The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, it must also serve a copy of the document on that resource agency.

k. *Description of Request*: Brookfield White Pine Hydro, LLC, Merimil Limited Partnership, and Eagle Creek Kennebec Hydro, LLC (licensees) request a temporary variance to deviate from the reservoir elevation and minimum flow requirements pursuant to Article 401 of the license. The variance would allow the licensees to draw down the reservoir in order to perform embankment slope remediation work at the dam. The variance would also allow the licensees to modify the minimum flow releases in order to prioritize the salmonid attraction and spawning flows downstream of the project. Because the embankment slope remediation work will require two construction seasons to complete, the licensees propose to draw down the reservoir and modify the minimum flows during the fall of 2021 and the fall of 2022.
