SUPPLEMENTARY INFORMATION:

I. Abstract

Since the mid-1960s, neutral buoyancy has been an invaluable tool for testing procedures, developing hardware, and training astronauts. Neutrally buoyant conditions sufficiently simulate reduced gravity conditions, comparable to the environmental challenges of space. The Neutral Buoyancy Laboratory (NBL) at NASA Johnson Space Center (JSC) provides opportunities for astronauts to practice future on-orbit procedures, such as extravehicular activities (EVA), and to work through simulation exercises to solve problems encountered on-orbit. NASA hires individuals with demonstrated diving experience as NBL Working Divers in teams comprised of four divers; two safety divers, one utility diver, and one cameraman to assist astronauts practice various tasks encountered in space.

NASA allows guest divers, typically non-federal photographers representing the media, opportunities to engage in the NBL diving experience. To participate, guest divers must present a dive physical, completed within one year of the targeted diving opportunity, for review by the NASA Buoyancy Lab Dive Physician.

If the guest diver does not have a current U.S. Navy, Association of Diving Contractors (ADC), or current British standard for commercial diving physical, they are required to complete a medical examination, performed by a certified Diving Medical Examiner. The results of the physical will be documented by on the *JSC Form 1830/ Report of Medical Examination for Applicant* and presented for review prior to participating in diving activities conducted at the JSC Neutral Buoyancy Lab. The associated cost for guest divers to complete the medical examination will vary, typically based on the guest diver's insurance.

A completed JSC Form 1830/Report of Medical Examination, with test results attached as applicable, must be submitted to enable NASA to validate an individual's physical ability to dive in the NBL at NASA Johnson Space Center. The completed JSC Form 1830 will be protected in accordance with the Privacy Act. Records will be retained in accordance with NASA Records Retention Schedules.

SUPPLEMENTARY INFORMATION:

I. Abstract

The NASA Contractor Financial Management Reporting System is the basic financial medium for contractor reporting of estimated and incurred costs, providing essential data for projecting costs and hours to ensure that contractor performance is realistically planned and supported by dollar and labor resources. The data provided by these reports is an integral part of the Agency's accrual accounting and cost based budgeting system. Respondents are reimbursed for associated cost to provide the information, per their negotiated contract price and associated terms of the contract. There are no "total capital and start-up" or "total operation and maintenance and purchase of services" costs associated since NASA policy requires that data reported is generated from the contractors' existing system. The contractors' internal management system shall be relied upon to the maximum extent possible. Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection. They will also become a matter of public record.

II. Methods of Collection

NASA collects this information electronically and that is the preferred manner, however information may also be collected via mail or fax.
