SUPPLEMENTARY INFORMATION:
Title: Post-Hurricane Research and Assessment of Agriculture, Forestry, and Rural Communities in the U.S. Caribbean.
OMB Number: 0596-0246.
Expiration Date of Approval: February 28, 2022.

Type of Request: Renewal with revisions.

Abstract: In September 2017, two major hurricanes passed through the Caribbean, causing catastrophic damage to communities, infrastructure, farms, and forests across Puerto Rico, U.S. Virgin Islands, and many neighboring island nations, significantly compromising local livelihoods, food security, and economic stability throughout the region. Through a series of focus groups and interviews conducted in 2018 and 2019 under OMB Approval #0596-0246, we gathered extensive information about

the wide range of effects and associated impacts of the hurricanes on agricultural and forest systems and the varied states of hurricane readiness and resilience across farm and forest sectors throughout the U.S. Caribbean. Building on this information and understanding of agricultural and forest systems, USDA Forest Service seeks a renewal with revisions to continue to collect information about the recovery of farms, forests, and rural communities from the effects and associated impacts of hurricanes Irma and Maria and to collect additional information about agriculture and forest sector hurricane vulnerabilities, mitigation, adaptation, readiness, and resilience. Such information is critical to the design and implementation of ongoing recovery work and to longer-term resilience and sustainable development efforts in the U.S. Caribbean and in other regions affected by hurricanes or other major disturbances.

The information to be collected is essential to the Department of Agriculture mandate to support agriculture and natural resources that are productive, sustainable, and provide benefits for the American public under the Rural Development Policy Act of 1980, and to the Forest Service mandate to provide expert advice and conduct research on the management of forests outside the National Forest System through the Cooperative Forestry Assistance Act of 1978. Additionally, the importance of gathering, analyzing, and sharing this type of information is reflected in the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended, and the Forest and Rangeland Renewable Resources Research Act of 1978.

Information will be collected through mixed methods, including interviews with and surveys of research participants selected purposively in line with the research objectives. This collection will be revised to further explore the topics in the original information collection and incorporate additional lines of inquiry related to the longer-term recovery of farms, forests, and rural communities and associated changes in hurricane risk, vulnerabilities, and resilience since the

2017 hurricanes. Revisions in this renewal request also include the development and use of survey tools that incorporate multiple choice and other closed ended questions that permit quantitative analysis of the topics of inquiry, in addition to open ended questions, which produce more detailed data for qualitative analysis. This renewed collection and its revisions will generate scientifically based, up-to-date information that can be used to inform ongoing recovery, resilience, and sustainable development efforts in agriculture and forest systems in the U.S. Caribbean by USDA, Forest Service, other Federal agencies, local government, civil society, and the private sector.

Affected Public: Individuals and Households, Private Sector Businesses, Non-Profit and Non-Governmental Organizations, State or Local Government.

Estimate of Annual Burden per Response: 15 minutes for surveys, 25 minutes for interviews.

Estimated Annual Number of Respondents: 250.

Estimated Annual Number of Responses per Respondent: 1 response/ respondent.

Estimated Total Annual Burden Hours on Respondents: 110 hours.

Comment Is Invited: Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the Agency, including whether the information will have practical or scientific utility; (2) the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. USDA Forest Service will consider the comments received and amend the information collection as appropriate.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission request toward Office of Management and Budget approval.
