

related to roadway and interchange ramp embankment fill slopes and the need to eliminate fragmented residual parcels. Additionally, in an email dated July 28, 2017, the FHWA, Ohio Division, upon review of the project's Interchange Modification Study, notified ODOT that the project's preferred alternative constituted the creation of a new interchange, not a modification of the existing US 36/SR 37 interchange. FHWA also determined that the preferred alternative is a partial interchange as a direct connection from I-71 southbound to Sunbury Parkway is not provided. As part of the required documentation to obtain FHWA approval of the interchange study, ODOT was required by FHWA to consider a full interchange that provided all movements, even though it would not be constructed. ODOT reconsidered the above changes and compared them to the findings in the EA. ODOT conducted additional studies as needed and summarized the coordination and findings in an Addendum to the EA, September 20, 2017 Based upon ODOT's review and consideration of the analysis and evaluation contained in the EA and the Addendum to the EA for this project, and after careful consideration of all social, economic, and environmental factors, including input from the state/federal agencies, ODOT has determined that the changes contained within this document do not rise to the level of significance and therefore do not require the recirculation of the EA nor the creation of a supplemental EA document.

The actions by the Federal agencies, and the laws under which such actions were taken, are described in the Environmental Assessment (EA), the Addendum to the EA, and the Finding on No Significant Impact (FONSI), approved on October 16, 2017. The EA, Addendum to the EA, FONSI, and other project records are available by contacting ODOT at the address provided above and can be viewed and downloaded from the project Web site at <https://www.dot.state.oh.us/districts/D06/projects/71/Pages/default.aspx>. Background

On September 12, 2017, DOT released *Automated Driving Systems 2.0: A Vision for Safety* and requested public comment. NHTSA has issued 2.0 as the next step on the path forward for the safe testing and deployment of ADSs. Together, the Voluntary Guidance for ADS and Technical Assistance to States serve to support industry, Government officials, safety advocates, and the public. By replacing the Federal Automated Vehicles Policy, 2.0 responds to public comments, continues the voluntary guidance framework, and assures industry, the States, and the public that the Agency will remain a leader in innovation and safety. The full *Automated Driving Systems 2.0: A Vision for Safety* can be found at www.nhtsa.transportation.gov/av.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA) is in the process of reviewing the *Traffic Records Program Assessment Advisory*, DOT HS 811 644, (Advisory) and requests comments to determine if updates or improvements are appropriate. Based on the input received in response to this notice, and NHTSA's experience in applying the previous Advisory to conduct assessments in the past, we anticipate issuing a revised Advisory by June 2018.
