NATIONAL CAPITAL PLANNING COMMISSION

Public Comment on Draft, Updated Submission Guidelines

AGENCY: National Capital Planning Commission.

ACTION: Notice of 45 day public comment period and public meetings.

SUMMARY: The National Capital Planning Commission (NCPC or Commission) has released a draft of updated Submission Guidelines (Submission Guidelines). Federal and non-federal agency applicants whose development proposals are subject to statutory mandated Commission plan and project review must submit their proposals to the Commission following a process laid out in the Submission Guidelines. The Submission Guidelines describe the content of submissions, the submission stages, and the coordination and review process governing submissions. While the Submission Guidelines are critical to the Commission's ability to carry out its planning and review authorities, they have not been updated since October 3, 1991. As such, NCPC staff prepared recommendations to update the Submission Guidelines to ensure they are clear, consistent with agency policy and easily accessible to applicants. The proposed Guidelines accomplish three primary objectives: (1) Create clear, accessible, and efficient guidelines that are responsive to applicant needs; (2) Align NCPC's review stages and National Environmental Policy Act requirements with those of applicant agencies to save time and resources in the planning process; and (3) Allow staff to exempt from Commission review certain minor projects based on specific criteria where there is no federal interest. The draft Submission Guidelines offered for public comment are available online at www.ncpc.gov.

Dates and Time: The public comment period closes on June 26, 2017. Public meetings to discuss the draft submission Guidelines will be held on Tuesday, May 23, 2017 from 6:00 p.m.-7:30 p.m. and Thursday, May 25, 2017 from 9:30 a.m.-11:00 a.m. Both meetings will be held at the National Capital Planning Commission, 401 9th Street NW., Suite 500, Washington, DC 20004.

South Carolina Electric & Gas Company; South Carolina Public Service Authority, Virgil C. Summer Nuclear Station, Units 2 and 3, Nuclear Instrumentation System Excure Detector Surface, Material Inspection Clarification

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and is issuing License Amendment No. 72 to Combined Licenses (COL), NPF-93 and NPF-94. The COLs were issued to South Carolina Electric & Gas Company, (the licensee); for construction and operation of the Virgil C. Summer Nuclear Station (VCSNS) Units 2 and 3, located in Fairfield County, South Carolina.

The granting of the exemption allows the changes to Tier 1 information asked for in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

DATES: The exemption and amendment were issued on April 17, 2017.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is granting an exemption from Paragraph B of Section III, "Scope and Contents," of appendix D, "Design Certification Rule for the AP1000," to part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), and issuing License Amendment No. 72 to COLs, NPF-93 and NPF-94, to the licensee. The exemption is required by Paragraph A.4 of Section VIII, "Processes for Changes and Departures," appendix D, to 10 CFR part 52 to allow the licensee to depart from Tier 1 information. With the requested amendment, the licensee sought proposed changes to the VCSNS Units 2 and 3 Updated Final Safety Analysis Report (UFSAR) in the form of departures from the incorporated plant-specific DCD Tier 2 information. The proposed amendment also involves related changes to plant-specific Tier 1 information, with corresponding changes to the associated COL Appendix C information to clarify the Inspections, Tests, Analyses and Acceptance Criteria (ITAAC) related to the inspection of excure (source range, intermediate range, and power range) detectors.

Part of the justification for granting the exemption was provided by the review of the amendment. Because the

exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in §§ 50.12, 52.7, and Section VIII.A.4 of appendix D to 10 CFR part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML17045A717.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to the licensee for VCSNS Units 2 and 3 (COLs NPF-93 and NPF-94). The exemption documents for VCSNS Units 2 and 3 can be found in ADAMS under Accession Nos. ML17045A679 and ML17045A682, respectively. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document. The amendment documents for COLs NPF-93 and NPF-94 are available in ADAMS under Accession Nos. ML17045A665 and ML17045A677, respectively. A summary of the amendment documents is provided in Section III of this document.

II. Exemption

Reproduced below is the exemption document issued to VCSNS Units 2 and Unit 3. It makes reference to the combined safety evaluation that provides the reasoning for the findings made by the NRC (and listed under Item 1) in order to grant the exemption:

1. In a letter dated November 16, 2016, the licensee requested from the Commission an exemption to allow departures from Tier 1 information in the certified DCD incorporated by reference in 10 CFR part 52, appendix D, as part of license amendment request 16-09, "Nuclear Instrumentation System Excure Detector Surface Material Inspection Clarification."

For the reasons set forth in Section 3.1 of the NRC staff's Safety Evaluation, which can be found in ADAMS under Accession No. ML17045A717, the Commission finds that:

A. The exemption is authorized by law;

B. the exemption presents no undue risk to public health and safety;

C. the exemption is consistent with the common defense and security;

D. special circumstances are present in that the application of the rule in this circumstance is not necessary to serve the underlying purpose of the rule;
