(c) Under 34 CFR 75.250(b), the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

4. *Performance Measures:* The Department has established the following Government Performance and Results Act of 1993 performance objective for the Academies Program:

Participants will demonstrate through pre- and post-assessments an increased understanding of American history and civics that can be directly linked to their participation in the Presidential or Congressional academy.

We will track performance on this objective through the following measures:

Presidential Academies: The average percentage gain on an assessment after participation in the Presidential academy.

Congressional Academies: The average percentage gain on an assessment after participation in the Congressional Academy.

We advise an applicant for a grant under this program to give careful consideration to these measures in conceptualizing the approach and evaluation of its proposed project. Each grantee will be required to provide, in its annual and final performance reports, data about its performance with respect to these measures.

5. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: Whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).
