**SUPPLEMENTARY INFORMATION:** The Centers for Disease Control and Prevention (CDC) within the U.S. Department of Health and Human Services (HHS), has prepared a Draft Environmental Assessment (Draft EA) to assess the potential impacts associated with the implementation of the CDC Chamblee Campus 2025 Master Plan (Master Plan) for HHS/CDC's Chamblee Campus located at 4770 Buford Highway, Chamblee, Georgia. An update to the previous Master Plan was prepared to guide the future development of the Chamblee Campus for the planning horizon of 2017 to 2025, corresponding to the growing research needs in support of HHS/CDC's mission, and the specific requirements of its component organizations.

HHS/CDC analyzed two alternatives in the Draft EA: The Proposed Action and the No Build Alternative. The Proposed Action assessed in the Draft EA is the implementation of the CDC Chamblee Campus 2025 Master Plan (Master Plan). The Master Plan provides a framework for future growth on the Chamblee Campus in order to ensure that the campus can support HHS/CDC's mission and to guide strategic decisions about the allocation of Federal resources. The Master Plan identifies a number of potential improvements to be completed through the 2025 timeframe, and establishes design and planning guidelines. Improvements proposed under the Master Plan include new laboratory construction, new office building construction, parking expansion, off-campus office consolidation and additional infrastructure upgrades.

The No Build Alternative represents continued operation of the existing facilities at the Chamblee Campus without any new construction or major building additions over the planning period from 2017 to 2025. Under the No Build Alternative, two existing buildings and three trailers on the campus would be demolished. The employee population at the Chamblee Campus is projected to increase by approximately 367 new occupants under the No Build Alternative due to potential background growth of existing Campus programs.

The Draft EA evaluates the potential environmental impacts that may result from the Proposed Action (referred to as the Build Alternative) and the No Build Alternative on the natural and built environment. Potential impacts of each alternative are evaluated on the following resource categories: Socioeconomics; land use; zoning; public policy; community facilities; transportation; air quality; noise; cultural resources; urban design and visual resources; natural resources; utilities; waste; and greenhouse gases and sustainability. The Draft EA identifies measures to mitigate potential adverse impacts.

*Availability of the Draft EA:* Copies of the Draft EA have been distributed to Federal, State, and local agencies and organizations. The Draft EA is available online in the *Federal eRulemaking Portal* at [www.regulations.gov](http://www.regulations.gov), identified by Docket No. CDC-2017-0019.
