

(“VSCS”), VS Simulation (“VS Sim”), and various support tools and documentation. The VS applications are built on an extensible software framework to facilitate ease of integration with new Unmanned Air Systems (“UAS”) and associated payloads. VS has the unique attribute of being designed, *ab initio*, with the idea of enabling a single operator to control multiple UAS in certain situations. Organizations involved with UAS operations, development, testing, and training could benefit from the use of VS. The VS software suite has been utilized in thousands of hours of simulation and hundreds of hours of live flight tests across a variety of Air Force and NASA projects.

This notice is pursuant to the provisions of Section 801 of Public Law 113–66 (2014 National Defense Authorization Act).
