

Current Actions: Revision/Extension of approval for a collection of information.

Type of Review: Revision.

Affected Public: Individuals and Households, Businesses and Organizations, State, Local or Tribal Government.

Estimated Number of Respondents: 30,000.

Below we provide projected average estimates for the next 3-years:

Average Expected Annual Number of Activities: 20.

Average Number of Respondents per Activity: 1.

Annual Responses: 30,000.

Frequency of Response: Once per request.

Average Minutes per Response: 30.

Burden Hours: 15,000.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose, or provide information to or for a Federal agency. This includes the time needed to review instructions to (1) develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; (2) train personnel and be able to respond to a collection of information, to search data sources, (3) complete and review the collection of information; and to transmit or otherwise disclose the information.

All written comments will be available for public inspection at *Regulations.gov*. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a

currently valid Office of Management and Budget control number.

Gary Washington,

Acting Chief Information Officer.

[Docket No. APHIS-2017-0086]

Availability of an Environmental Assessment for Release of *Aceria drabae* for Biological Control of Hoary Cress

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of availability.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has prepared an environmental assessment relative to permitting the release of *Aceria drabae* for biological control of hoary cress in the continental United States. The environmental assessment considers the effects of, and alternatives to, the field release of a mite, *Aceria drabae*, into the contiguous United States for use as a biological control agent to reduce the severity of hoary cress infestations. We are making the environmental assessment available to the public for review and comment.

DATES: We will consider all comments that we receive on or before January 4, 2018.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2017-0086>.

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS-2017-0086, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2017-0086> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: Dr. Colin D. Stewart, Assistant Director, Pests, Pathogens, and Biocontrol Permits, Permitting and Compliance Coordination, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737-1231; (301) 851-2237; email: Colin.Stewart@aphis.usda.gov.

SUPPLEMENTARY INFORMATION:

Hoary cress species (*Lepidium draba*, *L. appelianum*, and *L. chalapense*) are herbaceous, perennial plants that grow in a variety of habitat and soil types. The hoary cress complex of invasive weeds is native to the Balkans, the Caspian Sea region of southwestern Asia, and the Middle East, and is found throughout Europe. Hoary cress was introduced into the United States from Europe in the late 19th century either with ship ballast or contaminated alfalfa, grass, or grain. Since then, hoary cress has spread to all regions of the United States except the Southeast.

Hoary cress is a perennial weed that reproduces from seeds and a spreading root system. The root system consists of vertical and lateral roots from which rosettes and shoots arise. Hoary cress inhibits and diminishes recreational opportunities, directly impedes crop production, minimizes grazing potential of affected rangelands, degrades wildlife habitat and native plant communities, and restricts waterfowl use of wetlands and stream banks. As a result, farmers, ranchers, recreationists, sportsmen, hunters, and the general public are adversely affected by hoary cress.

Aceria drabae, a mite, was chosen as a potential biological control agent to combat hoary cress due to its very narrow host range and impact on its host, and since the mite is relatively widespread in Europe, it should adapt to varying environmental conditions in North America. The applicant's purpose for releasing *A. drabae* is to reduce the severity of infestations of invasive hoary cress in the contiguous United States.

The Animal and Plant Health Inspection Service's (APHIS') review and analysis of the potential environmental impacts associated with the proposed release are documented in detail in an environmental assessment (EA) entitled "Field release of the gall mite, *Aceria drabae* (Acari: Eriophyidae), for classical biological control of hoary cress (*Lepidium draba* L., *Lepidium chalapense* L., and *Lepidium appelianum* Al-Shehbaz) (Brassicaceae), in the contiguous United States" (September 2017). We are making the EA available to the public for review and comment. We will consider all comments that we receive on or before the date listed under the

heading **DATES** at the beginning of this notice.

The EA may be viewed on the *Regulations.gov* Web site or in our reading room (see **ADDRESSES** above for a link to *Regulations.gov* and information on the location and hours of the reading room). You may also request paper copies of the EA by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the title of the EA when requesting copies.

The EA has been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 29th day of November 2017.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

[Docket No. APHIS–2017–0099]

Notice of Request for Revision to and Extension of Approval of an Information Collection; Importation of Baby Squash and Baby Courgettes From Zambia

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Revision to and extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request a revision to and extension of approval of an information collection associated with the regulations for the importation of baby squash and baby courgettes from Zambia into the continental United States.

DATES: We will consider all comments that we receive on or before February 5, 2018.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2017-0099>.

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2017–0099, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2017-0099> or in our reading room, which is located in Room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the importation of baby squash and baby courgettes from Zambia, contact Ms. Dorothy Wayson, Senior Regulatory Specialist, PPQ, APHIS, 4700 River Road, Unit 133, Riverdale, MD 20737; (301) 851–2036. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851–2483.

SUPPLEMENTARY INFORMATION:

Title: Importation of Baby Squash and Baby Courgettes From Zambia.

OMB Control Number: 0579–0347.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. Regulations authorized by the PPA concerning the importation of fruits and vegetables into the United States from certain parts of the world are contained in “Subpart—Fruits and Vegetables” (7 CFR 319.56–1 through 319.56–81).

Section 319.56–48 provides for the importation of baby squash and baby courgettes from Zambia into the continental United States under certain conditions. These regulations require the use of certain information collection activities, such as inspection of greenhouses, labeling of cartons, maintaining required trapping records, greenhouse approval, greenhouse pest detection notification, and

phytosanitary certificates issued by the national plant protection organization (NPPO) of Zambia with an additional declaration that the baby squash and/or baby courgettes were produced in accordance with the regulations.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 1 hour per response.

Respondents: Growers, packinghouse officials, and the NPPO of Zambia.

Estimated annual number of respondents: 2.

Estimated annual number of responses per respondent: 5.

Estimated annual number of responses: 10.

Estimated total annual burden on respondents: 10 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 29th day of November 2017.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.
