Title of the Collection: The Health Education and Relationships for Teens Study.

Type of Collection: New.

OMB No. 0990–NEW—Office of Population Affairs/OASH.

Abstract: The Office of Population Affairs (OPA), U.S. Department of Health and Human Services (HHS) is requesting 3 years of approval by OMB on a new collection. The Health Education and Relationships for Teens Study (HEARTS) is expected to be a large, multischool random assignment evaluation of the Love Notes curriculum, a popular relationship education curriculum that is widely implemented among federal teen pregnancy prevention and sexual risk avoidance education grantees. The purpose of HEARTS is to provide evidence of effectiveness of the Love Notes curriculum by examining the impacts of Love Notes on youth outcomes such as knowledge about healthy relationships, self-efficacy and motivation to engage in healthy behaviors, interpersonal communication skills, sexual risk behaviors, and health. The study will be conducted in approximately 40 schools, with half randomly assigned to deliver Love Notes to high school youth in health or other classes and the other half in the control condition with business as usual health programming. Data collection activities are planned to begin in spring 2022 in approximately four to six schools, with additional schools brought into the study during the 2022–23 school year. The study will collect youth outcome surveys at baseline and at 6 months and 12 months following the completion of the program. The study will also collect extensive implementation data, including youth

engagement exit ticket surveys after Love Notes sessions, focus groups with youth, program facilitator logs and

attendance records, and teacher exit ticket surveys after periodic Love Notes

sessions. Study staff will also interview facilitators and site leadership.
