**IV. Requested Information and Comments**

This section provides specific questions associated with the draft regulatory analysis (ADAMS Accession No. ML16189A050). These questions will also be discussed at the public meeting. The NRC staff will consider the responses to these questions as it revises the regulatory analysis.

*Question 1:* Is the NRC considering appropriate alternatives for the regulatory action described in the draft regulatory analysis?

*Question 2:* Are there additional factors that the NRC should consider in the regulatory action? What are these factors?

*Question 3:* Is there additional information concerning regulatory impacts that the NRC should include in its regulatory analysis for this rulemaking?

*Question 4:* Are all costs and benefits properly addressed to determine the economic impact of the rulemaking alternatives? What cost differences would be expected from moving from the discussed 1,000 year and 10,000 year compliance periods to a single 1,000 year compliance period? Are there any unintended consequences of making this revision?

*Question 5:* Are there any costs that should be assigned to those sites not planning to accept large quantities of depleted uranium for disposal in the future?

*Question 6:* Is NRC’s assumption that only two existing LLRW sites (*i.e.*, EnergySolutions’ Clive Utah disposal facility and Waste Control Specialists’ Texas disposal facility) plan to accept large quantities of depleted uranium for disposal in the future reasonable?

*Question 7:* What additional costs or cost savings, not already considered in the draft regulatory analysis, will the supplemental proposed rulemaking or alternatives cause to society, industry, and government? What are the potential transfer (“pass-through”) costs to the waste generators and processors?
