

are expected to allow some higher levels of operations in certain periods (not to exceed the hourly limits) and some recovery from lower demand in adjacent periods. Consistent with general established practice at EWR, the FAA will accept flights above the limits if the flights were operated as approved, or treated as operated, by the same carrier on a regular basis in the previous corresponding season (*i.e.*, Summer 2021).

Notwithstanding the targeted limits at EWR previously described, OST and the FAA have announced the intent to reintroduce and reassign 16 peak afternoon and evening runway timings, which were historically approved for operation by Southwest Airlines, Inc. at EWR prior to the carrier's exit from the airport in November 2019. As proposed, these 16 timings would be reassigned for the benefit of a single low-cost carrier or ultra-low-cost carrier at EWR.⁸ This proposed EWR reassignment process responds to the decision of the Court of Appeals for the D.C. Circuit in *Spirit Airlines v. DOT, et al.*, and furthers the whole of government approach to competition embodied in the President's Executive Order on Promoting Competition in the American Economy (E.O. 14036). This proposed reassignment of schedule timings at EWR is an independent process outside of the FAA's routine schedule review process. While the FAA would accommodate the reassignment of the 16 peak afternoon and evening operations as proposed in the September 20, 2021 notice, the FAA would continue to seek voluntary cooperation from all carriers to adjust schedules at EWR in an effort to manage the operation within the desired scheduling limits. Once the reassignment proceeding is complete, the FAA would seek to work in coordination with the awarded carrier to adjust schedules within the peak afternoon and evening period, including minor changes between adjacent half hours, in the interest of optimizing efficiency and accommodating the carrier's schedule plans, consistent with the usual Level 2 process.

Form Numbers: N/A (electronic).

Type of Review: Renewal of an information collection.

Background: The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on February 2, 2021 (86 FR 7919). The Government Performance and Results Act of 1993 (GPRA) Section 2(b)(3) requires agencies to "improve Federal program effectiveness and public accountability by promoting a new focus on results, service quality, and customer satisfaction". In addition, as stated in the White House "Memorandum for Heads of Executive Departments and Agencies" regarding Executive Order No. 12862, "the actions the order prescribes, such as surveying customers, surveying employees, and benchmarking, shall be continuing agency activities". In compliance with the Government Paperwork Elimination Act (GPEA), all of our data collection will be 100% electronic using an online form; Applicants will be asked to complete the survey just before they exit the system. The AVIATOR Customer Satisfaction Survey is designed to identify potential problems with FAA's automated staffing solutions as well as to evaluate customer satisfaction with the on-line application process. The information is not gathered by any other collection. It will be difficult, if not impossible, to improve the AVIATOR system's overall performance and customer satisfaction without utilizing the survey as a performance measurement tool.

Respondents: 138,953 U.S. citizens, identified as applicants (from January 1, 2019 to December 31, 2019) applying for employment with the Federal Aviation Administration, had the opportunity to complete a survey. 9% (13,019) of applicants completed surveys during this time frame.

Frequency: On occasion/as interested.
Estimated Average Burden per Response: 3 minutes per response.

Estimated Total Annual Burden:
13,019 respondents × 0.05 (3/60) = 651 hours.
