Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Rulemaking Procedure

Because the NRC considers this action to be non-controversial, the NRC is publishing this proposed rule concurrently with a direct final rule in the Rules and Regulations section of this issue of the **Federal Register**. The direct final rule will become effective on March 4, 2019. However, if the NRC receives significant adverse comments on this proposed rule by January 18, 2019, then the NRC will publish a document that withdraws the direct final rule. If the direct final rule is withdrawn, the NRC will address the comments received in response to these proposed revisions in a subsequent final rule. Absent significant modifications to the proposed revisions requiring republication, the NRC will not initiate a second comment period on this action in the event the direct final rule is withdrawn.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

- (1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-

comment process. For example, a substantive response is required when:

(a) The comment causes the NRC staff to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or considered by the NRC staff.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC staff to make a change (other than editorial) to the rule.

For procedural information, see the direct final rule published in the Rules and Regulations section of this issue of the **Federal Register**.

III. Background

The FOIA provides that any person has a right to request and obtain access to federal agency records, except to the extent that any portions of those records are exempt from public disclosure. The FOIA also authorizes agencies to issue regulations specifying a schedule of fees for the processing of those requests (5 U.S.C. 552(a)(4)(A)). These fees are limited to reasonable standard charges for document search, duplication, and review, which may be charged depending on the purpose for which the records are sought and the class of requestor. The NRC's implementing FOIA regulations are found in part 9 of Title 10 of the *Code of Federal Regulations* (10 CFR).

The NRC charges fees for the search and review of agency records in accordance with § 9.37, "Fees for search and review of agency records by NRC personnel," (although as specified in § 9.39, "Search and duplication provided without charge," the NRC will search for records in some instances without charge, and requests for waivers or reduction of fees can be sought as specified in § 9.41, "Requests for waiver or reduction of fees"). Consistent with Office of Management and Budget (OMB) guidelines on fee schedules (52 FR 10012; March 27, 1987), the NRC recoups the direct costs of search and review by charging the hourly rates of the employees performing the task, plus 16 percent for fringe benefits. These OMB guidelines also provide that, where a homogenous or single class of personnel is used, agencies may establish reasonable average rates for the range of salary grades typically involved.

The NRC first established fees for search and review of agency records in 1987 (52 FR 49350; December 31, 1987), and last updated these fees in 2010 (75 FR 41368; July 16, 2010). Recently, as part of the agency's biennial review of fees performed under the Chief Financial Officers Act of 1990 (31 U.S.C. 902(a)(8)), the NRC determined that the search and review rates for agency clerical staff and for professional/managerial staff needed to be increased in order to ensure the NRC continues to recover the direct costs of these activities.

Thus, based on the results of this biennial review, § 9.37(a) will be changed from a GG-7/step 6 salary rate to a GG-9/step 7 salary rate; and § 9.37(b) will be changed from a GG-13/step 6 salary rate to a GG-14/step 7 salary rate.

IV. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111-274) requires Federal agencies to write documents in a clear, concise, well-organized manner that also follows other best practices appropriate to the subject or field and the intended audience. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, "Plain Language in Government Writing," published June 10, 1998 (63 FR 31883). The NRC requests comment on the proposed rule with respect to clarity and effectiveness of the language used.

V. Availability of Documents

The NRC may post materials related to this document, including public comments, on the Federal Rulemaking website at <http://www.regulations.gov> under Docket ID NRC-2017-0144. Filing of Contracts and Purchase Agreements Associated With the Export of Natural Gas

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Proposed interpretive rule.

SUMMARY: The Department of Energy (DOE or the Department) is proposing an interpretive rule to clarify certain DOE regulations governing the export of natural gas, including liquefied natural gas (LNG), under the Natural Gas Act (NGA). Under DOE's regulations, any person seeking authorization to export natural gas from the United States, or to amend an existing export authorization, must provide DOE's Office of Fossil Energy (DOE/FE) with a copy of "all relevant contracts and purchase agreements." DOE is proposing this interpretive rule to clarify the types of contracts and purchase agreements associated with the export of natural gas that DOE considers to be "relevant" for purposes of these regulations.
