SUPPLEMENTARY INFORMATION: Notice is hereby given that FHWA has taken final agency actions subject to 23 U.S.C. 139(l)(1) by issuing licenses, permits, and approvals for the proposed highway project, Seward Highway Milepost 75 to 90 Road and Bridge Rehabilitation, in the Kenai Peninsula Borough and the Municipality of Anchorage, Alaska. The proposed project would improve the Seward Highway between Milepost 75 and Milepost 90 as follows:

1. Resurface the entire 15-mile highway corridor with asphalt and reconstruct its subbase where necessary;
2. Construct auxiliary passing lanes in three locations (in total, approximately 5 miles of new northbound passing lanes and 5 miles of new southbound passing lanes will be constructed);
3. Realign and reprofile the MP 88 horizontal and vertical curves;
4. Realign the Portage curve, which would make at-grade improvements at the Portage Glacier Road intersection and improve recreation access in the vicinity;
5. Construct two parking areas near MP 81.5 and MP 83 to access the area for hooligan dipnet fishing, the parking lots will be connected by a new paved path;
6. Replace or reconstruct most existing driveways;
7. Replace eight bridges (at Glacier Creek, Virgin Creek, Peterson Creek, Twentymile River, Portage Creek No. 1, Portage Creek No. 2, Placer River, and Placer River Overflow) and rehabilitate one bridge (at Ingram Creek);
8. Where possible, replace and reduce the existing guardrail length;
9. Improve drainage by replacing or reconfiguring culverts; and
10. Replace/install miscellaneous maintenance/intelligent transportation system features such as: Road Weather Information Systems, Automatic Traffic Recorders, and avalanche protection gun pads.

The environmental effects of the Seward Highway Milepost 75 to 90 Road and Bridge Rehabilitation project are evaluated and described in the Revised Environmental Assessment

(REA) issued pursuant to the National Environmental Policy Act. Key issues identified in the REA include a not likely to adversely affect determination for the Cook Inlet Beluga Whale and designated Critical Habitat, construction mitigation measures to protect the Cook Inlet Beluga Whale and designated Critical Habitat, identification and protection of Section 4(f) historic and recreational properties within the project corridor, and temporary construction effects on local businesses and tourism. Measures to avoid, minimize, and/or mitigate adverse environmental effects are included in the REA and associated Finding of No Significant Impact (FONSI).

The actions by the Federal agencies, and the laws under which such actions were taken, are described in the REA, Section 4(f) evaluations, and FONSI, issued on June 6, 2017, and in other documents in the FHWA project records. The REA, Section 4(f) evaluations, FONSI, and other project records are available by contacting FHWA or the State of Alaska Department of Transportation & Public Facilities at the addresses provided above. II. Background

On June 6, 2017, FMCSA published a notice announcing its decision to renew exemptions for 134 individuals from the insulin-treated diabetes mellitus prohibition in 49 CFR 391.41(b)(3) to operate a CMV in interstate commerce and requested comments from the public (82 FR 26222). The public comment period ended on July 6, 2017 and one comment was received.

As stated in the previous notice, FMCSA has evaluated the eligibility of these applicants and determined that

renewing these exemptions would achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(3).

The physical qualification standard for drivers regarding diabetes found in 49 CFR 391.41(b)(3) states that a person is physically qualified to drive a CMV if that person:

Has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control.

III. Discussion of Comments

FMCSA received one comment in this preceding. Irene Muluh stated that she is in favor of renewing the exemptions for all 134 drivers in this notice if they have remained compliant with the standards of the program.

IV. Conclusion

Title: Drug Use by Drivers Arrested for Driving Under the Influence or Driving While Under the Influence of Drugs

Form Number: This collection of information uses no standard forms.

Type of Request: Regular.

Respondents—Under this proposed effort, NHTSA will collect data from approximately 1,000 drivers/participants.

Estimated time per Participant—NHTSA estimates that participants will spend an average of 15 minutes to complete the survey and provide the oral fluid specimen. The respondents would not incur any reporting cost or record keeping burden from the data collection.

Total Estimated Annual Burden Hours: 250 hours per year.

Frequency of Collection: Each participant will provide one oral fluid sample and respond to the survey questions only once during the study period.

Summary of Collection of Information: This study will estimate the prevalence of drugs in drivers arrested for impaired driving. The goal is to better understand the frequency of alcohol, prescription, over-the-counter, and illicit drugs, in impaired driving arrests.

A minimum of 1,000 drivers arrested for impaired driving, who consent to voluntarily participate, will provide an oral fluid sample and respond to interview questions. The oral fluid sample provides information on the participant's use of 50 or more drug(s). Trained researchers will ask
