Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* The applicant requests a temporary variance from the surface elevation requirements under Article 402 at the Silver Lake Storage Basin (SLSB) and Dead River Storage Basin (DRSB) due to ongoing drought conditions at the project. The applicant is currently in dry year consultation with the Michigan Department of Natural Resources, Michigan Department of Environment, Great Lakes, and Energy, and U.S. Fish and Wildlife Service. Due to the potential long-term nature of the variance, the applicant requests a temporary variance from the license requirements until impoundment elevations return to normal levels.

Additionally, the applicant proposes to modify the start-of-month target reservoir surface elevation requirements at the SLSB and DRSB for the year 2022. Specifically, the applicant proposes to increase the SLSB start-of-month target elevations in February and March from

1,477.5 to 1,479.0 feet National Geodetic Vertical Datum (NGVD); April from 1,477.5 to 1,485.0 feet NGVD; May from 1,479.0 to 1,485.0 feet NGVD; June from 1,481.0 to 1,485.0 feet NGVD; July from 1,481.5 to 1,485.0 feet NGVD; August from 1,480.0 to 1,482.5 feet NGVD; September and October from 1,479.5 to 1480.0 feet NGVD. The licensee would continue to maintain the target elevations for the remaining months as required by Article 402. The applicant proposes to increase the DRSB start-of-month target elevation for May from 1,340.0 to 1,341.0 feet NGVD. The applicant states that the temporary variance will allow the applicant to continue to determine if there are operational modifications that can be employed to improve water quality in the Dead River, as well as to proactively allow for increased storage in the impoundments in the event that the watershed receives significant precipitation and/or snowmelt in the spring.
