

October meeting will be conducted by webinar only. This webinar-based meeting replaces the in-person meeting previously scheduled to be held in Riverhead, NY. Please see the Council's website (www.mafmc.org) for log-in procedures.

Council address: Mid-Atlantic Fishery Management Council, 800 N. State St., Suite 201, Dover, DE 19901; telephone: (302) 674-2331.

FOR FURTHER INFORMATION CONTACT:

Christopher M. Moore, Ph.D. Executive Director, Mid-Atlantic Fishery Management Council; telephone: (302) 526-5255. The Council's website, www.mafmc.org also has details on the meeting location, proposed agenda, webinar listen-in access, and briefing materials.

SUPPLEMENTARY INFORMATION: The following items are on the agenda, though agenda items may be addressed out of order (changes will be noted on the Council's website when possible).

Monday, October 5, 2020

Executive Committee—2021 Implementation Plan

Review progress on 2020 Implementation Plan, review staff recommendations for 2021 actions and deliverables, public comment opportunity, and develop draft recommendations for 2021 actions and deliverables

Tuesday, October 6, 2020

Spiny Dogfish Committee, Meeting as a Committee of the Whole—Spiny Dogfish Specifications

Review SSC, Advisory Panel, Monitoring Committee, and staff recommendations and adopt 2021-22 specifications

Chub Mackerel Specifications

Review SSC, Advisory Panel, Monitoring Committee, and staff recommendations for 2021 specifications and review previously implemented 2021 specifications and recommend changes if necessary

Executive Order 13921 on Promoting American Seafood Competitiveness and Economic Growth

Finalize prioritized list of recommendations for submission to NMFS

Research Priorities Update

Review approach and timeline for 2021 research priorities evaluation

Ecosystem Approach to Fisheries Management Updates (EAFM)

Summer flounder recreational discard management strategy evaluation and other EAFM activities

Joint Council/SSC Meeting

Direction for SSC Socioeconomic workgroup, science considerations due to missing 2020 data, and risk policy considerations for ocean quahog

Wednesday, October 7, 2020

Bluefish Allocation and Rebuilding Amendment

Approve a range of alternatives for inclusion into a public hearing document

Recreational Reform Initiative

Update on progress and consider initiating a management action

Thursday, October 8, 2020

Update/Overview of the Proposed Rule for the Atlantic Large Whale Take Reduction Plan

Business Session

Committee Reports (SSC and Executive Committee); Executive Director's Report; Organization Reports; and, Liaison Reports

Continuing and New Business

Although non-emergency issues not contained in this agenda may come before this group for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), those issues may not be the subject of formal action during these meetings. Actions will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to M. Jan Saunders, (302) 526-5251, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 11, 2020.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Assistant Regional Administrator for Sustainable Fisheries, Greater Atlantic Region, NMFS, has made a preliminary determination that an Exempted Fishing Permit application contains all of the required information and warrants further consideration. This Exempted Fishing Permit would allow eight commercial fishing vessels to participate in a beam trawl survey in and around the South Fork Wind Farm work area, under the direction of the Commercial Fisheries Research Foundation. Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notice to provide interested parties the opportunity to comment on Exempted Fishing Permit applications.

DATES: Comments must be received on or before October 1, 2020.

ADDRESSES: You may submit written comments by either of the following methods:

- *Email:* nmfs.gar.efp@noaa.gov. Include in the subject line "Comments on CFRF Beam Trawl Survey EFP."
- *Mail:* Michael Pentony, Regional Administrator, NMFS, Greater Atlantic Regional Fisheries Office, 55 Great Republic Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments on CFRF Beam Trawl Survey EFP."

FOR FURTHER INFORMATION CONTACT: Maria Fenton, Fishery Management Specialist, 978-281-9196, Maria.Fenton@noaa.gov.

SUPPLEMENTARY INFORMATION: The Commercial Fisheries Research Foundation (CFRF) submitted a complete application for an Exempted Fishing Permit (EFP) in support of a South Fork Wind Farm Beam Trawl Monitoring Survey. The EFP would temporarily exempt eight commercial fishing vessels from minimum mesh size requirements for vessels using trawl gear at 50 CFR 648.80(b)(2)(i), possession limits and minimum size

requirements specified in § 648 subsections B and D through O; and lobster possession limits and minimum size requirements specified in § 697.20, for sampling purposes only.

Under this EFP, CFRF would conduct up to 24 1-day survey trips September 2020 through July 2022 (1 trip per

month). Prior to the first survey trip, researchers would conduct a scouting trip to visit proposed tow areas. During each survey trip, participating vessels would complete three tows in each of three sampling areas in Southern New England: One sampling area inside the South Fork Wind Farm work area

southwest of Martha's Vineyard (Figure 1), and two reference sampling areas adjacent to the South Fork Wind Farm work area. This would total 9 tows completed per month, and 216 tows completed under the EFP. Surveys would not occur in any areas that are closed to fishing.

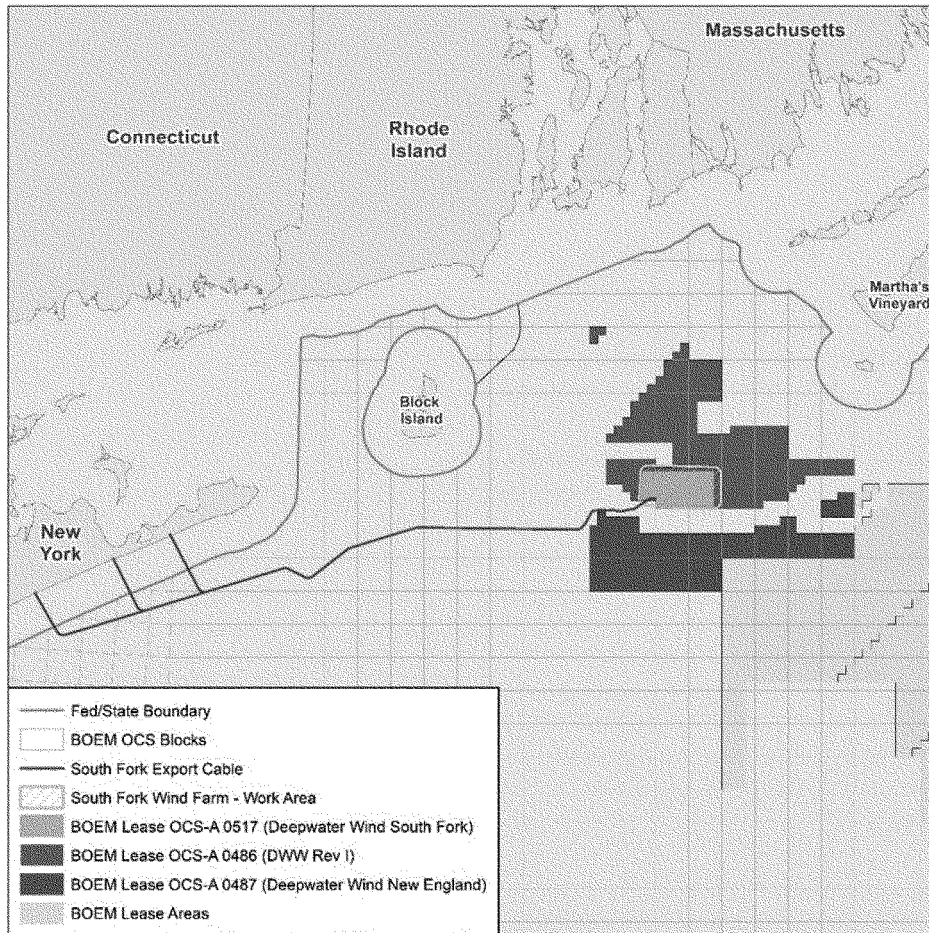

Figure 1 -- Deepwater Wind South Fork Area Map (Credit: Bureau of Ocean Energy Management)

Participating vessels would complete all survey tows using a 3-m beam trawl with a 4.75-inch (12.06-cm) mesh codend and a 1-inch (2.54-cm) knotless codend liner. The mouth of the trawl would be equipped with rock chains to prevent larger rocks from entering the net and damaging the catch or the gear. Each survey tow would last for 20 minutes in duration once the gear is fully deployed.

A sampling team consisting of a lead Research Biologist and an assistant sea sampler would direct sampling activities on all survey trips. The

sampling team would collect hydrographic data (water temperature, dissolved oxygen concentration, and salinity) for near-surface and near-bottom waters at the end of each sampling string. Visual observations on sea state and weather conditions would also be recorded during each sampling session.

After each survey tow, researchers would collect data on:

- Species diversity;
- Catch per unit effort (abundance (count) and biomass (weight, kg) per tow); and

- Length frequency distribution for dominant species and protected species.

After each tow, researchers would sort catch by species, and all individuals would be counted. In order to minimize mortality, any protected species interactions would be prioritized during catch sorting and processing.

Researchers would measure up to 50 individuals of each species per tow, as well as all protected species. Stomach content analysis will be performed for up to 5 individuals of commercially-important species (monkfish, winter skate, gadids, and black sea bass), or up

to 10 total individuals per tow, to determine pre-construction prey composition. Each individual would be measured and weighed to assess relative condition before the stomach is removed. All prey items in the stomach would be identified to the lowest possible identification level, counted, and weighed. Otoliths would be collected from all fish that are sacrificed for biological sampling. Researchers

would take photographs of all species encountered in each tow for verification purposes.

Estimated catch of federally regulated species under this EFP is shown in Table 1. Catch estimates were derived based on survey data from a previous beam trawl survey to evaluate demersal fish and invertebrate communities in and around the South Fork Wind Farm. Researchers do not anticipate catching

any Atlantic cod under this EFP. However, if cod is caught, each individual would be assessed for reproductive stage and spawning condition, and all cod would be sacrificed for biological sampling. No catch would be landed for sale under this EFP, and all individuals (except those sacrificed for biological sampling) would be returned to the water after being processed.

TABLE 1—ESTIMATED CATCH OF FEDERALLY REGULATED SPECIES PER SURVEY TRIP, AND TOTAL ESTIMATED CATCH

Common name	Scientific name	Estimated catch per trip	Estimated total survey catch
Little skate	<i>Leucoraja erinacea</i>	976.9 lb (49.2 kg)	23,444.8 lb (443.1 kg).
Sea scallop	<i>Placopectin magellanicus</i>	754.0 lb (38 kg)	18,095.5 lb (342.0 kg).
Winter skate	<i>Leucoraja ocellata</i>	484.4 lb (25.5 kg)	11,624.5 lb (219.7 kg).
Leucoraja spp. skates (immature)	<i>Leucoraja spp.</i>	132.5 lb (6.7 kg)	3,179.9 lb (60.1 kg).
Winter flounder	<i>Pseudopleuronectes americanus</i>	108.9 lb (5.5 kg)	2,613.8 lb (49.4 kg).
Monkfish	<i>Lophius americanus</i>	96.1 lb (4.8 kg)	2,306.9 lb (43.6 kg).
Spiny dogfish	<i>Squalus acanthias</i>	54.0 lb (2.7 kg)	1,296.3 lb (24.5 kg).
Clearnose skate	<i>Raja eglanteria</i>	53.1 lb (2.7 kg)	1,275.2 lb (24.1 kg).
Ocean quahog	<i>Arctica islandica</i>	34.0 lb (1.7 kg)	814.8 lb (15.4 kg).
Yellowtail flounder	<i>Pleuronectes ferruginea</i>	29.3 lb (1.5 kg)	703.7 lb (13.3 kg).
Barndoor skate	<i>Raja laevis</i>	29.1 lb (1.5 kg)	698.4 lb (13.2 kg).
Summer flounder	<i>Paralichthys dentatus</i>	29.1 lb (1.5 kg)	698.4 lb (13.2 kg).
Windowpane	<i>Scophthalmus aquosus</i>	23.8 lb (1.2 kg)	571.4 lb (10.8 kg).
Silver hake	<i>Merluccius bilinearis</i>	15.9 lb (0.8 kg)	381.0 lb (7.2 kg).
Red hake	<i>Urophycis chuss</i>	12.1 lb (0.6 kg)	291.0 lb (5.5 kg).
American lobster	<i>Homarus americanus</i>	11.5 lb (0.6 kg)	275.1 lb (5.2 kg).
Witch flounder	<i>Glyptocephalus cynoglossus</i>	10.6 lb (0.5 kg)	254.0 lb (4.8 kg).
Ocean pout	<i>Macrozdarces americanus</i>	9.5 lb (0.5 kg)	227.5 lb (4.3 kg).
Longfin inshore squid	<i>Doryteuthis pealeii</i>	5.3 lb (0.3 kg)	127.0 lb (2.4 kg).
Scup	<i>Stenotomus chrysops</i>	5.3 lb (0.3 kg)	127.0 lb (2.4 kg).
Butterfish	<i>Pepilus triacanthus</i>	1.5 lb (0.1 kg)	37.0 lb (0.7 kg).
Surf clam	<i>Spisula solidissima</i>	1.5 lb (0.1 kg)	37.0 lb (0.7 kg).
Black sea bass	<i>Centropristis striata</i>	0.4 lb (0 kg)	10.6 lb (0.2 kg).
Haddock	<i>Melanogrammus aeglefinus</i>	0.4 lb (0 kg)	10.6 lb (0.2 kg).
Nudibranch	<i>Nudibrachia spp.</i>	0.4 lb (0 kg)	10.6 lb (0.2 kg).

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 10, 2020.

Jennifer M. Wallace,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The North Pacific Fishery Management Council (Council) and the Advisory Panel will meet via webconference October 2, 2020 through October 16, 2020.

DATES: The Council’s Advisory Panel (AP) will begin at 8 a.m. on Monday, October 5, 2020 and continue through Friday, October 9, 2020. The Council will meet on Friday, October 2, 2020, from 1 p.m. to 4 p.m., on Friday, October 9, 2020, from 8 a.m. to 4 p.m., and from 8 a.m. on Monday, October 12,

2020 through Friday, October 16, 2020, Alaska Time.

ADDRESSES: The meeting will be a webconference. Join online through the link at <https://meetings.npfmc.org/Meeting/Details/1565>.

Council address: North Pacific Fishery Management Council, 1007 W 3rd Ave., Anchorage, AK 99501-2252; telephone: (907) 271-2809. Instructions for attending the meeting via webconference are given under **SUPPLEMENTARY INFORMATION** Connection Information, below.

FOR FURTHER INFORMATION CONTACT: Diana Evans, Council staff; email: diana.evans@noaa.gov; telephone: (907) 271-2809. For technical support please contact our administrative staff, email: npfmc.admin@noaa.gov.

SUPPLEMENTARY INFORMATION:

Agenda

Monday, October 5, 2020 Through Friday, October 9, 2020

The Advisory Panel agenda will include the following issues:
