[B-60-2019]

**Foreign-Trade Zone (FTZ) 23—Buffalo, New York; Notification of Proposed Production Activity; Panasonic Solar North America (Crystalline Silicon Photovoltaic Solar Panels/Modules and Cells); Buffalo, New York**

Panasonic Solar North America (PSNA, formerly Panasonic Eco Solutions Solar New York America) submitted a notification of proposed production activity to the FTZ Board for its facility in Buffalo, New York. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on September 26, 2019.

PSNA already has authority to produce crystalline silicon photovoltaic (CSPV) cells and solar panels/modules within Subzone 23E. The current request would add a foreign-status material/component to the scope of authority. Pursuant to 15 CFR 400.14(b), additional FTZ authority would be limited to the specific foreign-status component described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt PSNA from customs duty payments on the foreign-status material/component used in export production. On its domestic sales, for the foreign-status organic surface-active agents (texture additives) (duty rate, 3.7%), PSNA would be able to choose the duty rate during customs entry procedures that applies to CSPV cells and solar

panels/modules (duty free). PSNA would be able to avoid duty on the foreign-status material/component which becomes scrap/waste. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The request indicates that the foreign-status component/material is subject to special duties under Section 301 of the Trade Act of 1974 (Section 301), depending on the country of origin. The applicable Section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: [ftz@trade.gov](mailto:ftz@trade.gov). The closing period for their receipt is November 13, 2019.

A copy of the notification will be available for public inspection in the "Reading Room" section of the Board's website, which is accessible via [www.trade.gov/ftz](http://www.trade.gov/ftz).

For further information, contact Diane Finver at [Diane.Finver@trade.gov](mailto:Diane.Finver@trade.gov) or (202) 482-1367.

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

Marine recreational anglers are surveyed to collect catch and effort data, fish biology data, and angler socioeconomic characteristics. These data are required to carry out provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), as amended, regarding conservation and management of fishery resources.

Marine recreational fishing catch and effort data are collected through a combination of mail surveys, telephone surveys and on-site intercept surveys with recreational anglers. The Marine Recreational Information Program (MRIP) Fishing Effort Survey (FES) is a self-administered, household mail survey that samples from a residential address frame to collect data on the number of recreational anglers and the number of recreational fishing trips. The survey estimates marine recreational fishing activity for all coastal states from Maine through Mississippi, as well as Hawaii and Puerto Rico.

FES estimates are combined with estimates derived from complementary surveys of fishing trips, the Access-Point Angler Intercept Survey, to estimate total, state-level fishing catch, by species. These estimates are used in the development, implementation, and monitoring of fishery management programs by NOAA Fisheries, regional fishery management councils, interstate marine fisheries commissions, and state fishery agencies.
