SUPPLEMENTARY INFORMATION:

Title: Agriculture Organisms and Vectors; Import and Transport Permits.

OMB Control Number: 0579–0213.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal Health Protection Act (AHPA) of 2002 (7 U.S.C. 8301 *et seq.*) authorizes the U.S. Department of Agriculture (USDA) to oversee the importation, entry, and movement in the United States of animals, pests or diseases, or any material or tangible object that could harbor them. Under the AHPA, USDA regulates certain organisms, vectors, and animal products that could pose a severe threat to animal health or to animal products through the risk of disease or pest introduction.

The Animal and Plant Health Inspection Service (APHIS) has the primary responsibility for implementing the provisions of the AHPA within USDA. APHIS regulations for these activities are contained in 9 CFR part 94 (animals and animal products), 9 CFR part 95 (animal byproducts), and 9 CFR part 122 (organisms and vectors). There is also a requirement for an individual or entity, unless specifically exempted under the regulations, to apply for and be granted, by APHIS, a permit authorizing specific import or transport activities for regulated materials prior to receipt of the requested materials.

The permit application process entails the use of forms designed to obtain critical information concerning individuals or entities seeking a permit, as well as the specific characteristics of the material to be permitted. This data is needed, in part, to allow APHIS to assess the risk of importing or transporting the material, as well as the

biosecurity and biosafety mitigations in place at the receiving location. This, in turn, enables APHIS to ensure that appropriate safeguard, containment, and disposal requirements commensurate with the risk of the materials are implemented during transport, import, and upon receipt to protect against the spread or introduction of disease.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 1.84 hours per response.

Respondents: Researchers, universities, research and development organizations, diagnostic laboratories, and other interested parties who possess, use, or transfer select agents or toxins.

Estimated annual number of respondents: 3,154.

Estimated annual number of responses per respondent: 1.

Estimated annual number of responses: 3,283.

Estimated total annual burden on respondents: 6,055 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request

for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 9th day of November 2021.

Jack Shere,

Administrator, Animal and Plant Health Inspection Service.

The Office of Management and Budget has approved publication of this Notice after expedited review.

SUPPLEMENTARY INFORMATION: The Access Board is publishing this notice

to inform the public of the creation of a new system of records relating to accommodation requests from Access Board employees and applicants. Section 501 of the Rehabilitation Act of 1973 requires federal employers to provide reasonable accommodations to qualified individuals with disabilities who are employees or applicants, unless doing so would cause undue hardship. 29 U.S.C. 791. Similarly, Title VII of the Civil Rights Act of 1964 requires an employer, once on notice, to reasonably accommodate an employee whose sincerely-held religious belief, practice, or observance conflicts with a work requirement, unless providing the accommodation would create an undue hardship. 42 U.S.C. 2000e. Reasonable accommodations provide modifications or adjustments to: (1) The job application process; (2) the work environment; and/or (3) the manner in which a position is customarily performed. The proposed records system is necessary to allow the Access Board to collect and maintain records on employees or applicants who request reasonable accommodations based on either disability or sincerely-held religious belief, practice, or observance. Additionally, it will also enable the Board to track and report the processing of accommodation requests agency-wide to comply with applicable laws and regulations.
