#### SUPPLEMENTARY INFORMATION: Titles:

FERC–500 (Application for License/Relicense for Water Projects with More than 10 Megawatt (MW) Capacity) and FERC–505 (Application for Small Hydropower Projects and Conduit Facilities including License/Relicense, Exemption, and Qualifying Conduit Facility Determination).

*OMB Control Nos.:* 1902–0058 (FERC–500) and 1902–0115 (FERC–505).

*Type of Request:* Extension of currently approved information collections.

*Abstract:* Part I of the Federal Power Act (FPA)<sup>1</sup> authorizes the Commission to grant hydropower licenses and exemptions to citizens of the United States, or to any corporation organized under the laws of United States or any State thereof, or to any State or municipality. Holders of such licenses and exemptions construct, operate, and maintain dams, water conduits, reservoirs, power houses, transmission lines, or other project works necessary or convenient for the development and improvement of navigation and for the development, transmission, and utilization of power across, along, from, or in any of the streams or other bodies of water over which Congress has jurisdiction. This jurisdiction stems from Congressional authority to regulate commerce with foreign nations and among the several States, or upon any part of the public lands and reservations of the United States.

FERC–500 and FERC–505 comprise applications and other information collection activities implemented under numerous regulations. Some of the regulations are relevant to both FERC–500 and FERC–505, and others are relevant only to FERC–500 or FERC–505. Effective October 4, 2021,<sup>2</sup>

<sup>1</sup> 16 U.S.C. 791a–823g.

<sup>2</sup> Before October 4, 2021, FERC–500 applied only to projects with an installed capacity of more than 5 MW. On August 5, 2021, the Commission published a final rule that affected the paperwork burdens of FERC–500 by changing the regulatory threshold for certain licensing requirements from 5 MW to 10 MW. As a result, the regulatory threshold for FERC–500 is now projects with an installed capacity of more than 10 MW. See Final Rule, Docket RM20–21–000, 86 FR 42710 (Aug. 5, 2021).

information collection activities within FERC–500 are for projects with an installed capacity of more than 10 MW. Information collection activities within FERC–505 are for other smaller projects. The applicability and required contents of each activity are listed at the pairs of regulations listed in the following table:

Title	18 CFR cites	FERC–500	FERC–505
Application for License for Major <sup>3</sup> Unconstructed Project and Major Modified Project	4.40 and 4.41	Yes	Yes
Application for License for Major Project—Existing Dam	4.50 and 4.51	Yes	Yes
Application for License for Minor <sup>4</sup> Water Power Projects and Major Water Power Projects More Than 10 Megawatts.	4.60 and 4.61	No	Yes
Application for License for Transmission Line Only	4.70 and 4.71	Yes	Yes
Exemption of Small Conduit Hydroelectric Facilities	4.90 and 4.92	No	Yes
Exemption of Small Hydroelectric Power Projects of 10 Megawatts or Less	4.101 and 4.107	No	Yes
Application for Amendment of License	4.200 and 4.201	Yes	Yes
Notice of Intent to Construct Qualifying Conduit Hydropower Facilities	4.400 and 4.401	No	Yes
Application Under the Integrated Licensing Process	5.1 and 5.18	No	Yes

Each of the “contents” regulations listed above requires information that assists the Commission in identifying the respondent and the type of proposed project. In addition, certain types of applications must include all<sup>5</sup> or some<sup>6</sup> of the following exhibits:

- Exhibit A is a description of the project.
- Exhibit B is a statement of project operation and resource utilization.
- Exhibit C is a proposed construction schedule for the project.
- Exhibit D is a statement of project costs and financing.
- Exhibit E is an environmental report.
- Exhibit F consists of general design drawings of the principal project works described under Exhibit A and supporting information used as the basis of design.
- Exhibit G is a map of the project.

No exhibits are required in a Notice of Intent to Construct Qualifying Conduit Hydropower Facilities under 18 CFR 4.401. However, the Notice of Intent must include:

- Statements that the proposed project will use the hydroelectric potential of a non-federally owned conduit and that the proposed facility has not been licensed or exempted from the licensing requirements and Part I of the FPA;
- A description of the proposed facility;
- Project drawings;
- If applicable, the preliminary permit number for the proposed facility; and
- Verification in accordance with 18 CFR 4.401(g).

In addition to the reporting requirements described above, FERC–500 and FERC–505 also contain requirements for those entities who ultimately receive a FERC license or

exemption. Both information collections include an activity related to recreation signage (18 CFR 8.1 and 8.2), which is used to inform the public of appropriate uses at the project. FERC–500 includes an annual conveyance report (18 CFR 141.15), which must be submitted only if a conveyance of easements or rights-of-way across project lands, or a lease of project lands, has occurred in the previous year.

*Types of Respondents:* Entities requesting Licenses, Relicenses, Exemptions, or Qualifying Conduit Facility Determinations, and certain entities in receipt of Commission Licenses and Exemptions.

*Estimate of Annual Burden:* For FERC–500, the Commission estimates 487 responses, 320,962 hours, and \$27,923,694 annually. For FERC–505, the Commission estimates 324 responses, 24,555 hours, and \$2,136,285 annually. These burdens are itemized in detail in the following table:

<sup>3</sup> As defined at 18 CFR 4.30(b)(14) through 4.30(b)(16), a “major” project has a total installed generating capacity of more than 1.5 MW.

<sup>4</sup> As defined at 18 CFR 4.30(b)(17), a “minor” project has a total installed generating capacity of 1.5 MW or less.

**Ampersand Ogdensburg Hydro, LLC; Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests**

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

- a. *Application Type:* Extension of License Term.
- b. *Project No:* 9821–107.
- c. *Date Filed:* May 26, 2021.

<sup>7</sup> There is one response per respondent for each activity in this information collection.

<sup>8</sup> Commission staff estimates that the average industry hourly cost for this information collection is approximated by the current FERC 2021 average hourly costs for wages and benefits, *i.e.*, \$87.00/hour.

<sup>9</sup> The previously reported 33 responses associated with Comprehensive Plans were incorrect and not consistent in how we have approached the number of respondents for this Information Collection. As a result, the total number of hours associated with the Comprehensive Plans requirement was moved to the total number of hours associated with the application process. The Commission does not break down pieces of this process (as it is all considered one application) and so this edit was made for consistency across the information collection.
