Nature and Extent of Confidentiality: An assurance of confidentiality is not offered because this information collection does not require the collection of personally identifiable information from individuals.

Needs and Uses: This notice and request for comments pertains to the extension of the currently approved information collection requirements concerning hearing aid compatibility (HAC) for wireline handsets used with the legacy telephone network, updated estimates of existing burdens that were included in the February 2015 PRA submission to OMB, and new collections related to HAC for wireline handsets used with advanced communications services (ACS), such as Voice over internet Protocol (VoIP). These handsets are known as ACS telephonic customer premises equipment (ACS telephonic CPE).

Beginning in the 1980s, the Commission adopted a series of regulations to implement statutory directives requiring wireline telephone handsets in the United States (for use with the legacy telephone network) to be hearing aid compatible. In 2010, the Twenty-First Century Communications and Video Accessibility Act (CVAA), Public Law 111–260, sec. 102, 710(b), 124 Stat. 2751, 2753 (CVAA) (codified at 47 U.S.C. 610(b)), amended by Public Law 111–265, 124 Stat. 2795 (technical corrections to the CVAA), amended section 710(b) of the Communications Act of 1934 to apply the HAC requirements to ACS telephonic CPE, including VoIP telephones. In accordance with this provision, the Commission adopted *Access to Telecommunications Equipment and Services by Persons with Disabilities et al.*, Report and Order and Order on Reconsideration, FCC 17–135, released October 26, 2017, which amended the HAC rules to cover ACS telephonic CPE to the extent such devices are designed to be held to the ear and provide two-way voice communication via a built-in speaker.

The information collections contain third-party disclosure and labeling requirements. The information is used to inform consumers who purchase or use wireline telephone equipment whether the telephone is hearing aid compatible; to ensure that manufacturers comply with applicable regulations and technical criteria; to ensure that information about ACS telephonic CPE is available in a database administered by the Administrative Council for Terminal Attachments (ACTA); and to facilitate the filing of complaints about the ACS telephonic CPE.
