

EPA ICR number: 1139.25.

OMB control number: 2070–0033.

ICR status: This ICR Revision incorporates the activities and burdens currently contained in another ICR that is scheduled to expire on April 30, 2022. The existing ICR that is being revised is currently scheduled to expire on December 31, 2023. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This generic ICR covers the information collection activities associated with the submission of information to EPA pursuant to TSCA section 4 regulatory actions. (15 U.S.C. 2603). Under TSCA, EPA has the authority to issue regulatory actions designed to gather or develop health and safety information and exposure information on chemical substances and mixtures, and to control unreasonable risks associated with new and existing chemical substances. TSCA section 4 authorities allow EPA to require the development of information related to chemicals and the use of prescribed "protocols and methodologies" in order to inform EPA and other federal agencies about chemical risks, which in turn will inform decision makers for purposes of prioritization for risk evaluation, risk evaluation and risk management of those chemicals as necessary.

This revision incorporates the activities and burdens associated with the guidance documents and outreach to stakeholders about submitting Test Orders to the Agency that were recently approved under a separate ICR entitled "User Guide for submitting TSCA Section 4 Test Order Information," and identified by EPA ICR No. 2697.01 and approved under OMB Control No. 2070–0215, which is scheduled to expire on April 30, 2022. Merging these ICRs is appropriate because the activities are integrated components of the same information collection program. Upon approval of this revised Generic ICR, EPA will be able to discontinue that ICR because the activities and burden will be covered by this revised ICR.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to annual average 137 hours per response. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/Affected Entities: Entities potentially affected by this ICR are manufacturers (including imports) or processors of chemical substances of mixtures, which are mostly chemical companies classified under NAICS Code 325 and 324.

Respondent's obligation to respond: Mandatory, 15 U.S.C 2603.

Estimated total number of potential respondents: 175.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 1.5.

Estimated total annual burden hours: 32,435 hours.

Estimated total annual costs: \$8,072,601, includes \$5,447,620 annualized capital or operation and maintenance costs.

III. Are there changes in the estimates from the last approval?

There is an overall increase of 288 hours in the total respondent burden that is currently approved by OMB for this ICR. This increase reflects the incorporation of the activities and burdens associated with the addition of guidance documents and pre-issuance outreach for Test Orders recipients.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.
