

as a number of other policy changes we may consider proposing to complement implementation of RCS-I.

We have received an inquiry from professional associations and national industry organizations regarding the 60-day comment period for the ANPRM. These organizations stated that by providing all stakeholders additional time to review and comment upon the ANPRM, they will be able to conduct a more comprehensive review of the refinements we are considering to the SNF PPS payment methodology and provide more meaningful comments. In order to maximize the opportunity for the public to provide meaningful input to CMS, we believe that it is important to allow additional time for the public to prepare comments on the ANPRM. In addition, we believe that granting an extension to the public comment period in this instance would further our overall objective to obtain public input on the potential refinements to the SNF PPS we are considering. Therefore, we are extending the comment period for the ANPRM for an additional 60 days. This document announces the extension of the public comment period for the ANPRM until August 25, 2017.

Dated: June 7, 2017.

This proposed action would establish the management framework for this fishery including: Permitting, recordkeeping, and reporting requirements; trip limits for both the commercial and recreational sectors of the fishery; and the process for setting specifications and annual catch limits. In addition, this action would set harvest quotas and commercial and recreational management measures for the 2017 fishing year.
