with the objectives and principles described in Section 805(b) of the Act.²²

First, the Commission believes that the changes proposed in the Advance Notice promote robust risk management. Under the proposal, DTC would no longer automatically process MMI presentments. Instead, before it processes a presentment, DTC would require purchasers of MMI issuances (or their custodian, if applicable) to acknowledge in RAD that the purchasers agree to receive the MMI securities before DTC processes the transaction. The proposal would also require the applicable IPA to provide an MMI funding acknowledgment, as applicable. The MMI funding acknowledgement would be a commitment by the IPA to make the applicable funds available to DTC. Although the proposed changes would establish new requirements before DTC would process such MMI transactions, the Commission believes that the benefits of eliminating the risk of a potential override of DTC’s risk management controls from an RTP supports such requirements.

DTC also would employ the proposed MMI Optimization, which would, for MMI transactions that await funding, continually test the net effect of transactions, across multiple MMI issuers, on receiving and delivering Participants’ risk controls and then process the transactions once the controls are met. MMI Optimization would help maximize processing and facilitate more timely settlement of transactions, thus reducing risks that transactions may not settle.

Second, the Commission believes that the changes proposed in the Advance Notice promote safety and soundness. Currently, as described above, if DTC were to reverse MMI transactions because of an RTP, the reversal could override DTC’s risk management controls. The Advance Notice would eliminate RTPs and resulting reversals of MMI transactions, and thus eliminates this opportunity to override DTC’s risk management controls.

Third, the Commission believes that the Advance Notice helps reduce systemic risk. As described above, DTC would no longer automatically process MMI presentments. Rather, DTC would require purchasers to authorize delivery via RAD and IPAs to provide a funding acknowledgment before processing MMI presentments, as applicable. Because these changes would eliminate the risk of reversals due to an RTP, the changes would mitigate the risk of a potential override of DTC’s risk management controls. In turn, this would reduce DTC’s exposure to potential failures, promote DTC’s safety and soundness, as

discussed above, and thereby reduce the systemic risk to the financial system.

Fourth, the Commission believes that the Advance Notice promotes the stability of the broader financial system. As described above, the LPNC Control currently withholds from each Participant the two largest intraday net MMI credits out of all of the MMI credits owed to that Participant in order to protect DTC from a Participant breaching its Net Debit Cap or having insufficient collateral in the event of a reversed because of an RTP. However, withholding the credits makes them unavailable to the Participant, which can cause blockage (*i.e.*, the failure of a transaction to process because of insufficient liquidity) for the Participant. Meanwhile, the RVPNA Control limits a Participant’s ability to deliver MMI that the Participant is also due to receive that day. By preventing Participants from delivering certain MMI securities, the RVPNA Control creates blockage.

Because DTC would no longer process MMI transactions without a purchaser’s RAD acknowledgement and an IPA’s MMI funding acknowledgement, as applicable, RTPs and resulting intraday reversals no longer present the risk that the LPNC and RVPNA Controls are meant to address. As such, DTC would eliminate these controls. This change would make available to Participants the intraday credits that were previously withheld, which would decrease intraday liquidity blockage for the Participant and enable DTC to process MMI transactions earlier. Thus, Participants would have less exposure to intraday reversals that increase liquidity and settlement risk and a more complete view of their actual intraday net debit and credit balances.

For the above reasons, the Commission believes that the changes proposed in the Advance Notice promote robust risk management, promote safety and soundness, reduce systemic risks, and support the stability of the broader financial system consistent with Section 805(b) of the Act.²³

B. Consistency With Rule 17Ad-22(d) of the Exchange Act

The Commission also believes that the Advance Notice is consistent with the Clearing Agency Standards, in particular Rule 17Ad-22(d)(12) under the Exchange Act.²⁴ Rule 17Ad-22(d)(12) requires DTC to establish, implement, maintain and enforce written policies and procedures

¹⁵ See 12 U.S.C. 5461(b).

¹⁶ 12 U.S.C. 5464(a)(2).

¹⁷ 12 U.S.C. 5464(b).

¹⁸ 12 U.S.C. 5464(a)(2).

¹⁹ 15 U.S.C. 78q-1.

²⁰ See 17 CFR 240.17Ad-22. Securities Exchange Act Release No. 68080 (October 22, 2012), 77 FR 66220 (November 2, 2012) (S7-08-11).

²¹ *Id.*

²² *Id.*

²³ 12 U.S.C. 5464(b).

²⁴ 17 CFR 240.17Ad-22(d)(12).

reasonably designed to ensure that final settlement occurs no later than the end of the settlement day; and require that intraday or real-time finality be provided where necessary to reduce risks.²⁵ Through this proposal, DTC would no longer process MMI transactions automatically but, rather, would first require an IPA's funding acknowledgment and a purchaser's RAD acknowledgment, as applicable. Where a funding acknowledgment is provided, DTC would no longer permit an RTP, thus eliminating the risk of an intraday reversal of a processed MMI transaction. Additionally, the proposal would eliminate the LPNC and RVPNA Controls, which would help eliminate the blockage caused by the LPNC Control's withholding of Participants' two largest net credits for MMI transactions and the RVPNA Control's restriction on delivering certain MMI securities. Each of these proposed changes, both individually and collectively, would help ensure that final settlement occurs at the end of the day. As such, the Commission believes that the changes proposed in the Advance Notice are consistent with Rule 17Ad-22(d)(12) under the Exchange Act.²⁶

III. Conclusion

It is therefore noticed, pursuant to Section 806(e)(1)(I) of the Payment, Clearing and Settlement Supervision Act,²⁷ that the Commission *does not object* to the Advance Notice (SR-DTC-2016-802) and that DTC is *authorized* to implement the proposed change as of the date of this notice or the date of an order by the Commission authorizing DTC to implement DTC's proposed rule change SR-DTC-2016-008 that is consistent with this Advance Notice, whichever is later.

By the Commission.

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79759; File No. SR-NYSEArca-2016-149]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change, as Modified by Amendment No. 1, To Amend NYSE Arca Rule 6.91

January 9, 2017.

On November 14, 2016, NYSE Arca, Inc. ("Exchange" or "NYSE Arca") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change to amend NYSE Arca Rule 6.91 to clarify and provide greater transparency to its rules governing the trading of Electronic Complex Orders. The proposed rule change was published for comment in the **Federal Register** on December 2, 2016.³ On December 23, 2016, NYSE Arca filed Amendment No. 1, which supersedes the original proposal in its entirety. The Commission has received no comments regarding the proposed rule change.

Section 19(b)(2) of the Act⁴ provides that, within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is January 16, 2017.

The Commission is extending the 45-day time period for Commission action on the proposed rule change. The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider and take action on the proposed rule change.

Accordingly, pursuant to Section 19(b)(2)(A)(ii)(I) of the Act,⁵ the Commission designates March 2, 2017,

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See Securities Exchange Act Release No. 79404 (November 28, 2016), 81 FR 87094.

⁴ 15 U.S.C. 78s(b)(2).

⁵ 15 U.S.C. 78s(b)(2)(A)(ii)(I).

as the date by which the Commission should either approve or disapprove or institute proceedings to determine whether to disapprove the proposed rule change (File Number SR-NYSEArca-2016-149).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶

Eduardo A. Aleman,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79758; File No. SR-BatsBZX-2016-89]

Self-Regulatory Organizations; Bats BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Modify Fees for Connectivity and Its Communication and Routing Service Known as Bats Connect

January 9, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 27, 2016, Bats BZX Exchange, Inc. (the "Exchange" or "BZX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act³ and Rule 19b-4(f)(2) thereunder,⁴ which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members⁵ and non-members of the Exchange pursuant to BZX Rules 15.1(a)

⁶ 17 CFR 200.30-3(a)(31).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ 15 U.S.C. 78s(b)(3)(A)(ii).

⁴ 17 CFR 240.19b-4(f)(2).

⁵ The term "Member" is defined as "any registered broker or dealer that has been admitted to membership in the Exchange." See Exchange Rule 1.5(n).

²⁵ *Id.*

²⁶ *Id.*

²⁷ 12 U.S.C. 5465(e)(1)(I).

and (c) to modify its fees for physical ports, logical ports, and for the use of a communication and routing service known as Bats Connect.

The text of the proposed rule change is available at the Exchange's Web site at www.bats.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to modify its fees for physical ports, logical ports, and for the use of a communication and routing service known as Bats Connect. Each of these proposed changes are described below.

Physical Ports

A physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently maintains a presence in two third-party data centers: (i) The primary data center where the Exchange's business is primarily conducted on a daily basis, and (ii) a secondary data center, which is predominantly maintained for business continuity purposes. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: \$2,000 per physical port that connects to the System⁶ via 1 gigabyte circuit; and \$4,000 per physical port that connects to the System via 10 gigabyte

circuit. The Exchange proposes to increase the fee per physical port that connects to the System via a 10 gigabyte circuit from \$4,000 per month to \$6,000 per month in order cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems and enable it to continue to maintain and improve its market technology and services. The Exchange does not propose to amend the fee for a 1 gigabyte circuit, which will remain \$2,000 per month.

Logical Ports

The Exchange currently charges for logical ports (including Multicast PITCH Spin Server and GRP ports) \$500 per port per month. A logical port represents a port established by the Exchange within the Exchange's system for trading and billing purposes. Each logical port established is specific to a Member or non-Member and grants that Member or non-Member the ability to operate a specific application, such as FIX order entry or PITCH data receipt. Logical port fees are limited to logical ports in the Exchange's primary data center and no logical port fees are assessed for redundant secondary data center ports. The Exchange assesses the monthly per logical port fees to all Members' and non-Members' logical ports. The Exchange now proposes to increase charges for logical ports (including Multicast PITCH Spin Server and GRP ports) from \$500 per port per month to \$550 per month. Like as for the proposed fee increase for physical ports described above, the proposed increase in logical port fees is intended to cover increased infrastructure costs associated with establishing ports to connect to the Exchange's Systems and to enable the Exchange to continue to maintain and improve its market technology and services.

Bats Connect

The Exchange proposes to increase select fees related to the use of Bats Connect. Bats Connect is offered by the Exchange on a voluntary basis in a capacity similar to a vendor.⁷ In sum, Bats Connect is a communication service that provides subscribers an additional means to receive market data from and route orders to any destination

connected to the Exchange's network. Bats Connect does not provide any advantage to subscribers for connecting to the Exchange's affiliates⁸ as compared to other methods of connectivity. The servers of the subscriber need not be located in the same facilities as the Exchange in order to subscribe to Bats Connect. Subscribers may also seek to utilize Bats Connect in the event of a market disruption where other alternative connection methods become unavailable.

The Exchange charges a monthly connectivity fee to subscribers utilizing Bats Connect to route orders to other exchanges and broker-dealers that are connected to the Exchange's network via unicast access. The amount of the connectivity fee varies based solely on the bandwidth selected by the subscriber. Specifically, as set forth under the Unicast Access—Order Entry section of the fee schedule, the Exchange charges \$350 for 1 Mb, \$700 for 5 Mb, \$950 for 10 Mb, \$1,500 for 25 Mb, \$2,500 for 50 Mb, and \$3,500 for 100 Mb. The Exchange proposes to increase those fees as follows: \$500 for 1 Mb, \$1,000 for 5 Mb, and \$1,250 for 10 Mb. The proposed increases are designed to cover increased costs related to hardware, installation, and testing, as well as increased expenses involved in maintaining and managing the service. The Exchange does not propose to increase the fees for the 25 Mb, 50 Mb and 100 Mb connections as those fees will remain \$1,500, \$2,500, and \$3,500, respectively.

Bats Connect also allows subscribers to receive market data feeds from the exchanges connected to the Exchange's network. In such case, the subscriber pays the Exchange a connectivity fee, which are set forth under the Market Data Connectivity section of the fee schedule and vary based solely on the amount of bandwidth required to transmit the selected data product to the subscriber.⁹ The proposed connectivity fees currently range from no charge to \$11,500 based on the market data product the subscriber selects. The Exchange proposes to increase select connectivity fees for market data as follows:

Data feed	Current fee	Proposed fee
UQDF/UTDF/OMDF	\$650	\$1,200

⁶ The term "System" is defined as "the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when

applicable, routing away." See Exchange Rule 1.5(aa).

⁷ See Exchange Rule 13.8.

⁸ The Exchange's affiliated exchanges are Bats EDGX Exchange, Inc. ("EDGX"), Bats EDGA

Exchange, Inc. ("EDGA"), and Bats BYX Exchange, Inc. ("BYX").

⁹ Subscribers pays any fees charged by the exchange providing the market data feed directly to that exchange.

Data feed	Current fee	Proposed fee
CQS/CTS	1,000	1,400
OPRA	3,500	4,500
Nasdaq TotalView	1,300	1,500
Nasdaq BX TotalView	650	1,000
Nasdaq PSX TotalView	350	750
NYSE Integrated	11,500	14,500
NYSE ArcaBook	1,000	1,250
NYSE MKT OpenBook Ultra	150	500
NYSE Alerts	250	500
NYSE Imbalances	100	500
NYSE Arca Trades	250	500
BBDS/TTDS	100	500

The proposed increases are designed to allow the Exchange to cover the increased costs related to the amount of bandwidth required to provide connectivity to receive market data as well as the costs of maintaining that infrastructure.

The Exchange also charges a discounted fee of \$4,160 per month for subscribers who purchase connectivity to a bundle of select market data products, known as the U.S. Equities Select + SIP Bundle. The following market data products are included in the bundle: UQDF/UTDF/OMDF, CQS/CTS, Nasdaq TotalView, Nasdaq BX TotalView, Nasdaq PSX TotalView, NYSE ArcaBook, NYSE MKT OpenBook Ultra, and BBDS/TTDS.¹⁰ Absent the discount, a subscriber purchasing connectivity through Bats Connect for each of these market data products would currently pay a total monthly fee of \$5,200. Instead, a subscriber who purchases connectivity to each of the above market data products is charged a monthly fee of \$4,160, which represents a 20% discount. The Exchange proposes to add NYSE OpenBook Ultra to the bundle. Also, in light of the proposed changes outlined above, the Exchange proposes to increase the discounted rate of the bundle to \$5,910 per month, which would now represent a 40% discount from the rate of \$9,850 a subscriber purchasing connectivity through Bats Connect for each of these market data products would be charged under the proposed rule change.

Lastly, the Exchange proposes to charge a discounted fee of \$6,390 per month for subscribers who purchase connectivity to the OPRA, UQDF/UTDF/OMDF, and CQS/CTS data feeds, to be known as the OPRA + SIP Bundle. Absent the discount, a subscriber purchasing connectivity through Bats Connect for each of these market data

products would pay a total monthly fee of \$7,100. Instead, a subscriber who purchases connectivity to each of the above market data products is charged a monthly fee of \$6,390, which represents a 10% discount.

Implementation Date

The Exchange proposes to implement this amendment to its fee schedule on January 3, 2017.¹¹

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,¹² in general, and furthers the objectives of Section 6(b)(4),¹³ in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange. The Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all Members. The Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members.

The Exchange believes that the proposal represents an equitable allocation of reasonable dues, fees, and other charges as its fees for physical connectivity are reasonably constrained by competitive alternatives. If a particular exchange charges excessive

fees for connectivity, affected Members and non-Members may opt to terminate their connectivity arrangements with that exchange, and adopt a possible range of alternative strategies, including routing to the applicable exchange through another participant or market center or taking that exchange's data indirectly. Accordingly, if the Exchange charges excessive fees, it would stand to lose not only connectivity revenues but also revenues associated with the execution of orders routed to it, and, to the extent applicable, market data revenues. The Exchange believes that this competitive dynamic imposes powerful restraints on the ability of any exchange to charge unreasonable fees for connectivity.

Furthermore, the proposed rule change is also an equitable allocation of reasonable dues, fees, and other charges as the Exchange believes that the increased fees obtained will enable it to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems. The additional revenue from the increased fees will also enable the Exchange to continue to maintain and improve its market technology and services.

Physical Ports

The Exchange believes that the proposed fees for a 10 gigabyte circuit of \$6,000 per month is reasonable in that they are less than analogous fees charged by the Nasdaq Stock Market LLC ("Nasdaq") and NYSE Arca, Inc. ("Arca"), which range from \$10,000–\$15,000 per month for 10 gigabyte circuits.¹⁴ The Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all Members and non-Members. Members and non-Members will continue to choose whether they want more than one physical port and

¹⁰ The Exchange also proposes to correct a typographical error in referencing BBDS/TTDS in its description of the U.S. Equity Select + SIP bundle.

¹¹ The Exchange notes that the date of its fee schedule was previously updated to January 3, 2017 in SR-BatsBZX-2016-87 (December 6 [sic], 2017). See Securities Exchange Act Release No. 79636 (December 21, 2016).

¹² 15 U.S.C. 78f.

¹³ 15 U.S.C. 78f(b)(4).

¹⁴ See Nasdaq Rule 7034(b) and the NYSE Arca fee schedule available at https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf (dated December 2, 2016).

choose the method of connectivity based on their specific needs. All Exchange Members that voluntarily select various service options will be charged the same amount for the same services. As is true of all physical connectivity, all Members and non-Members have the option to select any connectivity option, and there is no differentiation with regard to the fees charged for the service.

Logical Ports

The Exchange believes that the increase of fees for logical ports represents an equitable allocation of reasonable dues, fees and other charges. The Exchange believes that its proposed changes to logical port fees are reasonable in light of the benefits to Exchange participants of direct market access and receipt of data. The Exchange believes its proposed fees are reasonable because Nasdaq and NYSE Arca charge comparable rates for logical ports to access such markets.¹⁵

Bats Connect

The Exchange also believes that its proposed fees for Bats Connect provide for the equitable allocation of reasonable dues, fees and other charges among members and other persons using its facilities. First, the Exchange charges a connectivity fee to subscribers utilizing Bats Connect to route orders to other exchanges and market centers that are connected to the Exchange's network, which varies based solely on the amount of bandwidth selected by the subscriber. The proposed increased connectivity fees remain reasonable and competitive as compared to similar fees charged by other exchanges. For purposes of order routing, the Exchange proposes to now charge \$500 for 1 Mb, \$1,000 for 5 Mb, and \$1,250 for 10 Mb. The New York Stock Exchange, Inc. ("NYSE") currently charges \$300 for 1 Mb, \$700 for 5 Mb, and \$900 for 10 Mb.¹⁶ In addition, the proposed rates continue to be less than what a subscriber would pay to connect directly to another exchange.¹⁷ The Exchange notes that, overall, the connectivity fee for routing of orders to

other market centers proposed by the Exchange is similar to that charged by the NYSE.

Second, with regard to utilizing Bats Connect to receive market data products from other exchanges, the Exchange only charges subscribers a connectivity fee, the amount of which is based solely on the amount of bandwidth required to transmit that specific data product to the subscribers. The Exchange believes it is necessary to increase the rates for select market data feeds as described herein to address changes in bandwidth necessary to receive such feeds. The increased fees will also enable the Exchange to continue to cover the increased infrastructure costs while also enabling it to continue to maintain and improve the service.

The amounts of the connectivity fees continue to be reasonable as compared to similar fees charged by other exchanges. For example, for market data connectivity, Nasdaq charges \$1,412 per month for CQS/CTS data feed, and the Exchange proposes to charge \$1,400 per month connectivity for CQS/CTS data feed.¹⁸

The Exchange believes it is reasonable to offer such discounted pricing to subscribers who purchase connectivity to a bundle of market data products as it would enable them to reduce their overall connectivity costs for the receipt of market data. The Exchange is not required by any rule or regulation to make Bats Connect available; nor are subscribers required by any rule or regulation to utilize Bats Connect. Accordingly, subscribers can discontinue use at any time and for any reason, including due to an assessment of the reasonableness of fees charged. Moreover, the Exchange believes the proposed fees are reasonable and equitable because they continue to be based on the Exchange's costs to cover the amount of bandwidth required to provide connectivity to the select bundle of data feeds. The proposed fees will continue to allow the Exchange to recoup this cost, while providing subscribers with an alternative means to connect to the select bundle of data feeds at a discounted rate.

Lastly, the Exchange believes the proposed fees are reasonable and equitable because they are based on the Exchange's costs to cover hardware, installation, testing and connection, as well as expenses involved in maintaining and managing the service. The proposed fees allow the Exchange to recoup these costs, while providing

subscribers with an alternative means to connect to other exchange and market centers. The Exchange believes that the proposed fees are reasonable and equitable in that they reflect the costs and the benefit of providing alternative connectivity.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. As discussed above, the Exchange believes that fees for connectivity are constrained by the robust competition for order flow among exchanges and non-exchange markets. The Exchange does not believe that the proposed changes represent a significant departure from previous pricing offered by the Exchange or pricing offered by the Exchange's competitors. Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Further, excessive fees for connectivity would serve to impair an exchange's ability to compete for order flow rather than burdening competition.

Lastly, the Exchange does not believe the proposed fees for Bats Connect will result in any burden on competition. The proposed rule change is designed to provide subscribers with an alternative means to access other market centers on the Exchange's network if they choose or in the event of a market disruption where other alternative connection methods become unavailable. Bats Connect is not the exclusive method to connect to these market centers and subscribers may utilize alternative methods to connect to the product if they believe the Exchange's proposed pricing is unreasonable or otherwise. Therefore, the Exchange does not believe the proposed rule change will have any effect on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)

¹⁵ See Nasdaq Rule 7015(b) (charging a fee of \$575 per month for FIX Trading Ports) and the NYSE Arca fee schedule available at https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf (dated December 2, 2016) (charging a fee of \$550 per month for ports for order/quote entry).

¹⁶ See Section 3.6.1 of NYSE's SFTI Americas Product and Service List available at <http://www.nyxdata.com/docs/connectivity>.

¹⁷ See e.g., Nasdaq Rule 7034(b) and the Co-Location section of the NYSE Arca fee schedule available at https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf (dated December 2, 2016).

¹⁸ See Nasdaq Rule 7034 (setting forth Nasdaq's connectivity fees for receipt of third party market data products).

of the Act¹⁹ and paragraph (f) of Rule 19b-4 thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-BatsBZX-2016-89 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.
- All submissions should refer to File Number SR-BatsBZX-2016-89. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only

information that you wish to make available publicly.

All submissions should refer to File Number SR-BatsBZX-2016-89 and should be submitted on or before February 3, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁰

Eduardo A. Aleman,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79764; File No. SR-DTC-2016-008]

Self-Regulatory Organizations; The Depository Trust Company; Order Granting Approval of Proposed Rule Change Relating To Processing of Transactions in Money Market Instruments

January 9, 2017.

The Depository Trust Company ("DTC") filed on September 23, 2016 with the Securities and Exchange Commission ("Commission") proposed rule change SR-DTC-2016-008 ("Proposed Rule Change") pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder.² The Proposed Rule Change was published for comment in the **Federal Register** on October 11, 2016.³ On November 18, 2016, the Commission extended to January 9, 2017 the date by which it shall either approve, disapprove, or institute proceedings to determine whether to approve or disapprove the Proposed Rule Change.⁴ The Commission did not receive any comments on the Proposed Rule Change. For the reasons discussed below, the Commission is granting approval of the Proposed Rule Change.

²⁰ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ Securities Exchange Act Release No. 34-79046 (October 5, 2016), 81 FR 70200 (October 11, 2016) (SR-DTC-2016-008) ("Notice"). DTC also filed the Proposed Rule Change as an advance notice with the Commission, pursuant to Section 806(e)(1) of the Payment, Clearing, and Settlement Supervision Act of 2010 and Rule 19b-4(n)(1) under the Act. 12 U.S.C. 5465(e) and 17 CFR 240.19b-4(n)(1), respectively. The advance notice was published in the **Federal Register** on November 9, 2016. Securities Exchange Act Release No. 79224 (November 3, 2016), 81 FR 78884 (November 9, 2016) (SR-DTC-2016-802). The Commission did not receive any comments on the advance notice.

⁴ Securities Exchange Act Release No. 34-79351 (November 18, 2016), 81 FR 85295 (November 25, 2016) (SR-DTC-2016-008)

I. Description of the Proposed Rule Change

The Proposed Rule Change is a proposal by DTC to modify (i) the DTC Rules, By-laws and Organization Certificate ("Rules"),⁵ (ii) the DTC Settlement Service Guide ("Settlement Guide"),⁶ and (iii) the DTC Distributions Service Guide ("Distributions Guide"),⁷ in order to change the way in which DTC processes transactions in money market instruments ("MMI"). The proposal would affect DTC's processing of issuances of MMI securities as well as maturity presentments, income presentments, principal presentments, and reorganization presentments (collectively, "presentments" and with issuances of MMI securities, "MMI Obligations").

Specifically, DTC proposes to: (i) With respect to delivery of MMI securities, require purchasers of the securities (or their custodian, if applicable) to acknowledge that they agree to receive the securities via DTC's Receiver Authorized Delivery ("RAD") system before DTC processes the transaction; (ii) with respect to cash, require an issuing and paying agent ("IPA") of an MMI issuer to acknowledge its funding obligations for MMI presentments before DTC processes the transaction, except in limited circumstances where there are no funding obligations;⁸ (iii) implement an enhanced process to check certain MMI transactions against DTC's risk management controls (referred to as "MMI Optimization"); (iv) eliminate the largest provisional net credit risk management control; and (v) eliminate DTC's receive versus payment net additions control, as described below. In addition, the proposal would amend DTC's Distributions Guide to conform to the proposed changes.

A. Background

Today, according to DTC, when an issuer issues MMI securities at DTC, the IPA for that issuer sends issuance

⁵ Available at <http://www.dtcc.com/legal/rules-and-procedures.aspx>.

⁶ Available at <http://www.dtcc.com/-/media/Files/Downloads/legal/service-guides/Settlement.pdf>.

⁷ Available at <http://www.dtcc.com/-/media/Files/Downloads/legal/service-guides/Distributions%20Service%20Guide%20FINAL%20November%202014.pdf>.

⁸ An affirmative MMI funding acknowledgement by the IPA would not be required where the aggregate amount of an issuer's delivery of MMI securities that have been approved in RAD exceeds the aggregate amount of presentments because payment for those securities would fully fund the presentments. In such a case, the IPA would be deemed to have provided a funding acknowledgement and DTC would process the transactions, subject to risk management controls.

¹⁹ 15 U.S.C. 78s(b)(3)(A).

instructions to DTC electronically, which results in crediting the applicable MMI securities to the DTC account of the IPA. The MMI securities are then delivered by DTC to the accounts of the applicable DTC participants (“Participants”) that are purchasing the issuance, typically as custodians for individual investors, in accordance with their purchase amounts. The IPA’s delivery instructions may be free of payment or, most often, for payment (*i.e.*, delivery versus payment or “DVP”). Unlike deliveries free of payment, DVP transactions are subject to DTC’s risk management controls for both the IPA and the receiving Participants, which means they are monitored for Net Debit Cap and Collateral Monitor sufficiency.⁹

When MMI securities of a particular acronym¹⁰ mature, the current presentment process involves DTC automatically sweeping the matured positions from the applicable Participant accounts and debiting the settlement account of the applicable IPA for the amount of the matured position, with corresponding credits made to the settlement accounts of the deliverers. Because presentments are currently processed automatically at DTC, IPAs have the option to refuse to pay (“RTP”) for maturing MMI Obligations to protect against the possibility that an IPA may not be able to fund settlement because it has not received funds from the relevant issuer. An IPA that refuses payment for a presentment (*i.e.*, refuses to make payment for the delivery of matured MMI securities for which it is the designated IPA and/or pay interest or dividend income on MMI securities for which it is the designated IPA) must notify DTC of its RTP. An IPA may notify DTC of an RTP until 3:00 p.m. ET on the date of the affected presentment.

Under the current Rules, the effect of an RTP is for DTC to reverse all processed MMI security deliveries of

that MMI acronym, including issuances, related funds credits and debits, and presentments, which means that the securities would fail to settle. This reversal of processed (but not yet settled) transactions could override DTC’s risk management controls (*i.e.*, Collateral Monitor and Net Debit Cap) and could result in a Participant’s account having, unexpectedly, a net debit balance that exceeds its Net Debit Cap and/or having insufficient collateral to secure its settlement obligations throughout the day. Thus, RTPs can create uncertainty and pose systemic risk with respect to a Participant’s and, ultimately, DTC’s ability to complete end-of-day net funds settlement.

Currently, to mitigate the risks associated with an RTP, the Rules and the Settlement Guide provide for the Largest Provisional Net Credit control (“LPNC Control”). Under the LPNC Control, DTC withholds from each Participant’s Net Debit Cap the two largest intraday net MMI credits owed to that Participant. The MMI credits withheld are not included in the calculation of the Participant’s Collateral Monitor or its net debit balance. This provides protection in the event that processed (but not yet settled) MMI transactions are reversed by DTC as a result of an RTP.¹¹

According to DTC, its Rules and procedures relating to settlement processing for the MMI program¹² were designed to limit credit, liquidity, and operational risk for DTC and Participants. In connection with ongoing efforts by DTC to evaluate the risk associated with the processing of MMI Obligations, DTC has determined that the risks presented by intra-day reversals of processed MMI Obligations should be eliminated to prevent the possibility that a reversal could override DTC’s risk controls and heighten liquidity and settlement risk. DTC also states that eliminating intra-day reversals of processed MMI Obligations would enhance intra-day finality and allow for the elimination of the LPNC Control, which creates intra-day blockage and affects liquidity through the withholding of settlement credits.

B. Proposed Changes

The proposal would eliminate provisions for intra-day reversals of

processed MMI Obligations based on an IPA’s RTP or issuer insolvency of which DTC becomes aware, as described below.

Pursuant to the proposal, DTC would no longer automatically process MMI Obligations. DTC’s processing of MMI Obligations involves the delivery of cash and/or securities. With respect to securities, DTC would require purchasers of MMI issuances (or their custodian, if applicable) to acknowledge in RAD that they agree to receive the MMI securities before DTC processes the transaction. With respect to cash, an IPA would make an MMI funding acknowledgment using a new DTC platform designed to accept such acknowledgments. When an MMI funding acknowledgement is received, DTC would attempt to process transactions in the acronym(s) for which the MMI funding acknowledgment pertains.

If the IPA has provided an MMI funding acknowledgment for the full amount of presentments, then all transactions in that acronym would be sent to the normal DTC processing system and tested against DTC’s risk management controls. If the IPA provides an MMI funding acknowledgment for only partial funding of the presentments, then DTC would undertake the proposed “MMI Optimization” process to determine whether risk management controls would be satisfied by all deliverers and purchasers of the acronym and determine whether all parties would maintain adequate positions to complete the applicable transactions. However, as long as the issuances that could satisfy deliverer and purchaser risk controls for that MMI acronym are equal to or greater than the maturing presentments of that acronym, the applicable transactions (*i.e.*, those that pass risk controls) could be processed without an IPA’s funding acknowledgement.

If DTC does not receive the necessary acknowledgments from both the IPA and purchasers for an acronym for which maturing MMI Obligations are due on that day and/or DTC is aware, through ordinary business channels, that the issuer of an acronym is insolvent (“Acronym Payment Failure”), then DTC would not process transactions in the acronym.¹³

In the event of an Acronym Payment Failure, DTC would: (i) Prevent further issuance and maturity activity for the acronym in DTC’s system; (ii) prevent

⁹ DVP transfers at DTC are structured so that the completion of delivery of securities to a Participant in end-of-day settlement is contingent on the receiving Participant satisfying its end-of-day net settlement obligation, if any. The risk of Participant failure to settle is managed through risk management controls that would enable DTC to complete settlement despite the failure to settle of the Participant, or affiliated family of Participants, with the largest net settlement obligation. The two principal controls are the Net Debit Cap and Collateral Monitor. The largest net settlement obligation of a Participant or affiliated family of Participants cannot exceed DTC liquidity resources, based on the Net Debit Cap, and must be fully collateralized, based on the Collateral Monitor.

¹⁰ MMI of an issuer are designated by DTC using unique four-character identifiers referred to as acronyms. An MMI issuer can have multiple acronyms representing its securities. MMI transactions and other functions relating to MMI are done on an “acronym-by-acronym” basis.

¹¹ See Securities Exchange Act Release No. 71888 (April 7, 2014), 79 FR 20285 (April 11, 2014) (SR–DTC–2014–02) (clarifying the LPNC procedures in the Settlement Guide) and Securities Exchange Act Release No. 68983 (February 25, 2013), 78 FR 13924 (March 1, 2013) (SR–DTC–2012–10) (updating the Rules related to LPNC).

¹² The procedures applicable to MMI settlement processing are set forth in the Settlement Guide. *Supra* note 6.

¹³ DTC would automatically consider an Acronym Payment Failure that occurred due to an IPA’s failure to provide timely MMI funding acknowledgement (*i.e.*, provide the acknowledgment by 3:00 p.m. ET) as an RTP.

deliveries of MMI securities of the acronym and halt all activity in that acronym; (iii) set the collateral value of the MMI securities in the acronym to zero for purposes of calculating the Collateral Monitor of any affected Participant; and (iv) notify Participants of the Acronym Payment Failure via DTC's current notification process. Notwithstanding the occurrence of an Acronym Payment Failure, the IPA would remain liable for funding pursuant to any MMI funding acknowledgment previously provided for that business day.

A "Temporary Acronym Payment Failure" would occur when an IPA notifies DTC that it temporarily refuses to pay income presentments, and only income presentments, for an acronym, which typically would be due to an issuer's inability to fund income presentments on that day. A Temporary Acronym Payment Failure would only be initiated if there are no maturity presentments, principal presentments, and/or reorganization presentments on that business day. DTC would require the issuer and/or IPA to resolve such a situation by the next business day.

In the event of a Temporary Acronym Payment Failure, DTC would: (i) Temporarily devalue to zero all of the issuer's MMI securities for purposes of calculating the Collateral Monitor, unless and until the IPA acknowledges funding with respect to the income payments on the following business day; (ii) notify Participants of the delayed payment; and (iii) block from DTC's systems all further issuances and maturities by that issuer for the remainder of the business day on which notification of the Temporary Payment Failure was received by DTC. An IPA would not be able to avail itself of a Temporary Acronym Payment Failure for the same acronym on consecutive business days.

The Commission understands that the proposal would not: (i) Decrease the total number and value of transactions that would pass DTC's risk controls throughout the processing day; or (ii) increase the volume of transactions that would fail to settle. The Commission also understands that the proposal would reduce blockage caused by DTC. Non-MMI transactions and fully funded MMI transactions would likely have a reduction in blockage because of the elimination of the LPNC Control. The elimination of the LPNC Control would no longer withhold billions of dollars of settlement credits as it does today, thus permitting MMI transactions subject to the LPNC Control to process earlier in the day. Moreover, it is expected that the value and volume of MMI

transactions recycling due to failure to meet DTC's risk management controls during the late morning and afternoon periods would be reduced, because of such transactions being held outside of DTC's processing system while they await the necessary acknowledgments.

Similar to the LPNC Control, the RVPNA Control is used to prevent a Participant from delivering free of value or undervalued any MMI securities that were received for payment on the same day.¹⁴ For example, under DTC's current rules, if Participant A delivers MMI securities to Participant B for payment, and then Participant B delivers the same MMI securities to Participant C free of payment (subject to risk management controls), the delivery to Participant C is final when the securities are credited to Participant C. DTC would, therefore, be unable to reverse the delivery to Participant C and, thus, DTC could not reverse the delivery from Participant B to Participant A. The RVPNA Control protects DTC against being unable to reverse such transactions of MMI Securities in the event of an RTP by the IPA. Because DTC would no longer permit the reversal of processed MMI transactions, DTC would no longer need the RVPNA Control.

II. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act¹⁵ directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that such proposed rule change is consistent with the requirements of the Act and rules and regulations thereunder applicable to such organization. The Commission believes the Proposed Rule Change is consistent with Section 17A(b)(3)(F) of the Act and Rule 17Ad-22(d)(12) under the Act,¹⁶ as described in detail below.

A. Consistency With Section 17A(b)(3)(F) of the Act

Section 17A(b)(3)(F) of the Act requires, in part, that the rules of a clearing agency be designed to promote the prompt and accurate clearance and settlement of securities transactions and to protect investors and the public interest.¹⁷

The Commission believes that the Proposed Rule Change is consistent with promoting prompt and accurate

clearance and settlement. First, as described above, DTC automatically processes MMI transactions today but permits RTPs in order to enable IPAs to protect against the possibility that the IPA does not receive the necessary funds from the relevant issuer. However, if DTC reverses processed (but not yet settled) MMI transactions because of an RTP, the transactions would fail to settle and the reversal could override DTC's risk management controls.

The Proposed Rule Change would eliminate such reversals, failures, and possible overrides because the proposal would require, before DTC would process an MMI transaction, that (i) purchasers of MMI issuances (or their custodian, if applicable) authorize delivery of the MMI securities, and (ii) IPAs provide an MMI funding acknowledgement that commits the IPA to the acknowledge funds. If DTC does not receive a RAD authorization or MMI funding acknowledgement, as applicable, it would not process the MMI transaction. However, if a RAD authorization or an MMI funding acknowledgement is received, DTC would no longer permit an RTP for what was authorized or acknowledge, thus eliminating the risk that the applicable MMI transaction would fail to settle or override DTC's risk management controls due to an RTP. Although these proposed changes would establish new requirements before DTC would process such MMI transactions, the Commission believes that the benefits of eliminating the risk of a potential override of DTC's risk management controls from an RTP supports such requirements.

Second, the Proposed Rule Change would help ensure prompt and accurate clearance and settlement securities by employing the proposed MMI Optimization. MMI Optimization would, for MMI transactions that await funding, continually test the net effect of transactions, across multiple MMI issuers, on receiving and delivering Participants' risk controls, and then process the transactions once the controls are met. As such, MMI Optimization would help maximize processing and facilitate more timely settlement of MMI transactions, thus reducing risks that transactions may not settle.

Third, the proposed removal of the LPNC and RVPNA Controls also would further promote prompt clearance and settlement. As described above, the LPNC Control currently withholds from each Participant the two largest intraday net MMI credits out of all of the MMI credits owed to that Participant in order to protect DTC from a Participant

¹⁴ For purposes of RVPNA, MMI securities are considered undervalued if they are delivered for less than 10 percent below market value.

¹⁵ 15 U.S.C. 78s(b)(2)(C).

¹⁶ 15 U.S.C. 78q-1(b)(3)(F); 17 CFR 240.17Ad-22(d)(12).

¹⁷ 15 U.S.C. 78q-1(b)(3)(F).

breaching its Net Debit Cap or having insufficient collateral in the event of a reversal caused by an RTP. However, withholding the credits makes them unavailable to the Participant, which can cause blockage (*i.e.*, the failure of a transaction to process because of insufficient liquidity) for the Participant. Meanwhile, the RVPNA Control limits a Participant's ability to deliver MMI that the Participant is due to receive that day. By preventing Participants from delivering certain MMI securities, the RVPNA Control also can create blockage.

Because DTC would no longer process MMI transactions without a purchaser's RAD authorization and an IPA's MMI funding acknowledgement, as applicable, RTPs and resulting intraday reversals no longer present the risk that the LPNC and RVPNA Controls are meant to address. As such, DTC would eliminate these controls. This change would make available to Participants the intraday credits that were previously withheld by those controls, which would decrease intraday liquidity blockage for the Participant and enable DTC to process MMI transactions earlier. Thus, Participants would have less exposure to intraday reversals that increase liquidity and settlement risk and a more complete view of their actual intraday net debit and credit balances.

The Commission also believes that the Proposed Rule Change is consistent with protecting investors and the public interest. As described above, DTC would no longer automatically process MMI presentments. Rather, DTC would require purchasers to authorize delivery via RAD and IPAs to provide a funding acknowledgment before processing MMI presentments, as applicable. Because these changes would eliminate the risk of reversals due to an RTP, the changes would mitigate the risk of a potential override of DTC's risk management controls. Thus, the Proposed Rule Change would help protect investors and the public interest by reducing DTC's exposure to potential failures, promoting DTC's safety and soundness, and providing greater assurance that transactions will settle despite a Participant default.

Therefore, for the above reasons, the Commission believes that the Proposed Rule Change will help promote the prompt and accurate clearance and settlement of securities transactions and help protect investors and the public interest, consistent with Section 17A(b)(3)(F) of the Act, cited above.

B. Consistency With Rule 17Ad-22(d)(12)

Rule 17Ad-22(d)(12) under the Act requires DTC to establish, implement, maintain and enforce written policies and procedures reasonably designed to ensure that final settlement occurs no later than the end of the settlement day; and require that intraday or real-time finality be provided where necessary to reduce risks.¹⁸ Through this proposal, DTC would no longer process MMI transactions automatically but, rather, would first require an IPA's funding acknowledgment and a purchaser's RAD authorization, as applicable. Where such acknowledgements and authorizations are provided, DTC would no longer permit an RTP, thus eliminating the risk of an intraday reversal of a processed MMI transaction. Additionally, the proposal would eliminate the LPNC and RVPNA Controls, which would help eliminate blockage caused by the LPNC Control's withholding of Participants' two largest net credits for MMI transactions and the RVPNA Control's restriction on delivering certain MMI securities. Each of these proposed changes, both individually and collectively, would help ensure that final settlement occurs at the end of the day. Therefore, the Commission believes that the changes proposed in the Advance Notice are consistent with Rule 17Ad-22(d)(12) under the Act.¹⁹

III. Conclusion

On the basis of the foregoing, the Commission finds that the Proposed Rule Change is consistent with the requirements of the Act and in particular with the requirements of Section 17A of the Act²⁰ and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that proposed rule change SR-DTC-2016-008 be, and hereby is, *Approved* as of the date of this order or the date of a notice by the Commission authorizing DTC to implement DTC's advance notice proposal (SR-DTC-2016-802) that is consistent with this Proposed Rule Change, whichever is later.²¹

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79762; File No. SR-BatsBZX-2016-90]

Self-Regulatory Organizations; Bats BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Modify Fees for Connectivity and Its Communication and Routing Service Known as Bats Connect

January 9, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 27, 2016, Bats BZX Exchange, Inc. ("Exchange" or "BZX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act³ and Rule 19b-4(f)(2) thereunder,⁴ which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members⁵ and non-members of the Exchange pursuant to BZX Rules 15.1(a) and (c) to modify its fees for its equity options platform ("BZX Options") for physical ports and for the use of a communication and routing service known as Bats Connect.

²² 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ 15 U.S.C. 78s(b)(3)(A)(ii).

⁴ 17 CFR 240.19b-4(f)(2).

⁵ The term "Member" is defined as "any registered broker or dealer that has been admitted to membership in the Exchange." See Exchange Rule 1.5(n).

The text of the proposed rule change is available at the Exchange's Web site at www.bats.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the fee schedule for BZX Options to modify its fees for physical ports and for the use of a communication and routing service known as Bats Connect. Each of these proposed changes are described below.

Physical Ports

A physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently maintains a presence in two third-party data centers: (i) The primary data center where the Exchange's business is primarily conducted on a daily basis, and (ii) a secondary data center, which is

predominantly maintained for business continuity purposes. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: 2,000 per physical port that connects to the System⁶ via 1 gigabyte circuit; and 4,000 per physical port that connects to the System via 10 gigabyte circuit. The Exchange proposes to increase the fee per physical port that connects to the System via a 10 gigabyte circuit from 4,000 per month to 6,000 per month in order cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems and enable it to continue to maintain and improve its market technology and services. The Exchange does not propose to amend the fee for a 1 gigabyte circuit, which will remain \$2,000 per month.

Bats Connect

The Exchange proposes to increase select fees related to the use of Bats Connect. Bats Connect is offered by the Exchange on a voluntary basis in a capacity similar to a vendor.⁷ In sum, Bats Connect is a communication service that provides subscribers an additional means to receive market data from and route orders to any destination connected to the Exchange's network. Bats Connect does not provide any advantage to subscribers for connecting to the Exchange's affiliates⁸ as compared to other methods of connectivity. The servers of the subscriber need not be located in the same facilities as the Exchange in order to subscribe to Bats Connect. Subscribers may also seek to utilize Bats Connect in the event of a market disruption where other alternative

connection methods become unavailable.

The Exchange charges a monthly connectivity fee to subscribers utilizing Bats Connect to route orders to other exchanges and broker-dealers that are connected to the Exchange's network via unicast access. The amount of the connectivity fee varies based solely on the bandwidth selected by the subscriber. Specifically, as set forth under the Unicast Access—Order Entry section of the fee schedule, the Exchange charges \$350 for 1 Mb, \$700 for 5 Mb, \$950 for 10 Mb, \$1,500 for 25 Mb, \$2,500 for 50 Mb, and \$3,500 for 100 Mb. The Exchange proposes to increase those fees as follows: \$500 for 1 Mb, \$1,000 for 5 Mb, and \$1,250 for 10 Mb. The proposed increases are designed to cover increased costs related to hardware, installation, and testing, as well as increased expenses involved in maintaining and managing the service. The Exchange does not propose to increase the fees for the 25 Mb, 50 Mb and 100 Mb connections as those fees will remain \$1,500, \$2,500, and \$3,500, respectively.

Bats Connect also allows subscribers to receive market data feeds from the exchanges connected to the Exchange's network. In such case, the subscriber pays the Exchange a connectivity fee, which are set forth under the Market Data Connectivity section of the fee schedule and vary based solely on the amount of bandwidth required to transmit the selected data product to the subscriber.⁹ The proposed connectivity fees currently range from no charge to \$11,500 based on the market data product the subscriber selects. The Exchange proposes to increase select connectivity fees for market data as follows:

Data feed	Current fee	Proposed fee
UQDF/UTDF/OMDF	\$650	\$1,200
CQS/CTS	1,000	1,400
OPRA	3,500	4,500
Nasdaq TotalView	1,300	1,500
Nasdaq BX TotalView	650	1,000
Nasdaq PSX TotalView	350	750
NYSE Integrated	11,500	14,500
NYSE ArcaBook	1,000	1,250
NYSE MKT OpenBook Ultra	150	500
NYSE Alerts	250	500
NYSE Imbalances	100	500
NYSE Arca Trades	250	500
BBDS/TDDS	100	500

⁶ The term "System" is defined as "the automated trading system used by BZX Options for the trading of options contracts." See Exchange Rule 16.1(a)(59).

⁷ See Exchange Rule 13.8.

⁸ The Exchange's affiliated exchanges are Bats EDGX Exchange, Inc. ("EDGX"), Bats EDGA Exchange, Inc. ("EDGA"), and Bats BYX Exchange, Inc. ("BYX").

⁹ Subscribers pays any fees charged by the exchange providing the market data feed directly to that exchange.

The proposed increases are designed to allow the Exchange to cover the increased costs related to the amount of bandwidth required to provide connectivity to receive market data as well as the costs of maintaining that infrastructure.

The Exchange also charges a discounted fee of \$4,160 per month for subscribers who purchase connectivity to a bundle of select market data products, known as the U.S. Equities Select + SIP Bundle. The following market data products are included in the bundle: UQDF/UTDF/OMDF, CQS/CTS, Nasdaq TotalView, Nasdaq BX TotalView, Nasdaq PSX TotalView, NYSE ArcaBook, NYSE MKT OpenBook Ultra, and BBDS/TTDS.¹⁰ Absent the discount, a subscriber purchasing connectivity through Bats Connect for each of these market data products would currently pay a total monthly fee of \$5,200. Instead, a subscriber who purchases connectivity to each of the above market data products is charged a monthly fee of \$4,160, which represents a 20% discount. The Exchange proposes to add NYSE OpenBook Ultra to the bundle. Also, in light of the proposed changes outlined above, the Exchange proposes to increase the discounted rate of the bundle to \$5,910 per month, which would now represent a 40% discount from the rate of \$9,850 a subscriber purchasing connectivity through Bats Connect for each of these market data products would be charged under the proposed rule change.

Lastly, the Exchange proposes to charge a discounted fee of \$6,390 per month for subscribers who purchase connectivity to the OPRA, UQDF/UTDF/OMDF, and CQS/CTS data feeds. Absent the discount, a subscriber purchasing connectivity through Bats Connect for each of these market data products would pay a total monthly fee of \$7,100. Instead, a subscriber who purchases connectivity to each of the above market data products is charged a monthly fee of \$6,390, which represents a 10% discount.

Implementation Date

The Exchange proposes to implement this amendment to its fee schedule on January 3, 2017.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,¹¹

¹⁰ The Exchange also proposes to correct a typographical error in referencing BBDS/TDDS in its description of the U.S. Equity Select + SIP bundle.

¹¹ 15 U.S.C. 78f.

in general, and furthers the objectives of Section 6(b)(4),¹² in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange. The Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all Members. The Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members.

The Exchange believes that the proposal represents an equitable allocation of reasonable dues, fees, and other charges as its fees for physical connectivity are reasonably constrained by competitive alternatives. If a particular exchange charges excessive fees for connectivity, affected Members and non-Members may opt to terminate their connectivity arrangements with that exchange, and adopt a possible range of alternative strategies, including routing to the applicable exchange through another participant or market center or taking that exchange's data indirectly. Accordingly, if the Exchange charges excessive fees, it would stand to lose not only connectivity revenues but also revenues associated with the execution of orders routed to it, and, to the extent applicable, market data revenues. The Exchange believes that this competitive dynamic imposes powerful restraints on the ability of any exchange to charge unreasonable fees for connectivity.

Furthermore, the proposed rule change is also an equitable allocation of reasonable dues, fees, and other charges as the Exchange believes that the increased fees obtained will enable it to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems. The additional revenue from the increased fees will also enable the Exchange to continue to maintain and improve its market technology and services.

Physical Ports

The Exchange believes that the proposed fees for a 10 gigabyte circuit

¹² 15 U.S.C. 78f(b)(4).

of \$6,000 per month is reasonable in that they are less than analogous fees charged by the Nasdaq Stock Market LLC ("Nasdaq") and NYSE Arca, Inc. ("Arca"), which range from \$10,000–\$15,000 per month for 10 gigabyte circuits.¹³ The Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all Members and non-Members. Members and non-Members will continue to choose whether they want more than one physical port and choose the method of connectivity based on their specific needs. All Exchange Members that voluntarily select various service options will be charged the same amount for the same services. As is true of all physical connectivity, all Members and non-Members have the option to select any connectivity option, and there is no differentiation with regard to the fees charged for the service.
