SUPPLEMENTARY INFORMATION:

I. Abstract

The New York City Housing and Vacancy Survey (NYCHVS) is sponsored by the New York City Department of Housing Preservation and Development and is conducted approximately every three years. The Census Bureau has conducted the survey for the City since 1962. The primary purpose of the survey is to measure the net rental vacancy rate as it is used to determine the continuation of current rent regulation laws in New York City. NYCHVS survey data are also used by policymakers, advocates, and researchers to inform policy and analyze housing costs and conditions in the City.

Detailed data from the survey cover many characteristics of the City's housing market, including characteristics of the City's population, households, housing stock, and neighborhoods. Data collected about each person in the household include housing costs and burden, income and employment, and key demographics, including membership in protected classes. On the household level, the NYCHVS collects data including total housing costs and income, public assistance, and residential history. Data on the City's housing stock include building and unit quality and condition, rent regulatory and homeownership status, and unit size and accessibility.

II. Method of Collection

The NYCHVS is collected by personal visit or telephone interview. All interviews are conducted via a Computer-Assisted Personal Interview (CAPI) instrument.
