

- Working with State and local agencies to implement holistic technology solutions and process changes. This might include helping them prototype, test, and iterate on potential solutions; and evaluating existing products or developing new ones for adoption by agencies. The Center might assist State and local agencies in procuring or implementing these solutions and measuring their impact on enrollment and retention.

Examples of solutions aimed at improving the applicant and participant experience may include:

- Participant-facing technology tools such as online schedulers, document uploaders, and participant portals;
- Data matching, interoperability, and/or cross-enrollment projects to reduce the documentation burden on participants;
- Technology platforms, which allow applicants to choose video, phone, text, or other voice applications to connect with WIC clinics;
- Content updates, such as content strategy or plain language updates to websites, forms, or notices;
- Data analytics tools; and
- Process improvements.

In addition to providing direct support to State and local agencies, FNS expects the Center to identify, evaluate, develop, and disseminate effective solutions and technical standards across States, and help WIC State agencies leverage their data to improve the WIC customer experience. It will also facilitate collaboration between WIC State agencies to address common operational issues.

FNS anticipates that the Center will support multiple WIC State agencies at once. The Center should have quick access to talent covering a spectrum of potential needs, and must be agile and capable of meeting shifting goals and objectives as they learn more about the problem space.

II. Responses

FNS is seeking information from stakeholders on the following questions. Responses should be limited to 10 single-spaced pages that follow the formatting guidelines above. Respondents should not include proprietary information or concepts in their responses.

FNS requests the following information:

(1) What capabilities should the Center have to effectively support State and local WIC agencies in implementing new technology solutions and process changes?

(2) How should the Center evaluate WIC State agency needs and prioritize projects?

(3) How should the Center work with State and local WIC agencies to help them modernize their WIC programs and improve the participant journey through WIC?

(4) How should the Center share and promote the reuse of best practices, solutions, code, reference implementations, and other resources among WIC State agencies to help them address common operational issues that impact the customer experience?

(5) How would you define and measure success for the Center?

(6) What risks do you foresee in establishing a Center to support WIC State agencies? How would you mitigate those risks?

(7) Do you have any other feedback or suggestions on this Center-based approach? Please describe in detail.

Cynthia Long,

Administrator, Food and Nutrition Service.

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Survey of Income and Program Participation

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us

assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on May 19, 2020 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: U.S. Census Bureau, Department of Commerce.

Title: Survey of Income and Program Participation.

OMB Control Number: 0607–1000.

Form Number(s): None.

Type of Request: Regular submission, Request for a Revision of a Currently Approved Collection.

Number of Respondents: 70,560.

Average Hours Per Response: 63 minutes.

Burden Hours: 74,088.

Needs and Uses: The SIPP collects information about a variety of topics including demographics, household composition, education, nativity and citizenship, health insurance coverage, Medicaid, Medicare, employment and earnings, unemployment insurance, assets, child support, disability, housing subsidies, migration, Old-Age Survivors and Disability Insurance (OASDI), poverty, and participation in various government programs like Supplemental Nutrition Assistance Program (SNAP), Supplemental Security Income (SSI), and Temporary Assistance for Needy Families (TANF). In the spring of 2021, as part of the American Rescue Plan, the child tax credit was expanded, and the Internal Revenue Service (IRS) was instructed to pay out monthly benefits. The 2022 SIPP instrument will collect receipt of the child tax credit payments.

The SIPP sample is nationally representative, with an oversample of low-income areas, in order to increase the ability to measure participation in government programs.

The SIPP program provides critical information necessary to understand patterns and relationships in income and program participation. It will fulfill its objectives to keep respondent burden and costs low, maintain high data quality and timeliness, and use a refined and vetted instrument and processing system. The SIPP data collection instrument maintains the improved data collection experience for respondents and interviewers and focuses on improvements in data quality and better topic integration.

Starting in 2019, the Census Bureau and the Social Security Administration (SSA) entered into a joint agreement where both agencies support the SIPP program by contributing resources to add, process, review, and maintain

additional content on marital history, parental mortality, retirement and pension, and disability. This joint agreement started in September 2019 and goes until September 30, 2023.

The SIPP instrument is currently written in Blaise and C#. It incorporates an Event History Calendar (EHC) design to help ensure that the SIPP will collect intra-year dynamics of income, program participation, and other activities with at least the same data quality as earlier panels. The EHC is intended to help respondents recall information in a more natural “autobiographical” manner by using life events as triggers to recall other economic events. For example, a residence change may often occur contemporaneously with a change in employment. The entire process of compiling the calendar focuses, by its nature, on consistency and sequential order of events, and attempts to correct for otherwise missing data.

Since the SIPP EHC collects information using this “autobiographical” manner for the prior year, due to the coronavirus pandemic, select questions were modified to include answer options related to the pandemic as well as adding new questions pertaining to the pandemic. For instance, we adjusted the question regarding being away from work part-time to include being possibly furloughed due to coronavirus pandemic business closures. We also added new questions to collect information on whether the respondent received any stimulus payments.

Affected Public: Individual or households.

Frequency: Annually.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13, United States Code, Sections 141, 182.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function and

entering either the title of the collection or the OMB Control Number 0607–1000.

Needs and Uses: Information on work experience, personal income, noncash benefits, current and previous year health insurance coverage, employer-sponsored insurance take-up, and migration is collected through the ASEC. The work experience items in the ASEC provide a unique measure of the dynamic nature of the labor force as viewed over a one-year period. These items produce statistics that show movements in and out of the labor force by measuring the number of periods of unemployment experienced by people,
